*PROJECT SIZE IN MEGAWATTS SHOWN IN DC (DIRECT CURRENT)

PSEG Power has other attractive sources of revenues to round out a robust portfolio, in addition to energy and capacity

Gas Asset Optimization

- Large wholesale provider to PSE&G and others
  - Storage capacity of approximately 75 Bcf (in the Gulf and market regions)
  - Firm transportation of 1.3 Bcf/day on seven pipelines
- Off-system sales margins shared with residential customers
- Commercial & Industrial customers (C&I)
- Weather and price volatility

Ancillary Services

LIPA fuel and energy dispatch management

SI-SSA-0015-04019

PSEG Power is an established leader

within the industry

INPO

- National Nuclear Accrediting Board

NEI

- Communications Advisory Committee
- Board of Directors
- Board of Directors Executive Committee
- Emergency Preparedness Working Group
- Security Working Group
- Fukushima Response Steering Committee
- Joint Information System Task Force
- Nuclear Strategic Issues Advisory Committee Steering Group

EPRI

- Chairman Nuclear Power Council
- Executive Committee Nuclear Power Council

BWR Owners Group

- Vice Chair of the Executive Oversight Committee

Utilities Service Alliance (USA) Fleet

- Chair

EPSA

- Executive committee member

UWAG

- Chair of the Cooling Systems Committee

PJM/NY/ISO-NE

- Member of various Committees at PJM
- Chairman & Vice-Chair of the Supplier Sector of the New England Power Pool (NEPOOL)
- Chair of the PJM Power Providers Board
- Board member & member of the board's Executive Committee of Independent Power Producers of New York (IPPNY)

EEI

- Member of water resources subcommittee

National Coal Council

- Member of Executive Committee

SI-SSA-0015-04020

Developing People to drive operational excellence and to optimize the workforce

- Succession planning and development planning
  - Recent CNO retirement & succession was part of the plan
- Training & development of employees
- Rotational assignments for key leaders in PSEG Power
- Outreach programs
- Employee engagement
- Shared resources between Fossil and Nuclear (outage support)
- Diversity & inclusion

SI-SSA-0015-04021

PSEG Power's focus on costs

has resulted in moderate increase in O&M for seven years

Cost control actions taken:	
• Fossil plant assessment • CCGT material condition assessment • Vendor contract renegotiations • Nuclear security services brought in-house to control costs	• Nuclear maintenance productivity study • Nuclear outage efficiency initiative • Materials management

SI-SSA-0015-04022

PSEG

We make things work for you.

Market Review: Winter Z6 gas prices retain seasonal volatility; spark spreads have continued to be robust in PJM

2015 YTD Z6

2015-2018 Z6

PJM West vs. PS Zone Spark Spreads (2013-2018)

SI-SSA-0015-04025

Power Basis in Eastern PJM: Expected to be volatile and negative on an annual basis for 2015 and 2016

Electric Basis is negative however it is viewed to be stabilizing and turning back to positive within 2 years due to:

- Export of ~18 bcf/day of gas which will significantly strengthen regional gas prices
- Easing of transmission constraints in Virginia/Maryland
- Construction of significant new gas-fired generation in VA/MD

SI-SSA-0015-04026

PSEG

ANNUAL FORWARD BASIS TO PJM-WEST AS OF AUGUST 3, 2015.
E = YTD ACTUAL PLUS FORWARD; F = FORWARD

Market Review: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

Power's Gas for Generation in 2014

- PSEG Power maintains a robust portfolio of pipeline and storage assets in the Mid-Atlantic
- PSEG Power's gas for generation was ~100 BCF in 2014, of which >60% was supplied by Shale gas
- PSEG Power procured over 400 BCF in 2014 with ~75% going to PSE&G's utility gas customers
- When gas is surplus to customer needs, PSEG Power sells surplus to others; margins from such sales benefit PSE&G gas customers and PSEG Power

SI-SSA-0015-04027

Market Review: New pipelines will move significant quantities of Marcellus gas out of the region by 2018

Historical and Expected Marcellus Production

Pipeline capacity grows significantly by 2018

New pipeline investment is expected to increase takeaway capacity from the low cost Marcellus/Utica shale and reduce regional surpluses and increase gas prices by 2018

SI-SSA-0015-04028

Northeast Portfolio: New York and New England

New England (972 MW)

- Small but dynamic market
- Significant improvement in market construct
- High volatility due to extreme (winter) weather conditions
- Significant siting and permitting challenges
- Gas pipeline infrastructure poses supply challenges/opportunity

New York (774 MW)

- Single state ISO
- Investment in new lateral to connect to the Dominion pipeline at Bethlehem Energy Center (BEC) allows for access to fuel supply from Marcellus
- Long Island Power Authority Fuel Management Contract

SI-SSA-0015-04029

Northeast Portfolio: Expanding our footprint with PSEG Long Island

PSEG Power acting as an agent for LIPA began January 2015

- Performing ISO bidding for LIPA's 6,000 MWs of generation/tolls
- Procuring natural gas and oil for the majority of these assets
- Scheduling two DC transmission cables (ISO-NE and PJM) into Long Island
- Entering into financial hedges to reduce LIPA customer's price volatility

This relationship has provided PSEG Power:

- Additional experience in Eastern NY and Connecticut markets
- Bigger natural gas footprint
- Fee-based services contract

SI-SSA-0015-04030

Capacity Market Pricing: ~98% of Power's PJM fleet that cleared the 2018/2019 RPM auction **met the new CP standards**

RPM – Auction Results				
Delivery Year	2015 / 2016*	2016 / 2017*+	2017 / 2018+	2018 / 2019
Power's Average Prices*($/MW-day)	$168	$172	$177	**$215**
RTO Prices ($/MW-day)	$136	$59	$120	$165/$150 (CP/Base)
Power's Cleared Capacity (MW)	8,750	8,700	8,700	**8,650**
PJM Capacity Revenues ($ Millions)				
Calendar Year	2016	2017	2018	Through 5/31/19
Capacity Revenues	$542	$555	$631	$281

	Price $/MWh	$53	$51	$50

HEDGE PERCENTAGES AND PRICES AS OF JUNE 30, 2015. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS. EXCLUDES SOLAR AND KALAELOA.

SI-SSA-0015-04033

PSEG Power's Value Proposition

- Re-positioning fleet to improve efficiency and reliability in attractive markets
- Advantaged by low cost structure, fuel diversity and dispatch flexibility
- Value add from strong gas supply capability
- Significant drive by regulatory bodies to improve market constructs
- Low capital requirements to meet enhanced performance standards
- Organic growth opportunities to increase nuclear and combined cycle generation
- Hedging strategy is responsive to changing market dynamics, providing attractive returns and free cash flow

SI-SSA-0015-04034

PSEG FINANCIAL REVIEW & OUTLOOK

SI-SSA-0015-04035

PSEG

We make things work for you.

Strong financial position to support our business initiatives

2014 Financial Position

- ✓ Strong 2014 earnings growth
- ✓ Exceeded earnings guidance
- ✓ Executed major PSE&G capital program
- ✓ Strong balance sheet with no long term Parent debt
- ✓ Solid credit metrics

2015 and Beyond

- ✓ Third year of anticipated positive earnings growth in 2015
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investment program without equity issuance
- ✓ Substantial additional investment capacity
- ✓ Growth in PSE&G investments with contemporaneous/formula rate returns and new Power investment
- ✓ Consistent and strong cash flow from both Power and PSE&G
- ✓ Potential for accelerated and sustainable dividend growth

SI-SSA-0015-04045

PSEG Summary

- Continued third year of anticipated positive earnings trend in 2015 with updated operating earnings guidance of $2.80 to $2.95 per share
- Continued 5th straight year of expected double digit, 5-year growth in rate base
- Anticipated high single digit earnings growth at PSE&G on a three-year basis from 2014 to 2017, driven by transmission investments and planned programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Power realigning its portfolio with new, efficient CCGT investments in MD and NJ
- Strong Balance Sheet and Cash Flow support PSE&G's capital program and Power's new investment opportunities without the need for equity
- Our $0.08 per share dividend increase for 2015 is consistent with our long history of returning cash to the shareholder through the common dividend, with potential for consistent and sustainable growth

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as for transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies, and
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-04065

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The last slide in this presentation includes a list of items excluded from Net Income to reconcile to Operating Earnings, with a reference to those slides included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

PSEG OVERVIEW

Caroline Dorsa

EXECUTIVE VICE PRESIDENT AND
CHIEF FINANCIAL OFFICER

Kathleen Lally

VICE PRESIDENT
INVESTOR RELATIONS

PSEG

We make things work for you.

SI-SSA-0015-04067

PSEG's Strategy

Investment program delivering results

Operational Excellence: Maintaining reliability and improving performance as we control costs in low price environment

Financial Strength: Strong financial position supports investment program and dividend growth

Disciplined Investment:

- Transformed business mix
- Robust pipeline of opportunities

Results

- Project 3rd year of EPS growth
- Increased rate of dividend growth
- Best in class utility growth rate
- Stable business mix with upside potential from power markets

SI-SSA-0015-04068

Two complementary businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** An $11 billion infrastructure program – focused on transmission – produces double-digit rate base growth through 2019	**Strategy:** Diverse (fuel and dispatch) fleet geographically and environmentally well positioned, with investments to enhance competitiveness **Value Proposition:** Provides substantial free cash flow in current environment and upside from market rule improvements
2014 **Assets $22B** **Operating Earnings $725M**	2014 **Assets $12B** **Operating Earnings $642M**

SI-SSA-0015-04069

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2014.
PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT AND PSEG LONG ISLAND ACTIVITY.
SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: Mid-Atlantic Reliability Award (13th consecutive year), top ranked among eastern electric and gas utilities in business customer satisfaction • PSEG Power: Record output from combined cycle units • PSEG Long Island: Demonstrated management and integration capability through a successful transition in first year • PSEG: Cost-control benefits continue
Financial Strength	• Earnings performance exceeded guidance • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased rate of dividend growth in 2015
Disciplined Investment	• PSE&G ✓ Transmission capital program execution and growth ✓ Energy Strong infrastructure program underway ✓ Energy efficiency program extension ✓ Further growth planned – Gas System Modernization Program • Power: Unit uprates, PennEast Pipeline, Solar Source

SI-SSA-0015-04070

Operating Earnings

Disciplined investment program and focus on operational excellence have supported growth

Power's diverse fuel mix and dispatch flexibility continue to generate strong earnings and free cash flow in low price environment

PSE&G's investment program has driven double digit compound annual earnings growth since 2010

SI-SSA-0015-04071

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/ NET INCOME TO RECONCILE TO OPERATING EARNINGS. E=ESTIMATE
** 2015 PERCENTS USE MIDPOINT OF EARNINGS GUIDANCE.

Robust pipeline of investment opportunities

supports growth objectives

PSEG Capital Spending

2010 – 2014: $12.6 Billion

2015E - 2019E*: $13 Billion

2015E–2019E:

- $1.3B of capital for Gas System Modernization Program and Artificial Island would be incremental

*INCLUDES ALL PLANNED SPENDING. **ENERGY STRONG EXCLUDES RISK AND CONTINGENCY. ***POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. ****INCLUDES PENNEAST PIPELINE EQUITY INVESTMENT OF $0.1B. E=ESTIMATE. DATA AS OF MARCH 2, 2015.

SI-SSA-0015-04072

Balance sheet strength supports capital allocation

Timeframe	Actions taken
2010 – 2014: Transformed business mix	• Applied $16 billion towards investments and dividends • Improved credit ratings • Monetized Energy Holdings' portfolio • Strong balance sheet sustained during period of low power prices, while increasing the dividend
2015 – Forward: Strong financial position supports continued growth	• Increased rate of dividend growth in 2015 • $13 billion investment program through 2019 • Gas System Modernization Program and Artificial Island increase capital program by $1.3 billion through 2019 • Financial capability supports further expansion of the current capital plan

SI-SSA-0015-04073

PSE&G's investment program

Meeting public policy goals and customer needs

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/ NET INCOME TO RECONCILE TO OPERATING EARNINGS.

SI-SSA-0015-04074

Containing customer bills while investing in the system

PSE&G Typical Residential Customer Bills*

- PSE&G customers' combined electric and gas bills declined 23% over the period.
- Low gas prices drove rate decreases; in addition, gas customers received bill credits of ~$400 in total from 2012 through 2014.

SI-SSA-0015-04075

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

PSE&G's robust capital investment pipeline

- Planned capital spending expected to drive double digit rate base growth and high single digit EPS growth through 2017
- Transmission expected to grow to >50% of rate base in 2019
- Gas System Modernization Program and Artificial Island investments would be incremental
- Seeking to broaden platform to expand energy efficiency and other investments

SI-SSA-0015-04076

Power's fleet has the desired attributes to be successful in today's and tomorrow's market

Economic Drivers	Outlook	Combined Cycle	Nuclear	Scrubbed Coal	Peakers	Renewable
Energy Margins	• Low natural gas and energy prices • Robust portfolio of gas pipeline contracts	✓	✓	✓	n/a	n/a
Capacity Markets	• Tightened rules proposed for capacity performance	✓	✓	✓	✓	n/a
Environmental Regulations	• Tighter air emissions standards	✓	✓	✓	✓	✓
Location	• Assets in well-designed markets, premium regions • Opportunities on brownfield sites	✓	✓	✓	✓	n/a
	PSEG Power Capacity (GW) Total 13 GW	3.2	3.6	2.4	3.7	0.1

- **Largest nuclear site** in the eastern U.S. and ownership in **large, fully scrubbed coal facilities** at Keystone and Conemaugh provide **economies of scale** that enhance energy margins in current low market, and provide for upside potential if prices improve.
- **Dual fuel peakers** meet reliability criteria in capacity markets and provide option value in energy market. Opportunity exists to repower peakers that do not meet NJ HEDD environmental regulations.

SI-SSA-0015-04077

Power – Growing value by improving market rules and developing investment opportunities

Value Source	Opportunities and Actions Taken
Improving rules will better recognize value of our fleet	• PJM's Capacity market – 2014 limits on demand response and 2015 Capacity Performance proposal • Demand response treatment at U.S. Courts / FERC • Energy price formation at FERC • Increasing air standards through Federal and State regulations
Our footprint provides growth opportunities	• Nuclear and Combined Cycle plant uprates are underway • Brownfield expansions at existing sites ➢ New peakers built at New Haven and Kearny sites ➢ Continue to explore further opportunities • PennEast pipeline - equity investment and gas portfolio enhancement • Solar Source owns ~123 MW*, with significant project pipeline • Continue to seek opportunities to expand the fleet

SI-SSA-0015-04078

PSEG

*PROJECT SIZE IN MEGAWATTS SHOWN IN DC (DIRECT CURRENT), AC EQUIVALENT IS 96 MW.

PSEG Annual Dividend

An increased dividend growth rate with potential for consistent and sustainable growth given our business mix and financial position

	2011	2012	2013	2014	2015E
Payout Ratio	50%	58%	56%	54%	55%*

*2015E PAYOUT RATIO REFLECTS THE MIDPOINT OF OPERATING EARNINGS GUIDANCE. E=ESTIMATE

SI-SSA-0015-04079

Focus areas over business plan horizon

PSE&G

- **Capital program execution** – Transmission, Energy Strong and additional programs
- **Operational excellence and cost control**
- **Regulatory framework**
- **Continue to develop incremental growth opportunities**

PSEG Power

- **Operational excellence and cost control**
- **Strong performance at Nuclear and Fossil** to maximize fleet value in dynamic markets
- **Monitor and shape market rules** - Capacity markets and environmental regulations
- **Develop growth opportunities**

PSEG Long Island

- **Continue execution** – Integration and achievement of performance metrics

SI-SSA-0015-04080

PSEG's Value Proposition

- A stable platform with predictable earnings and a robust investment pipeline
- PSE&G - Best in class utility performance and growth profile
- PSEG Power - Well-positioned fleet that generates substantial free cash flow in this market environment with upside for improvements in pricing
- Strong balance sheet - Supports strong credit rating, growth objectives and the potential for sustainable dividend growth

SI-SSA-0015-04081

PSE&G

PSEG

We make things work for you.

SI-SSA-0015-04082

PSE&G strategy

Building a sustainable platform that balances reliability, customer rates and public policy to ensure growth at reasonable returns

SI-SSA-0015-04083

PSE&G is the largest electric and gas distribution and transmission utility company in New Jersey

	Electric	Gas
Customers Growth (2010 – 2014)	2.2 Million 0.3%	1.8 Million 0.3%
2014 Electric Sales and Gas Sold and Transported	40,737 GWh	2,628M Therms*
Projected Annual Load Growth (2015 – 2017)**	1.1%	0.5%

SI-SSA-0015-04084

Mid-Atlantic ReliabilityOne award winner for 13 years in a row

SI-SSA-0015-04085

PSE&G's service and reliability is being recognized by customers

SI-SSA-0015-04086

PSE&G has achieved annual growth in operating earnings of ~18% over the past five years

with implementation of supportive rate mechanisms on our expanded capital program and cost control

SI-SSA-0015-04087

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

PSE&G plans to invest $10.8B over the next five years

PSE&G's Capital Expenditures*

*INCLUDES AFUDC. E=ESTIMATE.

SI-SSA-0015-04088

PSE&G's existing major Transmission

projects are being completed on schedule and on budget

Major Transmission Investments

Project Roster	Approved ROE	Inclusion of CWIP in Rate Base	100% Recovery of Costs Due to Abandonment	Estimate Up To ($ Millions)	Expected In-service Date
Susquehanna-Roseland	12.93%	✓	✓	$790	June 2014 -June 2015
Northeast Grid Reliability	11.93%	✓	✓	$907	June-Dec 2015
North Central Reliability	11.68%	✓	✓	$390	Completed
Burlington–Camden 230kV	11.68%	✓	✓	$399	Completed
Mickleton–Gloucester–Camden 230kV	11.68%	✓	✓	$435	June 2015

SI-SSA-0015-04089

A robust pipeline of Transmission

investments focus on reliability improvements and replacement of aging infrastructure

Major Transmission Investments

Project Roster	Approved ROE	Program Description	Estimate Up To ($ Millions)	Expected In-service Date
Bergen—Linden Corridor 345kV	11.68%	PJM baseline project receiving CWIP in rate base treatment	$1,200	June 2018
PJM Regional Transmission Expansion Plan (RTEP) – multiple projects	11.68%	PJM mandated system reliability projects	$1,900	Various
69kV Upgrade – multiple projects	11.68%	Upgrade of 26kV to 69kV	$1,500	Various
Transmission Lifecycle – multiple projects	11.68%	Replacement of aging infrastructure	$1,100	Various
Transmission Hardening– multiple projects	11.68%	Reliability projects focused on system resiliency	$650	Various

*INCREMENTAL INVESTMENT IN HARDENING INCLUDED AS PART OF OTHER PROGRAMS.

Bergen-Linden Corridor is a project which will provide a double-circuit 345kV line designed to maintain system reliability

Project Estimate Up To	Through Year-end 2014	Expected Completion Date
$1,200M	$40M	June 2018

- PJM RTEP project b2436 and b2437 with phased in-service dates
- 30 miles of underground cable
  - New ~ 23 miles
  - Reconductor (Upgrade of 138 to 345) ~7 miles
- 13 miles of double circuit overhead conductor (replacing double circuit 138 with double circuit 345)
- 11 station upgrades to 345kV

Customer Benefit: Addresses thermal and short-circuit reliability

Project Status: Engineering, Licensing and Construction

Marion Substation Pile Installation

SI-SSA-0015-04091

Major Transmission programs focus on reliability and replacing aging infrastructure

- PJM's Regional Transmission Expansion Plan (RTEP) identifies system enhancements needed for reliability
- 69kV system upgrades improve system reliability and provide capacity for future growth
- Transmission Lifecycle is an ongoing program to manage transmission asset life to maintain and improve system integrity and reliability
- Transmission Hardening projects focus on increasing system resiliency

SI-SSA-00015-04092

PSE&G has successfully worked with regulators to develop multiple solutions for New Jersey's energy and economic development goals

RENEWABLES
creative solutions to install solar generation

- Solar Loan I – 2008
- Solar Loan II – 2009
- Solar 4 All – 2009
- Solar Loan III – 2013
- Solar 4 All Ext – 2013

ENERGY EFFICIENCY
assisting customers with controlling energy usage

- Carbon Abatement – 2008
- Demand Response – 2009
- Energy Efficiency (EE) – 2009
- EE Extension – 2011
- EE Extension II – 2015

DISTRIBUTION
improving electric and gas delivery infrastructure

- NJ Capital Infrastructure Program 1 (CIP 1) – 2009
- NJ Capital Infrastructure Program 2 (CIP 2) – 2011
- Energy Strong – 2014

To date we have invested over $2B in the above programs

Over $1B ahead in Energy Strong, Energy Efficiency Ext II* and Solar programs

Gas System Modernization Program would increase potential investment by ~$1.6B

SI-SSA-0015-04093

PSEG

* IF APPROVED.

PSE&G is successfully executing on Energy Strong with ~$150M deployed during the latter half of 2014

Program	Approved	Spend thru 2014
Flood Mitigation	$620M	$19M
Electric Contingency Reconfiguration	$100M	$26M
Electric Advanced Technology	$100M	$10M
Gas Utilization Pressure Cast Iron (UPCI)	$350M	$94M
Gas Metering & Regulating (M&R)	$50M	$1M
TOTAL	$1,220M	$150M

SI-SSA-0015-04094

Energy Strong will provide increased reliability and resiliency

- **Electric Flood Mitigation**
  - Engineering and scheduling began on 16 of the 29 total planned substation projects
- **Electric Contingency Reconfiguration**
  - Over 100 projects have been started and 15 projects have been completed to date, including installation of over 900 poles and 70 reclosers
- **Advanced Technology**
  - A total of 60 relays replaced and 3 remote terminal unit (RTU) has been installed
- **Gas Utilization Pressure Cast Iron (UPCI)**
  - Installed ~110 miles of gas main and replaced ~5,300 services
- **Gas Metering & Regulating (M&R)**
  - Design and engineering completed for all of the eight stations scheduled

SI-SSA-0015-04095

Extension of PSE&G's award winning Energy Efficiency program

- Energy Efficiency Extension II seeks to extend the investment and time frame for three previously approved programs already in the marketplace allowing PSE&G to factor in lessons learned and balance policy issues
- $95M of rate base investment
- If approved, would extend existing programs, two of which have sizable waiting lists:
  - Hospitals
  - Multifamily
  - Direct install – government, non-profit, and small business
- Would allow PSE&G to leverage past investments in people, capabilities, systems and processes

SI-SSA-0015-04096

Gas System Modernization Program of ~$1.6B focusing on aging gas mains

- PSE&G's gas distribution system currently operates and maintains over 4,800 miles of cast iron and unprotected steel main, the largest such system in any single state
- The program provides for investment of ~$1.6B focused on replacing cast iron and unprotected steel main over a five-year period, beginning mid-2016
- Program will replace approximately 160 miles of main per year
  - Requested accelerated clause-based recovery similar to the Energy Strong program with a 9.75% ROE
  - This program is the first phase of a long-term replacement strategy
  - 30-year cast iron and unprotected steel replacement program
- Benefits:
  - Methane emission reduction is estimated at 24,500 metric tons of CO_2 equivalent per year*
  - Higher pressure system allows usage of high efficiency appliances by customers

SI-SSA-0015-04097

PSEG

* EPA SUBPART W METHODOLOGY.

PSE&G's demonstrated ability to successfully execute projects on scope, on time, and on budget leaves us well positioned to pursue FERC 1000 opportunities

- Artificial Island
  - PSE&G's proposal is one of four finalists
  - The proposal includes building 18 miles of 500kV transmission line running from the Hope Creek Generating Station to the Red Lion substation in Delaware
- PJM 2014 Window #2
  - PJM staff has recommended awarding PSE&G two projects to resolve criteria violations in the Sewaren and Mercer areas

SI-SSA-0015-04098

PSE&G continues to receive contemporaneous/ formula rate recovery on ~75% of its investment program

2010-2014 PSE&G Capital Spending by Recovery Method

$9.8B

2015-2019E PSE&G Capital with Potential Upside by Recovery Method

$12.1B

Clause Recovery Mechanisms
- Energy Strong / Infrastructure / Solar / Energy Efficiency
- Gas System Modernization Program

FERC Formula Rates
- Transmission
- Artificial Island

Traditional Recovery Mechanisms
- Distribution Base Rates

SI-SSA-0015-04099

PSE&G has controlled costs

through process improvements and will continue to drive future efficiencies

Cost control actions taken:

- PSE&G is utilizing the Lean Six Sigma discipline to achieve costs savings and process improvements
- Conducted organizational reviews resulting in streamlining of processes through restructuring
- Continued focus on vendor and inventory practices ensuring maximum value
- Successful management of pension

PSEG LONG ISLAND

PSEG

We make things work for you.

SI-SSA-0015-04102

PSEG Long Island is focused on improving customer service and reliability

- Provide best-in-class customer service, including building on our new Call Center Technology platform to better serve our customers
  - According to J.D. Power, in 2014 PSEG Long Island showed the most improvement in overall customer satisfaction of any large electric utility, anywhere in the nation
- Work to maintain industry-leading service reliability
- Improve every aspect of the storm response process
  - Leveraged our new Outage Management System to improve storm logistics and outage coordination
- Contributed $0.02* to PSEG's earnings per share in 2014, as expected

SI-SSA-0015-04103

PSEG

* EXCLUDES THE ENERGY RESOURCES & TRADE CONTRACT, WHICH WILL BE INCLUDED IN PSEG POWER'S RESULTS.

SI-SSA-0015-04104

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-04105

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units have performed well for ten consecutive years • Hope Creek recorded its second highest output in its history • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing market conditions • Bergen 1 & 2 and Linden 1 individually, and the CCGT fleet in total, set generation records in 2014 • Kearny 13 & 14 have shown increasing output in each year since start-up	• Getting the most out of existing fleet • Locational advantage • O&M control programs have delivered a CAGR of 2.6% between 2009 and 2015 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-04106

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program between Nuclear & Fossil initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2014 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch began January 1, 2015 • Completed three projects with one underway, bringing Solar Source's portfolio to 123 MW_{DC} • Nuclear ESP is expected in 2016

SI-SSA-0015-04107

PSEG Power met 2014's challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• All of the generation sites affected by SuperStorm Sandy were restored to service by mid-2014, with ongoing repairs • Cold weather extremes created a challenging operating environment, but also presented opportunities		• Transmission (outages and build outs) and gas markets resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Expedited return from storm outages, restored margin opportunities • High availability when needed • Flexibility of portfolio captured real-time basis opportunities • Captured value through coal/gas switching, unit flexibility • Management of gas assets benefited customers and fleet • Achieved fuel cost savings

SI-SSA-0015-04108

PSEG Power exceeded 2014's earnings guidance

2014 PSEG Power Operating Earnings*
($ Millions)

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS.

SI-SSA-0015-04109

PSEG Power has generating assets

in three competitive markets

- Assets located near load centers
- Low cost portfolio
  - Fuel flexibility with gas cost advantage
- Positioned to benefit from volatility in real-time markets
- Readiness for capacity performance (CP) in PJM
- Fleet positioned to maintain diversity and efficiency after HEDD
- Sites suitable for expansion

SI-SSA-0015-04110

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape
- Readiness for Capacity Performance (CP)

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel capability at 87% of load following and peaking units

SI-SSA-0015-04111

PSEG Power positioned to maintain diversity and efficiency after a realignment of the fleet following HEDD retirements

Objective 2015 → 2017

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Improve environmental & heat rate profiles
- Complete
  - Peach Bottom (PB) uprate
  - Advanced Gas Path (AGP)

Fuel Diversity

Energy Produced

E=ESTIMATE

SI-SSA-0015-04112

PSEG Power's fleet is expected to see improvement in heat rate and decline in emissions

- AGP (Advanced Gas Path) investments
- Other Efficiency improvements
- HEDD retirements

SI-SSA-0015-04113

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing

SI-SSA-0015-04114

PSEG Power Nuclear is a critical element of our success

Hope Creek

- Operated by PSEG Nuclear
- PSEG Ownership: 100%
- Technology: Boiling Water Reactor
- Total Capacity: 1,178 MW
- Owned Capacity: 1,178 MW
- License Expiration: 2046
- Next Refueling
  - Spring 2015

Salem Units 1 and 2

- Operated by PSEG Nuclear
- PSEG Ownership: 57%
- Technology: Pressurized Water Reactor
- Total Capacity: 2,307 MW
- Owned Capacity: 1,324 MW
- License Expiration: 2036 and 2040
- Next Refueling
  - Unit 1 – Spring 2016
  - Unit 2 -- Fall 2015

Peach Bottom Units 2 and 3

- Operated by Exelon
- PSEG Ownership: 50%
- Technology: Boiling Water Reactor
- Total Capacity: 2,242 MW
- Owned Capacity: 1,121 MW
- License Expiration: 2033 and 2034
- Next Refueling
  - Unit 2 - Spring 2016
  - Unit 3 - Fall 2015
- Uprate: 130 MW (PS Share)
  - Unit 2 - March 2015
  - Unit 3 - 2016

SI-SSA-0015-04115

PSEG Power Nuclear has competitive advantages

- Continued strong nuclear operations
- Nuclear excellence program
- Top quartile of cost performance/MWh
  - Brought security services in-house
- Significant earnings contributor
- Recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - FLEX* plan submitted with implementation underway
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

SI-SSA-0015-04116

Power's nuclear fleet is well positioned

with significantly lower-than-average US cost structure

*SOURCE: ELECTRIC UTILITY COST GROUP.
** SOURCE: PSEG NUCLEAR.

SI-SSA-0015-04117

PSEG Power's focus on costs

has resulted in moderate increase in O&M for seven years

Cost control actions taken:	
• Fossil plant assessment • CCGT material condition assessment • Vendor contract renegotiations • Nuclear security services brought in-house to control costs	• Nuclear maintenance productivity study • Nuclear outage efficiency initiative • Materials management

SI-SSA-0015-04118

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS. E=ESTIMATE

PSEG Power's Fossil Fleet has shown improvement in performance

Fossil Generation

Coal Generation

Peaking Start Success*

- Fossil Generation rebounded with market
- Peaking Units maintain high start success
- Record output from Kearny 13 & 14 peakers

Combined Cycle Generation

- Combined Cycle Generation set record
- Bergen AGP uprate project scheduled for 2015

SI-SSA-0015-04119

PSEG

*LM6000 AND 7EA UNITS E = ESTIMATE.

PSEG Power initiatives result in

continuing improvement in combined cycle heat rate

E= ESTIMATE.

SI-SSA-0015-04120

PSEG Power CCGT/Fossil initiatives

Actions Taken to Create Value

Capacity
- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional efficient capacity, heat rate improvements
- New lower cost gas line at BEC with Dominion

Performance
- EPRI efficiency initiatives
- GE initiatives for large data analytic
- Consolidation of unit testing
- Auto tuning software

Maintenance
- Ongoing outage efficiency improvement
- Improvements to reliability
- Central fleet monitoring and diagnostic center

SI-SSA-0015-04121

PSEG Power's capital expenditures for environmental requirements are essentially complete*

*BASED ON CURRENTLY KNOWN AND QUANTIFIABLE ENVIRONMENTAL REQUIREMENTS. E=ESTIMATE. DATA AS OF DECEMBER 31, 2014.

SI-SSA-0015-04122

PSEG Power's Growth Investments

Site	Project	Cost ($ millions)	Benefits	Status
BEC	Dominion Gas Line	$8	Access to a 2nd, lower cost gas supply: $8-9 million/year increase in margin	Completed
Linden	AGP Upgrade	$69	Increased capacity and improved heat rate: 63 MW capacity increase ~1.2% heat rate improvement	Completed
Linden Kearny	Black Start: Linden 7/8 Kearny 12	$13	New ancillary revenue source: ~ $3 million per year	Linden Completed Kearny Underway
CA / TX / VT	Solar Source Projects	$44	Increased capacity: 21 MW	Completed
Peach Bottom	Peach Bottom EPU (2014 – 2015)	$417	Increased capacity: 130 MW	PB2 March 2015, PB3 in 2016
Bergen / BEC	Future AGP Upgrades: Bergen (2015) BEC (2017-2018)	$98	Increased capacity and improved heat rate: 88 MW capacity increase ~1.2% heat rate improvement	Underway
Various	Interim ISA's*	No cost	Increased capacity: 69 MW	Completed
Eastern PA to Mercer, NJ	PennEast Pipeline	$119	Estimated Earnings in 2019: $13 million	Underway

Total Increased Capacity – 371 MW

PSEG POWER
ER&T

SI-SSA-0015-04131

PSEG

We make things work for you.

Market Review: 2014 was influenced by extremes in weather highlighting the importance of winter

Q1: Periods of extreme cold temperatures resulted in high gas prices, significant basis differentials, and higher energy demand.

Q3: A cooler than normal summer, combined with increased supply of gas, reduced energy prices and basis.

SI-SSA-0015-04132

Market Review: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

Power's Gas for Generation in 2014

- PSEG Power maintains a robust portfolio of pipeline and storage assets in the Mid-Atlantic
- PSEG Power's gas for generation was ~100 BCF in 2014, of which >60% was supplied by Shale gas
- PSEG Power procured over 400 BCF in 2014 with ~75% going to PSE&G's utility gas customers
- When gas is surplus to customer needs, PSEG Power sells surplus to others; margins from such sales benefit PSE&G gas customers and PSEG Power

SI-SSA-0015-04133

Market Review: Winter Z6 gas prices retain seasonal volatility; spark spreads have continued to be robust in PJM

FORWARDS AS OF DECEMBER 31, 2014

SI-SSA-0015-04134

Market Review: New pipelines will move significant quantities of Marcellus gas out of the region by 2018

Historical and Expected Marcellus Production

Pipeline capacity grows significantly by 2018

New pipeline investment is expected to increase takeaway capacity from the low cost Marcellus/Utica shale and reduce regional surpluses and increase gas prices by 2018

SI-SSA-0015-04135

Power Basis in Eastern PJM: Expected to be volatile but positive on an annual basis with winter pricing driving value

Electric Basis will remain positive overall and stabilize within 3 years due to:

- Export of ~18 bcf/day of gas which will significantly strengthen regional gas prices
- Easing of transmission constraints in Virginia/Maryland
- Construction of significant new gas-fired generation in VA/MD

ANNUAL FORWARD BASIS TO PJM-WEST AS OF DECEMBER 31, 2014.

SI-SSA-0015-04136

Regulatory Framework: Significant reforms already implemented and new rules being promulgated to improve energy and capacity market designs

	ISSUE /POLICY	OUTCOME
PJM	CAPACITY	• Higher payments for enhanced reliability (Capacity Performance)
	DEMAND RESPONSE RULES	• Stricter rules for eligibility and deployment
	ENERGY PRICE FORMATION	• PJM and FERC forcing improvements to energy price formation; higher caps
ISO-NE	CAPACITY	• Higher prices in recent auction better reflect tight supply conditions • Implementation of sloping demand curve in FCA 9 • Zonal demand curves expected in FCA 10
	ENERGY	• Demand response required to participate in Day Ahead markets • Implemented hourly offers/real time reoffers • Reserve market prices better reflect scarcity prices • 5 minute interval LMP settlements expected Q1 2016
NYISO	CAPACITY	• New Capacity Zone (LHV) leads to more accurate price signals
	ENERGY	• Improvement in price formation during reserve shortage conditions
FEDERAL	DEMAND RESPONSE	• EPSA VS. FERC and national implications
	ENVIRONMENTAL REGULATIONS	• HEDD, CPP, HAPS/MACT will lead to tightening of supply in 2015+ timeframe

SI-SSA-0015-04137

PJM Capacity Performance Proposal: aims to increase electric supply reliability

- **Capacity performance (CP)** proposal places emphasis on reliability, given observed outages during times of extreme weather stress and anticipated retirements; Imposition of higher penalty structure and enhanced opportunities for cost recovery to encourage reliability
- **Generator performance/flexibility is key** objective for units with secure fuel supply capable of meeting more stringent operating standards
- **Elimination of 2.5% holdback offsetting weak demand growth**, making all capacity resources annual products in end state, net CONE bidding safe harbor, and the change in the demand curve (VRR) support price formation and improve resource adequacy

December 2014
PJM Filed
Final CP Proposal

April 2015
Expected FERC Response
to PJM CP Proposal

May 2015
RPM Auction for
2018/2019 Capacity Year

SI-SSA-0015-04138

Capacity Performance: >90% of PSEG's PJM capacity meets the new capacity performance standards with minimal to moderate investment

How does our fleet stack up?*

CP Compliant Assets

* EXCLUDES 205MW OF PUMPED STORAGE

SI-SSA-0015-04139

Northeast Portfolio: New York and New England

New England (972MW)

- Small but dynamic market
- Significant improvement in market construct
- High volatility due to extreme (winter) weather conditions
- Significant siting and permitting challenges
- Gas pipeline infrastructure poses supply challenges/opportunity

New York (774MW)

- Single state ISO
- Investment in new lateral to connect to the Dominion pipeline at Bethlehem Energy Center (BEC) allows for access to fuel supply from Marcellus
- Long Island Power Authority Management Contract

SI-SSA-0015-04140

Northeast Portfolio: Expanding our footprint with PSEG Long Island

PSEG Power acting as an agent for LIPA began January 2015

- Performing ISO bidding for LIPA's 6,000MWs of generation/tolls
- Procuring natural gas and oil for the majority of these assets
- Scheduling two DC transmission cables (ISO-NE and PJM) into Long Island
- Entering into financial hedges to reduce LIPA customer's price volatility

This relationship has provided PSEG Power:

- Additional experience in Eastern NY and Connecticut markets
- Bigger natural gas footprint
- Fee-based services contract

SI-SSA-0015-04141

Capacity Market Pricing: PJM's capacity market is transitioning to recognize operating performance as well as locational value

RPM Auction Results					
($/MW-day)	2013 / 2014*	2014 / 2015*	2015 / 2016*	2016 / 2017*	2017 / 2018

SI-SSA-0015-04144

PSEG Power's Value Proposition

- Well-positioned fleet of merchant generating assets in attractive markets
- Advantaged by low cost structure, fuel diversity and dispatch flexibility
- Value add from strong gas supply capability
- Significant drive by regulatory bodies to improve market constructs
- Low capital requirements to meet enhanced performance standards
- Organic growth opportunities to increase nuclear and combined cycle generation
- Hedging strategy is responsive to changing market dynamics, providing attractive returns and free cash flow

SI-SSA-0015-04145

PSEG FINANCIAL REVIEW & OUTLOOK

SI-SSA-0015-04146

PSEG

We make things work for you.

Strong financial position to support our business initiatives

2014 Financial Position

- ✓ Strong 2014 earnings growth
- ✓ Exceeded earnings guidance
- ✓ Executed major PSE&G capital program
- ✓ Strong balance sheet with no long term Parent debt
- ✓ Solid credit metrics

2015 and Beyond

- ✓ Third year of anticipated positive earnings growth in 2015
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investment program without equity issuance
- ✓ Substantial additional investment capacity
- ✓ Growth in PSE&G investments with contemporaneous/formula rate returns
- ✓ Consistent and strong cash flow from both Power and PSE&G
- ✓ Potential for accelerated and sustainable dividend growth

SI-SSA-0015-04147

PSE&G's Capital Program drives double-digit growth in rate base through 2019

E = ESTIMATE

SI-SSA-0015-04153

Continuing our track record of 5 year

double digit rate base growth leading to high single-digit growth in earnings through 2017

E = ESTIMATE.

SI-SSA-0015-04154

Substantial internal cash generation

supports our planned growth capital program and potential investment opportunities without the need for equity

PSEG 2015 - 2019E Sources and Uses

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$260M FROM 2015-2019
(2) OTHER CASH FLOW INCLUDES PSEG LI, HOLDINGS NET CASH FLOW, INVESTED CASH, AND PARENT SHORT-TERM DEBT
(3) POWER CASH INVESTMENT INCLUDES NUCLEAR FUEL AND EMISSION PURCHASES E = ESTIMATES.

Power's key credit metric remains strong

providing opportunity for incremental investment

- Increased contribution to earnings from the more stable regulated business
- Power's annual Cash From Operations and Funds From Operations each average ~$1.4B over the 2015 to 2017 period supported by:
  - Capacity Revenues
  - Hedged Generation
  - O&M Control
- Financial strength can be used to pursue future growth in both businesses beyond current plans

SI-SSA-0015-04156

Substantial Investment Capacity to pursue additional growth without the need for equity

Average Funds from Operations /Debt
2015 - 2017

	Power	PSEG
Estimate	~ 55%	~30%
Minimum Threshold	30%	Low - 20's

Total Incremental Investment Capacity
through 2017

Our incremental investment capacity can support over $6B in regulated investments

SI-SSA-0015-04157

Well Funded Pension due to our long term asset allocation strategy

Pension Fund Returns
for the periods ending December 2014

- 2014 Funded Ratio ~93%
- Cumulative pension contributions total less than $50M through 2017 (1)
- Modest pension expense in 2015 with pension income expected by 2017 given fully funded level

Total company pension expense of <$0.07 per share in 2015, expected return to pension income by 2017

SI-SSA-0015-04158

(1) REPRESENTS CONTRIBUTIONS TO QUALIFIED PENSION PLANS.

Controlling O&M growth, with manageable pension impacts and PSE&G continuing to grow its asset base

SI-SSA-0015-04159

SI-SSA-0015-04162

PSEG Summary

- Our 2014 earnings of $2.76 exceeded our revised operating earnings guidance of $2.60 - $2.75 per share
- Continued third year of anticipated positive earnings trend in 2015 with operating earnings guidance of $2.75 to $2.95 per share
- Continued 5th straight year of expected double digit, 5 year growth in rate base
- Anticipated high single digit earnings growth at PSE&G on three-year basis from 2014 to 2017, driven by transmission investments and planned programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support full capital program and new potential opportunities without the need for equity
- Our $0.08 per share dividend increase is consistent with our long history of returning cash to the shareholder through the common dividend, with potential for consistent and sustainable growth

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-04181

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of July 28, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. Opportunity for consistent and sustainable dividend growth

SI-SSA-0015-04200

PSEG's Value Proposition

- A stable platform with a $15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 110-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

PSE&G – Regulatory Agreement/Filing Support Long-term Objectives

PSE&G's recent filing to extend its Gas System Modernization Program (GSMP) and an agreement reached on its proposed Energy Efficiency investment program reinforce PSE&G's commitment to provide clean, reliable energy for its customers

Gas System Modernization Program II

In July, PSE&G filed for a 5-year extension of the GSMP which would accelerate the pace of replacement of its aging cast iron and unprotected steel mains and associated service. PSE&G is proposing to invest approximately $540 million per year, or up to $2.7 billion, over the 5-year program beginning in 2019. The filing is consistent with the draft regulations that the BPU issued in June regarding Infrastructure Investment Programs.

Energy Efficiency

In July, PSE&G reached an agreement in principle with BPU Staff and Rate Counsel related to its proposed request to extend its investment in Energy Efficiency. Under the agreement, PSE&G would invest $69 million in energy efficiency equipment for hospitals, multi-family housing and other sectors and a residential energy efficiency offering for smart thermostats and data analytics. The agreement represents more than 90% of PSE&G's request.

SI-SSA-0015-04206

PSE&G forecasted to be 66% of PSEG's 2017 non-GAAP Operating Earnings

PSEG Non-GAAP Operating Earnings	
$ Millions (except EPS)	2017E Guidance
PSE&G	$945 - $985
PSEG Power	$435 - $510
Enterprise/Other	$35
Operating Earnings*	$1,415 - $1,530
*Operating EPS**	$2.80 - $3.00E

SI-SSA-0015-04207

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO NON-GAAP OPERATING EARNINGS. **BASED ON MIDPOINT OF 2017 NON-GAAP OPERATING EARNINGS GUIDANCE OF $2.80 - $3.00 PER SHARE. E= ESTIMATE.

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-04208

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Forward-Looking Statements

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or ongoing low pricing of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulations, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators, including prudency reviews, disallowances and changes in authorized returns,
- any deterioration in our credit quality or the credit quality of our counterparties,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations or increase the cost of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- delays or unforeseen cost escalations in our construction and development activities, or the inability to recover the carrying amount of our assets,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- increases in competition in energy supply markets as well as for transmission projects,
- changes in technology, such as distributed generation, storage and micro grids, and greater reliance on these technologies,
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- an extended economic recession,
- an inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce, and
- changes in the credit quality and the ability of lessees to meet their obligations under our domestic leveraged leases.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-04212

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and material one-time items. Adjusted EBITDA excludes the same items as our Operating Earnings measure as well as income tax expense, interest expense, depreciation and amortization and major maintenance expense costs at Power's fossil generation facilities. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to Operating Earnings and Adjusted EBITDA with a reference to that slide included on each of the slides where the non-GAAP information appears.

Management uses Operating Earnings and Adjusted EBITDA in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of Operating Earnings and Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, Operating Earnings and Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of Operating Earnings and Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

From time to time, PSEG, PSE&G and Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "Email Alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and /or Really Simple Syndication (RSS) feeds regarding new postings. PSEG's Strategy

Investment program delivering results

Operational Excellence: Maintaining reliability and improving performance as we control costs in low price environment

Financial Strength: Strong financial position supports investment program and dividend growth

Disciplined Investment:
- Balanced business mix
- Robust pipeline of opportunities

Results:
- 3rd year of Operating EPS* growth
- Continued dividend growth
- Best in class utility growth rate
- Addition of efficient CCGT capacity enhances market position

SI-SSA-0015-04216

* SECOND YEAR OF EPS GROWTH.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: ReliabilityOne Mid-Atlantic Region's Most Reliable Electric Utility (14th consecutive year), Electric Light & Power's 2015 Utility of the Year, ReliabilityOne Outstanding Outage Response Time and Outstanding Customer Engagement • PSEG Power: Record output from combined cycle units • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Cost-control benefits continue
Financial Strength	• Operating earnings for 2015 of $2.91 per share at upper end of guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased dividend in 2015
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2016-2020) with increased investment in Transmission, Energy Strong, Gas System Modernization Program, and Electric and Gas distribution • Power capital program focusing on growth investments including Keys, Sewaren and Bridgeport Harbor, Nuclear and Fossil uprates, PennEast Pipeline, and Solar Source

Focus on building a reliable, efficient, clean energy infrastructure

2011	2012	2013	2014	2015

Selected Accomplishments

2011
- Expanded investment programs focused on infrastructure upgrades, energy efficiency, and major transmission projects*
- Sale of Texas generating assets
- Nuclear license extensions and uprates

2012
- Award winning Superstorm Sandy storm response restoring 2.1M customers
- Final federal approval for Susquehanna-Roseland transmission project
- 400 MW of new peaker capacity**

2013
- Expanded Solar investment
- 90% nuclear capacity factor for 9th straight year
- Record output from Linden CCGT and Salem 2 Nuclear Unit

2014
- Energy Strong program approved
- Advanced Gas Path uprates (through 2018)
- PSEG Long Island management contract effective

2015
- Gas System Modernization Project (GSMP) and Energy Efficiency Extension II approved
- New generation build starts Power fleet transformation
- Solar Source portfolio reaches 277 MW_{DC}***

Building an efficient, clean, reliable energy platform

Timeframe	Actions taken
2011 – 2015: Transformed business mix	• Applied ~$14.3 billion towards investments • Improved credit ratings • Monetized Energy Holdings' portfolio • Strong balance sheet sustained during period of low power prices, while increasing the dividend
2016 – Forward: Strong financial position supports continued growth	• Continued dividend growth in 2016 • ~$16 billion investment program through 2020 • Utility investments focused on improving reliability and replacing aging infrastructure • Continued investment in reliable and efficient energy infrastructure at Power • Financial capability supports further expansion of the current capital plan

SI-SSA-0015-04220

PSE&G's investment program

Meeting public policy goals and customer needs

SI-SSA-0015-04221

PSEG

* DISTRIBUTION RATE BASE INCLUDES SOLAR AND ENERGY EFFICIENCY

Managing the total costs to customers while investing in the system

PSE&G Typical Residential Customer Bills*

- PSE&G customers' combined electric and gas bills declined 28% over the period
- Low gas prices and elimination of transition charges drove rate decreases

SI-SSA-0015-04222

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

Transforming Power's fleet to maintain strong market position

Economic Drivers	Outlook	Combined Cycle	Nuclear	Scrubbed Coal	Peakers	Renewable
Energy Margins	• Low natural gas and energy prices • Robust portfolio of gas pipeline contracts	✓	✓	✓	n/a	n/a
Capacity Markets	• Tightened rules proposed for capacity performance	✓	✓	✓	✓	n/a
Environmental Regulations	• Tighter air emissions standards	✓	✓	✓	✓	✓
Location	• Assets in well-designed markets, premium regions • Opportunities on brownfield sites	✓	✓	✓	✓	n/a
2016 - PSEG Power Total Capacity 11.9 GW		3.3	3.7	2.4	2.3	0.2
2019 - PSEG Power Total Capacity 13.5 GW *		5.3	3.8	2.4	1.8	0.2

- **Largest nuclear site** in the eastern U.S. and ownership in **large, fully scrubbed coal facilities** at Keystone and Conemaugh provide **economies of scale** that enhance energy margins in current low market, and provide for upside potential if prices improve
- **Dual fuel peakers** meet reliability criteria in capacity markets and provide option value in energy market. Opportunity exists to repower peakers that do not meet NJ HEDD environmental regulations
- **Combined cycle units Keys and Sewaren expected to be operational in 2018, and Bridgeport 5 expected to be operational in 2019,** will enhance emissions performance and have a combined average heat rate of approximately 6,600

SI-SSA-0015-04223

PSEG

*AS OF FEBRUARY 2016 APPROXIMATELY 1.8 GW OF CCGT GENERATION UNDER DEVELOPMENT – KEYS, SEWAREN 7 AND BRIDGEPORT HARBOR 5 , WHICH ARE TARGETED TO GO INTO SERVICE IN 2018/2019 ALONG WITH RETIREMENT OF OLDER SEWAREN UNITS.

Operating Earnings

Disciplined investment program and focus on operational excellence have supported growth

Power's diverse fuel mix and dispatch flexibility continue to generate strong earnings and free cash flow in low price environment

PSE&G's investment program has resulted in an increased contribution to PSEG's earnings

SI-SSA-0015-04224

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. E=ESTIMATE ** 2016 PERCENTS USE MIDPOINT OF 2016 OPERATING EARNINGS GUIDANCE.

PSEG Annual Dividend

An increased dividend with potential for **consistent** and **sustainable** growth given our business mix and financial position

SI-SSA-0015-04225

Focus areas over the business plan horizon

PSE&G
• **Operational excellence and cost control** • **Capital program execution** – Transmission, Energy Strong and GSMP program • **Regulatory framework** – Advocate for regulatory framework that provides support for long-term infrastructure programs • **Continue to develop incremental growth opportunities**

PSEG Power
• **Operational excellence and cost control** • **Timely and on budget construction of new growth opportunities** – Keys Energy Center, Sewaren 7 and Bridgeport Harbor • **Strong performance at Nuclear and Fossil** to maximize fleet value in dynamic markets • **Advocacy of constructive market rules** - Capacity markets and environmental regulations

PSEG Long Island
• **Continue execution** – Achievement of performance metrics

SI-SSA-0015-04226

PSEG's Value Proposition

- A stable platform with predictable earnings and a robust investment pipeline
- PSE&G – Best in class utility performance and growth profile
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Strong balance sheet – Supports stable credit rating, growth objectives and the potential for consistent and sustainable dividend growth

SI-SSA-0015-04227

PSE&G strategy

Building a sustainable platform that balances reliability, customer rates and public policy to ensure growth at reasonable returns

SI-SSA-0015-04230

PSE&G's focus on meeting customer reliability and policy objectives are key to our investment strategy

2011	2012	2013	2014	2015

Selected Accomplishments

2011
- NJ Capital Infrastructure Program 2
- Energy Efficiency extension
- Major Transmission capital projects*
- Hurricane Irene/ October Snowstorm
- Mid-Atlantic ReliabilityOne Award

2012
- Hurricane Sandy storm response (2.1M customers restored)
- Transmission: Final federal approval for Susquehanna-Roseland (S-R) project
- National ReliabilityOne Excellence Award
- Mid-Atlantic ReliabilityOne Award
- EEI's Emergency Response Award

2013
- Solar Loan III
- Solar 4 All Extension
- Energy Strong program filed
- Mid-Atlantic ReliabilityOne Award
- Award for Outstanding Response to a Major Event

2014
- Energy Strong approved
- Transmission: North Central Reliability and Burlington-Camden projects placed in-service
- Bergen-Linden Corridor Upgrade project investment started
- Mid-Atlantic ReliabilityOne Award

2015
- Gas System Modernization Project (GSMP)
- Energy Efficiency Extension II
- Transmission: S-R and Mickleton-Gloucester projects placed in-service
- Mid-Atlantic ReliabilityOne Award
- Recognized for customer satisfaction by J.D. Power for both large electric and gas business service in the East

← Cost Control →

* INVESTMENT CONTINUED FOR SUSQUEHANNA-ROSELAND, BURLINGTON-CAMDEN, NORTH CENTRAL RELIABILITY, AND STARTED FOR NORTHEAST GRID AND MICKLETON-GLOUCESTER

SI-SSA-0015-04231

Building on our track record

Operational Excellence

- Strong reliability record, with plans for further improvement
- Cost control efforts

Financial Strength

- Meeting or exceeding earnings targets
- Maintain solid investment grade credit ratings

Disciplined Investment

- 14 investment programs approved over past seven years
  - ✓ Infrastructure focused
  - ✓ Policy alignment – across administrations – Solar, EE and other
- Win-Win: Job creation, environment benefits, low commodity prices, low interest costs, labor availability, federal tax benefits

SI-SSA-0015-04232

Operational Excellence

Reliability and Customer Service

- Named most reliable electric utility in the Mid-Atlantic region for 14th consecutive year
- Recognized by PA Consulting with the Outstanding Customer Engagement and Outstanding Outage Response Time awards
- Named 2015 Utility of the Year by Electric Light & Power Magazine
- Received Star of Energy Efficiency Award

SI-SSA-0015-04233

Achieved ~11% annual earnings growth

over the past four years through implementation of supportive rate mechanisms on our expanded capital program and cost control

SI-SSA-0015-04234

Receive contemporaneous recovery on over 70% of our investments

2011-2015 PSE&G Capital Spending by Recovery Method

2016-2020E PSE&G Capital Spending by Recovery Method

FERC Formula Rates
- Transmission

Traditional Recovery Mechanisms
- Distribution Base Rates

Clause Recovery Mechanisms
- Infrastructure/ Solar/Energy Efficiency

PSEG DEFINES CONTEMPORANEOUS RECOVERY TO MEAN EITHER A FORWARD LOOKING FORMULA RATE OR A RATE THAT PROVIDES FOR CLAUSE BASED RECOVERY IN A DEFINED PERIOD PRIOR TO A BASE RATE CASE. E = ESTIMATE. INCLUDES AFUDC

SI-SSA-0015-04235

Increasing investment across our portfolio

Transmission

- Large portfolio of projects to meet ongoing reliability and life-cycle requirements

Electric Distribution

- Base spending
- Infrastructure investment programs with clause recovery
  - Energy Strong (ES) and related programs
  - Electric System Modernization Program (ESMP)

Gas Distribution

- Base spending
- Infrastructure investment programs with clause recovery
  - Energy Strong (ES) and related programs
  - Gas System Modernization Program (GSMP)

Solar and Energy Efficiency

- Recently filed with NJBPU to extend our successful Solar 4 All program, with a request to invest an additional ~$240 million to develop an additional 100 MW_{dc} of grid-connected solar capacity on landfills and brownfields by year-end 2021

SI-SSA-0015-04236

Continued identification of investment opportunities focused on improving reliability for our customers

ROE / Recovery mechanism	9.75% - 10.3% Clause recovery	9.75% Clause recovery	TBD Clause recovery

SI-SSA-0015-04242

Develop investment opportunities with near-contemporaneous recovery mechanisms

2016-2020E PSE&G Capital with Potential Upside by Recovery Method

Potential to increase current five year, $11.9B investment plan with ~$2B of incremental investments:

- ESMP
- GSMP extension
- Continuation of Solar and Energy Efficiency programs
- Large customer needs

FERC 1000 and competitive growth opportunities

FERC Formula Rates	Traditional Recovery Mechanisms	Clause Recovery Mechanisms
Transmission	Distribution Base Rates	Infrastructure / Solar / Energy Efficiency

SI-SSA-0015-04243

Demonstrated ability to control O&M and plan to drive future efficiencies

Cost control actions:

- PSE&G is utilizing the Lean Six Sigma discipline to achieve costs savings and process improvements
- Conducting organizational reviews resulting in streamlining of processes through restructuring
- Continued focus on vendor and inventory practices ensuring maximum value
- Successful management of pension

E=ESTIMATE

SI-SSA-0015-04244

Investment program combined with cost control drives growth in earnings

Bonus depreciation

- Lowered rate base and growth rate but growth still remains strong
- Investments are less expensive for customers, providing an opportunity for incremental cost-effective system improvements

SI-SSA-0015-04245

PSEG

* INCLUDES IMPACTS OF BONUS DEPRECIATION. E = ESTIMATE.

Managing the total costs to customers while investing in the system

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-04251

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-04252

Focus on transforming Power's portfolio with reliable, efficient, and cleaner energy infrastructure

2011	2012	2013	2014	2015

Selected Accomplishments

2011
- Hope Creek set annual output record
- Nuclear license extensions and uprates achieved

2012
- Peach Bottom 3 set annual output record
- Additional 400 MW of new peaker capacity at Kearny and New Haven
- Superstorm Sandy recovery initiated

2013
- Record annual output from Linden CCGT and Salem 2 Nuclear Unit
- 90% + nuclear capacity factor for 9th straight year
- Bethlehem Energy Center, 2nd gas pipeline connection added

2014
- Record annual output from Bergen CCGT
- PennEast pipeline investment
- CCGT Advanced Gas Path (AGP) uprate investment completed at Linden 1 & 2, 63 MW
- Established PSEG Long Island fuel management operations for 2015 start-up

2015
- Record CCGT fleet annual output
- Continued growth in fleet with 1,300 MW new CCGT's announced
  - Keys
  - Sewaren 7
- Prepared successful bid for 485 MW Bridgeport Harbor 5
- Projects Completed:
  - Peach Bottom EPU, 130 MW
  - Bergen 2 AGP uprate, 31 MW
- HEDD retirement
- Solar portfolio reaches 277 MW_{DC} as of March 2016

Cost Control

SI-SSA-0015-04253

PSEG Power's value is advantaged

by asset diversity, fuel flexibility and location

2015 Actual

Fuel Diversity*
Total MW: 11,678

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

Energy Market Served*
Total MW: 11,678

- Load Following, 87% dual fuel
- Peaking
- Baseload

Energy Produced*
Total GWh: 55,213

- Gas
- Nuclear
- Coal**

- Pumped Storage

SI-SSA-0015-04254

PSEG

* EXCLUDES SOLAR AND KALAELOA.
**INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

Power investing $2 billion of capital in new capacity

E=ESTIMATE. DATA AS OF MARCH 2016

SI-SSA-0015-04255

Power's PJM assets are becoming more efficient

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape
- Readiness for Capacity Performance (CP), successful in CP auction

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel capability at 87% of load following and peaking units

SI-SSA-0015-04256

PSEG

* KEYS & SEWAREN 7 TO BE ADDED TO DISPATCH IN 2018E AND SEWAREN 1-4 WILL RETIRE.

PSEG Power has generating assets in three competitive markets

- Assets located near load
- Low cost portfolio with gas cost advantage
- Positioned to benefit from volatility in real-time markets
- Fleet meets new capacity performance standards
- 1,800 MW of new CCGT capacity under construction in PJM and ISO-NE

SI-SSA-0015-04257

PSEG Power developing 1,800 MW of new, efficient CCGT capacity in MD, NJ and CT

- Constructing the 755 MW CCGT Keys Energy Center in Maryland (SWMAAC*) at an estimated cost of $825 to $875 million
- Constructing a new 540 MW CCGT unit, Sewaren in New Jersey (EMAAC*) at a cost of $625 to $675 million which will replace older Sewaren units
- Constructing a new 485 MW CCGT unit, Bridgeport Harbor 5 (ISO NE), at a cost of $525 to $575 million
- Both Keys and Sewaren 7 are targeted to be in-service in 2018 and Bridgeport Harbor 5 in 2019
- Expanding civic stewardship roles and programs in neighboring communities

*SWMAAC = SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL
LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

SI-SSA-0015-04258

Power's fleet to be transformed with addition of Keys, Sewaren 7 and Bridgeport Harbor in 2018-2019

Projected Fleet Comparison 2015 to 2020E

*EXCLUDES SOLAR AND KALAELOA E = ESTIMATE **INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

SI-SSA-0015-04259

PSEG Power's fossil fleet expected to see improvements in efficiency

- AGP (Advanced Gas Path) investments
- CCGT material condition assessment
- Unit testing and testing coordination initiatives
- HEDD retirements
- Keys/Sewaren Combined Cycle Development (2018)
- Bridgeport Harbor 5 Combined Cycle Development (2019)
- Heat Rate Improvement converts to potential savings of $60-$65M in fuel expense (assuming $3/MB gas price)

SI-SSA-0015-04260

PSEG Power's fossil fleet …

Among the lowest emitting in the industry

- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- With the addition of new units, emissions continue to improve

Expected to reduce its carbon footprint

- Carbon emission rates projected to steadily approach EPA national pollution standards for New and Reconstructed Natural Gas Combined Cycle (1,000 lbs CO_2/MWh-gross)

SI-SSA-0015-04261

Nuclear is a critical element of our success

Hope Creek

- Operated by PSEG Nuclear
- PSEG Ownership: 100%
- Technology: Boiling Water Reactor
- Total Capacity: 1,176 MW
- Owned Capacity: 1,176 MW
- License Expiration: 2046
- Next Scheduled Refueling
  - Fall 2016
- Uprate 18MW Spring 2018

Salem Units 1 and 2

- Operated by PSEG Nuclear
- PSEG Ownership: 57%
- Technology: Pressurized Water Reactor
- Total Capacity: 2,294 MW
- Owned Capacity: 1,317 MW
- License Expiration: 2036 and 2040
- Next Scheduled Refueling
  - Unit 1 – Fall 2017
  - Unit 2 – Spring 2017

Peach Bottom Units 2 and 3

- Operated by Exelon
- PSEG Ownership: 50%
- Technology: Boiling Water Reactor
- Total Capacity: 2,502 MW
- Owned Capacity: 1,251 MW
- License Expiration: 2033 and 2034
- Next Scheduled Refueling
  - Unit 2 – Fall 2016
  - Unit 3 – Fall 2017
- Uprate: 130 MW (PS Share)
  - Unit 2 – March 2015
  - Unit 3 – December 2015

SI-SSA-0015-04262

PSEG Power's Growth Investments

Site	Project	Estimate ($ Millions)	Benefits	Status
Peach Bottom	Peach Bottom EPU (2014 – 2015)	$403	Increased capacity: 130 MW	PB2 & PB3 completed in 2015
Linden/ Bergen/ BEC	Advanced Gas Path Uprates (AGP): Linden -- 63 MW Bergen -- 31 MW BEC – 58 MW	$120	Increased capacity and improved heat rate: ~152 MW capacity increase ~1.2% heat rate improvement	Completed: Linden (2014) Bergen (2015) Planned: BEC 2017/2018E
Kearny 13 & 14	LM6000 Engine Throttle Push	--	Increased capacity: 14.5 MW	2016E
Maryland	Keys, 755 MW CCGT	$825 - $875	Geographic diversity within PJM; highly efficient gas fired unit in SWMAAC	2018E
Sewaren	Sewaren Unit 7, 540 MW CCGT	$625 - $675	Improved efficiency and reliability; replaces Sewaren 1-4 steam units	2018E
Bridgeport, CT	Bridgeport Harbor 5, 485 MW CCGT	$525 - $575	Highly efficient gas fired unit in ISO-NE	2019E
Eastern PA to Mercer, NJ	PennEast Pipeline	$123	Estimated Earnings in 2019: $13 million	Underway
Various	6 Solar Projects	$241	2016/2017E increase renewable capacity by 136 MW_{DC}/105 MW_{AC}	2016/2017E

Total New Capacity – 2,200 MW

E = ESTIMATE.

SI-SSA-0015-04263

A position in renewable energy – Power's Solar Source

Solar Source portfolio

- Utility scale solar projects in 12 states in operation or under construction
- Long-term PPA's with creditworthy counterparties
- Lump sum, full wrap EPC* agreements

Asset Optimization

- Maintain high equipment availability
- Minimize operating expenses
- Seek additional revenue streams

SI-SSA-0015-04264

* EPC = ENGINEERING PROCUREMENT & CONSTRUCTION. E = ESTIMATE.

PSEG Power has other attractive sources of revenues to round out a robust portfolio

Gas Asset Optimization

- Large wholesale provider to PSE&G and others
  - Storage capacity of approximately 75 Bcf (in the Gulf and market regions)
  - Firm transportation of 1.3 Bcf/day on seven pipelines
- Off-system sales margins shared with residential customers
- Commercial & Industrial gas sales

Ancillary Services – Black start, reactive power, area regulation

LIPA fuel and energy dispatch management – Began management of 10-year contract in 2015

Kalaeloa, HI – 50% equity interest in a 208 MW combined cycle oil unit

New Haven Peakers – 129 MW, rate based contract with ISO-NE

SI-SSA-0015-04265

PSEG Power has demonstrated ability to control O&M

Cost control actions taken:

- Fossil plant assessment
- CCGT material condition assessment
- Vendor contract renegotiations
- Nuclear security services brought in-house to control costs
- Nuclear maintenance productivity study
- Nuclear outage efficiency initiative
- Materials management
- Nuclear excellence initiative
- Nuclear staff – Right sizing

SI-SSA-0015-04268

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO OPERATING EARNINGS. E = ESTIMATE.
UPDATED AS OF JULY 29, 2016.

PSEG Power – Delivering on priorities

Operational Excellence

- Fuel and technology-diverse fleet produced 55 TWh, 2% higher than 2014
- Nuclear capacity factor exceeded 90%; output of 30 TWh, close to 30.3 TWh is third best ever, record set in 2009
- Production records set at BEC, Linden and the CCGT fleet in total; Kearny 13 & 14 CTs
- Successful implementation of LIPA contract for fuel / generation dispatch.

Financial Strength

- Achieved earnings guidance in 2015
- Cost control programs held O&M to a 0.8% CAGR between 2011 and 2016
- Successful ongoing effort to influence outcomes in key markets showing success, e.g., price formation

Disciplined Investment

- Completed Peach Bottom EPU and AGP at Bergen 2; AGP planned for BEC in 2017/2018
- Repositioning the fleet with three new CCGTs:
  - Keys (2018)
  - Sewaren 7 (2018)
  - Bridgeport Harbor 5 (2019)
- Solar Source's portfolio is 277 MW_{DC}

PSEG

We make things work for you.

SI-SSA-0015-04270

Market Review: Markets in 2015 were affected by abnormal weather conditions

Q1: Periods of extremely cold temperatures resulted in high gas prices, significant basis differentials, and higher energy demand

Q2-Q4: A normal summer and mild December, combined with increased supply of gas, reduced energy prices and basis

SI-SSA-0015-04271

Market Review: YTD 2016 impacted by weather but forward gas and electric prices retain seasonal volatility

SI-SSA-0015-04272

Market Review: PSEG's extensive gas asset portfolio provides unparalleled access to Marcellus Shale gas

- PSEG Power maintains a robust portfolio of pipeline and storage assets in the Mid-Atlantic
- Marcellus Shale gas production reached 18.8 BCF/day in 2015
- PSEG Power procured over 423 BCF in 2015 with approximately 50% going to PSE&G's utility gas customers
- PSEG Power's gas for generation was 150 BCF in 2015, of which >75% was supplied by Northeast Shale gas
- Severe financial stress among the natural gas producer industry is expected to reduce production growth until gas prices rebalance to higher levels
- Investment in the PennEast pipeline expected to provide more access to Marcellus for PSEG

SI-SSA-0015-04273

Market Review: Completion of new pipeline infrastructure expected to move significant quantities of Marcellus gas out of the region by 2018

Pipeline capacity grows significantly by 2018

- Significant amount of new pipelines have already been built and more are in the advanced planning and development stage through 2018
- Gas production and pipeline takeaway capacity estimated to reach equilibrium in 2018 timeframe based on new pipeline development

SI-SSA-0015-04274

Regulatory Framework: New capacity and energy market designs in PSEG's core markets will better reward reliable generation units

	ISSUE /POLICY	OUTCOME
PJM	CAPACITY	• Higher payments for enhanced reliability (Capacity Performance) and lower energy revenues have raised absolute and relative value of capacity
	ENERGY PRICE FORMATION	• FERC is driving ISO's to improve their pricing constructs and rules – NOPRs and RTO reports addressing critical price formation issues
	DEMAND RESPONSE RULES	• Stricter rules for eligibility and deployment; focus returns to wholesale reliability/comparability after U.S. Supreme Court (SCOTUS) ruling
	STATE INTERVENTION	• SCOTUS dismissed the Maryland and New Jersey appeals in April 2016 • Ohio PPAs: FERC rescinded the previously approved waivers of the affiliate transaction standards and will review the PPAs under the affiliate abuse standards
ISO-NE	CAPACITY	• Continued tightness in capacity markets • Zonal demand curves submitted for FERC approval (FCA 11) • Nuclear and coal units under pressure; closure of Pilgrim nuclear plant
	ENERGY	• Proposed gas pipelines are receiving regulatory approvals slowly • 5 minute interval LMP settlements and fast start pricing expected Q2 2017
NYISO	CAPACITY	• Retirement of Fitzpatrick and Ginna and Western steam plants tighten market, but NYPSC directed to develop a clean energy standard that recognizes the value of nuclear
	ENERGY	• Improvement in price formation during reserve shortage conditions
FEDERAL	ENVIRONMENTAL REGULATIONS	• CPP rules stayed by SCOTUS • Some states will still prepare implementation plans for 2020+ timeframe • New PJM DR rules requiring that BTM diesel-fired generation employ environmental controls

SI-SSA-0015-04275

PSEG Power's Value Proposition

Low cost fleet	Advantaged locations	Investing to grow

- Well-positioned fleet of merchant generating assets in attractive markets
- Portfolio transformed with addition of 1,800 MWs of new efficient CCGT
- Low capital requirements to meet capacity performance standards
- Growth in fast-growing DC area
- Hedging strategy has capably protected value of assets in declining price environment providing attractive returns and free cash flow

SI-SSA-0015-04299

PSEG Summary

- 2015 Operating Earnings of $2.91 were at the upper end of our upwardly revised guidance of $2.85 - $2.95 per share
- Forecast high single-digit rate base growth at PSE&G on five year basis from 2015 to 2020, driven by investment in transmission and approved programs
- Power's investment program and continued focus on operational excellence with financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support current capital program and investment in new opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2016 is consistent with our long history of returning cash to the shareholder through the common dividend, with opportunity for consistent and sustainable growth

Fuel	Coal/Gas	Coal/Gas
Start of Operations	1968	1960/1961

On September 1, 2016, PSEG Power submitted to the PJM Independent Market Monitor and the PJM Office of Interconnection a preliminary request for an exception to PJM's Reliability Pricing Model must-offer requirement for the Hudson and Mercer generating stations in connection with the 2020-2021 capacity auction to be held in May 2017. The two stations have not cleared the PJM capacity auction for the prior two years, and would need significant investment to achieve the performance standards associated with PJM's Capacity Performance construct. The submission provides PSEG Power the opportunity to fully analyze the market conditions and economics, among other factors, associated with maintaining station operations, including any necessary capital improvements, prior to making a final determination whether or not to bid in the 2020-2021 capacity auction by December 1, 2016.

PSEG FINANCIAL APPENDIX

SI-SSA-0015-04309

PSEG Financial Highlights

Maintaining full-year 2016 Operating Earnings guidance of $2.80 - $3.00 per share*

- ✓ Reaching the upper end of our guidance range in 2016 will be difficult even with improvements seen in the power markets, expectations for warm summer weather, normal operations and management of O&M
- ✓ Focused on meeting customer needs for clean, reliable, efficient delivery of energy

Infrastructure Spend

- ✓ PSE&G capital spending on T&D for 2016 expected to top $3 billion
- ✓ PSE&G's Gas System Modernization Program (GSMP) and Energy Strong continue
- ✓ Keys and Sewaren CCGTs construction is on schedule and on budget
- ✓ PSE&G has identified more than $500 million of additional infrastructure spend over the current capital spending plan of $12 billion in the 2016-2020 period

Financial position remains strong

- ✓ Positive cash from Power and increasing cash flow from operations at PSE&G supports dividend growth and funds capital spending program without the need to issue equity
- ✓ Debt as a percentage of capitalization was 45% at June 30

Forward-Looking Statements

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or ongoing low pricing of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulations, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators, including prudency reviews, disallowances and changes in authorized returns,
- any deterioration in our credit quality or the credit quality of our counterparties,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations or increase the cost of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- delays or unforeseen cost escalations in our construction and development activities, or the inability to recover the carrying amount of our assets,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- increases in competition in energy supply markets as well as for transmission projects,
- changes in technology, such as distributed generation, storage and micro grids, and greater reliance on these technologies,
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- an extended economic recession,
- an inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce, and
- changes in the credit quality and the ability of lessees to meet their obligations under our domestic leveraged leases.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-04319

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and material one-time items. Adjusted EBITDA excludes the same items as our Operating Earnings measure as well as income tax expense, interest expense, depreciation and amortization and major maintenance expense costs at Power's fossil generation facilities. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to Operating Earnings and Adjusted EBITDA with a reference to that slide included on each of the slides where the non-GAAP information appears.

Management uses Operating Earnings and Adjusted EBITDA in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of Operating Earnings and Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, Operating Earnings and Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of Operating Earnings and Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

From time to time, PSEG, PSE&G and Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "Email Alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and /or Really Simple Syndication (RSS) feeds regarding new postings. PSEG meeting materials and other financial releases can be found on the www.pseg.com website under the investor tab, or at http://investor.pseg.com.

PSEG STRATEGY: GROWING A HIGH-QUALITY, LOW-RISK ENERGY INFRASTRUCTURE COMPANY

Dan Cregg

EXECUTIVE VICE PRESIDENT AND
CHIEF FINANCIAL OFFICER

PSEG

We make things work for you.

SI-SSA-0015-04321

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A ~$12 billion infrastructure program producing high single digit rate base growth through 2020	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow in current environment and upside from market rule improvements
2015 **Assets $24B** **Operating Earnings $787M**	2015 **Assets $12B** **Operating Earnings $653M**

SI-SSA-0015-04322

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2015. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT AND PSEG LONG ISLAND ACTIVITY. SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS

PSEG's Strategy

Investment program delivering results

Operational Excellence: Maintaining reliability and improving performance as we control costs in low price environment

Financial Strength: Strong financial position supports investment program and dividend growth

Disciplined Investment:
- Balanced business mix
- Robust pipeline of opportunities

Results:
- 3rd year of Operating EPS* growth
- Continued dividend growth
- Best in class utility growth rate
- Addition of efficient CCGT capacity enhances market position

SI-SSA-0015-04323

* SECOND YEAR OF EPS GROWTH.

Growth in capital spending aligned with customer needs

PSEG Capital Spending

2011 – 2015: ~$14.3 Billion | **2016E – 2020E*: ~$16.0 Billion**

*INCLUDES ALL PLANNED SPENDING. **POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. ***INCLUDES PENNEAST PIPELINE EQUITY INVESTMENT OF $0.1B. E=ESTIMATE.

SI-SSA-0015-04324

PSE&G's investment program

Meeting public policy goals and customer needs

* DISTRIBUTION RATE BASE INCLUDES SOLAR AND ENERGY EFFICIENCY

SI-SSA-0015-04325

Investment program combined with cost control drives growth in earnings

Bonus depreciation

- Lowered rate base and growth rate but growth still remains strong
- Investments are less expensive for customers, providing an opportunity for incremental cost-effective system improvements

SI-SSA-0015-04326

PSEG

* INCLUDES IMPACTS OF BONUS DEPRECIATION. E = ESTIMATE.

PSEG Power developing 1,800 MW of new, efficient CCGT capacity in MD, NJ and CT

- Constructing the 755 MW CCGT Keys Energy Center in Maryland (SWMAAC*) at an estimated cost of $825 to $875 million
- Constructing a new 540 MW CCGT unit, Sewaren in New Jersey (EMAAC*) at a cost of $625 to $675 million which will replace older Sewaren units
- Constructing a new 485 MW CCGT unit, Bridgeport Harbor 5 (ISO NE), at a cost of $525 to $575 million
- Both Keys and Sewaren 7 are targeted to be in-service in 2018 and Bridgeport Harbor 5 in 2019
- Expanding civic stewardship roles and programs in neighboring communities

*SWMAAC = SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL
LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

SI-SSA-0015-04327

Power investing $2 billion of capital in new capacity

E=ESTIMATE. DATA AS OF MARCH 2016

SI-SSA-0015-04328

Power's fleet to be transformed with addition of Keys, Sewaren 7 and Bridgeport Harbor in 2018-2019

Projected Fleet Comparison 2015 to 2020E

*EXCLUDES SOLAR AND KALAELOA E = ESTIMATE **INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

SI-SSA-0015-04329

Hudson and Mercer Generating Stations

- On September 1, 2016, PSEG Power submitted to the PJM Independent Market Monitor and the PJM Office of Interconnection a request for an exception to PJM's Reliability Pricing Model must-offer requirement for the Hudson and Mercer generating stations in connection with the May 2017 capacity auction
- The two stations have not cleared the PJM capacity auction for the prior two years, and would require significant investment to achieve the performance standards associated with PJM's Capacity Performance construct
- A final determination on whether or not to bid in the 2020-2021 capacity auction would be made no later than December 1, 2016

	Hudson	Mercer
Capacity (MW)	620	632
Capacity Factor (%)		
2015	6	5
2014	20	9
Fuel	Coal/Gas	Coal/Gas
Start of Operations	1968	1960/1961

SI-SSA-0015-04330

PSEG Power's revenue stream is secured with over 70% of the portfolio hedged through 2018

Energy Produced in 2015

55,213 GWH

- Gas
- Nuclear
- Coal**
- <2% from Oil, Pumped Storage

**INCLUDES NJ UNITS THAT CAN FUEL SWITCH TO GAS.

Average 3 Year Forward Revenue 2016-2018*

- Energy/Ancillary (locked in)
- Capacity (locked in)
- Capacity (unhedged)
- Energy/Ancillary (open to market)

*FOR THREE YEARS ENDED INCLUDES SIX MONTHS HISTORICAL 2016 DATA.

SI-SSA-0015-04331

Utilizing our Strong Balance Sheet

and Cash Flow to support current capital program and new potential opportunities without the need for equity

1) INCLUDES FINANCING COST, TREASURY SHARES, AND SHORT TERM DEBT POSITION
2) INCLUDES FINANCING COST
3) INCLUDES FINANCING COST AND SHORT TERM INVESTMENTS E = ESTIMATE

Operating Earnings

Disciplined investment program and focus on operational excellence have supported growth

Power's diverse fuel mix and dispatch flexibility continue to generate strong earnings and free cash flow in low price environment

PSE&G's investment program has resulted in an increased contribution to PSEG's earnings

SI-SSA-0015-04333

PSEG

PSEG Annual Dividend

An increased dividend with potential for **consistent** and **sustainable** growth given our business mix and financial position

	2012	2013	2014	2015	2016E
Payout Ratio	58%	56%	54%	54%	57%*

SI-SSA-0015-04334

PSEG

*2016E PAYOUT RATIO REFLECTS THE MIDPOINT OF 2016 OPERATING EARNINGS GUIDANCE. E = ESTIMATE

Focus areas over the business plan horizon

PSE&G

- **Operational excellence and cost control**
- **Capital program execution** – Transmission, Energy Strong and GSMP program
- **Regulatory framework** – Advocate for regulatory framework that provides support for long-term infrastructure programs
- **Continue to develop incremental growth opportunities**

PSEG Power

- **Operational excellence and cost control**
- **Timely and on budget construction of new growth opportunities** – Keys Energy Center, Sewaren 7 and Bridgeport Harbor
- **Strong performance at Nuclear and Fossil** to maximize fleet value in dynamic markets
- **Advocacy of constructive market rules** - Capacity markets and environmental regulations

PSEG Long Island

- **Continue execution** – Achievement of performance metrics

SI-SSA-0015-04335

PSEG's Value Proposition

- A stable platform with predictable earnings and a robust investment pipeline
- PSE&G – Best in class utility performance and growth profile
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Strong balance sheet – Supports stable credit rating, growth objectives and the potential for consistent and sustainable dividend growth

Forward Looking Statement

Certain of the matters discussed in this report constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in Item 1. Financial Statements—Note 9. Commitments and Contingent Liabilities, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, and other factors discussed in filings we make with the United States Securities and Exchange Commission (SEC). These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to sufficiently obtain coverage or recover proceeds of insurance on such matters,
- increases in competition in energy supply markets as well as competition for certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology and customer usage patterns.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-04340

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slides A and B at the end of this presentation include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

Superstorm Sandy met by an exceptional response

The storm affected PSE&G and Power

2.1 million **PSE&G** customer restorations (2X Hurricane Irene and 3X the October '11 Snowstorm) ● 96 Electric Substations Damaged (39% of the total) ● 14 Switching Stations Affected (33% of total) ● 51 of 154 Transmission Lines Interrupted (33% of total) ● 2,427 Utility Poles Replaced or Repaired ● 48,000 Trees Removed or Trimmed ● ~4,200 mutual aid or contract workers brought in to assist restoration efforts

PSEG Power's assets were stress tested by Superstorm Sandy, but when the load returned in the days following, Power's assets were available

PSE&G's Energy Strong Capital Program addresses new reality

- New ten-year, $3.9 Billion Infrastructure Program filed with the NJBPU to strengthen PSE&G's distribution system focusing on hardening and resiliency
- Plan to invest an additional $1.5 Billion in transmission grid over the ten-year period
- Energy Strong proposal includes:
  - ✓ Protecting 40 utility installations from severe storms (**$1.7 Billion**)
  - ✓ Making the electric grid smarter and easier to repair (**$454 Million**)
  - ✓ Adding backup distribution lines and system redundancies (**$415 Million**)
  - ✓ Undergrounding 20 miles of overhead distribution lines (**$60 Million**)
  - ✓ Modernizing the gas distribution system (**$1.1 Billion**)

- Better protection for homes and businesses during severe weather and improved day to day system reliability
- Proposed filing creates ~5,800 jobs and stimulates economic activity for New Jersey businesses

SI-SSA-0015-04349

61 local NJ towns and 5 counties support

- 61 municipalities and five counties (Bergen, Hudson, Mercer, Passaic and Somerset) have approved resolutions in support of Energy Strong, PSE&G's infrastructure proposal to improve and fortify its electric and gas distribution systems
- The Energy Strong proposal is currently being evaluated by the NJ Board of Public Utilities
- Public hearings are scheduled for September and October 2013

PSEG First Half 2013 - Highlights

Maintaining 2013 operating earnings guidance of $2.25 - $2.50 per share

- Strong earnings: First half 2013 earnings of $1.33 per share vs. $1.28 in year-ago period
  - Power benefitting from higher capacity prices and asset location
    - PSE&G seeing results from increased investment in transmission
      - O&M under control {Continuing control of O&M supporting results}

- Capital investment on schedule
  - PSE&G received approval to invest $446 million in extensions of Solar 4 All and Solar Loan programs
    - PSE&G's existing $3.4 billion Transmission investment program remains on schedule
      - Hearings scheduled for Energy Strong, PSE&G's $2.6 billion, 5-year capital infrastructure program

- Financial position remains strong
  - S&P credit rating upgrade across Enterprise, Power and PSE&G
    - Debt represented 41% of capital at June 30, 2013
      - Dividend increased 1.4% to $1.44 per share, the 9th increase in the last ten years

Full year 2013 operating earnings expected to be at the upper end of guidance, assuming normal weather and unit operations

SI-SSA-0015-04354

2013 Operating Earnings*

Investment in the regulated business has changed the earnings mix

Our 2009-2013 investment focus has brought us to a 50/50 mix for 2013

PSE&G's 2013-2017 Energy Strong Program and ongoing transmission investments will support continued growth in PSE&G's earnings

$435M	$24M	$411M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-04378

State policy imperatives have been redefined by Superstorm Sandy

Storm report issued by NJBPU focusing on:

- Preparedness Efforts
- Communications
- Restoration and Response
- Post Event Analysis
- Underlying Infrastructure Issues

Storm Deferral Filings:

- On December 19, 2012 the Board granted a PSE&G request for general authority to defer storm restoration costs, thereby making such costs potentially recoverable in future rate filings
- On February 20, 2013, at its open public meeting, the Board voted that the recovery of all such storm restoration costs would be reviewed in a generic (multi-utility) proceeding

SI-SSA-0015-04379

We have also responded with a plan focused on infrastructure hardening and resiliency

- PSE&G filed a petition on February 20, 2013, with the NJBPU seeking approval for the Energy Strong Program (ES) which will harden electric and gas distribution infrastructure and increase the resiliency of the electric distribution system
- The filing complements the NJBPU's recently issued order requiring all Electric Distribution Companies to take specific actions to improve preparedness and response to major storms
- ES program represents a potential investment of approximately $3.9 billion over the next 10 years. PSE&G has asked for initial funding approval of $2.6 billion during the first five years
- Additional Transmission investment of approximately $1.5 billion would be included in future FERC Formula Rate filings

SI-SSA-0015-04380

Lower commodity costs and expiration of certain transition charges are expected to offset the impact to customer bills

*FOR THE TYPICAL COMBINED ELECTRIC & GAS RESIDENTIAL CUSTOMER, 2018 BGS (INCLUDING TRANSMISSION) / BGSS, AS WELL AS SBC, WNC, RAC AND DISTRIBUTION RATES HELD CONSTANT AS OF THE ES FILING DATE (FEB-2013). RATES RELATED TO ELECTRIC RESTRUCTURING: SECURITIZATION (STC), NON-UTILITY GENERATION CHARGE (NGC), & TRANSITIONAL ENERGY FACILITIES ASSESSMENT (TEFA), ARE REDUCED TO ZERO BY 2018. THE RGGI RECOVERY CHARGE (RRC), SOLAR PILOT RECOVERY CHARGE (SPRC), AND CAPITAL ECONOMIC STIMULUS INFRASTRUCTURE INVESTMENT PROGRAM (CIP I) AND THE CIP EXTENSION (CIP II) BILL IMPACTS ARE INCLUDED IN THEIR RESPECTIVE GAS & ELECTRIC BARS AND FORECASTED BASED UPON MAR-2013 ESTIMATES. THE BILL IMPACTS FOR ES PROGRAM BASED UPON THE PROPOSED FILING AND S4AEXT/SL3 IMPACTS ARE BASED UPON THE BPU APPROVED PROGRAM.

SI-SSA-0015-04383

LIPA T&D management contract

In December 2011, the Long Island Power Authority (LIPA) selected PSEG to manage its electric transmission and distribution system for 10 years starting in 2014

- Reasons for selecting PSEG included:
- Proven technical capabilities and track record of top quartile customer service and reliability
  - ✓ Commitment to cost control and investment optimization
  - ✓ Corporate culture of transparency and data-driven decision making
  - ✓ Transition activities on-track – successfully achieving all milestones through February 2013

- Evaluating impact of Superstorm Sandy and recent LIPA management changes on the overall schedule and transition

Successful management of the LIPA transmission and distribution system may lead to additional growth opportunities

SI-SSA-0015-04393

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus

Fleet Diversity/Efficiency Focus

- Fleet diversity across the dispatch curve and fuel types provides flexibility
- Nuclear units continue to achieve strong operational results and are well positioned for the future
- Peach Bottom steam path retrofit completed
- Fossil fleet is suited for market dynamics
- CCGT achieved record output in 2012
- Installed 400 MW new peaking capacity in 2012

Financial/Economic Focus

- O&M cost control programs have delivered
- Sites offering competitive advantage suited for expansion

Regulatory Focus

- Strong regulatory performance
- Industry leadership in the changing regulatory environment

SI-SSA-0015-04394

PSEG Power delivered in 2012

Storm and weather challenges	Market challenges	Value delivered
• Superstorm Sandy impacted our generating sites • Warm winter put pressure on demand and pricing for both electricity and gas • Hot summer weather created challenging operating environment	• Unit outages and transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by weather and economy	• Cost control • Lower dispatch and fuel cost • Captured value through coal/gas switching, unit flexibility • Improved unit availability • Coal & oil sales optimized inventory • Expedited return from storm outages, restored margin opportunities • Optimized unit dispatch across fleet during storm recovery

SI-SSA-0015-04395

PSEG Power has generating assets

in three competitive markets

- Low cost portfolio
- Fuel flexibility
- Assets near loads
- Poised to benefit in real time markets
- Fleet will maintain diversity and efficiency in 2016 after HEDD
- Most sites suitable for expansion

SI-SSA-0015-04396

PSEG Power Nuclear fleet is a critical element of success

SI-SSA-0015-04397

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations – eight consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent and attractive training program
- Developing Fukushima action plan in response to NRC staff review
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-04398

PSEG Power's Fossil Fleet availability has shown steady improvement

EFORd improvement resulted in over 200 MW of additional capacity available

EFORp improvement and availability at peak demand times has resulted in performance payments in each of the last four years

SI-SSA-0015-04399

PSEG Power improvements achieved in combined cycle fleet efficiency

Actions Taken to Create Value	
• Heat rate improvement program • Operational Excellence Model	• Training programs • Unit testing initiative • Outage work to restore efficiency

SI-SSA-0015-04400

Superstorm Sandy affected the fleet;

when the load returned, Power was ready

SI-SSA-0015-04401

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- Power is well positioned for HAPS

SI-SSA-0015-04402

PSEG Power's focus on costs has resulted in moderate increase in O&M for six years

Cost control actions taken:	
• Coal assessment • CCGT material condition assessment • Contract renegotiation	• Material management • Nuclear maintenance productivity study • Nuclear outage efficiency initiative

SI-SSA-0015-04403

* INCLUDES IMPACTS FROM STORM RECOVERY COSTS AND POTENTIAL RELATED INSURANCE PROCEEDS.
E = ESTIMATE.

PSEG Power is well positioned for growth in the fleet when market conditions dictate

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Interconnection • Gas Pipeline Access • Sites/Space • Emissions

SI-SSA-0015-04404

PSEG Power will maintain diversity and efficiency after a realignment of the fleet in 2016

Objective
2012 → 2016E

- Maintain fuel diversity
- Maintain load serving capability
- Improve fleet heat rate by 6%
- Maintain low cost structure
- Environmental improvement

Fuel Diversity

13,226 MW 11,200 MW

Energy Produced

52.5 TWh 52-54 TWh

SI-SSA-0015-04405

PSEG Power is an established leader

within the industry

INPO

- Board of Directors
- National Nuclear Accrediting Board

NEI

- Chair Communications Advisory Committee
- Board of Directors

PSEG POWER
ER&T

SI-SSA-0015-04408

PSEG

We make things work for you.

PSEG Power
ER&T strategy

Focused on optimizing the value of its asset portfolio and providing outstanding service to our customers, while prudently managing risk

SI-SSA-0015-04409

Diversified assets and flexible dispatch

High performing, base load nuclear assets	3,632 MW
Fuel advantaged, base load coal plants in PA	776 MW
Flexible combined cycle fleet	3,176 MW
Well leveraged intermediate & peaking assets	5,642 MW

Integrated trading and dispatch capability around fleet

SI-SSA-0015-04410

Fleet capacity has been advanced by:

Improved Heat Rate capability

Trading acumen to execute fuel switching opportunities

Reduced O&M and increased start-up success

Capturing new products opportunity with minimal investment

SI-SSA-0015-04411

Spark spread replaces dark spread as major value driver

- Spark spread has risen above dark spread in PJM markets
- Power's gas units operating at record throughput
- Gas operation provides much more operational flexibility
- Enhances the ability of trading organization to capture volatility

SI-SSA-0015-04412

2013 BGS Auction Results for PSE&G Zone

BGS sales account for about a third of our forward portfolio of hedges

SI-SSA-0015-04413

BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2011-2013 ARE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2013.

Our hedging mix has changed with the market but still captures the fleet's locational advantage

- 3 Year forward BGS sales comprise smaller percentage of Power's hedges
- Other full requirement load deals help capture additional locational and load shape premium

SI-SSA-0015-04414

NOTE: PERCENTAGES REPRESENT HEDGED VOLUMES IN PLACE AFTER BGS AUCTION.

Hedging strategy designed to protect gross margin and leverage the portfolio

Ratable Hedging on Base Load:

- 3 year ratable hedge tactics
- 3 year PJM hedge of capacity (not included in table)
- Load following sales (such as BGS) have strong correlation to our units for hedging basis and load shaping premium

Dynamic Hedging on Intermediate Coal, Combined Cycle and Peaking:

- Position fleet to take advantage of market volatility
- Gas and load-following fleet left open until prompt year to capture volatility
- Use all trading products to capture option value of assets and benefit from market dislocations

		Jul-Dec 2013	2014	2015
Base Load (Nuclear and Base Load Coal)	Volume TWh	17	35	35
	% Hedged	100%	90-95%	50-55%
	Price $/MWh	$51	$49	$49
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	11	18	17
	% Hedged	30-35%	0%	0%
	Price $/MWh	$51	$49	$49
Total	Volume TWh	26-28	53-55	52-54
	% Hedged	70-75%	55-60%	30-35%
	Price $/MWh	$51	$49	$49

HEDGE PERCENTAGES AND PRICES AS OF JUNE 28, 2013. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS.

SI-SSA-0015-04415

PSEG's locational advantage

and electric basis

- Basis (PS Zone to PJM West) will continue to trend downward for forward sales
- Volatility will remain significant in the prompt periods (especially summer/winter)
- Power maintains sufficient length to participate in upside volatility as well as a valuable 250MW transmission position into NYC
- Basis will continue to have a positive impact on PSEG Power profitability

SI-SSA-0015-04416

*AS OF MAY 15, 2013.

PSEG's locational advantage

and gas basis

- Lower cost supplies of shale gas have been beneficial to both PSE&G customers and PSEG Power
- Over 50% of our available pipeline capacity can access market area supplies of shale gas
- Power's generating units sit in close proximity to the Marcellus fairway
- Power buys approximately 350BCF/year of gas
- Availability of a robust gas portfolio of storage and pipeline capacity benefits PSE&G customers and Power's generating assets

SI-SSA-0015-04417

PJM's capacity market continues to recognize locational value of our fleet

$/MW-Day	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016	2016 / 2017
Power's Average Price	$153	$244	$162	$167	$166
PS Zone					$219
EMAAC	$140	$245	$137	$167	$119
RTO	$16	$28	$126	$136	$59
Power's Capacity (MW)	10,400	10,600	10,300	9,000	8,637*

*PSEG Power's cleared megawatts split between PS Zone and EMAAC.

2016/2017 RPM Auction Influenced By:

- New Build and Higher Imports
- Updated Transfer Capabilities
- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Lower Demand Response

SI-SSA-0015-04418

Reserve margins in PJM declining with retirements

Generation Deactivation Notifications

Source: PJM TEAC, 8/8/2013

- PJM Pending Deactivation Requests of 13,340 MW as of August 13, 2013
- Approximately 5,000 MW of additional owner announced retirements in PJM through next auction

Forecast Reserve Margin (PJM June 2013)

- PJM forecasts a declining Reserve Margin through 2017

SI-SSA-0015-04419

Regulatory Advocacy

dividend increases consistent with stable regulated growth and cash generation outlook at PSEG Power

SI-SSA-0015-04436

PSEG Summary

- Maintaining 2013 operating earnings guidance of $2.25 - $2.50 per share -- based on financial results to date, we expect operating earnings for the full year to be at the upper end of our guidance range assuming normal weather and unit operations
- Double digit operating earnings growth at PSE&G starting in 2013, and continuing through 2015 driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength reduces risk in low price environment
- Strong Balance Sheet and Cash Flow support full capital program without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for future growth

PSE&G provides high reliability at below average cost which creates superior value to customers

SI-SSA-0015-04443

SAIDI = SYSTEM AVERAGE INTERRUPTION DURATION INDEX, A MEASURE OF AVERAGE OUTAGE DURATION FOR ALL CUSTOMERS SERVED.

PSE&G prioritizes public safety

while maintaining value to customers

LEAK RESPONSE RATE = PERCENTAGE OF UTILITY RESPONSES TO REPORTED LEAKS WITHIN ONE HOUR.

SI-SSA-0015-04444

Formula rates for transmission make the process more predictable with contemporaneous returns

	Transmission (Federal)	Distribution Base Rate Case (State)
Current ROE	• 11.68% base • 12.93% with incentives on Susquehanna-Roseland • 11.93% with incentives on Northeast Grid	• 10.3%
Volatility of Returns	• Low – prospective recovery with annual true-ups for over/under recovery	• Higher – performance impacted positively/negatively by cost management, weather, customer demands, etc.
Process	• Formula – The rate template and specific elements like ROE are predetermined with annual updates and true ups	• Litigated case with each element (depreciation, ROE, O&M levels, Rate Base) scrutinized and settled
Intervenors	• State consumer advocates usually participate	• State consumer advocates • Large customers • Other parties affected by the case, e.g. Solar Developers
Test Year	• PSE&G has fully **forecasted** test year for both Capital and O&M	• **Historical** test year with pro-forma adjustments for known and measurable items, e.g. wage escalation
Time to resolve	• Annual Formula updates are filed in October with January 1 effective date	• Typically settled within 12-15 months

SI-SSA-0015-04445

New Jersey Board of Public Utilities (BPU)

- The Board of Public Utilities consists of five commissioners appointed by the Governor. These appointees are confirmed by the NJ Senate for six-year, staggered terms. The Governor appoints one of the five to serve as Commission President.

  Currently, the commissioners are:

  - Robert M. Hanna, Commission President
  - Jeanne M. Fox
  - Joseph L. Fiordaliso
  - Mary-Anna Holden
  - Dianne Solomon

- Stefanie Brand, Director of the N.J. Division of Rate Counsel

SI-SSA-0015-04446

Slow economic recovery in NJ is constraining growth in all market sectors

Modest residential growth limited by housing market inactivity and the slow economic recovery

Consumer spending is trending with the slow economic recovery and impacting growth in the commercial sector

Industrial sales growth continues to be constrained by slow economic recovery

2013 - 2015 Projected Sales
Growth – Gas*

2013 - 2015 Projected
Sales Growth – Electric*

SI-SSA-0015-04447

* WEATHER NORMALIZED ESTIMATED ANNUAL GROWTH PER YEAR OVER FORECAST PERIOD

Key economic indicators forecast renewed growth over the 2012 to 2015 timeframe

The New Jersey economy increased by 0.3% annually from 2010 to 2012 and is anticipated to grow 2.3% per year from 2012 to 2015

New Jersey total non-farm employment increased by 0.6% annually from 2010 to 2012 and is expected to grow 1.4% per year from 2012 to 2015

Real personal income in New Jersey increased by 1.4% annually from 2010 to 2012 and is expected to increase 2.5% per year from 2012 to 2015

Single family housing starts declined by 2.6% annually from 2010 to 2012 and are expected to increase ~24% per year from 2012 to 2015

Public Service Enterprise Group

September 12, 2013
11:45 a.m. ET

Daniel Ford: Hello, everybody. Our next presentation is going to be from Public Service Enterprise Group. We have Ralph Izzo who is Chairman, President and CEO as well as Caroline Dorsa who is Executive Vice President and CFO.

Ralph Izzo: Thank you, Dan, and thank you, everyone, for being here. So I would direct you to both our forward-looking statement and our GAAP disclaimer although obviously I won't go through the details of either of those documents. We will be talking a bit about prior results of the past few years as well as making some projections as to how the outlook looks for us, at least certainly for the next couple of years.

Most folks will tell you as I walk around PSEG, the conversation typically begins with employees talking about the importance of operational excellence, not just in our regulated business, but in our unregulated wholesale power business. And what we try to impress upon employees is that if they do operate our assets with excellence, there's no question given the markets we serve, which I'll go into in some greater detail, that we'll produce profitable outcomes and a level of financial strength that we can then redeploy in some way through some disciplined process by way of investing in assets that we have a good chance of operating with excellence as we move forward.

The result of that is a highly engaged workforce. Now if that didn't make sense from an investor point of view, I assure you it does make sense to our employees. But what you should hear from those words is that PSEG is really focused on deploying its very, very healthy balance sheet, primarily in our stable, regulated business nowadays, in ways that both meet the needs of our customers and fulfill the social and public policy objectives laid out by our regulators and elected officials.

And while that's the primary growth trajectory that we are pursuing, we do that while we protect the upside associated with operating a fleet of assets in our merchant generation business that has some very unique set of strengths that I'll talk about in greater detail as we go forward.

For those of you who are not familiar with the specifics of PSEG, let me turn those generalities into a subsidiary by subsidiary review of Public Service Enterprise Group. The main growth vehicle and the main investment vehicle is about $10 billion in capital at Public Service Electric and Gas, our electric and gas delivery and transmission business in New Jersey. That $10 billion number is between now and 2017 and it looks more like a $6 billion number between now and 2015.

In addition to that, our merchant generation business, owning about 13,000 megawatts of merchant generation in the New England and PJM East region, is really characterized by a fleet that is advantaged in two ways. Number one, by its physical location, and number two, by its environmental position. It is a very clean fleet with its environmental CapEx all in the rearview mirror and minimal environmental CapEx standing in its way as we approach [HAPS MAC] compliance timeframe of 2015.

And then last and to a much smaller extent, our PSEG Energy Holdings, which is growing from about 69 to 90 megawatts of unregulated solar in the course of the next few months. And we'll continue to look for PPA-supported projects in the 15 to 25 megawatt range throughout the country.

Well how has this business model of relying upon a foundation of operational excellence to produce solid financial results, which are then deployed in a disciplined manner into new investments? Let's just take a look at what it's produced over the past 4 years. It is hardly something to boast about when one is talking about a 15% decline in earnings per share over a 5-year timeframe. However, something was done properly when you look at an over 50% reduction in the power prices that we've realized at PJM West which is the most liquid hub in terms of the markets that we serve.

And the way we did it was by reducing our own growth from what was a planned 2.4% escalation rate to something that was less than 1%, all the while keeping our forced outage rate at our combined cycle units at about the same level, going from 1.6% to 1.7%, increasing the amount of generation at our nuclear plants from 29.3 terawatt hours to 29.8 terawatt hours, and taking advantage of the lower supply charges that our customers realized and the lower supply revenues that we realized, and taking the benefits that customers saw in their bill and using that as an opportunity to make very needed investments in our delivery business.

So we took our transmission rate base from under $1 billion to $2.5 billion, developed a contemporaneous return distribution investment program that we call the Utility Cap Stimulus Spending, from zero to nearly $1 billion.

And in fact, investing in some of the renewables programs, both in terms of solar and energy efficiency that the state was a champion of, and going from zero to nearly $900 million.

Probably no one event defined the past four years and the importance of operational excellence better than Super Storm Sandy. I won't spend a lot of time walking you through the significant amount of damage that we realized, primarily on the delivery side, but also on the generation side. Suffice to say that we not only received an EEI Award for our recovery, but we used this as an opportunity to say while load and demand for electricity is not growing commensurate with historic levels, customers' reliance on electricity is achieving levels that have never been seen before. And it's that reliance upon electricity, that dependence upon electricity that encouraged us to say something needs to be done differently. That something we describe as Energy Strong. I'll get into the details about that in a few minutes.

But it's our ability to demonstrate operational excellence in restoring customers. The strength of our balance sheet that exists today that allows us to take those two and say we need to do something quite different going into the future to recognize that dependence that customers have on electricity. And that is a $3.9 billion 10-year program called Energy Strong that I'll get into in greater detail in a few moments.

Let's step back for a second however and look at the overall capital program at the parent company. Between 2013 and 2015, we have plans to deploy $6.3 billion in capital. About 75% of that is in growth capital, most of that being at the utility. In fact, the total capital to be deployed at the utility is a little bit north of 81%. I have to emphasize that what we're showing on these two pie charts, that's the same $6.3 billion worth of capital, are programs that are fully authorized. We're not asking permission to spend this money. To the extent that some of the transmission money that's envisioned being spent here needs to be into the PJM RTEP, which is their regional transmission expansion plan, it's already in there. To the extent that some of this money needs to get Board of Public Utilities approval in New Jersey, it's already received that approval.

To the extent that some of these plans need to be synched up with new customer connections, those customer connections are already known to us. So this $6.3 billion does not need anything other than in some cases siting approval in local towns and municipalities which we have had a very good track record of achieving.

If we were to say what else might be available to us, that $6.3 billion can become $7.5 billion in the next few years, largely driven by PSEG's Energy Strong proposal, which as I said a moment ago, is a 10-year program for which we've sought 5 years of approval. And this would be the 3-year impact largely being realized in 2014 and 2015. There's a very, very modest element associated with that in 2013.

All of that would be growth, so the additional $1.2 billion that gets added to the $6.3 billion would all be in the utility and all receive contemporaneous return treatment if it were to be approved by the Board of Public Utilities.

Let's then spend a little bit more time on the details behind Energy Strong. As I said, it's a $3.9 billion program for ten years. All we have filed for is the $2.6 billion that we would expect to spend over the next five years. In addition to that $3.9 billion over ten years, there would be $1.5 billion in transmission enhancements that is not subject to state jurisdiction but is subject to our Federal Energy Regulatory Commission's formula rate treatment which as you know right now receives an 11.7% allowed return on equity.

Here we break out the specific projects in areas that we expect to deploy that capital. There are numerous benefits associated with Energy Strong. Primarily in the electric area, but also in the gas area. And one significant element of the benefit of doing this now is the availability of labor and the fact that Energy Strong produces nearly 6,000 jobs in terms of the construction program that we envision.

So we have a reliability improvement, economic development benefits, the availability of labor, the access to capital works quite well for us right now, and as a result of that, we've had some significant support from municipalities who have passed resolutions in support of Energy Strong, county governments who have passed resolutions in support of Energy Strong, and in fact, we are predicting that as we enter the public hearing stage, which is the phase we're in right now, we're in our first public hearing beginning next Monday and continuing through October, that we will have significant support from organized labor, the New Jersey Chamber of Commerce, hospital associations, associations of higher education as well.

Part of the reason for that additional support is not just in the obvious benefits that I've outlined for you, but it's also in the fact that we can manage this program and not raise customer bills in the next three years. That is largely due to the benefits associated with the decrease in customer bills that result from about 8.7% reduction in a residential rate that will be realized as charges that were associated with several

programs in the past, the single biggest one is the securitization charges associated with deregulation rolling off as well as some above market NUG contracts expiring, and those two alone combine for an 8.7% reduction in anticipated residential bills between 2015 and 2016.

And the rate reduction for the commercial customer space is even larger than that. So we can feather in Energy Strong without an increase in residential or commercial bills, assuming the current BGS rates stay steady in that same timeframe. So significant customer benefits, significant job creation benefits without any increase in rates is what is generating this kind of support. To be sure, there are some folks who are saying, no we should it for free. That's not in the cards. And others who are saying that we should do this under traditional ratemaking and no, that's not in the cards as well.

Let's now switch gears from PSE&G where as I mentioned the vast majority of our capital investment is targeted, and talk a bit about PSEG Power. If I had to use one phrase to explain the benefits associated, the advantages that PSEG Power has over competitors, it would really be on this slide and it would be in the word diversity. Fuel diversity as well as technology diversity. If we were to focus on the two pie charts on the left and the right, they would not be any different if I were to show them to you, if I had shown them to you 5 years ago. And in fact, I think if I can go back 10 years, they would look quite similar. We have this mix of gas, coal and nuclear assets. We have this mix of base load, load following, and peaking assets.

But what has changed over time is the pie in the middle. And by and large, the nuclear elements of the gigawatt hours we've produced has been anywhere from 50% to 57% of our output. It was probably closer to 50% years ago when our capacity factors were more like 88% as opposed to the 92%, 93% capacity factors at which we run. But the gas and coal would have been flipped. You would have seen probably more like 35% in coal and 15% in gas and now you're seeing the 32% in gas and 11% in coal in terms of energy produced.

Let me also point out for you that that 11% in coal is a bit of a misnomer. Almost 55% of that 11% of our coal assets was run on natural gas. So we have enormous fuel flexibility in our assets to respond to market conditions in terms of fuel prices. And in fact, if I stick with energy for a moment and talk to you a bit about our locational advantages, we have watched the basis differential from PJM West and the PS Zone decrease over time to be sure. And typically when one looks at that basis differential, one looks at it from the perspective of the forward price curve, and you've seen that come down from double digits to low single digits

nowadays. And in fact, if you were to just take the forward price curve and do the subtraction, nowadays you'd see a number like $2 or $3 depending on what year you're looking at yet.

What I'm trying to show you here on the left, however, is the on peak monthly day ahead basis differential between the PS Zone and the PJM West. And what you see is anything but a stable single digit number. That flexibility in terms of the technology that we have, in terms of our peaking and load following units, and our natural long position and the way in which we hedge, which is to only hedge 100% of our base load, in the current year allows us to take advantage of these spikes. These spikes are not driven by anything other than the operational complexity of running the grid. What happens when a plant has an unexpected outage? What happens when you get 96 degree weather in September with 85% humidity? What happens when a power plant or transmission line comes out that wasn't expected to come out?

And you can see that there is just enormous volatility in that basis differential that advantages a set of assets like ours that are naturally long and in the region that is typically on the upside of this zero line as you see here.

Sticking with energy, another advantage that's now arisen of late is the fact that PSEG Power has nearly a little more than half a Bcf of transfer capability of Marcellus Shale which translates into our ability to fuel our five natural gas combined cycle units, over 3,500 megawatts, at a lower fuel supply cost than others might be able to. That is on top of our nearly 1 Bcf a day of storage which is on top of our 0.7 Bcf per day of access to gas supply from the more traditional routes. So we can take a look at where it is most advantageous to us to supply our gas plants, which once again, we do not hedge quite to the same extent as we do our base load units.

As I move from energy to capacity, there's no question that the rules are still evolving in PJM. And there's no question that some years DR plays a different role in terms of affecting the market than what the minimum offer price rule might do. And this year's story may not have been either of those and it may have been more related to transfer capability from the west. However, as you look at the top line, which is the price that we've realized, what you see is, except for the blowout year of 2013 and 2014 which is what we're in now and is one that I wish had been replicated many times over, for the past 3 years we have seen auctions that give us a pretty steady, predictable price of about $165 per megawatt day plus or minus a couple of dollars. And those prices are the best prices in the region, just given the supply/demand tightness in the markets we serve.

So from an energy and a capacity point of view, we think that we do have natural advantages both in terms of our assets, in terms of their fuel diversity, their locational advantages, and the flexibility around the technology.

So I talked to you about what happened going from 2008 to 2012, what does this mean for us going forward? Well we continue that focus on O&M control. We're forecasting about a 2.2% O&M growth across the enterprise. We'll talk a little bit more about that in some detail in a moment. We continue to pursue the path that we have pursued over the past 4 years which is to take the cash being generated at power and to combine that with the ability for the utility to access the debt markets and grow its rate base. We're going to take that from a $9 billion rate base over the next 3 years and grow it by over 30% to over $12.5 billion. Most of that will take place in transmission where we get FERC formulate rate treatments with allowed equity returns of 11.68% up to 12.9% depending upon the project. We will also grow our distribution business with the Energy Strong proposals that we have, and we have already received approval for what we call the EMP, Energy Master Plan programs through the settlement and approval that we received from the Board of Public Utility for increased solar investments.

We'll drive down our forced outage rate at our combined cycles. We'll increase, we'll further increase our nuclear generation. This is not so much about a further improvement in capacity values, it's more a further expansion through our upgrade at Hope Creek that has been completed and our upgrade at the Peach Bottom units which are underway. And we do have projects that are already in construction at Holding Solar that will increase the amount of capability we have there. And as you all may be aware, we have a contract with the Long Island Power Authority to take over their operations beginning January 1 of 2014.

So if I spend a few minutes on this growth rate in our O&M, we had predicted a 2.4% growth over the prior 5 years. We kept that to under 1%. What we're forecasting for the next few years is growth at the enterprise level of 2.2%. Let me emphasize for you that the transmission growth rate of 0.4% is something that's essentially a pass through through the formula rate treatment that we get at FERC. The distribution growth rate will be kept to about a little over 1%. And the power growth rate is driven mostly through the short time duration we have here and some additional large outages that we will be taking at our combined cycle units just given the heavier use that they are realizing.

If I take look at the balance sheet, as we move over the next 3 years, it is as healthy as healthy can be. We've recently enjoyed the benefit of an

upgrade at the rating agencies. You can see here that the absence of any capital being, any material capital being required at PSEG Power really results in the utility simply living up to its debt to equity ratio, the 51% equity and 49% debt. And as a result of the utility capital program you see a modest increase in the overall debt to equity ratio at the parent company as well.

What does this mean in terms of the earnings trajectory that we've realized? So we had power representing three quarters of the earnings of the company in 2009. As it is seen, it's price that it's realized has come down as a result of the decline in wholesale power prices. And the utility, with the robust investment program, this year we're forecasting that power in the utility will contribute equally to the earnings of the company. While we don't forecast future earnings, given the transparency and the visibility we have to utility capital investments, we are forecasting double digit earnings growth for PSE&G, the utility, over the next two years.

As we said on our second quarter call, we are sticking with our 225 to 250 earnings guidance for this year. However, we do expect the normal weather conditions with normal unit operations to end the year at the upper end of that guidance range.

In terms of the dividend, we're proud of that track record that we have mentioned in the past, namely the fact that we have not missed one year of dividend payments for over 100 years. The utility now accounts for about 80% of the dividend payout. With the double digit earnings growth at the utility, one could do some simple arithmetic and realize that over 2014 and 2015, the utility could cover 100% of the dividend payout. Having said that, we don't tie the dividend payout to any one measure. We tie that dividend payout to what is the growth in the utility earnings, what are the cash needs of power, where are we in the commodity cycle. And when we add all that together, what we can say to you is that we do believe we have an opportunity for sustainable modest growth in that dividend. And we don't make that prediction lightly as I said just a moment ago given the company's track record of never having missed a year of dividend payments. If you look at us over the last 5 to 10 years that dividend has grown between 2% and 3% over that timeframe.

So I think I'll stop there and leave some time for questions. At the end of the day what I see is a power generation fleet that is extremely well positioned locationally, extremely well positioned from an environmental point of view in terms of the rules that it faces, with tremendous amount of diversity both in terms of the technology and the fuel mix, and being able to take advantage of the market dynamics that it faces, the market dynamics in terms of Marcellus Shale gas, the market dynamics in terms

of basis volatility. It produces healthy cash streams that we can then use in our utility for a fairly robust double digit earnings growth for the next three years and clear investment horizons that go beyond that in terms of the rate based growth that we would anticipate. All with no need for new equity issuance, all with the ability to fund that internally in terms of our equity requirements, healthy access to the debt markets, and a very, very secure and modestly growing dividend as we look to the future.

So Dan, if we -- we do have time for questions I can see from the clock.

Unidentified Participant: Very good story. One of your smaller projects that I have a strong personal interest in are the distributed solar panels on the utility poles. How would you characterize your experiment with that? And about how much power does it generate collectively? And do you intend to expand it?

Ralph Izzo: I would characterize the outcome as somewhat mixed and let me tell the good news and then the not so good news. We installed 200,000 of them. They produce I think it's about 30 megawatts, maybe a little bit shy of that. They work well. During Sandy for example, the only reason why any of those panels fell was because the pole fell. So none of the panels -- we were candidly worried, are we putting sails on there and are there things that could become a problem later on? They also have the capability of doing some remote communications for us and that communications capability works as well.

The degradation has been miniscule. I think we had a certain expectation of fractions of a percent in terms of just the aging of the panel and that's been met as well. So from an operations point of view, I would give them an A+. The downside is the cost. I mean those panels produce electricity at anywhere from $0.35 to $0.40 a Kwh. And notwithstanding the reduction in panel prices, the installation costs remain high. So our Solar 4 All extension program shifted away from those panels and more towards 3 to 8 megawatt ground based utility scale developments.
So even with the panel cost reductions, I don't think that those projects are economic on a wide scale going forward.

Unidentified Participant: Ralph, I recognize that it's a very small item for you, but you did mention it, the LIPA contract. It seems to me you're exposing yourself to a lot of potential negative publicity which LIPA has gotten in the past and well deserved, and probably will continue to get in the future except what you bring to the party. What's the purpose in your having bid on that contract in the first place and what do you see getting out of it?

Ralph Izzo: So remember when we first won the LIPA contract was pre-Sandy. And what appealed to us was the return. We had about $0.03 per share profit in the numerator and the capital investment was zero. So that arithmetic works kind of nicely. I mean it was certainly management intention. And at the time, we were not going to be the brand associated with LIPA. We were going to truly step into the role that national grid plays. And the analogy I like to use is we were going to be the arms and legs and LIPA was going to continue to be the brains and the mouthpiece.

Sandy changed that and the governor decided that he really didn't want LIPA to play the role that it plays and he was interested in having us become the brand which meant becoming the brains and the mouthpiece. And we said, okay, we think we can run this place differently and candidly better, and we would be interested in that. Which puts our brand somewhat at risk in exchange for a different set of economic terms and conditions. That expanded and enhanced operating services agreement has not been fully consummated yet. We're hopeful, in fact we're optimistic it will be.

So the answer is that in exchange for putting ourselves more in front, as PSEG Long Island, which is consistent with our clever, brilliant branding strategy, we will then get some greater economic rewards for it. We still will not put ourselves in a position of A), investing in assets, putting capital at risk, or B), taking on any of their debt risk or any of their pension risk or any of the sort of big items that you would want us to be cautious about. So we will be, instead of a subcontractor, a general contractor getting a bigger reward for doing that, but putting our names on the trucks which will be the risk that we will take.

Unidentified Participant: Ralph, can you comment about what you would like to see from the PJM stakeholder process this year as regards the RPM for next spring?

Ralph Izzo: Yeah, so I think the biggest area that I would like to get resolved, because it's been a little of an oscillating pendulum and it's oscillating about an equilibrium that I like, but it hasn't stopped swinging, is the [MOPR] process. So we had a MOPR that I thought was going to work well and then candidly PJM deployed it in a way that I thought, well where did you come up with those numbers? And then PJM said, you're right, there was just too much flexibility in what people, the case that people could make, so we're going to go back to FERC and tell them, gee, we don't think we should be allowed to do this. We went to FREC and we thought FERC would say yes and FERC said, well, gee, we think you can do what you want us to say, but we're not going to be the ones to force you to do it, but

we'll give you the right to do it. And what we're talking about is sort of depreciable life of assets, cost of capital, numbers that really swing. What could and couldn't be depending upon the kind of candidly subsidized contract you have in your back pocket.

So I think what FERC has done is said to PJM look, we understand what you're trying to protect against and we'll allow you to protect yourself against that, but we're not going to force you to do that. So in that stakeholder process we are trying to make the case that the quid pro quo is if somebody is not subsidized, then capital discipline is the responsibility of that entrant. But if they are subsidized, then they can play without showing that they actually bought the turbine for less than we bought the turbine. Or they have a site that fully benefits from interconnection in ways that others don't.

But if they're doing it by saying, gee, we have confidence that the forward price curve is going to do this, and to have that confidence because in their back pocket they've got a guaranteed payment stream, then that's a foul that you have to call timeout on. So that's what I'd like to see resolved.

To a certain extent, we weren't affected by this, but I still would like to see some work done on it, is our people perhaps being confident in terms of the capacity they believe they can bring to bear, either because of transfer capability or DR or because of new build, that they're bringing to bear because of the intervening auctions, the incremental auctions. So let's make sure that people aren't bidding something new that really is the old stuff that is coming into play in-between the base residual auctions. So that one hasn't come back to haunt PSE&G or PSEG, I'm sorry, I should say. Showing my age. But if it's an imperfection that's affecting the west, it could start affecting the east and I'd like to see that fixed. But I put that number two just because of the impact that we saw LCAP create behind MOPR for us.

Daniel Ford: Any other questions for Ralph? Great, if there are not, I'd like to thank him very much for the presentation and there will be a breakout in Liberty 5.

Barclays CEO Energy - Power Conference

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of July 28, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. PSEG STRATEGY: GROWING A HIGH-QUALITY, FINANCIALLY SOUND ENERGY INFRASTRUCTURE COMPANY

Dan Cregg

EXECUTIVE VICE PRESIDENT AND CHIEF FINANCIAL OFFICER

PSEG

We make things work for you.

SI-SSA-0015-04471

PSEG's Value Proposition

- A stable platform with a $15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 110-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

SI-SSA-0015-04472

Two strong businesses

A stable platform, each with growth opportunities

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (326 MW_{DC}/257 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-04475

PSEG

*POWER ANNOUNCED RETIREMENTS OF HUDSON AND MERCER GENERATING STATIONS AS OF JUNE 1, 2017.

PSEG Policy and Regulatory focus

on mechanisms that provide customers clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- True-up data from 2010 base rate case for known changes in customers usage, taxes, O&M and investments

Long-Term Infrastructure Investment Platform

- Seek extension of existing infrastructure programs, e.g., GSMP, and broaden investment platform

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy to recognize the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-04476

Focus on earning our cost of capital has provided for growth in operating earnings* and dividends

SI-SSA-0015-04492

PSE&G: Energy Efficiency Approval and GSMP II Filing Support Long-term Regulatory and Policy Objectives

PSE&G's recent filing to extend its Gas System Modernization Program (GSMP) and the recent approval of its proposed extension of the Energy Efficiency investment program reinforce PSE&G's commitment to provide clean, reliable energy for its customers

Gas System Modernization Program II

In July, PSE&G filed for a 5-year extension of the GSMP which would accelerate the pace of replacement of its aging cast iron and unprotected steel mains and associated service. PSE&G is proposing to invest approximately $540 million per year, or up to $2.7 billion, over the 5-year program beginning in 2019. The filing is consistent with the draft regulations that the BPU issued in June regarding Infrastructure Investment Programs.

Energy Efficiency

The BPU has approved PSE&G's agreement with BPU Staff and Rate Counsel to extend its investment in Energy Efficiency. Under the agreement, PSE&G would invest $69 million in energy efficiency equipment for hospitals, multi-family housing and other sectors and a residential energy efficiency offering for smart thermostats and data analytics. The agreement represents more than 90% of PSE&G's request.

SI-SSA-0015-04493

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-04494

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of July 28, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. PSEG STRATEGY: GROWING A HIGH-QUALITY, FINANCIALLY SOUND ENERGY INFRASTRUCTURE COMPANY

Dan Cregg

EXECUTIVE VICE PRESIDENT AND CHIEF FINANCIAL OFFICER

PSEG

We make things work for you.

SI-SSA-0015-04500

PSEG's Value Proposition

- A stable platform with a $15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 110-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

SI-SSA-0015-04501

Two strong businesses

A stable platform, each with growth opportunities

** ESTIMATED ANNUAL GROWTH PER YEAR, ASSUMES NORMAL WEATHER.

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (326 MW_{DC}/257 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-04504

*POWER ANNOUNCED RETIREMENTS OF HUDSON AND MERCER GENERATING STATIONS AS OF JUNE 1, 2017.

PSEG Policy and Regulatory focus

on mechanisms that provide customers clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- True-up data from 2010 base rate case for known changes in customers usage, taxes, O&M and investments

Long-Term Infrastructure Investment Platform

- Seek extension of existing infrastructure programs, e.g., GSMP, and broaden investment platform

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy to recognize the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-04505

Focus on earning our cost of capital has provided for growth in operating earnings* and dividends

SI-SSA-0015-04506

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO NON-GAAP OPERATING EARNINGS.

PSE&G's investment program provides for 7%–9% growth in rate base

E = ESTIMATE.

SI-SSA-0015-04507

Baseline programs yield 7% compound annual growth in rate base

SI-SSA-0015-04508

E = ESTIMATE. DATA AS OF MARCH 2017. CAGR = COMPOUND ANNUAL GROWTH RATE. INCLUDES AFUDC.

Expansion/Extension of existing baseline programs would yield 9% compound annual growth in rate base

E = ESTIMATE. DATA AS OF MARCH 2017. CAGR = COMPOUND ANNUAL GROWTH RATE. INCLUDES AFUDC.

SI-SSA-0015-04509

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2012 - 2016

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2017-2021E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth rate

SI-SSA-0015-04521

PSE&G: Energy Efficiency Approval and GSMP II Filing Support Long-term Regulatory and Policy Objectives

PSE&G's recent filing to extend its Gas System Modernization Program (GSMP) and the recent approval of its proposed extension of the Energy Efficiency investment program reinforce PSE&G's commitment to provide clean, reliable energy for its customers

Gas System Modernization Program II

In July, PSE&G filed for a 5-year extension of the GSMP which would accelerate the pace of replacement of its aging cast iron and unprotected steel mains and associated service. PSE&G is proposing to invest approximately $540 million per year, or up to $2.7 billion, over the 5-year program beginning in 2019. The filing is consistent with the draft regulations that the BPU issued in June regarding Infrastructure Investment Programs.

Energy Efficiency

The BPU has approved PSE&G's agreement with BPU Staff and Rate Counsel to extend its investment in Energy Efficiency. Under the agreement, PSE&G would invest $69 million in energy efficiency equipment for hospitals, multi-family housing and other sectors and a residential energy efficiency offering for smart thermostats and data analytics. The agreement represents more than 90% of PSE&G's request.

SI-SSA-0015-04522

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-04523

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

MANAGEMENT DISCUSSION SECTION

Unverified Participant

All right. So, next up we have Public Service Enterprise Group. Dan Cregg who is the Chief Financial Officer is going to take us through the PEG story. Dan?

Daniel J. Cregg

Thank you, Dan. Good afternoon, everybody. We'll walk through the forward-looking statements and GAAP disclaimer to get to the beginning of the proper presentation.

So, now I'll walking through our story. Really it is surrounded by and driven by a $15 billion infrastructure investment program and that is far and away the largest opportunity that we have for growth. And it spans both companies that we have within the group, PSE&G which is our regulated utility company in New Jersey. And I'll show a slide a little bit more about what that entity looks like geographically, which represents a fair bit of rate base growth. We'll go through some of those details in applying disciplined investment that really in conjunction with policy drivers in the State of New Jersey.

And PSEG Power, efficient, low-cost, clean fleet and getting more so from some changes that we've been making. We've seen a couple of retirements of coal facilities recently and build-out of combined cycle units, which is going to bring the overall fleet [ph] gate (01:22) rate down considerably as we step through time.

All hinging ultimately on operational excellence. So, in both entities, we really target the issues of running the business well, benchmarking considerably throughout both sides of the business and whether it's operating a nuclear facility, running the grid, or even in the accounting and payables areas making sure that everything is operated as efficiently as possible. And the third lever that we utilize is financial strength.

So, operational excellence, disciplined investment and financial strength. 110-year record of dividends, recently acknowledged at the New York Stock Exchange where we rang the closing bell to mark our 110th consecutive year of dividend payments and all supported by a very strong balance sheet and good credit statistics.

So, quick look at the two businesses that we do have. On the left hand side, PSE&G, if you take a look at the midpoint of our 2017 guidance, it would represent about two thirds of the overall contribution of the company with Power making up the balance. Again that first bullet that you see on in PSE&G, strategy, investments are line with public policy and customer needs. That has really been behind most of the investments that we have made on that part of the business, aligning our business with what the State wants to get accomplished, as opposed to fighting things that we think may or may not make more sense working in unison with the State to advance the capital program that we do have.

That results in a $12 billion to $14 billion capital plan at PSE&G, focused mostly on infrastructure and opportunities to expand our rate base. And I'll go through in some slides where you can see the overall compounded annual growth rate of that rate base somewhere between 7% to 9% over the next five years.

Bloomberg Transcript

On the Power side of the business, increased our competitive position through the build-out of our combined cycle program. So, we have a construction program in place. Three new combined cycles being built. They will be completed and in service in 2019, which will bring the efficiency of the fleet up considerably and enhance the overall competitive position.

In addition to that business, when you look at the value proposition, very strong cash flow is coming from that business. Those cash flows are used as a source of value and investment to meet the $14 billion program, that I talked about on the capital side at PSE&G. So, a good relationship between those two entities. And if you take a look at the capital program in the aggregate, a little over 80% of the capital that we will put to work goes to PSE&G, the regulated side of the business. So, as we step through time, more and more focused on the regulated side of the business and a higher contribution to the overall enterprise's growth.

So, a couple of slides to define each of the individual components. So on the utility side first. If you take a look at PSE&G, territory runs down the center of New Jersey, really from the George Washington Bridge to the Ben Franklin Bridge, expanded on both sides. 2.2 million electric customers, 1.8 million gas customers in place.

One thing to think about for a number of the transactions that have happened in this space off late, they were convergence, mergers, where electric and gas ended up coming together. PSE&G has electric and gas that are together and have been together for quite some time. So, the benefits of having those two companies together have been part of what we have been for many, many decades.

Also a sizeable transmission business, and I will show you some slides later on where we look at the total investment, as well as the total rate base. And a little less than half of the aggregate rate base at PSE&G, is on the transmission side. So we have a transmission formula rate in place with contemporaneous returns. And it is a considerable piece of the overall pie that you see for PSE&G and you can see it in the form of a pie-chart on the bottom right-hand corner of the slide with 52% distribution, 44% transmission and about 4% of rate base coming through solar and energy efficiency.

On the Power side of the business, very well-located assets. Again, in the same territory that I laid out largely. The investment program, adding those efficiencies, but also, I would point to the nature of the assets themselves and the ability to follow load. So, a good mix of base load, as well as load following units within the fleet as a whole.

If you also think about how we hedge that. We hedge over the three-year forward program and a big part of our hedging program is our BGS, or Basic Generation Service product that we have in New Jersey. It's the default supplier in New Jersey. It's about 11 terawatt hours of the roughly 50 terawatt hours that we do produce, and we're in the process of supplementing that with a retail business to supplement the BGS retail product. It's on the smaller side and growing, but will be growing organically as we continue to step through time.

Also a very modest solar business, you can see on the slide, 326 megawatts of solar assets as well as one asset that resides in Hawaii. So, we've been pursuing a number of policy and regulatory issues this year, and a number of them are listed on the slide. First and foremost, the first one listed there is a New Jersey distribution based rate proceeding.

So, on November 1st, we will file our first rate case since 2009. It will be a rate case that will deal with just the distribution side, but within the distribution space both the electric and the gas side of the business. So it'd be rate case dealing with both of those. As we think about, basically we're going to step forward and true up some of the numbers that we have in place. We don't see this as being a hugely dramatic rate case, but one of the things that we do anticipate that will be addressed in this rate case is decoupling.

Our two businesses, on the gas side, we have a weather-normalization cost for the gas side of the business, which does a pretty good job at mitigating some of the ups and down that we see as we step through time, due to weather events. But on the electric side of the business, we do not have decoupling and that's one of the things that we will be pursuing in this rate case. New Jersey has a fairly strong interest in energy efficiency and certainly decoupling would also be a hand and glove process to work through and move forward within this rate case to enable some incremental energy efficiency investments coming through that's been coming from PSE&G.

final
Bloomberg Transcript
Bloomberg

Another avenue that we look to do a fair number of our investments have been through clauses with the State of New Jersey. And we have been to the BPU in New Jersey for a number of clauses over the last decade or so, somewhere in the order of 15 clauses that we've worked through, mainly infrastructure-oriented, but also on the energy efficiency and on the solar side.

And we've worked with some other utilities in the state during this past year with the BPU to try to simplify the process that we have gone through to enable some of those clauses to get, put in place. And it's been described by some as a Straw proposal in the State of New Jersey. And in August, it moved through the BPU and moved into a 60-day comment period. And that 60-day comment period will come and go and we would anticipate by the end of the year, that this infrastructure proposal would be in place. Now what it essentially will do is provide the template by which these types of clauses and incremental investments can be pursued.

And so, I think incremental transparency is an outcome that we would anticipate by virtue of having longer programs, and also a known ability to go through with a mechanism by which these investment programs would be recovered. So, we see this as simplifying the process, making it more transparent, and I think a good outcome for the capital needs that the State of New Jersey has across all the different utilities.

Next item on the list is preserving the value of nuclear supply. So we have been talking about this for the vast majority of this year, and taking a look at where the market is, and taking a look at where our nuclear facilities stand within that market. What we have said to folks is that we are not earning our cost of capital on our nuclear facilities.

And as we look forward into time and if some of those three-year hedges end up rolling off, and we step into forward prices, we would anticipate that this situation is more likely to get worse than better. So, we have been in conversations at the federal level, at the regional level, and at the state level to acknowledge and make sure that people can understand the value that comes from these facilities.

And we see that value in the form of environmental benefits, not only from a carbon perspective, but from other emissions standpoint. We see it from the standpoint of fuel diversity and resiliency of the grid. If you think about our nuclear facilities, they're about 40% of New Jersey's use and over 90% of New Jersey's emissions free energy. So from those perspectives, they are a very, very, important part of New Jersey's energy mix.

They also have the benefit of keeping energy prices lower given their low cost of dispatch, and also they're very important locally. If you think about where they are in the State, the jobs that they provide, and what they do for the local economy, we think for all those reasons, there's an awful lot of value of having them continue to be around.

But as we look at the economic situation of those facilities, there's no guarantee that they will be. So, those conversations have taken place as I said, at the federal, regional, and state level to ensure that the value that these plants provide can be identified, captured, and ultimately paid to the units.

And then lastly, we talk about ensuring federal regulatory and policy framework. There if we think about some of the rules that we have in place and some of the pricing elements that we have in place largely in PJM, there are improvements that have been identified by PJM and others that we feel do need to be made. And you can think about this largely in the form of the price formation efforts that are going on at PJM.

So, things like inflexible units, not being able to set a marginal price, can result in uplift payments to particular units, but no increase in the overall price points that all units see. And so, efforts that PJM is pursuing, which I would argue are fairly consistent with what we've seen from the recent DOE report and other efforts in other areas to try to get the markets to work better, I think, will serve all generators well and that's another effort that we are working towards as we move through the year.

And the results of these efforts and prior efforts have allowed us to grow earnings by 4%. If we take a look back at this slide, back through the last five years or so, back through 2012 to current. And also, if we take a look on the dividend side, vitally important to our shareholders and we acknowledge that importance with the 4% growth that we have seen on our dividends over the last five years.

final

final

As we've talked about dividends, we've talked about our desire to have consistent and sustainable growth in those dividends, and I'll show you slide later on, which will give you an indication as to what the dividend policy overall looks like.

So, move back to the utility for just a couple of minutes, and if you take a look at PSE&G's investment program and what it does for our overall rate base growth, what we are planning now for the next five years, and if we look at from 2016 and running through to 2021, over that five-year period, we've identified 7% to 9% compounded annual growth in rate base. If we think about the first three years of our plan, we've got a 9% CAGR. And running out through five years, that declines down to 7%. And I'll give you a little indication as to what drives that.

The slide here also shows the split between transmission and distribution. So you can see there's a fairly good balance between the two. And if we think about a single state utility with a single state regulator, having FERC regulation on that rate base gives us a little bit of diverse regulatory risk as well.

And then you can see that there's – as we move into 2021, there's also a bar in the far right-hand side, which goes beyond 2021. And I'll talk in another couple slides about some of the growth opportunities that we think we have as we step beyond the planned years more generally. But on balance, the system that we have is an older system, New Jersey is in an older area and there is no shortage of infrastructure needs that we have, both on the gas, on the electric side. And I'll touch on those as we move forward.

So, moving from that slide of a rate base to this slide of capital expenditures, we say that our baseline programs yield 7% compounded annual growth rate. So, this represents $12.3 billion capital plan over the next five years. And if you take a look at the bars that are on the slide, that represents this year's plan. There's also a black line that runs through, that represents last year's plan.

So, we step forward a year, we've identified incremental investments in each of the four years that are in common to those plans for incremental investment across the utility. And I talked earlier about the way that we plan. We think about what is in our plan, largely it is what we know, as opposed to what we know, plus a host of different investments that might come to pass.

So, the trajectory of capital that you see in our five-year plan does decline over time. And what we have done, if you look at history, is identified more investments as we step into the out-years of that plan to lift the back-end of that plan. And as I move in from this slide into the following slide, it shows what is I would say most known within the out-years of the plan as to what additional investments are out there for us to make.

Those additional investments take the form of extensions and expansions of existing plans that are in place. So, for instance, we have the largest cast iron system of any gas utility in the U.S. We have 4,800 miles of cast iron pipe, that's in the ground. And we move forward with the plan – with the program last year called GSMP, it's a Gas System Modernization Program to replace that cast iron. That was at a rate of about $300 million a year and at that rate, we'd have about 30 years of investment to replace all of that cast iron.

So, as we step from our base plan, which includes $300 million to replace all that cast iron throughout the five years of a plan, we have proven through the work that we've been doing that we can do more than. So, part of what we get us from our $12.3 billion base plan up to what you see here is $13.8 billion incremental plan, which would serve to move us to 9% CAGR from 7% CAGR would be to upsize that Gas System Modernization Program or replacement of those pipes from a rate of $300 million a year to $400 million a year.

And the filing that we just made in July with our state regulator is for $2.7 billion over five years, so that rate is $540 million. So, there's the potential for incremental spend above this $13.8 million that you see to the extent that that would be approved in full.

A second component that would look to raise the overall capital spend that you see in this – in our base plan up to the $13.8 billion would be related to energy efficiency and solar. So, we are targeting to invest an incremental $400 million in energy efficiency and in solar over the last three years of the plan, that would also contribute to getting us up to the $13.8 billion target.

Bloomberg Transcript

And then, there's a third leg of that still which would increment further the plan up to the $13.8 billion and that would be the next phase of our Energy Strong program. So, prior to Harvey, prior to Irma, we had superstorm Sandy here in New Jersey and we came forth with $2.6 billion of $3.7 billion aggregate amount of spend that we thought was necessary to make improvements to add to the resiliency of our own grid. $1.2 billion was approved.

So, embedded within this back-end of our plan is three years and $800 million of spend that we would anticipate from a filing that would probably take place later this year to do the next stage of the resiliency of the grid in New Jersey. So, a couple of existing types of work that are being done to be extended out and/or expanded upon is what will drive us to a continuation of 9% growth in our rate base as we step forward over the next five years.

And then, this next slide gives a little bit of an indication as to what I talked about on an earlier slide when I look beyond 2021. And the way that I think about this says is, it lays out in the first two boxes the kind of work that has been done on the system over the last five years and what we see in front of us for the next five. And I will tell you that most of that work is very infrastructure-oriented, it is basically – basic blocking and tackling that's in front of us, things like replacing cast iron mains that are in the ground in New Jersey, which is going to go on for some period of time.

Above and beyond that different types of investments that we are calling Utility of the Future still await us. Items like AMI which we really have not moved into at all, like electric vehicle charging stations, like microgrids and anything that really is more expansive of the way the things are done really are not in the existing base plan as we look at it right now.

So, with that spend awaiting us, we see the ability to continue to invest at a similar rate as we have in the past as we go beyond the next five years. I'll move over to the Power side of the business. We gave a little bit of indication as to what the business looks like now on the bottom of the page and what it will look like on a go-forward basis on the top of the page.

So, on the bottom left-hand side, we give an indication of the aggregate capacity of the fleet right now at 11,600 megawatts. And as we step forward through time, we don't see an awful lot of megawatt growth based upon some retirements in place to Hudson and Mercer facility being replaced by new efficient gas combined-cycle units at our key facility in Maryland, at Sewaren in New Jersey and Bridgeport in New England.

But on the right-hand side, if you take a look at what those units will produce, we anticipate about an 18% increase in the aggregate output of the fleet. So, having the more efficient fleet, the more flexible fleet will enable us to increase our output and increase the amount of the output which is coming from natural gas.

And if we also take a look at what we've seen from the capacity market standpoint, very important for our fleet, in particular, especially with PJM in New England having a forward capacity auction, you can see the pricing that we are receiving in these markets which is north of what you see for the rest of pool. And basically, that transparency and the value that this has brought to our assets as a result of those payments is a big part of what Power relies upon as they step forward over the next three years.

There has also been a modest change that PJM has announced related to some of the measures that they use as they go into the next auction. And we talked a little about this last year about the Con Ed Wheel going away. So, Con Edison would wheel power down into New Jersey and then across the Hudson River into New York City as a way to make sure that there is sufficient power for New York City. That arrangement ended earlier this year, and as a result, the parameters that are put forth in advance of the capacity auction that were updated prior to this past year's capacity auction.

And we talked recently about the fact that that made up for some of what happened with the wheel, but there was likely to be some incremental changes that would happen to those parameters and to the CETO/CETL transfer limitations as you move from area to area within PJM.

And recently, PJM has put forth that in large part because of the non-firm nature of some of the flows of electrons between the different areas, there have been some changes that will look to tighten up the transfer limitations between some of the LDAs within MAAC, EMAAC, PS Zone and PS North. So, we'll see what those look like when they end

final
Bloomberg Transcript
Bloomberg
SI-SSA-0015-04530

up putting the parameters out for next year's auction, but we will see some changes as we step forward into the next auction.

And then, on the bottom of the page, you can see in New England, the Bridgeport Harbor station that I referenced earlier. When that cleared the auction, that was the beneficiary of a seven-year lock-on capacity prices. So, the bottom of the page lays out that $231 of megawatt day for seven years, that's what that unit will see, from a capacity standpoint. So, a healthy capacity stream that Bridgeport will see in its first seven years.

And if we look at Power as a whole and if we look in particular at the free cash flow that's coming from Power as a whole, you can see that it is dominated in the first couple of years by the construction program of the three combined-cycle units. So, the left-hand side of this page shows Power's five-year capital program, the orange bars represent the combined-cycle construction program.

As that comes to an end in 2019, we'll move to more of a steady state capital amount of about $200 million a year at Power. So, a sizeable decline in the overall capital spend, which will free up considerable cash flow for PSE&G. And if you take a look on the right-hand side, basically that lays out the $13.8 billion higher capital program, which will be funded by debt at PSE&G, but also from capital contribution which will be sourced from the free cash flow from Power.

And moving on to O&M, if you take a look in the aggregate at the enterprise level, a lot of focus on O&M at PSEG. We work extremely hard on an ongoing basis I would say less programmatically and more every day, every month, every year, as we step through our normal business operations to manage costs. And basically, the proof in the pudding is what you see here on this slide, as you look at 2012 to 2017's O&M, our O&M CAGR has been flat at 0.0% increase.

And the one item that you do see on the page, this is a higher O&M growth is within our transmission business. Frankly given the magnitude of construction that's gone on at transmission, some of the removal of the old transmission units ends up falling into O&M. So I'd say, by no means, it has had the result of any inefficiency related to how the transmission business is run. What I would say is much more about the removal of existing assets that end up working their way into O&M. So, O&M has been a focus, will continue to be a focus for the business as we step forward.

And then if you take a look right here what this next slide shows is the trajectory of our earnings over the last number of years, and maybe as importantly, the overall contribution to the earnings that we have seen over the last number of years. So, if you go back to 2012, PSE&G contributed 43% of our total earnings contribution and as you step in to the midpoint of 2017's guidance, as I mentioned earlier, 66% of the company's earnings contributions will come from the regulated side of the business. And as we step forward beyond that and take a look at the overall capital mix of the companies, you would expect to see that trajectory to continue to go in that direction.

And then one final slide on dividend. This also is a look back at the dividend that we have paid over the last number of years. That shown in the bars is also a line that is superimposed on top of those bars. What that line represents is the earnings of PSE&G-only, placed on top of the bars which is the dividend that is paid at Enterprise. So, what this serves to show is that the entire dividend of PSEG can be covered by the earnings of solely PSE&G, so the baseline of earnings that sits behind the dividends are very strong, very steady and growing from the standpoint of PSE&G's earnings contribution.

And our last slide is our first slide repeated. So, that kind of wraps up the story for PSEG. I'll be thrilled to take any questions anybody may have.

Q&A

<Q>: Terrific. So, there's a microphones in the room that will be going around and I'll start it off. So, couple of things on the policy front-end. There has been talk about New Jersey reengaging in RGGI and then also some talk legislatively about whether or not a zero emission credit program might be in order. Can you talk us through some of the – what are the steps to get those things done and what is the calendar look like the balance of this year and into next?

final
Bloomberg Transcript
Bloomberg
SI-SSA-0015-04531

<A - Daniel J. Cregg>: Yeah. Sure. So, maybe first on RGGI. And you may recall that RGGI is Regional Greenhouse Gas Initiative. It involves New England, New York and then a very little bit of PJM and our existing governor took us out of the RGGI program a number of years ago. The overall RGGI pricing was fairly low and the impact that it was having, it was kind of put in place initially as a bridge to a national carbon program.

There is interest in the state by both gubernatorial candidates or in a gubernatorial election year to come back into RGGI. And if we think about it, maybe if I think about it coupled with the other questions that's there from a standpoint of nuclear, nuclear is obviously not a carbon emitter, so RGGI would be on balance helpful for nuclear.

But if you take a look at where overall pricing is coupled with the fact that there is a leakage issue, what I mean by a leakage issues is if you take a look at PJM as a market and New Jersey being in RGGI or maybe being back in RGGI and as neighboring states not being there, then some of the impact on ultimate pricing will be watered down by virtue of the fact that you're going to have units that are burdened by a carbon price and instead are not burdened by a carbon price on the same market.

So, I think it will take the next governor for us to come back into RGGI, I think that the likelihood is probably high because both have expressed an interest in it. But if I think about the overall impact, given the fairly low prices and the existing leakage issue, which PGM has some plans to seek to correct, but nothing is in place right now. I would consider that probably a modest impact overall on nuclear and on the market as a whole.

More broadly, with respect to nuclear, we've talked a fair bit about the existing economic situation within nuclear. And I've worked at the federal level, I've worked at the regional level, and I've worked at the state level, really to get people to understand the nature of the problem and ultimately to work through some kind of a fix to provide the economic payment for the value that nuclear provides.

I think that there has been progress in all of those venues. But I think from a timing perspective, much as we have seen in Illinois and in New York, the most likely quick response, would be, or the fastest of the three jurisdictions, would be at the State much like in Illinois and in New York.

So in New Jersey, the fix would end-up being a legislative fix rather than a regulatory fix. And we don't have an existing legislative session. Our next legislative session would be [indiscernible] (30:52) session after the gubernatorial election. So, basically the months of November and December. So, that would be the next opportunity for legislation. Beyond that, you would be into 2018 and the first legislative session starts in January of 2018 after that.

<Q>: Thank you. Other questions for Dan? You have one there.

<Q>: Yeah. Hi. Can you talk a little more about the decoupling proposal that you're going to make in the case? And kind of how that's coming together, kind of the evolution of it?

<A - Daniel J. Cregg>: Yeah. So, I think the – maybe one way to think about it is that that there is some interest in the State, and I think about New Jersey's desire to have more of a green element within the overall power structure. It's limited somewhat by virtue of our renewable resources. So, we're not Arizona with deserts and as much sun profile. Our wind profile is not durably strong certainly on land, and the offshore wind has some economic challenges to it. So, I think that our best mechanism to ensure that we are as managing our environment as much as we can, can come from energy efficiency.

In energy efficiency, obviously, to the extent that you have the utilities involved in that, there's a disincentive to reduce load to the extent that that you were involved in the business. So, I think there's an acknowledgement that the decoupling aspect is more enabling of the energy efficiency. And if you take a look at aggregate load growth which is basically pretty flattish, it's a sensible approach for us to make. The details of that are not out, but they'll be part of the rate case filing that we'll do on November 1st.

<Q>: All right. The company has talked historically about potentially separating PSE&G and PEG Power (sic) [PSEG Power]. Can you update us on those talks?

final
Bloomberg Transcript
Bloomberg
SI-SSA-0015-04532

<A - Daniel J. Cregg>: Yeah. And I don't think that there really is much of an update on that front. We've basically talked about the fact that there are benefits of the company being together and frankly, the one slide that I showed really punctuated that. If you take a look at the overall cash flow availability from Power and the capital appetite of PSE&G, and Power being a source of value for investing the equity piece of our capital program at PSE&G.

I think the ability to share costs across both sides of the business is also there as well. And also, little bit of symbiotic bill relationship, right? So, as you have Power prices come off a little bit, it may be a time for you to be able to, for the build to absorb some of the capital that the system really does end up needing. And to the extent that those dynamics were to change and drift, you could see a little bit more of an interest in some separation. But, right now, I think what we see is it still supports us being together. It's something that we look at like a lot of different strategic aspects of what goes on with the business. But we see those advantages stand together as well.

Unverified Participant

All right. I don't see any other questions. So, we do have a breakout session in Liberty Five, that Dan will be at. But with that, thank you very much, Dan, for sharing your story with us.

Daniel J. Cregg

Thanks, Dan.

Forward Looking Statement

Certain of the matters discussed in this communication about us and our subsidiaries future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient coverage or recover proceeds of insurance on such matters,
- increases in competition in energy supply markets as well as competition from certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology, such as distributed generation and microgrids, and resultant changes in customer usage patterns, including energy efficiency and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slides A and B at the end of this presentation include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

SI-SSA-0015-04541

Superstorm Sandy met by an exceptional response

The storm affected PSE&G and Power

2.1 million **PSE&G** customer restorations (2X Hurricane Irene and 3X the October '11 Snowstorm) ● 96 Electric Substations Damaged (39% of the total) ● 14 Switching Stations Affected (33% of total) ● 51 of 154 Transmission Lines Interrupted (33% of total) ● 2,427 Utility Poles Replaced or Repaired ● 48,000 Trees Removed or Trimmed ● ~4,200 mutual aid or contract workers brought in to assist restoration efforts

PSEG Power's assets were stress tested by Superstorm Sandy, but when the load returned in the days following, Power's assets were available

SI-SSA-0015-04542

PSE&G's Energy Strong Capital Program addresses new reality

- New ten-year, $3.9 Billion Infrastructure Program filed February 2013 with the NJBPU to strengthen PSE&G's distribution system focusing on hardening and resiliency
- Plan to invest an additional $1.5 Billion in transmission grid over the ten-year period
- The 10-year Energy Strong proposal includes:
  - ✓ Protecting 40 utility installations from severe storms (**$1.7 Billion**)
  - ✓ Making the electric grid smarter and easier to repair (**$460 Million**)
  - ✓ Adding backup distribution lines and system redundancies (**$550 Million**)
  - ✓ Undergrounding 20 miles of overhead distribution lines (**$60 Million**)
  - ✓ Modernizing the gas distribution system (**$1.2 Billion**)
- The proposed filing creates ~5,800 jobs and stimulates economic activity for New Jersey businesses

SI-SSA-0015-04543

76 local NJ towns and 9 counties support

- 76 municipalities and nine counties (Bergen, Essex, Hudson, Mercer, Middlesex, Passaic, Somerset, Union and Salem) have approved resolutions in support of Energy Strong, PSE&G's infrastructure proposal to improve and fortify its electric and gas distribution systems

- PSE&G is seeking BPU approval to implement the first five years of the Energy Strong proposal, an investment of $2.6 Billion

- The Energy Strong proposal is currently being evaluated by the NJ Board of Public Utilities

SI-SSA-0015-04544

Our $3.4 billion transmission investment program drives double digit earnings growth at PSE&G through 2015 and includes…

PSE&G's Five Major Transmission Projects

	Approved ROE	Inclusion of CWIP in Rate Base	100% Recovery of Costs Due to Abandonment	Total Estimated Project Costs	Expected In-service Date
Susquehanna-Roseland	12.93%	✓	✓	$790	June 2014 /June 2015
Northeast Grid Reliability	11.93%	✓	✓	$895	June 2015
North Central Reliability	11.68%	✓	✓	$390	June 2014

SI-SSA-0015-04545

PSE&G's capital spending supports regulated earnings growth with a potential future rate base of up to ~$12.6B

2013 – 2015E Rate Base Growth

DATA AS OF JUNE 30, 2013. E = ESTIMATE

SI-SSA-0015-04546

PSEG Power value advantaged by asset diversity, fuel flexibility and location

Fuel Diversity*
Total MW: 13,226

- Gas
- Pumped Storage
- Nuclear
- Oil
- Coal**

Energy Produced*
Total GWh: 52,511

Energy Market Served*
Total MW: 13,226

- Intermediate
- Peaking
- Base load

*2012
**INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

SI-SSA-0015-04547

PSEG's locational advantage

and electric basis

- Basis (PS Zone to PJM West) will continue to trend downward for forward sales
- Volatility may remain significant in the prompt periods
- Power maintains sufficient length to participate in upside volatility as well as a valuable 250MW transmission position into NYC
- Basis will continue to have a positive impact on PSEG Power profitability

SI-SSA-0015-04548

*AS OF OCTOBER 31, 2013.

PSEG's locational advantage

PSEG Pipeline and Storage Capacity

- PSEG is well positioned to realize supply cost advantages from the shale deposits in PA and OH
- The majority of Power's pipeline capacity goes through the shale regions or emanates from locations in the region
- The lowest cost supplies have come from the Tennessee 300 line in northeast PA and the Transco Leidy line in central PA
- Power also has significant Texas Eastern capacity in southwest PA, the next region to develop
- Availability of a robust gas portfolio of storage and pipeline capacity primarily benefits PSE&G's gas customers and then Power, as conditions permit
- Power buys approximately 350BCF/year of gas

SI-SSA-0015-04549

Investing in Power to expand CCGT capacity

and improve efficiency

PSEG Power - CCGT Uprate Project
○ Over 2014–2018, retrofit Bergen, Linden and BEC (GE CCGTs) with Advanced Gas Path (AGP) components ○ Expand Power's CCGT fleet, one of the largest gas-fired portfolios in PJM, with incremental base and peaking MWs ○ Potential project investment of ~$120 million over the 5-year period

AGP Project Benefits
✓ Expands CCGT capacity by over 150 MWs: Base MW's increase by 3.5% (112MW) with an additional 40 MWs of peak-firing capability ✓ Increases Efficiency - Combined Cycle (CC) heat rate improvement ~ 1.2% ✓ Extends maintenance outage cycles and upgrades technology

SI-SSA-0015-04550

- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-04579

State policy imperatives have been redefined by Superstorm Sandy

Storm report issued by NJBPU focusing on:

- Preparedness Efforts
- Communications
- Restoration and Response
- Post Event Analysis
- Underlying Infrastructure Issues

Storm Deferral Filings:

- On December 19, 2012 the NJBPU granted a PSE&G request for general authority to defer storm restoration costs, thereby making such costs potentially recoverable in future rate filings
- On February 20, 2013, at its open public meeting, the BPU voted that the recovery of all such storm restoration costs would be reviewed in a generic (multi-utility) proceeding*

SI-SSA-0015-04580

* NJBPU proceeding on storm recovery is currently in discovery phase.

We have also responded with a plan focused on infrastructure hardening and resiliency

- PSE&G filed a petition on February 20, 2013, with the NJBPU seeking approval for the Energy Strong Program (ES) which will harden electric and gas distribution infrastructure and increase the resiliency of the electric distribution system
- The filing complements the NJBPU's recently issued order requiring all Electric Distribution Companies to take specific actions to improve preparedness and response to major storms
- ES program represents a potential investment of approximately $3.9 billion over the next 10 years. PSE&G has asked for initial funding approval of $2.6 billion during the first five years
- Additional Transmission investment of approximately $1.5 billion would be included in future FERC Formula Rate filings

SI-SSA-0015-04581

Lower commodity costs and expiration of certain transition charges are expected to offset the impact to customer bills

*FOR THE TYPICAL COMBINED ELECTRIC & GAS RESIDENTIAL CUSTOMER, 2018 BGS (INCLUDING TRANSMISSION) / BGSS, AS WELL AS SBC, WNC, RAC AND DISTRIBUTION RATES HELD CONSTANT AS OF THE ES FILING DATE (FEB-2013). RATES RELATED TO ELECTRIC RESTRUCTURING: SECURITIZATION (STC), NON-UTILITY GENERATION CHARGE (NGC), & TRANSITIONAL ENERGY FACILITIES ASSESSMENT (TEFA), ARE REDUCED TO ZERO BY 2018. THE RGGI RECOVERY CHARGE (RRC), SOLAR PILOT RECOVERY CHARGE (SPRC), AND CAPITAL ECONOMIC STIMULUS INFRASTRUCTURE INVESTMENT PROGRAM (CIP I) AND THE CIP EXTENSION (CIP II) BILL IMPACTS ARE INCLUDED IN THEIR RESPECTIVE GAS & ELECTRIC BARS AND FORECASTED BASED UPON MAR-2013 ESTIMATES. THE BILL IMPACTS FOR ES PROGRAM BASED UPON THE PROPOSED FILING AND S4AEXT/SL3 IMPACTS ARE BASED UPON THE BPU APPROVED PROGRAM.

LONG ISLAND POWER AUTHORITY

PSEG

SI-SSA-0015-04584

LIPA T&D management contract

Amended Operating Services Agreement will begin January 1, 2014, subject to LIPA receiving IRS ruling on tax status of debt

- Increases PSEG-Long Island's management responsibility to operate and maintain the LIPA T&D system
- Extends original 10-year contract by two years
- PSEG Power will procure LIPA's fuel requirements beginning 2015
- PSEG-LI compensation will increase in 2016 for expanded management role

Successful management of the LIPA transmission and distribution system may lead to additional growth opportunities

SI-SSA-0015-04585

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-04586

PSEG Power strategy

Focused on safety performance, unit reliability, competitive cost structure with control of maintenance costs, achieving operational excellence, and supporting market rules to maintain a level playing field

SI-SSA-0015-04587

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus

Fleet Diversity/Efficiency Focus

- Fleet diversity across the dispatch curve and fuel types provides flexibility
- Nuclear units continue to achieve strong operational results and are well positioned for the future
- Peach Bottom steam path retrofit completed
- Fossil fleet is suited for market dynamics
- CCGT achieved record output in 2012
- Installed 400 MW new peaking capacity in 2012

Financial/Economic Focus

- O&M cost control programs have delivered
- Sites offering competitive advantage suited for expansion

Regulatory Focus

- Strong regulatory performance
- Industry leadership in the changing regulatory environment

SI-SSA-0015-04588

PSEG Power delivered in 2012

Storm and weather challenges	Market challenges	Value delivered
• Superstorm Sandy impacted our generating sites • Warm winter put pressure on demand and pricing for both electricity and gas • Hot summer weather created challenging operating environment	• Unit outages and transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by weather and economy	• Cost control • Lower dispatch and fuel cost • Captured value through coal/gas switching, unit flexibility • Improved unit availability • Coal & oil sales optimized inventory • Expedited return from storm outages, restored margin opportunities • Optimized unit dispatch across fleet during storm recovery

SI-SSA-0015-04589

PSEG Power has generating assets

in three competitive markets

- Low cost portfolio
- Fuel flexibility
- Assets near loads
- Poised to benefit in real time markets
- Fleet will maintain diversity and efficiency in 2016 after HEDD
- Most sites suitable for expansion

SI-SSA-0015-04590

PSEG Power Nuclear fleet is a critical element of success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3
• Operated by PSEG Nuclear • PSEG Ownership: 100% • Technology: Boiling Water Reactor • Total Capacity: 1,174 MW • Owned Capacity: 1,174 MW • License Expiration: 2046 • Next Refueling ✓ Spring 2015	• Operated by PSEG Nuclear • PSEG Ownership: 57%, Exelon – 43% • Technology: Pressurized Water Reactor • Total Capacity: 2,326 MW • Owned Capacity: 1,335 MW • License Expiration: 2036 and 2040 • Next Refueling ✓ Unit 1 – Fall 2014 ✓ Unit 2 – Spring 2014	• Operated by Exelon • PSEG Ownership: 50% • Technology: Boiling Water Reactor • Total Capacity: 2,245 MW • Owned Capacity: 1,123 MW ✓ Scheduled uprate of ~130 MW expected 2015/2016 • License Expiration: 2033 and 2034 • Next Refueling ✓ Unit 2 – Fall 2014 ✓ Unit 3 – Fall 2015

SI-SSA-0015-04591

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations – eight consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent and attractive training program
- Developing Fukushima action plan in response to NRC staff review
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-04592

PSEG Power's Fossil Fleet availability has shown steady improvement

EFORd improvement resulted in over 200 MW of additional capacity available

EFORp improvement and availability at peak demand times has resulted in performance payments in each of the last four years

SI-SSA-0015-04593

PSEG Power improvements achieved in combined cycle fleet efficiency

Actions Taken to Create Value	
• Heat rate improvement program • Operational Excellence Model	• Training programs • Unit testing initiative • Outage work to restore efficiency

SI-SSA-0015-04594

Superstorm Sandy affected the fleet;

when the load returned, Power was ready

SI-SSA-0015-04595

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- Power is well positioned for HAPS

SI-SSA-0015-04596

PSEG Power's focus on costs has resulted in moderate increase in O&M for six years

Cost control actions taken:	
• Coal assessment • CCGT material condition assessment • Contract renegotiation	• Material management • Nuclear maintenance productivity study • Nuclear outage efficiency initiative

SI-SSA-0015-04597

* INCLUDES IMPACTS FROM STORM RECOVERY COSTS AND POTENTIAL RELATED INSURANCE PROCEEDS.
E = ESTIMATE.

PSEG Power is well positioned

to grow the fleet when market conditions dictate

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Interconnection • Gas Pipeline Access • Sites/Space • Emissions

SI-SSA-0015-04598

Investing in Power to expand CCGT capacity

and improve efficiency

PSEG Power - CCGT Uprate Project
○ Over 2014–2018, retrofit Bergen, Linden and BEC (GE CCGTs) with Advanced Gas Path (AGP) components ○ Expand Power's CCGT fleet, one of the largest gas-fired portfolios in PJM, with incremental base and peaking MWs ○ Potential project investment of ~$120 million over the 5-year period

AGP Project Benefits
✓ Expands CCGT capacity by over 150 MWs: Base MW's increase by 3.5% (112MW) with an additional 40 MWs of peak-firing capability ✓ Increases Efficiency - Combined Cycle (CC) heat rate improvement ~ 1.2% ✓ Extends maintenance outage cycles and upgrades technology

SI-SSA-0015-04599

PSEG Power will maintain diversity and efficiency after a realignment of the fleet in 2016

Objective
2012 → 2016E

- Maintain fuel diversity
- Maintain load serving capability
- Improve heat rate of the fleet by 6%
- Maintain low cost structure
- Environmental improvement

Fuel Diversity
13,226 MW 11,200 MW

Energy Produced
52.5 TWh 52-54 TWh

SI-SSA-0015-04603

PSEG POWER
ER&T

SI-SSA-0015-04604

PSEG

We make things work for you.

PSEG Power
ER&T strategy

Focused on optimizing the value of its asset portfolio and providing outstanding service to our customers, while prudently managing risk

SI-SSA-0015-04605

Diversified assets and flexible dispatch

High performing, base load nuclear assets	3,632 MW
Fuel advantaged, base load coal plants in PA	776 MW
Flexible combined cycle fleet	3,176 MW
Well leveraged intermediate & peaking assets	5,642 MW

Integrated trading and dispatch capability around fleet

SI-SSA-0015-04606

Fleet capacity has been advanced by:

Improved Heat Rate capability

Trading acumen to execute fuel switching opportunities

Reduced O&M and increased start-up success

Capturing new products opportunity with minimal investment

SI-SSA-0015-04607

Spark spread replaces dark spread as major value driver

- Spark spread has risen above dark spread in PJM markets
- Power's gas units operating at record throughput
- Gas operation provides much more operational flexibility
- Enhances the ability of trading organization to capture volatility

SI-SSA-0015-04608

2013 BGS Auction Results for PSE&G Zone

BGS sales account for about a third of our forward portfolio of hedges

SI-SSA-0015-04609

BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2011-2013 ARE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2013.

Our hedging mix has changed with the market but still captures the fleet's locational advantage

- 3 Year forward BGS sales comprise smaller percentage of Power's hedges
- Other full requirement load deals help capture additional locational and load shape premium

SI-SSA-0015-04610

NOTE: PERCENTAGES REPRESENT HEDGED VOLUMES IN PLACE AFTER BGS AUCTION.

Hedging strategy designed to protect gross margin and leverage the portfolio

Ratable Hedging on Base Load:

- 3 year ratable hedge tactics
- 3 year PJM hedge of capacity (not included in table)
- Load following sales (such as BGS) have strong correlation to our units for hedging basis and load shaping premium

Dynamic Hedging on Intermediate Coal, Combined Cycle and Peaking:

- Position fleet to take advantage of market volatility
- Gas and load-following fleet left open until prompt year to capture volatility
- Use all trading products to capture option value of assets and benefit from market dislocations

		Oct-Dec 2013	2014	2015
Base Load (Nuclear and Base Load Coal)	Volume TWh	8	35	35
	% Hedged	100%	100%	55-60%
	Price $/MWh	$50	$48	$48
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	5	18	17
	% Hedged	30-35%	5-10%	0%
	Price $/MWh	$50	$48	$48
Total	Volume TWh	13-14	53-55	52-54
	% Hedged	70-75%	65-70%	35-40%
	Price $/MWh	$50	$48	$48

HEDGE PERCENTAGES AND PRICES AS OF SEPTEMBER 30, 2013. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS.

SI-SSA-0015-04611

PSEG's locational advantage

and electric basis

- Basis (PS Zone to PJM West) will continue to trend downward for forward sales
- Volatility may remain significant in the prompt periods
- Power maintains sufficient length to participate in upside volatility as well as a valuable 250MW transmission position into NYC
- Basis will continue to have a positive impact on PSEG Power profitability

SI-SSA-0015-04612

*AS OF OCTOBER 31, 2013.

PSEG's locational advantage

PSEG Pipeline and Storage Capacity

- PSEG is well positioned to realize supply cost advantages from the shale deposits in PA and OH
- The majority of Power's pipeline capacity goes through the shale regions or emanates from locations in the region
- The lowest cost supplies have come from the Tennessee 300 line in northeast PA and the Transco Leidy line in central PA
- Power also has significant Texas Eastern capacity in southwest PA, the next region to develop
- Availability of a robust gas portfolio of storage and pipeline capacity primarily benefits PSE&G's gas customers and then Power, as conditions permit
- Power buys approximately 350BCF/year of gas

SI-SSA-0015-04613

Access to lower cost shale supply

an advantage for PSE&G's gas customers and Power's CCGT portfolio

SI-SSA-0015-04614

HH - Henry Hub M3 – Texas Eastern (TETCO)

Reserve margins in PJM declining with retirements

Generation Deactivation Notifications

Source: PJM TEAC, 8/8/2013

- PJM Pending Deactivation Requests of 13,340 MW as of August 13, 2013
- Approximately 5,000 MW of additional owner announced retirements in PJM through next auction

Forecast Reserve Margin (PJM June 2013)

- PJM forecasts a declining Reserve Margin through 2017

SI-SSA-0015-04615

Regulatory Advocacy

	ISSUE /POLICY	HOW ADDRESSED?
PJM	MOPR	Sufficiency/Exceptions before FERC and courts

PSE&G provides high reliability at below average cost which creates superior value to customers

SAIDI = SYSTEM AVERAGE INTERRUPTION DURATION INDEX, A MEASURE OF AVERAGE OUTAGE DURATION FOR ALL CUSTOMERS SERVED.

PSE&G prioritizes public safety

while maintaining value to customers

LEAK RESPONSE RATE = PERCENTAGE OF UTILITY RESPONSES TO REPORTED LEAKS WITHIN ONE HOUR.

SI-SSA-0015-04644

Formula rates for transmission make the process more predictable with contemporaneous returns

	Transmission (Federal)	Distribution Base Rate Case (State)
Current ROE	• 11.68% base • 12.93% with incentives on Susquehanna-Roseland • 11.93% with incentives on Northeast Grid	• 10.3%
Volatility of Returns	• Low – prospective recovery with annual true-ups for over/under recovery	• Higher – performance impacted positively/negatively by cost management, weather, customer demands, etc.
Process	• Formula – The rate template and specific elements like ROE are predetermined with annual updates and true ups	• Litigated case with each element (depreciation, ROE, O&M levels, Rate Base) scrutinized and settled
Intervenors	• State consumer advocates usually participate	• State consumer advocates • Large customers • Other parties affected by the case, e.g. Solar Developers
Test Year	• PSE&G has fully **forecasted** test year for both Capital and O&M	• **Historical** test year with pro-forma adjustments for known and measurable items, e.g. wage escalation
Time to resolve	• Annual Formula updates are filed in October with January 1 effective date	• Typically settled within 12-15 months

SI-SSA-0015-04645

New Jersey Board of Public Utilities (BPU)

- The Board of Public Utilities consists of five commissioners appointed by the Governor. These appointees are confirmed by the NJ Senate for six-year, staggered terms. The Governor appoints one of the five to serve as Commission President.

  Currently, the commissioners are:

  - Robert M. Hanna, Commission President
  - Jeanne M. Fox
  - Joseph L. Fiordaliso
  - Mary-Anna Holden
  - Dianne Solomon

- Stefanie Brand, Director of the N.J. Division of Rate Counsel

SI-SSA-0015-04646

Slow economic recovery in NJ is constraining growth in all market sectors

Modest residential growth limited by housing market inactivity and the slow economic recovery

Consumer spending is trending with the slow economic recovery and impacting growth in the commercial sector

Industrial sales growth continues to be constrained by slow economic recovery

2013 - 2015
Projected Sales Growth – Gas*

2013 – 2015
Projected Sales Growth – Electric*

*WEATHER NORMALIZED ESTIMATED ANNUAL GROWTH PER YEAR OVER FORECAST PERIOD; PROJECTED SALES GROWTH FOR 2013-2015 GAS INCLUDES ONLY FIRM SALES.

SI-SSA-0015-04647

Key economic indicators forecast renewed growth over the 2012 to 2015 timeframe

The New Jersey economy increased by 0.3% annually from 2010 to 2012 and is anticipated to grow 2.3% per year from 2012 to 2015

New Jersey total non-farm employment increased by 0.6% annually from 2010 to 2012 and is expected to grow 1.4% per year from 2012 to 2015

Real personal income in New Jersey increased by 1.4% annually from 2010 to 2012 and is expected to increase 2.5% per year from 2012 to 2015

Single family housing starts declined by 2.6% annually from 2010 to 2012 and are expected to increase ~24% per year from 2012 to 2015

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-04657

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

These materials and other financial releases can be found on the PSEG website at www.pseg.com , under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss .

VICE PRESIDENT – INVESTOR RELATIONS

SI-SSA-0015-04659

PSEG

We make things work for you.

PSEG Strategy - Delivering Value

Operational Excellence: Improving reliability and customer service as we control costs in a low price environment

Financial Strength: Strong financial position supports investment program

Disciplined Investment:
- Program focused on achieving objectives through infrastructure investment that meets customer and shareholder needs
- Robust pipeline of opportunities

Results:
- Double digit growth in rate base and net income at PSE&G
- Reconfiguration of Power's generating fleet: higher quality, more efficient
- Annual growth in common dividend
- Strong credit metrics

SI-SSA-0015-04660

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A $12 - $14 billion infrastructure program with opportunities to expand, producing high single digit rate base growth through 2021	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow and upside from market rule improvements
2016 Assets $26B Net Income $889M	2016 Assets $12B Net Income $18M Non-GAAP Operating Earnings* $514M

SI-SSA-0015-04661

Focus on building a reliable, efficient, clean energy infrastructure

2012	2013	2014	2015	2016

Selected Accomplishments

2012
- Award winning Superstorm Sandy storm response restoring 2.1M customers
- Final federal approval for Susquehanna-Roseland transmission project
- 400 MW of new peaker capacity*

2013
- Expanded Solar investment
- 90% nuclear capacity factor for 9th straight year
- Record output from Linden CCGT and Salem 2 nuclear unit

2014
- Energy Strong program approved
- Advanced Gas Path uprates (through 2018)
- PSEG Long Island management contract effective

2015
- Gas System Modernization Program (GSMP) and Energy Efficiency Extension II approved
- New generation build starts Power fleet transformation

2016
- Solar 4 All Extension Approved
- Continued new generation build and transforming fleet to be more efficient, clean, and higher quality
- Solar Source grew to 396 MW_{DC} **

Cost Control

SI-SSA-0015-04662

PSEG

*KEARNY AND NEW HAVEN. ** AS OF FEBRUARY 2017; INCLUDES 70 MW_{DC} OF PV SOLAR GENERATION IN CONSTRUCTION.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: 15 consecutive years of recognition as the most reliable utility in the Mid-Atlantic region • PSEG Power: Lowest CCGT EFORd in last 5 years, while moving the fleet towards improved efficiency and environmental position • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Maintaining focus on efficiency, resiliency, and customer satisfaction
Financial Strength	• Non-GAAP Operating Earnings for 2016 at midpoint of original guidance range and upper end of revised guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased dividend in February 2017 – 13th increase in last 14 years
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2017-2021) with increased investment in Gas System Modernization Program, Electric and Gas distribution, and Energy Efficiency • Potential for additional investments in Renewables, Expanded Energy Efficiency and integration of Infrastructure with Customer Access • Power capital program focusing on growth investments including Keys Energy Center, Sewaren and Bridgeport Harbor

PSEG's Value Proposition

- A stable platform with a robust investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile supporting the potential for consistent and sustainable dividend growth

SI-SSA-0015-04677

PSEG REGULATORY & POLICY REVIEW

Tamara Linde

EXECUTIVE VICE PRESIDENT AND GENERAL COUNSEL

PSEG

We make things work for you.

SI-SSA-0015-04678

Regulatory & Policy Review - Agenda

- PSE&G Investment Program Recap
- PSE&G 2017 Base Rate Case Filing
- Regulatory Reform in NJ
- Preserving Nuclear Generation
- Federal Regulatory Framework
- Summary

SI-SSA-0015-04679

PSE&G has received approval for 15 multi-year investment programs that advance state energy goals

2008/ 2009	2011	2013	2014	2015	2016

Selected Accomplishments

- Capital Infrastructure I
- Energy Efficiency
- Solar Loan I
- Carbon Abatement
- Solar Loan II
- Solar 4 All
- Demand Response

- Energy Efficiency Extension
- Capital Infrastructure II

- Solar Loan III
- Solar 4 All Extension

- Energy Strong

- Energy Efficiency Extension II
- Gas System Modernization

- Solar 4 All Extension II

Infrastructure investment programs with near contemporaneous recovery mechanisms

SI-SSA-0015-04680

PSE&G plans to file Distribution Base Rate Case proceeding no later than November 1, 2017

Support

- Requirement of 2014 Energy Strong settlement
- Update for known changes in sales growth forecast, O&M and taxes since 2010 rate case
- Get recovery of distribution investment not covered by clause mechanisms
- Get recovery of approved storm costs

Opportunity

- Establish/update rate design, capital structure and depreciation
- Pursue decoupling
- Pursue interim rates
- Improve alignment with customer
- New E&G rates effective at start of 2019, or earlier

Supports need for moderate base rate increase

SI-SSA-0015-04681

NJ Distribution Base Rate Case Timeline

SI-SSA-0015-04682

New Jersey – Long-term Infrastructure Regulatory Reform with Customer Focus

Support

- Alignment with community and customer needs
- NJ Energy Master Plan
- Support extension of investment program horizon from 3 to 7 years using review process established by the BPU in Energy Strong and Gas System Modernization Program as template

Opportunity

- PSE&G will be seeking approval of multi-year programs that extend existing efforts to improve our system resiliency and broaden investment focus on Energy Efficiency and Utility of the Future services at the lowest cost to our customers

SI-SSA-0015-04683

Preserving Existing Nuclear Power Plants as Part of a Resilient Energy System

Support

- Generation from Power's nuclear units produces ~40% of NJ supply and provides 97% of NJ's carbon free energy
- Preservation of nuclear energy consistent with NJ policy goal: 70% clean resources by 2050
- Competitive wholesale markets not designed to value fuel diversity, resiliency and desirable attributes of nuclear generation

Opportunity

- Preserve highly reliable, clean resources as part of a diverse energy portfolio
- Preserve local jobs and economic base
- Keep prices lower than they otherwise would be, as current replacement options are more expensive
- Maintain system reliability

SI-SSA-0015-04684

What are other states doing to preserve at-risk nuclear generation?

New York April 2016	Illinois November 2016	Connecticut 2017?	Ohio 2017?
Clean Energy Standard approved by NYPSC provides support for at-risk nuclear. Zero Emission Credit standard established. Contract payments available for up to 12 years	Future Energy Jobs Bill enacted establishing a Zero Emission Credit (ZEC) portfolio standard. ZEC contract payments available for 10 years	Connecticut Legislature currently debating clean energy procurement process in recognition of nuclear capacity role as provider of clean energy	Legislative action under consideration to preserve at-risk nuclear generation

State Regulatory/Legislative actions recognize value of nuclear energy in meeting clean energy standards and supporting local economy

SI-SSA-0015-04685

Federal Regulatory Framework – Ensuring market structures recognize the value of reliable, diverse and clean dispatchable generation

Support

- FERC is driving ISOs to improve market constructs and rules on energy pricing
- Higher payments for enhanced reliability (Capacity Performance); first purely CP capacity auction to be held by PJM in May 2017

Opportunity

- Advocate for market solutions that fairly compensate generators for the cost of meeting demand
- Seek recognition of environmental attributes of existing resources
- Seek integration of state public policy objectives for clean energy with grid reliability and efficient market signals

SI-SSA-0015-04686

PSEG Regulatory and Policy focus

on mechanisms that provide customers clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- True-up data from 2010 base rate case for known changes in customers usage, taxes, O&M and investments

Long-Term Infrastructure Investment Platform

- Seek extension of existing infrastructure programs, e.g., GSMP, and broaden investment platform

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy to recognize the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-04687

PSE&G

Ralph LaRossa

PRESIDENT AND CHIEF OPERATING OFFICER
PUBLIC SERVICE ELECTRIC & GAS

PSEG

We make things work for you.

SI-SSA-0015-04688

Discussion topics

- Overview of PSE&G - Strategy and delivering results
- Operational excellence
- Capital investment program
- 2017 Distribution rate case filing
- Customer rates

SI-SSA-0015-04689

PSE&G –New Jersey's largest:

- Electric and Gas Distribution utility
- Transmission business
- Investor in renewables and energy efficiency
- Appliance service provider

	Electric	Gas
Customers Growth (2012 – 2016)	2.2 Million 0.5%	1.8 Million 0.4%
2016 Electric and Gas Sales	41,580 GWh	2,360M Therms*
Projected Annual Sales Growth (2017 – 2019)**	0.3%	0.7%
Sales Mix (2016)		
Residential	33%	59%
Commercial	58%	37%
Industrial	9%	4%

PSE&G 2016 Rate Base

SI-SSA-0015-04690

PSEG

* GAS FIRM SALES ONLY.
** ESTIMATED ANNUAL GROWTH PER YEAR, ASSUMES NORMAL WEATHER.

PSE&G strategy

Building a sustainable platform that balances reliability, customer rates and public policy to ensure growth at reasonable returns

SI-SSA-0015-04691

Delivering on Our Promises

Operational Excellence	• Strong safety, reliability and customer service record • Cost control efforts have led to flat O&M
Financial Strength	• Achieved 5-year annual growth in net income of 11% • Achieved 5-year annual growth in rate base of 13% • Maintaining solid investment grade credit ratings
Disciplined Investment	• 15 investment programs approved over past eight years ✓ Infrastructure focused ✓ Supportive regulatory mechanisms providing for clause recovery ✓ Policy alignment – across administrations – Solar and Energy Efficiency • Programs creating jobs and providing environmental benefits, in a low-rate environment benefiting from low commodity prices and federal tax benefits from current bonus depreciation rules

SI-SSA-0015-04692

Operational Excellence - Safety

- Management focus and collaboration with unions resulted in top decile safety performance in 2016

SI-SSA-0015-04693

SOURCE: PSE&G

Operational Excellence - Reliability

Consistently recognized for customer reliability

Our system performance, as measured by System Average Interruption Duration Index (SAIDI), has consistently been among the best performers

Named most reliable electric utility in the Mid-Atlantic region for **15th consecutive year**

SI-SSA-0015-04694

PSEG

SOURCE: PSE&G

Operational Excellence - Customer satisfaction

PSE&G has improved on an absolute and relative basis compared to its peers over the past five years

JD Power Residential and Business Scores

SI-SSA-0015-04695

Operational Excellence – O&M costs

Demonstrated ability to control O&M, preserving earnings and returns in a low sales growth environment

Cost control actions:

- PSE&G is utilizing the Lean Six Sigma discipline to achieve costs savings and process improvements
- Regular organizational refinement to streamline processes
- Continued focus on vendor and inventory practices ensuring maximum value
- Successful management of pension

E = ESTIMATE.

SI-SSA-0015-04696

Disciplined Investment – Delivering annual growth

Our rate base is now roughly balanced between federal and state jurisdictions

SI-SSA-0015-04697

Disciplined Investment – Continued growth in robust capital program

2017-2021E PSE&G Capital Spending

Base Capital,
including GSMP extension
$12.3B
Rate Base CAGR 7%

with extension / expansion of current programs
$13.8B
Rate Base CAGR 9%

Transmission | Gas Distribution | Electric Distribution | Solar and Energy Efficiency

With current returns on ~70% of capital investments

. E = ESTIMATE. INCLUDES AFUDC

SI-SSA-0015-04698

Transmission - ~$6 billion, 5-year investment program focusing on reliability and replacing aging infrastructure

- **Formula rate** recovery of capital and expenses
- **PJM's Regional Transmission Expansion Plan** (RTEP) identifies system enhancements needed for reliability
- **Portfolio transitioning –** completing remaining major lines and moving to steady state investments to maintain reliability and stay ahead of asset end of life
  - **69kV system upgrades** improve system reliability and add capacity for future growth
  - **Transmission Lifecycle** to manage asset life and improve system integrity and reliability
  - **Transmission Hardening** projects focus on increasing system resiliency

SLS_AL_5-04699

Electric Distribution – ~$3 billion, 5-year investment program focused on reliability and resiliency

- **Energy Strong** - Completion of currently approved program
- **Future growth efforts**
  - **Hardening** – Extend program for critical system infrastructure
  - **Aging infrastructure** – Life cycle investments to ensure continued top quartile reliability performance
    - Over 65 substations > 60 years old; Over 30 substations > 80 years old
    - ~115 substations 26kV to 4kV
    - Risk assessment model to eliminate/replace
  - **Technology** – Next generation to enhance grid performance

SI-SSA-0015-04700

Electric Distribution - Technology

- **Making the grid smarter**
  - Deployment of hundreds of microprocessor relays
  - A new state of the art distribution SCADA system to facilitate full communication and control
  - Ability to integrate Distributed Energy Resources into the grid while enhancing grid reliability and resiliency

- **Improving customer service - continue to enhance delivery of information and communication**

SI-SSA-0015-04701

Gas Distribution – ~$3 billion, 5-year investment program focused on modernizing and upgrading cast iron and unprotected steel main

- **Cost efficiency** of broad replacement approach
- **Customer service** – conversion from low pressure to high pressure
- **Environmental Collaboration** with EDF and Google to consider methane leaks in work prioritization
- **Replaced** >200 miles in 2016
  - Exceeding run rate of 30 year program, demonstrating ability to accelerate program
  - ~4,800 miles of cast iron and unprotected steel main remaining in the system
  - More cast iron than any other US utility

SI-SSA-0015-04702

Solar and Energy Efficiency – ~$250 million, 5-year investment supports New Jersey policy objectives

- **Solar –**
  - Grid-connected solar on landfills and brownfields provides clean energy for all customers
  - 210 MW installed of the 300 MW total approved programs
- **Energy efficiency** – Continuing programs with a focus on hospitals, multi-family housing and our direct install program which includes municipalities, non-profits and small businesses in Urban Enterprise Zones
- **State Policy** - Programs are aligned with policy goals
- **Opportunity to expand** – Potential for significant opportunity to expand energy efficiency and related customer services in the future

SI-SSA-0015-04703

Developing investment opportunities with near-contemporaneous recovery mechanisms

2017-2021E PSE&G Capital with Program extensions by Recovery Method

Plan to increase current five year, $12.3B capital plan by ~$1.5B through program extensions and expansions:

- GSMP acceleration
- Electric distribution – hardening extension and modernization investment program
- Energy Efficiency and Solar programs – extensions and expansion

With broad opportunity set of additional investment potential driven by customer expectations and public policy

FERC Formula Rates	Traditional Recovery Mechanisms	Clause Recovery Mechanisms
Transmission	Distribution Base Rates	Infrastructure / Solar / Energy Efficiency

E = ESTIMATE. DATA AS OF MARCH 2017. INCLUDES AFUDC.

SI-SSA-0015-04704

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2012 - 2016

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2017-2021E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth rate

SI-SSA-0015-04705

Investment program supports strong rate base growth – off a higher base

E = ESTIMATE.

SI-SSA-0015-04706

Distribution – 2017 base rate case filing

- Obligated to file rate case no later than November 1, 2017
- Last rate case – 2009 test year, settled in 2010

Since last rate case

- **Sales growth** – flat, customer growth offset by energy efficiency
- **O&M** – held flat, with increased regulatory requirements
- **Capital Investments** – Growth in rate base beyond clauses, consists of:
  - GSMP annual stipulated base
  - Energy Strong
  - Other Distribution base investments beyond depreciation levels
- **Customer rates** since last rate case
  - Electric decreased 5%; Gas decreased 46%

Supports need for moderate base rate increase

SI-SSA-0015-04707

Optimal time for extension and expansion of investment programs

- 2017 investment program filings
  - **GSMP** - extension and acceleration
  - **Electric infrastructure** - resiliency and modernization
  - **Energy efficiency** – extension, potential future expansion
  - Seeking **long-term** programs to optimize planning and cost
- Programs improve system reliability and meet customer expectations
  - System need as infrastructure reaches end of life
  - Increasing customer and public policy expectations
- Optimal timing

Job creation	Environmental benefits	Federal tax benefits	Low commodity prices
√	√	√	√

- Potential rate impact of program extensions - ~2%/year*

SI-SSA-0015-04708

*ASSUMES TYPICAL COMBINED RESIDENTIAL CUSTOMER WITH 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY.

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-04709

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

PSE&G's 2017 net income to benefit from investment programs and cost control

E =ESTIMATE.

SI-SSA-0015-04716

Power is transforming its portfolio to be newer, more efficient and flexible

2012 → 2013 → 2014 → 2015 → 2016

Selected Accomplishments Towards Transformation

Cost Control

2012

- Additional **400** MW of new peaker capacity at Kearny and New Haven

2013

- Bethlehem Energy Center, 2nd gas pipeline connection added

2014

- CCGT Advanced Gas Path (AGP) uprate completed at Linden 1 & 2, **63** MW
- Energy / Fuel management contract for LIPA

2015

- Continued growth with **1,300** MW new CCGT's announced
  - Keys
  - Sewaren 7
- Projects Completed:
  - Peach Bottom EPU, **130** MW
  - Bergen 2 AGP uprate, **31** MW
- Retired HEDD Units
- Solar portfolio reaches **277** MW_{DC}
- Initiated Hope Creek uprate, **18** MW

2016

- Bridgeport Harbor 5 **485** MW CCGT cleared ISO-NE auction
- Hudson & Mercer early retirement announced
- Kearny 13 & 14 uprate, **14.5** MW increased capacity
- Initiated electric & gas retail business in NJ, PA
- Solar reaches ~**326** MW_{DC} in operation

SI-SSA-0015-04717

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (326 MW_{DC}/257 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-04718

PSEG

*POWER ANNOUNCED RETIREMENTS OF HUDSON AND MERCER GENERATING STATIONS AS OF JUNE 1, 2017.

Power has a diverse fleet of generating assets which enables it to respond to market needs

Fuel Diversity 2016*

Total MW: 11,577

Energy Produced 2016*

Total GWh: 51,510

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

SI-SSA-0015-04719

PSEG

* EXCLUDES SOLAR (326MW$_{DC}$ /257MW$_{AC}$) AND KALAELOA (104MW).
**INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

Power's Fossil Fleet maintains solid performance in a challenging environment

- Generation records at BEC and Bergen 2 combined-cycle units
- Combined-cycle EFORd* and EFORp lowest in five years
- Start Success Rate:
  - Peaking: 99.7%
  - Coal/Steam: 93%

SI-SSA-0015-04720

*EFORd EXCLUDES EVENTS OUTSIDE OF MANAGEMENT CONTROL.

Nuclear is vital to New Jersey with Salem and Hope Creek providing ~40% of the State's energy consumption

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3
• Operated by PSEG Nuclear • PSEG Ownership: 100% • Boiling Water Reactor • Total Capacity: 1,172 MW • Owned Capacity: 1,172 MW • License Expiration: 2046 • 18 MW Uprate Spring 2018 • Next Scheduled Refueling ➢ Spring 2018	• Operated by PSEG Nuclear • PSEG Ownership: 57% • Pressurized Water Reactor • Total Capacity: 2,296 MW • Owned Capacity: 1,318 MW • License Expiration: 2036 and 2040 • Next Scheduled Refueling ➢ Unit 1 – Fall 2017 ➢ Unit 2 – Spring 2017	• Operated by Exelon • PSEG Ownership: 50% • Boiling Water Reactor • Total Capacity: 2,450 MW • Owned Capacity: 1,225 MW • License Expiration: 2033 and 2034 • Next Scheduled Refueling ➢ Unit 2 – Fall 2018 ➢ Unit 3 – Fall 2017

SI-SSA-0015-04721

PSEG Nuclear has been addressing the economic challenges in the current low gas price environment

- 2012 to 2017E CAGR: –1.4%
- The 2015 Labor increase / outside services decrease is due to bringing security force employees in-house
- Material and outside service cost reductions CAGR: – 4%

- Fukushima-related compliance drove $198 M of Regulatory/Environmental spend
- 2016 and 2017E capital driven by Baffle Bolt replacement
- Going forward capital approximately $100M/year to maintain reliability to end of license life

SI-SSA-0015-04722

PSEG

NOTE: LABOR INCLUDES BASE WAGES, OVERTIME AND FRINGE BENEFITS. ALL YEARS EXCLUDE EXPENDITURES FOR NUCLEAR FUEL (APPROXIMATELY $6.50/MWH). E=ESTIMATE

PSEG Nuclear is leading the industry in efforts to ensure economic viability of fleet

Goals

- Industry goal to achieve reductions in O&M, fuel and capital costs by 2018
- The three-year program to examine and implement opportunities to:
  - ✓ Advance safety,
  - ✓ Improve operations, and
  - ✓ Prevent premature reactor closures
- Concurrently, we continue to work with NEI and other industry partners to gain greater compensation for nuclear plants in competitive market policies

PSEG Nuclear progress to date

- 46 Efficiency Bulletins issued, 21 implemented to date
- Cost reductions achieved: 185 FTE reduction; 2017 direct O&M reduction of 5% from plan target while funding equipment reliability improvement
- Implemented changes to focus on eliminating vs. mitigating equipment reliability issues to ensure generation is not negatively impacted

PSEG Nuclear is not currently earning its cost of capital

SI-SSA-0015-04723

Power has demonstrated its ability to control O&M

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON/MERCER EARLY RETIREMENT.
E=ESTIMATE

SI-SSA-0015-04724

Power is developing ~1,800 MW of new, efficient CCGT capacity in MD, NJ and CT

SI-SSA-0015-04725

Growth Project Update - Keys Energy Center

- **755 MW plant in Prince George's County, MD**
  - 2x1 natural gas-fired combined cycle
  - Greenfield site
- **Estimated Costs $825 to $870 million**
- **Major Milestones**
  - Combustion turbines and generators, steam turbine and generator and all three generator step-up transformers have been set in place
  - Construction is 35% complete as of February 2017
  - Commence training / start-up support in 2017
  - Expected to be in service in mid-2018
- **Outlook**
  - Expands geographic footprint to the SWMAAC* load pocket

Keys Energy Center – Aerial View

*SWMAAC – SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL
E = ESTIMATE

SI-SSA-0015-04726

Growth Project Update – Sewaren 7

- **540 MW plant in Sewaren , New Jersey**
  - 1x1 dual fuel (natural gas & ultra low sulfur diesel) combined cycle
- **Estimated Costs $625 to $675 million**
- **Major Milestones**
  - Combustion steam turbine generator, combustion turbine and main transformers have been set in place
  - Construction is 29% complete as of February 2017
  - Expected to be in service in mid-2018
- **Outlook**
  - Leverages existing infrastructure
  - Existing Sewaren units will retire upon completion
  - Located in the PS Zone load pocket

Sewaren 7 – Aerial View

SI-SSA-0015-04727

E = ESTIMATE

Growth Project Update – Bridgeport 5

- **485 MW plant in Bridgeport, Connecticut**
  - 1x1 dual fuel (natural gas & ultra low sulfur diesel) combined cycle
- **Estimated Costs $525 to $575 million**
- **Major Milestones**
  - New Source Review Air Permit is expected to be issued by April 15, 2017
  - Expected to be in-service in mid-2019
- **Outlook**
  - To be constructed on the existing PSEG Bridgeport Harbor site; Bridgeport Harbor 3 will retire in 2021
  - Located in the SW Connecticut load pocket
  - Seven year capacity price lock

Bridgeport 5 – Aerial View

E = ESTIMATE

SI-SSA-0015-04728

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2016 to 2021E

Energy Produced increases by >18%

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

[1] REFLECTS ANNOUNCED EARLY RETIREMENT OF HUDSON AND MERCER UNITS IN MID-2017.
ALL PERIODS EXCLUDE SOLAR (257 MW_{AC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.
**2016 COAL INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS. E= ESTIMATE.

Power's fleet is transitioning to become more efficient, productive and clean

E = ESTIMATE.

Power's capital needs decline following construction of new capacity, enhancing free cash flow

SI-SSA-0015-04731

PSEG

E=ESTIMATE. DATA AS OF FEBRUARY 2017.
EXCLUDES NUCLEAR FUEL. INCLUDES IDC.

Power's fleet is well-located with access to shale gas production

- PSEG Power procured approximately 400 BCF in 2016 with almost 50% going to PSE&G's utility gas customers
- PSEG Power's gas for PJM generation was ~100 BCF in 2016, of which >80% was supplied by Northeast Shale gas

- Significant amount of new pipelines have already been built and more are in construction / development
- Gas production and pipeline takeaway capacity expected to be more balanced in 2018 timeframe

SI-SSA-0015-04732

With additional pipeline capacity, some price convergence is beginning to appear in the gas markets

Electric basis for the PSEG Zone is also showing improvement in the forward markets

SI-SSA-0015-04733

PSEG Power's Value Proposition

Efficient fleet	Advantaged locations	Investing to grow

- Well-positioned, well-run fleet of merchant generating assets in competitive markets
- Early retirement of Hudson and Mercer coal stations in mid-2017 improves fleet efficiency and returns
- Addition of 1,800 MWs of new, efficient, flexible CCGTs transforms the portfolio
- Low capital requirements post-construction
- Hedging strategy to protect value of assets in declining price environment and provide stable returns and cash flow

PSEG FINANCIAL REVIEW & OUTLOOK

Dan Cregg

EXECUTIVE VICE PRESIDENT AND
CHIEF FINANCIAL OFFICER

PSEG

We make things work for you.

SI-SSA-0015-04741

Strong financial position driven by PSE&G with meaningful contribution from Power

	2016 Financial Position
Earnings	✓ Delivered on 2016 guidance under challenging conditions ✓ Increased PSE&G earnings contribution
Investment	✓ Executed major PSE&G capital program balanced between Transmission and Distribution ✓ Focused on optimizing Power's generation portfolio
Cash Flow and Credit Metrics	✓ Produced stable and strong PSE&G cash from operations ✓ Generated significant cash flow at Power to fund growth investments ✓ Maintained strong credit metrics
Dividends	✓ Increased common dividend by 5% or $0.08 per share

SI-SSA-0015-04742

We consistently deliver our earnings guidance by executing our growth plans, managing O&M, and optimizing assets

SI-SSA-0015-04753

2017 Federal Tax Reform – PSEG is well positioned

Given positive non-utility contribution to earnings and a strong balance sheet, PSEG is well positioned for potential tax reform

Assumption	PSE&G	PSEG Power	PSEG Parent
Reduction of Corporate Tax Rate	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period	After-tax earnings and cash flow increase One-time non-cash earnings benefit from reduction in deferred tax liability	After-tax earnings and cash flow improve
100% Expensing of Capital Expenditures	Impact on rate base growth comparable to existing bonus depreciation rules	Cash flow improves	
Elimination of Deductibility of Interest Expense and Border Adjustment Tax	Change in cost anticipated to be passed through to customers	Well positioned given low debt balance Uncertainty on Border Adjustment Tax	Well positioned given low debt balance

SI-SSA-0015-04754

Opportunity for meaningful and sustainable dividend growth

Payout Ratio	50%	58%	56%	54%	54%	57%	59%(1)

(1) THE 2017 PAYOUT RATIO IS BASED ON THE MIDPOINT OF PSEG'S 2017 NON-GAAP OPERATING EARNINGS GUIDANCE OF $2.80-$3.00 PER SHARE. SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. E=ESTIMATE

SI-SSA-0015-04756

PSEG Summary

- 2016 Operating Earnings (non-GAAP) at upper end of revised guidance of $2.80 - $2.95 per share
- 2017 guidance for Operating Earnings (non-GAAP) of $2.80 to $3.00 per share supported by PSE&G growth
- PSE&G capital spending provides high single-digit rate base growth for foreseeable future balanced between Transmission and Distribution
- Power expected to generate significant free cash flow following CCGT construction program and transformation to a more efficient generation fleet
- Strong balance sheet and cash flow support current capital program and new investment opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2017 demonstrates meaningful and sustainable dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

Forward Looking Statement

Readers are cautioned that statements contained in this presentation about our future performance, including future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical, are forward-looking statements for purposes of the safe harbor provisions under The Private Securities Litigation Reform Act of 1995. When used herein, the words “anticipate”, “intend”, “estimate”, “believe”, “expect”, “plan”, “should”, “hypothetical”, “potential”, “forecast”, “project”, variations of such words and similar expressions are intended to identify forward-looking statements. Although we believe that our expectations are based on reasonable assumptions, they are subject to risks and uncertainties and we can give no assurance they will be achieved. The results or developments projected or predicted in these statements may differ materially from what may actually occur. Factors which could cause results or events to differ from current expectations include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units, delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers,
- increase in competition in energy supply markets as well as competition for certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and changes in technology and customer usage patterns.

For further information, please refer to our Annual Report on Form 10-K, including Item 1A. Risk Factors, and subsequent reports on Form 10-Q and Form 8-K filed with the Securities and Exchange Commission. These documents address in further detail our business, industry issues and other factors that could cause actual results to differ materially from those indicated in this presentation. In addition, any forward-looking statements included herein represent our estimates only as of today and should not be relied upon as representing our estimates as of any subsequent date. While we may elect to update forward-looking statements from time to time

SI-SSA-0015-04762

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The last slide in this presentation includes a list of items excluded from Income from Continuing Operations to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

SI-SSA-0015-04766

PSEG – 2012 Highlights

2012 Earnings in-line with guidance

- Achieved operating earnings of $2.44 per share, at the high end of guidance range of $2.25-$2.50, including storm-related costs at PSE&G
- PSE&G represented 43% of consolidated operating earnings with growth in transmission

Operational excellence

- Record output from CCGTs, continued strong production from Nuclear, and Power's control of O&M supported results
- PSE&G recognized for reliability: National ReliabilityOne Excellence Award, Mid-Atlantic Reliability Award, and Award for Outstanding Response to a Major Outage Event; as well as EEI's Emergency Response Award
- Restored service to 2.1 million customers in a two-week period of time in the aftermath of Superstorm Sandy and the Nor'easter that followed
- Extension of major labor contracts

PSEG disciplined capital investment

- Key regulatory approvals received for major transmission projects
- BPU decisions pending on Solar4All Extension and Solar Loan III
- Power added 400 MW of new peakers in time to respond to summer demand
- Holdings added 40 MW of new solar capacity

PSE&G's Energy Strong Capital Program addresses new reality

- New $3.9 Billion Infrastructure Program filed with the NJBPU to strengthen PSE&G's electric and gas system focusing on hardening and resiliency
- Plan to invest an additional $1.5 Billion in Transmission grid over the ten-year period
- PSE&G's Infrastructure proposal includes:
  - Protecting 40 utility installations from severe storms (**$1.7 Billion**)
  - Making the electric grid smarter and easier to repair (**$454 Million**)
  - Adding backup distribution lines and system redundancies (**$415 Million**)
  - Undergrounding 20 miles of overhead distribution lines (**$60 Million**)
  - Modernizing the gas distribution system (**$1.1 Billion**)
- Better protection for homes and businesses during severe weather and improved day to day system reliability
- Proposed filing creates ~5,800 jobs and stimulates economic activity for New Jersey businesses

SI-SSA-0015-04774

SI-SSA-0015-04800

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2012	2013-2015E	Expected In-service Date
$435M	$24M	$411M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-04801

State policy imperatives have been redefined by SuperStorm Sandy

Storm report issued by NJBPU focusing on:

- Preparedness Efforts
- Communications
- Restoration and Response
- Post Event Analysis
- Underlying Infrastructure Issues

Storm Deferral Filings:

- On December 19, 2012 the Board granted a PSE&G request for general authority to defer storm restoration costs, thereby making such costs potentially recoverable in future rate filings
- On February 20, 2013, at its open public meeting, the Board voted that the recovery of all such storm restoration costs would be reviewed in a generic (multi-utility) proceeding

SI-SSA-0015-04802

We have also responded with a plan focused on infrastructure hardening and resiliency

- PSE&G filed a petition on February 20, 2013, with the NJBPU seeking approval for the Energy Strong Program (ES) which will harden electric and gas distribution infrastructure and increase the resiliency of the electric distribution system
- The filing complements the NJBPU's recently issued order requiring all Electric Distribution Companies to take specific actions to improve preparedness and response to major storms
- ES program represents a potential investment of approximately $3.9 billion over the next 10 years. PSE&G has asked for initial funding approval of $2.6 billion during the first five years
- Additional Transmission investment of approximately $1.5 billion would be included in future FERC Formula Rate filings

SI-SSA-0015-04803

PSE&G is continuing to provide solutions to assist New Jersey in achieving its EMP goals

Solar 4 All extension (S4Ae)*

- Filed July 2012
- Investment up to $690 million and 136 MW
- The program will assist the state in developing solar for underserved market segments by installing solar systems on landfills, brownfields and other underutilized land

Solar Loan III (SL3)*

- Filed July 2012
- Investment up to $193 million and 97 MW
- The program will assist the state in meeting its solar policy objective by providing loans to solar developers and generation owners focused on residential, small non-residential and large non-residential customers

Energy Efficiency 4 All (EE4A)

- Investment up to $470 million
- The program will target four residential and three commercial and industrial segments
- To be filed

SI-SSA-0015-04804

*PENDING APPROVAL.

Lower commodity costs and expiration of certain transition charges are expected to fully offset the impact to customer bills

*2018 BGS/BGSS RATES AS WELL AS SBC AND DISTRIBUTION RATES HELD CONSTANT AT CURRENT 2013 RATES. RATES RELATED TO ELECTRIC RESTRUCTURING: SECURITIZATION (STC), NON-UTILITY GENERATION CHARGE (NGC), & TRANSITIONAL ENERGY FACILITIES ASSESSMENT (TEFA), ARE REDUCED TO ZERO BY 2018. THE RGGI RECOVERY CHARGE (RRC), SOLAR PILOT RECOVERY CHARGE (SPRC), AND CAPITAL ECONOMIC STIMULUS INFRASTRUCTURE INVESTMENT PROGRAM EXTENSION (CIP II) BILL IMPACTS ARE INCLUDED IN THEIR RESPECTIVE GAS AND ELECTRIC BARS AND FORECASTED IN 2018 BASED UPON LATEST ESTIMATE. THE 2018 BILL IMPACTS OF ES, EE4ALL, AND S4AEXT/SL3 IMPACTS ARE BASED UPON CURRENT ESTIMATES.

LONG ISLAND POWER AUTHORITY

SI-SSA-0015-04807

LIPA T&D management contract

In December 2011, the Long Island Power Authority (LIPA) selected PSEG to manage its electric transmission and distribution system for 10 years starting in 2014

- Reasons for selecting PSEG included:
- Proven technical capabilities and track record of top quartile customer service and reliability
  - Commitment to cost control and investment optimization
  - Corporate culture of transparency and data-driven decision making
  - Transition activities on-track – successfully achieving all milestones through February 2013

- Evaluating impact of SuperStorm Sandy and recent LIPA management changes on the overall schedule and transition

Successful management of the LIPA transmission and distribution system may lead to additional growth opportunities

PSEG Power strategy

Focused on safety performance, unit reliability, competitive cost structure with control of maintenance costs, achieving operational excellence, and supporting market rules to maintain a level playing field

SI-SSA-0015-04817

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus

Fleet Diversity/Efficiency Focus

- Fleet diversity across the dispatch curve and fuel types provides flexibility
- Nuclear units continue to achieve strong operational results and are well positioned for the future
- Peach Bottom steam path retrofit completed
- Fossil fleet is suited for market dynamics
- CCGT achieved record output in 2012
- Installed 400 MW new peaking capacity in 2012

Financial/Economic Focus

- O&M cost control programs have delivered
- Sites offering competitive advantage suited for expansion

Regulatory Focus

- Strong regulatory performance
- Industry leadership in the changing regulatory environment

SI-SSA-0015-04818

PSEG Power delivered in 2012

Storm and weather challenges	Market challenges	Value delivered
• SuperStorm Sandy impacted our generating sites • Warm winter put pressure on demand and pricing for both electricity and gas • Hot summer weather created challenging operating environment	• Unit outages and transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by weather and economy	• Cost control • Lower dispatch and fuel cost • Captured value through coal/gas switching, unit flexibility • Improved unit availability • Coal & oil sales optimized inventory • Expedited return from storm outages, restored margin opportunities • Optimized unit dispatch across fleet during storm recovery

SI-SSA-0015-04819

PSEG Power has generating assets

in three competitive markets

- Low cost portfolio
- Fuel flexibility
- Assets near loads
- Poised to benefit in real time markets
- Fleet will maintain diversity and efficiency in 2016 after HEDD
- Most sites suitable for expansion

SI-SSA-0015-04820

PSEG Power Nuclear fleet is a critical element of success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,174 MW
• Owned Capacity: 1,174 MW
• License Expiration: 2046
• Next Refueling
  • Fall 2013
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%, Exelon – 43%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,326 MW
	• Owned Capacity: 1,335 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 -- Spring 2013
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,245 MW
		• Owned Capacity: 1,123 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2013

SI-SSA-0015-04821

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations – eight consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent and attractive training program
- Developing Fukushima action plan in response to NRC staff review
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-04822

PSEG Power's Fossil Fleet availability has shown steady improvement

EFORd improvement resulted in over 200 MW of additional capacity available

EFORp improvement and availability at peak demand times has resulted in performance payments in each of the last four years

SI-SSA-0015-04823

PSEG Power improvements achieved in combined cycle fleet efficiency

Actions Taken to Create Value	
• Heat rate improvement program • Operational Excellence Model	• Training programs • Unit testing initiative • Outage work to restore efficiency

SI-SSA-0015-04824

SuperStorm Sandy affected the fleet;

when the load returned, Power was ready

SI-SSA-0015-04825

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- Power is well positioned for HAPS

SI-SSA-0015-04826

PSEG Power's focus on costs has resulted in moderate increase in O&M for six years

Cost control actions taken:	
• Coal assessment • CCGT material condition assessment • Contract renegotiation	• Material management • Nuclear maintenance productivity study • Nuclear outage efficiency initiative

SI-SSA-0015-04827

* INCLUDES IMPACTS FROM STORM RECOVERY COSTS AND POTENTIAL RELATED INSURANCE PROCEEDS.
E = ESTIMATE.

PSEG Power is well positioned for growth in the fleet when market conditions dictate

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Interconnection • Gas Pipeline Access • Sites/Space • Emissions

SI-SSA-0015-04828

PSEG Power will maintain diversity and efficiency after a realignment of the fleet in 2016

Objective
2012 → 2016E

- Maintain fuel diversity
- Maintain load serving capability
- Improve fleet heat rate by 6%
- Maintain low cost structure
- Environmental improvement

Fuel Diversity

13,226 MW 11,200 MW

Energy Produced

52.5 TWh 52-54 TWh

* EXCLUDES SANDY IMPACT.

PSEG POWER
ER&T

PSEG

We make things work for you.

SI-SSA-0015-04832

PSEG Power
ER&T strategy

Focused on optimizing the value of its asset portfolio and providing outstanding service to our customers, while prudently managing risk

SI-SSA-0015-04833

Diversified assets and flexible dispatch

High performing, baseload nuclear assets	3,632 MW
Fuel advantaged, baseload coal plants in PA	776 MW
Flexible combined cycle fleet	3,176 MW
Well leveraged intermediate & peaking assets	5,642 MW

Integrated trading and dispatch capability around fleet

SI-SSA-0015-04834

Fleet capacity has been advanced by:

Improved Heat Rate capability

Trading acumen to execute fuel switching opportunities

Reduced O&M and increased start-up success

Capturing new products opportunity with minimal investment

SI-SSA-0015-04835

Spark spread replaces dark spread as major value driver

- Spark spread has risen above dark spread in PJM markets
- Power's gas units operating at record throughput
- Gas operation provides much more operational flexibility
- Enhances the ability of trading organization to capture volatility

SI-SSA-0015-04836

2013 BGS Auction Results for PSE&G Zone

BGS sales account for about a third of our forward portfolio of hedges

SI-SSA-0015-04837

BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2011-2013 WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2013.

Our hedging mix has changed with the market but still captures the fleet's locational advantage

- 3 Year forward BGS sales comprise smaller percentage of Power's hedges
- Other full requirement load deals help capture additional locational and load shape premium

SI-SSA-0015-04838

NOTE: PERCENTAGES REPRESENT HEDGED VOLUMES IN PLACE AFTER BGS AUCTION.

Hedging strategy designed to protect gross margin and leverage the portfolio

Ratable Hedging on Baseload:

- 3 year ratable hedge tactics
- 3 year PJM hedge of capacity (not included in table)
- Load following sales (such as BGS) have strong correlation to our units for hedging basis and load shaping premium

Dynamic Hedging on Intermediate Coal, Combined Cycle and Peaking:

- Position fleet to take advantage of market volatility
- Gas and load-following fleet left open until prompt year to capture volatility
- Use all trading products to capture option value of assets and benefit from market dislocations

		2013	2014	2015
Baseload (Nuclear and Baseload Coal)	Volume TWh	35	35	35
	% Hedged	100%	80-85%	40-45%
	Price $/MWh	$50	$49	$51
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	20	19	18
	% Hedged	30-35%	0%	0%
	Price $/MWh	$50	$49	$51
TOTAL	Volume TWh	53-55	53-55	52-54
	% Hedged	75-80%	50-60%	25-30%
	Price $/MWh	$50	$49	$51

SI-SSA-0015-04839

PSEG

* HEDGE PERCENTAGES AND PRICES AS OF FEBRUARY 11, 2013. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS.

PSEG's locational advantage

and electric basis

- Basis (PS Zone to PJM West) will continue to trend downward for forward sales
- Volatility will remain significant in the prompt periods (especially summer/winter)
- Power maintains sufficient length to participate in upside volatility as well as a valuable 250MW transmission position into NYC
- Basis will continue to have a positive impact on PSEG Power profitability

SI-SSA-0015-04840

*AS OF FEBRUARY 14, 2013.

PSEG's locational advantage

and gas basis

- Lower cost supplies of shale gas have been beneficial to both PSE&G customers and PSEG Power
- Over 50% of our available pipeline capacity can access market area supplies of shale gas
- Power's generating units sit in close proximity to the Marcellus fairway
- Power buys approximately 350BCF/year of gas
- We have been able to arbitrage gas values from South to North and East to West using our storage and pipeline capacity

SI-SSA-0015-04841

PJM's capacity market continues to recognize locational value of our fleet

$/MW-day	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016
Power's Average Prices	$153	$244	$162	$167
Rest of Pool Prices	$16	$28	$126	$136
Power's Capacity (MW)	10,400	10,600	10,300	9,000

2016/2017 RPM Auction Influenced By:

- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Updated Transfer Capabilities
- New Build/Cost of New Entry
- Demand Response

SI-SSA-0015-04842

Reserve margins in PJM declining with retirements

Generation Deactivation Notifications

Source: PJM TEAC, 1/10/2013

- PJM Pending Deactivation Requests of 12,634 MW as of January 22, 2013
- Approximately 4,000 MW of additional owner announced retirements in PJM through next auction

Forecast Reserve Margin (PJM January 2013)

- PJM forecasts a declining Reserve Margin through 2017

SI-SSA-0015-04860

PSEG Summary

- Operating Earnings Guidance for 2013 of $2.25 - $2.50 per share with earnings mix shifting to 50% regulated
- Double digit operating earnings growth at PSE&G starting in 2013, and continuing through 2015 driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength reduces risk in low price environment
- Strong Balance Sheet and Cash Flow support full capital program without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for further growth

SI-SSA-0015-04861

PSE&G provides high reliability at below average cost which creates superior value to customers

SAIDI = SYSTEM AVERAGE INTERRUPTION DURATION INDEX, A MEASURE OF AVERAGE OUTAGE DURATION FOR ALL CUSTOMERS SERVED.

PSE&G prioritizes public safety

while maintaining value to customers

LEAK RESPONSE RATE = PERCENTAGE OF UTILITY RESPONSES TO REPORTED LEAKS WITHIN ONE HOUR.

SI-SSA-0015-04866

Formula rates for transmission make the process more predictable with contemporaneous returns

	Transmission (Federal)	Distribution Base Rate Case (State)
Current ROE	• 11.68% base • 12.93% with incentives on Susquehanna-Roseland • 11.93% with incentives on Northeast Grid	• 10.3%
Volatility of Returns	• Low – prospective recovery with annual true-ups for over/under recovery	• Higher – performance impacted positively/negatively by cost management, weather, customer demands, etc.
Process	• Formula – The rate template and specific elements like ROE are predetermined with annual updates and true ups	• Litigated case with each element (depreciation, ROE, O&M levels, Rate Base) scrutinized and settled
Intervenors	• State consumer advocates usually participate	• State consumer advocates • Large customers • Other parties affected by the case, e.g. Solar Developers
Test Year	• PSE&G has fully **forecasted** test year for both Capital and O&M	• **Historical** test year with pro-forma adjustments for known and measurable items, e.g. wage escalation
Time to resolve	• Annual Formula updates are filed in October with January 1 effective date	• Typically settled within 12-15 months

SI-SSA-0015-04867

New Jersey Board of Public Utilities (BPU)

- The Board of Public Utilities consists of five commissioners appointed by the Governor. These appointees are confirmed by the NJ Senate for six-year, staggered terms. The Governor appoints one of the five to serve as Commission President. Currently, the commissioners are:
  - Robert M. Hanna, Commission President
  - Jeanne M. Fox
  - Joseph L. Fiordaliso
  - Mary-Anna Holden
- Stefanie Brand, Director of the Division of Rate Counsel

SI-SSA-0015-04868

Slow economic recovery in NJ is constraining growth in all market sectors

Modest residential growth limited by housing market inactivity and the slow economic recovery

Consumer spending is trending with the slow economic recovery and impacting growth in the commercial sector

Industrial sales growth continues to be constrained by slow economic recovery

2013 - 2015 Projected Sales
Growth – Gas*

2013 - 2015 Projected
Sales Growth – Electric*

SI-SSA-0015-04869

* WEATHER NORMALIZED ESTIMATED ANNUAL GROWTH PER YEAR OVER FORECAST PERIOD

Key economic indicators forecast renewed growth over the 2012 to 2015 timeframe

The New Jersey economy increased by 0.3% annually from 2010 to 2012 and is anticipated to grow 2.3% per year from 2012 to 2015

New Jersey total non-farm employment increased by 0.6% annually from 2010 to 2012 and is expected to grow 1.4% per year from 2012 to 2015

Real personal income in New Jersey increased by 1.4% annually from 2010 to 2012 and is expected to increase 2.5% per year from 2012 to 2015

Single family housing starts declined by 2.6% annually from 2010 to 2012 and are expected to increase ~24% per year from 2012 to 2015

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as competition for certain transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies, and
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-04879

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slides A and B at the end of this presentation include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

PSEG's Strategy – delivering results

Our businesses' focus on cost-effective, reliable operations yields strong cash flow

We are funding growth-oriented investments aligned with customer needs and state energy policies

We are enhancing the competitiveness of our environmentally well-positioned generation business

The results of our financial strategy support a credit profile capable of meeting our corporate objectives and providing sustained dividend growth for our shareholders

SI-SSA-0015-04882

Two complementary businesses

Strong asset platform, performing well and positioned for the future

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Positioned to meet customers' needs as we respond to state and federal energy policy and economic growth objectives **Value Proposition:** An $11.3 billion infrastructure program – focused on transmission – that is expected to produce double-digit rate base growth through 2016	**Strategy:** Fuel diverse fleet is geographically and environmentally well positioned, with investments to enhance competitiveness **Value Proposition:** Provides substantial free cash flow in current environment and poised for price recovery
2013 — Assets $20B Operating Earnings $612M	2013 — Assets $12B Operating Earnings $710M

SI-SSA-0015-04883

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2013.
PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT, PSEG LONG ISLAND AND ENERGY HOLDINGS ACTIVITY.
SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

Delivering on commitments and pursuing opportunities for growth

Operational Excellence	• Power: Record 2013 output at Linden CCGT and Salem 2; nuclear capacity factor greater than 90% for 9th straight year • PSE&G: Mid-Atlantic Reliability Award (12th consecutive year) • PSEG Long Island: Went "live" on January 1, 2014 • PSEG: Cost-control benefits continue
Financial Strength	• Strong cash flows supported credit rating increases • Pension more than fully funded • Dividend increased
Disciplined Investment	• PSE&G ✓ Transmission capital program execution and growth ✓ Energy Strong infrastructure program underway ✓ Solar 4 All Extension and Solar Loan III programs • Power: Investments to enhance the fleet's competitiveness – 130 MW Nuclear uprate, 150 MW CCGT uprate and efficiency improvement

SI-SSA-0015-04884

PSEG 2014 Operating Earnings expected to be at the upper end of guidance range

Reflects increased level of utility investment, pension savings and assumes normal weather and unit operations for the rest of year

SI-SSA-0015-04885

PSEG

SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. E = ESTIMATE.

Operating Earnings Mix

Long term investment program has driven increased earnings contribution from stable, regulated business

Power's diverse fuel mix and dispatch flexibility continues to generate earnings and free cash flow

PSE&G's investment in transmission has diversified its asset base and, coupled with other investments and cost controls, supported compound annual earnings growth of ~18% over 2009 – 2013

SI-SSA-0015-04886

PSEG

Maintaining a robust capital program focused on growth

PSEG 2009 - 2013 Capital Spending $11.3 Billion	PSEG 2014 - 2018E Capital Spending $13.1 Billion

SI-SSA-0015-04887

PSEG

NOTE: POWER 2009–2013 ACTUALS ARE RESTATED TO INCLUDE SOLAR CAPITAL SPEND. POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. E=ESTIMATE

PSEG's business profile has been transformed through significant growth in utility capital spending, and we have consistently identified attractive opportunities for additional investment

SI-SSA-0015-04888

Energy Strong Agreement recognizes benefits of system investments

- Energy Strong Agreement reached with all parties
  - ✓ Agreement recognizes the benefits of system investments that prevent or shorten outages
  - ✓ Supports $1.22 billion capital program over several years on reasonable terms: $1 billion recovered through accelerated, rate recovery mechanism
    - $820 million Electric
    - $400 million Gas
  - ✓ Allows PSE&G to earn a 9.75% ROE on the $1 billion recovered on accelerated basis
  - ✓ Requires PSE&G to file a base rate case by November 2017
  - ✓ Approved by the NJBPU in May 2014
- Over 100 New Jersey municipalities supported Energy Strong
- Energy Strong agreement clears path for PSE&G to begin the initial phase of this robust capital program

SI-SSA-0015-04889

PSEG Power – Value-advantaged through asset diversity, fuel flexibility, location and installed environmental controls

SI-SSA-0015-04890

Balance Sheet Strength

2009 – 2013: Reduced risk profile and transformed business mix

- Invested $8.4 billion in PSE&G
- Improved credit ratings
- Monetized and de-risked Holdings' portfolio

2014 – Forward: Strong cash flows and increasingly regulated business mix fully support:

- PSE&G's $11.3 billion approved investment program through 2018
- Consistent and sustainable dividend growth
- Additional investment capacity to deploy in opportunities beyond those in the current capital plan
- No need to issue equity

SI-SSA-0015-04891

PSEG Annual Dividend – A long history of growth and returning cash to shareholders with a financial position that provides opportunity for consistent and sustained growth

*INDICATED ANNUAL RATE.

SI-SSA-0015-04892

PSEG Q2 2014 Financial Highlights

- **Earnings on Track**
  - ✓ Operating earnings of $0.49 vs. $0.48 per share in Q2 2013
  - ✓ Increased earnings contribution from PSE&G's investment in Transmission
  - ✓ Expect 2014 Operating Earnings to be at the upper end of the $2.55 to $2.75 per share guidance range – assuming normal weather and plant operations for the balance of the year
- **Operating Review**
  - ✓ PSEG Power output down 5% vs. Q2 2013 from Linden and Salem 2 outages, partially offset by improvement in coal generation
  - ✓ PSE&G placed the 230 kV North Central Reliability transmission project in service
  - ✓ Power's fleet fully restored from storm outages
- **PSEG Disciplined Capital Investment**
  - ✓ BPU approved $1.22 billion investment in PSE&G's Energy Strong infrastructure program
  - ✓ PJM deferred a final decision on its recommended solution, to be built by PSE&G, for the Artificial Island project via FERC 1000 competitive bidding process
- **Market Developments**
  - ✓ Recent EPA actions on 316(b) and GHGs

Energy Strong Agreement supports customers' needs in the aftermath of Superstorm Sandy

- Settled with NJBPU Staff and all other parties in May 2014 for $1.22 billion; approved by the NJBPU in May 2014
- Program addresses system resiliency and hardening by:
  - ✓ $620 million to raise, relocate or protect 29 switching and substations that were damaged by water in recent storms
  - ✓ $350 million to replace and modernize 250 miles of low-pressure, cast iron gas mains in or near flood areas
  - ✓ $100 million to create redundancy in the electric system, reducing outages when damage occurs
  - ✓ $100 million to deploy smart grid technologies to better monitor system operations to increase our ability to more swiftly deploy repair teams
  - ✓ $50 million to protect five natural gas metering stations and a liquefied natural gas station affected by Sandy or located in flood zones

SI-SSA-0015-04903

Over 70% of PSE&G's $11.3 billion investment program will be recovered through contemporaneous mechanisms

SI-SSA-0015-04905

PSE&G TRANSMISSION

PSEG

We make things work for you.

SI-SSA-0015-04906

Transmission has delivered, and has grown to represent ~36% of rate base

Transmission represented ~36% of rate base at YE 2013 up from ~15% at YE 2009

SI-SSA-0015-04907

PSE&G's existing major transmission

investment program remains on schedule and on budget

Major Transmission Projects

Project Roster	Approved ROE	Inclusion of CWIP in Rate Base	100% Recovery of Costs Due to Abandonment	Project Estimate Up To ($ Millions)	Expected In-service Date
Susquehanna-Roseland	12.93%	✓	✓	$790	June 2014 / June 2015
Northeast Grid Reliability	11.93%	✓	✓	$907	June 2015
North Central Reliability	11.68%	✓	✓	$390	Completed
Burlington–Camden 230kV	11.68%	✓	✓	$399	Completed
Mickleton–Gloucester–Camden 230kV	11.68%	✓	✓	$435	June 2015
Bergen—Linden Corridor 345kV	11.68%	✓	✓	$1,200	June 2018

SI-SSA-0015-04908

Susquehanna-Roseland consists of constructing 150 miles of 500kV circuit (46 miles in NJ) with two new 500kV GIS switching stations at Roseland and Hopatcong

Project Estimate Up To*	Through Year-end 2013	Expected In-service Date
$790M	$661M	Phase 1 – **Completed** Phase 2 – June 2015

- PJM RTEP project b0489
- ROE of 12.93% (including 1.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves reliability and reduces congestion

Project Status: The eastern part of line from Hopatcong to Roseland, NJ in service April 2014; NJ construction planned to be completed in Q3 2014. PA portion outside plant construction in progress. Western portion in NJ and the PA portion is planned to go in service June 2015.

SI-SSA-0015-04909

*PROJECT IS SHARED WITH PPL. PROJECT ESTIMATE REPRESENTS PSE&G'S CONSTRUCTION RESPONSIBILITY FOR THE NJ PORTION.

Northeast Grid Reliability consists of upgrading approximately 50 overhead circuit miles of 138kV transmission line to 230kV, constructing ~18 miles of new underground 230kV lines, and converting/upgrading 12 existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$907M	$228M	June 2015

- PJM RTEP project b1304
- ROE of 11.93% (including 0.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment
- Project estimate has increased ~$12M associated with hardening related scope changes as a result of Superstorm Sandy

Customer Benefit: Improves reliability and increases transfer capability

Project Status: Nearing completion of engineering/design and licensing/permitting phase. Outside and inside plant construction are in progress

SI-SSA-0015-04910

North Central Reliability consists of upgrading 55 circuit miles of 138kV transmission line to 230kV, and converting six existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$390M	$349M	Completed

- PJM RTEP project b1154
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves power quality and increases transfer capability

Project Status: In service April 2014

SI-SSA-0015-04911

Burlington-Camden 230kV consists of upgrading 37 circuit miles (30 miles of overhead and 7 miles of underground) of 138kV transmission line to 230kV, converting the existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$399M	$301M	Completed

- PJM RTEP project b1156
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses voltage reliability and increases transfer capability

Project Status: In service April 2014

SI-SSA-0015-04912

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$435M	$122M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses thermal reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-04913

Bergen-Linden Corridor is a recently approved project which will provide a double-circuit 345kV line to maintain reliability

Project Estimate Up To	Through Year-end 2013	Expected Completion Date
$1,200M	-	June 2018

- PJM RTEP project b2436
- 30 miles of underground cable
  - New ~ 23 miles
  - Reconductor (Upgrade of 138 to 345) ~7 miles
- 13 miles of double circuit overhead conductor (replacing double circuit 138 with double circuit 345)
- 11 station upgrades to 345kV

Customer Benefit: Addresses thermal and short-circuit reliability

Project Status: Engineering

PSEG LONG ISLAND

PSEG

We make things work for you.

SI-SSA-0015-04919

PSEG was selected to operate Long Island Power Authority's (LIPA) electric transmission and distribution system for 12 years starting in 2014

- Pursuant to the Operating Services Agreement (OSA), all expenses and capital costs to operate the system are pre-funded by LIPA and passed through to their customers
- Compensation consists of a fixed fee and an incentive fee
  - Fixed compensation fee for 2014 with scheduled increases in 2015 and 2016
  - Starting in 2015 PSEG Energy Resources and Trading (ER&T) begins managing fuel/energy contracts
  - PSEG Long Island expected to contribute $0.03 to operating earnings in 2014 increasing to $0.07 per share in 2016 including contribution at ER&T
- Potential for an 8-year extension of the OSA

SI-SSA-0015-04920

PSEG Long Island commenced operations

on January 1, 2014

Key elements of Operating Services Agreement

Increased PSEG scope and control	Use of PSEG brand as PSEG Long Island	3-Year rate freeze (2013-2015)
Performance metrics	NY Department of Public Service oversight	Potential for "Utility 2.0" investment

Early performance

Successful transition to PSEG Long Island	Stakeholder communication	Winter storm response

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-04922

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-04923

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units operated at over 90% capacity factors for the 9th consecutive year through 2013 • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing conditions • Linden CCGT and Salem 2 nuclear unit achieved record output in 2013	• "Getting the most out of existing fleet" • Locational advantage • O&M control programs have delivered a CAGR of 1.6% between 2009 and 2014 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-04924

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2013 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch • Completed 19 MW solar project, 4 MW project under construction, established robust pipeline • Nuclear ESP is expected in 2015

SI-SSA-0015-04925

PSEG Power met 2013 challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• SuperStorm Sandy impacted our generating sites • Cold and hot weather extremes created challenging operating environment, but also presented opportunities		• Unit outages and planned transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Optimized unit dispatch across fleet during storm recovery • Expedited return from storm outages, restored margin opportunities • High availability when needed • Achieved fuel cost savings • Captured value through coal/gas switching, unit flexibility • Coal & oil sales optimized inventory • Flexibility of portfolio captured real-time basis opportunities

SI-SSA-0015-04926

PSEG Power exceeded 2013's earnings guidance

SI-SSA-0015-04927

PSEG Power has generating assets

in three competitive markets

- Assets near loads
- Low cost portfolio
- Fuel flexibility with gas cost advantage
- Poised to benefit from volatility in real-time markets
- Fleet will maintain diversity and efficiency after HEDD
- Most sites suitable for expansion

SI-SSA-0015-04928

PSEG Power will maintain diversity and efficiency after a realignment of the fleet due to HEDD

Objective 2013 → 2017

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Environmental improvement
- Peach Bottom (PB) uprate
- Advanced Gas Path (AGP)
- Kalaeloa and Solar transfer adds ~200MW of capacity

Fuel Diversity

Energy Produced

E=ESTIMATE

SI-SSA-0015-04929

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel flexibility for >60% of fleet

SI-SSA-0015-04930

PSEG Power Nuclear is a critical element of our success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3
• Operated by PSEG Nuclear • PSEG Ownership: 100% • Technology: Boiling Water Reactor • Total Capacity: 1,178 MW • Owned Capacity: 1,178 MW • License Expiration: 2046 • Next Refueling ➢ Spring 2015	• Operated by PSEG Nuclear • PSEG Ownership: 57% • Technology: Pressurized Water Reactor • Total Capacity: 2,365 MW • Owned Capacity: 1,358 MW • License Expiration: 2036 and 2040 • Next Refueling ➢ Unit 1 – Fall 2014 ➢ Unit 2 – Fall 2015	• Operated by Exelon • PSEG Ownership: 50% • Technology: Boiling Water Reactor • Total Capacity: 2,251 MW • Owned Capacity: 1,125 MW • License Expiration: 2033 and 2034 • Next Refueling ➢ Unit 2 – Fall 2014 ➢ Unit 3 – Fall 2015 • Uprate: 130 MW in 2015/2016

SI-SSA-0015-04931

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations: nine consecutive years of >90% capacity factor through 2013
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - FLEX* plan submitted with implementation starting with Fall outage
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-04932

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

Power's nuclear fleet is well positioned

with significantly lower-than-average US cost structure

SI-SSA-0015-04933

PSEG Power's Fossil Fleet Performance

has shown improvement

- Fossil Capacity Factor rebounded with market
- Peaking Units maintain high start success

- Coal EFORp improving
- CC EFORp less than 1% in 2013
- Consistent recipient of EFORp payments

SI-SSA-0015-04934

PSEG

*LM6000 AND 7EA UNITS

PSEG Power improvements achieved in combined cycle fleet efficiency

Combined Cycle Operating Heat Rate

Actions Taken to Create Value

- Operational Excellence Model
- Training programs
- Unit testing initiative
- Outage work to restore efficiency
- Second gas line at BEC

- Heat rate improvement 2008-2013 translates to meaningful fuel savings at current market prices

- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional fuel savings

SI-SSA-0015-04935

Investing to expand CCGT capacity and improve efficiency

PSEG Power - CCGT Uprate Project

- Expand Power's CCGT fleet, one of the largest gas-fired portfolios in PJM, with incremental base and peaking MWs
- Retrofit Bergen, Linden and BEC with Advanced Gas Path (AGP) components at cost of ~$120M over 2014 - 2018

AGP Project Benefits

- ✓ CCGT capacity uprates of ~150 MW:
  - Linden (63 MW – Completed)
  - Bergen (31 MW – 2015)
  - BEC (58 MW – 2017-2018)
- ✓ Increases Efficiency - Combined Cycle (CC) heat rate improvement ~ 1.2%
- ✓ Upgrades technology and extends maintenance outage cycles

SI-SSA-0015-04936

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- Cost control through testing coordination program

SI-SSA-0015-04937

PSEG Power's capital expenditures for environmental requirements are essentially complete*

*BASED ON CURRENTLY KNOWN AND QUANTIFIABLE ENVIRONMENTAL REQUIREMENTS. E=ESTIMATE

SI-SSA-0015-04938

PSEG Power is well-positioned for growth when market conditions warrant

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Transmission Interconnections • Access to Gas Pipelines • Space • Emissions

PSEG

We make things work for you.

Portfolio Management Strategy

Optimize value of assets

Manage risk vs. reward

Directly engage with regulatory agencies

SI-SSA-0015-04942

PSEG Power: Enjoys real and sustainable advantages in the merchant generation space

Market Review

- Gas, Power, Spark Spreads
- Regulatory construct

PSEG's Competitive Advantage

- Fuel flexibility
- Heat Rate diversity
- Access to Marcellus Shale gas
- Asset flexibility

PSEG's Sustainable Advantage

- Positive cash-flow hedging into the long-term
- Robust capacity market pricing in most concentrated load pocket in US
- Long-term access to discounted Marcellus gas

SI-SSA-0015-04943

Market Review: Long-term fundamentals remain sound

- Environmental restrictions may tighten market
- Insufficient gas infrastructure continues to place upward pressure on fuel prices during seasonal peaks
- Market liquidity remains weak beyond 2015

SI-SSA-0015-04944

F=FORWARDS AS OF 8/13/2014, 2014F INCLUDES HISTORY AND FORWARDS

Market Review: New generation in PJM not keeping pace with coal retirements

Cumulative Generation Retirements*

Forecast Reserve Margin (PJM January 2014)

- PJM forecasts a declining Reserve Margin through 2018, which may improve forward prices
- Brattle estimates energy prices could rise at least $3-4/MWh from today's prices

SI-SSA-0015-04945

PSEG

*PJM AS OF FEBRUARY 20, 2014
SOURCE OF CHART DATA: PJM

Market Review: Regulatory framework showing signs of improvement

	ISSUE / POLICY	REGULATORY GAINS
PJM	SUBSIDIZED GENERATION (NJ and MD)	• Comprehensively defeated in federal court (appeals currently pending)
	DEMAND RESPONSE RULES	• PJM and ISO-NE enacted stricter rules of eligibility and deployment
	ENERGY PRICE FORMATION	• Concerted drive to improve price formation for generation and ancillary services • Waiver of price caps during extreme market conditions
NYISO	TRANSMISSION	• Significant progress made to relieve bottling of upstate generation
ISO-NE	CAPACITY	• Improvement in price formation to better reflect tight supply conditions • Implementation of sloping demand curve in Forward Capacity Auction (FCA) 9
	ENERGY	• Demand response required to participate in Day Ahead markets
FEDERAL	GAS to ELECTRIC	• Better coordination between pipelines and ISO's will promote efficiency
	ENVIRONMENTAL REGULATIONS	• HEDD, HAPS/MACT may lead to tightening of supply in 2015+ timeframe

SI-SSA-0015-04946

Competitive Advantage: Heat Rate Diversity & Flexible Dispatch

SI-SSA-0015-04947

Competitive Advantage: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

SI-SSA-0015-04948

Competitive Advantage: ~25% of Power's gas for generation comes from Marcellus

- Our combined cycle and peaking assets have been able to take advantage of locational gas price volatility driven by production and logistical constraints
- Lower cost shale supply provides additional savings during periods of lower residential gas demand

SI-SSA-0015-04949

PSEG

*AS OF 8/13/2014

Competitive Advantage: Locational advantage from short term basis volatility

PS Zone Annual Basis to PJM-W

PS Zone Day Ahead On Peak Monthly Basis to PJM-W

PS Zone Real Time On Peak Hourly Basis to PJM-W

- Annual basis benefits baseload units
- Intermediate units flexible to seasonal opportunities
- Combined Cycle and Peaking units positioned to optimize daily and hourly volatility

SI-SSA-0015-04950

ANNUAL FORWARD (F) BASIS TO PJM-WEST AS OF 8/13/2014. 2014F INCLUDES HISTORY AND FORWARDS.

Sustainable Advantage: BGS Auction provides excellent opportunity to forward hedge our generation

BGS sales account for about a quarter of our forward portfolio of hedges

PSEG FINANCIAL REVIEW & OUTLOOK

PSEG

We make things work for you.

SI-SSA-0015-04956

Strong financial position to support our business initiatives

2013 Financial Position

- ✓ Exceeded upwardly revised 2013 earnings guidance
- ✓ Pension fully funded
- ✓ Strong balance sheet and upgraded credit ratings

2014 and Beyond

- ✓ Continued positive earnings trend in 2014
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investments without equity issuance
- ✓ Growth in PSE&G investments with contemporaneous returns
- ✓ Diversified Power assets with a balanced hedge profile
- ✓ Growth in PSE&G Cash from Operations, with continued significant Cash from Operations/FFO at Power
- ✓ Increased Dividend by $0.04 to indicative annual rate of $1.48 for 2014
- ✓ Opportunity for consistent and sustainable dividend growth

SI-SSA-0015-04957

Exceeded upwardly revised guidance

in both businesses

PSEG Operating Earnings		
$ Millions (except EPS)	**2012**	**2013**

NOTE: 2012 OPERATING EARNINGS RE-STATED FOR TRANSFER OF ASSETS FROM PSEG HOLDINGS TO PSEG POWER.

In 2013, Power had significant free cash flow

SI-SSA-0015-04959

In 2013, PSE&G invested over $2B, using $1.4B of internally generated cash flow and debt, while maintaining its capital structure

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.

SI-SSA-0015-04960

In 2013, Power's Free Cash Flow supported PSE&G's capital program and shareholder dividend

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.
(2) OTHER CASH FLOW INCLUDES HOLDINGS NET CASH FLOW AND PARENT CASH.

SI-SSA-0015-04961

PSEG growth spend, including Energy Strong, of ~$6.4B represents ~76% of total investment

E = ESTIMATE; CAPITAL INCLUDES AFUDC AND IDC.

SI-SSA-0015-04962

PSE&G's Capital Program drives double-digit growth in rate base and earnings over the 2013 to 2016 period

SI-SSA-0015-04963

PSE&G's Cash from Operations and Power's Free Cash Flow support growth investments without the need for new equity

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$500M FROM 2014-2016
(2) OTHER CASH FLOW INCLUDES PSEG LI, HOLDINGS NET CASH FLOW, CASH, AND SHORT TERM DEBT
E = ESTIMATE

SI-SSA-0015-04964

Power's key credit metric supports incremental investment opportunities

- Increased contribution to earnings from the more stable regulated business allows us to reset Power's FFO/Debt threshold from 35% to 30%, providing additional financial flexibility
- Power's annual Cash From Operations and Funds From Operations each average ~$1.1B over the 2014 to 2016 period supported by:
  - Capacity Revenues
  - Hedged Generation
  - O&M Control
- Financial strength can be used to pursue future growth in both businesses beyond current plans

SI-SSA-0015-04965

Pension: Our Long Term Asset allocation strategy resulted in a ~17% increase in pension assets during 2013

PBO Funded Ratio	83%			Fully Funded Pension →	106%

SI-SSA-0015-04966

Our Pension Management is expected to result in pension income in 2014 and over the planning horizon

SI-SSA-0015-04967

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as for transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies, and
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-04991

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Income from Continuing Operations/Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP.
PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends.

PSEG is presenting Adjusted EBITDA because it provides investors with additional information to compare our business performance to other companies and understand performance trends. Adjusted EBITDA excludes the same items as our Operating Earnings measure as well as income tax expense, interest expense, depreciation and amortization and major maintenance expense costs at Power's fossil generation facilities. This information is not intended to be viewed as an alternative to GAAP information. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings and Adjusted EBITDA with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

PSEG

We make things work for you.

PSEG's Strategy

Investment program delivering results

Operational Excellence: Maintaining reliability and improving performance as we control costs in low price environment

Financial Strength: Strong financial position supports investment program and dividend growth

Disciplined Investment:
- Balanced business mix
- Robust pipeline of opportunities

Results:
- Project 3rd year of EPS growth
- Increased rate of dividend growth
- Best in class utility growth rate
- Addition of efficient CCGT capacity enhances market position
- Upside potential from power markets

SI-SSA-0015-04994

Two complementary businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A $12 billion infrastructure program – focused on transmission – produces double-digit rate base growth through 2019	**Strategy:** Investment program enhances competitive position with addition of efficient CCGT capacity **Value Proposition:** Provides substantial free cash flow in current environment and upside from market rule improvements
2014 **Assets $22B** **Operating Earnings $725M**	2014 **Assets $12B** **Operating Earnings $642M**

SI-SSA-0015-04995

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2014.
PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT AND PSEG LONG ISLAND ACTIVITY.
SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: Mid-Atlantic Reliability Award (13th consecutive year), top ranked among eastern electric and gas utilities in business customer satisfaction • PSEG Power: Record output from combined cycle units • PSEG Long Island: Demonstrated management and integration capability through a successful transition in first year • PSEG: Cost-control benefits continue
Financial Strength	• Updated operating earnings guidance for 2015 to $2.80-$2.95 per share from $2.75-$2.95 per share • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased rate of dividend growth in 2015
Disciplined Investment	• PSE&G ✓ Capital program = rate base growth of 11% over 5 years with increased investment in Transmission; Electric and Gas distribution; and Gas System Modernization Program • Power: Keys & Sewaren CCGTs, uprates, PennEast Pipeline, and Solar Source

SI-SSA-0015-04996

Robust pipeline of investment opportunities

supports >20% growth in capital spending over the period

PSEG Capital Spending

2010 – 2014: $12.6 Billion | **2015E - 2019E*: $15.6Billion**

*INCLUDES ALL PLANNED SPENDING. **ENERGY STRONG EXCLUDES RISK AND CONTINGENCY. ***POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. ****INCLUDES PENNEAST PIPELINE EQUITY INVESTMENT OF $0.1B. E=ESTIMATE. DATA AS OF SEPTEMBER 2015.

SI-SSA-0015-04997

Balance sheet strength supports capital allocation

Timeframe	Actions taken
2010 – 2014: Transformed business mix	• Applied $16 billion towards investments and dividends • Improved credit ratings • Monetized Energy Holdings' portfolio • Strong balance sheet sustained during period of low power prices, while increasing the dividend
2015 – Forward: Strong financial position supports continued growth	• Increased rate of dividend growth in 2015 • **$15.5 billion+** investment program through 2019 • Gas System Modernization Program settlement of ~ $900 million of capital investment through 2019 • Financial capability supports further expansion of the current capital plan

SI-SSA-0015-04998

PSE&G's investment program

Meeting public policy goals and customer needs

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/ NET INCOME TO RECONCILE TO OPERATING EARNINGS.

SI-SSA-0015-04999

Containing customer bills while investing in the system

PSE&G Typical Residential Customer Bills*

- PSE&G customers' combined electric and gas bills declined 23% over the period.
- Low gas prices drove rate decreases; in addition, gas customers received bill credits of ~$400 in total from 2012 through 2014.

SI-SSA-0015-05000

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

PSE&G's robust capital investment pipeline

drives double-digit rate base growth through 2019

- Planned capital spend supports high single digit earnings growth at PSE&G through 2017
- Transmission expected to grow to >50% of rate base in 2019
- Seeking to broaden platform to expand energy efficiency and other investments

E=ESTIMATE

SI-SSA-0015-05001

PSEG Power's capital expenditures

focused on improving efficiency and reliability

*BASED ON CURRENTLY KNOWN AND QUANTIFIABLE ENVIRONMENTAL REQUIREMENTS. E=ESTIMATE.

SI-SSA-0015-05002

Power's fleet has the desired attributes to be successful in today's and tomorrow's market

Economic Drivers	Outlook	Combined Cycle	Nuclear	Scrubbed Coal	Peakers	Renewable
Energy Margins	• Low natural gas and energy prices • Robust portfolio of gas pipeline contracts	✓	✓	✓	n/a	n/a
Capacity Markets	• Tightened rules proposed for capacity performance	✓	✓	✓	✓	n/a
Environmental Regulations	• Tighter air emissions standards	✓	✓	✓	✓	✓
Location	• Assets in well-designed markets, premium regions • Opportunities on brownfield sites	✓	✓	✓	✓	n/a
2015 - PSEG Power Total Capacity 11.8 GW		3.3	3.7	2.4	2.3	0.1
2018 - PSEG Power Total Capacity 12.8 GW *		4.7	3.8	2.4	1.8	0.1

- **Largest nuclear site** in the eastern U.S. and ownership in **large, fully scrubbed coal facilities** at Keystone and Conemaugh provide **economies of scale** that enhance energy margins in current low market, and provide for upside potential if prices improve.
- **Dual fuel peakers** meet reliability criteria in capacity markets and provide option value in energy market. Opportunity exists to repower peakers that do not meet NJ HEDD environmental regulations.
- **Combined cycle units Keys and Sewaren, expected to be operational in 2018,** will enhance emissions performance and have a combined average heat rate of approximately 6,800.

SI-SSA-0015-05003

PSEG

*AS OF AUGUST 2015 APPROXIMATELY 1.3 GW UNDER DEVELOPMENT - KEYS AND SEWAREN CCGT UNITS, WHICH ARE TARGETED TO GO INTO SERVICE IN 2018 ALONG WITH RETIREMENT OF OLDER SEWAREN UNITS

Operating Earnings

Disciplined investment program and focus on operational excellence have supported growth

Power's diverse fuel mix and dispatch flexibility continue to generate strong earnings and free cash flow in low price environment

PSE&G's investment program has driven double digit compound annual earnings growth since 2010

SI-SSA-0015-05004

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/ NET INCOME TO RECONCILE TO OPERATING EARNINGS. E=ESTIMATE
** 2015 PERCENTS USE MIDPOINT OF UPDATED EARNINGS GUIDANCE.

Power – Growing value by improving market rules and developing investment opportunities

Value Source	Opportunities and Actions Taken
Improving rules will better recognize value of our fleet	• PJM's Capacity market – 2014 limits on demand response and August 2015 Capacity Performance auction • Demand response treatment at U.S. Courts / FERC • Energy price formation at FERC • Increasing air standards through Federal and State regulations
Our footprint provides growth opportunities	• Nuclear and Combined Cycle plant uprates underway • New build Keys CCGT in SWMAAC* (MD) and Sewaren 7 in EMAAC* • Brownfield expansions at existing sites ➢ New peakers built at New Haven and Kearny sites ➢ Continue to explore further opportunities • PennEast pipeline - equity investment and gas portfolio enhancement • Solar Source owns ~148 MW**, with significant project pipeline • Continue to seek opportunities to expand the fleet

SI-SSA-0015-05005

PSEG

* SWMAAC = SOUTHWEST MID-ATLANTIC AREA COUNCIL \EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

**PROJECT SIZE IN MEGAWATTS SHOWN IN DC (DIRECT CURRENT), AC EQUIVALENT IS 115 MW.

PSEG Annual Dividend

An increased dividend growth rate with potential for consistent and sustainable growth given our business mix and financial position

	2011	2012	2013	2014	2015E
Payout Ratio	50%	58%	56%	54%	54%*

Mickleton–Gloucester–Camden 230kV	11.68%	✓	✓	$435	Completed

SI-SSA-0015-05015

A robust pipeline of Transmission

investments focus on reliability improvements and replacement of aging infrastructure

Project Roster	Approved ROE	Program Description	Estimate Up To ($ Millions)	Expected In-service Date
Northeast Grid Reliability	11.93%	PJM baseline project receiving CWIP in rate base treatment	$907	Jun-Dec 2015
Bergen—Linden Corridor 345kV	11.68%	PJM baseline project receiving CWIP in rate base treatment	$1,200	June 2018
PJM Regional Transmission Expansion Plan (RTEP) – multiple projects	11.68%	PJM mandated system reliability projects	$1,900	Various
69kV Upgrade – multiple projects	11.68%	Upgrade of 26kV to 69kV	$1,500	Various
Transmission Lifecycle – multiple projects	11.68%	Replacement of aging infrastructure	$1,100	Various
Transmission Hardening– multiple projects	11.68%	Reliability projects focused on system resiliency	$650	Various
Artificial Island	11.68%	PJM Baseline Project	$110-$130*	2019*

SI-SSA-0015-05016

PSEG

* PJM ESTIMATE

Major Transmission programs focus on reliability and replacing aging infrastructure

- PJM's Regional Transmission Expansion Plan (RTEP) identifies system enhancements needed for reliability
- 69kV system upgrades improve system reliability and provide capacity for future growth
- Transmission Lifecycle is an ongoing program to manage transmission asset life to maintain and improve system integrity and reliability
- Transmission Hardening projects focus on increasing system resiliency

SI-SSA-00015-05017

PSE&G is successfully executing on Energy Strong with ~$330M deployed

Program	Approved	Spend thru June 2015
Flood Mitigation	$620M	$56M
Electric Contingency Reconfiguration	$100M	$49M
Electric Advanced Technology	$100M	$32M
Gas Utilization Pressure Cast Iron (UPCI)	$350M	$185M
Gas Metering & Regulating (M&R)	$50M	$6M
TOTAL	$1,220M	$328M

SI-SSA-0015-05018

PSE&G has successfully worked with regulators to develop multiple solutions for New Jersey's energy and economic development goals

RENEWABLES
creative solutions to install solar generation

- Solar Loan I – 2008
- Solar Loan II – 2009
- Solar 4 All – 2009
- Solar Loan III – 2013
- Solar 4 All Ext – 2013

ENERGY EFFICIENCY
assisting customers with controlling energy usage

- Carbon Abatement – 2008
- Demand Response – 2009
- Energy Efficiency (EE) – 2009
- EE Extension – 2011
- EE Extension II – 2015

DISTRIBUTION
improving electric and gas delivery infrastructure

- NJ Capital Infrastructure Program 1 (CIP 1) – 2009
- NJ Capital Infrastructure Program 2 (CIP 2) – 2011
- Energy Strong – 2014

To date we have invested over $2B in the above programs

Over $1B ahead in Energy Strong, Energy Efficiency Ext II and Solar programs

Gas System (GSMP) settlement increases investment by ~$900M through 2019

SI-SSA-0015-05019

Extension of PSE&G's award winning Energy Efficiency program

- Energy Efficiency Extension II approved by the BPU in April 2015 will extend the investment and time frame for three previously approved programs already in the marketplace, allowing PSE&G to factor in lessons learned and balance policy issues
- $95M of rate base investment approved at an ROE of 9.75%
- Extends existing programs, two of which have sizable waiting lists:
  - Hospitals
  - Multifamily
  - Direct install – government, non-profit, and small business
- Allows PSE&G to leverage past investments in people, capabilities, systems and processes

SI-SSA-0015-05020

Settlement reached on Gas System Modernization Program for ~$900 million over three years

- Agreement in principle reached with Staff of the NJBPU and the Division of Rate Counsel
- GSMP is the next phase of a long-term, cast iron and unprotected steel replacement strategy
- Three-year program with total capital investment of $905 million, beginning January 2016
  - ✓ The program provides for investment of $650M recovered through a clause similar to the Energy Strong program – with a 9.75% ROE
  - ✓ Additional capital investment of $255M to be recovered in rate case scheduled to be filed November 2017

SI-SSA-0015-05021

PSE&G continues to receive contemporaneous/ formula rate recovery on ~70% of its investment program

2010-2014 PSE&G Capital Spending by Recovery Method

$9.8B

2015-2019E PSE&G Capital by Recovery Method

$11.8B

Clause Recovery Mechanisms
- Energy Strong / GSMP / Infrastructure / Solar / Energy Efficiency

FERC Formula Rates
- Transmission

Traditional Recovery Mechanisms
- Distribution Base Rates

E = ESTIMATE. DATA AS OF SEPTEMBER 2015.

SI-SSA-0015-05022

PSE&G has controlled costs

through process improvements and will continue to drive future efficiencies

Cost control actions taken:

- PSE&G is utilizing the Lean Six Sigma discipline to achieve costs savings and process improvements
- Conducted organizational reviews resulting in streamlining of processes through restructuring
- Continued focus on vendor and inventory practices ensuring maximum value
- Successful management of pension

E=ESTIMATE

SI-SSA-0015-05023

PSE&G's 2015 operating earnings

expected to benefit from increased investment in Transmission

PSEG LONG ISLAND

PSEG

We make things work for you.

SI-SSA-0015-05025

PSEG Long Island is focused on improving customer service and reliability

- Provide best-in-class customer service, including building on our new Call Center Technology platform to better serve our customers
  - According to J.D. Power, in 2014 PSEG Long Island showed the most improvement in overall customer satisfaction of any large electric utility, anywhere in the nation
- Work to maintain industry-leading service reliability
- Improve every aspect of the storm response process
  - Leveraged our new Outage Management System to improve storm logistics and outage coordination
- Contributed $0.02* to PSEG's earnings per share in 2014, as expected

SI-SSA-0015-05026

PSEG

* EXCLUDES THE ENERGY RESOURCES & TRADE CONTRACT, WHICH WILL BE INCLUDED IN PSEG POWER'S RESULTS.

PSEG

We make things work for you.

PSEG POWER

SI-SSA-0015-05027

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-05028

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units have performed well for ten consecutive years • Hope Creek recorded its second highest output in its history • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing market conditions • Bergen 1 & 2 and Linden 1 individually, and the CCGT fleet in total, set generation records in 2014 • Kearny 13 & 14 have shown increasing output in each year since start-up	• Getting the most out of existing fleet • Locational advantage • O&M control programs have delivered a CAGR of 2.6% between 2009 and 2015 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-05029

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program between Nuclear & Fossil initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2014 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch began January 1, 2015 • Solar Source's portfolio is 148 MW_{DC} • Nuclear ESP is expected in 2016 • New build Keys CCGT in Maryland and Sewaren 7 in New Jersey – both targeted in-service 2018

SI-SSA-0015-05030

PSEG Power met 2014's challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• All of the generation sites affected by SuperStorm Sandy were restored to service by mid-2014, with ongoing repairs • Cold weather extremes created a challenging operating environment, but also presented opportunities		• Transmission (outages and build outs) and gas markets resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Expedited return from storm outages, restored margin opportunities • High availability when needed • Flexibility of portfolio captured real-time basis opportunities • Captured value through coal/gas switching, unit flexibility • Management of gas assets benefited customers and fleet • Achieved fuel cost savings

SI-SSA-0015-05031

PSEG Power has generating assets

in three competitive markets

- Assets located near load centers
- Low cost portfolio
  - Fuel flexibility with gas cost advantage
- Positioned to benefit from volatility in real-time markets
- Readiness for capacity performance (CP) in PJM
- Fleet positioned to maintain diversity and efficiency after HEDD
- Sites suitable for expansion

SI-SSA-0015-05032

PSEG Power value advantaged

by asset diversity, fuel flexibility and location

Energy Produced*

Total GWh: 54,162

- Gas
- Pumped Storage
- Nuclear
- Oil
- Coal**

Energy Market Served*

Total MW: 13,146

- Load Following
- Peaking
- Base load

Fuel Diversity*

Total MW: 13,146

- Gas
- Pumped Storage
- Nuclear
- Oil
- Coal**

*2014, EXCLUDES SOLAR AND KALAELOA.
**INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

SI-SSA-0015-05033

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape
- Readiness for Capacity Performance (CP)
- Keys & Sewaren 7 to be added to dispatch in 2018E

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel capability at 87% of load following and peaking units

SI-SSA-0015-05034

PSEG Power will maintain diversity and efficiency after a realignment of the fleet following HEDD retirements

Objective 2015 → 2018

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Environmental improvement
- Peach Bottom (PB) uprate
- Advanced Gas Path (AGP)
- Combined cycle units Keys and Sewaren operational in 2018

Fuel Diversity

E=ESTIMATE.

SI-SSA-0015-05035

PSEG Power's fleet will experience heat rate and emissions improvements

- AGP (Advanced Gas Path) investments
- Other Efficiency improvements
- HEDD retirements
- Keys/Sewaren Combined Cycle Development (2018)

E = ESTIMATE

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing

SI-SSA-0015-05037

PSEG Power Nuclear is a critical element of our success

Hope Creek

- Operated by PSEG Nuclear
- PSEG Ownership: 100%
- Technology: Boiling Water Reactor
- Total Capacity: 1,178 MW
- Owned Capacity: 1,178 MW
- License Expiration: 2046
- Next Refueling
  - Fall 2016

Salem Units 1 and 2

- Operated by PSEG Nuclear
- PSEG Ownership: 57%
- Technology: Pressurized Water Reactor
- Total Capacity: 2,307 MW
- Owned Capacity: 1,324 MW
- License Expiration: 2036 and 2040
- Next Refueling
  - Unit 1 – Spring 2016
  - Unit 2 -- Fall 2015

Peach Bottom Units 2 and 3

- Operated by Exelon
- PSEG Ownership: 50%
- Technology: Boiling Water Reactor
- Total Capacity: 2,242 MW
- Owned Capacity: 1,121 MW
- License Expiration: 2033 and 2034
- Next Refueling
  - Unit 2 - Spring 2016
  - Unit 3 - Fall 2015
- Uprate: 130 MW (PS Share)
  - Unit 2 - March 2015
  - Unit 3 - 2016

SI-SSA-0015-05038

PSEG Power Nuclear has competitive advantages

- Continued strong nuclear operations
- Nuclear excellence program
- Top quartile of cost performance/MWh
  - Brought security services in-house
- Significant earnings contributor
- Recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - FLEX* plan submitted with implementation underway
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

SI-SSA-0015-05039

PSEG Power's Fossil Fleet has shown improvement in performance

Fossil Generation

Coal Generation

Peaking Start Success*

- Fossil Generation rebounded with market
- Peaking Units maintain high start success
- Record output from Kearny 13 & 14 peakers

Combined Cycle Generation

- Combined Cycle Generation set record
- Bergen AGP uprate project scheduled for 2015

SI-SSA-0015-05040

PSEG

*LM6000 AND 7EA UNITS E = ESTIMATE.

PSEG Power initiatives result in

continuing improvement in combined cycle heat rate

*The weighted average Combined Cycle Heat Rate in 2018, with the addition of Sewaren 7 and Keys Energy Center, will be approximately 7,250

SI-SSA-0015-05041

E= ESTIMATE.

PSEG Power CCGT/Fossil initiatives

Actions Taken to Create Value

Capacity
- New Keys CCGT 755MW online in 2018 adds geographic diversity to fleet
- Sewaren 7 CCGT 540 MW online in 2018 improves fleet efficiency
- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional efficient capacity, heat rate improvements
- New lower cost gas line at BEC with Dominion

Performance
- EPRI efficiency initiatives
- GE initiatives for large data analytic
- Consolidation of unit testing
- Auto tuning software

Maintenance
- Ongoing outage efficiency improvement
- Improvements to reliability
- Central fleet monitoring and diagnostic center

SI-SSA-0015-05042

PSEG Power developing 1,300 MW of new, efficient CCGT capacity in MD and NJ

- **Construction of 755 MW Keys Energy Center to begin this Fall** to build a new, natural gas fired power plant in Maryland (SWMAAC*) at an estimated cost of **$825 to $875 million**
- Power cleared a new **540 MW CCGT unit, Sewaren 7 located in New Jersey (EMAAC*)**, in the recent 2018/2019 RPM auction; the unit is expected to cost ~$600 million and is targeted to be in service in 2018; older Sewaren units will be retired upon completion of the new unit
- **PSEG Fossil** will oversee the construction and operation of both PSEG Keys Energy Center and Sewaren 7

SI-SSA-0015-05043

PSEG

*SWMAAC = SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

PSEG Power's Growth Investments

Site	Project	Estimate ($ millions)	Benefits	Status
Maryland	Keys 755 MW CCGT	$825 - $875	Geographic diversity within PJM; highly efficient gas fired unit in SWMAAC	2018E
Sewaren	Unit 7 540 MW CCGT	$600	Improved efficiency and reliability; increase in capacity	2018E
Peach Bottom	Peach Bottom EPU (2014 – 2015)	$417	Increased capacity: 130 MW	PB2 May 2015, PB3 in 2016
Bergen / BEC	Future AGP Upgrades: Bergen (2015) BEC (2017-2018)	$98	Increased capacity and improved heat rate: 88 MW capacity increase ~1.2% heat rate improvement	Underway
Various	Interim ISA's*	No cost	Increased capacity: 69 MW	Completed
Eastern PA to Mercer, NJ	PennEast Pipeline	$119	Estimated Earnings in 2019: $13 million	Underway

Total Increased Capacity – 1,132 MW **

We make things work for you.

Market Review: Winter Z6 gas prices retain seasonal volatility; spark spreads have continued to be robust in PJM

2015 YTD Z6

2015-2018 Z6

PJM West vs. PS Zone Spark Spreads (2013-2018)

SI-SSA-0015-05052

Power Basis in Eastern PJM: Expected to be volatile and negative on an annual basis for 2015 and 2016

Electric Basis is negative however it is viewed to be stabilizing and turning back to positive within 2 years due to:

- Export of ~18 bcf/day of gas which will significantly strengthen regional gas prices
- Easing of transmission constraints in Virginia/Maryland
- Construction of significant new gas-fired generation in VA/MD

SI-SSA-0015-05053

PSEG

ANNUAL FORWARD BASIS TO PJM-WEST AS OF AUGUST 3, 2015.
E = YTD ACTUAL PLUS FORWARD; F = FORWARD

Market Review: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

Power's Gas for Generation in 2014

- PSEG Power maintains a robust portfolio of pipeline and storage assets in the Mid-Atlantic
- PSEG Power's gas for generation was ~100 BCF in 2014, of which >60% was supplied by Shale gas
- PSEG Power procured over 400 BCF in 2014 with ~75% going to PSE&G's utility gas customers
- When gas is surplus to customer needs, PSEG Power sells surplus to others; margins from such sales benefit PSE&G gas customers and PSEG Power

SI-SSA-0015-05054

Market Review: New pipelines will move significant quantities of Marcellus gas out of the region by 2018

Historical and Expected Marcellus Production

Pipeline capacity grows significantly by 2018

New pipeline investment is expected to increase takeaway capacity from the low cost Marcellus/Utica shale and reduce regional surpluses and increase gas prices by 2018

SI-SSA-0015-05055

Northeast Portfolio: New York and New England

New England (972 MW)

- Small but dynamic market
- Significant improvement in market construct
- High volatility due to extreme (winter) weather conditions
- Significant siting and permitting challenges
- Gas pipeline infrastructure poses supply challenges/opportunity

New York (774 MW)

- Single state ISO
- Investment in new lateral to connect to the Dominion pipeline at Bethlehem Energy Center (BEC) allows for access to fuel supply from Marcellus
- Long Island Power Authority Fuel Management Contract

SI-SSA-0015-05056

Northeast Portfolio: Expanding our footprint with PSEG Long Island

PSEG Power acting as an agent for LIPA began January 2015

- Performing ISO bidding for LIPA's 6,000 MWs of generation/tolls
- Procuring natural gas and oil for the majority of these assets
- Scheduling two DC transmission cables (ISO-NE and PJM) into Long Island
- Entering into financial hedges to reduce LIPA customer's price volatility

This relationship has provided PSEG Power:

- Additional experience in Eastern NY and Connecticut markets
- Bigger natural gas footprint
- Fee-based services contract

SI-SSA-0015-05057

Capacity Market Pricing: ~98% of Power's PJM fleet that cleared the 2018/2019 RPM auction, **met the new CP standards**

RPM – Auction Results				
($/MW-day)	2015 / 2016*	2016 / 2017*+	2017 / 2018	2018 / 2019
Power's Average Prices*	$168	$172	$165	**$215**
Rest of Pool Prices	$136	$59	$120	**$165/$150 (CP/Base)**
Power's Cleared Capacity (MW)	8,750	8,700	8,700	**8,650**

SI-SSA-0015-05060

PSEG Power's Value Proposition

- Re-positioning fleet to improve efficiency and reliability in attractive markets
- Advantaged by low cost structure, fuel diversity and dispatch flexibility
- Value add from strong gas supply capability
- Significant drive by regulatory bodies to improve market constructs
- Low capital requirements to meet enhanced performance standards
- Organic growth opportunities to increase nuclear and combined cycle generation
- Hedging strategy is responsive to changing market dynamics, providing attractive returns and free cash flow

SI-SSA-0015-05061

PSEG FINANCIAL REVIEW & OUTLOOK

SI-SSA-0015-05062

PSEG

We make things work for you.

Strong financial position to support our business initiatives

2014 Financial Position

- ✓ Strong 2014 earnings growth
- ✓ Exceeded earnings guidance
- ✓ Executed major PSE&G capital program
- ✓ Strong balance sheet with no long term Parent debt
- ✓ Solid credit metrics

2015 and Beyond

- ✓ Third year of anticipated positive earnings growth in 2015
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investment program without equity issuance
- ✓ Substantial additional investment capacity
- ✓ Growth in PSE&G investments with contemporaneous/formula rate returns and new Power investment
- ✓ Consistent and strong cash flow from both Power and PSE&G
- ✓ Potential for accelerated and sustainable dividend growth

SI-SSA-0015-05072

PSEG Summary

- Continued third year of anticipated positive earnings trend in 2015 with updated operating earnings guidance of $2.80 to $2.95 per share
- Continued 5th straight year of expected double digit, 5-year growth in rate base
- Anticipated high single digit earnings growth at PSE&G on a three-year basis from 2014 to 2017, driven by transmission investments and planned programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Power realigning its portfolio with new, efficient CCGT investments in MD and NJ
- Strong Balance Sheet and Cash Flow support PSE&G's capital program and Power's new investment opportunities without the need for equity
- Our $0.08 per share dividend increase for 2015 is consistent with our long history of returning cash to the shareholder through the common dividend, with potential for consistent and sustainable growth

CONFERENCE CALL PARTICIPANTS

Daniel Ford *Barclays - Analyst*

PRESENTATION

Daniel Ford - *Barclays - Analyst*

Hello, everybody. Our next presentation is going to be from Public Service Enterprise Group. We have Ralph Izzo who is Chairman, President and CEO as well as Caroline Dorsa who is Executive Vice President and CFO.

Ralph Izzo - *Public Service Enterprise Group - Chairman, President and CEO*

Thank you, Dan, and thank you, everyone, for being here. So I would direct you to both our forward-looking statement and our GAAP disclaimer although obviously I won't go through the details of either of those documents. We will be talking a bit about prior results of the past few years as well as making some projections as to how the outlook looks for us, at least certainly for the next couple of years.

Most folks will tell you as I walk around PSEG, the conversation typically begins with employees talking about the importance of operational excellence, not just in our regulated business, but in our unregulated wholesale power business. And what we try to impress upon employees is that if they do operate our assets with excellence, there's no question given the markets we serve, which I'll go into in some greater detail, that we'll produce profitable outcomes and a level of financial strength that we can then redeploy in some way through some disciplined process by way of investing in assets that we have a good chance of operating with excellence as we move forward.

The result of that is a highly engaged workforce. Now if that didn't make sense from an investor point of view, I assure you it does make sense to our employees. But what you should hear from those words is that PSEG is really focused on deploying its very, very healthy balance sheet, primarily in our stable, regulated business nowadays, in ways that both meet the needs of our customers and fulfill the social and public policy objectives laid out by our regulators and elected officials.

And while that's the primary growth trajectory that we are pursuing, we do that while we protect the upside associated with operating a fleet of assets in our merchant generation business that has some very unique set of strengths that I'll talk about in greater detail as we go forward.

For those of you who are not familiar with the specifics of PSEG, let me turn those generalities into a subsidiary by subsidiary review of Public Service Enterprise Group. The main growth vehicle and the main investment vehicle is about $10 billion in capital at Public Service Electric and Gas, our electric and gas delivery and transmission business in New Jersey. That $10 billion number is between now and 2017 and it looks more like a $6 billion number between now and 2015.

In addition to that, our merchant generation business, owning about 13,000 megawatts of merchant generation in the New England and PJM East region, is really characterized by a fleet that is advantaged in two ways. Number one, by its physical location, and number two, by its environmental position. It is a very clean fleet with its environmental CapEx all in the rearview mirror and minimal environmental CapEx standing in its way as we approach [HAPS MAC] compliance timeframe of 2015.

And then last and to a much smaller extent, our PSEG Energy Holdings, which is growing from about 69 to 90 megawatts of unregulated solar in the course of the next few months. And we'll continue to look for PPA-supported projects in the 15 to 25 megawatt range throughout the country.

Well how has this business model of relying upon a foundation of operational excellence to produce solid financial results, which are then deployed in a disciplined manner into new investments? Let's just take a look at what it's produced over the past 4 years. It is hardly something to boast

THOMSON REUTERS

SI-SSA-0015-05092

about when one is talking about a 15% decline in earnings per share over a 5-year timeframe. However, something was done properly when you look at an over 50% reduction in the power prices that we've realized at PJM West which is the most liquid hub in terms of the markets that we serve.

And the way we did it was by reducing our own growth from what was a planned 2.4% escalation rate to something that was less than 1%, all the while keeping our forced outage rate at our combined cycle units at about the same level, going from 1.6% to 1.7%, increasing the amount of generation at our nuclear plants from 29.3 terawatt hours to 29.8 terawatt hours, and taking advantage of the lower supply charges that our customers realized and the lower supply revenues that we realized, and taking the benefits that customers saw in their bill and using that as an opportunity to make very needed investments in our delivery business.

So we took our transmission rate base from under $1 billion to $2.5 billion, developed a contemporaneous return distribution investment program that we call the Utility Cap Stimulus Spending, from zero to nearly $1 billion. And in fact, investing in some of the renewables programs, both in terms of solar and energy efficiency that the state was a champion of, and going from zero to nearly $900 million.

Probably no one event defined the past four years and the importance of operational excellence better than Super Storm Sandy. I won't spend a lot of time walking you through the significant amount of damage that we realized, primarily on the delivery side, but also on the generation side. Suffice to say that we not only received an EEI Award for our recovery, but we used this as an opportunity to say while load and demand for electricity is not growing commensurate with historic levels, customers' reliance on electricity is achieving levels that have never been seen before. And it's that reliance upon electricity, that dependence upon electricity that encouraged us to say something needs to be done differently. That something we describe as Energy Strong. I'll get into the details about that in a few minutes.

But it's our ability to demonstrate operational excellence in restoring customers. The strength of our balance sheet that exists today that allows us to take those two and say we need to do something quite different going into the future to recognize that dependence that customers have on electricity. And that is a $3.9 billion 10-year program called Energy Strong that I'll get into in greater detail in a few moments.

Let's step back for a second however and look at the overall capital program at the parent company. Between 2013 and 2015, we have plans to deploy $6.3 billion in capital. About 75% of that is in growth capital, most of that being at the utility. In fact, the total capital to be deployed at the utility is a little bit north of 81%. I have to emphasize that what we're showing on these two pie charts, that's the same $6.3 billion worth of capital, are programs that are fully authorized. We're not asking permission to spend this money. To the extent that some of the transmission money that's envisioned being spent here needs to be into the PJM RTEP, which is their regional transmission expansion plan, it's already in there. To the extent that some of this money needs to get Board of Public Utilities approval in New Jersey, it's already received that approval.

To the extent that some of these plans need to be synched up with new customer connections, those customer connections are already known to us. So this $6.3 billion does not need anything other than in some cases siting approval in local towns and municipalities which we have had a very good track record of achieving.

If we were to say what else might be available to us, that $6.3 billion can become $7.5 billion in the next few years, largely driven by PSEG's Energy Strong proposal, which as I said a moment ago, is a 10-year program for which we've sought 5 years of approval. And this would be the 3-year impact largely being realized in 2014 and 2015. There's a very, very modest element associated with that in 2013.

All of that would be growth, so the additional $1.2 billion that gets added to the $6.3 billion would all be in the utility and all receive contemporaneous return treatment if it were to be approved by the Board of Public Utilities.

Let's then spend a little bit more time on the details behind Energy Strong. As I said, it's a $3.9 billion program for ten years. All we have filed for is the $2.6 billion that we would expect to spend over the next five years. In addition to that $3.9 billion over ten years, there would be $1.5 billion in transmission enhancements that is not subject to state jurisdiction but is subject to our Federal Energy Regulatory Commission's formula rate treatment which as you know right now receives an 11.7% allowed return on equity.

THOMSON REUTERS

SI-SSA-0015-05093

Here we break out the specific projects in areas that we expect to deploy that capital. There are numerous benefits associated with Energy Strong. Primarily in the electric area, but also in the gas area. And one significant element of the benefit of doing this now is the availability of labor and the fact that Energy Strong produces nearly 6,000 jobs in terms of the construction program that we envision.

So we have a reliability improvement, economic development benefits, the availability of labor, the access to capital works quite well for us right now, and as a result of that, we've had some significant support from municipalities who have passed resolutions in support of Energy Strong, county governments who have passed resolutions in support of Energy Strong, and in fact, we are predicting that as we enter the public hearing stage, which is the phase we're in right now, we're in our first public hearing beginning next Monday and continuing through October, that we will have significant support from organized labor, the New Jersey Chamber of Commerce, hospital associations, associations of higher education as well.

Part of the reason for that additional support is not just in the obvious benefits that I've outlined for you, but it's also in the fact that we can manage this program and not raise customer bills in the next three years. That is largely due to the benefits associated with the decrease in customer bills that result from about 8.7% reduction in a residential rate that will be realized as charges that were associated with several programs in the past, the single biggest one is the securitization charges associated with deregulation rolling off as well as some above market NUG contracts expiring, and those two alone combine for an 8.7% reduction in anticipated residential bills between 2015 and 2016.

And the rate reduction for the commercial customer space is even larger than that. So we can feather in Energy Strong without an increase in residential or commercial bills, assuming the current BGS rates stay steady in that same timeframe. So significant customer benefits, significant job creation benefits without any increase in rates is what is generating this kind of support. To be sure, there are some folks who are saying, no we should it for free. That's not in the cards. And others who are saying that we should do this under traditional ratemaking and no, that's not in the cards as well.

Let's now switch gears from PSE&G where as I mentioned the vast majority of our capital investment is targeted, and talk a bit about PSEG Power. If I had to use one phrase to explain the benefits associated, the advantages that PSEG Power has over competitors, it would really be on this slide and it would be in the word diversity. Fuel diversity as well as technology diversity. If we were to focus on the two pie charts on the left and the right, they would not be any different if I were to show them to you, if I had shown them to you 5 years ago. And in fact, I think if I can go back 10 years, they would look quite similar. We have this mix of gas, coal and nuclear assets. We have this mix of base load, load following, and peaking assets.

But what has changed over time is the pie in the middle. And by and large, the nuclear elements of the gigawatt hours we've produced has been anywhere from 50% to 57% of our output. It was probably closer to 50% years ago when our capacity factors were more like 88% as opposed to the 92%, 93% capacity factors at which we run. But the gas and coal would have been flipped. You would have seen probably more like 35% in coal and 15% in gas and now you're seeing the 32% in gas and 11% in coal in terms of energy produced.

Let me also point out for you that that 11% in coal is a bit of a misnomer. Almost 55% of that 11% of our coal assets was run on natural gas. So we have enormous fuel flexibility in our assets to respond to market conditions in terms of fuel prices. And in fact, if I stick with energy for a moment and talk to you a bit about our locational advantages, we have watched the basis differential from PJM West and the PS Zone decrease over time to be sure. And typically when one looks at that basis differential, one looks at it from the perspective of the forward price curve, and you've seen that come down from double digits to low single digits nowadays. And in fact, if you were to just take the forward price curve and do the subtraction, nowadays you'd see a number like $2 or $3 depending on what year you're looking at yet.

What I'm trying to show you here on the left, however, is the on peak monthly day ahead basis differential between the PS Zone and the PJM West. And what you see is anything but a stable single digit number. That flexibility in terms of the technology that we have, in terms of our peaking and load following units, and our natural long position and the way in which we hedge, which is to only hedge 100% of our base load, in the current year allows us to take advantage of these spikes. These spikes are not driven by anything other than the operational complexity of running the grid. What happens when a plant has an unexpected outage? What happens when you get 96 degree weather in September with 85% humidity? What happens when a power plant or transmission line comes out that wasn't expected to come out?

THOMSON REUTERS

SI-SSA-0015-05094

And you can see that there is just enormous volatility in that basis differential that advantages a set of assets like ours that are naturally long and in the region that is typically on the upside of this zero line as you see here.

Sticking with energy, another advantage that's now arisen of late is the fact that PSEG Power has nearly a little more than half a Bcf of transfer capability of Marcellus Shale which translates into our ability to fuel our five natural gas combined cycle units, over 3,500 megawatts, at a lower fuel supply cost than others might be able to. That is on top of our nearly 1 Bcf a day of storage which is on top of our 0.7 Bcf per day of access to gas supply from the more traditional routes. So we can take a look at where it is most advantageous to us to supply our gas plants, which once again, we do not hedge quite to the same extent as we do our base load units.

As I move from energy to capacity, there's no question that the rules are still evolving in PJM. And there's no question that some years DR plays a different role in terms of affecting the market than what the minimum offer price rule might do. And this year's story may not have been either of those and it may have been more related to transfer capability from the west. However, as you look at the top line, which is the price that we've realized, what you see is, except for the blowout year of 2013 and 2014 which is what we're in now and is one that I wish had been replicated many times over, for the past 3 years we have seen auctions that give us a pretty steady, predictable price of about $165 per megawatt day plus or minus a couple of dollars. And those prices are the best prices in the region, just given the supply/demand tightness in the markets we serve.

So from an energy and a capacity point of view, we think that we do have natural advantages both in terms of our assets, in terms of their fuel diversity, their locational advantages, and the flexibility around the technology.

So I talked to you about what happened going from 2008 to 2012, what does this mean for us going forward? Well we continue that focus on O&M control. We're forecasting about a 2.2% O&M growth across the enterprise. We'll talk a little bit more about that in some detail in a moment. We continue to pursue the path that we have pursued over the past 4 years which is to take the cash being generated at power and to combine that with the ability for the utility to access the debt markets and grow its rate base. We're going to take that from a $9 billion rate base over the next 3 years and grow it by over 30% to over $12.5 billion. Most of that will take place in transmission where we get FERC formulate rate treatments with allowed equity returns of 11.68% up to 12.9% depending upon the project. We will also grow our distribution business with the Energy Strong proposals that we have, and we have already received approval for what we call the EMP, Energy Master Plan programs through the settlement and approval that we received from the Board of Public Utility for increased solar investments.

We'll drive down our forced outage rate at our combined cycles. We'll increase, we'll further increase our nuclear generation. This is not so much about a further improvement in capacity values, it's more a further expansion through our upgrade at Hope Creek that has been completed and our upgrade at the Peach Bottom units which are underway. And we do have projects that are already in construction at Holding Solar that will increase the amount of capability we have there. And as you all may be aware, we have a contract with the Long Island Power Authority to take over their operations beginning January 1 of 2014.

So if I spend a few minutes on this growth rate in our O&M, we had predicted a 2.4% growth over the prior 5 years. We kept that to under 1%. What we're forecasting for the next few years is growth at the enterprise level of 2.2%. Let me emphasize for you that the transmission growth rate of 0.4% is something that's essentially a pass through through the formula rate treatment that we get at FERC. The distribution growth rate will be kept to about a little over 1%. And the power growth rate is driven mostly through the short time duration we have here and some additional large outages that we will be taking at our combined cycle units just given the heavier use that they are realizing.

If I take look at the balance sheet, as we move over the next 3 years, it is as healthy as healthy can be. We've recently enjoyed the benefit of an upgrade at the rating agencies. You can see here that the absence of any capital being, any material capital being required at PSEG Power really results in the utility simply living up to its debt to equity ratio, the 51% equity and 49% debt. And as a result of the utility capital program you see a modest increase in the overall debt to equity ratio at the parent company as well.

What does this mean in terms of the earnings trajectory that we've realized? So we had power representing three quarters of the earnings of the company in 2009. As it is seen, it's price that it's realized has come down as a result of the decline in wholesale power prices. And the utility, with the robust investment program, this year we're forecasting that power in the utility will contribute equally to the earnings of the company. While

THOMSON REUTERS

SI-SSA-0015-05095

we don't forecast future earnings, given the transparency and the visibility we have to utility capital investments, we are forecasting double digit earnings growth for PSE&G, the utility, over the next two years.

As we said on our second quarter call, we are sticking with our 225 to 250 earnings guidance for this year. However, we do expect the normal weather conditions with normal unit operations to end the year at the upper end of that guidance range.

In terms of the dividend, we're proud of that track record that we have mentioned in the past, namely the fact that we have not missed one year of dividend payments for over 100 years. The utility now accounts for about 80% of the dividend payout. With the double digit earnings growth at the utility, one could do some simple arithmetic and realize that over 2014 and 2015, the utility could cover 100% of the dividend payout. Having said that, we don't tie the dividend payout to any one measure. We tie that dividend payout to what is the growth in the utility earnings, what are the cash needs of power, where are we in the commodity cycle. And when we add all that together, what we can say to you is that we do believe we have an opportunity for sustainable modest growth in that dividend. And we don't make that prediction lightly as I said just a moment ago given the company's track record of never having missed a year of dividend payments. If you look at us over the last 5 to 10 years that dividend has grown between 2% and 3% over that timeframe.

So I think I'll stop there and leave some time for questions. At the end of the day what I see is a power generation fleet that is extremely well positioned locationally, extremely well positioned from an environmental point of view in terms of the rules that it faces, with tremendous amount of diversity both in terms of the technology and the fuel mix, and being able to take advantage of the market dynamics that it faces, the market dynamics in terms of Marcellus Shale gas, the market dynamics in terms of basis volatility. It produces healthy cash streams that we can then use in our utility for a fairly robust double digit earnings growth for the next three years and clear investment horizons that go beyond that in terms of the rate based growth that we would anticipate. All with no need for new equity issuance, all with the ability to fund that internally in terms of our equity requirements, healthy access to the debt markets, and a very, very secure and modestly growing dividend as we look to the future.

So Dan, if we -- we do have time for questions I can see from the clock.

QUESTIONS AND ANSWERS

Unidentified Participant

Very good story. One of your smaller projects that I have a strong personal interest in are the distributed solar panels on the utility poles. How would you characterize your experiment with that? And about how much power does it generate collectively? And do you intend to expand it?

Ralph Izzo - *Public Service Enterprise Group - Chairman, President and CEO*

I would characterize the outcome as somewhat mixed and let me tell the good news and then the not so good news. We installed 200,000 of them. They produce I think it's about 30 megawatts, maybe a little bit shy of that. They work well. During Sandy for example, the only reason why any of those panels fell was because the pole fell. So none of the panels -- we were candidly worried, are we putting sails on there and are there things that could become a problem later on? They also have the capability of doing some remote communications for us and that communications capability works as well.

The degradation has been miniscule. I think we had a certain expectation of fractions of a percent in terms of just the aging of the panel and that's been met as well. So from an operations point of view, I would give them an A+. The downside is the cost. I mean those panels produce electricity at anywhere from $0.35 to $0.40 a Kwh. And notwithstanding the reduction in panel prices, the installation costs remain high. So our Solar for All extension program shifted away from those panels and more towards 3 to 8 megawatt ground based utility scale developments. So even with the panel cost reductions, I don't think that those projects are economic on a wide scale going forward.

Ralph, I recognize that it's a very small item for you, but you did mention it, the LIPA contract. It seems to me you're exposing yourself to a lot of potential negative publicity which LIPA has gotten in the past and well deserved, and probably will continue to get in the future except what you bring to the party. What's the purpose in your having bid on that contract in the first place and what do you see getting out of it?

Ralph Izzo - *Public Service Enterprise Group - Chairman, President and CEO*

So remember when we first won the LIPA contract was pre-Sandy. And what appealed to us was the return. We had about $0.03 per share profit in the numerator and the capital investment was zero. So that arithmetic works kind of nicely. I mean it was certainly management intention. And at the time, we were not going to be the brand associated with LIPA. We were going to truly step into the role that national grid plays. And the analogy I like to use is we were going to be the arms and legs and LIPA was going to continue to be the brains and the mouthpiece.

Sandy changed that and the governor decided that he really didn't want LIPA to play the role that it plays and he was interested in having us become the brand which meant becoming the brains and the mouthpiece. And we said, okay, we think we can run this place differently and candidly better, and we would be interested in that. Which puts our brand somewhat at risk in exchange for a different set of economic terms and conditions. That expanded and enhanced operating services agreement has not been fully consummated yet. We're hopeful, in fact we're optimistic it will be.

So the answer is that in exchange for putting ourselves more in front, as PSEG Long Island, which is consistent with our clever, brilliant branding strategy, we will then get some greater economic rewards for it. We still will not put ourselves in a position of A), investing in assets, putting capital at risk, or B), taking on any of their debt risk or any of their pension risk or any of the sort of big items that you would want us to be cautious about. So we will be, instead of a subcontractor, a general contractor getting a bigger reward for doing that, but putting our names on the trucks which will be the risk that we will take.

Unidentified Participant

Ralph, can you comment about what you would like to see from the PJM stakeholder process this year as regards the RPM for next spring?

Ralph Izzo - *Public Service Enterprise Group - Chairman, President and CEO*

Yeah, so I think the biggest area that I would like to get resolved, because it's been a little of an oscillating pendulum and it's oscillating about an equilibrium that I like, but it hasn't stopped swinging, is the [MOPR] process. So we had a MOPR that I thought was going to work well and then candidly PJM deployed it in a way that I thought, well where did you come up with those numbers? And then PJM said, you're right, there was just too much flexibility in what people, the case that people could make, so we're going to go back to FERC and tell them, gee, we don't think we should be allowed to do this. We went to FREC and we thought FERC would say yes and FERC said, well, gee, we think you can do what you want us to say, but we're not going to be the ones to force you to do it, but we'll give you the right to do it. And what we're talking about is sort of depreciable life of assets, cost of capital, numbers that really swing. What could and couldn't be depending upon the kind of candidly subsidized contract you have in your back pocket.

So I think what FERC has done is said to PJM look, we understand what you're trying to protect against and we'll allow you to protect yourself against that, but we're not going to force you to do that. So in that stakeholder process we are trying to make the case that the quid pro quo is if somebody is not subsidized, then capital discipline is the responsibility of that entrant. But if they are subsidized , then they can play without showing that they actually bought the turbine for less than we bought the turbine. Or they have a site that fully benefits from interconnection in ways that others don't.

But if they're doing it by saying, gee, we have confidence that the forward price curve is going to do this, and to have that confidence because in their back pocket they've got a guaranteed payment stream, then that's a foul that you have to call timeout on. So that's what I'd like to see resolved.

SI-SSA-0015-05097

To a certain extent, we weren't affected by this, but I still would like to see some work done on it, is our people perhaps being confident in terms of the capacity they believe they can bring to bear, either because of transfer capability or DR or because of new build, that they're bringing to bear because of the intervening auctions, the incremental auctions. So let's make sure that people aren't bidding something new that really is the old stuff that is coming into play in-between the base residual auctions. So that one hasn't come back to haunt PSE&G or PSEG, I'm sorry, I should say. Showing my age. But if it's an imperfection that's affecting the west, it could start affecting the east and I'd like to see that fixed. But I put that number two just because of the impact that we saw LCAP create behind MOPR for us.

Daniel Ford - *Barclays - Analyst*

Any other questions for Ralph? Great, if there are not, I'd like to thank him very much for the presentation and there will be a breakout in Liberty 5.

MANAGEMENT DISCUSSION SECTION

Unverified Participant

Okay. Our next presentation is going to be from Public Service Enterprise Group. We have Caroline Dorsa, who is Executive Vice President and Chief Financial Officer to present the company's story. Caroline?

Caroline D. Dorsa

Thank you, [ph] Dan. (0:00:18) Good afternoon everyone, happy to be here with you this afternoon. As we've done in prior presentations, I want to give you a little bit of an overview about the PSEG story, some of the key things that we're focusing on for this year. I will do a little bit of a quick top-side overview, then talk a little bit about the utility, a bit about power and some of our financial key metrics and hopefully leave some time to answer any questions that you might have.

So, hit the clicker, here we go. As normal we always start with the forward-looking statement derived from our 10-K as you would expect and also our GAAP disclaimer, keep in mind that some of the numbers that I'll be discussing with you today are non-GAAP metrics like operating earnings that we believe are a good way to think about our business on a long-term basis and keep in mind the reconciliations to GAAP, which always appear at the end of our presentation.

So strategy, just to start at the very top in terms of our strategy, our strategy has been consistent for the last few years, and it focuses on those three key parameters that you see in the circles; operational excellence, disciplined investment and financial strength. We really do look to see our business reliably deliver cash flow from each of our businesses, and from those businesses we look for incremental growth-oriented investments, and on the power side with an environmentally friendly fleet; and on the utility side, investments that enhance the reliability and service delivery from our customers.

We do so by working with a balance sheet that we believe continues to give us the strength to pursue new opportunities, the opportunity to raise capital in the capital markets. Because of the strength of our balance sheet, raising debt has been easy for us in the capital markets. All of our ongoing investment opportunities that we see in the long-term and they are significant, and we'll talk about those, none of those require the issuance of equity. We don't see any investment opportunity scenarios that we can handle that would require us to issue equity because of the strength of the balance sheet.

So let me talk a little bit more then about our businesses. Let's just do the top side overview of PSE&G and PSEG Power, our two primary subsidiaries that comprise our holding company PSEG. So PSE&G, Public Service Electric and Gas, is our delivery and transmission company. You can see the 2013 data at the bottom of the slide, assets of about $20 billion and operating earnings in excess of $600 million last year. As I said, our strategy is to position this company to deliver good reliability to our customers both from an electric and a gas perspective, and support the state's energy policy goals and, of course, economic growth objectives for the state as well.

We have an $11.3 billion infrastructure program over the next five years that I'll talk about in a little more detail as we go forward, but that is where most of the investment is going at PSEG because there is a great opportunity to both

Bloomberg Transcript

Bloomberg

SI-SSA-0015-05099

return for our shareholders and provide value and service and reliability to our customers.

For PSEG Power, that's our competitive generation business. You can see assets in that business of about $12 billion, and operating earnings last year of slightly in excess of $700 million. You'll note that the power company was a little bit more than half of the earnings last year versus the utility. And this year, you will see from our guidance, you'll see that start to flip as we talk about guidance for our company for 2014.

In terms of the guidance overall for the company, here you can see our progression from 2012, 2013, and 2014. Our 2013 results $2.58 per share on an op earnings basis and our guidance this year of $2.55 to $2.75. At the end of the second quarter, we announced that our anticipation was to be at the upper end of the current guidance range. We did not change the range, but we did guide to be at the upper end of the range assuming normal weather and normal unit operation.

So if you look at the progression of where we have been to the upper end of the guidance range that we're talking about now, you would see potential for two consecutive years of growth in our operation earnings. And as you will see those have been driven significantly by growth in our regulated utility.

So in terms of the capital program for the company overall, you can see if you take a comparison and I think, this is an interesting comparison to look at for the business. When you compare the capital program of the company in the aggregate over the last five years, 2009 to 2013, you can see an $11.3 billion capital program of which $8.4 billion was the regulated utility. And you can also see the capital pieces for power and then you can see the piece that relates to transmission was over $4 billion. You can also see that maintenance CapEx in the shading, but the environmental CapEx in that blue shading, about $800 million over that period.

Now, if you look over to the right pie, these are the five years upcoming, including this year. And you see some interesting things in the overall investment program for the company in the next five years. First of all, you can see that the total program is $13.1 billion. The piece that is PSE&G is actually now over the next five years the same size as the entire company capital program over the past five years.

So ramped up the utility capital investment program very significantly. And when you look at the piece that is transmission, which is the blue shaded portion, you can see that over the next five years that is $6.8 billion out of the total utility $11.3 billion. So transmission continues to be a very important part of our capital program and a significant portion of our capital program going forward.

In addition to that, you can see solar and energy efficiency at the utility in orange and you can see the newly approved Energy Strong at $1.2 billion for the utility over the next five years as well. When you look down on the power side, you can see that for power, the investments are smaller, power does not need remediation for an environmental reason, so you see the environmental piece of power investment over the five-year period is about $200 million, so not that much is needed environmentally.

So most of what you see we're spending on is growth, and most of what you see we're spending on is at the regulated utility, where we have nice regulatory returns without a lot of regulatory lag, in fact very little has lagged at all on – or on the transmission side for formula rate returns. So a robust capital program that we look forward to delivering, and I think you can see from our history of delivering over $4 billion in transmission over the last five years, this is clearly a capability we have built and one that we really do know how to execute.

One of the questions that we've often gotten about our regulated utility profile is how we think about the future in terms of capital expenditures for the utility as the current things that we are planning start to become executed and go in service. One of the things that we've always done in our capital forecast, all the time, including the prior slide that I just showed you on the five-year, is we never forecast things on our utility capital program that are speculative. We only put things in our capital program, our capital forecast here that have been identified and assigned to us, so you can look at that five-year projection as what you should expect us to do.

This slide is actually a very interesting slide, I think, because what it is looking at is the picture of as we've stood in each year and we've looked at what our forecast has been from three years prior, two years prior and a year prior of

final
Bloomberg Transcript
Bloomberg
SI-SSA-0015-05100

what the capital spend will be in the relevant year that you see in each column. What we've shown here is actually what's happened for PSE&G is every year we've identified new things as we get closer to the year that we're thinking about for capital spend, such that, as we get to that year, it typically turns out to be higher than even our projections of the prior two years and three years.

And so that's really a discussion about the fact that we don't speculate in our capital program forecast. We've put in what we know and what's been assigned to us, but that we're always continuing to look for new opportunities to make those kinds of contemporaneous return or formula rate return regulated investments. And we've had some pretty significant success in driving up that utility capital program over the past years even from what our near-term forecasts have turned out to be.

So one of the things that we're quite proud of, in addition to all the work that we have done in growing transmission is that we have really enhanced our regulatory diversity both by having state regulated investment opportunities complemented by FERC transmission, formula rate investment opportunities. But although, we spend a lot of time talking about the size of the pie that relates to our transmission opportunities, I don't want you to lose sight of the fact that we have done a significant amount of investment and gotten a significant number of clauses over the past few years from the BPU at the state level.

And these have really been things that help support some of the state's goals, particularly around things like energy efficiency and renewables and also support economic growth and development in our state by things like gas main replacement or incremental infrastructure accelerator replacement.

And so when you look at the three categories here, we've had the opportunity to get incremental clause recovery, in addition to base rate for, if you add up the three pieces, about $2 billion worth of incremental clause recovery. So we think a very good track record of success in identifying, identifying those things that are valuable for our customers and valuable for our regulators; getting approval for those and doing so with good reasonable contemporaneous return approaches; and then of course executing, because if you don't execute well on the programs you previously have approved, you're a lot less likely to get new programs approved.

And all of these things we do think assist what we're trying to do as good citizens in the state, whether it's incremental solar to help the state meet its renewable goal, whether it's energy efficiency or demand response to help the state managing its overall energy footprint or whether it's things that have enhanced job growth like our capital infrastructure programs, the SIP 1 and SIP 2 or Energy Strong, which is the $1.22 billion program we recently had approved that responds to some of the challenges that we saw as a result of Superstorm Sandy and things that can give even enhanced reliability over our base reliability. And we're just in the process of getting started in spending that Energy Strong $1.22 billion.

In addition to that, we recently filed, just in August of this year, an additional $100 million in energy efficiency extension with the BPU to provide some additional energy efficiency opportunities for investments in our service territory as well. So one of the things we always said post Energy Strong is that we would still continue to look at more opportunities to make investments. And we certainly were not precluded from coming back to the BPU to propose other programs that could provide benefits to our bottom line, but also to our customers. And I think the evidence of that is the fact that we stepped up in August and made this incremental energy efficiency filing.

So a lot to do, I think a lot of success that we're very happy about in terms of our ability to deliver on many of these programs, and the opportunity to spend a lot more with this most recent Energy Strong filing, which really should give our customers enhanced reliability for the sort of challenges that we all – many of us experienced in this region with Superstorm Sandy.

If you look at our transmission spend, just one other view of it that I think is valuable, so as you think about this regulatory diversity and think about the federal aspects of our regulation, that $6.8 billion in transmission spend is what you see rolling out in the light blue. The historical bars from 2009 through 2013, we've broken them out by project in the various colors, you can see the amount spent on the various projects.

final
Bloomberg Transcript
Bloomberg
SI-SSA-0015-05101

But I think the interesting thing about this picture is you can see that we are well in excess of the $1 billion a year in transmission spend for each of the next few years. And importantly is the line. The line that cuts through the bars, as you go out from 2013 through 2017, that line represented – represents the height of the bars, if I had drawn this chart for you, when I was – we were here last year.

And so I think the interesting thing about it is another way to reinforce even on the transmission side as you see those bar heights start to come down at the backend, that line represented where the bars were last year and since then everything above the line is new things that we have identified that we're adding in transmission since last year. So PJM open windows, RTEP processes, identified reliability needs, things that have been assigned to us. We continue to find them. And I think if we took this back two years and drew the same line, the shape would be somewhat similar but again with the transmission kinds of needs in our area there seem to always be new things that we can capitalize on that we can execute and our track record of putting things in service, I think, has served us well, and the ability to step up for these incremental investments. So a lot to do. And I think the opportunities to continue to identify more things as we go forward.

Let me turn now for a few minutes to the power side of the business. I think many of you are aware that we have a very diverse fleet of assets at PSEG Power, about 13,000 megawatts, 13,400 megawatts. And you can see how those break out by capacity relative to gas being the largest from a capacity perspective and then nuclear a little bit more than a quarter. And you can see coal and the rest. Of course, by energy produced, the nuclear units run as base load as to the share we have in our KeyCon units, the Keystone and Conemaugh units in Pennsylvania.

And so you can see, of course, that nuclear has continued over the last few years to be over half of the generation that we've actually produced from the 54 terawatt hours that we generally have produced over the last few years.

And then in terms of the markets served, the way we describe it, we have a full suite of assets and I'll show you how that works up the dispatch curve. But we do have base load as well as load following and peaking across this suite of assets in our fleet. And we really do like having that full suite of assets. We think it gives us opportunities to bid on low contracts and things like that. And we spend a lot of time making sure that we run these assets very well.

So here is the diversity in terms of heat rate and dispatch diversity. You can see for PJM so this would not include our New York combined cycle nor our New England combined cycle or coal plants. But just in PJM you can see how our assets array across the dispatch curve all the way up through peaking assets with the nuclear as base load, the load following units, and then the peakers. So, we've always retained this full suite of assets. And as I said, we think that provides us a lot of opportunity and advantage and we see that advantage as something that is quite sustainable.

One of the other things that we also have is a gas asset portfolio – and I think this should click, there it is – which we think gives us a nice advantage. This is something we've had for quite a long time, but it's become a bit of focus in the last few years, because these capacity rights that we own, which are the bright green lines that you can see going both south and west, these are contracts for evergreen capacity right that Power owns, and it provides us with just a little less than half of our access for capacity from the Marcellus Shale, slightly more than half from the Henry Hub direction. And that has provided incremental reliability for our customers because one of the things that Power also is, is the supplier for the gas business for PSE&G, and the priority of this gas, both the pipeline and the storage, is for the residential customers. But after serving the residential customers and off system sales, which are shared between the customers and Power, then Power has access to use this gas for its units.

So we have seen benefits come as the differential, obviously as we all know, between the Leidy Hub and the prices in the East has widened and that started about a year-ago June, that having this access from both sources has both provided reliability and economics. We actually have given our customers gas price reductions for many years and actually we did as well give them a credit this winter when many people were having challenges providing fuel, we were actually giving our customers credit. So it's worked out very well for our residential customers, but it has also provided the opportunity for benefits for Power, because Power gets a portion, about 25%, over the entire year, but it's not a smooth distribution, it's bit of a lumpy distribution, again with residential customers first in the winter, but Power uses about 25% of its gas from the Leidy Hub. And last year that was worth about $0.05 a share to us. We've not disclosed our results obviously for the third quarter, but having access to both sources of gas is both reliability and

final

Bloomberg
SI-SSA-0015-05102

economic benefit for Power.

And these contracts are evergreen rights that we have for Power, and so we look forward to seeing this continue in terms of Power's access. How long that basis differential will continue, nothing is permanent, but if you look at the forwards that are out on Bloomberg, you know that there is an anticipation for the next few years to continue to see some benefit from having this kind of Leidy pipeline access as well as Henry Hub.

So in terms of how we think about putting those assets into the market, one of the things that Power has always had is a very consistent, not always, but for the past few years, a very consistent hedging approach. And we look at this by taking our fleet, the dispatch curve that I just showed, breaking it out between the base load and the intermediate combined cycle and peaking. And we hedge the base load on a ratable basis over a three-year period, such that in the current year you would anticipate that we would be at a 100% of the base load hedge before we come into the current year and then we start to hedge a little bit of the intermediate.

We'd never be 100% hedged. We typically are about 75% to 80% hedged total for the year when we come into a new year. And then as the winter and the shoulder quarter drop off and you've got a bigger representation of the summer, which is what you see here in the current year. You'd see that percentage go down because the summer is the period with the peakers that would naturally be most open on a weighted average basis.

So you can see our numbers now for 2014, 2015, and 2016 and you can see the hedged percentages here. We are about 70% to 75% because this is starting from July through the rest of the year, so again, a heavier representation of the summer month. And then for 2015, we're about 65% to 70% hedged, a little bit more than the mid-point of our target, a little bit more to the upper end of the ranges that we allow our traders to put on for hedges, took advantage a little bit in the second quarter of incremental opportunities to hedge just a little bit more, again within the parameters of our targets. And then about 30% to 35% hedge for 2016. You'd generally see the picture look like this on a consistent basis.

Again, we're a little more to the top end of our bands for 2015 and pretty much on target for 2016. For 2016 and certainly if you look out for three years, the markets are less liquid. So as we – if we moved up in our bands a little bit, it wouldn't always be for the current year or the prompt year. It would never be for few years out because the markets are less liquid. But we like to approach because we think it takes some risk off the table.

So we're not speculating on trying to guess the top and the bottom particularly in a multiyear basis. And then in the intermediate, the combined cycle of the peaking, that's where our traders really have incremental knowledge as they look at what's happening in the market either because of the weather or transmission outages and can position the portfolio most optimally to take advantage of opportunities in the near term.

The other piece, obviously, of Power's margin that is very important that we often talk about is what's going on with capacity prices. What I show you here, in the top line, is Power's average prices for the entirety of our fleet, and our fleet, of course, has no assets in the rest of pool, as you're probably well aware. And, so you can see the prices for our fleet. We came off the highest capacity price that we had for Power's fleet of $242 per megawatt per day, that ended on May 30 of this year, and we now come into the $166, which you can see $166, $165, we have very consistent capacity prices for the next four years based on the clears that are already known, which of course is distinct from the kind of prices you see in rest of pool, which have moved around quite a bit.

So, we had a lot of conversations about capacity prices over the past few years and where are they going. I think the thing that I want to emphasize for you as you look at this slide is, they're pretty steady, in fact they're very steady. We probably have the steadiest capacity prices of anyone because of the heavy representation in Eastern Mac, PSE&G Zone and PS North and that has worked out to mean really, really stable capacity prices.

You see some movements around relative to the size of our cleared capacity. The biggest delta you see there in our cleared capacity numbers between 2014-2015 and 2015-2016 are the HEDD units that we said we would be retiring the very older peakers in New Jersey. So, those pieces have moved around a bit. And then with some incremental auctions sometimes those numbers might move up as we come into closer to the current year.

SI-SSA-0015-05103

So in terms of the numbers then for each our businesses, just to give you some sense of where we are and what our forecast looks like, not just for the entire company, but also by business, you can see the $2.55 to $2.75, that I just mentioned earlier is the current guidance for 2014 with the expectation of being at the upper end of the guidance range, assuming the normal weather and unit ops. But I think it's also useful to take a look at the two businesses comprising the primary sources of our earnings.

And you can see that switch now happening with PSE&G relative to PSEG Power, you can see that the numbers for PSE&G and the numbers for power now start to switch that power being more than 50% to having utility being more than 50% of our earnings as we come into this year. And that's really driven by the double-digit earnings that the utility had delivered last year, and we forecasted out for the next two years. You're really seeing that come to fruition as those transmission spend gets put into service, as we earn on that, as we implement those cost programs, the utility has become a bigger and bigger piece of the total earnings of the company. And of course, while power has come down from what it was a number of years ago, and you can see that last year actually power ended up having more earnings than it did in the prior year. And of course enterprise/other really kind of captures all else that's going on in the business to get us to that picture of the $2.55 to $2.75 with regulated being somewhere from 53% to 55% of earnings.

So, we've really changed the picture around from what it was a few years ago. While power has come down, the utility has absolutely grown, so it's been not just a relative piece with power, it's definitely been an absolute because of the growth that we had in the regulated utility.

In terms of what the balance sheet looks like, in terms of our cash generation and where the monies are going, I like this slide because I think it's a really good way to see two really important things. First of all, on the cash sources, we used to always talk about power as the source of incremental cash flow and the source of free cash flow, because of this low capital needs. But I think, if you just look at cash from operations, you now see something that we started to see last year and has become more stark this year. And that is that the regulated utility is now the biggest piece of the cash from operations. So again the things that we've put into service, the contemporaneous return, the regulated utility is a significant cash flow generator, power still continues to generate cash flow. And then, we've raised debt consistent with PSE&G's capital structure, which is 51.2% equity and that's to support where the investments are going, which are so significantly into PSE&G.

So when you look at this picture, you can see that after the investment opportunities for PSE&G, power's capital investment, which is generally small and in this view, which is more aligned with our cash flow statement. power's capital investment here includes purchase of nuclear fuel. That's really to line up with the normal conventions, it's really not a capital investment. But you can see that power's cash is well in excess of what its capital needs are, which provides significant extra room and therefore room to support the dividend and support incremental investment without the need to issue equity. You see we have power's net debt going up slightly over the period from very strong perspective and power's debt-to-cap ratio ended last quarter about 32%. So we have a lot of room in power.

And that's really to support all the incremental investment we have in the regulated utility and of course, supports the shareholder dividend with absolutely no pressure on the balance sheet of the overall company or either of the subsidiaries.

Here's power's credit metrics. We showed earlier this year, you can see the key credit metric we look at consistent with power's credit rating is FFO to debt, and you can see we ended last year with FFO to debt in excess of 60% and our estimates over the 2014 through 2016 period still put us well in excess of the floor that we set consistent with our rating, which is 30% FFO to debt. So, what that means that means lots of room to consider incremental investment opportunities. That means we can continue to look long and hard as we have, and I think you've seen with some success for new investment opportunities that can drive good things for our customers, as well as results for our bottom line.

Operating earnings mix, as I mentioned earlier, you can really see that progression. And this is scaled to the size of the bar being 100%, so you're seeing that mix change. And you can PSE&G being such a significantly higher portion of the mix from 20% in 2009, and that's come from PSE&G's growth of over 18% – about 18% over that five-year period, Power has come down, but the utility has, on an absolute basis, gone up, which has been a great change in the mix of our business, given the current opportunities we have on the regulated side.

final
Bloomberg Transcript
Bloomberg
SI-SSA-0015-05104

And then, I can't end any presentation without some discussion about where we are on the dividend. You can see our dividend progression in terms of our 10-year progression of dividend growth of about 3.8%. And we did just about that in this year's $0.04 increase from $1.44 to $1.48. Payout ratio in terms of where we are this year, just taking the midpoint of our guidance is about 56%, so we're in great shape relative to payout ratio, no pressure there. You can see from the cash flow and the credit metrics, obviously no challenges to the current dividend.

We also put in PSE&G EPS again to midpoint of guidance, and you can see the guidance range in the shaded. We show that because a lot of investors have interest in understanding kind of on a theoretical basis how much of your dividend is actually supported by your regulated utility earnings. And you can see for us it's almost all of it this year, given the strength of the growth of PSE&G's earnings per share. And of course, while we don't have a particular target for our payout ratio, our dividend policy is noted on the top, not changed. We have the opportunity for consistent and sustainable dividend growth. Take a look at our long-term history, our current-year history and obviously the strength of the dividend and where we're going in terms of our investment opportunities providing the ability to continue to look to that as an important source of our shareholder return.

So that completes my prepared remarks. And with that, I'll be happy to open it up to any questions from the audience or from [ph] Dan (0:31:27) and thank you all very much for your attention.

Q&A

<Q>: Great. Thanks very much Caroline. Questions from the room we have a microphone coming around. But I guess first I'd like to start it off just by asking about some of the debate that's going on at PJM around capacity changes for next year, the new product, and what your thoughts are around both the motivation and what the outcome of those changes might be?

<A - Caroline D. Dorsa>: Sure. Great question. Thanks [ph] Dan. (0:31:54) It's something we've been talking about a lot today in the one-on-ones and the breakout. So we think that the motivation and the goal which is to provide that incremental reliability given that near but not issues but the near to issues that we saw with the polar vortex and also with the impending retirements of some of the coal units which appear to be real that many folks are looking to retire that there is value in considering how we address incremental reliability needs for PJM so that they can continue to deliver for the customers. So we think that makes a lot of sense and those units that provide that kind of base load reliability and can step up for incremental performance parameters, getting incremental value with penalties that go along with not performing that, it's fair, is the right kind of conversation to have.

In terms of where we are, of course, these are comment period in September. We are part of a stakeholder process. There will be a management board meeting in November, don't know how this will progress or what speed it will progress with. I think the right issues that we're all talking about, I'm sure, others among the generators are talking about as well, relate to what are the performance standards, how firm is firm fuel supply, how will that be addressed, what will count, what kinds of outages like transmission-related outages won't count toward the penalty, what about other outages, the ability to have capacity generation that isn't collecting capacity payments substitute, if you have an outage on an incremental reliability unit. And then that balance between what you might need to do to qualify versus what the penalties are, and what you would get as the incremental payment to make sure that that balance is fair, so that you're incented to make whatever investments you might need to enhance your reliability and be able to count on that stream of value for a number of years, so that that investment is worth making.

So all of those parameters, I think PJM was trying to address in its – in what they put out in draft. And there will, I'm sure, be lots of comments and lots of discussions. So we like the theory, we like the approach, it's now all about the balance among those very many factors to get the balance right, so that the units that really can provide more are incented to do it, are measured to do it, get pay to do it, with, of course, the offset on penalties if they don't.

<Q>: All right. Thank you.

Bloomberg

<Q>: As the growth rate of the PSEG is outperforming the Power's, what do you expect the mix will be, say, two years, three years from now? Will that continue to change from what the current ratio?

<A - Caroline D. Dorsa>: Yeah. So it's a good question. We don't forecast Power other than the current year, because of the issues of, obviously the changes in the forward curve and not being a 100% hedged as we go out.

We're pleased to see the utility grow to be more than half this year. You may remember, last year, we were actually forecasting the utility and Power to be closer to 50%-50%, but then Power did really well, that we raised the guidance last year, because of Power and that was really resulting of the things that we were able to do in Power and the prices.

So can't really forecast it, I think, you should consider that you'll still see the utility be this robust portion of our earnings and still has lots of growth opportunity ahead of it with its capital program. So I don't want to give a particular number, but I think you should think about just continuing to see the regulated being not more than half [ph] the units. (0:35:37)

Unverified Participant

And with that, I think we'll have to move to our breakout session, which will be in Liberty 5 where we will have time for more questions. Thank you very much, Caroline.

Caroline D. Dorsa

Thank you, [ph] Dan. (0:35:46)

MANAGEMENT DISCUSSION SECTION

Unverified Participant

All right. Our next presentation is Public Service Enterprise Group. We've got Dan Cregg, who is Executive Vice President and Chief Financial Officer, who's going to take us through the [ph] page. So, Dan? (0:12)

Daniel J. Cregg

Thank you, [ph] Dan, (0:14) good afternoon, everybody. I'll work swiftly through our forward-looking statements and GAAP disclaimer to get to – me to the presentation. And I think in summary, if you think about PSEG, I think you really think about two strong businesses. I think we have PSE&G, a New Jersey-based electric and gas regulated utility, both distribution and transmission. It's got about a $12 billion infrastructure program over the next five years, which will generate high single-digit rate base growth through 2020. I'll give you a little bit of color on that as we move forward.

And then on the other side of the ledger, PSEG Power. We're changing a few things at PSEG Power with respect to the fleet. We've seen some change out of some older units in the last few years, what we call our HEDD units, some older peaking units, and have an investment program to replace that with some combined cycle units, I'll also talk about in a little bit. Very strong cash flow generator at PSEG Power, which help support the business in the aggregate.

But think about the overall operating philosophy of the company, it's a philosophy that we have used for many years, three parts, and it all starts with operational excellence and that all starts with our employees. And the thought process frankly is very simple, to the extent that we can operate what we operate with excellence that will earn us financial strength. So, operating units that we know how to operate and operating them well will generate financial strength. And with that strong financial position, we will deploy that on a disciplined basis back into the business. And in doing so, we have seen positive results over the years.

The last three years we've seen increases in our operating earnings on an EPS basis. Our dividend growth, extremely important to our shareholder base, has continued to grow over the years, and I'll touch on that a little bit in a couple of slides, and really, best-in-class utility rate base growth, and like I talked about the increase in the efficiency of the fleet as a whole with our construction program around a couple of combined cycle units that we are currently building.

So, this gives you a snapshot of the overall capital spending of the business through two pie charts. On the left-hand side we look backwards, and over the last five years, we invested $14.3 billion in the business. And on the right-hand side, looking forward, $16 billion prospectively over the next five years. A couple of things jump out as you look at the pie charts, both the past and the future, same – relative proportion of spend between the two businesses. So, roughly a 3:1 basis utility versus Power spend both looking backwards and forwards. And within the utility side of the business, you can see that light blue area, transmission, $7 billion over the last five and a forecasted $7.1 billion over the next five. That equates to about 60% of our utility investment in both of those time frames. So fairly consistent investment profile.

Bloomberg Transcript

As you look forward in the next five years, investments in some clauses or trackers that we have ongoing both related to GSMP, or Gas System Modernization Program. What that program does is replace a host of cast iron pipe that's in the ground and we – the magnitude of cast iron pipe that we have in the ground that equates through about a 30 year run to replace all that pipe. So, it's one of the largest cast iron systems that's in the country that has a need of an overhaul. And on the Power side of the business, you can see there is a $3.9 billion investment over the next five years. A little over half of that relates to the new combined cycle units that we're building; one in Maryland, one in New Jersey, and one in Connecticut.

So, if you take a look first at the utility side of the business and you look at the rate base growth, strong rate base growth looking back over the last five years. The compounded annual growth rate of our rate base growth has been about 11%, and the depiction that you see also plays out pretty clearly where most of that growth has come from over the last five years is investment in transmission. You can see that from the dark blue component of the bar charts that you have.

Also, you see an orange line that moves through that, that is a PSE&G EPS number over the last five years, tracking closely to rate base growth. And the way we think about that is from the standpoint of the moderate load growth that we have seen, there needs to be a very strong control on the O&M side of the business. So, those two have offset one another pretty closely to let us grow by our utility earnings at a rate that's very close to what we've seen from the rate base growth as well.

Thinking more on a forward look with the same type of information. Looking at 2011 rolling out to 2016, again, this is rate base growth and our forecasted rate base growth on a compounded annual growth rate is 8%. So, those are the numbers we have put forth. We have also talked about the potential for incremental investments that could move that 8% rate base growth up to 10%. Those items in particular would include the continuation of that Gas System Modernization Program that I talked about. So, continuing to replace the cast iron that's in the ground.

Also, we have a program that we have implemented in response to Superstorm Sandy and that was a $1.2 billion program that was put in place based upon a $2.6 billion initial ask. So, additional work that follows on from that initial request is another area where we could see some potential upside to that rate base growth. And then, in addition, we have a renewable filing that's in right now with the BPU earlier in the year. We filed for a $275 million filing with the BPU for solar, and also opportunities within energy efficiency.

So, this gives you a little bit of an indication as to the overall make-up of our rate base, and the components that are there as well as the overall net income picture that has come from it. And by 2020, incremental growth anticipated beyond what we have shown in our baseline numbers.

Moving to Power. We have seen incremental growth on the Power side of the business through three particular opportunities that we are investing in over the next couple of years. In particular, to walk through each of them, we are constructing a 755 megawatt combined cycle facility in Maryland, the Keys Energy Center. It is in Southwest MAAC, and at an estimated cost of $825 million to $875 million.

That facility is in an area where we feel that there is the potential for stronger load growth than most areas within PJM. Also brings to us the value of having the output of that plant very close to PJM West. So, the correlation between that liquid hub at PJM West and the output of the facility gives us a good place to hedge the output of the Keys Energy Center. And that facility will go into service in 2018.

In addition in New Jersey, at Sewaren, we've had a facility there that's been in place for 70 years and really has run its course, and last year, we bid into the capacity auction to clear a new unit at Sewaren. So, that would be replacement capacity at the Sewaren site in EMAAC, a 540 megawatt unit. That unit would also go into service in 2018.

And then lastly, at Bridgeport, in Connecticut, a 485 megawatt combined cycle unit that cleared in the most recent New England capacity auction. That auction – the way that the New England capacity market works is that new capacity into that auction would see a seven-year lock on capacity prices. So, with that stable capacity price rolling out for the first seven years of operation gives a good stable base to work off of. That unit would go in service in 2019 and there are conditions in place that as that unit goes forward and gets its permits, it would anticipate that a coal unit on that same

final
Bloomberg Transcript

site would shut down in 2021. So, also replacement capacity in the Connecticut market for that unit.

What that means from the standpoint of overall capital spend at Power, you can see on this next graph. And what it shows you really in two pieces is a fairly steady run rate of capital across the Power business of about $200 million to $300 million a year to run the business. And on top of that, over the next couple of years, that light blue area that you see is the spend that we have for the construction of these three units.

This unit – this capital spend would be covered by operating cash flow. So during this construction period, we are free cash flow positive with no need for any equity issuance throughout the entire five years of our business planning period. And then, this next slide gives a little bit of an indication as to what the new fleet would look like on the other side of this capacity build. So, two parts to this slide, on the left-hand side, gives you the megawatts that we have in our fleet.

And if you look on the bottom, there's a small pie chart, shows you the 2015 pie chart of the fuel diversity that we have within our existing capacity. And as you move northeast on that left-hand side of the graph, you see what it will look like in 2020. So, an increase in the blue part of that graph which really represents the combined cycle capacity within the total Power fleet; a moderate decrease on the nuclear side, not from any decrease in nuclear, but from an overall increase in the size of the fleet as a whole; and then a small contribution from the coal part of the fleet.

And on the right side, we go more to 1 gigawatt hour energy produced snapshot. So, same concept, looking at 2015 moving into 2020, how the output from the fleet will change over time, and we'll see an increase from about 35% to an estimated 42% of the output coming from the combined cycle units. And our nuclear units will stay at about 50%, the forecast is 49% there. And a fairly small contribution coming from the coal part of our fleet, really only 8% of the output.

Touching on that coal part of the fleet, we announced today through an 8-K that last week we had submitted to both PJM and the PJM Market Monitor a request for an exception to the must-bid requirements into the upcoming May of 2017 reliability pricing model auction that will take place. Those two stations have not cleared in each of the last two capacity auctions within PJM and what will happen is that the Market Monitor will take a look at that submission and make a determination where they will get back to us by December 1 for an exception to the must-bid requirement within PJM. And in parallel, during that timeframe, we will be making an evaluation of the path forward for those two units.

Again, they have not cleared the last two auctions and you can see here a fairly low capacity factor over the last couple of years. So, the thought process is that as PJM tries to make a determination as to what capacity will come to market in the upcoming auction, this kind of indication will give them a sense as to those units who are looking to have a choice with respect to what they do with the units. So, we will know more by December 1 or before about what the path forward is as we move into next year's capacity auction.

And then, one final slide looking at Power. If you take a look at the total energy produced in 2015 of 55 gigawatt hours and try to think about how much of what that output is in addition to capacity has been secured on a go forward basis, really there are two functions that help to get us to what it shows on the right-hand side of the page. And the right-hand side of the page basically reflects in the green that the three-year forward capacity market in PJM, plus what we see from the standpoint in New England and New York, would secure about 32% of our revenue for the 2016 to 2018 timeframe. And in addition, our three-year ratable hedging program would secure about 40% of the energy margin that we have.

So, if we take a look at that as a whole, about two-thirds of the revenue for Power is secured for the next three years, and as we step forward and continue to hedge and continue to enter into capacity auctions, that number will continue to move as we forward. So, a fairly stable base to move off of prospectively for Power.

A quick look at the balance sheet and really looking at sources and uses for 2016 to 2018, this is for PSEG as a whole. Taking a look for 2016 to 2018, the biggest source of cash for the business really is cash from operations and you see that on the left side, far and away the biggest magnitude of the sources of cash, but also supplemented this year and during 2016, 2017, and 2018 by the extension of bonus depreciation. So, we saw about $1.2 billion at the utility come

final
Bloomberg Transcript
Bloomberg
SI-SSA-0015-05109

to us from bonus depreciation in our forecast, as well as about a $0.5 billion on the Power side of the business from the spend we have there. All contributing to sources of cash for the business.

PSE&G's net debt, you can get a sense as to what we're going to see incrementally on the debt side. If you think about the capital program that we have at PSEG (sic) [PSE&G] (14:27) for over five years, $12 billion, for 2016 through 2018 we will match that roughly dollar for dollar, we have about a 51% equity percentage on the regulatory basis at PSE&G. So, we will match our debt with our equity at PSE&G. And then a fairly small component of Power and parent debt, which round out the overall cash from the business in the next three years.

On the right side, the uses of that cash. Most of the investment that we're making is growth investment. If you think back to those two pie charts that we showed you it's the combined cycle units that we are building, it is also the transmission spend that we have, and most of the spend on the distribution side of the business.

And then finally the shareholder dividend. So, none of this reflecting any equity issuances and no equity issuances in the five years of the business plan. That gives you a little bit of a sense as sort of sources and uses of cash. What that translates into from an operating earnings perspective, you see an increasing contribution to the overall operating earnings from the utility part of the business. So, regulated moves from a 43% contribution to a 62% contribution as we move from 2012 into 2016. Continuing contributions come from those clauses that I talk about from the transmission business that we have and the contemporaneous nature of the formula rate on the transmission business helping to grow the overall earnings of the business from a regulated perspective.

Those earnings translate themselves into dividends. If you take a look at the growth in the dividend, we've been over 3% growth since 2012 and last year we saw a 5.1% increase in our dividend from 2015's indicative dividend into 2016. That represents a 57% payout ratio if you look at it from an enterprise perspective and that dividend can be covered in its entirety from the utility earnings. And what we said on a go-forward basis with respect to the dividend is that we do expect to have the potential for consistent and sustainable growth in the dividend going forward. We don't do it on a formulaic basis; we don't provide exactly how we get to that number. We have the two businesses that we put together and look at what makes sense from the overall standpoint of the business mix for a dividend policy and we look at that every year.

So, looking forward, continuing to operate well is critical to both sides of the business as you can see on this slide. Executing on the capital program at both businesses. So, $16 billion in the aggregate over the five years related to the clauses in transmission and the combined cycle units on the Power side of the business. We look for continued improvements in the regulatory framework and I would say that on the regulated side of the business, on the distribution side, we've continuously moved forward with clauses and trackers with the regulated business.

And as we look forward to the extent that that can be simplified and moved into more of a longer-term infrastructure program, we think that that works better from the standpoint of the continuity of the work that needs to be done from the employment capability of the folks that we are hiring to have a better long-term view as to what we're doing from the business perspective. So, the regulatory framework that we talk about really referencing the potential to have more long-term infrastructure programs is an objective that we have.

And then continuing to look for growth opportunities. One thing that we always note is that our capital program as we go through our five years reflects what we know, and we know more about the next few years than we do about the tail-end of our plan. So, we tend to forecast a capital program that looks like it dips down over time. And as we step in to the next couple of years, we have historically tended to find ways to fill the back as opportunities have come up. And that will be a component that we will continue to look for from the standpoint of reliability for our customers.

And obviously, running the units well and touching on advocacy of constructive market rules. And maybe there, the most important element is the new price formation rules that PJM is looking at and trying to make sure that the elements of how the market is priced, how start-up costs, how load is forecasted, the periodicity with which payments are made compared to how units are bid becomes a fairly important component to make sure that units are getting the right price signals that they should.

final
Bloomberg Transcript
Bloomberg

And then lastly just to touch on Long Island, we do have the operating agreement for the Long Island Power Authority that has been in place for a few years, and I will say that folks have done a great job to execute on that. And that transition has been well executed, and I think the results that we're seeing in that business are exactly what we had hoped that they would be.

So, in summary, a stable platform between the two companies with predictable earnings and a robust investment pipeline. PSE&G, I think easily called a best-in-class utility with a very strong growth profile; and Power increasingly an efficient fleet. If you take a look at some of the units that have done their time and moved on, and with some of the new units that are coming on, we will be a very clean fleet and a very efficient fleet. And lastly, a very strong balance sheet, strong credit ratings, and the ability to execute on a $16 billion capital program without the need for any equity.

So with that, I'll be happy to take your questions.

Q&A

<Q>: And there is a microphone. There is a question in the back there.

<Q>: I missed your comment about those three new units, three newbuilds. Are those contracted power or they will be sold in the market on a competitive basis?

<A - Daniel J. Cregg>: They're merchant facilities and they are not contracted on a long-term basis but for the fact that there is a seven-year capacity lock in New England. So, those will work their way into our normal hedging program as we step forward.

<Q>: So, to follow-up, what kind of returns can you get from that investment of $1.8 billion or so on those units?

<A - Daniel J. Cregg>: So, we don't provide what our hurdle rate or anything would be, but I will say that, that as we've gone through those analysis, they met our requirements.

<Q>: Are they more in line with the existing assets, or are they better or they're worse?

<A - Daniel J. Cregg>: I would say that they met our requirements as we went through our analysis.

<Q>: [indiscernible] (21:25)

<Q>: When you look at price formation rules and thoughts on PJM, what are your thoughts on price formation rules around assets with environmental qualities like nuclear?

<A - Daniel J. Cregg>: I think that's a secondary aspect of what I've seen from some of the price formation elements within PJM. I think part of the disjoint between the nature of the duration of the bids, be they hour long or five-minute settlement, it's more of those kind of elements for units that are on and off, for units that are ramping up and ramping down, that's more where the focus has been I think with respect to trying to tighten up those rules, and make sure that the right signals are out there, so that the market can work more efficiently.

<Q>: Two follow-up questions. Sort of [ph] process ahead (22:33) on getting approval for the $275 million renewable spending, and then, any outstanding approvals you need for moving ahead with the new CCGT plants?

<A - Daniel J. Cregg>: Yeah. So on the – with respect to the solar filing, there are requirements in New Jersey for those types of filings, for once a filing is deemed complete, that they would be completed within – a decision would be made within 180 days. So, I think that's a reasonable timeframe to expect and they were deemed complete around mid-year. So, I would say around the turn of the year is the right time for when we would hear back on the solar projects.

And then with respect to the combined cycles, various plants in various stages of the permitting, so I think we will continue to step our way forward in that process over the next year or so, and then the rest will just be the construction side of things. So, more permitting going on in Connecticut, and the other two plants which are a year ahead from the standpoint of a service date are a little bit ahead on the permitting as well.

Forward-Looking Statement

Certain of the matters discussed in this communication about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com.

These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient coverage or recover proceeds of insurance with respect to such events,
- cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as competition from certain transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies and changes in customer behaviors, including energy efficiency, net metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slide A at the end of this presentation includes a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

CHIEF FINANCIAL OFFICER

Kathleen Lally

VICE PRESIDENT –
INVESTOR RELATIONS

PSEG

We make things work for you.

SI-SSA-0015-05116

PSEG's Strategy – delivering results

Our businesses' focus on cost-effective, reliable operations yields strong cash flow

We are funding growth-oriented investments aligned with customer needs and state energy policies

We are enhancing the competitiveness of our environmentally well-positioned generation business

The results of our financial strategy support a credit profile capable of meeting our corporate objectives and providing sustained dividend growth for our shareholders

SI-SSA-0015-05117

Two complementary businesses

Strong asset platform, performing well and positioned for the future

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Positioned to meet customers' needs as we respond to state and federal energy policy and economic growth objectives **Value Proposition:** A $10 billion infrastructure program - focused on transmission – that produces double-digit rate base growth through 2016	**Strategy:** Fuel diverse fleet is geographically and environmentally well positioned, with investments to enhance competitiveness **Value Proposition:** Provides substantial free cash flow in current environment and poised for price recovery
2013 — Assets $20B Operating Earnings $612M	2013 — Assets $12B Operating Earnings $710M

SI-SSA-0015-05118

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2013.
PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT, PSEG LONG ISLAND AND ENERGY HOLDINGS ACTIVITY.
SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

Delivering on commitments and pursuing opportunities for growth

Operational Excellence

- Power: Record 2013 output at Linden CCGT and Salem 2; nuclear capacity factor greater than 90% for 9th straight year
- PSE&G: Mid-Atlantic Reliability Award (12th consecutive year)
- PSEG Long Island: Went "live" on January 1, 2014
- PSEG: Cost-control benefits continue

Financial Strength

- Strong cash flows supported credit rating increases
- Pension more than fully funded
- Dividend increased

Disciplined Investment

- PSE&G
  - ✓ Transmission capital program execution and growth
  - ✓ Energy Strong program under discussion
  - ✓ Solar 4 All Extension and Solar Loan III programs
- Power: Investments to enhance the fleet's competitiveness – 130 MW Nuclear uprate, 150 MW CCGT uprate and efficiency improvement

SI-SSA-0015-05119

Operating Earnings Guidance

Building on the successful implementation of our strategy

Maintaining a robust capital program focused on growth

PSEG 2009 - 2013 Capital Spending $11.3 Billion	PSEG 2014 - 2018E Capital Spending $11.8 Billion

NOTE: POWER 2009–2013 ACTUALS ARE RESTATED TO INCLUDE SOLAR CAPITAL SPEND. POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. E=ESTIMATE

PSEG's business profile has been transformed through significant growth in utility capital spending

SI-SSA-0015-05123

Energy Strong Proposal recognizes need to strengthen and harden the distribution system

- Energy Strong is:
  - ✓ A $2.6 Billion investment program over 5 years as the first phase of a 10-year, $3.9 Billion infrastructure program
  - ✓ Proposal is based on contemporaneous recovery of investment, subject to NJ Board of Public Utilities (BPU) review
- Energy Strong proposal would harden 29 electric substations, modernize the gas distribution system, make the grid smarter, and improve the system's ability to communicate with customers
- Over 100 New Jersey municipalities support Energy Strong
- Proposed Energy Strong program would create approximately 5,800 jobs and stimulate NJ's economy

SI-SSA-0015-05124

PSEG Power – Value-advantaged through asset diversity, fuel flexibility, location and installed environmental controls

SI-SSA-0015-05125

PSEG Power – Our diverse fleet and flexible portfolio allow us to capture opportunities arising from market volatility

SI-SSA-0015-05126

PSEG

*AT THE BEGINNING OF EACH YEAR. **EXCLUDES BGSS.

Balance Sheet Strength

2009 – 2013: Reduced risk profile and transformed business mix

- Invested $8.4 billion in PSE&G
- Improved credit ratings
- Monetized and de-risked Holdings' portfolio

2014 – Forward: Strong cash flows and increasingly regulated business mix fully support:

- PSE&G's $10B approved investment program through 2018
- Consistent and sustainable dividend growth
- Additional investment capacity to deploy in opportunities beyond those in the current capital plan
- No need to issue equity

SI-SSA-0015-05127

Where we're going … actions taken to focus on more predictable growth

Growth in rate base is driven by investments with constructive recovery mechanisms

SI-SSA-0015-05137

Successfully worked with regulators to develop multiple solutions for New Jersey's energy and economic development goals

RENEWABLES – creative solutions to install solar generation: $0.7B

- Solar Loan I – 2008
- Solar Loan II – 2009
- Solar 4 All – 2009
- Solar Loan III – 2013
- Solar 4 All Ext – 2013

ENERGY EFFICIENCY – assisting customers with controlling energy usage: $0.3B

- Carbon Abatement – 2008
- Energy Efficiency – 2009
- Demand Response – 2009
- Energy Efficiency Ext – 2011

DISTRIBUTION – improving the electric and gas delivery infrastructure: $1.0B

- NJ Capital Infrastructure Program 1 (CIP 1) – 2009
- NJ Capital Infrastructure Program 2 (CIP 2) – 2011
- Energy Strong – Pending

Invested ~$2.0B through 2013; plan to invest additional ~$0.3B through 2018 in approved programs

SI-SSA-0015-05138

NOTE: SPENDING THROUGH 2013 UNLESS INDICATED OTHERWISE

A 40% increase to $10 billion, in our 5-year investment program, with further opportunity from Energy Strong

PSE&G's Capital Expenditures

2013-2017E
$7.0 Billion

2014-2018E
$10.0 Billion

■ Distribution ■ Solar/Energy Efficiency ■ Transmission

SI-SSA-0015-05139

PSE&G's capital program has been expanded and continues to focus on delivering energy solutions

E = ESTIMATE

PSE&G's capital program could expand further with the addition of Energy Strong

E = ESTIMATE

SI-SSA-0015-05141

Energy Strong filing for resiliency and hardening to support customers' needs in the wake of Superstorm Sandy

- Filed 5-year $2.6 billion capital program with NJ Board of Public Utilities (BPU) in February 2013
- Program addresses system resiliency and hardening by:
  - Protecting distribution substations from severe storms
  - Making the electric grid smarter and easier to repair
  - Adding backup distribution lines and system redundancies
  - Moving overhead distribution lines underground
  - Modernizing the gas distribution system
- Currently in confidential negotiations with Staff of BPU and major intervenors; hearings conclude March 7, 2014
- Anticipate a final order following either settlement or litigated decision by the end of April 2014

SI-SSA-0015-05142

Over 70% of PSE&G's $10 billion investment program will be recovered through contemporaneous mechanisms

2014-2018E PSE&G Capital Spending by Recovery Method

$10.0 Billion

Clause Recovery Mechanisms

- Solar/Energy Efficiency

FERC Formula Rates

- Transmission

Traditional Recovery Mechanisms

- Distribution Base Rates

SI-SSA-0015-05143

The Energy Strong impact to customer bills is expected to be fully offset

OUT-YEAR BGS/BGSS, SBC, AND DISTRIBUTION RATES HELD CONSTANT AT CURRENT 2014 RATES.
RATES RELATED TO ELECTRIC RESTRUCTURING: SECURITIZATION (STC), NON-UTILITY GENERATION CHARGE (NGC), & TRANSITIONAL ENERGY FACILITIES ASSESSMENT (TEFA), ARE REDUCED TO ZERO BY 2017. THE RGGI RECOVERY CHARGE (RRC), SOLAR PILOT RECOVERY CHARGE (SPRC), AND CAPITAL ECONOMIC STIMULUS INFRASTRUCTURE INVESTMENT PROGRAM EXTENSION (CIP II) BILL IMPACTS ARE INCLUDED IN THEIR RESPECTIVE GAS AND ELECTRIC BARS AND FORECASTED IN OUT-YEARS BASED UPON LATEST ESTIMATE. ENERGY STRONG BILL IMPACTS ARE BASED UPON CURRENT FORECAST.

SI-SSA-0015-05144

PSE&G TRANSMISSION

PSEG

We make things work for you.

SI-SSA-0015-05145

Transmission has delivered, and has grown to represent ~36% of rate base

Transmission represented ~36% of rate base at YE 2013 up from ~15% at YE 2009

SI-SSA-0015-05146

PSE&G's existing major transmission

investment program remains on schedule and on budget

Major Transmission Projects

	Approved ROE	Inclusion of CWIP in Rate Base	100% Recovery of Costs Due to Abandonment	Project Estimate Up To ($ Millions)	Expected In-service Date
Susquehanna-Roseland	12.93%	✓	✓	$790	June 2014 / June 2015

Northeast Grid Reliability consists of upgrading approximately 50 overhead circuit miles of 138kV transmission line to 230kV, constructing ~18 miles of new underground 230kV lines, and converting/upgrading 12 existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$907M	$228M	June 2015

- PJM RTEP project b1304
- ROE of 11.93% (including 0.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment
- Project estimate has increased ~$12M associated with hardening related scope changes as a result of Superstorm Sandy

Customer Benefit: Improves reliability and increases transfer capability

Project Status: Nearing completion of engineering/design and licensing/permitting phase. Outside and inside plant construction are in progress

SI-SSA-0015-05149

North Central Reliability consists of upgrading 55 circuit miles of 138kV transmission line to 230kV, and converting six existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$390M	$349M	June 2014

- PJM RTEP project b1154
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves power quality and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction is essentially complete, commissioning is in progress

SI-SSA-0015-05150

Burlington-Camden 230kV consists of upgrading 37 circuit miles (30 miles of overhead and 7 miles of underground) of 138kV transmission line to 230kV, converting the existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$399M	$301M	June 2014

- PJM RTEP project b1156
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses voltage reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside plant construction is complete, and inside plant construction and commissioning is in progress

SI-SSA-0015-05151

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$435M	$122M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses thermal reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-05152

Bergen-Linden Corridor is a recently approved project which will provide a double-circuit 345kV line to maintain reliability

Project Estimate Up To	Through Year-end 2013	Expected Completion Date
$1,200M	-	June 2018

- PJM RTEP project b2436
- 30 miles of underground cable
  - New ~ 23 miles
  - Reconductor (Upgrade of 138 to 345) ~7 miles
- 13 miles of double circuit overhead conductor (replacing double circuit 138 with double circuit 345)
- 11 station upgrades to 345kV

Customer Benefit: Addresses thermal and short-circuit reliability

Project Status: Engineering

SI-SSA-0015-05153

Planned transmission spend of $6.8 billion

is driven by PJM reliability projects, 69kV conversions and life-cycle replacement projects

E= ESTIMATE

SI-SSA-0015-05154

PSE&G's processes and culture are the foundation for project execution success

People

- Diverse, well-rounded team
- Culture with a focus for on-time, on-scope and on-budget execution
- Successful recruitment, development and retention strategies
- Strong unions and supplier relationships

Process

- Cradle to grave project execution organization
- Processes designed to be scalable, repeatable and improvable
- Emphasis on best practices and lessons learned sharing
- Improvements driven by performance metric management

Environment

- Collaborative relationship with regulatory agencies
- Innovative design and construction practices to minimize environmental impacts
- Robust environmental compliance system

SI-SSA-0015-05155

PSE&G's demonstrated ability to successfully execute large projects leaves us well positioned to pursue new opportunities

- Future RTEP as identified by PJM
- Near-term participation in RTO competitive open planning windows
  - PJM
  - MISO
  - NYISO
- Anticipate participating in future competitive solicitations under FERC 1000

PSEG LONG ISLAND

PSEG

We make things work for you.

SI-SSA-0015-05158

PSEG was selected to operate Long Island Power Authority's (LIPA) electric transmission and distribution system for 12 years starting in 2014

- Pursuant to the Operating Services Agreement (OSA), all expenses and capital costs to operate the system are pre-funded by LIPA and passed through to their customers
- Compensation consists of a fixed fee and an incentive fee
  - Fixed compensation fee for 2014 with scheduled increases in 2015 and 2016
  - Starting in 2015 PSEG Energy Resources and Trading (ER&T) begins managing fuel/energy contracts
  - PSEG Long Island expected to contribute $0.03 to operating earnings in 2014 increasing to $0.07 per share in 2016 including contribution at ER&T
- Potential for an 8-year extension of the OSA

SI-SSA-0015-05159

PSEG Long Island commenced operations

on January 1, 2014

Key elements of Operating Services Agreement

Increased PSEG scope and control	Use of PSEG brand as PSEG Long Island	3-Year rate freeze (2013-2015)
Performance metrics	NY Department of Public Service oversight	Potential for "Utility 2.0" investment

Early performance

Successful transition to PSEG Long Island	Stakeholder communication	Winter storm response

SI-SSA-0015-05160

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-05161

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-05162

Agenda

- Delivering Value
- Fleet Advantage, Location, Flexibility and Fuel Diversity
- Nuclear Operation
- Fossil Operation
- Financial Performance
- Expansion Opportunities
- Regulatory
- Engaged Workforce

SI-SSA-0015-05163

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units continue to achieve strong operational results, operating at over 90% capacity factors for the 9th consecutive year • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing conditions • Linden CCGT and Salem 2 nuclear unit achieved record output in 2013	• "Getting the most out of existing fleet" • Locational advantage • O&M control programs have delivered a CAGR of 1.6% between 2009 and 2014 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-05164

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2013 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch • Completed 19 MW solar project, 4 MW project under construction, established robust pipeline • Nuclear ESP is expected in 2015

SI-SSA-0015-05165

PSEG Power met 2013 challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• SuperStorm Sandy impacted our generating sites • Cold and hot weather extremes created challenging operating environment, but also presented opportunities		• Unit outages and planned transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Optimized unit dispatch across fleet during storm recovery • Expedited return from storm outages, restored margin opportunities • High availability when needed • Achieved fuel cost savings • Captured value through coal/gas switching, unit flexibility • Coal & oil sales optimized inventory • Flexibility of portfolio captured real-time basis opportunities

SI-SSA-0015-05166

PSEG Power exceeded 2013's earnings guidance

OPERATING EARNINGS FOR PSEG POWER IN 2013; SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. *ASSETS TRANSFERRED TO POWER AT YEAR-END 2013.

SI-SSA-0015-05167

PSEG Power has generating assets

in three competitive markets

- Assets near loads
- Low cost portfolio
- Fuel flexibility with gas cost advantage
- Poised to benefit from volatility in real-time markets
- Fleet will maintain diversity and efficiency after HEDD
- Most sites suitable for expansion

SI-SSA-0015-05168

PSEG Power will maintain diversity and efficiency after a realignment of the fleet due to HEDD

Objective 2013 → 2017

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Environmental improvement
- Peach Bottom (PB) uprate
- Advanced Gas Path (AGP)
- Kalaeloa and Solar transfer adds ~200MW of capacity

Fuel Diversity

Energy Produced

SI-SSA-0015-05169

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel flexibility for >60% of fleet

SI-SSA-0015-05170

PSEG Power Nuclear is a critical element of our success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,178 MW
• Owned Capacity: 1,178 MW
• License Expiration: 2046
• Next Refueling
  • Spring 2015
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,365 MW
	• Owned Capacity: 1,358 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 -- Fall 2014
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,251 MW
		• Owned Capacity: 1,125 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2015
		• Uprate: 130 MW in 2015/2016

SI-SSA-0015-05171

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations: nine consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - ✓ FLEX* plan submitted with implementation starting with Fall outage
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

SI-SSA-0015-05172

Power's nuclear fleet is well positioned

with significantly lower-than-average US cost structure

*SOURCE: ELECTRIC UTILITY COST GROUP
** SOURCE: PSEG NUCLEAR

SI-SSA-0015-05173

PSEG Power's Fossil Fleet Performance

has shown improvement

- Fossil Capacity Factor rebounded with market
- Peaking Units maintain high start success

- Coal EFORp improving
- CC EFORp less than 1% in 2013
- Consistent recipient of EFORp payments

SI-SSA-0015-05174

PSEG

*LM6000 AND 7EA UNITS

PSEG Power improvements achieved in combined cycle fleet efficiency

Combined Cycle Operating Heat Rate

Actions Taken to Create Value

- Operational Excellence Model
- Training programs
- Unit testing initiative
- Outage work to restore efficiency
- Second gas line at BEC

- Heat rate improvement 2008-2013 translates to meaningful fuel savings at current market prices

- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional fuel savings

SI-SSA-0015-05175

Investing to expand CCGT capacity and improve efficiency

PSEG Power - CCGT Uprate Project

- Expand Power's CCGT fleet, one of the largest gas-fired portfolios in PJM, with incremental base and peaking MWs
- Retrofit Bergen, Linden and BEC with Advanced Gas Path (AGP) components at cost of ~$120M over 2014 - 2018

AGP Project Benefits

- ✓ CCGT capacity uprates of ~150 MW:
  - Linden (63 MW – 2014)
  - Bergen (31MW – 2015)
  - BEC (58 MW – 2017-18)
- ✓ Increases Efficiency - Combined Cycle (CC) heat rate improvement ~ 1.2%
- ✓ Upgrades technology and extends maintenance outage cycles

SI-SSA-0015-05176

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- Cost control through testing coordination program

SI-SSA-0015-05177

PSEG Power's capital expenditures for environmental requirements are essentially complete*

*BASED ON CURRENTLY KNOWN AND QUANTIFIABLE ENVIRONMENTAL REQUIREMENTS. E=ESTIMATE

SI-SSA-0015-05178

PSEG Power's focus on costs

has resulted in

moderate increase

in O&M for

six years

Power O&M Expense*

2009 to 2014 CAGR = 1.6%

Cost control actions taken:	
• Fossil plant assessment • CCGT material condition assessment • Contract renegotiations	• Nuclear maintenance productivity study • Nuclear outage efficiency initiative • Materials management

SI-SSA-0015-05179

PSEG

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS

Portfolio Management Strategy

Optimize value of assets

Manage risk vs. reward

Directly engage with regulatory agencies

SI-SSA-0015-05185

PSEG Power: Enjoys real and sustainable advantages in the merchant generation space

Market Review

- Gas, Power, Spark Spreads
- Regulatory construct

PSEG's Competitive Advantage

- Fuel flexibility
- Heat Rate diversity
- Access to Marcellus Shale gas
- Asset flexibility

PSEG's Sustainable Advantage

- Positive cash-flow hedging into the long-term
- Robust capacity market pricing in most concentrated load pocket in US
- Long-term access to discounted Marcellus gas

SI-SSA-0015-05186

Market Review: Prices have stabilized

- Energy and gas prices appear to have stabilized
- Environmental restrictions may tighten market
- Insufficient gas infrastructure continues to place upward pressure on fuel prices during seasonal peaks

F=FORWARDS AS OF 12/31/2013

SI-SSA-0015-05187

Market Review: New generation in PJM not keeping pace with coal retirements

Cumulative Generation Retirements*

Forecast Reserve Margin (PJM January 2014)

- PJM forecasts a declining Reserve Margin through 2018, which may improve forward prices
- Brattle estimates energy prices could rise at least $3-4/MWh from today's prices

SI-SSA-0015-05188

PSEG

*PJM AS OF FEBRUARY 20, 2014
SOURCE OF CHART DATA: PJM

Market Review: Regulatory framework showing signs of improvement

	ISSUE / POLICY	REGULATORY GAINS
PJM	SUBSIDIZED GENERATION (NJ and MD)	• Comprehensively defeated in federal court (appeals currently pending)
	DEMAND RESPONSE RULES	• PJM and ISO-NE enacted stricter rules of eligibility and deployment
	ENERGY PRICE FORMATION	• Concerted drive to improve price formation for generation and ancillary services • Waiver of price caps during extreme market conditions
NYISO	TRANSMISSION	• Significant progress made to relieve bottling of upstate generation
ISO-NE	CAPACITY	• Improvement in price formation to better reflect tight supply conditions • Implementation of sloping demand curve in Forward Capacity Auction (FCA) 9
	ENERGY	• Demand response required to participate in Day Ahead markets
FEDERAL	GAS to ELECTRIC	• Better coordination between pipelines and ISO's will promote efficiency
	ENVIRONMENTAL REGULATIONS	• HEDD, HAPS/MACT may lead to tightening of supply in 2015+ timeframe

SI-SSA-0015-05189

Competitive Advantage: Heat Rate Diversity & Flexible Dispatch

SI-SSA-0015-05190

Competitive Advantage: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

SI-SSA-0015-05191

Competitive Advantage: ~25% of Power's gas for generation comes from Marcellus

- Our combined cycle and peaking assets have been able to take advantage of locational gas price volatility driven by production and logistical constraints
- Lower cost shale supply provides additional savings during periods of lower residential gas demand

SI-SSA-0015-05192

Competitive Advantage: Locational advantage from short term basis volatility

PS Zone Annual Basis to PJM-W

PS Zone Day Ahead On Peak Monthly Basis to PJM-W

- Annual basis benefits baseload units
- Intermediate units flexible to seasonal opportunities
- Combined Cycle and Peaking units positioned to optimize daily and hourly volatility

PS Zone Real Time On Peak Hourly Basis to PJM-W

ANNUAL FORWARD BASIS TO PJM-WEST AS OF 12/31/2013.

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on January 7, 2014

On Peak Basis to PJM-W on January 7, 2014

Hourly Generation and Load on January 7, 2014

- High gas market at $58/MMbtu setting power prices in PS zone on 1/7/14
- Higher basis to generation
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional steam and peaking generation available above day ahead commitment to gain value from real time market
- Fuel flexibility with coal/gas/oil optionality among available units

SI-SSA-0015-05194

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on July 18, 2013

On Peak Basis to PJM-W on July 18, 2013

Hourly Generation and Load on July 18, 2013

- High demand in constrained northern NJ
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional generation available above obligations to gain value from real time market spikes
- Gas advantage in procuring low cost shale supply to capture savings

SI-SSA-0015-05195

Sustainable Advantage: BGS Auction provides excellent opportunity to forward hedge our generation

BGS sales account for about a quarter of our forward portfolio of hedges

SI-SSA-0015-05196

PSEG

$/MWH; BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2012-2014 WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2014.

Sustainable Advantage: Hedging strategy designed to protect gross margin while leveraging the portfolio

		2014	2015	2016
Base Load (Nuclear and Base Load Coal)	Volume TWh	35	35	35
	% Hedged	100%	75-80%	30-35%
	Price $/MWh	$48	$51	$53

PSE&G's Cash from Operations and Power's Free Cash Flow support growth investments without the need for new equity

PSEG Sources and Uses

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$500M FROM 2014-2016
(2) OTHER CASH FLOW INCLUDES PSEG LI, HOLDINGS NET CASH FLOW, CASH, AND SHORT TERM DEBT
E = ESTIMATE

SI-SSA-0015-05209

Power's key credit metric supports incremental investment opportunities

- Increased contribution to earnings from the more stable regulated business allows us to reset Power's FFO/Debt threshold from 35% to 30%, providing additional financial flexibility
- Power's annual Cash From Operations and Funds From Operations each average ~$1.1B over the 2014 to 2016 period supported by:
  - Capacity Revenues
  - Hedged Generation
  - O&M Control
- Financial strength can be used to pursue future growth in both businesses beyond current plans

(1) ESTIMATE BASED ON APPROVED PROGRAMS

SI-SSA-0015-05210

Pension: Our Long Term Asset allocation strategy resulted in a ~17% increase in pension assets during 2013

PBO Funded Ratio	83%			Fully Funded Pension →	106%

SI-SSA-0015-05211

Our Pension Management is expected to result in pension income in 2014 and over the planning horizon

SI-SSA-0015-05212

SI-SSA-0015-05216

PSEG Summary

- Our 2013 earnings of $2.58 exceeded our upwardly revised operating earnings guidance of $2.40 - $2.55 per share
- Double digit earnings growth at PSE&G on one and three year basis from 2013 to 2016, driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support full capital program and new potential opportunities without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for consistent and sustainable growth

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-05233

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

These materials and other financial releases can be found on the PSEG website at www.pseg.com , under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss .

VICE PRESIDENT – INVESTOR RELATIONS

SI-SSA-0015-05235

PSEG

We make things work for you.

PSEG Strategy - Delivering Value

Operational Excellence: Improving reliability and customer service as we control costs in a low price environment

Financial Strength: Strong financial position supports investment program

Disciplined Investment:

- Program focused on achieving objectives through infrastructure investment that meets customer and shareholder needs
- Robust pipeline of opportunities

Results:

- Double digit growth in rate base and net income at PSE&G
- Reconfiguration of Power's generating fleet: higher quality, more efficient
- Annual growth in common dividend
- Strong credit metrics

SI-SSA-0015-05236

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A $12 - $14 billion infrastructure program with opportunities to expand, producing high single digit rate base growth through 2021	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow and upside from market rule improvements
2016 Assets $26B Net Income $889M	2016 Assets $12B Net Income $18M Non-GAAP Operating Earnings* $514M

Focus on building a reliable, efficient, clean energy infrastructure

2012	2013	2014	2015	2016

Selected Accomplishments

2012
- Award winning Superstorm Sandy storm response restoring 2.1M customers
- Final federal approval for Susquehanna-Roseland transmission project
- 400 MW of new peaker capacity*

2013
- Expanded Solar investment
- 90% nuclear capacity factor for 9th straight year
- Record output from Linden CCGT and Salem 2 nuclear unit

2014
- Energy Strong program approved
- Advanced Gas Path uprates (through 2018)
- PSEG Long Island management contract effective

2015
- Gas System Modernization Program (GSMP) and Energy Efficiency Extension II approved
- New generation build starts Power fleet transformation

2016
- Solar 4 All Extension Approved
- Continued new generation build and transforming fleet to be more efficient, clean, and higher quality
- Solar Source grew to 396 MW_{DC} **

Cost Control

SI-SSA-0015-05238

PSEG

*KEARNY AND NEW HAVEN. ** AS OF FEBRUARY 2017; INCLUDES 70 MW_{DC} OF PV SOLAR GENERATION IN CONSTRUCTION.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: 15 consecutive years of recognition as the most reliable utility in the Mid-Atlantic region • PSEG Power: Lowest CCGT EFORd in last 5 years, while moving the fleet towards improved efficiency and environmental position • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Maintaining focus on efficiency, resiliency, and customer satisfaction
Financial Strength	• Non-GAAP Operating Earnings for 2016 at midpoint of original guidance range and upper end of revised guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased dividend in February 2017 – 13th increase in last 14 years
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2017-2021) with increased investment in Gas System Modernization Program, Electric and Gas distribution, and Energy Efficiency • Potential for additional investments in Renewables, Expanded Energy Efficiency and integration of Infrastructure with Customer Access • Power capital program focusing on growth investments including Keys Energy Center, Sewaren and Bridgeport Harbor

PSEG's Value Proposition

- A stable platform with a robust investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile supporting the potential for consistent and sustainable dividend growth

SI-SSA-0015-05253

PSEG REGULATORY & POLICY REVIEW

Tamara Linde

EXECUTIVE VICE PRESIDENT AND GENERAL COUNSEL

SI-SSA-0015-05254

PSEG

We make things work for you.

Regulatory & Policy Review - Agenda

- PSE&G Investment Program Recap
- PSE&G 2017 Base Rate Case Filing
- Regulatory Reform in NJ
- Preserving Nuclear Generation
- Federal Regulatory Framework
- Summary

SI-SSA-0015-05255

PSE&G has received approval for 15 multi-year investment programs that advance state energy goals

2008/ 2009	2011	2013	2014	2015	2016

Selected Accomplishments

- Capital Infrastructure I
- Energy Efficiency
- Solar Loan I
- Carbon Abatement
- Solar Loan II
- Solar 4 All
- Demand Response

- Energy Efficiency Extension
- Capital Infrastructure II

- Solar Loan III
- Solar 4 All Extension

- Energy Strong

- Energy Efficiency Extension II
- Gas System Modernization

- Solar 4 All Extension II

Infrastructure investment programs with near contemporaneous recovery mechanisms

SI-SSA-0015-05256

PSE&G plans to file Distribution Base Rate Case proceeding no later than November 1, 2017

Support

- Requirement of 2014 Energy Strong settlement
- Update for known changes in sales growth forecast, O&M and taxes since 2010 rate case
- Get recovery of distribution investment not covered by clause mechanisms
- Get recovery of approved storm costs

Opportunity

- Establish/update rate design, capital structure and depreciation
- Pursue decoupling
- Pursue interim rates
- Improve alignment with customer
- New E&G rates effective at start of 2019, or earlier

Supports need for moderate base rate increase

SI-SSA-0015-05257

NJ Distribution Base Rate Case Timeline

SI-SSA-0015-05258

New Jersey – Long-term Infrastructure Regulatory Reform with Customer Focus

Support

- Alignment with community and customer needs
- NJ Energy Master Plan
- Support extension of investment program horizon from 3 to 7 years using review process established by the BPU in Energy Strong and Gas System Modernization Program as template

Opportunity

- PSE&G will be seeking approval of multi-year programs that extend existing efforts to improve our system resiliency and broaden investment focus on Energy Efficiency and Utility of the Future services at the lowest cost to our customers

SI-SSA-0015-05259

Preserving Existing Nuclear Power Plants as Part of a Resilient Energy System

Support

- Generation from Power's nuclear units produces ~40% of NJ supply and provides 97% of NJ's carbon free energy
- Preservation of nuclear energy consistent with NJ policy goal: 70% clean resources by 2050
- Competitive wholesale markets not designed to value fuel diversity, resiliency and desirable attributes of nuclear generation

Opportunity

- Preserve highly reliable, clean resources as part of a diverse energy portfolio
- Preserve local jobs and economic base
- Keep prices lower than they otherwise would be, as current replacement options are more expensive
- Maintain system reliability

SI-SSA-0015-05260

What are other states doing to preserve at-risk nuclear generation?

New York April 2016	Illinois November 2016	Connecticut 2017?	Ohio 2017?
Clean Energy Standard approved by NYPSC provides support for at-risk nuclear. Zero Emission Credit standard established. Contract payments available for up to 12 years	Future Energy Jobs Bill enacted establishing a Zero Emission Credit (ZEC) portfolio standard. ZEC contract payments available for 10 years	Connecticut Legislature currently debating clean energy procurement process in recognition of nuclear capacity role as provider of clean energy	Legislative action under consideration to preserve at-risk nuclear generation

State Regulatory/Legislative actions recognize value of nuclear energy in meeting clean energy standards and supporting local economy

SI-SSA-0015-05261

Federal Regulatory Framework – Ensuring market structures recognize the value of reliable, diverse and clean dispatchable generation

Support

- FERC is driving ISOs to improve market constructs and rules on energy pricing
- Higher payments for enhanced reliability (Capacity Performance); first purely CP capacity auction to be held by PJM in May 2017

Opportunity

- Advocate for market solutions that fairly compensate generators for the cost of meeting demand
- Seek recognition of environmental attributes of existing resources
- Seek integration of state public policy objectives for clean energy with grid reliability and efficient market signals

SI-SSA-0015-05262

PSEG Regulatory and Policy focus

on mechanisms that provide customers clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- True-up data from 2010 base rate case for known changes in customers usage, taxes, O&M and investments

Long-Term Infrastructure Investment Platform

- Seek extension of existing infrastructure programs, e.g., GSMP, and broaden investment platform

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy to recognize the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-05263

PSE&G

Ralph LaRossa

PUBLIC SERVICE ELECTRIC & GAS

PSEG

We make things work for you.

SI-SSA-0015-05264

Discussion topics

- Overview of PSE&G - Strategy and delivering results
- Operational excellence
- Capital investment program
- 2017 Distribution rate case filing
- Customer rates

SI-SSA-0015-05265

PSE&G –New Jersey's largest:

- Electric and Gas Distribution utility
- Transmission business
- Investor in renewables and energy efficiency
- Appliance service provider

	Electric	Gas
Customers Growth (2012 – 2016)	2.2 Million 0.5%	1.8 Million 0.4%
2016 Electric and Gas Sales	41,580 GWh	2,360M Therms*
Projected Annual Sales Growth (2017 – 2019)**	0.3%	0.7%
Sales Mix (2016)		
Residential	33%	59%
Commercial	58%	37%
Industrial	9%	4%

PSE&G 2016 Rate Base

SI-SSA-0015-05266

PSEG

* GAS FIRM SALES ONLY.
** ESTIMATED ANNUAL GROWTH PER YEAR, ASSUMES NORMAL WEATHER.

PSE&G strategy

Building a sustainable platform that balances reliability, customer rates and public policy to ensure growth at reasonable returns

SI-SSA-0015-05267

Delivering on Our Promises

Operational Excellence	• Strong safety, reliability and customer service record • Cost control efforts have led to flat O&M
Financial Strength	• Achieved 5-year annual growth in net income of 11% • Achieved 5-year annual growth in rate base of 13% • Maintaining solid investment grade credit ratings
Disciplined Investment	• 15 investment programs approved over past eight years ✓ Infrastructure focused ✓ Supportive regulatory mechanisms providing for clause recovery ✓ Policy alignment – across administrations – Solar and Energy Efficiency • Programs creating jobs and providing environmental benefits, in a low-rate environment benefiting from low commodity prices and federal tax benefits from current bonus depreciation rules

SI-SSA-0015-05268

Operational Excellence - Safety

- Management focus and collaboration with unions resulted in top decile safety performance in 2016

SI-SSA-0015-05269

SOURCE: PSE&G

Operational Excellence - Reliability

Consistently recognized for customer reliability

Our system performance, as measured by System Average Interruption Duration Index (SAIDI), has consistently been among the best performers

Named most reliable electric utility in the Mid-Atlantic region for **15th consecutive year**

SI-SSA-0015-05270

SOURCE: PSE&G

Operational Excellence - Customer satisfaction

PSE&G has improved on an absolute and relative basis compared to its peers over the past five years

JD Power Residential and Business Scores

SI-SSA-0015-05271

Operational Excellence – O&M costs

Demonstrated ability to control O&M, preserving earnings and returns in a low sales growth environment

Cost control actions:

- PSE&G is utilizing the Lean Six Sigma discipline to achieve costs savings and process improvements
- Regular organizational refinement to streamline processes
- Continued focus on vendor and inventory practices ensuring maximum value
- Successful management of pension

E = ESTIMATE.

SI-SSA-0015-05272

Disciplined Investment – Delivering annual growth

Our rate base is now roughly balanced between federal and state jurisdictions

SI-SSA-0015-05273

Disciplined Investment – Continued growth in robust capital program

2017-2021E PSE&G Capital Spending

Base Capital,
including GSMP extension
$12.3B
Rate Base CAGR 7%

with extension / expansion of current programs
$13.8B
Rate Base CAGR 9%

Transmission | Gas Distribution | Electric Distribution | Solar and Energy Efficiency

With current returns on ~70% of capital investments

. E = ESTIMATE. INCLUDES AFUDC

SI-SSA-0015-05274

Transmission - ~$6 billion, 5-year investment program focusing on reliability and replacing aging infrastructure

- **Formula rate** recovery of capital and expenses
- **PJM's Regional Transmission Expansion Plan** (RTEP) identifies system enhancements needed for reliability
- **Portfolio transitioning –** completing remaining major lines and moving to steady state investments to maintain reliability and stay ahead of asset end of life
  - **69kV system upgrades** improve system reliability and add capacity for future growth
  - **Transmission Lifecycle** to manage asset life and improve system integrity and reliability
  - **Transmission Hardening** projects focus on increasing system resiliency

SLSS-VA-15-05275

Electric Distribution – ~$3 billion, 5-year investment program focused on reliability and resiliency

- **Energy Strong** - Completion of currently approved program
- **Future growth efforts**
  - **Hardening** – Extend program for critical system infrastructure
  - **Aging infrastructure** – Life cycle investments to ensure continued top quartile reliability performance
    - Over 65 substations > 60 years old; Over 30 substations > 80 years old
    - ~115 substations 26kV to 4kV
    - Risk assessment model to eliminate/replace
  - **Technology** – Next generation to enhance grid performance

SI-SSA-0015-05276

Electric Distribution - Technology

- **Making the grid smarter**
  - Deployment of hundreds of microprocessor relays
  - A new state of the art distribution SCADA system to facilitate full communication and control
  - Ability to integrate Distributed Energy Resources into the grid while enhancing grid reliability and resiliency

- **Improving customer service - continue to enhance delivery of information and communication**

SI-SSA-0015-05277

Gas Distribution – ~$3 billion, 5-year investment program focused on modernizing and upgrading cast iron and unprotected steel main

- **Cost efficiency** of broad replacement approach
- **Customer service** – conversion from low pressure to high pressure
- **Environmental Collaboration** with EDF and Google to consider methane leaks in work prioritization
- **Replaced** >200 miles in 2016
  - Exceeding run rate of 30 year program, demonstrating ability to accelerate program
  - ~4,800 miles of cast iron and unprotected steel main remaining in the system
  - More cast iron than any other US utility

SI-SSA-0015-05278

Solar and Energy Efficiency – ~$250 million, 5-year investment supports New Jersey policy objectives

- **Solar –**
  - Grid-connected solar on landfills and brownfields provides clean energy for all customers
  - 210 MW installed of the 300 MW total approved programs
- **Energy efficiency** – Continuing programs with a focus on hospitals, multi-family housing and our direct install program which includes municipalities, non-profits and small businesses in Urban Enterprise Zones
- **State Policy** - Programs are aligned with policy goals
- **Opportunity to expand** – Potential for significant opportunity to expand energy efficiency and related customer services in the future

SI-SSA-0015-05279

Developing investment opportunities with near-contemporaneous recovery mechanisms

2017-2021E PSE&G Capital with Program extensions by Recovery Method

Plan to increase current five year, $12.3B capital plan by ~$1.5B through program extensions and expansions:

- GSMP acceleration
- Electric distribution – hardening extension and modernization investment program
- Energy Efficiency and Solar programs – extensions and expansion

With broad opportunity set of additional investment potential driven by customer expectations and public policy

FERC Formula Rates	Traditional Recovery Mechanisms	Clause Recovery Mechanisms
Transmission	Distribution Base Rates	Infrastructure / Solar / Energy Efficiency

E = ESTIMATE. DATA AS OF MARCH 2017. INCLUDES AFUDC.

SI-SSA-0015-05280

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2012 - 2016

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2017-2021E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth rate

SI-SSA-0015-05281

Investment program supports strong rate base growth – off a higher base

E = ESTIMATE.

SI-SSA-0015-05282

Distribution – 2017 base rate case filing

- Obligated to file rate case no later than November 1, 2017
- Last rate case – 2009 test year, settled in 2010

Since last rate case

- **Sales growth** – flat, customer growth offset by energy efficiency
- **O&M** – held flat, with increased regulatory requirements
- **Capital Investments** – Growth in rate base beyond clauses, consists of:
  - GSMP annual stipulated base
  - Energy Strong
  - Other Distribution base investments beyond depreciation levels
- **Customer rates** since last rate case
  - Electric decreased 5%; Gas decreased 46%

Supports need for moderate base rate increase

SI-SSA-0015-05283

Optimal time for extension and expansion of investment programs

- 2017 investment program filings
  - **GSMP** - extension and acceleration
  - **Electric infrastructure** - resiliency and modernization
  - **Energy efficiency** – extension, potential future expansion
  - Seeking **long-term** programs to optimize planning and cost
- Programs improve system reliability and meet customer expectations
  - System need as infrastructure reaches end of life
  - Increasing customer and public policy expectations
- Optimal timing

Job creation	Environmental benefits	Federal tax benefits	Low commodity prices
√	√	√	√

- Potential rate impact of program extensions - ~2%/year*

SI-SSA-0015-05284

*ASSUMES TYPICAL COMBINED RESIDENTIAL CUSTOMER WITH 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY.

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-05285

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

PSE&G's 2017 net income to benefit from investment programs and cost control

E =ESTIMATE.

SI-SSA-0015-05292

Power is transforming its portfolio to be newer, more efficient and flexible

2012 → 2013 → 2014 → 2015 → 2016

Selected Accomplishments Towards Transformation

Cost Control

2012

- Additional **400** MW of new peaker capacity at Kearny and New Haven

2013

- Bethlehem Energy Center, 2nd gas pipeline connection added

2014

- CCGT Advanced Gas Path (AGP) uprate completed at Linden 1 & 2, **63** MW
- Energy / Fuel management contract for LIPA

2015

- Continued growth with **1,300** MW new CCGT's announced
  - Keys
  - Sewaren 7
- Projects Completed:
  - Peach Bottom EPU, **130** MW
  - Bergen 2 AGP uprate, **31** MW
- Retired HEDD Units
- Solar portfolio reaches **277** MW_{DC}
- Initiated Hope Creek uprate, **18** MW

2016

- Bridgeport Harbor 5 **485** MW CCGT cleared ISO-NE auction
- Hudson & Mercer early retirement announced
- Kearny 13 & 14 uprate, **14.5** MW increased capacity
- Initiated electric & gas retail business in NJ, PA
- Solar reaches ~**326** MW_{DC} in operation

SI-SSA-0015-05293

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (326 MW_{DC}/257 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-05294

PSEG

*POWER ANNOUNCED RETIREMENTS OF HUDSON AND MERCER GENERATING STATIONS AS OF JUNE 1, 2017.

Power has a diverse fleet of generating assets which enables it to respond to market needs

Fuel Diversity 2016*

Total MW: 11,577

Energy Produced 2016*

Total GWh: 51,510

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

SI-SSA-0015-05295

PSEG

* EXCLUDES SOLAR (326MW$_{DC}$ /257MW$_{AC}$) AND KALAELOA (104MW).
**INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

Power's Fossil Fleet maintains solid performance in a challenging environment

- Generation records at BEC and Bergen 2 combined-cycle units
- Combined-cycle EFORd* and EFORp lowest in five years
- Start Success Rate:
  - Peaking: 99.7%
  - Coal/Steam: 93%

SI-SSA-0015-05296

*EFORd EXCLUDES EVENTS OUTSIDE OF MANAGEMENT CONTROL.

Nuclear is vital to New Jersey with Salem and Hope Creek providing ~40% of the State's energy consumption

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3
• Operated by PSEG Nuclear • PSEG Ownership: 100% • Boiling Water Reactor • Total Capacity: 1,172 MW • Owned Capacity: 1,172 MW • License Expiration: 2046 • 18 MW Uprate Spring 2018 • Next Scheduled Refueling ➢ Spring 2018	• Operated by PSEG Nuclear • PSEG Ownership: 57% • Pressurized Water Reactor • Total Capacity: 2,296 MW • Owned Capacity: 1,318 MW • License Expiration: 2036 and 2040 • Next Scheduled Refueling ➢ Unit 1 – Fall 2017 ➢ Unit 2 – Spring 2017	• Operated by Exelon • PSEG Ownership: 50% • Boiling Water Reactor • Total Capacity: 2,450 MW • Owned Capacity: 1,225 MW • License Expiration: 2033 and 2034 • Next Scheduled Refueling ➢ Unit 2 – Fall 2018 ➢ Unit 3 – Fall 2017

SI-SSA-0015-05297

PSEG Nuclear has been addressing the economic challenges in the current low gas price environment

- 2012 to 2017E CAGR: –1.4%
- The 2015 Labor increase / outside services decrease is due to bringing security force employees in-house
- Material and outside service cost reductions CAGR: – 4%

- Fukushima-related compliance drove $198 M of Regulatory/Environmental spend
- 2016 and 2017E capital driven by Baffle Bolt replacement
- Going forward capital approximately $100M/year to maintain reliability to end of license life

SI-SSA-0015-05298

PSEG

NOTE: LABOR INCLUDES BASE WAGES, OVERTIME AND FRINGE BENEFITS. ALL YEARS EXCLUDE EXPENDITURES FOR NUCLEAR FUEL (APPROXIMATELY $6.50/MWH). E=ESTIMATE

PSEG Nuclear is leading the industry in efforts to ensure economic viability of fleet

Goals

- Industry goal to achieve reductions in O&M, fuel and capital costs by 2018
- The three-year program to examine and implement opportunities to:
  - ✓ Advance safety,
  - ✓ Improve operations, and
  - ✓ Prevent premature reactor closures
- Concurrently, we continue to work with NEI and other industry partners to gain greater compensation for nuclear plants in competitive market policies

PSEG Nuclear progress to date

- 46 Efficiency Bulletins issued, 21 implemented to date
- Cost reductions achieved: 185 FTE reduction; 2017 direct O&M reduction of 5% from plan target while funding equipment reliability improvement
- Implemented changes to focus on eliminating vs. mitigating equipment reliability issues to ensure generation is not negatively impacted

PSEG Nuclear is not currently earning its cost of capital

SI-SSA-0015-05299

Power has demonstrated its ability to control O&M

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON/MERCER EARLY RETIREMENT.
E=ESTIMATE

SI-SSA-0015-05300

Power is developing ~1,800 MW of new, efficient CCGT capacity in MD, NJ and CT

SI-SSA-0015-05301

Growth Project Update - Keys Energy Center

- **755 MW plant in Prince George's County, MD**
  - 2x1 natural gas-fired combined cycle
  - Greenfield site
- **Estimated Costs $825 to $870 million**
- **Major Milestones**
  - Combustion turbines and generators, steam turbine and generator and all three generator step-up transformers have been set in place
  - Construction is 35% complete as of February 2017
  - Commence training / start-up support in 2017
  - Expected to be in service in mid-2018
- **Outlook**
  - Expands geographic footprint to the SWMAAC* load pocket

Keys Energy Center – Aerial View

*SWMAAC – SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL
E = ESTIMATE

SI-SSA-0015-05302

Growth Project Update – Sewaren 7

- **540 MW plant in Sewaren , New Jersey**
  - 1x1 dual fuel (natural gas & ultra low sulfur diesel) combined cycle
- **Estimated Costs $625 to $675 million**
- **Major Milestones**
  - Combustion steam turbine generator, combustion turbine and main transformers have been set in place
  - Construction is 29% complete as of February 2017
  - Expected to be in service in mid-2018
- **Outlook**
  - Leverages existing infrastructure
  - Existing Sewaren units will retire upon completion
  - Located in the PS Zone load pocket

Sewaren 7 – Aerial View

SI-SSA-0015-05303

E = ESTIMATE

Growth Project Update – Bridgeport 5

- **485 MW plant in Bridgeport, Connecticut**
  - 1x1 dual fuel (natural gas & ultra low sulfur diesel) combined cycle
- **Estimated Costs $525 to $575 million**
- **Major Milestones**
  - New Source Review Air Permit is expected to be issued by April 15, 2017
  - Expected to be in-service in mid-2019
- **Outlook**
  - To be constructed on the existing PSEG Bridgeport Harbor site; Bridgeport Harbor 3 will retire in 2021
  - Located in the SW Connecticut load pocket
  - Seven year capacity price lock

Bridgeport 5 – Aerial View

SI-SSA-0015-05304

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2016 to 2021E

Energy Produced increases by >18%

[1] REFLECTS ANNOUNCED EARLY RETIREMENT OF HUDSON AND MERCER UNITS IN MID-2017.

PSEG

E=ESTIMATE. DATA AS OF FEBRUARY 2017.
EXCLUDES NUCLEAR FUEL. INCLUDES IDC.

Power's fleet is well-located with access to shale gas production

- PSEG Power procured approximately 400 BCF in 2016 with almost 50% going to PSE&G's utility gas customers
- PSEG Power's gas for PJM generation was ~100 BCF in 2016, of which >80% was supplied by Northeast Shale gas

- Significant amount of new pipelines have already been built and more are in construction / development
- Gas production and pipeline takeaway capacity expected to be more balanced in 2018 timeframe

SI-SSA-0015-05308

With additional pipeline capacity, some price convergence is beginning to appear in the gas markets

Electric basis for the PSEG Zone is also showing improvement in the forward markets

SI-SSA-0015-05309

PSEG Power's Value Proposition

Efficient fleet	Advantaged locations	Investing to grow

- Well-positioned, well-run fleet of merchant generating assets in competitive markets
- Early retirement of Hudson and Mercer coal stations in mid-2017 improves fleet efficiency and returns
- Addition of 1,800 MWs of new, efficient, flexible CCGTs transforms the portfolio
- Low capital requirements post-construction
- Hedging strategy to protect value of assets in declining price environment and provide stable returns and cash flow

2) INCLUDES ISSUANCES, REDEMPTIONS, AND CASH POSITION
3) INCLUDES OTHER PSEG NET CASH FLOW E = ESTIMATE

SI-SSA-0015-05326

Strong credit metrics provide substantial investment capacity for increased utility investment

Average Funds From Operations / Debt
2017E – 2019E

	Power	PSEG
Estimate	~40%	Low – 20's
Minimum Threshold	30%	High - teens

Total Incremental Investment Capacity

Incremental capacity invested in utility would be matched with utility debt

SI-SSA-0015-05327

Manageable Pension and OPEB Expense

with a reduction of ~$22 million in 2017

- 2016 Pension funded ratio ~90%
- Historical 5-year annualized pension returns exceeded 10%
- No qualified pension contributions planned
- Merger of three pension plans contribute to reduction in pension expense
- Pension expense expected to decline beyond 2017

(1) Post-Capitalization and Pre-tax expense

SI-SSA-0015-05328

PSEG has demonstrated an ability to control O&M, with plans to reduce in 2017

SI-SSA-0015-05329

PSEG

(1) POWER EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON / MERCER EARLY RETIREMENT WRITE-DOWN, DISTRIBUTION EXCLUDES ELECTRIC AND GAS BAD DEBT. E = ESTIMATE.

2017 Federal Tax Reform – PSEG is well positioned

Given positive non-utility contribution to earnings and a strong balance sheet, PSEG is well positioned for potential tax reform

Assumption	PSE&G	PSEG Power	PSEG Parent
Reduction of Corporate Tax Rate	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period	After-tax earnings and cash flow increase One-time non-cash earnings benefit from reduction in deferred tax liability	After-tax earnings and cash flow improve
100% Expensing of Capital Expenditures	Impact on rate base growth comparable to existing bonus depreciation rules	Cash flow improves	
Elimination of Deductibility of Interest Expense and Border Adjustment Tax	Change in cost anticipated to be passed through to customers	Well positioned given low debt balance Uncertainty on Border Adjustment Tax	Well positioned given low debt balance

SI-SSA-0015-05330

Opportunity for meaningful and sustainable dividend growth

Payout Ratio	50%	58%	56%	54%	54%	57%	59%(1)

(1) THE 2017 PAYOUT RATIO IS BASED ON THE MIDPOINT OF PSEG'S 2017 NON-GAAP OPERATING EARNINGS GUIDANCE OF $2.80-$3.00 PER SHARE. SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. E=ESTIMATE

SI-SSA-0015-05332

PSEG Summary

- 2016 Operating Earnings (non-GAAP) at upper end of revised guidance of $2.80 - $2.95 per share
- 2017 guidance for Operating Earnings (non-GAAP) of $2.80 to $3.00 per share supported by PSE&G growth
- PSE&G capital spending provides high single-digit rate base growth for foreseeable future balanced between Transmission and Distribution
- Power expected to generate significant free cash flow following CCGT construction program and transformation to a more efficient generation fleet
- Strong balance sheet and cash flow support current capital program and new investment opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2017 demonstrates meaningful and sustainable dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

Forward-Looking Statement

Certain of the matters discussed in this communication about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com.

These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient coverage or recover proceeds of insurance with respect to such events,
- cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as competition from certain transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies and changes in customer behaviors, including energy efficiency, net metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-05337

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slide A at the end of this presentation includes a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

Operating Earnings Mix

Long term investment program has driven increased earnings contribution from stable, regulated business

Power's diverse fuel mix and dispatch flexibility continues to generate earnings and free cash flow

PSE&G's investment in transmission has diversified its asset base and, coupled with other investments and cost controls, supported compound annual earnings growth of ~18% over 2009 – 2013

SI-SSA-0015-05345

PSEG's business profile has been transformed through significant growth in utility capital spending

SI-SSA-0015-05346

Energy Strong Proposal recognizes need to strengthen and harden the distribution system

- Energy Strong is:
  - ✓ A $2.6 Billion investment program over 5 years as the first phase of a 10-year, $3.9 Billion infrastructure program
  - ✓ Proposal is based on contemporaneous recovery of investment, subject to NJ Board of Public Utilities (BPU) review
- Energy Strong proposal would harden 29 electric substations, modernize the gas distribution system, make the grid smarter, and improve the system's ability to communicate with customers
- Over 100 New Jersey municipalities support Energy Strong
- Proposed Energy Strong program would create approximately 5,800 jobs and stimulate NJ's economy

SI-SSA-0015-05347

Balance Sheet Strength

2009 – 2013: Reduced risk profile and transformed business mix

- Invested $8.4 billion in PSE&G
- Improved credit ratings
- Monetized and de-risked Holdings' portfolio

2014 – Forward: Strong cash flows and increasingly regulated business mix fully support:

- PSE&G's $10B approved investment program through 2018
- Consistent and sustainable dividend growth
- Additional investment capacity to deploy in opportunities beyond those in the current capital plan
- No need to issue equity

SI-SSA-0015-05350

Energy Strong filing for resiliency and hardening to support customers' needs in the wake of Superstorm Sandy

- Filed 5-year $2.6 billion capital program with NJ Board of Public Utilities (BPU) in February 2013
- Program addresses system resiliency and hardening by:
  - Protecting distribution substations from severe storms
  - Making the electric grid smarter and easier to repair
  - Adding backup distribution lines and system redundancies
  - Moving overhead distribution lines underground
  - Modernizing the gas distribution system
- Currently in confidential negotiations with Staff of BPU and major intervenors; hearings conclude March 7, 2014
- Anticipate a final order following either settlement or litigated decision by the end of April 2014

SI-SSA-0015-05365

Mickleton–Gloucester–Camden 230kV	11.68%	✓	✓	$435	June 2015

SI-SSA-0015-05370

Susquehanna-Roseland consists of constructing 150 miles of 500kV circuit (46 miles in NJ) with two new 500kV GIS switching stations at Roseland and Hopatcong

Project Estimate Up To*	Through Year-end 2013	Expected In-service Date
$790M	$661M	June 2014 / June 2015

- PJM RTEP project b0489
- ROE of 12.93% (including 1.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves reliability and reduces congestion

Project Status: Major permitting & siting complete, outside plant construction in progress, inside plant construction is complete and commissioning is in progress

SI-SSA-0015-05371

*PROJECT IS SHARED WITH PPL. PROJECT ESTIMATE REPRESENTS PSE&G'S CONSTRUCTION RESPONSIBILITY FOR THE NJ PORTION.

Northeast Grid Reliability consists of upgrading approximately 50 overhead circuit miles of 138kV transmission line to 230kV, constructing ~18 miles of new underground 230kV lines, and converting/upgrading 12 existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$907M	$228M	June 2015

- PJM RTEP project b1304
- ROE of 11.93% (including 0.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment
- Project estimate has increased ~$12M associated with hardening related scope changes as a result of Superstorm Sandy

Customer Benefit: Improves reliability and increases transfer capability

Project Status: Nearing completion of engineering/design and licensing/permitting phase. Outside and inside plant construction are in progress

SI-SSA-0015-05372

North Central Reliability consists of upgrading 55 circuit miles of 138kV transmission line to 230kV, and converting six existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$390M	$349M	June 2014

- PJM RTEP project b1154
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves power quality and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction is essentially complete, commissioning is in progress

SI-SSA-0015-05373

Burlington-Camden 230kV consists of upgrading 37 circuit miles (30 miles of overhead and 7 miles of underground) of 138kV transmission line to 230kV, converting the existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$399M	$301M	June 2014

- PJM RTEP project b1156
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses voltage reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside plant construction is complete, and inside plant construction and commissioning is in progress

SI-SSA-0015-05374

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$435M	$122M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses thermal reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-05375

Bergen-Linden Corridor is a recently approved project which will provide a double-circuit 345kV line to maintain reliability

Project Estimate Up To	Through Year-end 2013	Expected Completion Date
$1,200M	-	June 2018

- PJM RTEP project b2436
- 30 miles of underground cable
  - New ~ 23 miles
  - Reconductor (Upgrade of 138 to 345) ~7 miles
- 13 miles of double circuit overhead conductor (replacing double circuit 138 with double circuit 345)
- 11 station upgrades to 345kV

Customer Benefit: Addresses thermal and short-circuit reliability

Project Status: Engineering

SI-SSA-0015-05376

Planned transmission spend of $6.8 billion

is driven by PJM reliability projects, 69kV conversions and life-cycle replacement projects

PSEG LONG ISLAND

PSEG

We make things work for you.

SI-SSA-0015-05381

PSEG was selected to operate Long Island Power Authority's (LIPA) electric transmission and distribution system for 12 years starting in 2014

- Pursuant to the Operating Services Agreement (OSA), all expenses and capital costs to operate the system are pre-funded by LIPA and passed through to their customers
- Compensation consists of a fixed fee and an incentive fee
  - Fixed compensation fee for 2014 with scheduled increases in 2015 and 2016
  - Starting in 2015 PSEG Energy Resources and Trading (ER&T) begins managing fuel/energy contracts
  - PSEG Long Island expected to contribute $0.03 to operating earnings in 2014 increasing to $0.07 per share in 2016 including contribution at ER&T
- Potential for an 8-year extension of the OSA

SI-SSA-0015-05382

PSEG Long Island commenced operations

on January 1, 2014

Key elements of Operating Services Agreement

Increased PSEG scope and control	Use of PSEG brand as PSEG Long Island	3-Year rate freeze (2013-2015)
Performance metrics	NY Department of Public Service oversight	Potential for "Utility 2.0" investment

Early performance

Successful transition to PSEG Long Island	Stakeholder communication	Winter storm response

Agenda

- Delivering Value
- Fleet Advantage, Location, Flexibility and Fuel Diversity
- Nuclear Operation
- Fossil Operation
- Financial Performance
- Expansion Opportunities
- Regulatory
- Engaged Workforce

SI-SSA-0015-05386

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units continue to achieve strong operational results, operating at over 90% capacity factors for the 9th consecutive year • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing conditions • Linden CCGT and Salem 2 nuclear unit achieved record output in 2013	• "Getting the most out of existing fleet" • Locational advantage • O&M control programs have delivered a CAGR of 1.6% between 2009 and 2014 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-05387

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2013 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch • Completed 19 MW solar project, 4 MW project under construction, established robust pipeline • Nuclear ESP is expected in 2015

SI-SSA-0015-05388

PSEG Power met 2013 challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• SuperStorm Sandy impacted our generating sites • Cold and hot weather extremes created challenging operating environment, but also presented opportunities		• Unit outages and planned transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Optimized unit dispatch across fleet during storm recovery • Expedited return from storm outages, restored margin opportunities • High availability when needed • Achieved fuel cost savings • Captured value through coal/gas switching, unit flexibility • Coal & oil sales optimized inventory • Flexibility of portfolio captured real-time basis opportunities

SI-SSA-0015-05389

PSEG Power exceeded 2013's earnings guidance

OPERATING EARNINGS FOR PSEG POWER IN 2013; SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. *ASSETS TRANSFERRED TO POWER AT YEAR-END 2013.

SI-SSA-0015-05390

PSEG Power has generating assets

in three competitive markets

- Assets near loads
- Low cost portfolio
- Fuel flexibility with gas cost advantage
- Poised to benefit from volatility in real-time markets
- Fleet will maintain diversity and efficiency after HEDD
- Most sites suitable for expansion

SI-SSA-0015-05391

PSEG Power will maintain diversity and efficiency after a realignment of the fleet due to HEDD

Objective 2013 → 2017

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Environmental improvement
- Peach Bottom (PB) uprate
- Advanced Gas Path (AGP)
- Kalaeloa and Solar transfer adds ~200MW of capacity

Fuel Diversity

Energy Produced

SI-SSA-0015-05392

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel flexibility for >60% of fleet

SI-SSA-0015-05393

PSEG Power Nuclear is a critical element of our success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear

• Owned Capacity: 1,178 MW
• License Expiration: 2046
• Next Refueling
  • Spring 2015
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,365 MW
	• Owned Capacity: 1,358 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 -- Fall 2014
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,251 MW
		• Owned Capacity: 1,125 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2015
		• Uprate: 130 MW in 2015/2016

SI-SSA-0015-05394

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations: nine consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - ✓ FLEX* plan submitted with implementation starting with Fall outage
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

SI-SSA-0015-05395

Power's nuclear fleet is well positioned

with significantly lower-than-average US cost structure

*SOURCE: ELECTRIC UTILITY COST GROUP
** SOURCE: PSEG NUCLEAR

SI-SSA-0015-05396

PSEG Power's Fossil Fleet Performance

has shown improvement

- Fossil Capacity Factor rebounded with market
- Peaking Units maintain high start success

- Coal EFORp improving
- CC EFORp less than 1% in 2013
- Consistent recipient of EFORp payments

SI-SSA-0015-05397

PSEG

*LM6000 AND 7EA UNITS

PSEG Power improvements achieved in combined cycle fleet efficiency

Combined Cycle Operating Heat Rate

Actions Taken to Create Value

- Operational Excellence Model
- Training programs
- Unit testing initiative
- Outage work to restore efficiency
- Second gas line at BEC

- Heat rate improvement 2008-2013 translates to meaningful fuel savings at current market prices

- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional fuel savings

SI-SSA-0015-05398

Investing to expand CCGT capacity and improve efficiency

PSEG Power - CCGT Uprate Project

- Expand Power's CCGT fleet, one of the largest gas-fired portfolios in PJM, with incremental base and peaking MWs
- Retrofit Bergen, Linden and BEC with Advanced Gas Path (AGP) components at cost of ~$120M over 2014 - 2018

AGP Project Benefits

- ✓ CCGT capacity uprates of ~150 MW:
  - Linden (63 MW – 2014)
  - Bergen (31MW – 2015)
  - BEC (58 MW – 2017-18)
- ✓ Increases Efficiency - Combined Cycle (CC) heat rate improvement ~ 1.2%
- ✓ Upgrades technology and extends maintenance outage cycles

SI-SSA-0015-05399

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- Cost control through testing coordination program

SI-SSA-0015-05400

PSEG Power's capital expenditures for environmental requirements are essentially complete*

PSEG Solar Source owns 88 MW of operating solar facilities and has one project under construction

Hackettstown (Mars)
New Jersey (2 MW)
COD September 2009
Thin film panels – fixed tilt
Investment $13 million
15 year PPA with Mars, Inc.

Queen Creek
Arizona (25 MW)
COD October 2012
Polycrystalline - single axis tracker
Investment $79 million
20 year PPA with SRP

Wyandot
Ohio (12 MW)
COD May 2010
Thin film panels – fixed tilt
Investment $45 million
20 year PPA with AEP

Milford
Delaware (15 MW)
COD December 2012
Polycrystalline - fixed tilt
Investment $49 million
20 year PPA with DEMEC

JEA
Florida (15 MW)
COD September 2010
Thin film panels – fixed tilt
Investment $59 million
30 year PPA with JEA

Badger I
Arizona (19 MW)
COD November 2013
Polycrystalline - single axis tracker
Investment $50 million
30 year PPA with APS

Shasta
California (4 MW)
Expected COD March 2014
Polycrystalline - single axis tracker
Investment $13 million est.
20 year PPA with PG&E

- Continue to seek high quality projects with creditworthy off-takers.
- Solar portfolio delivers strong EBITDA post-construction period.

We make things work for you.

Portfolio Management Strategy

Optimize value of assets

Manage risk vs. reward

Directly engage with regulatory agencies

SI-SSA-0015-05408

PSEG Power: Enjoys real and sustainable advantages in the merchant generation space

Market Review

- Gas, Power, Spark Spreads
- Regulatory construct

PSEG's Competitive Advantage

- Fuel flexibility
- Heat Rate diversity
- Access to Marcellus Shale gas
- Asset flexibility

PSEG's Sustainable Advantage

- Positive cash-flow hedging into the long-term
- Robust capacity market pricing in most concentrated load pocket in US
- Long-term access to discounted Marcellus gas

SI-SSA-0015-05409

Market Review: Prices have stabilized

- Energy and gas prices appear to have stabilized
- Environmental restrictions may tighten market
- Insufficient gas infrastructure continues to place upward pressure on fuel prices during seasonal peaks

SI-SSA-0015-05410

F=FORWARDS AS OF 12/31/2013

Market Review: New generation in PJM not keeping pace with coal retirements

Cumulative Generation Retirements*

Forecast Reserve Margin (PJM January 2014)

- PJM forecasts a declining Reserve Margin through 2018, which may improve forward prices
- Brattle estimates energy prices could rise at least $3-4/MWh from today's prices

SI-SSA-0015-05411

PSEG

*PJM AS OF FEBRUARY 20, 2014
SOURCE OF CHART DATA: PJM

Market Review: Regulatory framework showing signs of improvement

	ISSUE / POLICY	REGULATORY GAINS
PJM	SUBSIDIZED GENERATION (NJ and MD)	• Comprehensively defeated in federal court (appeals currently pending)
	DEMAND RESPONSE RULES	• PJM and ISO-NE enacted stricter rules of eligibility and deployment
	ENERGY PRICE FORMATION	• Concerted drive to improve price formation for generation and ancillary services • Waiver of price caps during extreme market conditions
NYISO	TRANSMISSION	• Significant progress made to relieve bottling of upstate generation
ISO-NE	CAPACITY	• Improvement in price formation to better reflect tight supply conditions • Implementation of sloping demand curve in Forward Capacity Auction (FCA) 9
	ENERGY	• Demand response required to participate in Day Ahead markets
FEDERAL	GAS to ELECTRIC	• Better coordination between pipelines and ISO's will promote efficiency
	ENVIRONMENTAL REGULATIONS	• HEDD, HAPS/MACT may lead to tightening of supply in 2015+ timeframe

SI-SSA-0015-05412

Competitive Advantage: Heat Rate Diversity & Flexible Dispatch

SI-SSA-0015-05413

Competitive Advantage: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

SI-SSA-0015-05414

Competitive Advantage: ~25% of Power's gas for generation comes from Marcellus

- Our combined cycle and peaking assets have been able to take advantage of locational gas price volatility driven by production and logistical constraints
- Lower cost shale supply provides additional savings during periods of lower residential gas demand

SI-SSA-0015-05415

Competitive Advantage: Locational advantage from short term basis volatility

- Annual basis benefits baseload units
- Intermediate units flexible to seasonal opportunities
- Combined Cycle and Peaking units positioned to optimize daily and hourly volatility

SI-SSA-0015-05416

ANNUAL FORWARD BASIS TO PJM-WEST AS OF 12/31/2013.

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on January 7, 2014

On Peak Basis to PJM-W on January 7, 2014

Hourly Generation and Load on January 7, 2014

- High gas market at $58/MMbtu setting power prices in PS zone on 1/7/14
- Higher basis to generation
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional steam and peaking generation available above day ahead commitment to gain value from real time market
- Fuel flexibility with coal/gas/oil optionality among available units

SI-SSA-0015-05417

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on July 18, 2013

On Peak Basis to PJM-W on July 18, 2013

Hourly Generation and Load on July 18, 2013

- High demand in constrained northern NJ
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional generation available above obligations to gain value from real time market spikes
- Gas advantage in procuring low cost shale supply to capture savings

SI-SSA-0015-05418

Sustainable Advantage: BGS Auction provides excellent opportunity to forward hedge our generation

BGS sales account for about a quarter of our forward portfolio of hedges

SI-SSA-0015-05419

PSEG

$/MWH; BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2012-2014 WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2014.

Sustainable Advantage: Hedging strategy designed to protect gross margin while leveraging the portfolio

		2014	2015	2016
Base Load (Nuclear and Base Load Coal)	Volume TWh	35	35	35
	% Hedged	100%	75-80%	30-35%
	Price $/MWh	$48	$51	$53
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	20	19	19
	% Hedged	35-40%	0%	0%
	Price $/MWh	$48	$51	$53
Total	Volume TWh	53-55	53-55	53-55
	% Hedged	75-80%	45-55%	20-30%
	Price $/MWh	$48	$51	$53

HEDGE PERCENTAGES AND PRICES AS OF FEBRUARY 11, 2014. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS. EXCLUDES SOLAR AND KALAELOA.

SI-SSA-0015-05420

Sustainable Advantage: PJM's capacity market is expected to continue to recognize locational value

$/MW-day	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016	**2016 / 2017**
Power's Average Prices	$153	$244	$162	$167	**$166**
Rest of Pool Prices	$16	$28	$126	$136	**$59**
Power's Capacity (MW)	10,400	10,600	10,300	9,000	8,600

2017/2018 RPM Auction Influenced By:

- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Updated Transfer Capabilities
- New Build/Cost of New Entry
- Demand Response

SI-SSA-0015-05421

Sustainable Advantage: Fuel advantage continues throughout the curve

Forward curve shows that Marcellus shale supply averages over $1.50/MMbtu discount year-round through 2018

SI-SSA-0015-05422

2013 AVERAGE 6/1/13-12/31/13; F= FORWARDS AS OF 12/31/13. LEIDY BASIS FROM ICE/BROKER QUOTES

PSEG Power's Value Proposition

- Well-positioned fleet of merchant generating assets concentrated in PJM market
- Advantaged by low cost structure, fuel diversity and dispatch flexibility
- Low environmental capital requirements
- Capacity uprates to enhance value of nuclear and combined cycle stations
- Consistent hedging strategy recognizes asset flexibility
- Continue to meet commitments and to provide free cash flow

PSEG FINANCIAL REVIEW & OUTLOOK

PSEG

We make things work for you.

SI-SSA-0015-05424

Strong financial position to support our business initiatives

2013 Financial Position

- ✓ Exceeded upwardly revised 2013 earnings guidance
- ✓ Pension fully funded
- ✓ Strong balance sheet and upgraded credit ratings

2014 and Beyond

- ✓ Continued positive earnings trend in 2014
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investments without equity issuance
- ✓ Growth in PSE&G investments with contemporaneous returns
- ✓ Diversified Power assets with a balanced hedge profile
- ✓ Growth in PSE&G Cash from Operations, with continued significant Cash from Operations/FFO at Power
- ✓ Increased Dividend by $0.04 to indicative annual rate of $1.48 for 2014
- ✓ Opportunity for consistent and sustainable dividend growth

SI-SSA-0015-05425

Exceeded upwardly revised guidance

in both businesses

PSEG Operating Earnings

E = ESTIMATE; CAPITAL INCLUDES AFUDC AND IDC.

SI-SSA-0015-05430

PSE&G's Capital Program drives double-digit growth in rate base and earnings over the 2013 to 2016 period

2013 – 2016E Rate Base CAGR in approved Growth of ~10%

SI-SSA-0015-05431

PSE&G's Cash from Operations and Power's Free Cash Flow support growth investments without the need for new equity

PSEG Sources and Uses

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$500M FROM 2014-2016
(2) OTHER CASH FLOW INCLUDES PSEG LI, HOLDINGS NET CASH FLOW, CASH, AND SHORT TERM DEBT
E = ESTIMATE

SI-SSA-0015-05432

Power's key credit metric supports incremental investment opportunities

- Increased contribution to earnings from the more stable regulated business allows us to reset Power's FFO/Debt threshold from 35% to 30%, providing additional financial flexibility
- Power's annual Cash From Operations and Funds From Operations each average ~$1.1B over the 2014 to 2016 period supported by:
  - Capacity Revenues
  - Hedged Generation
  - O&M Control
- Financial strength can be used to pursue future growth in both businesses beyond current plans

(1) ESTIMATE BASED ON APPROVED PROGRAMS

SI-SSA-0015-05433

Pension: Our Long Term Asset allocation strategy resulted in a ~17% increase in pension assets during 2013

PBO Funded Ratio	83%			Fully Funded Pension →	106%

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or ongoing low pricing of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulations, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators, including prudency reviews and disallowances,
- any deterioration in our credit quality or the credit quality of our counterparties,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations or increase the cost of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- delays or unforeseen cost escalations in our construction and development activities, or the inability to recover the carrying amount of our assets,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- increases in competition in energy supply markets as well as for transmission projects,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies,
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- an extended economic recession,
- an inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce, and
- changes in the credit quality and the ability of lessees to meet their obligations under our domestic leveraged leases.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.
The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-05456

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends.

PSEG is presenting Adjusted EBITDA because it provides investors with additional information to compare our business performance to other companies and understand performance trends. Adjusted EBITDA excludes the same items as our Operating Earnings measure as well as income tax expense, interest expense, depreciation and amortization and major maintenance expense costs at Power's fossil generation facilities. This information is not intended to be viewed as an alternative to GAAP information. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to Operating Earnings and Adjusted EBITDA with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

PSEG STRATEGY: GROWING A HIGH-QUALITY, LOW-RISK ENERGY INFRASTRUCTURE COMPANY

Daniel Cregg

EXECUTIVE VICE PRESIDENT AND CHIEF FINANCIAL OFFICER

Kathleen Lally

VICE PRESIDENT – INVESTOR RELATIONS

SI-SSA-0015-05458

PSEG

We make things work for you.

PSEG's Strategy

Investment program delivering results

Operational Excellence: Maintaining reliability and improving performance as we control costs in low price environment

Financial Strength: Strong financial position supports investment program and dividend growth

Disciplined Investment:
- Balanced business mix
- Robust pipeline of opportunities

Results:
- 3rd year of EPS growth
- Continued dividend growth
- Best in class utility growth rate
- Addition of efficient CCGT capacity enhances market position

SI-SSA-0015-05459

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A ~$12 billion infrastructure program producing high single digit rate base growth through 2020	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow in current environment and upside from market rule improvements
2015 **Assets $24B** **Operating Earnings $787M**	2015 **Assets $12B** **Operating Earnings $653M**

SI-SSA-0015-05460

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2015. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT AND PSEG LONG ISLAND ACTIVITY. SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: ReliabilityOne Mid-Atlantic Region's Most Reliable Electric Utility (14th consecutive year), Electric Light & Power's 2015 Utility of the Year, ReliabilityOne Outstanding Outage Response Time and Outstanding Customer Engagement • PSEG Power: Record output from combined cycle units • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Cost-control benefits continue
Financial Strength	• Operating earnings for 2015 of $2.91 per share at upper end of guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased dividend in 2015
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2016-2020) with increased investment in Transmission, Energy Strong, Gas System Modernization Program, and Electric and Gas distribution • Power capital program focusing on growth investments including Keys, Sewaren and Bridgeport Harbor, Nuclear and Fossil uprates, PennEast Pipeline, and Solar Source

Focus on building a reliable, efficient, clean energy infrastructure

2011 → 2012 → 2013 → 2014 → 2015

Selected Accomplishments

2011
- Expanded investment programs focused on infrastructure upgrades, energy efficiency, and major transmission projects*
- Sale of Texas generating assets
- Nuclear license extensions and uprates

2012
- Award winning Superstorm Sandy storm response restoring 2.1M customers
- Final federal approval for Susquehanna-Roseland transmission project
- 400 MW of new peaker capacity**

2013
- Expanded Solar investment
- 90% nuclear capacity factor for 9th straight year
- Record output from Linden CCGT and Salem 2 Nuclear Unit

2014
- Energy Strong program approved
- Advanced Gas Path uprates (through 2018)
- PSEG Long Island management contract effective

2015
- Gas System Modernization Project (GSMP) and Energy Efficiency Extension II approved
- New generation build starts Power fleet transformation
- Solar Source portfolio reaches 277 MW_{DC}***

Managing the total costs to customers while investing in the system

PSE&G Typical Residential Customer Bills*

- PSE&G customers' combined electric and gas bills declined 28% over the period
- Low gas prices and elimination of transition charges drove rate decreases

SI-SSA-0015-05466

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

Transforming Power's fleet to maintain strong market position

Economic Drivers	Outlook	Combined Cycle	Nuclear	Scrubbed Coal	Peakers	Renewable
Energy Margins	• Low natural gas and energy prices • Robust portfolio of gas pipeline contracts	✓	✓	✓	n/a	n/a
Capacity Markets	• Tightened rules proposed for capacity performance	✓	✓	✓	✓	n/a
Environmental Regulations	• Tighter air emissions standards	✓	✓	✓	✓	✓
Location	• Assets in well-designed markets, premium regions • Opportunities on brownfield sites	✓	✓	✓	✓	n/a
2016 - PSEG Power Total Capacity 11.9 GW		3.3	3.7	2.4	2.3	0.2
2019 - PSEG Power Total Capacity 13.5 GW *		5.3	3.8	2.4	1.8	0.2

- **Largest nuclear site** in the eastern U.S. and ownership in **large, fully scrubbed coal facilities** at Keystone and Conemaugh provide **economies of scale** that enhance energy margins in current low market, and provide for upside potential if prices improve
- **Dual fuel peakers** meet reliability criteria in capacity markets and provide option value in energy market. Opportunity exists to repower peakers that do not meet NJ HEDD environmental regulations
- **Combined cycle units Keys and Sewaren expected to be operational in 2018, and Bridgeport 5 expected to be operational in 2019,** will enhance emissions performance and have a combined average heat rate of approximately 6,600

SI-SSA-0015-05467

PSEG

*AS OF FEBRUARY 2016 APPROXIMATELY 1.8 GW OF CCGT GENERATION UNDER DEVELOPMENT – KEYS, SEWAREN 7 AND BRIDGEPORT HARBOR 5 , WHICH ARE TARGETED TO GO INTO SERVICE IN 2018/2019 ALONG WITH RETIREMENT OF OLDER SEWAREN UNITS.

Operating Earnings

Disciplined investment program and focus on operational excellence have supported growth

Power's diverse fuel mix and dispatch flexibility continue to generate strong earnings and free cash flow in low price environment

PSE&G's investment program has resulted in an increased contribution to PSEG's earnings

Focus areas over the business plan horizon

PSE&G

- **Operational excellence and cost control**
- **Capital program execution** – Transmission, Energy Strong and GSMP program
- **Regulatory framework** – Advocate for regulatory framework that provides support for long-term infrastructure programs
- **Continue to develop incremental growth opportunities**

PSEG Power

- **Operational excellence and cost control**
- **Timely and on budget construction of new growth opportunities** – Keys Energy Center, Sewaren 7 and Bridgeport Harbor
- **Strong performance at Nuclear and Fossil** to maximize fleet value in dynamic markets
- **Advocacy of constructive market rules** - Capacity markets and environmental regulations

PSEG Long Island

- **Continue execution** – Achievement of performance metrics

SI-SSA-0015-05470

PSEG's Value Proposition

- A stable platform with predictable earnings and a robust investment pipeline
- PSE&G – Best in class utility performance and growth profile
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Strong balance sheet – Supports stable credit rating, growth objectives and the potential for consistent and sustainable dividend growth

PSE&G strategy

Building a sustainable platform that balances reliability, customer rates and public policy to ensure growth at reasonable returns

SI-SSA-0015-05474

PSE&G's focus on meeting customer reliability and policy objectives are key to our investment strategy

2011	2012	2013	2014	2015

Selected Accomplishments

2011
- NJ Capital Infrastructure Program 2
- Energy Efficiency extension
- Major Transmission capital projects*
- Hurricane Irene/ October Snowstorm
- Mid-Atlantic ReliabilityOne Award

2012
- Hurricane Sandy storm response (2.1M customers restored)
- Transmission: Final federal approval for Susquehanna-Roseland (S-R) project
- National ReliabilityOne Excellence Award
- Mid-Atlantic ReliabilityOne Award
- EEI's Emergency Response Award

2013
- Solar Loan III
- Solar 4 All Extension
- Energy Strong program filed
- Mid-Atlantic ReliabilityOne Award
- Award for Outstanding Response to a Major Event

2014
- Energy Strong approved
- Transmission: North Central Reliability and Burlington-Camden projects placed in-service
- Bergen-Linden Corridor Upgrade project investment started
- Mid-Atlantic ReliabilityOne Award

2015
- Gas System Modernization Project (GSMP)
- Energy Efficiency Extension II
- Transmission: S-R and Mickleton-Gloucester projects placed in-service
- Mid-Atlantic ReliabilityOne Award
- Recognized for customer satisfaction by J.D. Power for both large electric and gas business service in the East

← Cost Control →

* INVESTMENT CONTINUED FOR SUSQUEHANNA-ROSELAND, BURLINGTON-CAMDEN, NORTH CENTRAL RELIABILITY, AND STARTED FOR NORTHEAST GRID AND MICKLETON-GLOUCESTER

SI-SSA-0015-05475

Building on our track record

Operational Excellence

- Strong reliability record, with plans for further improvement
- Cost control efforts

Financial Strength

- Meeting or exceeding earnings targets
- Maintain solid investment grade credit ratings

Disciplined Investment

- 14 investment programs approved over past seven years
  - ✓ Infrastructure focused
  - ✓ Policy alignment – across administrations – Solar, EE and other
- Win-Win: Job creation, environment benefits, low commodity prices, low interest costs, labor availability, federal tax benefits

SI-SSA-0015-05476

Operational Excellence

Reliability and Customer Service

- Named most reliable electric utility in the Mid-Atlantic region for 14th consecutive year
- Recognized by PA Consulting with the Outstanding Customer Engagement and Outstanding Outage Response Time awards
- Named 2015 Utility of the Year by Electric Light & Power Magazine
- Received Star of Energy Efficiency Award

SI-SSA-0015-05477

Achieved ~11% annual earnings growth

over the past four years through implementation of supportive rate mechanisms on our expanded capital program and cost control

SI-SSA-0015-05496

Focus on transforming Power's portfolio with reliable, efficient, and cleaner energy infrastructure

Selected Accomplishments

2011

- Hope Creek set annual output record
- Nuclear license extensions and uprates achieved

2012

- Peach Bottom 3 set annual output record
- Additional 400 MW of new peaker capacity at Kearny and New Haven
- Superstorm Sandy recovery initiated

2013

- Record annual output from Linden CCGT and Salem 2 Nuclear Unit
- 90% + nuclear capacity factor for 9th straight year
- Bethlehem Energy Center, 2nd gas pipeline connection added

2014

- Record annual output from Bergen CCGT
- PennEast pipeline investment
- CCGT Advanced Gas Path (AGP) uprate investment completed at Linden 1 & 2, 63 MW
- Established PSEG Long Island fuel management operations for 2015 start-up

2015

- Record CCGT fleet annual output
- Continued growth in fleet with 1,300 MW new CCGT's announced
  - Keys
  - Sewaren 7
- Prepared successful bid for 485 MW Bridgeport Harbor 5
- Projects Completed:
  - Peach Bottom EPU, 130 MW
  - Bergen 2 AGP uprate, 31 MW
- HEDD retirement
- Solar portfolio reaches 277 MW_{DC} as of March 2016

E=ESTIMATE. DATA AS OF MARCH 2016

Power's PJM assets are becoming more efficient

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape
- Readiness for Capacity Performance (CP), successful in CP auction

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel capability at 87% of load following and peaking units

SI-SSA-0015-05500

PSEG

* KEYS & SEWAREN 7 TO BE ADDED TO DISPATCH IN 2018E AND SEWAREN 1-4 WILL RETIRE.

PSEG Power has generating assets in three competitive markets

- Assets located near load
- Low cost portfolio with gas cost advantage
- Positioned to benefit from volatility in real-time markets
- Fleet meets new capacity performance standards
- 1,800 MW of new CCGT capacity under construction in PJM and ISO-NE

SI-SSA-0015-05501

PSEG Power developing 1,800 MW of new, efficient CCGT capacity in MD, NJ and CT

- Constructing the 755 MW CCGT Keys Energy Center in Maryland (SWMAAC*) at an estimated cost of $825 to $875 million
- Constructing a new 540 MW CCGT unit, Sewaren in New Jersey (EMAAC*) at a cost of $625 to $675 million which will replace older Sewaren units
- Constructing a new 485 MW CCGT unit, Bridgeport Harbor 5 (ISO NE), at a cost of $525 to $575 million
- Both Keys and Sewaren 7 are targeted to be in-service in 2018 and Bridgeport Harbor 5 in 2019
- Expanding civic stewardship roles and programs in neighboring communities

*SWMAAC = SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL
LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

SI-SSA-0015-05502

PSEG Power's fleet transformed

with focus on new investment and improvement in efficiency

2020E Projected

Fuel Diversity*

Total MW: 13,100

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

Energy Market Served*

Total MW: 13,100

- Load Following, 87% dual fuel
- Peaking
- Baseload

Energy Produced*

Total GWh: 65,000

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

SI-SSA-0015-05503

PSEG

*EXCLUDES SOLAR AND KALAELOA E = ESTIMATE
**INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

PSEG Power's fossil fleet expected to see improvements in efficiency

- AGP (Advanced Gas Path) investments
- CCGT material condition assessment
- Unit testing and testing coordination initiatives
- HEDD retirements
- Keys/Sewaren Combined Cycle Development (2018)
- Bridgeport Harbor 5 Combined Cycle Development (2019)
- Heat Rate Improvement converts to potential savings of $60-$65M in fuel expense (assuming $3/MB gas price)

SI-SSA-0015-05504

E = ESTIMATE

PSEG Power's fossil fleet among the lowest emitting in the industry

- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- With the addition of new units, emissions continue to improve

SI-SSA-0015-05505

E = ESTIMATE

PSEG Power's fossil fleet expected to reduce its carbon footprint

- Carbon emission rates projected to steadily approach EPA national pollution standards for New and Reconstructed Natural Gas Combined Cycle (1,000 lbs CO_2/MWh-gross)

SI-SSA-0015-05506

E = ESTIMATE

Nuclear is a critical element of our success

Hope Creek

- Operated by PSEG Nuclear
- PSEG Ownership: 100%
- Technology: Boiling Water Reactor
- Total Capacity: 1,176 MW
- Owned Capacity: 1,176 MW
- License Expiration: 2046
- Next Refueling
  - Fall 2016
- Uprate 18MW Spring 2018

Salem Units 1 and 2

- Operated by PSEG Nuclear
- PSEG Ownership: 57%
- Technology: Pressurized Water Reactor
- Total Capacity: 2,294 MW
- Owned Capacity: 1,317 MW
- License Expiration: 2036 and 2040
- Next Refueling
  - Unit 1 – Spring 2016
  - Unit 2 – Spring 2017

Peach Bottom Units 2 and 3

- Operated by Exelon
- PSEG Ownership: 50%
- Technology: Boiling Water Reactor
- Total Capacity: 2,502 MW
- Owned Capacity: 1,251 MW
- License Expiration: 2033 and 2034
- Next Refueling
  - Unit 2 - Fall 2016
  - Unit 3 - Fall 2017
- Uprate: 130 MW (PS Share)
  - Unit 2 - March 2015
  - Unit 3 – December 2015

SI-SSA-0015-05507

PSEG Power's Growth Investments

Site	Project	Estimate ($ Millions)	Benefits	Status
Peach Bottom	Peach Bottom EPU (2014 – 2015)	$403	Increased capacity: 130 MW	PB2 & PB3 completed in 2015
Linden/ Bergen/ BEC	Advanced Gas Path Uprates (AGP): Linden -- 63 MW Bergen -- 31 MW BEC – 58 MW	$120	Increased capacity and improved heat rate: ~152 MW capacity increase ~1.2% heat rate improvement	Completed: Linden (2014) Bergen (2015) Planned: BEC 2017/2018E
Kearny 13 & 14	LM6000 Engine Throttle Push	--	Increased capacity: 14.5 MW	2016E
Maryland	Keys, 755 MW CCGT	$825 - $875	Geographic diversity within PJM; highly efficient gas fired unit in SWMAAC	2018E
Sewaren	Sewaren Unit 7, 540 MW CCGT	$625 - $675	Improved efficiency and reliability; replaces Sewaren 1-4 steam units	2018E
Bridgeport, CT	Bridgeport Harbor 5, 485 MW CCGT	$525 - $575	Highly efficient gas fired unit in ISO-NE	2019E
Eastern PA to Mercer, NJ	PennEast Pipeline	$123	Estimated Earnings in 2019: $13 million	Underway
Various	6 Solar Projects	$241	2016/2017E increase renewable capacity by 136 MW_{DC}/105 MW_{AC}	2016/2017E

Total New Capacity – 2,200 MW

E = ESTIMATE.

SI-SSA-0015-05508

A position in renewable energy – Power's Solar Source

Solar Source portfolio

- Utility scale solar projects in 12 states in operation or under construction
- Long-term PPA's with creditworthy counterparties
- Lump sum, full wrap EPC* agreements

Asset Optimization

- Maintain high equipment availability
- Minimize operating expenses
- Seek additional revenue streams

SI-SSA-0015-05509

* EPC = ENGINEERING PROCUREMENT & CONSTRUCTION. E = ESTIMATE.

PSEG Power has other attractive sources of revenues to round out a robust portfolio

Gas Asset Optimization

- Large wholesale provider to PSE&G and others
  - Storage capacity of approximately 75 Bcf (in the Gulf and market regions)
  - Firm transportation of 1.3 Bcf/day on seven pipelines
- Off-system sales margins shared with residential customers
- Commercial & Industrial gas sales

Ancillary Services – Black start, reactive power, area regulation

LIPA fuel and energy dispatch management – Began management of 10-year contract in 2015

Kalaeloa, HI – 50% equity interest in a 208 MW combined cycle oil

New Haven Peakers – 129 MW, rate based contract with ISO-NE

SI-SSA-0015-05510

PSEG Power has demonstrated ability to control O&M

Cost control actions taken:

- Fossil plant assessment
- CCGT material condition assessment
- Vendor contract renegotiations
- Nuclear security services brought in-house to control costs
- Nuclear maintenance productivity study
- Nuclear outage efficiency initiative
- Materials management
- Nuclear excellence initiative
- Nuclear staff – Right sizing

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS. E=ESTIMATE

Power's 2016 operating earnings

incorporates impact from abnormally warm weather and retirement of capacity

SI-SSA-0015-05513

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO OPERATING EARNINGS. E = ESTIMATE.

PSEG Power – Delivering on priorities

Operational Excellence

- Fuel and technology-diverse fleet produced 55 TWh, 2% higher than 2014
- Nuclear capacity factor exceeded 90%; output of 30 TWh, close to 30.3 TWh is third best ever, record set in 2009
- Production records set at BEC, Linden and the CCGT fleet in total; Kearny 13 & 14 CTs
- Successful implementation of LIPA contract for fuel / generation dispatch.

Financial Strength

- Achieved earnings guidance in 2015
- Cost control programs held O&M to a 0.8% CAGR between 2011 and 2016
- Successful ongoing effort to influence outcomes in key markets showing success, e.g., price formation

Disciplined Investment

- Completed Peach Bottom EPU and AGP at Bergen 2; AGP planned for BEC in 2017/2018
- Repositioning the fleet with three new CCGTs:
  - Keys (2018)
  - Sewaren 7 (2018)
  - Bridgeport Harbor 5 (2019)
- Solar Source's portfolio is 277 MW_{DC}

SI-SSA-0015-05514

PSEG POWER
ER&T

SI-SSA-0015-05515

PSEG

We make things work for you.

Market Review: Markets in 2015 were affected by abnormal weather conditions

Q1: Periods of extremely cold temperatures resulted in high gas prices, significant basis differentials, and higher energy demand

Q2-Q4: A normal summer and mild December, combined with increased supply of gas, reduced energy prices and basis

SI-SSA-0015-05516

Market Review: Q1 2016 impacted by weather but forward gas and electric prices retain seasonal volatility

SI-SSA-0015-05517

Market Review: PSEG's extensive gas asset portfolio provides unparalleled access to Marcellus Shale gas

- PSEG Power maintains a robust portfolio of pipeline and storage assets in the Mid-Atlantic
- Marcellus Shale gas production reached 18.8 BCF/day in 2015
- PSEG Power procured over 423 BCF in 2015 with approximately 50% going to PSE&G's utility gas customers
- PSEG Power's gas for generation was 150 BCF in 2015, of which >75% was supplied by Northeast Shale gas
- Severe financial stress among the natural gas producer industry is expected to reduce production growth until gas prices rebalance to higher levels
- Investment in the PennEast pipeline expected to provide more access to Marcellus for PSEG

SI-SSA-0015-05518

Market Review: Completion of new pipeline infrastructure expected to move significant quantities of Marcellus gas out of the region by 2018

Pipeline capacity grows significantly by 2018

- Significant amount of new pipelines have already been built and more are in the advanced planning and development stage through 2018
- Gas production and pipeline takeaway capacity estimated to reach equilibrium in 2018 timeframe based on new pipeline development

SI-SSA-0015-05519

Regulatory Framework: New capacity and energy market designs in PSEG's core markets (PJM and New England) will better reward reliable generation units

	ISSUE /POLICY	OUTCOME
PJM	CAPACITY	• Higher payments for enhanced reliability (Capacity Performance) and lower energy revenues have raised absolute and relative value of capacity
	ENERGY PRICE FORMATION	• FERC is driving ISO's to improve their pricing constructs and rules – NOPRs addressing critical RTO issues
	DEMAND RESPONSE RULES	• Stricter rules for eligibility and deployment; focus returns to wholesale reliability/comparability after SCOTUS ruling
	STATE INTERVENTION	• LCAPP: Awaiting Supreme Court decision • Ohio PPA: Challenged at the local level by the IPP industry, PJM and FERC
ISO-NE	CAPACITY	• Continued tightness in capacity markets • Zonal demand curves ordered for FCA 11 (2021) • Nuclear and coal units under pressure; closure of Pilgrim nuclear plant
	ENERGY	• Proposed gas pipelines are receiving regulatory approvals slowly • 5 minute interval LMP settlements and fast start pricing expected Q2 2017
NYISO	CAPACITY	• Retirement of Fitzpatrick and Ginna and Western steam plants tighten market, but NYPSC directed to develop a clean energy standard that recognizes the value of nuclear
	ENERGY	• Improvement in price formation during reserve shortage conditions
FEDERAL	ENVIRONMENTAL REGULATIONS	• CPP rules stayed by SCOTUS • Some states will still prepare implementation plans for 2020+ timeframe

SI-SSA-0015-05520

PSEG Power's Portfolio: Our fleet is well positioned in key markets

PSEG Power's Portfolio: New York and New England

New York (757 MW)

- Single state ISO
- Multiple gas supplies to BEC gives fuel flexibility and access to Marcellus
- Long Island Power Authority Management Contract

New England (976 MW plus 485 MW new build)

- Small but dynamic market
- Significant improvement in market construct
- Ongoing potential for volatility in extreme (winter) weather conditions
- PSEG Bridgeport Coal plant retirement in 2021
- Gas pipeline infrastructure poses supply challenges/opportunity

+INCLUDES 485 MW NEW BUILD
*SUMMER INSTALLED GENERATING CAPACITY AS OF DECEMBER 31,2015

SI-SSA-0015-05522

Capacity Market Pricing: PJM's capacity market is transitioning to recognize operating performance as well as locational value

PJM's RPM Auction Results				
($/MW-day)	2015 / 2016*	2016 / 2017*+	2017 / 2018+	2018 /2019
Power's Average Prices	$168	$172	$177	$215
Rest of Pool Prices	$136	$59	$120	$165/$150 (CP/Base)
Power's Cleared Capacity (MW)	8,750	8,700	8,700	8,650
PJM Capacity Revenues ($M)	$537	$546	$562	$679

2019 Onwards RPM Auction Impacted By:

- Capacity Performance
- Convex Demand Curve
- Change in Net CONE
- Change in PJM Parameters
- Demand Response Rules
- Elimination of 2.5% Holdback
- Reduction in Load Forecast
- Environmental Retirement

ISO New England's FCA Auction Results				
($/MW-day)	2015 / 2016	2016 / 2017	2017 / 2018	2018 / 2019

PSEG Summary

- 2015 earnings of $2.91 were at the upper end of our upwardly revised operating earnings guidance of $2.85 - $2.95 per share
- Forecast growth at PSE&G supports our 2016 guidance of $2.80 to $3.00 per share
- Forecast high single-digit rate base growth at PSE&G on five year basis from 2015 to 2020, driven by investment in transmission and approved programs
- Power's investment program and continued focus on operational excellence with financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support current capital program and investment in new opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2016 is consistent with our long history of returning cash to the shareholder through the common dividend, with opportunity for consistent and sustainable growth

SI-SSA-0015-05557

PSEG

We make things work for you.

Daniel Cregg

EXECUTIVE VICE PRESIDENT AND CHIEF FINANCIAL OFFICER

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED, PUBLIC SERVICE ELECTRIC AND GAS COMPANY, PSEG POWER LLC AND PSEG SERVICES CORPORATION

Daniel J. Cregg was named executive vice president and chief financial officer for Public Service Enterprise Group Incorporated (PSEG) and its subsidiaries in October 2015.

Mr. Cregg is responsible for all financial functions, including Internal Audit Services, Investor Relations and Corporate Development. Given the array of financial instruments which serve as the primary means of selling wholesale energy to customers, Mr. Cregg also has responsibility for the Risk Management function, which provides independent oversight of the PSEG Power trading organization. In addition to finance, Mr. Cregg is responsible for the Strategy and Planning function. He is a member of PSEG's Executive Officer Group.

Prior to his current position, Mr. Cregg was vice president – finance for PSE&G, a role he assumed in June 2013. In 2006, Mr. Cregg was named vice president – finance for PSEG Power. In that capacity and in previous financial roles for Power, Mr. Cregg held leadership positions related to financial reporting and forecasting, investor communications, financings, rating agency interactions, external reporting, cash forecasting, financial valuations, competitive intelligence, and fundamental market modeling, with critical responsibilities in Power's development and strategic planning activities.

Previously, Mr. Cregg was director of PSEG corporate development. He joined PSEG in 1991 with overall responsibility for tax planning, strategy and compliance for PSEG Energy Holdings, including domestic and international tax structuring work for PSEG Global and PSEG Resources.

Before joining PSEG, Mr. Cregg spent five years with the accounting and consulting firm of Deloitte and Touche, providing consulting services to a wide range of clients with an emphasis on the energy industry.

Mr. Cregg holds a Master of Business Administration degree from the Wharton School of the University of Pennsylvania and is a graduate of Lehigh University, where he received a bachelor's degree in accounting.

SI-SSA-0015-05558

Kathleen Lally

VICE PRESIDENT – INVESTOR RELATIONS

PSEG SERVICES CORPORATION

Kathleen A. Lally was named vice president – investor relations of PSEG Services Corporation in January 2007.

Prior to joining PSEG Ms. Lally was a portfolio manager at the investment firm of Angelo Gordon & Company. She has extensive and diverse Wall Street experience, on both the buy side as an investor and sell side as an equity research analyst. She has worked on the buy side at JK Utility Advisory and Silcap, and has sell side experience at firms such as Salomon Brothers, Brown Brothers Harriman and DLJ-Pershing.

Ms. Lally currently serves on the Board of the NJ Chapter of the Leukemia & Lymphoma Society. Ms. Lally holds a Bachelor of Arts degree in political science from St. Peter's College and is a chartered financial analyst.

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-05562

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of March 6, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com , under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss .

SI-SSA-0015-05574

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2012 - 2016

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2017-2021E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth rate

SI-SSA-0015-05575

PSE&G's capital spending drives high single-digit growth in rate base

E = ESTIMATE.

SI-SSA-0015-05576

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-05577

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2016 to 2021E

2021E Fuel Diversity[1]
Total MW: 11,900

2016 Fuel Diversity
Total MW: 11,577

2021E Energy Produced[1]
Total GWh: 61,000

2016 Energy Produced
Total GWh: 51,510

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

Energy Produced increases by >18%

[1] REFLECTS ANNOUNCED EARLY RETIREMENT OF HUDSON AND MERCER UNITS IN MID-2017.
ALL PERIODS EXCLUDE SOLAR (257 MW_{AC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.
**2016 COAL INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS. E= ESTIMATE.

Power's free cash flow improves as construction program ends, providing funding for growth

PSEG Power
2017E – 2021E Capital Spending (1)

PSE&G
2017E – 2021E Capital Spending (1)

(1) CAPITAL INCLUDES IDC AND AFUDC. E = ESTIMATE.

SI-SSA-0015-05579

Strong credit metrics provide substantial investment capacity for increased utility investment

Average Funds From Operations / Debt
2017E – 2019E

	Power	PSEG
Estimate	~40%	Low – 20's
Minimum Threshold	30%	High - teens

Total Incremental Investment Capacity

Incremental capacity invested in utility would be matched with utility debt

SI-SSA-0015-05580

PSEG has demonstrated an ability to control O&M, with plans to reduce in 2017

(1) POWER EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON / MERCER EARLY RETIREMENT WRITE-DOWN, DISTRIBUTION EXCLUDES ELECTRIC AND GAS BAD DEBT. E = ESTIMATE.

SI-SSA-0015-05581

2017 Federal Tax Reform – PSEG is well positioned

Given positive non-utility contribution to earnings and a strong balance sheet, PSEG is well positioned for potential tax reform

Assumption	PSE&G	PSEG Power	PSEG Parent
Reduction of Corporate Tax Rate	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period	After-tax earnings and cash flow increase One-time non-cash earnings benefit from reduction in deferred tax liability	After-tax earnings and cash flow improve
100% Expensing of Capital Expenditures	Impact on rate base growth comparable to existing bonus depreciation rules	Cash flow improves	
Elimination of Deductibility of Interest Expense and Border Adjustment Tax	Change in cost anticipated to be passed through to customers	Well positioned given low debt balance Uncertainty on Border Adjustment Tax	Well positioned given low debt balance

SI-SSA-0015-05582

Opportunity for meaningful and sustainable dividend growth

SI-SSA-0015-05583

PSEG Summary

- 2016 Operating Earnings (non-GAAP) at upper end of revised guidance of $2.80 - $2.95 per share
- PSE&G capital spending provides high single-digit rate base growth for foreseeable future balanced between Transmission and Distribution
- Power expected to generate significant free cash flow following CCGT construction program and transformation to a more efficient generation fleet
- Strong balance sheet and cash flow support current capital program and new investment opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2017 demonstrates meaningful and sustainable dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

SI-SSA-0015-05584

PSEG's Value Proposition

- A stable platform with a robust investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile supporting the potential for consistent and sustainable dividend growth

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-05589

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of February 23, 2018.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. VICE PRESIDENT
INVESTOR RELATIONS

SI-SSA-0015-05591

PSEG

We make things work for you.

PSEG Strategy - Delivering Value

Operational Excellence: Improving reliability and customer service as we control costs in a low price environment

Financial Strength: Strong financial position supports investment program

Disciplined Investment:

- Program focused on achieving objectives through infrastructure investment that meets customer and shareholder needs
- Robust pipeline of opportunities

Results:

- Double digit growth in rate base and net income at PSE&G
- Reconfiguration of Power's generating fleet: higher quality, more efficient
- Annual growth in common dividend
- Strong credit metrics

SI-SSA-0015-05592

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A $11.5 - $13.2 billion infrastructure program with opportunities to expand, producing 7% - 9% annual rate base growth through 2022	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow and upside from market rule improvements
2017	2017
Assets $29B Net Income $973M Non-GAAP Operating Earnings* $963M	Assets $12B Net Income $479M Non-GAAP Operating Earnings* $505M

SI-SSA-0015-05593

ASSETS AND NET INCOME ARE FOR THE YEAR ENDED 12/31/2017. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO ENTERPRISE / OTHER ACTIVITY. *SEE SLIDE A FOR A RECONCILIATION OF NET INCOME TO NON-GAAP OPERATING EARNINGS, SLIDE B FOR RECONCILIATIONS FOR PSE&G AND PSEG POWER, AND SLIDE C FOR ENTERPRISE/OTHER.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: 16 consecutive years of recognition as the most reliable utility in the Mid-Atlantic region • PSEG Power: Improved nuclear capacity factors to ~94% in 2017; Fleet moving towards improved efficiency and environmental position • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Maintaining focus on efficiency, resiliency, and customer satisfaction
Financial Strength	• Non-GAAP Operating Earnings for 2017 exceeded the mid-point of guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • PSEG is a net beneficiary of recent tax legislation • Increased dividend in February 2018 – 14th increase in last 15 years
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2018-2022) with investments in Transmission, Electric and Gas distribution, Gas System Modernization Programs (GSMP), Energy Strong and Clean Energy • Potential for additional investments in Renewables and integration of Infrastructure with Customer Access • Power capital program, focused on completing construction at Keys, Sewaren and Bridgeport Harbor, will improve fleet efficiency and geographic diversity

SI-SSA-0015-05594

Focus on earning our cost of capital has provided for growth in operating earnings* and dividends

SI-SSA-0015-05595

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO NON-GAAP OPERATING EARNINGS.

PSEG Policy and Regulatory focus

on mechanisms that provide customers with clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- Requesting ~1% increase in revenue primarily to recover investments, partially offset by benefits related to tax reform

Long-Term Infrastructure Investment Platform

- BPU approved policy providing for constructive investment recovery mechanism encouraging investment in long-term infrastructure

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy that recognizes the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-05596

PSE&G – New Jersey's largest:

- Electric and Gas Distribution utility
- Transmission business
- Investor in renewables and energy efficiency
- Appliance service provider

	Electric	Gas
Customers Growth (2013 – 2017)	2.2 Million 0.6%	1.8 Million 0.6%
2017 Electric and Gas Sales	40,740 GWh	2,397M Therms*
Sales Mix (2017)		
Residential	32%	59%
Commercial	58%	37%
Industrial	10%	4%

PSE&G 2017 Rate Base

* GAS FIRM SALES ONLY.

SI-SSA-0015-05597

PSE&G Investment – Delivering growth

- Our rate base is roughly balanced between federal and state jurisdictions
- Non-GAAP operating earnings growth aligned with rate base growth

SI-SSA-0015-05598

Developing investment opportunities

with near-contemporaneous recovery mechanisms

2018-2022E PSE&G Capital with Program extensions by Recovery Method

$11.5B - $13.2B

$13B plan includes program extension filings comparable to current investment levels:

- GSMP II
- Energy Strong (ES) II
- Clean Energy Future (CEF) filing
  - expansion of current energy efficiency programs
  - electric vehicle programs
  - energy storage
  - LED streetlights

Broad opportunity set of investment potential driven by customer expectations and public policy

FERC Formula Rates	Traditional Recovery Mechanisms	Clause Recovery Mechanisms
Transmission	Distribution Base Rates	Infrastructure / Clean Energy

SI-SSA-0015-05599

Operational Excellence – O&M costs

Demonstrated ability to control O&M, preserving earnings and returns in a low sales growth environment

Cost control actions:

- PSE&G is utilizing the Lean Six Sigma discipline to achieve costs savings and process improvements
- Regular organizational refinement to streamline processes
- Continued focus on vendor and inventory practices ensuring maximum value
- Successful management of pension

SI-SSA-0015-05600

Continued strong rate base growth – off a higher base

SI-SSA-0015-05619

Distribution Base Rate Case Filing

- **Dockets** ER 18010029 (Electric) and GR 18010030 (Gas)
- **Filed** January 12, 2018; **Anticipate new rates** Fourth Quarter 2018
- **Test year** – July 1, 2017 through June 30, 2018 (with certain pro forma adjustments)
- **Rate base** of $9.6B ($5.6B E; $4B G) as of December 31, 2018
- **ROE** request of 10.3%; **Capitalization structure** with 54% equity
- **Requested Increase:** ~1% relative to overall revenue
- **O&M and Sales** are roughly flat to last rate case eight years ago
- **Capital recovery** beyond clauses and $125M increase in Depreciation rate
- **Decoupling** of revenues from sales volumes
- **Taxes** – lower tax rate and flow back of deferred taxes to offset storm costs and reduce impact on customer bills
- **Pending updates:**
  - **Taxes** - BPU order to lower rates effective April 1 will accelerate savings planned in rate case; update for other tax impacts such as loss of bonus depreciation
  - **9x3 update** to be filed in May

Overall bill for the typical PSE&G residential customer, even after consideration of the ~1% request, would remain >15% lower than bills after last base rate case

SI-SSA-0015-05620

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~20% since our last rate case
- Provided Gas bill credits totaling ~$670 per customer since 2012
- Continued investment at the current rate of growth would take about a decade to equal the 2010 bill rates (adjusted for growth in CPI/disposable income)

- Regional price comparison** - Gas is 2nd lowest and Electric is lower than average
- Distribution revenue component is the lowest in the state for Gas and second lowest for Electric

SI-SSA-0015-05621

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

New Jersey BGS accounts for ~10 TWh of our hedging

Retail marketing will complement BGS

Tax Cuts and Jobs Act: PSEG well positioned

given positive non-utility contribution to earnings and a strong balance sheet

Federal Tax Reform	PSE&G	PSEG Power	Enterprise/Other
Reduction of Corporate Tax Rate to 21%	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period Estimated excess deferred tax balance of $2.1 Billion at YE 2017	After-tax earnings and cash flow increase One-time, non-cash earnings benefit from reduction in deferred tax liability reflected in 2017 GAAP results: $588 Million	After-tax earnings and cash flow increase One-time, non-cash earnings benefit from reduction in deferred tax liability reflected in 2017 GAAP results: $147 Million
Expensing of Capital Expenditures	Bonus depreciation eliminated post 2017 Rate base growth increases by ~1%/year through 2022 relative to prior tax rules	100% expensing -- cash flow increases	
Interest Disallowance Rule 30% Limitation Based on Tax – EBITDA	Not applicable	Well positioned given low debt balance	Well positioned given low debt balance

OUR ESTIMATES AND ANALYSIS ARE PRELIMINARY. THE SEC HAS PROVIDED COMPANIES ONE YEAR TO FINALIZE 2017 ACCOUNTING REQUIREMENTS. FURTHER ADJUSTMENTS IN 2018 MAY BE REQUIRED.

SI-SSA-0015-05625

Tax reform impacts – PSE&G

Lowered federal corporate tax rate from 35% to 21%,

- Lowers costs and annual revenue requirements by ~$275M
- Updated Transmission Formula rate lowered by $148M effective 1/1/2018
- Incorporated ~$130M reduction into Distribution base rate case filing

Lower tax depreciation benefits (no bonus depreciation, lower tax rate)

Excess deferred taxes due to lower tax rate of ~$2.1B

- Protected ~$1.6B – Flow back period over the lives of the assets (ARAM method)
- Unprotected ~$0.5B – Flow back period will be addressed with the BPU and FERC

Financial impact

✓ **Rate base growth** - Lower deductions and planned flow back increases rate base by >$1B

✓ **Average annual earnings increase by ~$20M in 2019 growing to ~$30M in 2022**

✓ **Investment program and metrics to support strong credit rating is maintained**

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-05631

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of February 23, 2018.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. Kathleen Lally

VICE PRESIDENT
INVESTOR RELATIONS

SI-SSA-0015-05633

PSEG

We make things work for you.

PSEG Strategy - Delivering Value

Operational Excellence: Improving reliability and customer service as we control costs in a low price environment

Financial Strength: Strong financial position supports investment program

Disciplined Investment:

- Program focused on achieving objectives through infrastructure investment that meets customer and shareholder needs
- Robust pipeline of opportunities

Results:

- Double digit growth in rate base and net income at PSE&G
- Reconfiguration of Power's generating fleet: higher quality, more efficient
- Annual growth in common dividend
- Strong credit metrics

SI-SSA-0015-05634

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A $11.5 - $13.2 billion infrastructure program with opportunities to expand, producing 7% - 9% annual rate base growth through 2022	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow and upside from market rule improvements
2017 **Assets $29B** **Net Income $973M** **Non-GAAP Operating Earnings* $963M**	2017 **Assets $12B** **Net Income $479M** **Non-GAAP Operating Earnings* $505M**

ASSETS AND NET INCOME ARE FOR THE YEAR ENDED 12/31/2017. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO ENTERPRISE / OTHER ACTIVITY. *SEE SLIDE A FOR A RECONCILIATION OF NET INCOME TO NON-GAAP OPERATING EARNINGS, SLIDE B FOR RECONCILIATIONS FOR PSE&G AND PSEG POWER, AND SLIDE C FOR ENTERPRISE/OTHER.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: 16 consecutive years of recognition as the most reliable utility in the Mid-Atlantic region • PSEG Power: Improved nuclear capacity factors to ~94% in 2017; Fleet moving towards improved efficiency and environmental position • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Maintaining focus on efficiency, resiliency, and customer satisfaction
Financial Strength	• Non-GAAP Operating Earnings for 2017 exceeded the mid-point of guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • PSEG is a net beneficiary of recent tax legislation • Increased dividend in February 2018 – 14th increase in last 15 years
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2018-2022) with investments in Transmission, Electric and Gas distribution, Gas System Modernization Programs (GSMP), Energy Strong and Clean Energy • Potential for additional investments in Renewables and integration of Infrastructure with Customer Access • Power capital program, focused on completing construction at Keys, Sewaren and Bridgeport Harbor, will improve fleet efficiency and geographic diversity

SI-SSA-0015-05636

Focus on earning our cost of capital has provided for growth in operating earnings* and dividends

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO NON-GAAP OPERATING EARNINGS.

PSEG Policy and Regulatory focus

on mechanisms that provide customers with clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- Requesting ~1% increase in revenue primarily to recover investments, partially offset by benefits related to tax reform

Long-Term Infrastructure Investment Platform

- BPU approved policy providing for constructive investment recovery mechanism encouraging investment in long-term infrastructure

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy that recognizes the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-05638

PSE&G – New Jersey's largest:

- Electric and Gas Distribution utility
- Transmission business
- Investor in renewables and energy efficiency
- Appliance service provider

	Electric	Gas
Customers Growth (2013 – 2017)	2.2 Million 0.6%	1.8 Million 0.6%
2017 Electric and Gas Sales	40,740 GWh	2,397M Therms*
Sales Mix (2017)		
Residential	32%	59%
Commercial	58%	37%
Industrial	10%	4%

PSE&G 2017 Rate Base

* GAS FIRM SALES ONLY.

SI-SSA-0015-05639

PSE&G Investment – Delivering growth

- Our rate base is roughly balanced between federal and state jurisdictions
- Non-GAAP operating earnings growth aligned with rate base growth

SI-SSA-0015-05640

Developing investment opportunities

with near-contemporaneous recovery mechanisms

2018-2022E PSE&G Capital with Program extensions by Recovery Method

$11.5B - $13.2B

$13B plan includes program extension filings comparable to current investment levels:

- GSMP II
- Energy Strong (ES) II
- Clean Energy Future (CEF) filing
  - expansion of current energy efficiency programs
  - electric vehicle programs
  - energy storage
  - LED streetlights

Broad opportunity set of investment potential driven by customer expectations and public policy

Utility of the Future represents potential investment opportunity to sustain annual rate base growth into the next decade

SI-SSA-0015-05644

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, highly efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (414 MW_{DC}/325 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-05645

Power has a diverse fleet of generating assets which enables it to respond to market needs

Fuel Diversity 2017*

Total MW: 10,458

Energy Produced 2017*

Total GWh: 51,089

- Gas
- Nuclear
- Coal
- Oil
- Pumped Storage

SI-SSA-0015-05646

PSEG

* EXCLUDES SOLAR (414MW$_{DC}$ /325MW$_{AC}$) AND KALAELOA (104MW).

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2017 to 2020E

2020E Fuel Diversity
Total MW: 11,800

2020E Energy Produced
Total GWh: 65,500

2017 Fuel Diversity[1]
Total MW: 10,458

2017 Energy Produced[1]
Total GWh: 51,089

- Gas
- Nuclear
- Coal
- Oil
- Pumped Storage

Energy Produced increases by >28%

SI-SSA-0015-05647

PSEG

[1] REFLECTS RETIREMENT OF HUDSON AND MERCER UNITS ON JUNE 1, 2017.
ALL PERIODS EXCLUDE SOLAR (414 MW_{DC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.
E= ESTIMATE.

Power's fleet is well-located with access to shale gas production

- PSEG Power procured approximately 360 BCF in 2017 with approximately 50% going towards PSE&G's utility gas customer usage
- PSEG Power's gas for PJM generation was ~65 BCF in 2017, of which >85% was supplied by Northeast Shale gas

- Significant amount of new pipelines have already been built and more are in construction / development
- Gas production and pipeline takeaway capacity expected to be more balanced in 2018 timeframe

SI-SSA-0015-05648

E = ESTIMATE.

Power has demonstrated its ability to control O&M

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON/MERCER EARLY RETIREMENT.

SI-SSA-0015-05649

Power's capital needs decline following construction of new capacity, enhancing free cash flow

E=ESTIMATE. DATA AS OF FEBRUARY 2018.
EXCLUDES NUCLEAR FUEL. INCLUDES IDC.

SI-SSA-0015-05650

Strong financial position driven by PSE&G with meaningful contribution from Power

	2017 Financial Position
Earnings	✓ Delivered on 2017 guidance under challenging conditions ✓ Increased PSE&G earnings contribution
Investment	✓ Executed major PSE&G capital program balanced between Transmission and Distribution ✓ Focused on completion of Power's construction program
Cash Flow and Credit Metrics	✓ PSEG business mix yields net benefits from recent tax reform ✓ Produced stable and strong PSE&G cash from operations ✓ Maintained strong credit metrics
Dividends	✓ Increased common dividend by 4.7% or $0.08 per share

SI-SSA-0015-05651

SI-SSA-0015-05657

PSEG's Value Proposition

- A stable platform with a $13-$15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 111-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

Distribution Base Rate Case Filing

- **Dockets** ER 18010029 (Electric) and GR 18010030 (Gas)
- **Filed** January 12, 2018; **Anticipate new rates** Fourth Quarter 2018
- **Test year** – July 1, 2017 through June 30, 2018 (with certain pro forma adjustments)
- **Rate base** of $9.6B ($5.6B E; $4B G) as of December 31, 2018
- **ROE** request of 10.3%; **Capitalization structure** with 54% equity
- **Requested Increase:** ~1% relative to overall revenue
- **O&M and Sales** are roughly flat to last rate case eight years ago
- **Capital recovery** beyond clauses and $125M increase in Depreciation rate
- **Decoupling** of revenues from sales volumes
- **Taxes** – lower tax rate and flow back of deferred taxes to offset storm costs and reduce impact on customer bills
- **Pending updates:**
  - **Taxes** - BPU order to lower rates effective April 1 will accelerate savings planned in rate case; update for other tax impacts such as loss of bonus depreciation
  - **9x3 update** to be filed in May

Overall bill for the typical PSE&G residential customer, even after consideration of the ~1% request, would remain >15% lower than bills after last base rate case

SI-SSA-0015-05662

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~20% since our last rate case
- Provided Gas bill credits totaling ~$670 per customer since 2012
- Continued investment at the current rate of growth would take about a decade to equal the 2010 bill rates (adjusted for growth in CPI/disposable income)

- Regional price comparison** - Gas is 2nd lowest and Electric is lower than average
- Distribution revenue component is the lowest in the state for Gas and second lowest for Electric

SI-SSA-0015-05663

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

Tax Cuts and Jobs Act: PSEG well positioned

given positive non-utility contribution to earnings and a strong balance sheet

Federal Tax Reform	PSE&G	PSEG Power	Enterprise/Other
Reduction of Corporate Tax Rate to 21%	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period Estimated excess deferred tax balance of $2.1 Billion at YE 2017	After-tax earnings and cash flow increase One-time, non-cash earnings benefit from reduction in deferred tax liability reflected in 2017 GAAP results: $588 Million	After-tax earnings and cash flow increase One-time, non-cash earnings benefit from reduction in deferred tax liability reflected in 2017 GAAP results: $147 Million
Expensing of Capital Expenditures	Bonus depreciation eliminated post 2017 Rate base growth increases by ~1%/year through 2022 relative to prior tax rules	100% expensing -- cash flow increases	
Interest Disallowance Rule 30% Limitation Based on Tax – EBITDA	Not applicable	Well positioned given low debt balance	Well positioned given low debt balance

OUR ESTIMATES AND ANALYSIS ARE PRELIMINARY. THE SEC HAS PROVIDED COMPANIES ONE YEAR TO FINALIZE 2017 ACCOUNTING REQUIREMENTS. FURTHER ADJUSTMENTS IN 2018 MAY BE REQUIRED.

SI-SSA-0015-05667

Tax reform impacts – PSE&G

Lowered federal corporate tax rate from 35% to 21%,

- Lowers costs and annual revenue requirements by ~$275M
- Updated Transmission Formula rate lowered by $148M effective 1/1/2018
- Incorporated ~$130M reduction into Distribution base rate case filing

Lower tax depreciation benefits (no bonus depreciation, lower tax rate)

Excess deferred taxes due to lower tax rate of ~$2.1B

- Protected ~$1.6B – Flow back period over the lives of the assets (ARAM method)
- Unprotected ~$0.5B – Flow back period will be addressed with the BPU and FERC

Financial impact

✓ **Rate base growth** - Lower deductions and planned flow back increases rate base by >$1B

✓ **Average annual earnings increase by ~$20M in 2019 growing to ~$30M in 2022**

✓ **Investment program and metrics to support strong credit rating is maintained**

Tom O'Flynn *AES Corporation - EVP, CFO*

CONFERENCE CALL PARTICIPANTS

Brian Chin *BofA Merrill Lynch - Analyst*

PRESENTATION

Brian Chin - *BofA Merrill Lynch - Analyst*

We will get started with our second-to-last panel. This panel is going to focus on what is the right capitalization and way to create value in an era of potentially rising interest rates. And I know that as the Merrill Lynch Utilities analyst, usually the question I get -- when I have a Merrill Lynch financial advisor call me up, usually the first question I get is what is our view of interest rates and how do I know that I can look at utilities in a period of rising interest rates.

With me today to help navigate this kind of question and to help look at things from a utility perspective, I am joined by two Chief Financial Officers. To my immediate right, I am joined by Caroline Dorsa. Caroline was named Executive Vice President and Chief Financial Officer for Public Service Enterprise Group in April 2009. She has held a number of different positions at PSE&G, but prior to joining PSE&G, she also had a senior management position at Merck. And then she was also the Senior Vice President and Chief Financial Officer at Avaya. Caroline holds a BA from Colgate University and an MBA from Columbia Business School.

And then to the far right -- to my far right, I am also joined by Tom O'Flynn, who is the Executive Vice President and Chief Financial Officer of AES Corporation. Tom joined AES in September 2012 as the Chief Financial Officer. Prior to that, Tom had served for more than two decades in energy finance and utility -- or has had two decades of utility and energy finance experience. He was also the Chief Financial Officer at PSE&G, so we have a little bit of a PSE&G family tree here. Prior to PSE&G, Tom spent 15 years at Morgan Stanley's Global Power and Utility Group, ultimately serving as head of the North American Power unit. Tom has a BA in economics from Northwestern University and an MBA from the University of Chicago. Thank you very much for joining me on the panel. I very much appreciate it.

And in a similar vein to one of the other panels that we had earlier, rather than having prepared remarks from the panelists, we are going to go ahead and jump right into Q&A. This is a little bit more of a macroeconomic-oriented panel here. And so I thought just having a broad discussion about interest rates, how to create value as a utility CFO in a period of rising interest rates, we are just going to go right into it.

To get us started, let me ask you the same question that I get from many of the investors that call me. What is your view on the direction of interest rates going forward? Are we in for a moderate or a sharp rise in interest rates? And how do we think about historical periods of precedent that might reflect where we are at today? Caroline, what is your general thought on the outlook?

Caroline Dorsa - *PSEG - EVP, CFO*

Sure. I am certainly not Ben Bernanke, so I can't really forecast as well as he, perhaps. I think what we have seen has been truly historical aberration in terms of how low interest rates have been. So we talk about trending and things, it is very, very different, the environment that hopefully we are coming out of, which really doesn't have almost historical precedent.

So I think what we have been seeing is maybe a move back to a more normal interest rate environment and a more normal forward curve environment than we have had in the past.

THOMSON REUTERS

SI-SSA-0015-05673

In terms of how I think about what that has meant for us as we think about creating value, one of the things that we know and we have all seen this is when we were coming into and through this abnormally low interest rate environment, the important thing for us of course is the ability to earn reasonable ROE and the authorized returns that we are getting consistent with spreads [between] interest rates, and those ROEs did not come down ratably as well. So you saw ROEs continue to provide reasonable return.

I think what that means is as the interest rates appear to be coming back up -- and of course we had a little back-and-forth this year -- you wouldn't see ROEs going up ratably because you didn't see them coming down. So there has been reasonable prudence here as we have thought about the ability for regulators to incent utility investment.

So I look at that as the opportunity to continue, presumably, a relatively consistent pattern of ROEs, and of course in some of the things that we have in quals recovery mechanisms, they also reflect as we get approvals our actual embedded cost of debt.

Brian Chin - *BofA Merrill Lynch - Analyst*

Right, right. Tom?

Tom O'Flynn - *AES Corporation - EVP, CFO*

Like Caroline, I am not sure we try to be prognosticators of global interest rates. I think we more try to prepare -- take advantage of where we are, which is clearly very low, and prepare for changes going forward.

So from our standpoint, as we think about our financings, we are in 20 countries, so we really think about rightsizing and aligning the currencies and the duration of the debt at the local businesses. So many of our projects -- businesses are either projects financed with long-term debt, or where we have businesses, then we do it on a more genco or corporate style within the country, or in a couple of cases, within a region.

So certainly this year we have seen very low interest rates. We have done many billions of refinancing; certainly been done at the parent level, done over $1 billion. We have done it -- the Midwest has done almost $1 billion. We have done it down in the Southern Cone and in Asia, really just programmatically have gone through refinancing opportunities.

Some of them have been to take advantage of very low interest rates and some of them have been to also push out maturities. So at this point, we are about [85%] long-term, and it feels good to keep on taking advantage, like a lot of other of our peers, it takes -- I think it is our job to take advantage of these low rates and very attractive markets, where we can get low cost and long duration, long maturities, so we are basically prepared in the event the wrong kind of speak, the wrong kind of hand wave comes out of Washington and things happen that has got less impact to us, to be honest.

The other thing we do look at is obviously being in multiple countries, we are probably less focused on impacts on ROE and things. We have some adjustments overseas. It is a modest impact for us perhaps in the Midwest, in Indiana. But we are more -- we are focused on currency changes to the extent that interest rates change on a relative basis in the US versus globally. So that is something we also look to. So certainly all our debts in our functional currency locally gives us protection. We do do some hedging. But we are cognizant that on an open basis, about $0.06 of our earnings or so -- for a 10% change in relative currencies, that is about a $0.06 impact on an open basis to EPS. So we try to manage that thoughtfully.

Brian Chin - *BofA Merrill Lynch - Analyst*

Right. Well, I guess on that point, Tom, when we talk about refinancing different parts of the capital structure to take advantage of lower rates, is there a lot more room for that that you see, not only at AES, but for the utilities industry as a whole? Do you think that there is still a lot of firepower in terms of refinancing or to capture a little bit of extra value? Or do you think that most of that has largely been done by now?

THOMSON REUTERS

SI-SSA-0015-05674

Tom O'Flynn - *AES Corporation - EVP, CFO*

No, I think we still have firepower, and I think we will do -- I think we have done $6 billion, $7 billion this year; I don't think we will do that. But I think there is still some firepower, especially as we look forward, just some [call] protection, other things that make it more expensive in 2013, but it may be more economic in 2014 or 2015. So we may have some more flexibility where it is worth it to go after it.

So we will certainly keep on doing it. And also, to the extent -- occasionally we have a realignment of our businesses, maybe modest changes, so that allows us to also look at refinancing in conjunction with that. Those are more isolated cases.

Brian Chin - *BofA Merrill Lynch - Analyst*

Okay. And then Caroline, you had mentioned that we might be in a historically low aberration in terms of interest rates. Let's say that your general view ends up being right, that we are in a period now of more rising interest rates. Does this tilt the value proposition as a CFO more towards nonregulated businesses? Does it tilt the value proposition more towards less bond-like areas of organic investment, moving away from dividend growth and more towards earnings growth or other types of recovery-sensitive business models? How do you think about that?

Caroline Dorsa - *PSEG - EVP, CFO*

That's a good question, Brian. So we think about -- in terms of the business model and the business mix, what we look to in the utility is the ability to get a reasonable ROE on a reasonable capital structure. And we have a lot of investments; as you know, energy is strong. And already in our base business, the transmission investments that we have, which earn 11.68 or more on the ROE. So our core is to ensure that we can earn that authorized return.

As I said, some of our -- as we get new quals approvals, they get interest rate resets on the weighted average balance of cost of debt for the utility. So a little bit of protection there.

But in terms of business mix between utility to power, I look at it fundamentally from -- if we are looking at power investments, do those investments generate a positive NPV at an appropriate WACC. So rather than think about it, well, if there are higher interest rates, that means I should think less about the utilities.

I do it from the perspective of what is the NPV generation opportunity potential of a power investment with an appropriate long-term WACC. And of course, we use a long-term interest rate for that WACC, so we are not moving it every month or so. And then on the utility, what is the opportunity for us in terms of getting an appropriate ROE and putting that capital to work.

It doesn't have an impact for us relative to thinking about trade-offs of our investment to dividend at all, given where we are starting. Because obviously we start from a position of having a very nice and strong balance sheet on the power side. We start with debt-to-cap at about 30% and the rating agencies -- S&P recently upgraded us. So we start at a nice position with that balance sheet, and with power not having a lot of capital needs, a lot of free cash flow.

So one doesn't have to be traded off against the other. It is really about, we have got a balance sheet, we have got capacity, we do compete for capital in the Company. So can we earn a reasonable ROE on utility investments? Do we have positive NPV investment opportunities in power? And that is how we think about the business mix. What falls out, falls out. Because it is all about where is the shareholder return.

Brian Chin - *BofA Merrill Lynch - Analyst*

That actually makes a lot of sense. I guess in other words, your hurdle rate goes up as interest rates goes up to offset the change in rates, and so you end up -- it ends up being a push.

THOMSON REUTERS

SI-SSA-0015-05675

Caroline Dorsa - *PSEG - EVP, CFO*

Exactly.

Brian Chin - *BofA Merrill Lynch - Analyst*

One question that I think was sort of an interesting development in this space over the last year was the creation of the yieldco mechanism, which arguably one could view as taking advantage of very, very low interest rate and helping to separate out a bond-like set of assets with a bond-like valuation.

How do you think about -- how do you think about this development in the industry? Is this something that you view as potentially a game changer for how utilities look at long-term contracted assets? Or do you view it more as this is potentially a little bit of a cyclical development here, and if we are in a period of rising interest rates, we are probably going to see less of this activity going forward?

Tom O'Flynn - *AES Corporation - EVP, CFO*

Yes, I would say for certain situations, it could make sense, but I think those will be more limited. We did try something of a similar vein up in the Toronto Exchange in the second quarter. We have had a JV in the solar space, Silver Ridge with Riverstone for many years, and that is an entity that generates very strong cash core earnings -- in fact, it will be probably about $0.01, $0.015 dilutive to us this year -- but it has good cash flow.

So we looked at doing a yieldco vehicle. We made the judgment over a year ago to look at Toronto, because that seemed to be perhaps home to a few more yield vehicles, I think, in our (inaudible) that that kind of vehicle can also work here. But that was essentially -- for us, that has been a separate JV, so it was easy for us to carve that out. That has been independent since its inception. But it was really playing off the arbitrage of strong cash, low earnings. So it was a natural.

We stepped back from that -- that portfolio is a mix of European solar, then we have a large solar project out in California that is still under construction. We didn't think it was the right time to step back. But we may well look at another shot at doing something like that. I think we would wait until next year to do that, when Mount Signal, our project under construction, is fully operational, so it makes more sense.

On a broader basis, clearly we have taken note of the yieldco structure. I think all the stars have to be aligned, and we haven't found the stars to be aligned, at least yet, in our portfolio. When I say aligned, I think you have to see a differentiation between earnings and cash. There has to be a tax path. Tax people always get into this game, right? As well as find the right mix of assets. So for us, nothing jumps off the page, but opportunities like that, we continue to look at.

We obviously have carveouts in our business at a country level. We have three publicly-traded equity vehicles, two in Brazil and one in Chile. So we certainly see the benefits in some cases of an independently-traded public vehicle, but it may not be in the yieldco structure.

Brian Chin - *BofA Merrill Lynch - Analyst*

Right. I am going to go ahead and pause here and see if there are any questions from the audience. We do have two Chief Financial Officers here talking about value creation in a rising interest rate environment. Any questions from the group?

We do have a couple of topics that I want to touch base on. Both of you are in positions where you're cash flow positive, if you look at things from an operating cash flow, maintenance CapEx perspective. So you have a lot of options on which to deploy your capital.

THOMSON REUTERS

SI-SSA-0015-05676

Does a rising interest rate environment tilt you a little bit away from delevering? Both of you have been in positions where you are actively delevering the balance sheet or have the ability to do so. Does it actually make more sense to lever up the balance sheet here and reverse course or how do you think about that?

Caroline Dorsa - *PSEG - EVP, CFO*

So from our perspective, the things that we are doing in the utility, approved programs and obviously what will be filed for Energy Strong, would in our forecast provide incremental leverage at the utility completely consistent with the capital structure. And so we have been taking -- as Tom mentioned -- taking advantage of interest rates as they have been low. We did two 30-year issuances because we really thought, well, that was a good capture.

So I don't -- we will not be from a net perspective delevering, because we have got the utility growth. But of course, because we are keeping that regulatory capital structure, we are going to do that ratably as it is appropriate for the capital structure, as opposed to doing a lot of financing in advance.

From the power side, because of the position that we are in, we have flexibility. Some of that power flexibility will be used -- if we have all of the approvals that we are seeking, we will have a little more leverage on the power side. But we are balancing between that issue of how much leverage do you put on. We want to have an appropriate balanced WACC, consistent with an appropriate capital structure, and then looking at the cost of debt.

So I think there is more opportunity for us if we have all of Energy Strong approved. As I think I mentioned earlier in the year when we talked about Energy Strong, it would be a little bit more indebted power than where we are now. That would be consistent with growing the Company's overall investment opportunity.

So I wouldn't get out ahead of that, but I see that as opportunity and we have got room to do that. We still don't have an interest rate environment that is topped out, so we are still at rates that have a nice profile for us, even if we don't issue tomorrow. So I think we are in good shape.

Brian Chin - *BofA Merrill Lynch - Analyst*

Tom?

Tom O'Flynn - *AES Corporation - EVP, CFO*

Yes, from our standpoint, I think a lot of our financial direction would remain the same. I mean, there are some dials we might tweak a little bit. But from a dividend policy standpoint, we started a dividend last year. We think we have room for growth. We spelled out our metrics how we'd do that, and I think we would continue on that path.

As I said, we don't have a lot of near-term risk for interest rates. That is really how our businesses are set up. I think it comes really more into capital allocation going forward. As we look at expansion opportunities, obviously, your rates of return; we look at rates of return, and obviously, interest rates -- local interest rates as well as global interest rates are a big part of that, so you have got to move that bar up.

So for projects that are already under construction, businesses that are already developing things, those are pretty much locked in. But you need to make sure that you are agile enough to raise the bar for things that are underway. And you have enough of a dynamic dialogue that those messages are made loud and clear, and the teams can adjust, and I think we have the processes in place.

You know, the offsetting thing as interest rates go up, it may raise the cost of doing some things. But from our side, we may see that as an opportunity, as a good thing, because presumably they are going up because the economy is doing better.

THOMSON REUTERS

SI-SSA-0015-05677

Brian Chin - *BofA Merrill Lynch - Analyst*

Right, right.

Tom O'Flynn - *AES Corporation - EVP, CFO*

In the US, obviously the US is hopefully accompanied by other places in the world. So if the economy picks up, like you were a few years ago in some of our regions, that is a good thing.

Brian Chin - *BofA Merrill Lynch - Analyst*

Right, right. I guess a more specific question to you, Tom, I think the growth emphasis at AES has started to shift a little bit -- tilt a little bit more towards the US. We have got some interesting proposals in Indianapolis Power & Light. We have a little bit more stability in the Dayton Power & Light situation now with the ESP set aside.

And so when we look at the growth proposition at AES tilting a little bit more towards the US, one of the elements I have been debating is, well, Indianapolis Power & Light hasn't really gone in for a rate change in many decades. It's what -- since the '80s or so --?

Tom O'Flynn - *AES Corporation - EVP, CFO*

Since we have owned it.

Brian Chin - *BofA Merrill Lynch - Analyst*

So what sort of potential major changes to the rate structure at Indianapolis Power & Light, given it has been so long since there has been a rate case, what sort of issues do you foresee there that we need to be cognizant of as investors?

Tom O'Flynn - *AES Corporation - EVP, CFO*

The Indianapolis Power & Light business is run really very cost-effectively. And since we bought the Company -- that was 15 years ago -- they have not had a rate case. Basically they've been able to balance their spend with their cost structure.

Now that said, they don't -- given the smaller geographic area, they haven't had large transmission projects or other things like that that may be a greater challenge. So they have done well.

The two big things we have going on there, we have over $500 million of spend from that to improve the environmental footprint of some coal plants. Those are plants that are still economic, burn coal from Indiana. So obviously, very helpful to the overall structure of Indiana.

We got -- a few weeks ago, we got all the final approvals on that, so we will get a cash tracker on that. So that would be really outside of any kind of standard rate procedure.

Brian Chin - *BofA Merrill Lynch - Analyst*

Right.

THOMSON REUTERS

SI-SSA-0015-05678

Tom O'Flynn - *AES Corporation - EVP, CFO*

As we look at it right now, given the utility and given (inaudible), we don't see a need for rates, as we see it. Obviously, that could change, but that is not, at least the near-term, a communication between our IPL team and the Indiana regulators.

The thing that could change that is we are looking to build a combined-cycle. It would replace some retired generation. We are well along the process for that, hope to get final approval for that probably Q2 of next year. If we did do that, then we would do that more, let's say, old school utility regulation would build it, and then put it into a rate base in, say, 2017, at which time we would need a rate case. At least as we see it now, a rate case is still a few years off.

Brian Chin - *BofA Merrill Lynch - Analyst*

Okay, understood. And I guess, Caroline, to you, Public Service Enterprise Group is in the fortunate position of not having to necessarily go in for a rate case until it so chooses to do so.

With the Energy Strong program now sounding as though there is a fair amount of municipality support behind it and that the hearings are going on right now, at what point would there need to be, if any, any sort of rate treatment to reflect the fact that you are going to be spending a fair amount of capital on that program?

Caroline Dorsa - *PSEG - EVP, CFO*

Right. So in terms of how we think about the progress there, so I think we are up to like 70 townships and municipalities in support. We did have two, I think, very net positive public hearing days, one more to go. We continue to have dialogue with the governor's office and the BPU.

The timeline that the BPU (inaudible) a formal schedule, which put some formal dates on the calendar for BPU hearings in early next year doesn't preclude settling earlier. So we are talking to them on an ongoing basis. The public hearings are happening. That is a good thing. We have got a lot of support.

We would like to see something settled before the end of the year. It might go into early next year, but that is because we are in active, ongoing dialogue. We tried in our filing and in the information we have given to the BPU to be very explicit about we are talking about Energy Strong as enhancements to an already-reliable system -- right -- because that is something that we have been recognized for.

We have been very explicit on where we think hardening could benefit the state, by location, by risk, high, medium, low, by type, gas, electric. So that gives the regulator a very good view on -- if I am looking at different things in terms of the approval relative to what are asked, which is $2.6 billion over the next five years -- that is what is asked within the program -- because we have not asked for the full 10 -- that we are having active dialogues around which things, which areas, that sort of conversation.

So I think it is a very positive. I think there is definitely recognition, and most of our public hearings, the results were people recognize these things need to be done. It is just a matter of how do you then decide how much and when. And we are flexible about working with them on that.

The one thing that we have been pretty clear about is we want the contemporaneous return mechanism; that will be part of whatever our settlement ultimately turns out to be. And we say that not because we think this is something we should have with no history here. We have had over $2 billion in rate-based investments approved with contemporaneous return mechanisms going all the way back to 2009. I think we have done well in executing on those at PSE&G. We have benefited the customers, we have really demonstrated our prudency there.

So this is just a continuation of that sort of approach, which means it doesn't touch the base rate, we don't need to go in for a rate case. We can do all these things with incremental clauses, continue to earn the authorized return and continue to make the investments consistent with the ongoing reliability in the base rate.

THOMSON REUTERS

SI-SSA-0015-05679

Brian Chin - *BofA Merrill Lynch - Analyst*

Right, right, right, right. Let's shift gears a little bit to dividend policy. Tom, you recently implemented a dividend at AES for the first time in quite a while. I have covered AES for almost 10 years, and I think I have never seen a dividend.

Tom O'Flynn - *AES Corporation - EVP, CFO*

No, it was our first dividend.

Brian Chin - *BofA Merrill Lynch - Analyst*

And then we can contrast that with the experience of PSE&G, which at the onset of the economic recession, the management team chose to actually hold the dividend, which was a very controversial decision at the time. But it proved to be the right one in my perspective, from the standpoint that you guys conservatively managed your cash flows and your balance sheet.

In a period where the interest rate environment is starting to pick up a little bit, do you, as CFOs of your respective companies, view the dividend as having a greater appeal or a lesser appeal to you as your value proposition to shareholders? Can you just talk through your thought process on that a little bit?

Tom O'Flynn - *AES Corporation - EVP, CFO*

Yes, so I think our thought, unlike PSEG, that I know has been paying a dividend for over 100 years, this is our first year of paying a dividend. We basically thought that the primary driver of our value is in earnings growth and cash flow growth, but dividend should be part of the story. And so we initiated a dividend. Our yield is now about 1.2%.

What we said -- and we thought over time our yield should move up to be more akin to the S&P 500 -- not the S&P utility basket, but the S&P 500. That is a low 2-ish kind of yield. So at least get dividends into the picture. And that continues to be our expectation. And I think we will continue on that path independent of changes in interest rates, absent, obviously, dramatic dislocations in sectors.

So from our standpoint, we then provided a little more clarity on how we are going to measure dividend capacity. We have parent free cash flow, which is a function of subsidiary dividends less parent G&A and parent interest, of around $500 million a year. We currently pay out about -- a ratio of that in the low 20s. What we have said is we think it is appropriate to pay out about 30% to 40%, so call it up to $200 million in dividends, on an annual basis. Over time, we think that $500 million number could grow, so in the near-term we have room to grow into that range; longer-term, we can grow the range.

So we think it is an important component. It is less of a component than many other folks -- most other folks in the S&P utility group, but we think it is reasonable for a balanced diet. That probably has us less exposed, as I said, to changes in interest rates that may impact valuations and yields. It probably has us less impacted on that side.

Brian Chin - *BofA Merrill Lynch - Analyst*

Right, right. Caroline?

©2013 Thomson Reuters. All rights reserved. 'Thomson Reuters' and the Thomson Reuters logo are registered trademarks of Thomson Reuters and its affiliated companies.

THOMSON REUTERS

SI-SSA-0015-05680

Caroline Dorsa - *PSEG - EVP, CFO*

And for us, we recognize that the dividend is a very important component of total shareholder returns. So, as Tom said, we have paid that for over 100 years. We do look at the opportunity for dividend growth as an important thing, because we know our investors look at that.

And a few years ago, we had a dividend policy that was payout ratio-based. But one of the things that we know is happening in our business, which we have talked about a lot and obviously everybody sees from our results, is our business mix is changing very significantly. So about five years ago, we were 75% power in terms of the contribution to earnings and 25% utility. This year, it is that about 50-50. And given the opportunities we have in the utility, obviously that mix will continue to change.

So what we did was we moved away from a payout ratio policy and went to a policy that recognizes that the growth in the dividend will be associated with -- and I don't mean will follow -- but will be associated with our outlook for two things, and they are distinct, and they are different metrics for the two businesses. The earnings growth at the utility, because we are talking about double-digit earnings CAGR in the utility through 2015, with approved programs, without needing Energy Strong. So that earnings profile gives us a lot of good regulated, if you will, support in terms of income for the dividend.

And the cash flow generation at power. So even though we all know what the issues are and the forward curves and all the rest -- and you know we don't forecast power beyond the current year -- because of the low CapEx, power still is a very strong cash flow generator. So those two things together is what we will look at for ongoing dividend growth opportunities, which the Board recognizes are very important for shareholders.

In terms of where we are this year, we are at -- our payout, if you looked at the midpoint of our guidance, it is about 61%, but we are guiding for the upper end. So we have a nice position relative to the payout percentage relative to our peer group and certainly relative to those who are more and more regulated, which obviously is the direction we have been going over the last few years.

So those are the factors we look to. A little bit independent of the interest rate, because we really do believe over the long-term, our shareholder is looking for a dividend trajectory. And we aren't signaling that it is going to move in one direction or the other based on interest rates. What we are saying is we know it is a very important component of overall shareholder return over the long-term.

Brian Chin - *BofA Merrill Lynch - Analyst*

Right, right. If I could ask both of you to take off your Company's specific hats for a second and just comment more on a macro trend in utilities. It seems as though right now, with low commodity prices affecting merchant generation, there is a lot of interest in utilities getting into long-term either regulated assets or long-term contracted assets. It is a very large industry shift away from commodity sensitivity and more into long-term stability.

Is this happening at exactly the wrong time with interest rates potentially rising? Are utilities potentially looking at -- in order to shift their business mix on the cheap, are we in an environment where utilities might actually be buying regulated utilities at the top of the valuation cycle? How do you think about that? Is that realistic to even think of it that way? What is your perspective?

Tom O'Flynn - *AES Corporation - EVP, CFO*

Yes, I would say from investing -- break it down, perhaps -- investing, like obviously PSE&G and, to a lesser extent and (inaudible), at least on a smaller scale -- but we are both making large investments in our utilities. And I think that makes sense. Now that said, we are doing it at book value. We are not going out and buying things for (multiple speakers), so it is a different calculus.

I think from our perspective, we do look at contracted generation. That has been really the core of the Company. We have been around for 30 years, and that has been the core of the Company. When we have had merchant generation, we haven't done as well. One notable example, the Midwest.

©2013 Thomson Reuters. All rights reserved. Republication or redistribution of Thomson Reuters content, including by framing or similar means, is prohibited without the prior written consent of Thomson Reuters. 'Thomson Reuters' and the Thomson Reuters logo are registered trademarks of Thomson Reuters and its affiliated companies.

THOMSON REUTERS

SI-SSA-0015-05681

So we will continue -- as we grow the Company, we will really continue to look at contracted generation. Now that said, it is very hard to do that in the US. To the extent it is already contracted out, there's [such a] cost of capital we are not going to spend a lot of time trying to compete with.

To the extent we have redevelopment opportunities of existing assets, it would be further out for us. It would be towards the end of this decade -- things we are working on now, but we actually -- the real work would get done towards the end of the decade would be in California. Our (inaudible) facilities that are 3500 megawatts in gen around the LA Basin. So we will look to redevelop those consistent with the environmental standards in California that hit in 2020. We will look to do that with a contract-based structure.

But as we look to other markets, prices in many other markets, unlike $4 gas, most of the markets we are in don't have $4 gas. Most of them don't have gas, or if it is gas, it is $14 gas, because it is LNG-based.

Brian Chin - *BofA Merrill Lynch - Analyst*

Right.

Tom O'Flynn - *AES Corporation - EVP, CFO*

So we still see coal as being quite attractive. Obviously, you have got to do all the right things environmentally. We have a portfolio of things. But coal is attractive only because it competes with $14 gas.

And so we do continue to -- as we build, a majority of our expansion would be predicated on longer-term contracts, but it is a different -- the US is really fortunate to have cheap gas and low energy costs, which is not always the case in the rest of the world.

Brian Chin - *BofA Merrill Lynch - Analyst*

Right, right, right, right. Well certainly, I can see from AES's standpoint, you guys are in a different bucket of opportunity altogether. I guess as a general comment on some of your more domestically-oriented peers --

---

Tom O'Flynn - *AES Corporation - EVP, CFO*

Yes, so I mean, I guess I was just thinking as an energy investor globally. But as a [broader] investor, you know, I think you have to look at your risk bucket, I suppose. To the extent that you are looking at contracted generation, I think you have to be prepared to be extremely competitive, both on cost and on a cost of capital basis.

On the merchant generation, yes, I think it is actually -- this industry is known for having cycles, and the herd -- whatever the mood of the herd is, the mood is different a few years later. Whether that will turn around at some point and anybody can time it right, it is interesting. Certainly I have spent a little bit of time between [Peggie] and AES at a private equity shop, and that is certainly more of their risk mentality, and you see some private equity players certainly taking a play, low-cost assets in a down cycle, and seeing whether they can hold them and wait for the up.

Brian Chin - *BofA Merrill Lynch - Analyst*

Right, right, right, right.

THOMSON REUTERS

SI-SSA-0015-05682

Caroline Dorsa - *PSEG - EVP, CFO*

I think, Brian, from the perspective of regulated and multiples and premium that would have to be applied to risk multiples, that certainly does make M&A in that environment seem challenging, given where things are right now.

In terms of investments in the regulated assets, we have been making regulated investments and growing our regulated infrastructure, as you know. To me, it should be a distinction between any regulated investment is good in the current environment, and that is changing. It is really about the rate, right?

So going back to the earlier comments about where ROEs did not go when the rates went down, we do look at that carefully. So regulated investments are not just good in and of themselves no matter what. It really depends upon whether you are getting an ROE that is reasonable for a long-term investment, and we really want to take a long-term view, as opposed to any regulated ROE is good.

So it has to be one that really sustains over the long-term to create shareholder value. So I think that is important on the regulated side.

On the merchant side, I agree with Tom, and contracted is difficult in our economy for PSE&G. But we haven't closed the door on that. It's really about the price. So when there are generation assets that makes sense to invest in, again, because they generate a positive return, we don't look at that and say, well, we can't do that because everybody is investing in regulated, or no one will give you credit if you invest in merchant. So if there are things like nuclear uprates -- which you know we have done a lot of in the past and we are still investing in one in Peach Bottom -- positive returns, we will do those investments. Other investments that give us more opportunities to enhance megawatts or reduce costs or whatever, those investments in merchant makes sense. They generate positive returns. We are not afraid of those.

So that really does make sense. So to me, it is neither one all the way or the other not at all. It really depends on what kind of value do you think you can create, and are you using the right long-term view of value creation. Are you not getting to yourself in the, hey, rates are at a certain level now, ROEs are at a certain level now. Because you are going to be living with those through the cycles in the herd and you should probably be picking numbers that you will be comfortable talking about for a long period of time.

Brian Chin - *BofA Merrill Lynch - Analyst*

Right, right. Last question to you, Caroline. You had started off in one of your initial comments about how the allowed rate of return in the US had stabilized for a while, actual costs of capital were falling. And so now that they are going down, you are not expecting the allowed rates of return to go up, because in some sense, there is a catch-up. The actual interest rates are now bouncing up and so the allowed rates of return are probably just going to remain flat going forward.

Caroline Dorsa - *PSEG - EVP, CFO*

Yes, so I think just to couch this a little bit differently, so generally speaking, yes, because when you saw rates go like this, you didn't see ROEs go like this. You saw sort of lagged average (multiple speakers), right? And so now you're seeing rates coming back up.

What I am saying is I don't expect to see ROEs from this lagged modest decline shoot up like rates have shot up. There is a lag and an averaging sort of effect going on there. So I think of that as more the regulators are looking at the long-term stability and that makes sense. They want to incent long-term investment. But I don't think we are going to see ROEs -- and I don't think we should see ROEs bounce back up like rates [have done].

Brian Chin - *BofA Merrill Lynch - Analyst*

Allow me to save myself from my incredibly convoluted question. When do you think we will start to see meaningful allowed rates of return rise?

Caroline Dorsa - *PSEG - EVP, CFO*

Well, I am not going to forecast interest rates and it's hard to forecast ROEs as well. But I do think that it will really be more sustained interest rate increases before you see that sort of average back into ROEs.

Brian Chin - *BofA Merrill Lynch - Analyst*

Okay. Maybe like a two-year period-ish, three-year period-ish?

Caroline Dorsa - *PSEG - EVP, CFO*

That depends on the regulators.

Brian Chin - *BofA Merrill Lynch - Analyst*

Fair enough. Tom, Caroline, thank you very much for joining us on the panel. I very much appreciate your comments.

Caroline Dorsa - *PSEG - EVP, CFO*

Thanks, Brian.

Tom O'Flynn - *AES Corporation - EVP, CFO*

Thank you.

Forward Looking Statement

Certain of the matters discussed in this communication about us and our subsidiaries future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q an d Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to sufficiently obtain coverage or recover proceeds of insurance on such matters,
- increases in competition in energy supply markets as well as competition for certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology and customer usage patterns.

All of the forward-looking statements made in this communication are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this communication apply only as of the date of this communication. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this communication are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slides A and B at the end of this presentation include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

PSE&G's Energy Strong Capital Program addresses new reality

- New ten-year, $3.9 Billion Infrastructure Program filed February 2013 with the NJBPU to strengthen PSE&G's distribution system focusing on hardening and resiliency
- Plan to invest an additional $1.5 Billion in transmission grid over the ten-year period
- The 10-year Energy Strong proposal includes:
  - ✓ Protecting 40 utility installations from severe storms (**$1.7 Billion**)
  - ✓ Making the electric grid smarter and easier to repair (**$460 Million**)
  - ✓ Adding backup distribution lines and system redundancies (**$550 Million**)
  - ✓ Undergrounding 20 miles of overhead distribution lines (**$60 Million**)
  - ✓ Modernizing the gas distribution system (**$1.2 Billion**)

- PSE&G is seeking BPU approval to implement the first five years of the Energy Strong proposal, an investment of $2.6 Billion
- The proposed filing creates ~5,800 jobs and stimulates economic activity for New Jersey businesses

SI-SSA-0015-05696

68 local NJ towns and 6 counties support

- 68 municipalities and six counties (Bergen, Hudson, Mercer, Passaic, Somerset and Union) have approved resolutions in support of Energy Strong, PSE&G's infrastructure proposal to improve and fortify its electric and gas distribution systems
- The Energy Strong proposal is currently being evaluated by the NJ Board of Public Utilities
- Public hearings are scheduled for September and October 2013

SI-SSA-0015-05697

Balance Sheet Strengthened

PSEG has reduced risk

SI-SSA-0015-05700

PSEG First Half 2013 - Highlights

Maintaining 2013 operating earnings guidance of $2.25 - $2.50 per share

- Strong earnings: First half 2013 earnings of $1.33 per share vs. $1.28 in year-ago period
  - Power benefitting from higher capacity prices and asset location
    - PSE&G seeing results from increased investment in transmission
      - O&M under control {Continuing control of O&M supporting results}

- Capital investment on schedule
  - PSE&G received approval to invest $446 million in extensions of Solar 4 All and Solar Loan programs
    - PSE&G's existing $3.4 billion Transmission investment program remains on schedule
      - Hearings scheduled for Energy Strong, PSE&G's $2.6 billion, 5-year capital infrastructure program

- Financial position remains strong
  - S&P credit rating upgrade across Enterprise, Power and PSE&G
    - Debt represented 41% of capital at June 30, 2013
      - Dividend increased 1.4% to $1.44 per share, the 9th increase in the last ten years

Full year 2013 operating earnings expected to be at the upper end of guidance, assuming normal weather and unit operations

SI-SSA-0015-05701

2013 Operating Earnings*

Investment in the regulated business has changed the earnings mix

Our 2009-2013 investment focus has brought us to a 50/50 mix for 2013

PSE&G's 2013-2017 Energy Strong Program and ongoing transmission investments will support continued growth in PSE&G's earnings

- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-05723

Burlington-Camden 230kV consists of upgrading 37 circuit miles (30 miles of overhead and 7 miles of underground) of 138kV transmission line to 230kV, converting the existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2012	2013-2014E	Expected In-service Date
$399M	$169M	$230M	June 2014

- PJM RTEP project b1156
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-05724

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2012	2013-2015E	Expected In-service Date
$435M	$24M	$411M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-05725

State policy imperatives have been redefined by Superstorm Sandy

Storm report issued by NJBPU focusing on:

- Preparedness Efforts
- Communications
- Restoration and Response
- Post Event Analysis
- Underlying Infrastructure Issues

Storm Deferral Filings:

- On December 19, 2012 the Board granted a PSE&G request for general authority to defer storm restoration costs, thereby making such costs potentially recoverable in future rate filings
- On February 20, 2013, at its open public meeting, the Board voted that the recovery of all such storm restoration costs would be reviewed in a generic (multi-utility) proceeding

SI-SSA-0015-05726

We have also responded with a plan focused on infrastructure hardening and resiliency

- PSE&G filed a petition on February 20, 2013, with the NJBPU seeking approval for the Energy Strong Program (ES) which will harden electric and gas distribution infrastructure and increase the resiliency of the electric distribution system
- The filing complements the NJBPU's recently issued order requiring all Electric Distribution Companies to take specific actions to improve preparedness and response to major storms
- ES program represents a potential investment of approximately $3.9 billion over the next 10 years. PSE&G has asked for initial funding approval of $2.6 billion during the first five years
- Additional Transmission investment of approximately $1.5 billion would be included in future FERC Formula Rate filings

SI-SSA-0015-05727

Lower commodity costs and expiration of certain transition charges are expected to offset the impact to customer bills

*FOR THE TYPICAL COMBINED ELECTRIC & GAS RESIDENTIAL CUSTOMER, 2018 BGS (INCLUDING TRANSMISSION) / BGSS, AS WELL AS SBC, WNC, RAC AND DISTRIBUTION RATES HELD CONSTANT AS OF THE ES FILING DATE (FEB-2013). RATES RELATED TO ELECTRIC RESTRUCTURING: SECURITIZATION (STC), NON-UTILITY GENERATION CHARGE (NGC), & TRANSITIONAL ENERGY FACILITIES ASSESSMENT (TEFA), ARE REDUCED TO ZERO BY 2018. THE RGGI RECOVERY CHARGE (RRC), SOLAR PILOT RECOVERY CHARGE (SPRC), AND CAPITAL ECONOMIC STIMULUS INFRASTRUCTURE INVESTMENT PROGRAM (CIP I) AND THE CIP EXTENSION (CIP II) BILL IMPACTS ARE INCLUDED IN THEIR RESPECTIVE GAS & ELECTRIC BARS AND FORECASTED BASED UPON MAR-2013 ESTIMATES. THE BILL IMPACTS FOR ES PROGRAM BASED UPON THE PROPOSED FILING AND S4AEXT/SL3 IMPACTS ARE BASED UPON THE BPU APPROVED PROGRAM.

LONG ISLAND POWER AUTHORITY

PSEG

SI-SSA-0015-05730

LIPA T&D management contract

In December 2011, the Long Island Power Authority (LIPA) selected PSEG to manage its electric transmission and distribution system for 10 years starting in 2014

- Reasons for selecting PSEG included:
- Proven technical capabilities and track record of top quartile customer service and reliability
  - ✓ Commitment to cost control and investment optimization
  - ✓ Corporate culture of transparency and data-driven decision making
  - ✓ Transition activities on-track – successfully achieving all milestones through February 2013

- Evaluating impact of Superstorm Sandy and recent LIPA management changes on the overall schedule and transition

Successful management of the LIPA transmission and distribution system may lead to additional growth opportunities

Financial Strength
Disciplined Investment

SI-SSA-0015-05738

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-05739

PSEG Power strategy

Focused on safety performance, unit reliability, competitive cost structure with control of maintenance costs, achieving operational excellence, and supporting market rules to maintain a level playing field

SI-SSA-0015-05740

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus

Fleet Diversity/Efficiency Focus

- Fleet diversity across the dispatch curve and fuel types provides flexibility
- Nuclear units continue to achieve strong operational results and are well positioned for the future
- Peach Bottom steam path retrofit completed
- Fossil fleet is suited for market dynamics
- CCGT achieved record output in 2012
- Installed 400 MW new peaking capacity in 2012

Financial/Economic Focus

- O&M cost control programs have delivered
- Sites offering competitive advantage suited for expansion

Regulatory Focus

- Strong regulatory performance
- Industry leadership in the changing regulatory environment

SI-SSA-0015-05741

PSEG Power delivered in 2012

Storm and weather challenges	Market challenges	Value delivered
• Superstorm Sandy impacted our generating sites • Warm winter put pressure on demand and pricing for both electricity and gas • Hot summer weather created challenging operating environment	• Unit outages and transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by weather and economy	• Cost control • Lower dispatch and fuel cost • Captured value through coal/gas switching, unit flexibility • Improved unit availability • Coal & oil sales optimized inventory • Expedited return from storm outages, restored margin opportunities • Optimized unit dispatch across fleet during storm recovery

SI-SSA-0015-05742

PSEG Power has generating assets

in three competitive markets

- Low cost portfolio
- Fuel flexibility
- Assets near loads
- Poised to benefit in real time markets
- Fleet will maintain diversity and efficiency in 2016 after HEDD
- Most sites suitable for expansion

SI-SSA-0015-05743

PSEG Power Nuclear fleet is a critical element of success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,174 MW
• Owned Capacity: 1,174 MW
• License Expiration: 2046
• Next Refueling
  • Fall 2013
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%, Exelon – 43%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,326 MW
	• Owned Capacity: 1,335 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 – Fall 2014
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,245 MW
		• Owned Capacity: 1,123 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2013

SI-SSA-0015-05744

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations – eight consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent and attractive training program
- Developing Fukushima action plan in response to NRC staff review
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-05745

PSEG Power's Fossil Fleet availability has shown steady improvement

EFORd improvement resulted in over 200 MW of additional capacity available

EFORp improvement and availability at peak demand times has resulted in performance payments in each of the last four years

SI-SSA-0015-05746

PSEG Power improvements achieved in combined cycle fleet efficiency

Actions Taken to Create Value	
• Heat rate improvement program • Operational Excellence Model	• Training programs • Unit testing initiative • Outage work to restore efficiency

SI-SSA-0015-05747

Superstorm Sandy affected the fleet;

when the load returned, Power was ready

SI-SSA-0015-05748

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- Power is well positioned for HAPS

SI-SSA-0015-05749

PSEG Power's focus on costs has resulted in moderate increase in O&M for six years

Cost control actions taken:	
• Coal assessment • CCGT material condition assessment • Contract renegotiation	• Material management • Nuclear maintenance productivity study • Nuclear outage efficiency initiative

SI-SSA-0015-05750

PSEG

* INCLUDES IMPACTS FROM STORM RECOVERY COSTS AND POTENTIAL RELATED INSURANCE PROCEEDS.
E = ESTIMATE.

PSEG Power is well positioned for growth in the fleet when market conditions dictate

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Interconnection • Gas Pipeline Access • Sites/Space • Emissions

SI-SSA-0015-05751

PSEG Power will maintain diversity and efficiency after a realignment of the fleet in 2016

Objective
2012 → 2016E

- Maintain fuel diversity
- Maintain load serving capability
- Improve fleet heat rate by 6%
- Maintain low cost structure
- Environmental improvement

Fuel Diversity
13,226 MW 11,200 MW

Energy Produced
52.5 TWh 52-54 TWh

SI-SSA-0015-05752

PSEG Power is an established leader

within the industry

16	NO_x (Ktons)	10

SI-SSA-0015-05754

PSEG

* EXCLUDES SANDY IMPACT.

PSEG POWER
ER&T

SI-SSA-0015-05755

PSEG

We make things work for you.

PSEG Power
ER&T strategy

Focused on optimizing the value of its asset portfolio and providing outstanding service to our customers, while prudently managing risk

SI-SSA-0015-05756

Diversified assets and flexible dispatch

High performing, base load nuclear assets	3,632 MW
Fuel advantaged, base load coal plants in PA	776 MW
Flexible combined cycle fleet	3,176 MW
Well leveraged intermediate & peaking assets	5,642 MW

Integrated trading and dispatch capability around fleet

SI-SSA-0015-05757

Fleet capacity has been advanced by:

Improved Heat Rate capability

Trading acumen to execute fuel switching opportunities

Reduced O&M and increased start-up success

Capturing new products opportunity with minimal investment

SI-SSA-0015-05758

Spark spread replaces dark spread as major value driver

- Spark spread has risen above dark spread in PJM markets
- Power's gas units operating at record throughput
- Gas operation provides much more operational flexibility
- Enhances the ability of trading organization to capture volatility

SI-SSA-0015-05759

2013 BGS Auction Results for PSE&G Zone

BGS sales account for about a third of our forward portfolio of hedges

SI-SSA-0015-05760

BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2011-2013 ARE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2013.

Our hedging mix has changed with the market but still captures the fleet's locational advantage

- 3 Year forward BGS sales comprise smaller percentage of Power's hedges
- Other full requirement load deals help capture additional locational and load shape premium

SI-SSA-0015-05761

PSEG

NOTE: PERCENTAGES REPRESENT HEDGED VOLUMES IN PLACE AFTER BGS AUCTION.

Hedging strategy designed to protect gross margin and leverage the portfolio

Ratable Hedging on Base Load:

- 3 year ratable hedge tactics
- 3 year PJM hedge of capacity (not included in table)
- Load following sales (such as BGS) have strong correlation to our units for hedging basis and load shaping premium

Dynamic Hedging on Intermediate Coal, Combined Cycle and Peaking:

- Position fleet to take advantage of market volatility
- Gas and load-following fleet left open until prompt year to capture volatility
- Use all trading products to capture option value of assets and benefit from market dislocations

		Jul-Dec 2013	2014	2015
Base Load (Nuclear and Base Load Coal)	Volume TWh	17	35	35
	% Hedged	100%	90-95%	50-55%
	Price $/MWh	$51	$49	$49
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	11	18	17
	% Hedged	30-35%	0%	0%
	Price $/MWh	$51	$49	$49
Total	Volume TWh	26-28	53-55	52-54
	% Hedged	70-75%	55-60%	30-35%
	Price $/MWh	$51	$49	$49

HEDGE PERCENTAGES AND PRICES AS OF JUNE 28, 2013. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS.

SI-SSA-0015-05762

PSEG's locational advantage

and electric basis

- Basis (PS Zone to PJM West) will continue to trend downward for forward sales
- Volatility will remain significant in the prompt periods (especially summer/winter)
- Power maintains sufficient length to participate in upside volatility as well as a valuable 250MW transmission position into NYC
- Basis will continue to have a positive impact on PSEG Power profitability

SI-SSA-0015-05763

*AS OF MAY 15, 2013.

PSEG's locational advantage

and gas basis

- Lower cost supplies of shale gas have been beneficial to both PSE&G customers and PSEG Power
- Over 50% of our available pipeline capacity can access market area supplies of shale gas
- Power's generating units sit in close proximity to the Marcellus fairway
- Power buys approximately 350BCF/year of gas
- Availability of a robust gas portfolio of storage and pipeline capacity benefits PSE&G customers and Power's generating assets

SI-SSA-0015-05764

PJM's capacity market continues to recognize locational value of our fleet

$/MW-Day	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016	2016 / 2017
Power's Average Price	$153	$244	$162	$167	$166
PS Zone					$219
EMAAC	$140	$245	$137	$167	$119
RTO	$16	$28	$126	$136	$59
Power's Capacity (MW)	10,400	10,600	10,300	9,000	8,637*

*PSEG Power's cleared megawatts split between PS Zone and EMAAC.

2016/2017 RPM Auction Influenced By:

- New Build and Higher Imports
- Updated Transfer Capabilities
- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Lower Demand Response

SI-SSA-0015-05765

Reserve margins in PJM declining with retirements

Generation Deactivation Notifications

Source: PJM TEAC, 8/8/2013

- PJM Pending Deactivation Requests of 13,340 MW as of August 13, 2013
- Approximately 5,000 MW of additional owner announced retirements in PJM through next auction

Forecast Reserve Margin (PJM June 2013)

- PJM forecasts a declining Reserve Margin through 2017

SI-SSA-0015-05766

Regulatory Advocacy

	ISSUE /POLICY	HOW ADDRESSED?
PJM	MOPR	Sufficiency/Exceptions before FERC and courts
	DEMAND RESPONSE RULES	Performance/eligibility/compensation issues before courts, FERC, and PJM stakeholder process
	ANCILLARY/ENERGY	Regulation/Black-start modifications under consideration in PJM stakeholder process before FERC

Opportunity for modest and sustainable

dividend increases consistent with stable regulated growth and cash generation outlook at PSEG Power

SI-SSA-0015-05783

PSEG Summary

- Maintaining 2013 operating earnings guidance of $2.25 - $2.50 per share -- based on financial results to date, we expect operating earnings for the full year to be at the upper end of our guidance range assuming normal weather and unit operations
- Double digit operating earnings growth at PSE&G starting in 2013, and continuing through 2015 driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength reduces risk in low price environment
- Strong Balance Sheet and Cash Flow support full capital program without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for future growth

PSE&G provides high reliability at below average cost which creates superior value to customers

SAIDI = SYSTEM AVERAGE INTERRUPTION DURATION INDEX, A MEASURE OF AVERAGE OUTAGE DURATION FOR ALL CUSTOMERS SERVED.

SI-SSA-0015-05790

PSE&G prioritizes public safety

while maintaining value to customers

LEAK RESPONSE RATE = PERCENTAGE OF UTILITY RESPONSES TO REPORTED LEAKS WITHIN ONE HOUR.

SI-SSA-0015-05791

Formula rates for transmission make the process more predictable with contemporaneous returns

	Transmission (Federal)	Distribution Base Rate Case (State)
Current ROE	• 11.68% base • 12.93% with incentives on Susquehanna-Roseland • 11.93% with incentives on Northeast Grid	• 10.3%
Volatility of Returns	• Low – prospective recovery with annual true-ups for over/under recovery	• Higher – performance impacted positively/negatively by cost management, weather, customer demands, etc.
Process	• Formula – The rate template and specific elements like ROE are predetermined with annual updates and true ups	• Litigated case with each element (depreciation, ROE, O&M levels, Rate Base) scrutinized and settled
Intervenors	• State consumer advocates usually participate	• State consumer advocates • Large customers • Other parties affected by the case, e.g. Solar Developers
Test Year	• PSE&G has fully **forecasted** test year for both Capital and O&M	• **Historical** test year with pro-forma adjustments for known and measurable items, e.g. wage escalation
Time to resolve	• Annual Formula updates are filed in October with January 1 effective date	• Typically settled within 12-15 months

SI-SSA-0015-05792

New Jersey Board of Public Utilities (BPU)

- The Board of Public Utilities consists of five commissioners appointed by the Governor. These appointees are confirmed by the NJ Senate for six-year, staggered terms. The Governor appoints one of the five to serve as Commission President.

  Currently, the commissioners are:

  - Robert M. Hanna, Commission President
  - Jeanne M. Fox
  - Joseph L. Fiordaliso
  - Mary-Anna Holden
  - Dianne Solomon

- Stefanie Brand, Director of the N.J. Division of Rate Counsel

SI-SSA-0015-05793

Slow economic recovery in NJ is constraining growth in all market sectors

Modest residential growth limited by housing market inactivity and the slow economic recovery

Consumer spending is trending with the slow economic recovery and impacting growth in the commercial sector

Industrial sales growth continues to be constrained by slow economic recovery

2013 - 2015
Projected Sales Growth – Gas*

2013 – 2015
Projected Sales Growth – Electric*

Forward Looking Statement

Certain of the matters discussed in this communication about us and our subsidiaries future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient coverage or recover proceeds of insurance on such matters,
- increases in competition in energy supply markets as well as competition from certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology, such as distributed generation and microgrids, and resultant changes in customer usage patterns, including energy efficiency and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-05806

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slides A and B at the end of this presentation include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

PSE&G's Energy Strong Capital Program addresses new reality

- New ten-year, $3.9 Billion Infrastructure Program filed February 2013 with the NJBPU to strengthen PSE&G's distribution system focusing on hardening and resiliency
- Plan to invest an additional $1.5 Billion in transmission grid over the ten-year period
- The 10-year Energy Strong proposal includes:
  - ✓ Protecting 40 utility installations from severe storms (**$1.7 Billion**)
  - ✓ Making the electric grid smarter and easier to repair (**$460 Million**)
  - ✓ Adding backup distribution lines and system redundancies (**$550 Million**)
  - ✓ Undergrounding 20 miles of overhead distribution lines (**$60 Million**)
  - ✓ Modernizing the gas distribution system (**$1.2 Billion**)

- PSE&G is seeking BPU approval to implement the first five years of the Energy Strong proposal, an investment of $2.6 Billion
- The proposed filing creates ~5,800 jobs and stimulates economic activity for New Jersey businesses

SI-SSA-0015-05815

74 local NJ towns and 7 counties support

- 74 municipalities and seven counties (Bergen, Hudson, Mercer, Passaic, Somerset, Union and Middlesex) have approved resolutions in support of Energy Strong, PSE&G's infrastructure proposal to improve and fortify its electric and gas distribution systems

- The Energy Strong proposal is currently being evaluated by the NJ Board of Public Utilities

SI-SSA-0015-05819

PSEG Year to Date 2013 - Highlights

- **Operating Earnings of $2.09 vs. $2.03 per share for YTD 2012**
  - ✓ Delivered solid results in Q3 driven by Power's locational value, and PSE&G's continuing investment in transmission
  - ✓ Raised 2013 full–year, operating earnings guidance from $2.25 - $2.50 to $2.40 - $2.55 per share
- **Executing on operational goals**
  - ✓ Power met summer demand using diverse fleet
  - ✓ Continued control of O&M supports full-year expectations
- **Executing on capital program**
  - ✓ Transmission program of $3.4 billion, including construction of 5 major transmission projects, continues on schedule and on budget
  - ✓ Review of Energy Strong proposal underway by BPU
  - ✓ 74 NJ municipalities and 7 county governments have passed resolutions in support of the Energy Strong infrastructure proposal
- **Market developments**
  - ✓ US District Courts in NJ and MD rendered decisions supportive of competitive markets and FERC's rate-setting authority
  - ✓ New LIPA agreement will broaden and extend original agreement when fully executed

- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-05844

State policy imperatives have been redefined by Superstorm Sandy

Storm report issued by NJBPU focusing on:

- Preparedness Efforts
- Communications
- Restoration and Response
- Post Event Analysis
- Underlying Infrastructure Issues

Storm Deferral Filings:

- On December 19, 2012 the NJBPU granted a PSE&G request for general authority to defer storm restoration costs, thereby making such costs potentially recoverable in future rate filings
- On February 20, 2013, at its open public meeting, the BPU voted that the recovery of all such storm restoration costs would be reviewed in a generic (multi-utility) proceeding*

SI-SSA-0015-05845

PSEG

* NJBPU proceeding on storm recovery is currently in discovery phase.

We have also responded with a plan focused on infrastructure hardening and resiliency

- PSE&G filed a petition on February 20, 2013, with the NJBPU seeking approval for the Energy Strong Program (ES) which will harden electric and gas distribution infrastructure and increase the resiliency of the electric distribution system
- The filing complements the NJBPU's recently issued order requiring all Electric Distribution Companies to take specific actions to improve preparedness and response to major storms
- ES program represents a potential investment of approximately $3.9 billion over the next 10 years. PSE&G has asked for initial funding approval of $2.6 billion during the first five years
- Additional Transmission investment of approximately $1.5 billion would be included in future FERC Formula Rate filings

SI-SSA-0015-05846

Lower commodity costs and expiration of certain transition charges are expected to offset the impact to customer bills

*FOR THE TYPICAL COMBINED ELECTRIC & GAS RESIDENTIAL CUSTOMER, 2018 BGS (INCLUDING TRANSMISSION) / BGSS, AS WELL AS SBC, WNC, RAC AND DISTRIBUTION RATES HELD CONSTANT AS OF THE ES FILING DATE (FEB-2013). RATES RELATED TO ELECTRIC RESTRUCTURING: SECURITIZATION (STC), NON-UTILITY GENERATION CHARGE (NGC), & TRANSITIONAL ENERGY FACILITIES ASSESSMENT (TEFA), ARE REDUCED TO ZERO BY 2018. THE RGGI RECOVERY CHARGE (RRC), SOLAR PILOT RECOVERY CHARGE (SPRC), AND CAPITAL ECONOMIC STIMULUS INFRASTRUCTURE INVESTMENT PROGRAM (CIP I) AND THE CIP EXTENSION (CIP II) BILL IMPACTS ARE INCLUDED IN THEIR RESPECTIVE GAS & ELECTRIC BARS AND FORECASTED BASED UPON MAR-2013 ESTIMATES. THE BILL IMPACTS FOR ES PROGRAM BASED UPON THE PROPOSED FILING AND S4AEXT/SL3 IMPACTS ARE BASED UPON THE BPU APPROVED PROGRAM.

LONG ISLAND POWER AUTHORITY

PSEG

SI-SSA-0015-05849

LIPA T&D management contract

Amended Operating Services Agreement will begin January 1, 2014, subject to LIPA receiving IRS ruling on tax status of debt

- Increases PSEG-Long Island's management responsibility to operate and maintain the LIPA T&D system
- Extends original 10-year contract by two years
- PSEG Power will procure LIPA's fuel requirements beginning 2015
- PSEG-LI compensation will increase in 2016 for expanded management role

Successful management of the LIPA transmission and distribution system may lead to additional growth opportunities

SI-SSA-0015-05850

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-05851

PSEG Power strategy

Focused on safety performance, unit reliability, competitive cost structure with control of maintenance costs, achieving operational excellence, and supporting market rules to maintain a level playing field

SI-SSA-0015-05852

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus

Fleet Diversity/Efficiency Focus

- Fleet diversity across the dispatch curve and fuel types provides flexibility
- Nuclear units continue to achieve strong operational results and are well positioned for the future
- Peach Bottom steam path retrofit completed
- Fossil fleet is suited for market dynamics
- CCGT achieved record output in 2012
- Installed 400 MW new peaking capacity in 2012

Financial/Economic Focus

- O&M cost control programs have delivered
- Sites offering competitive advantage suited for expansion

Regulatory Focus

- Strong regulatory performance
- Industry leadership in the changing regulatory environment

SI-SSA-0015-05853

PSEG Power delivered in 2012

Storm and weather challenges	Market challenges	Value delivered
• Superstorm Sandy impacted our generating sites • Warm winter put pressure on demand and pricing for both electricity and gas • Hot summer weather created challenging operating environment	• Unit outages and transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by weather and economy	• Cost control • Lower dispatch and fuel cost • Captured value through coal/gas switching, unit flexibility • Improved unit availability • Coal & oil sales optimized inventory • Expedited return from storm outages, restored margin opportunities • Optimized unit dispatch across fleet during storm recovery

SI-SSA-0015-05854

PSEG Power has generating assets

in three competitive markets

- Low cost portfolio
- Fuel flexibility
- Assets near loads
- Poised to benefit in real time markets
- Fleet will maintain diversity and efficiency in 2016 after HEDD
- Most sites suitable for expansion

SI-SSA-0015-05855

PSEG Power Nuclear fleet is a critical element of success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,174 MW
• Owned Capacity: 1,174 MW
• License Expiration: 2046
• Next Refueling
  • Spring 2015
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%, Exelon – 43%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,326 MW
	• Owned Capacity: 1,335 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 – Fall 2014
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,245 MW
		• Owned Capacity: 1,123 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2015

SI-SSA-0015-05856

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations – eight consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent and attractive training program
- Developing Fukushima action plan in response to NRC staff review
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-05857

PSEG Power's Fossil Fleet availability has shown steady improvement

EFORd improvement resulted in over 200 MW of additional capacity available

EFORp improvement and availability at peak demand times has resulted in performance payments in each of the last four years

SI-SSA-0015-05858

PSEG Power improvements achieved in combined cycle fleet efficiency

Actions Taken to Create Value	
• Heat rate improvement program • Operational Excellence Model	• Training programs • Unit testing initiative • Outage work to restore efficiency

SI-SSA-0015-05859

Superstorm Sandy affected the fleet;

when the load returned, Power was ready

SI-SSA-0015-05860

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- Power is well positioned for HAPS

SI-SSA-0015-05861

PSEG Power's focus on costs has resulted in moderate increase in O&M for six years

Cost control actions taken:	
• Coal assessment • CCGT material condition assessment • Contract renegotiation	• Material management • Nuclear maintenance productivity study • Nuclear outage efficiency initiative

SI-SSA-0015-05862

PSEG

* INCLUDES IMPACTS FROM STORM RECOVERY COSTS AND POTENTIAL RELATED INSURANCE PROCEEDS.

SI-SSA-0015-05867

PSEG POWER
ER&T

PSEG

We make things work for you.

SI-SSA-0015-05868

PSEG Power
ER&T strategy

Focused on optimizing the value of its asset portfolio and providing outstanding service to our customers, while prudently managing risk

SI-SSA-0015-05869

Diversified assets and flexible dispatch

High performing, base load nuclear assets	3,632 MW
Fuel advantaged, base load coal plants in PA	776 MW
Flexible combined cycle fleet	3,176 MW
Well leveraged intermediate & peaking assets	5,642 MW

Integrated trading and dispatch capability around fleet

SI-SSA-0015-05870

Fleet capacity has been advanced by:

Improved Heat Rate capability

Trading acumen to execute fuel switching opportunities

Reduced O&M and increased start-up success

Capturing new products opportunity with minimal investment

SI-SSA-0015-05871

Spark spread replaces dark spread as major value driver

- Spark spread has risen above dark spread in PJM markets
- Power's gas units operating at record throughput
- Gas operation provides much more operational flexibility
- Enhances the ability of trading organization to capture volatility

SI-SSA-0015-05872

2013 BGS Auction Results for PSE&G Zone

BGS sales account for about a third of our forward portfolio of hedges

SI-SSA-0015-05873

BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2011-2013 ARE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2013.

Our hedging mix has changed with the market but still captures the fleet's locational advantage

- 3 Year forward BGS sales comprise smaller percentage of Power's hedges
- Other full requirement load deals help capture additional locational and load shape premium

SI-SSA-0015-05874

NOTE: PERCENTAGES REPRESENT HEDGED VOLUMES IN PLACE AFTER BGS AUCTION.

Hedging strategy designed to protect gross margin and leverage the portfolio

Ratable Hedging on Base Load:

- 3 year ratable hedge tactics
- 3 year PJM hedge of capacity (not included in table)
- Load following sales (such as BGS) have strong correlation to our units for hedging basis and load shaping premium

Dynamic Hedging on Intermediate Coal, Combined Cycle and Peaking:

- Position fleet to take advantage of market volatility
- Gas and load-following fleet left open until prompt year to capture volatility
- Use all trading products to capture option value of assets and benefit from market dislocations

		Oct-Dec 2013	2014	2015
Base Load (Nuclear and Base Load Coal)	Volume TWh	8	35	35
	% Hedged	100%	100%	55-60%
	Price $/MWh	$50	$48	$48
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	5	18	17
	% Hedged	30-35%	5-10%	0%
	Price $/MWh	$50	$48	$48
Total	Volume TWh	13-14	53-55	52-54
	% Hedged	70-75%	65-70%	35-40%
	Price $/MWh	$50	$48	$48

HEDGE PERCENTAGES AND PRICES AS OF SEPTEMBER 30, 2013. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS.

SI-SSA-0015-05875

PSEG's locational advantage

and electric basis

- Basis (PS Zone to PJM West) will continue to trend downward for forward sales
- Volatility may remain significant in the prompt periods
- Power maintains sufficient length to participate in upside volatility as well as a valuable 250MW transmission position into NYC
- Basis will continue to have a positive impact on PSEG Power profitability

SI-SSA-0015-05876

*AS OF OCTOBER 31, 2013.

PSEG's locational advantage

- Lower cost supplies of shale gas have been beneficial to both PSE&G customers and PSEG Power
- Over 50% of our available pipeline capacity can access market area supplies of shale gas
- Power's generating units sit in close proximity to the Marcellus fairway
- Power buys approximately 350BCF/year of gas
- Availability of a robust gas portfolio of storage and pipeline capacity primarily benefits PSE&G's gas customers and then Power, as conditions permit

SI-SSA-0015-05877

PJM's capacity market continues to recognize locational value of our fleet

$/MW-Day	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016	2016 / 2017
Power's Average Price	$153	$244	$162	$167	$166
PS Zone					$219
EMAAC	$140	$245	$137	$167	$119
RTO	$16	$28	$126	$136	$59
Power's Capacity (MW)	10,400	10,600	10,300	9,000	8,637*

*PSEG Power's cleared megawatts split between PS Zone and EMAAC.

2016/2017 RPM Auction Influenced By:

- New Build and Higher Imports
- Updated Transfer Capabilities
- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Lower Demand Response

SI-SSA-0015-05878

Reserve margins in PJM declining with retirements

We make things work for you.

SI-SSA-0015-05882

PSEG Energy Holdings strategy

Holdings' priorities are to manage lease risks, sell remaining non-core assets and grow the renewables portfolio

SI-SSA-0015-05883

PSEG Energy Holdings

- Legacy Generation Assets
- Merchant Energy Leveraged Leases
- Regulated Energy Leveraged Leases
- Real Estate Leveraged and Operating Leases

→ Reducing Risk and Monetizing Legacy Assets

- PSEG Solar Source
- PSEG Long Island

→ Growth in unregulated renewables

→ Growth by leveraging knowledge

SI-SSA-0015-05884

PSEG Solar Source has completed 69 MW and has an additional 19 MW under construction

Hackettstown (Mars)
New Jersey (2 MW)
COD September 2009
Thin film panels – fixed tilt
Investment $13 million
15 year PPA with Mars, Inc.

JEA
Florida (15 MW)
COD September 2010
Thin film panels – fixed tilt
Investment $59 million
30 year PPA with JEA

Wyandot
Ohio (12 MW)
COD May 2010
Thin film panels – fixed tilt
Investment $45 million
20 year PPA with AEP

Queen Creek
Arizona (25 MW)
COD October 2012
Polycrystalline - single axis tracker
Investment $75 million
20 year PPA with SRP

Milford
Delaware (15 MW)
COD December 2012
Polycrystalline - fixed tilt
Investment $47 million
20 year PPA with DEMEC

Badger I
Arizona (19 MW)
Expected COD Q4 2013
Polycrystalline - single axis tracker
Investment $51 million
30 year PPA with APS

PSEG FINANCIAL REVIEW & OUTLOOK

PSEG

We make things work for you.

SI-SSA-0015-05887

Strong financial position to support our business initiatives

Financial Position

- ✓ Achieved Earnings Guidance
- ✓ Stable Dividend and Opportunity for Growth
- ✓ Strong Balance Sheet
- ✓ Regulated Growth Opportunity without Equity Issuance
- ✓ Solid Credit Ratings
- ✓ O&M Controlled
- ✓ Well Funded Pension

SI-SSA-0015-05888

In 2012, PSE&G executed its capital program, Power generated significant free cash flow and PSEG increased its shareholder dividend

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$216 MILLION.

SI-SSA-0015-05889

Our capital investment options can result in as much as $5.4B of utility growth investment through 2015

SI-SSA-0015-05890

All scenarios can be financed without new equity

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$725M FROM 2013-2015

EMP: ENERGY MASTER PLAN

E = ESTIMATE

SI-SSA-0015-05891

PSE&G's capital spending drives regulated earnings growth with a potential future rate base of up to ~$12.6B

2013 – 2015E Rate Base Growth

SI-SSA-0015-05892

Power's credit metrics are expected to remain strong

SI-SSA-0015-05893

Using PSEG's balance sheet strength

to finance growth in the regulated enterprise without equity issuance

SI-SSA-0015-05897

Opportunity for modest and sustainable

dividend increases consistent with stable regulated growth and cash generation outlook at PSEG Power

SI-SSA-0015-05898

PSEG Summary

- Raised 2013 full-year operating earnings guidance to $2.40 - $2.55 per share -- based on financial results to date
- Double digit operating earnings growth at PSE&G starting in 2013, and continuing through 2015 driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength reduces risk in low price environment
- Strong Balance Sheet and Cash Flow support full capital program without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for future growth

PSE&G provides high reliability at below average cost which creates superior value to customers

SAIDI = SYSTEM AVERAGE INTERRUPTION DURATION INDEX, A MEASURE OF AVERAGE OUTAGE DURATION FOR ALL CUSTOMERS SERVED.

PSE&G prioritizes public safety

while maintaining value to customers

LEAK RESPONSE RATE = PERCENTAGE OF UTILITY RESPONSES TO REPORTED LEAKS WITHIN ONE HOUR.

SI-SSA-0015-05906

Formula rates for transmission make the process more predictable with contemporaneous returns

	Transmission (Federal)	Distribution Base Rate Case (State)
Current ROE	• 11.68% base • 12.93% with incentives on Susquehanna-Roseland • 11.93% with incentives on Northeast Grid	• 10.3%
Volatility of Returns	• Low – prospective recovery with annual true-ups for over/under recovery	• Higher – performance impacted positively/negatively by cost management, weather, customer demands, etc.
Process	• Formula – The rate template and specific elements like ROE are predetermined with annual updates and true ups	• Litigated case with each element (depreciation, ROE, O&M levels, Rate Base) scrutinized and settled
Intervenors	• State consumer advocates usually participate	• State consumer advocates • Large customers • Other parties affected by the case, e.g. Solar Developers
Test Year	• PSE&G has fully **forecasted** test year for both Capital and O&M	• **Historical** test year with pro-forma adjustments for known and measurable items, e.g. wage escalation
Time to resolve	• Annual Formula updates are filed in October with January 1 effective date	• Typically settled within 12-15 months

SI-SSA-0015-05907

New Jersey Board of Public Utilities (BPU)

- The Board of Public Utilities consists of five commissioners appointed by the Governor. These appointees are confirmed by the NJ Senate for six-year, staggered terms. The Governor appoints one of the five to serve as Commission President.

  Currently, the commissioners are:

  - Robert M. Hanna, Commission President
  - Jeanne M. Fox
  - Joseph L. Fiordaliso
  - Mary-Anna Holden
  - Dianne Solomon

- Stefanie Brand, Director of the N.J. Division of Rate Counsel

SI-SSA-0015-05908

Slow economic recovery in NJ is constraining growth in all market sectors

Modest residential growth limited by housing market inactivity and the slow economic recovery

Consumer spending is trending with the slow economic recovery and impacting growth in the commercial sector

Industrial sales growth continues to be constrained by slow economic recovery

2013 - 2015
Projected Sales Growth – Gas*

2013 – 2015
Projected Sales Growth – Electric*

SI-SSA-0015-05909

PSEG

*WEATHER NORMALIZED ESTIMATED ANNUAL GROWTH PER YEAR OVER FORECAST PERIOD; PROJECTED SALES GROWTH FOR 2013-2015 GAS INCLUDES ONLY FIRM SALES.

Key economic indicators forecast renewed growth over the 2012 to 2015 timeframe

The New Jersey economy increased by 0.3% annually from 2010 to 2012 and is anticipated to grow 2.3% per year from 2012 to 2015

New Jersey total non-farm employment increased by 0.6% annually from 2010 to 2012 and is expected to grow 1.4% per year from 2012 to 2015

Real personal income in New Jersey increased by 1.4% annually from 2010 to 2012 and is expected to increase 2.5% per year from 2012 to 2015

Single family housing starts declined by 2.6% annually from 2010 to 2012 and are expected to increase ~24% per year from 2012 to 2015

Forward-Looking Statements

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or ongoing low pricing of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulations, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators, including prudency reviews, disallowances and changes in authorized returns,
- any deterioration in our credit quality or the credit quality of our counterparties,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations or increase the cost of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- delays or unforeseen cost escalations in our construction and development activities, or the inability to recover the carrying amount of our assets,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- increases in competition in energy supply markets as well as for transmission projects,
- changes in technology, such as distributed generation, storage and micro grids, and greater reliance on these technologies,
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- an extended economic recession,
- an inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce, and
- changes in the credit quality and the ability of lessees to meet their obligations under our domestic leveraged leases.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and material one-time items. Adjusted EBITDA excludes the same items as our Operating Earnings measure as well as income tax expense, interest expense, depreciation and amortization and major maintenance expense costs at Power's fossil generation facilities. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to Operating Earnings and Adjusted EBITDA with a reference to that slide included on each of the slides where the non-GAAP information appears.

Management uses Operating Earnings and Adjusted EBITDA in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of Operating Earnings and Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, Operating Earnings and Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of Operating Earnings and Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

From time to time, PSEG, PSE&G and Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "Email Alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and /or Really Simple Syndication (RSS) feeds regarding new postings. PSEG meeting materials and other financial releases can be found on the www.pseg.com website under the investor tab, or at http://investor.pseg.com.

PSEG STRATEGY: GROWING A HIGH-QUALITY, LOW-RISK ENERGY INFRASTRUCTURE COMPANY

Ralph Izzo

CHAIRMAN, PRESIDENT AND CHIEF EXECUTIVE OFFICER

Dan Cregg

EXECUTIVE VICE PRESIDENT AND CHIEF FINANCIAL OFFICER

Kathleen Lally

VICE PRESIDENT – INVESTOR RELATIONS

SI-SSA-0015-05920

PSEG

We make things work for you.

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A ~$12 billion infrastructure program producing high single digit rate base growth through 2020	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow in current environment and upside from market rule improvements
2015 **Assets $24B** **Operating Earnings $787M**	2015 **Assets $12B** **Operating Earnings $653M**

SI-SSA-0015-05921

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2015. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT AND PSEG LONG ISLAND ACTIVITY. SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS

PSEG's Strategy

Investment program delivering results

Operational Excellence: Maintaining reliability and improving performance as we control costs in low price environment

Financial Strength: Strong financial position supports investment program and dividend growth

Disciplined Investment:
- Balanced business mix
- Robust pipeline of opportunities

Results:
- 3rd year of Operating EPS* growth
- Continued dividend growth
- Best in class utility growth rate
- Addition of efficient CCGT capacity enhances market position

SI-SSA-0015-05922

* SECOND YEAR OF EPS GROWTH.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: ReliabilityOne Mid-Atlantic Region's Most Reliable Electric Utility (14th consecutive year), Electric Light & Power's 2015 Utility of the Year, ReliabilityOne Outstanding Outage Response Time and Outstanding Customer Engagement • PSEG Power: Record output from combined cycle units • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Cost-control benefits continue
Financial Strength	• Operating earnings for 2015 of $2.91 per share at upper end of guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased dividend in 2015
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2016-2020) with increased investment in Transmission, Energy Strong, Gas System Modernization Program, and Electric and Gas distribution • Power capital program focusing on growth investments including Keys, Sewaren and Bridgeport Harbor, Nuclear and Fossil uprates, PennEast Pipeline, and Solar Source

Focus on building a reliable, efficient, clean energy infrastructure

2011 → 2012 → 2013 → 2014 → 2015

Selected Accomplishments

2011
- Expanded investment programs focused on infrastructure upgrades, energy efficiency, and major transmission projects*
- Sale of Texas generating assets
- Nuclear license extensions and uprates

2012
- Award winning Superstorm Sandy storm response restoring 2.1M customers
- Final federal approval for Susquehanna-Roseland transmission project
- 400 MW of new peaker capacity**

2013
- Expanded Solar investment
- 90% nuclear capacity factor for 9th straight year
- Record output from Linden CCGT and Salem 2 Nuclear Unit

2014
- Energy Strong program approved
- Advanced Gas Path uprates (through 2018)
- PSEG Long Island management contract effective

2015
- Gas System Modernization Project (GSMP) and Energy Efficiency Extension II approved
- New generation build starts Power fleet transformation
- Solar Source portfolio reaches 277 MW_{DC}***

← Cost Control →

SI-SSA-0015-05924

PSEG

* INVESTMENT CONTINUED FOR SUSQUEHANNA-ROSELAND, BURLINGTON-CAMDEN, NORTH CENTRAL RELIABILITY, AND STARTED FOR NORTHEAST GRID AND MICKLETON-GLOUCESTER. ** KEARNY AND NEW HAVEN. *** AS OF MARCH 2016.

Growth in capital spending aligned with customer needs

PSEG Capital Spending

2011 – 2015: ~$14.3 Billion | **2016E – 2020E*: ~$16.0 Billion**

*INCLUDES ALL PLANNED SPENDING. **POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. ***INCLUDES PENNEAST PIPELINE EQUITY INVESTMENT OF $0.1B. E=ESTIMATE.

SI-SSA-0015-05925

Building an efficient, clean, reliable energy platform

Timeframe	Actions taken
2011 – 2015: Transformed business mix	• Applied ~$14.3 billion towards investments • Improved credit ratings • Monetized Energy Holdings' portfolio • Strong balance sheet sustained during period of low power prices, while increasing the dividend
2016 – Forward: Strong financial position supports continued growth	• Continued dividend growth in 2016 • ~$16 billion investment program through 2020 • Utility investments focused on improving reliability and replacing aging infrastructure • Continued investment in reliable and efficient energy infrastructure at Power • Financial capability supports further expansion of the current capital plan

SI-SSA-0015-05926

PSE&G's investment program

Meeting public policy goals and customer needs

SI-SSA-0015-05927

PSEG

* DISTRIBUTION RATE BASE INCLUDES SOLAR AND ENERGY EFFICIENCY

Managing the total costs to customers while investing in the system

PSE&G Typical Residential Customer Bills*

- PSE&G customers' combined electric and gas bills declined 28% over the period
- Low gas prices and elimination of transition charges drove rate decreases

SI-SSA-0015-05928

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

Transforming Power's fleet to maintain strong market position

Economic Drivers	Outlook	Combined Cycle	Nuclear	Scrubbed Coal	Peakers	Renewable
Energy Margins	• Low natural gas and energy prices • Robust portfolio of gas pipeline contracts	✓	✓	✓	n/a	n/a
Capacity Markets	• Tightened rules proposed for capacity performance	✓	✓	✓	✓	n/a
Environmental Regulations	• Tighter air emissions standards	✓	✓	✓	✓	✓
Location	• Assets in well-designed markets, premium regions • Opportunities on brownfield sites	✓	✓	✓	✓	n/a
2016 - PSEG Power Total Capacity 11.9 GW		3.3	3.7	2.4	2.3	0.2
2019 - PSEG Power Total Capacity 13.5 GW *		5.3	3.8	2.4	1.8	0.2

- **Largest nuclear site** in the eastern U.S. and ownership in **large, fully scrubbed coal facilities** at Keystone and Conemaugh provide **economies of scale** that enhance energy margins in current low market, and provide for upside potential if prices improve
- **Dual fuel peakers** meet reliability criteria in capacity markets and provide option value in energy market. Opportunity exists to repower peakers that do not meet NJ HEDD environmental regulations
- **Combined cycle units Keys and Sewaren expected to be operational in 2018, and Bridgeport 5 expected to be operational in 2019,** will enhance emissions performance and have a combined average heat rate of approximately 6,600

SI-SSA-0015-05929

PSEG

*AS OF FEBRUARY 2016 APPROXIMATELY 1.8 GW OF CCGT GENERATION UNDER DEVELOPMENT – KEYS, SEWAREN 7 AND BRIDGEPORT HARBOR 5 , WHICH ARE TARGETED TO GO INTO SERVICE IN 2018/2019 ALONG WITH RETIREMENT OF OLDER SEWAREN UNITS.

Operating Earnings

Disciplined investment program and focus on operational excellence have supported growth

Power's diverse fuel mix and dispatch flexibility continue to generate strong earnings and free cash flow in low price environment

PSE&G's investment program has resulted in an increased contribution to PSEG's earnings

SI-SSA-0015-05930

PSEG

Focus areas over the business plan horizon

PSE&G
• **Operational excellence and cost control** • **Capital program execution** – Transmission, Energy Strong and GSMP program • **Regulatory framework** – Advocate for regulatory framework that provides support for long-term infrastructure programs • **Continue to develop incremental growth opportunities**

PSEG Power
• **Operational excellence and cost control** • **Timely and on budget construction of new growth opportunities** – Keys Energy Center, Sewaren 7 and Bridgeport Harbor • **Strong performance at Nuclear and Fossil** to maximize fleet value in dynamic markets • **Advocacy of constructive market rules** - Capacity markets and environmental regulations

PSEG Long Island
• **Continue execution** – Achievement of performance metrics

SI-SSA-0015-05932

PSEG's Value Proposition

- A stable platform with predictable earnings and a robust investment pipeline
- PSE&G – Best in class utility performance and growth profile
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Strong balance sheet – Supports stable credit rating, growth objectives and the potential for consistent and sustainable dividend growth

SI-SSA-0015-05933

PSE&G

PSEG

We make things work for you.

SI-SSA-0015-05934

SI-SSA-0015-05935

PSE&G strategy

Building a sustainable platform that balances reliability, customer rates and public policy to ensure growth at reasonable returns

SI-SSA-0015-05936

PSE&G's focus on meeting customer reliability and policy objectives are key to our investment strategy

2011	2012	2013	2014	2015

Selected Accomplishments

2011
- NJ Capital Infrastructure Program 2
- Energy Efficiency extension
- Major Transmission capital projects*
- Hurricane Irene/ October Snowstorm
- Mid-Atlantic ReliabilityOne Award

2012
- Hurricane Sandy storm response (2.1M customers restored)
- Transmission: Final federal approval for Susquehanna-Roseland (S-R) project
- National ReliabilityOne Excellence Award
- Mid-Atlantic ReliabilityOne Award
- EEI's Emergency Response Award

2013
- Solar Loan III
- Solar 4 All Extension
- Energy Strong program filed
- Mid-Atlantic ReliabilityOne Award
- Award for Outstanding Response to a Major Event

2014
- Energy Strong approved
- Transmission: North Central Reliability and Burlington-Camden projects placed in-service
- Bergen-Linden Corridor Upgrade project investment started
- Mid-Atlantic ReliabilityOne Award

2015
- Gas System Modernization Project (GSMP)
- Energy Efficiency Extension II
- Transmission: S-R and Mickleton-Gloucester projects placed in-service
- Mid-Atlantic ReliabilityOne Award
- Recognized for customer satisfaction by J.D. Power for both large electric and gas business service in the East

← Cost Control →

* INVESTMENT CONTINUED FOR SUSQUEHANNA-ROSELAND, BURLINGTON-CAMDEN, NORTH CENTRAL RELIABILITY, AND STARTED FOR NORTHEAST GRID AND MICKLETON-GLOUCESTER

SI-SSA-0015-05937

Building on our track record

Operational Excellence

- Strong reliability record, with plans for further improvement
- Cost control efforts

Financial Strength

- Meeting or exceeding earnings targets
- Maintain solid investment grade credit ratings

Disciplined Investment

- 14 investment programs approved over past seven years
  - ✓ Infrastructure focused
  - ✓ Policy alignment – across administrations – Solar, EE and other
- Win-Win: Job creation, environment benefits, low commodity prices, low interest costs, labor availability, federal tax benefits

SI-SSA-0015-05938

Operational Excellence

Reliability and Customer Service

- Named most reliable electric utility in the Mid-Atlantic region for 14th consecutive year
- Recognized by PA Consulting with the Outstanding Customer Engagement and Outstanding Outage Response Time awards
- Named 2015 Utility of the Year by Electric Light & Power Magazine
- Received Star of Energy Efficiency Award

SI-SSA-0015-05939

Achieved ~11% annual earnings growth

over the past four years through implementation of supportive rate mechanisms on our expanded capital program and cost control

SI-SSA-0015-05940

Receive contemporaneous recovery on over 70% of our investments

2011-2015 PSE&G Capital Spending by Recovery Method

2016-2020E PSE&G Capital Spending by Recovery Method

FERC Formula Rates

SI-SSA-0015-05957

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-05958

Focus on transforming Power's portfolio with reliable, efficient, and cleaner energy infrastructure

2011	2012	2013	2014	2015

Selected Accomplishments

2011
- Hope Creek set annual output record
- Nuclear license extensions and uprates achieved

2012
- Peach Bottom 3 set annual output record
- Additional 400 MW of new peaker capacity at Kearny and New Haven
- Superstorm Sandy recovery initiated

2013
- Record annual output from Linden CCGT and Salem 2 Nuclear Unit
- 90% + nuclear capacity factor for 9th straight year
- Bethlehem Energy Center, 2nd gas pipeline connection added

2014
- Record annual output from Bergen CCGT
- PennEast pipeline investment
- CCGT Advanced Gas Path (AGP) uprate investment completed at Linden 1 & 2, 63 MW
- Established PSEG Long Island fuel management operations for 2015 start-up

2015
- Record CCGT fleet annual output
- Continued growth in fleet with 1,300 MW new CCGT's announced
  - Keys
  - Sewaren 7
- Prepared successful bid for 485 MW Bridgeport Harbor 5
- Projects Completed:
  - Peach Bottom EPU, 130 MW
  - Bergen 2 AGP uprate, 31 MW
- HEDD retirement
- Solar portfolio reaches 277 MW_{DC} as of March 2016

Cost Control

SI-SSA-0015-05959

PSEG Power's value is advantaged

by asset diversity, fuel flexibility and location

Total GWh: 55,213

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

SI-SSA-0015-05960

PSEG

* EXCLUDES SOLAR AND KALAELOA.
**INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

Power investing $2 billion of capital in new capacity

SI-SSA-0015-05961

E=ESTIMATE. DATA AS OF MARCH 2016

Power's PJM assets are becoming more efficient

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape
- Readiness for Capacity Performance (CP), successful in CP auction

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel capability at 87% of load following and peaking units

SI-SSA-0015-05962

PSEG

* KEYS & SEWAREN 7 TO BE ADDED TO DISPATCH IN 2018E AND SEWAREN 1-4 WILL RETIRE.

PSEG Power has generating assets in three competitive markets

- Assets located near load
- Low cost portfolio with gas cost advantage
- Positioned to benefit from volatility in real-time markets
- Fleet meets new capacity performance standards
- 1,800 MW of new CCGT capacity under construction in PJM and ISO-NE

SI-SSA-0015-05963

PSEG Power developing 1,800 MW of new, efficient CCGT capacity in MD, NJ and CT

- Constructing the 755 MW CCGT Keys Energy Center in Maryland (SWMAAC*) at an estimated cost of $825 to $875 million
- Constructing a new 540 MW CCGT unit, Sewaren in New Jersey (EMAAC*) at a cost of $625 to $675 million which will replace older Sewaren units
- Constructing a new 485 MW CCGT unit, Bridgeport Harbor 5 (ISO NE), at a cost of $525 to $575 million
- Both Keys and Sewaren 7 are targeted to be in-service in 2018 and Bridgeport Harbor 5 in 2019
- Expanding civic stewardship roles and programs in neighboring communities

*SWMAAC = SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL
LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

SI-SSA-0015-05964

Power's fleet to be transformed with addition of Keys, Sewaren 7 and Bridgeport Harbor in 2018-2019

Projected Fleet Comparison 2015 to 2020E

*EXCLUDES SOLAR AND KALAELOA E = ESTIMATE **INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

SI-SSA-0015-05965

PSEG Power's fossil fleet expected to see improvements in efficiency

- AGP (Advanced Gas Path) investments
- CCGT material condition assessment
- Unit testing and testing coordination initiatives
- HEDD retirements
- Keys/Sewaren Combined Cycle Development (2018)
- Bridgeport Harbor 5 Combined Cycle Development (2019)
- Heat Rate Improvement converts to potential savings of $60-$65M in fuel expense (assuming $3/MB gas price)

SI-SSA-0015-05966

PSEG Power's fossil fleet …

Among the lowest emitting in the industry

- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- With the addition of new units, emissions continue to improve

Expected to reduce its carbon footprint

- Carbon emission rates projected to steadily approach EPA national pollution standards for New and Reconstructed Natural Gas Combined Cycle (1,000 lbs CO_2/MWh-gross)

SI-SSA-0015-05967

Nuclear is a critical element of our success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3
• Operated by PSEG Nuclear • PSEG Ownership: 100% • Technology: Boiling Water Reactor • Total Capacity: 1,176 MW • Owned Capacity: 1,176 MW • License Expiration: 2046 • Next Scheduled Refueling ➢ Fall 2016 • Uprate 18MW Spring 2018	• Operated by PSEG Nuclear • PSEG Ownership: 57% • Technology: Pressurized Water Reactor • Total Capacity: 2,294 MW • Owned Capacity: 1,317 MW • License Expiration: 2036 and 2040 • Next Scheduled Refueling ➢ Unit 1 – Fall 2017 ➢ Unit 2 – Spring 2017	• Operated by Exelon • PSEG Ownership: 50% • Technology: Boiling Water Reactor • Total Capacity: 2,502 MW • Owned Capacity: 1,251 MW • License Expiration: 2033 and 2034 • Next Scheduled Refueling ➢ Unit 2 – Fall 2016 ➢ Unit 3 – Fall 2017 • Uprate: 130 MW (PS Share) ➢ Unit 2 – March 2015 ➢ Unit 3 – December 2015

SI-SSA-0015-05968

PSEG Power's Growth Investments

Site	Project	Estimate ($ Millions)	Benefits	Status
Peach Bottom	Peach Bottom EPU (2014 – 2015)	$403	Increased capacity: 130 MW	PB2 & PB3 completed in 2015
Linden/ Bergen/ BEC	Advanced Gas Path Uprates (AGP): Linden -- 63 MW Bergen -- 31 MW BEC – 58 MW	$120	Increased capacity and improved heat rate: ~152 MW capacity increase ~1.2% heat rate improvement	Completed: Linden (2014) Bergen (2015) Planned: BEC 2017/2018E
Kearny 13 & 14	LM6000 Engine Throttle Push	--	Increased capacity: 14.5 MW	2016E
Maryland	Keys, 755 MW CCGT	$825 - $875	Geographic diversity within PJM; highly efficient gas fired unit in SWMAAC	2018E
Sewaren	Sewaren Unit 7, 540 MW CCGT	$625 - $675	Improved efficiency and reliability; replaces Sewaren 1-4 steam units	2018E
Bridgeport, CT	Bridgeport Harbor 5, 485 MW CCGT	$525 - $575	Highly efficient gas fired unit in ISO-NE	2019E
Eastern PA to Mercer, NJ	PennEast Pipeline	$123	Estimated Earnings in 2019: $13 million	Underway
Various	6 Solar Projects	$241	2016/2017E increase renewable capacity by 136 MW_{DC}/105 MW_{AC}	2016/2017E

Total New Capacity – 2,200 MW

E = ESTIMATE.

SI-SSA-0015-05969

A position in renewable energy – Power's Solar Source

Solar Source portfolio

- Utility scale solar projects in 12 states in operation or under construction
- Long-term PPA's with creditworthy counterparties
- Lump sum, full wrap EPC* agreements

Asset Optimization

- Maintain high equipment availability
- Minimize operating expenses
- Seek additional revenue streams

SI-SSA-0015-05970

* EPC = ENGINEERING PROCUREMENT & CONSTRUCTION. E = ESTIMATE.

PSEG Power has other attractive sources of revenues to round out a robust portfolio

Gas Asset Optimization

- Large wholesale provider to PSE&G and others
  - Storage capacity of approximately 75 Bcf (in the Gulf and market regions)
  - Firm transportation of 1.3 Bcf/day on seven pipelines
- Off-system sales margins shared with residential customers
- Commercial & Industrial gas sales

Ancillary Services – Black start, reactive power, area regulation

LIPA fuel and energy dispatch management – Began management of 10-year contract in 2015

Kalaeloa, HI – 50% equity interest in a 208 MW combined cycle oil unit

New Haven Peakers – 129 MW, rate based contract with ISO-NE

SI-SSA-0015-05971

PSEG Power has demonstrated ability to control O&M

Cost control actions taken:

- Fossil plant assessment
- CCGT material condition assessment
- Vendor contract renegotiations
- Nuclear security services brought in-house to control costs
- Nuclear maintenance productivity study
- Nuclear outage efficiency initiative
- Materials management
- Nuclear excellence initiative
- Nuclear staff – Right sizing

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS. E=ESTIMATE

SI-SSA-0015-05972

During volatile market conditions, Power has delivered on earnings

SI-SSA-0015-05974

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO OPERATING EARNINGS. E = ESTIMATE.
UPDATED AS OF JULY 29, 2016.

PSEG Power – Delivering on priorities

Operational Excellence

- Fuel and technology-diverse fleet produced 55 TWh, 2% higher than 2014
- Nuclear capacity factor exceeded 90%; output of 30 TWh, close to 30.3 TWh is third best ever, record set in 2009
- Production records set at BEC, Linden and the CCGT fleet in total; Kearny 13 & 14 CTs
- Successful implementation of LIPA contract for fuel / generation dispatch.

Financial Strength

- Achieved earnings guidance in 2015
- Cost control programs held O&M to a 0.8% CAGR between 2011 and 2016
- Successful ongoing effort to influence outcomes in key markets showing success, e.g., price formation

Disciplined Investment

- Completed Peach Bottom EPU and AGP at Bergen 2; AGP planned for BEC in 2017/2018
- Repositioning the fleet with three new CCGTs:
  - Keys (2018)
  - Sewaren 7 (2018)
  - Bridgeport Harbor 5 (2019)
- Solar Source's portfolio is 277 MW_{DC}

SI-SSA-0015-05975

PSEG POWER
ER&T

SI-SSA-0015-05976

PSEG

We make things work for you.

Market Review: Markets in 2015 were affected by abnormal weather conditions

Q1: Periods of extremely cold temperatures resulted in high gas prices, significant basis differentials, and higher energy demand

Q2-Q4: A normal summer and mild December, combined with increased supply of gas, reduced energy prices and basis

SI-SSA-0015-05977

Market Review: YTD 2016 impacted by weather but forward gas and electric prices retain seasonal volatility

FORWARDS AS OF JULY 25, 2016

SI-SSA-0015-05978

Market Review: PSEG's extensive gas asset portfolio provides unparalleled access to Marcellus Shale gas

- PSEG Power maintains a robust portfolio of pipeline and storage assets in the Mid-Atlantic
- Marcellus Shale gas production reached 18.8 BCF/day in 2015
- PSEG Power procured over 423 BCF in 2015 with approximately 50% going to PSE&G's utility gas customers
- PSEG Power's gas for generation was 150 BCF in 2015, of which >75% was supplied by Northeast Shale gas
- Severe financial stress among the natural gas producer industry is expected to reduce production growth until gas prices rebalance to higher levels
- Investment in the PennEast pipeline expected to provide more access to Marcellus for PSEG

SI-SSA-0015-05979

Market Review: Completion of new pipeline infrastructure expected to move significant quantities of Marcellus gas out of the region by 2018

Pipeline capacity grows significantly by 2018

- Significant amount of new pipelines have already been built and more are in the advanced planning and development stage through 2018
- Gas production and pipeline takeaway capacity estimated to reach equilibrium in 2018 timeframe based on new pipeline development

SI-SSA-0015-05980

Regulatory Framework: New capacity and energy market designs in PSEG's core markets will better reward reliable generation units

	ISSUE /POLICY	OUTCOME
PJM	CAPACITY	• Higher payments for enhanced reliability (Capacity Performance) and lower energy revenues have raised absolute and relative value of capacity
	ENERGY PRICE FORMATION	• FERC is driving ISO's to improve their pricing constructs and rules – NOPRs and RTO reports addressing critical price formation issues
	DEMAND RESPONSE RULES	• Stricter rules for eligibility and deployment; focus returns to wholesale reliability/comparability after U.S. Supreme Court (SCOTUS) ruling
	STATE INTERVENTION	• SCOTUS dismissed the Maryland and New Jersey appeals in April 2016 • Ohio PPAs: FERC rescinded the previously approved waivers of the affiliate transaction standards and will review the PPAs under the affiliate abuse standards
ISO-NE	CAPACITY	• Continued tightness in capacity markets • Zonal demand curves submitted for FERC approval (FCA 11) • Nuclear and coal units under pressure; closure of Pilgrim nuclear plant
	ENERGY	• Proposed gas pipelines are receiving regulatory approvals slowly • 5 minute interval LMP settlements and fast start pricing expected Q2 2017
NYISO	CAPACITY	• Retirement of Fitzpatrick and Ginna and Western steam plants tighten market, but NYPSC directed to develop a clean energy standard that recognizes the value of nuclear
	ENERGY	• Improvement in price formation during reserve shortage conditions
FEDERAL	ENVIRONMENTAL REGULATIONS	• CPP rules stayed by SCOTUS • Some states will still prepare implementation plans for 2020+ timeframe • New PJM DR rules requiring that BTM diesel-fired generation employ environmental controls

SI-SSA-0015-05981

PSEG Power's Portfolio: Our fleet is well positioned in key markets

Fuel	Coal/Gas	Coal/Gas
Start of Operations	1968	1960/1961

On September 1, 2016, PSEG Power submitted to the PJM Independent Market Monitor and the PJM Office of Interconnection a preliminary request for an exception to PJM's Reliability Pricing Model must-offer requirement for the Hudson and Mercer generating stations in connection with the 2020-2021 capacity auction to be held in May 2017. The two stations have not cleared the PJM capacity auction for the prior two years, and would need significant investment to achieve the performance standards associated with PJM's Capacity Performance construct. The submission provides PSEG Power the opportunity to fully analyze the market conditions and economics, among other factors, associated with maintaining station operations, including any necessary capital improvements, prior to making a final determination whether or not to bid in the 2020-2021 capacity auction by December 1, 2016.

PSEG FINANCIAL APPENDIX

SI-SSA-0015-06015

PSEG Financial Highlights

Maintaining full-year 2016 Operating Earnings guidance of $2.80 - $3.00 per share*

- ✓ Reaching the upper end of our guidance range in 2016 will be difficult even with improvements seen in the power markets, expectations for warm summer weather, normal operations and management of O&M
- ✓ Focused on meeting customer needs for clean, reliable, efficient delivery of energy

Infrastructure Spend

- ✓ PSE&G capital spending on T&D for 2016 expected to top $3 billion
- ✓ PSE&G's Gas System Modernization Program (GSMP) and Energy Strong continue
- ✓ Keys and Sewaren CCGTs construction is on schedule and on budget
- ✓ PSE&G has identified more than $500 million of additional infrastructure spend over the current capital spending plan of $12 billion in the 2016-2020 period

Financial position remains strong

- ✓ Positive cash from Power and increasing cash flow from operations at PSE&G supports dividend growth and funds capital spending program without the need to issue equity
- ✓ Debt as a percentage of capitalization was 45% at June 30

Forward Looking Statement

Certain of the matters discussed in this report constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in Item 1. Financial Statements—Note 8. Commitments and Contingent Liabilities, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, and other factors discussed in filings we make with the United States Securities and Exchange Commission (SEC). These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to sufficiently obtain coverage or recover proceeds of insurance on such matters,
- increase in competition in energy supply markets as well as competition for certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology and customer usage patterns.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-06026

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The last slide in this presentation includes a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

PSEG – 2012 Highlights

2012 Earnings in-line with guidance

- Achieved operating earnings of $2.44 per share, at the high end of guidance range of $2.25-$2.50, including storm-related costs at PSE&G
- PSE&G represented 43% of consolidated operating earnings with growth in transmission

Operational excellence

- Record output from CCGTs, continued strong production from Nuclear, and Power's control of O&M supported results
- PSE&G recognized for reliability: National ReliabilityOne Excellence Award, Mid-Atlantic Reliability Award, and Award for Outstanding Response to a Major Outage Event; as well as EEI's Emergency Response Award
- Restored service to 2.1 million customers in a two-week period of time in the aftermath of Superstorm Sandy and the Nor'easter that followed
- Extension of major labor contracts

PSEG disciplined capital investment

- Key regulatory approvals received for major transmission projects
- BPU decisions pending on Solar4All Extension and Solar Loan III*
- Power added 400 MW of new peakers in time to respond to summer demand
- Holdings added 40 MW of new solar capacity

SI-SSA-0015-06031

* In May 2013, the NJBPU approved the Solar Agreement reached with BPU Staff and other parties; see slide 46 for details.

PSE&G's Energy Strong Capital Program addresses new reality

- New ten-year, $3.9 Billion Infrastructure Program filed with the NJBPU to strengthen PSE&G's distribution system focusing on hardening and resiliency
- Plan to invest an additional $1.5 Billion in transmission grid over the ten-year period
- Energy Strong proposal includes:
  - ✓ Protecting 40 utility installations from severe storms (**$1.7 Billion**)
  - ✓ Making the electric grid smarter and easier to repair (**$454 Million**)
  - ✓ Adding backup distribution lines and system redundancies (**$415 Million**)
  - ✓ Undergrounding 20 miles of overhead distribution lines (**$60 Million**)
  - ✓ Modernizing the gas distribution system (**$1.1 Billion**)

- Better protection for homes and businesses during severe weather and improved day to day system reliability
- Proposed filing creates ~5,800 jobs and stimulates economic activity for New Jersey businesses

SI-SSA-0015-06038

54 local NJ towns and 5 counties support

- 54 municipalities and five counties (Bergen, Hudson, Mercer, Passaic and Somerset) have approved resolutions in support of Energy Strong, PSE&G's infrastructure proposal to improve and fortify its electric and gas distribution systems

- The Energy Strong proposal is currently being evaluated by the NJ Board of Public Utilities

SI-SSA-0015-06039

Value Proposition

PSEG is positioned to expand its investment in PSE&G projects that provide reasonable, risk adjusted returns, in ways that meet customer needs and state goals, given strong cash flow of Power and growing cash contribution from PSE&G.

PSEG will maintain a strong financial profile that provides the opportunity to achieve our growth objectives and maintains our track record of returning cash to shareholders.

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-06065

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2012	2013-2015E	Expected In-service Date
$435M	$24M	$411M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-06066

State policy imperatives have been redefined by Superstorm Sandy

Storm report issued by NJBPU focusing on:

- Preparedness Efforts
- Communications
- Restoration and Response
- Post Event Analysis
- Underlying Infrastructure Issues

Storm Deferral Filings:

- On December 19, 2012 the Board granted a PSE&G request for general authority to defer storm restoration costs, thereby making such costs potentially recoverable in future rate filings
- On February 20, 2013, at its open public meeting, the Board voted that the recovery of all such storm restoration costs would be reviewed in a generic (multi-utility) proceeding

SI-SSA-0015-06067

We have also responded with a plan focused on infrastructure hardening and resiliency

- PSE&G filed a petition on February 20, 2013, with the NJBPU seeking approval for the Energy Strong Program (ES) which will harden electric and gas distribution infrastructure and increase the resiliency of the electric distribution system
- The filing complements the NJBPU's recently issued order requiring all Electric Distribution Companies to take specific actions to improve preparedness and response to major storms
- ES program represents a potential investment of approximately $3.9 billion over the next 10 years. PSE&G has asked for initial funding approval of $2.6 billion during the first five years
- Additional Transmission investment of approximately $1.5 billion would be included in future FERC Formula Rate filings

SI-SSA-0015-06068

PSE&G is continuing to provide solutions

to assist New Jersey in achieving its EMP goals

Solar Agreement Approved

- ✓ The NJBPU approved the Solar Agreement reached with BPU Staff and certain other parties on May 29
- ✓ The agreement provides for investment of $446 million over a 3-year period, and a return on equity of 10%

Solar 4 All extension (S4Ae)	Solar Loan III (SL3)
Agreement to invest up to $247 million to develop new solar capacity on landfills, brownfields (42MW) and 3 MW in smaller pilot programs	Agreement to invest up to $199 million on 97.5 MW of new solar

SI-SSA-0015-06069

Lower commodity costs and expiration of certain transition charges are expected to fully offset the impact to customer bills

*2018 BGS/BGSS RATES AS WELL AS SBC AND DISTRIBUTION RATES HELD CONSTANT AT CURRENT 2013 RATES. RATES RELATED TO ELECTRIC RESTRUCTURING: SECURITIZATION (STC), NON-UTILITY GENERATION CHARGE (NGC), & TRANSITIONAL ENERGY FACILITIES ASSESSMENT (TEFA), ARE REDUCED TO ZERO BY 2018. THE RGGI RECOVERY CHARGE (RRC), SOLAR PILOT RECOVERY CHARGE (SPRC), AND CAPITAL ECONOMIC STIMULUS INFRASTRUCTURE INVESTMENT PROGRAM EXTENSION (CIP II) BILL IMPACTS ARE INCLUDED IN THEIR RESPECTIVE GAS AND ELECTRIC BARS AND FORECASTED IN 2018 BASED UPON LATEST ESTIMATE. THE 2018 BILL IMPACTS OF ES, EE4ALL, AND S4AEXT/SL3 IMPACTS ARE BASED UPON CURRENT ESTIMATES.

LONG ISLAND POWER AUTHORITY

SI-SSA-0015-06072

PSEG

LIPA T&D management contract

In December 2011, the Long Island Power Authority (LIPA) selected PSEG to manage its electric transmission and distribution system for 10 years starting in 2014

- Reasons for selecting PSEG included:
- Proven technical capabilities and track record of top quartile customer service and reliability
  - ✓ Commitment to cost control and investment optimization
  - ✓ Corporate culture of transparency and data-driven decision making
  - ✓ Transition activities on-track – successfully achieving all milestones through February 2013

- Evaluating impact of Superstorm Sandy and recent LIPA management changes on the overall schedule and transition

Successful management of the LIPA transmission and distribution system may lead to additional growth opportunities

PSEG

We make things work for you.

SI-SSA-0015-06081

PSEG Power strategy

Focused on safety performance, unit reliability, competitive cost structure with control of maintenance costs, achieving operational excellence, and supporting market rules to maintain a level playing field

SI-SSA-0015-06082

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus

Fleet Diversity/Efficiency Focus

- Fleet diversity across the dispatch curve and fuel types provides flexibility
- Nuclear units continue to achieve strong operational results and are well positioned for the future
- Peach Bottom steam path retrofit completed
- Fossil fleet is suited for market dynamics
- CCGT achieved record output in 2012
- Installed 400 MW new peaking capacity in 2012

Financial/Economic Focus

- O&M cost control programs have delivered
- Sites offering competitive advantage suited for expansion

Regulatory Focus

- Strong regulatory performance
- Industry leadership in the changing regulatory environment

SI-SSA-0015-06083

PSEG Power delivered in 2012

Storm and weather challenges	Market challenges	Value delivered
• SuperStorm Sandy impacted our generating sites • Warm winter put pressure on demand and pricing for both electricity and gas • Hot summer weather created challenging operating environment	• Unit outages and transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by weather and economy	• Cost control • Lower dispatch and fuel cost • Captured value through coal/gas switching, unit flexibility • Improved unit availability • Coal & oil sales optimized inventory • Expedited return from storm outages, restored margin opportunities • Optimized unit dispatch across fleet during storm recovery

SI-SSA-0015-06084

PSEG Power has generating assets

in three competitive markets

- Low cost portfolio
- Fuel flexibility
- Assets near loads
- Poised to benefit in real time markets
- Fleet will maintain diversity and efficiency in 2016 after HEDD
- Most sites suitable for expansion

SI-SSA-0015-06085

PSEG Power Nuclear fleet is a critical element of success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,174 MW
• Owned Capacity: 1,174 MW
• License Expiration: 2046
• Next Refueling
  • Fall 2013
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%, Exelon – 43%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,326 MW
	• Owned Capacity: 1,335 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 -- Spring 2013
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,245 MW
		• Owned Capacity: 1,123 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2013

SI-SSA-0015-06086

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations – eight consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent and attractive training program
- Developing Fukushima action plan in response to NRC staff review
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-06087

PSEG Power's Fossil Fleet availability has shown steady improvement

EFORd improvement resulted in over 200 MW of additional capacity available

EFORp improvement and availability at peak demand times has resulted in performance payments in each of the last four years

SI-SSA-0015-06088

PSEG Power improvements achieved in combined cycle fleet efficiency

Actions Taken to Create Value	
• Heat rate improvement program • Operational Excellence Model	• Training programs • Unit testing initiative • Outage work to restore efficiency

SI-SSA-0015-06089

Superstorm Sandy affected the fleet;

when the load returned, Power was ready

SI-SSA-0015-06090

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- Power is well positioned for HAPS

SI-SSA-0015-06091

PSEG Power's focus on costs has resulted in moderate increase in O&M for six years

Cost control actions taken:	
• Coal assessment • CCGT material condition assessment • Contract renegotiation	• Material management • Nuclear maintenance productivity study • Nuclear outage efficiency initiative

SI-SSA-0015-06092

* INCLUDES IMPACTS FROM STORM RECOVERY COSTS AND POTENTIAL RELATED INSURANCE PROCEEDS.
E = ESTIMATE.

PSEG Power is well positioned for growth in the fleet when market conditions dictate

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Interconnection • Gas Pipeline Access • Sites/Space • Emissions

SI-SSA-0015-06093

PSEG Power will maintain diversity and efficiency after a realignment of the fleet in 2016

Objective
2012 → 2016E

- Maintain fuel diversity
- Maintain load serving capability
- Improve fleet heat rate by 6%
- Maintain low cost structure
- Environmental improvement

Fuel Diversity
13,226 MW 11,200 MW

Energy Produced
52.5 TWh 52-54 TWh

PSEG POWER
ER&T

SI-SSA-0015-06097

PSEG

We make things work for you.

PSEG Power
ER&T strategy

Focused on optimizing the value of its asset portfolio and providing outstanding service to our customers, while prudently managing risk

SI-SSA-0015-06098

Diversified assets and flexible dispatch

High performing, base load nuclear assets	3,632 MW
Fuel advantaged, base load coal plants in PA	776 MW
Flexible combined cycle fleet	3,176 MW
Well leveraged intermediate & peaking assets	5,642 MW

Integrated trading and dispatch capability around fleet

SI-SSA-0015-06099

Fleet capacity has been advanced by:

Improved Heat Rate capability

Trading acumen to execute fuel switching opportunities

Reduced O&M and increased start-up success

Capturing new products opportunity with minimal investment

SI-SSA-0015-06100

Spark spread replaces dark spread as major value driver

- Spark spread has risen above dark spread in PJM markets
- Power's gas units operating at record throughput
- Gas operation provides much more operational flexibility
- Enhances the ability of trading organization to capture volatility

SI-SSA-0015-06101

2013 BGS Auction Results for PSE&G Zone

BGS sales account for about a third of our forward portfolio of hedges

SI-SSA-0015-06102

BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2011-2013 WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2013.

Our hedging mix has changed with the market but still captures the fleet's locational advantage

- 3 Year forward BGS sales comprise smaller percentage of Power's hedges
- Other full requirement load deals help capture additional locational and load shape premium

SI-SSA-0015-06103

NOTE: PERCENTAGES REPRESENT HEDGED VOLUMES IN PLACE AFTER BGS AUCTION.

Hedging strategy designed to protect gross margin and leverage the portfolio

Ratable Hedging on Baseload:

- 3 year ratable hedge tactics
- 3 year PJM hedge of capacity (not included in table)
- Load following sales (such as BGS) have strong correlation to our units for hedging basis and load shaping premium

Dynamic Hedging on Intermediate Coal, Combined Cycle and Peaking:

- Position fleet to take advantage of market volatility
- Gas and load-following fleet left open until prompt year to capture volatility
- Use all trading products to capture option value of assets and benefit from market dislocations

		Apr-Dec 2013	2014	2015
Base Load (Nuclear and Base Load Coal)	Volume TWh	26	35	35
	% Hedged	100%	80-85%	40-45%
	Price $/MWh	$50	$50	$50
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	15	19	18
	% Hedged	30-35%	0%	0%
	Price $/MWh	$50	$50	$50
Total	Volume TWh	40-42	53-55	52-54
	% Hedged	70-75%	50-55%	25-30%
	Price $/MWh	$50	$50	$50

HEDGE PERCENTAGES AND PRICES AS OF MARCH 28, 2013. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS.

SI-SSA-0015-06104

PSEG's locational advantage

and electric basis

- Basis (PS Zone to PJM West) will continue to trend downward for forward sales
- Volatility will remain significant in the prompt periods (especially summer/winter)
- Power maintains sufficient length to participate in upside volatility as well as a valuable 250MW transmission position into NYC
- Basis will continue to have a positive impact on PSEG Power profitability

SI-SSA-0015-06105

*AS OF MAY 15, 2013.

PSEG's locational advantage

and gas basis

- Lower cost supplies of shale gas have been beneficial to both PSE&G customers and PSEG Power
- Over 50% of our available pipeline capacity can access market area supplies of shale gas
- Power's generating units sit in close proximity to the Marcellus fairway
- Power buys approximately 350BCF/year of gas
- We have been able to arbitrage gas values from South to North and East to West using our storage and pipeline capacity

SI-SSA-0015-06106

PJM's capacity market continues to recognize locational value of our fleet

$/MW-Day	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016	2016 / 2017
Power's Average Price	$153	$244	$162	$167	$166

SI-SSA-0015-06125

PSEG Summary

- Maintaining 2013 operating earnings guidance of $2.25 - $2.50 per share, with earnings mix shifting to ~50% regulated
- Double digit operating earnings growth at PSE&G starting in 2013, and continuing through 2015 driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength reduces risk in low price environment
- Strong Balance Sheet and Cash Flow support full capital program without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for further growth

PSE&G provides high reliability at below average cost which creates superior value to customers

SI-SSA-0015-06130

SAIDI = SYSTEM AVERAGE INTERRUPTION DURATION INDEX, A MEASURE OF AVERAGE OUTAGE DURATION FOR ALL CUSTOMERS SERVED.

PSE&G prioritizes public safety

while maintaining value to customers

LEAK RESPONSE RATE = PERCENTAGE OF UTILITY RESPONSES TO REPORTED LEAKS WITHIN ONE HOUR.

Formula rates for transmission make the process more predictable with contemporaneous returns

	Transmission (Federal)	Distribution Base Rate Case (State)
Current ROE	• 11.68% base • 12.93% with incentives on Susquehanna-Roseland • 11.93% with incentives on Northeast Grid	• 10.3%
Volatility of Returns	• Low – prospective recovery with annual true-ups for over/under recovery	• Higher – performance impacted positively/negatively by cost management, weather, customer demands, etc.
Process	• Formula – The rate template and specific elements like ROE are predetermined with annual updates and true ups	• Litigated case with each element (depreciation, ROE, O&M levels, Rate Base) scrutinized and settled
Intervenors	• State consumer advocates usually participate	• State consumer advocates • Large customers • Other parties affected by the case, e.g. Solar Developers
Test Year	• PSE&G has fully **forecasted** test year for both Capital and O&M	• **Historical** test year with pro-forma adjustments for known and measurable items, e.g. wage escalation
Time to resolve	• Annual Formula updates are filed in October with January 1 effective date	• Typically settled within 12-15 months

SI-SSA-0015-06132

New Jersey Board of Public Utilities (BPU)

- The Board of Public Utilities consists of five commissioners appointed by the Governor. These appointees are confirmed by the NJ Senate for six-year, staggered terms. The Governor appoints one of the five to serve as Commission President.

  Currently, the commissioners are:

  - Robert M. Hanna, Commission President
  - Jeanne M. Fox
  - Joseph L. Fiordaliso
  - Mary-Anna Holden
  - Dianne Solomon

- Stefanie Brand, Director of the N.J. Division of Rate Counsel

SI-SSA-0015-06133

Slow economic recovery in NJ is constraining growth in all market sectors

Modest residential growth limited by housing market inactivity and the slow economic recovery

Consumer spending is trending with the slow economic recovery and impacting growth in the commercial sector

Industrial sales growth continues to be constrained by slow economic recovery

2013 - 2015 Projected Sales
Growth – Gas*

2013 - 2015 Projected
Sales Growth – Electric*

SI-SSA-0015-06134

* WEATHER NORMALIZED ESTIMATED ANNUAL GROWTH PER YEAR OVER FORECAST PERIOD

Key economic indicators forecast renewed growth over the 2012 to 2015 timeframe

The New Jersey economy increased by 0.3% annually from 2010 to 2012 and is anticipated to grow 2.3% per year from 2012 to 2015

New Jersey total non-farm employment increased by 0.6% annually from 2010 to 2012 and is expected to grow 1.4% per year from 2012 to 2015

Real personal income in New Jersey increased by 1.4% annually from 2010 to 2012 and is expected to increase 2.5% per year from 2012 to 2015

Single family housing starts declined by 2.6% annually from 2010 to 2012 and are expected to increase ~24% per year from 2012 to 2015

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending and any future rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-06144

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last slide in this presentation (Slide A) includes a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of May 31, 2018.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. Strategy: Investments aligned with public policy and customer needs

Value Proposition: A $12 Billion - $15.5 Billion infrastructure program expected to produce **8%-10%** annual rate base growth through 2022

2017	Assets $29B Net Income $973M Non-GAAP Operating Earnings* $963M

Regional Competitive Generation

Strategy: Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity

Value Proposition: Provides substantial free cash flow and upside from market rule improvements

2017	Assets $12B Net Income $479M Non-GAAP Operating Earnings* $505M

SI-SSA-0015-06148

ASSETS AND NET INCOME ARE FOR THE YEAR ENDED 12/31/2017. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO ENTERPRISE / OTHER ACTIVITY. *SEE SLIDE A FOR A RECONCILIATION OF NET INCOME TO NON-GAAP OPERATING EARNINGS, SLIDE B FOR RECONCILIATIONS FOR PSE&G AND PSEG POWER, AND SLIDE C FOR ENTERPRISE/OTHER.

Strategic focus produced growth in non-GAAP Operating Earnings as regulated business contribution grew to ~65%

2012	PSEG 5-Year Capital Investment Program of $18 Billion*	2017

- ✓ Regulated annual Rate Base growth of 13% to $17 Billion
- ✓ Transmission has grown to 46% of Rate Base
- ✓ Efficient growth: O&M held flat
- ✓ Overall customer bill is down

$2.44	Non-GAAP Operating Earnings +4% per year	$2.93
43%	Regulated Net Income Contribution Increased	65%
$1.42	Common Dividend Per Share +4% per year	$1.72

*CAPITAL INCLUDES YEARS 2013-2017.

Next Steps: Building on a successful and sustainable platform that meets the needs of customers and shareholders

2018	PSEG 5-Year Capital Investment Program $14B - $17B

- ✓ Investing $12 Billion-$15.5 Billion to upgrade New Jersey infrastructure and meet NJ's Clean Energy goals
- ✓ Minimizing risk/volatility of merchant generation
- ✓ Continued cost discipline in operations
- ✓ Maintaining high customer satisfaction levels
- ✓ Tax reform benefits customers and shareholders
- ✓ Financial strength remains a core operating principle

Rate Base	Expected 8%-10% Compound Annual Growth in Rate Base through 2022
$1.80	Opportunity for Consistent and Sustainable Growth in Common Dividend

SI-SSA-0015-06155

PSEG

Regulatory/legislative policy initiatives strengthen foundation for providing clean, affordable and resilient energy supply

Base Rate Case Provides Opportunity for Long-Term Rate Stability

- Decision expected in Q4 2018

NJ regulators endorse streamlined process supporting long-term investment

- GSMP II Approved; ES II Filing Shortly

NJ Advances Clean Energy Future

- PSEG Power will request NJBPU determination of eligibility for our NJ nuclear plants to receive Zero Emission Certificates
- PSE&G plans to accelerate investment in Energy Efficiency, Energy Storage and EVs

FERC/PJM Wholesale Market Reforms Underway

- Fast start pricing reform expected in 2018

SI-SSA-0015-06156

NJ Zero Emission Certificates (ZEC) support carbon free nuclear generation

- ✓ Legislation signed by New Jersey Governor Murphy on May 23
- ✓ Starts a 330-Day process – NJ Board of Public Utilities to determine eligibility and selection of nuclear plants eligible for ZECs
- ✓ Hope Creek and Salem produce >90% of NJ's carbon free generation, support ~6,000 jobs, and benefit fuel diversity and grid reliability

SI-SSA-0015-06157

PSEG's future direction aligned with customer needs and NJ's Clean Energy agenda

2012-2017	2018 – 2022	Utility of the Future
Transmission expansion Storm hardening and resiliency New peaking generation and generation uprates Regulated & Unregulated Renewables	Upgrade aging infrastructure and Transmission Storm hardening and resiliency New, efficient CCGTs Clean Energy Legislation • Expanded Energy Efficiency • EV infrastructure • Battery storage Regulated & Unregulated Renewables	Clean Energy Legislation • Expanded Energy Efficiency • EV infrastructure • Battery storage Greater use of technology to enhance 2-way customer communication; AMI Regulated Renewables

SI-SSA-0015-06158

NJ has advanced a new Clean Energy agenda

Energy Policy	Description	Investment Opportunity for PSEG
Energy Efficiency (EE)	• Requires electric utilities to reduce energy consumption by 2% and gas utilities to reduce energy consumption by 0.75% from average annual usage over prior 3-year period within 5 years • Allows utilities to recover "reasonable and prudent costs" including return of and on capital and revenue impact of lost sales	☑
Renewable Portfolio Standard (RPS)	• Increases percentage of energy to be supplied from renewable energy resources to 50% by 2030	☑
Solar	• Annual solar requirement increases to 4.8% in 2025 before declining to 4.5% in 2026 and 1.1% in 2033 as net metering cap increased to 5.8% from 2.9% • BPU must complete a study on how to modify/replace SREC program by 24 months after enactment	☑
Community Solar	• BPU must develop rules and regulations establishing a "Community Solar Energy Pilot Program"	☑
Offshore Wind (OSW)	• BPU to establish Offshore Renewable Energy Certificate (OREC) to support 3,500 MW by 2030 • Allows OSW projects to receive tax credits from the Energy Development Agency (EDA) • NJ Dept. of Labor directed to develop job training programs to support OSW development	☑
Energy Storage	• BPU to provide Governor and Legislature with analysis of "energy storage needs and opportunities" • BPU to initiate process within six months of delivering report that establishes a process and mechanism for achieving 600 MW of energy storage by 2021 and 2,000 MW by 2030	☑
EV Infrastructure	• Charging stations and related infrastructure for workplace, multi-family and travel corridors	☑

SI-SSA-0015-06159

Partnership for a Clean Energy Future:

~$2.9 Billion investment program to provide cost-effective and innovative solutions supporting NJ's clean energy goals

- **Energy Efficiency**: Residential and C&I programs to lower energy bills and combat climate change
  - Savings targeting 2% electric and 0.75% gas savings consistent with NJ Clean Energy Legislation
- **Electric Vehicles**: "Smart" electric vehicle infrastructure: residential, workplace, multi-family, travel corridors
- **Battery Storage**: Utility-scale systems to defer traditional distribution investment, enable additional solar, and enhance critical infrastructure resiliency

Program Investment	$ Billion
Energy Efficiency	$2.5
Electric Vehicles	$0.3
Battery Storage	$0.1
Investment Total	$2.9

- 6-year investment program starting in 2019
- Seeking contemporaneous recovery
- Contingent on approval of decoupling
- Expect to file in the near-term

SI-SSA-0015-06160

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~20% since our last rate case, 30% adjusted for inflation
- Also provided BGSS bill credits totaling ~$680 per customer since 2012

- Regional price comparison** - Gas is 2nd lowest and Electric is lower than average
- Distribution revenue component is the lowest in the state for Gas and second lowest for Electric
- Investing at the filing levels of the infrastructure extension and clean energy future programs will keep rates under 2010 levels for over a decade (adjusted for growth in CPI)

SI-SSA-0015-06161

SI-SSA-0015-06164

Solid credit metrics support additional investment capacity

Average Funds From Operations/Debt* 2018E – 2020E

	Power	PSEG
Estimate	Low - Forties	~20%
Minimum Threshold	30%	High - Teens

* Does not consider potential ZEC impact on estimated FFO/Debt

Total Incremental Investment Capacity 2018E – 2020E (PSEG and Power)

Incremental capacity invested in PSE&G would be matched with utility debt

SI-SSA-0015-06165

Zero Emission Certificate (ZEC) Process

2018	2019	2020

Enacted May 23 (Day One)

November 2018 (Day 180), BPU issues Order establishing ZEC program

April 2019 (Day 330), BPU ranks applicants and selects plants to receive ZECs. Utilities begin purchasing ZECs for 'stub' period. Cash payment follows

During 'stub' period (end of energy year), ZECs earned through May 31

Within 90 days of May 31, cash payment occurs for ZECs earned during 'stub' period

June 2019, utilities purchase ZECs for new energy year, with cash payment within 90 days of the energy year ending May 31, 2020

Subsequent years work the same

Annual revenues estimated at ~$200 million, or ~$0.28 per share if all three NJ units are selected

SI-SSA-0015-06166

PSEG has controlled O&M

Cost Control Actions

- Continued focus on vendors to ensure maximum value
- Regular organizational refinement to streamline processes
- Managed Pension & OPEB Expense
- Retirement of un-economic generating plants
- 'Best practices' teams focused on improving performance while managing costs

1) EXCLUDES REGULATORY BALANCING ACCOUNT ITEMS AND NUCLEAR ARO ACCRETION EXPENSE ; INCLUDES THE IMPACT OF THE CHANGE IN PENSION ACCOUNTING STANDARDS. E = ESTIMATE.

PSEG Value Proposition

- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 111-year record of paying common dividends with opportunity for consistent, sustainable growth

SI-SSA-0015-06170

Ralph Izzo

CHAIRMAN, PRESIDENT AND CHIEF EXECUTIVE OFFICER

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED

Ralph Izzo was elected chairman and chief executive officer of Public Service Enterprise Group Incorporated (PSEG) in April 2007. He was named as the company's president and chief operating officer and a member of the board of directors of PSEG in October 2006. Previously, Mr. Izzo was president and chief operating officer of Public Service Electric and Gas Company (PSE&G).

Since joining PSE&G in 1992 Mr. Izzo was elected to several executive positions within PSEG's family of companies, including PSE&G senior vice president – utility operations; PSE&G vice president – appliance service; PSEG vice president - corporate planning; and PSE&G vice president - electric ventures. In these capacities he broadened his experience in the areas of general management, strategic planning and finance.

Mr. Izzo is a well-known leader within the utility industry, as well as the public policy arena. He is frequently asked to testify before Congress and speak to organizations on matters pertaining to national energy policy.

Mr. Izzo's career began as a research scientist at the Princeton Plasma Physics Laboratory, performing numerical simulations of fusion energy experiments. He has published or presented over 35 papers on magnetohydrodynamic modeling. Mr. Izzo received his Bachelor of Science and Master of Science degrees in mechanical engineering and his Doctor of Philosophy degree in applied physics from Columbia University.

He also received a Master of Business Administration degree, with a concentration in finance from the Rutgers Graduate School of Management. He is listed in numerous editions of Who's Who and has been the recipient of national fellowships and awards. Mr. Izzo has received honorary degrees from the New Jersey Institute of Technology (Doctor of Science), Thomas Edison State University (Doctor of Humane Letters), Bloomfield College (Doctor of Humane Letters), Rutgers University (Doctor of Humane Letters), and Raritan Valley Community College (Associate of Science).

Mr. Izzo is on the board of directors for the New Jersey Chamber of Commerce, the Edison Electric Institute (EEI), the Nuclear Energy Institute (NEI) and the New Jersey Performing Arts Center. He is also a member of the Board of Trustees of Peddie School and the Princeton University Andlinger Center for Energy and the Environment Advisory Council, as well as a member of the Visiting Committee for the Department of Nuclear Engineering at MIT. Mr. Izzo is a former member of the Columbia University School of Engineering Board of Visitors. In addition, he is a former chair of the Rutgers University Board of Governors and the New Jersey Chamber of Commerce.

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-06174

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of October 31, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, highly efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (349 MW_{DC}/275 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-06179

*HUDSON AND MERCER GENERATING STATIONS WERE RETIRED AS OF JUNE 1, 2017.

Regulatory and Policy initiatives drive long-term value creation

NJ Distribution Base Rate Proceeding

- Agreed to delay rate review filing by one month to no later than December 1, 2017

Long-Term Infrastructure Investment Platform

- In July, PSE&G filed for a 5-year, $2.7 billion extension of the Gas System Modernization Program (GSMP2)
- In October, the BPU approved $69 million of PSE&G's request to extend its investment in Energy Efficiency (EE)
- A final BPU decision on the Infrastructure Investment Program (IIP) providing for 5-year investment programs is expected by year-end
- PSE&G preparing a multi-year extension filing for Energy Strong in coming months
- PSE&G developing a large, multi-year EE investment program to bring benefits to more customers

Preserve the Value of Nuclear Supply

- Advocating for legislative strategy to recognize the value of nuclear energy under terms and conditions that provide proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- FERC/PJM considering DOE Notice of Proposed Rulemaking (NOPR) issues of Price Formation and fuel-secure resource preservation

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as competition for certain transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies and changes in customer behaviors, including energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-06194

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slides A and B at the end of this presentation includes a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2013.
PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT, PSEG LONG ISLAND AND ENERGY HOLDINGS ACTIVITY.
SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

Delivering on commitments and pursuing opportunities for growth

Operational Excellence

- Power: Record 2013 output at Linden CCGT and Salem 2; nuclear capacity factor greater than 90% for 9th straight year
- PSE&G: Mid-Atlantic Reliability Award (12th consecutive year)
- PSEG Long Island: Went "live" on January 1, 2014
- PSEG: Cost-control benefits continue

Financial Strength

- Strong cash flows supported credit rating increases
- Pension more than fully funded
- Dividend increased

Disciplined Investment

- PSE&G
  - ✓ Transmission capital program execution and growth
  - ✓ Energy Strong settlement
  - ✓ Solar 4 All Extension and Solar Loan III programs
- Power: Investments to enhance the fleet's competitiveness – 130 MW Nuclear uprate, 150 MW CCGT uprate and efficiency improvement

SI-SSA-0015-06199

Maintaining PSEG 2014 Operating Earnings Guidance

Reflects increased level of utility investment, pension savings and assumes normal weather and unit operations for the rest of year

PSEG's business profile has been transformed through significant growth in utility capital spending

SI-SSA-0015-06203

Energy Strong Agreement recognizes benefits of system investments

- Energy Strong Agreement reached with all parties
  - ✓ Agreement recognizes the benefits of system investments that prevent or shorten outages
  - ✓ Supports $1.22 billion capital program over several years on reasonable terms: $1 billion recovered through accelerated, rate recovery mechanism
    - $820 million Electric
    - $400 million Gas
  - ✓ Allows PSE&G to earn a 9.75% ROE on the $1 billion recovered through mechanism
  - ✓ Requires PSE&G to file a base rate case by November 2017
  - ✓ Final NJBPU approval anticipated
- Over 100 New Jersey municipalities supported Energy Strong
- Energy Strong agreement clears path for PSE&G to pursue the initial phase of this robust capital program

SI-SSA-0015-06204

PSEG

*AT THE BEGINNING OF EACH YEAR. **EXCLUDES BGSS.

Balance Sheet Strength

2009 – 2013: Reduced risk profile and transformed business mix

- Invested $8.4 billion in PSE&G
- Improved credit ratings
- Monetized and de-risked Holdings' portfolio

2014 – Forward: Strong cash flows and increasingly regulated business mix fully support:

- PSE&G's $11.3 billion approved investment program through 2018
- Consistent and sustainable dividend growth
- Additional investment capacity to deploy in opportunities beyond those in the current capital plan
- No need to issue equity

SI-SSA-0015-06207

PSEG Annual Dividend – A long history of growth and returning cash to shareholders with a financial position that provides opportunity for consistent and sustained growth

SI-SSA-0015-06209

*INDICATED ANNUAL RATE.
**2014 PAYOUT RATIO REFLECTS THE MIDPOINT OF OPERATING EARNINGS GUIDANCE. E=ESTIMATE

PSEG Q1 2014 Financial Highlights

- Strong Q1 Earnings

✓ Operating earnings of $1.01 vs. $0.85 per share in Q1 2013
✓ Power benefited from higher market pricing, market volatility and increased output
✓ Increased contribution to earnings from PSE&G's investment in transmission

- Maintaining 2014 operating earnings guidance of $2.55 - $2.75 per share

✓ Focused on maintaining operating efficiency and customer reliability
✓ PSE&G expected to grow at double-digit rate in 2014 and provide over 50% of operating earnings

- Executing existing 5-year, $6.8 billion transmission capital spending program on budget and on schedule

- Agreement on PSE&G's Energy Strong infrastructure program to invest $1.22 billion over 2014 – 2018, awaiting final NJBPU approval

- Power recognized a liability in the quarter related to its discovery that it incorrectly calculated certain components of its cost-based bids for certain generating units in the PJM energy market, with resulting over-collection of revenues related to its fossil fleet. Power has notified FERC, PJM and the PJM Independent Market Monitor of this issue, which is still under review; we are unable to estimate the ultimate impact or predict any resulting penalties or other costs associated with the matter at this time

- Financial position remains strong

✓ Positive cash from Power and increasing cash flow from PSE&G supports dividend growth and funds capital spending program without the need to issue equity
✓ Increased common dividend to indicative annual rate of $1.48 per share in Q1 2014
✓ Debt as a percentage of capital was 41% at March 31, 2014

SI-SSA-0015-06210

Value Proposition

PSEG is positioned to **expand its investment in PSE&G** projects that provide reasonable, risk-adjusted returns, in ways that meet customer needs and state goals, given **strong cash flow of Power** and growing cash contribution from PSE&G.

PSEG will maintain a **strong financial profile** that provides the opportunity to achieve our growth objectives and maintains our **track record** of **returning cash to shareholders**.

PSE&G's capital program has expanded

with the addition of Energy Strong

E = ESTIMATE

SI-SSA-0015-06221

Energy Strong Agreement supports customers' needs in the aftermath of Superstorm Sandy

- Settled with NJBPU Staff and all other parties in May 2014 for $1.22 billion
- Program addresses system resiliency and hardening by:
  - ✓ $620 million to raise, relocate or protect 29 switching and substations that were damaged by water in recent storms
  - ✓ $350 million to replace and modernize 250 miles of low-pressure, cast iron gas mains in or near flood areas
  - ✓ $100 million to create redundancy in the electric system, reducing outages when damage occurs
  - ✓ $100 million to deploy smart grid technologies to better monitor system operations to increase our ability to more swiftly deploy repair teams
  - ✓ $50 million to protect five natural gas metering stations and a liquefied natural gas station affected by Sandy or located in flood zones

SI-SSA-0015-06222

Over 70% of PSE&G's $11.3 billion investment program will be recovered through contemporaneous mechanisms

PSE&G TRANSMISSION

PSEG

We make things work for you.

SI-SSA-0015-06224

Transmission has delivered, and has grown to represent ~36% of rate base

Transmission represented ~36% of rate base at YE 2013 up from ~15% at YE 2009

SI-SSA-0015-06225

PSE&G's existing major transmission

investment program remains on schedule and on budget

Major Transmission Projects

	Approved ROE	Inclusion of CWIP in Rate Base	100% Recovery of Costs Due to Abandonment	Project Estimate Up To ($ Millions)	Expected In-service Date
Susquehanna-Roseland	12.93%	✓	✓	$790	June 2014 / June 2015
Northeast Grid Reliability	11.93%	✓	✓	$907	June 2015
North Central Reliability	11.68%	✓	✓	$390	June 2014
Burlington–Camden 230kV	11.68%	✓	✓	$399	Completed
Mickleton–Gloucester–Camden 230kV	11.68%	✓	✓	$435	June 2015

SI-SSA-0015-06226

Susquehanna-Roseland consists of constructing 150 miles of 500kV circuit (46 miles in NJ) with two new 500kV GIS switching stations at Roseland and Hopatcong

Project Estimate Up To*	Through Year-end 2013	Expected In-service Date
$790M	$661M	June 2014 / June 2015

- PJM RTEP project b0489
- ROE of 12.93% (including 1.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves reliability and reduces congestion

Project Status: Major permitting & siting complete, outside plant construction in progress, inside plant construction is complete and commissioning is in progress

SI-SSA-0015-06227

PSEG

*PROJECT IS SHARED WITH PPL. PROJECT ESTIMATE REPRESENTS PSE&G'S CONSTRUCTION RESPONSIBILITY FOR THE NJ PORTION.

Northeast Grid Reliability consists of upgrading approximately 50 overhead circuit miles of 138kV transmission line to 230kV, constructing ~18 miles of new underground 230kV lines, and converting/upgrading 12 existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$907M	$228M	June 2015

- PJM RTEP project b1304
- ROE of 11.93% (including 0.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment
- Project estimate has increased ~$12M associated with hardening related scope changes as a result of Superstorm Sandy

Customer Benefit: Improves reliability and increases transfer capability

Project Status: Nearing completion of engineering/design and licensing/permitting phase. Outside and inside plant construction are in progress

SI-SSA-0015-06228

North Central Reliability consists of upgrading 55 circuit miles of 138kV transmission line to 230kV, and converting six existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$390M	$349M	June 2014

- PJM RTEP project b1154
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves power quality and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction is essentially complete, commissioning is in progress

SI-SSA-0015-06229

Burlington-Camden 230kV consists of upgrading 37 circuit miles (30 miles of overhead and 7 miles of underground) of 138kV transmission line to 230kV, converting the existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$399M	$301M	Completed

- PJM RTEP project b1156
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses voltage reliability and increases transfer capability

Project Status: In-service April 2014

SI-SSA-0015-06230

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$435M	$122M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses thermal reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-06231

Bergen-Linden Corridor is a recently approved project which will provide a double-circuit 345kV line to maintain reliability

Project Estimate Up To	Through Year-end 2013	Expected Completion Date
$1,200M	-	June 2018

- PJM RTEP project b2436
- 30 miles of underground cable
  - New ~ 23 miles
  - Reconductor (Upgrade of 138 to 345) ~7 miles
- 13 miles of double circuit overhead conductor (replacing double circuit 138 with double circuit 345)
- 11 station upgrades to 345kV

Customer Benefit: Addresses thermal and short-circuit reliability

Project Status: Engineering

SI-SSA-0015-06232

Planned transmission spend of $6.8 billion

is driven by PJM reliability projects, 69kV conversions and life-cycle replacement projects

E= ESTIMATE

SI-SSA-0015-06233

PSE&G's processes and culture are the foundation for project execution success

People

- Diverse, well-rounded team
- Culture with a focus for on-time, on-scope and on-budget execution
- Successful recruitment, development and retention strategies
- Strong unions and supplier relationships

Process

- Cradle to grave project execution organization
- Processes designed to be scalable, repeatable and improvable
- Emphasis on best practices and lessons learned sharing
- Improvements driven by performance metric management

Environment

- Collaborative relationship with regulatory agencies
- Innovative design and construction practices to minimize environmental impacts
- Robust environmental compliance system

SI-SSA-0015-06234

PSE&G's demonstrated ability to successfully execute large projects leaves us well positioned to pursue new opportunities

- Future RTEP as identified by PJM
- Near-term participation in RTO competitive open planning windows
  - PJM
  - MISO
  - NYISO
- Anticipate participating in future competitive solicitations under FERC 1000

PSEG LONG ISLAND

PSEG

We make things work for you.

SI-SSA-0015-06237

PSEG was selected to operate Long Island Power Authority's (LIPA) electric transmission and distribution system for 12 years starting in 2014

- Pursuant to the Operating Services Agreement (OSA), all expenses and capital costs to operate the system are pre-funded by LIPA and passed through to their customers
- Compensation consists of a fixed fee and an incentive fee
  - Fixed compensation fee for 2014 with scheduled increases in 2015 and 2016
  - Starting in 2015 PSEG Energy Resources and Trading (ER&T) begins managing fuel/energy contracts
  - PSEG Long Island expected to contribute $0.03 to operating earnings in 2014 increasing to $0.07 per share in 2016 including contribution at ER&T
- Potential for an 8-year extension of the OSA

SI-SSA-0015-06238

PSEG Long Island commenced operations

on January 1, 2014

Key elements of Operating Services Agreement

Increased PSEG scope and control	Use of PSEG brand as PSEG Long Island	3-Year rate freeze (2013-2015)
Performance metrics	NY Department of Public Service oversight	Potential for "Utility 2.0" investment

Early performance

Successful transition to PSEG Long Island	Stakeholder communication	Winter storm response

SI-SSA-0015-06239

PSEG POWER

SI-SSA-0015-06240

PSEG

We make things work for you.

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-06241

Agenda

- Delivering Value
- Fleet Advantage, Location, Flexibility and Fuel Diversity
- Nuclear Operation
- Fossil Operation
- Financial Performance
- Expansion Opportunities
- Regulatory
- Engaged Workforce

SI-SSA-0015-06242

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units continue to achieve strong operational results, operating at over 90% capacity factors for the 9th consecutive year • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing conditions • Linden CCGT and Salem 2 nuclear unit achieved record output in 2013	• "Getting the most out of existing fleet" • Locational advantage • O&M control programs have delivered a CAGR of 1.6% between 2009 and 2014 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-06243

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2013 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch • Completed 19 MW solar project, 4 MW project under construction, established robust pipeline • Nuclear ESP is expected in 2015

SI-SSA-0015-06244

PSEG Power met 2013 challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• SuperStorm Sandy impacted our generating sites • Cold and hot weather extremes created challenging operating environment, but also presented opportunities		• Unit outages and planned transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Optimized unit dispatch across fleet during storm recovery • Expedited return from storm outages, restored margin opportunities • High availability when needed • Achieved fuel cost savings • Captured value through coal/gas switching, unit flexibility • Coal & oil sales optimized inventory • Flexibility of portfolio captured real-time basis opportunities

SI-SSA-0015-06245

PSEG Power exceeded 2013's earnings guidance

OPERATING EARNINGS FOR PSEG POWER IN 2013; SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. *ASSETS TRANSFERRED TO POWER AT YEAR-END 2013.

SI-SSA-0015-06246

PSEG Power has generating assets

in three competitive markets

- Assets near loads
- Low cost portfolio
- Fuel flexibility with gas cost advantage
- Poised to benefit from volatility in real-time markets
- Fleet will maintain diversity and efficiency after HEDD
- Most sites suitable for expansion

SI-SSA-0015-06247

PSEG Power will maintain diversity and efficiency after a realignment of the fleet due to HEDD

Objective 2013 → 2017

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Environmental improvement
- Peach Bottom (PB) uprate
- Advanced Gas Path (AGP)
- Kalaeloa and Solar transfer adds ~200MW of capacity

Fuel Diversity

Energy Produced

SI-SSA-0015-06248

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel flexibility for >60% of fleet

SI-SSA-0015-06249

PSEG Power Nuclear is a critical element of our success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,178 MW
• Owned Capacity: 1,178 MW
• License Expiration: 2046
• Next Refueling
  • Spring 2015
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,365 MW
	• Owned Capacity: 1,358 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 -- Fall 2014
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,251 MW
		• Owned Capacity: 1,125 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2015
		• Uprate: 130 MW in 2015/2016

SI-SSA-0015-06250

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations: nine consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - ✓ FLEX* plan submitted with implementation starting with Fall outage
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

SI-SSA-0015-06251

Power's nuclear fleet is well positioned

with significantly lower-than-average US cost structure

*SOURCE: ELECTRIC UTILITY COST GROUP
** SOURCE: PSEG NUCLEAR

SI-SSA-0015-06252

PSEG Power's Fossil Fleet Performance

has shown improvement

- Fossil Capacity Factor rebounded with market
- Peaking Units maintain high start success

- Coal EFORp improving
- CC EFORp less than 1% in 2013
- Consistent recipient of EFORp payments

SI-SSA-0015-06253

PSEG

*LM6000 AND 7EA UNITS

PSEG Power improvements achieved in combined cycle fleet efficiency

Combined Cycle Operating Heat Rate

Actions Taken to Create Value

- Operational Excellence Model
- Training programs
- Unit testing initiative
- Outage work to restore efficiency
- Second gas line at BEC

- Heat rate improvement 2008-2013 translates to meaningful fuel savings at current market prices

- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional fuel savings

SI-SSA-0015-06254

Investing to expand CCGT capacity and improve efficiency

PSEG Power - CCGT Uprate Project

- Expand Power's CCGT fleet, one of the largest gas-fired portfolios in PJM, with incremental base and peaking MWs
- Retrofit Bergen, Linden and BEC with Advanced Gas Path (AGP) components at cost of ~$120M over 2014 - 2018

AGP Project Benefits

- ✓ CCGT capacity uprates of ~150 MW:
  - Linden (63 MW – Completed)
  - Bergen (31 MW – 2015)
  - BEC (58 MW – 2017-2018)
- ✓ Increases Efficiency - Combined Cycle (CC) heat rate improvement ~ 1.2%
- ✓ Upgrades technology and extends maintenance outage cycles

SI-SSA-0015-06255

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- Cost control through testing coordination program

SI-SSA-0015-06256

PSEG Power's capital expenditures for environmental requirements are essentially complete*

SI-SSA-0015-06257

PSEG Power: Enjoys real and sustainable advantages in the merchant generation space

Market Review

- Gas, Power, Spark Spreads
- Regulatory construct

PSEG's Competitive Advantage

- Fuel flexibility
- Heat Rate diversity
- Access to Marcellus Shale gas
- Asset flexibility

PSEG's Sustainable Advantage

- Positive cash-flow hedging into the long-term
- Robust capacity market pricing in most concentrated load pocket in US
- Long-term access to discounted Marcellus gas

SI-SSA-0015-06265

Market Review: Prices have stabilized

- Energy and gas prices appear to have stabilized
- Environmental restrictions may tighten market
- Insufficient gas infrastructure continues to place upward pressure on fuel prices during seasonal peaks

SI-SSA-0015-06266

F=FORWARDS AS OF 12/31/2013

Market Review: New generation in PJM not keeping pace with coal retirements

Cumulative Generation Retirements*

Forecast Reserve Margin (PJM January 2014)

- PJM forecasts a declining Reserve Margin through 2018, which may improve forward prices
- Brattle estimates energy prices could rise at least $3-4/MWh from today's prices

SI-SSA-0015-06267

PSEG

*PJM AS OF FEBRUARY 20, 2014
SOURCE OF CHART DATA: PJM

Market Review: Regulatory framework showing signs of improvement

	ISSUE / POLICY	REGULATORY GAINS
PJM	SUBSIDIZED GENERATION (NJ and MD)	• Comprehensively defeated in federal court (appeals currently pending)
	DEMAND RESPONSE RULES	• PJM and ISO-NE enacted stricter rules of eligibility and deployment
	ENERGY PRICE FORMATION	• Concerted drive to improve price formation for generation and ancillary services • Waiver of price caps during extreme market conditions
NYISO	TRANSMISSION	• Significant progress made to relieve bottling of upstate generation
ISO-NE	CAPACITY	• Improvement in price formation to better reflect tight supply conditions • Implementation of sloping demand curve in Forward Capacity Auction (FCA) 9
	ENERGY	• Demand response required to participate in Day Ahead markets
FEDERAL	GAS to ELECTRIC	• Better coordination between pipelines and ISO's will promote efficiency
	ENVIRONMENTAL REGULATIONS	• HEDD, HAPS/MACT may lead to tightening of supply in 2015+ timeframe

SI-SSA-0015-06268

Competitive Advantage: Heat Rate Diversity & Flexible Dispatch

SI-SSA-0015-06269

Competitive Advantage: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

SI-SSA-0015-06270

Competitive Advantage: ~25% of Power's gas for generation comes from Marcellus

- Our combined cycle and peaking assets have been able to take advantage of locational gas price volatility driven by production and logistical constraints
- Lower cost shale supply provides additional savings during periods of lower residential gas demand

SI-SSA-0015-06271

Competitive Advantage: Locational advantage from short term basis volatility

PS Zone Annual Basis to PJM-W

PS Zone Day Ahead On Peak Monthly Basis to PJM-W

- Annual basis benefits baseload units
- Intermediate units flexible to seasonal opportunities
- Combined Cycle and Peaking units positioned to optimize daily and hourly volatility

PS Zone Real Time On Peak Hourly Basis to PJM-W

ANNUAL FORWARD BASIS TO PJM-WEST AS OF 12/31/2013.

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on January 7, 2014

On Peak Basis to PJM-W on January 7, 2014

Hourly Generation and Load on January 7, 2014

- High gas market at $58/MMbtu setting power prices in PS zone on 1/7/14
- Higher basis to generation
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional steam and peaking generation available above day ahead commitment to gain value from real time market
- Fuel flexibility with coal/gas/oil optionality among available units

SI-SSA-0015-06273

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on July 18, 2013

On Peak Basis to PJM-W on July 18, 2013

Hourly Generation and Load on July 18, 2013

- High demand in constrained northern NJ
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional generation available above obligations to gain value from real time market spikes
- Gas advantage in procuring low cost shale supply to capture savings

SI-SSA-0015-06274

Sustainable Advantage: BGS Auction provides excellent opportunity to forward hedge our generation

BGS sales account for about a quarter of our forward portfolio of hedges

SI-SSA-0015-06275

PSEG

$/MWH; BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2012-2014 WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2014.

Sustainable Advantage: Hedging strategy designed to protect gross margin while leveraging the portfolio

		Apr-Dec 2014	2015	2016
Base Load (Nuclear and Base Load Coal)	Volume TWh	26	35	36
	% Hedged	100%	75-80%	35-40%
	Price $/MWh	$49	$51	$51
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	18	21	19
	% Hedged	30-35%	0%	0%
	Price $/MWh	$49	$51	$51
Total	Volume TWh	42-44	54-56	54-56
	% Hedged	70-75%	50-55%	25-30%
	Price $/MWh	$49	$51	$51

Forecast output: Increased to reflect improvement in economic dispatch

HEDGE PERCENTAGES AND PRICES AS OF MARCH 31, 2014. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS. EXCLUDES SOLAR AND KALAELOA.

SI-SSA-0015-06276

Sustainable Advantage: PJM's capacity market is expected to continue to recognize locational value

RPM Auction Results*					
($/MW-day)	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016	2016 / 2017

Sustainable Advantage: Fuel advantage continues throughout the curve

Forward curve shows that Marcellus shale supply averages over $1.50/MMbtu discount year-round through 2018

SI-SSA-0015-06278

2013 AVERAGE 6/1/13-12/31/13; F= FORWARDS AS OF 12/31/13. LEIDY BASIS FROM ICE/BROKER QUOTES

PSEG Power's Value Proposition

- Well-positioned fleet of merchant generating assets concentrated in PJM market
- Advantaged by low cost structure, fuel diversity and dispatch flexibility
- Low environmental capital requirements
- Capacity uprates to enhance value of nuclear and combined cycle stations
- Consistent hedging strategy recognizes asset flexibility
- Continue to meet commitments and to provide free cash flow

PSEG FINANCIAL REVIEW & OUTLOOK

PSEG

We make things work for you.

SI-SSA-0015-06280

Strong financial position to support our business initiatives

2013 Financial Position

- ✓ Exceeded upwardly revised 2013 earnings guidance
- ✓ Pension fully funded
- ✓ Strong balance sheet and upgraded credit ratings

2014 and Beyond

- ✓ Continued positive earnings trend in 2014
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investments without equity issuance
- ✓ Growth in PSE&G investments with contemporaneous returns
- ✓ Diversified Power assets with a balanced hedge profile
- ✓ Growth in PSE&G Cash from Operations, with continued significant Cash from Operations/FFO at Power
- ✓ Increased Dividend by $0.04 to indicative annual rate of $1.48 for 2014
- ✓ Opportunity for consistent and sustainable dividend growth

SI-SSA-0015-06281

Exceeded upwardly revised guidance

in both businesses

PSEG Operating Earnings		
$ Millions (except EPS)	**2012**	**2013**

SI-SSA-0015-06282

In 2013, Power had significant free cash flow

SI-SSA-0015-06283

In 2013, PSE&G invested over $2B, using $1.4B of internally generated cash flow and debt, while maintaining its capital structure

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.

SI-SSA-0015-06284

In 2013, Power's Free Cash Flow supported PSE&G's capital program and shareholder dividend

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.
(2) OTHER CASH FLOW INCLUDES HOLDINGS NET CASH FLOW AND PARENT CASH.

SI-SSA-0015-06285

PSEG growth spend, including Energy Strong, of ~$6.4B represents ~76% of total investment

E = ESTIMATE; CAPITAL INCLUDES AFUDC AND IDC.

SI-SSA-0015-06286

PSE&G's Capital Program drives double-digit growth in rate base and earnings over the 2013 to 2016 period

E = ESTIMATE

SI-SSA-0015-06287

PSE&G's Cash from Operations and Power's Free Cash Flow support growth investments without the need for new equity

PSEG Sources and Uses

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$500M FROM 2014-2016
(2) OTHER CASH FLOW INCLUDES PSEG LI, HOLDINGS NET CASH FLOW, CASH, AND SHORT TERM DEBT
E = ESTIMATE

SI-SSA-0015-06288

Power's key credit metric supports incremental investment opportunities

- Increased contribution to earnings from the more stable regulated business allows us to reset Power's FFO/Debt threshold from 35% to 30%, providing additional financial flexibility
- Power's annual Cash From Operations and Funds From Operations each average ~$1.1B over the 2014 to 2016 period supported by:
  - Capacity Revenues
  - Hedged Generation
  - O&M Control
- Financial strength can be used to pursue future growth in both businesses beyond current plans

SI-SSA-0015-06289

Pension: Our Long Term Asset allocation strategy resulted in a ~17% increase in pension assets during 2013

PBO Funded Ratio	83%			Fully Funded Pension →	106%

SI-SSA-0015-06290

Our Pension Management is expected to result in pension income in 2014 and over the planning horizon

SI-SSA-0015-06291

PSEG

(1) OTHER REFLECTS UPDATES TO THE POPULATION OF OUR EMPLOYEES AND RETIREES
E=ESTIMATE

Ongoing cost control efforts, including pension, expected to reduce O&M over the forecast period

PSEG's longer-term outlook is influenced by Power's hedge position and increased investment at PSE&G

Segment EPS Drivers

Sensitivities derived from typical annual market variability*	2015E	2016E
Each $0.75/mcf Change in Natural Gas	$0.04 - $0.07	$0.12 - $0.15
Each $2/MWh Change in Spark Spread	$0.04	$0.04
Each $5/MWh Change in Dark Spread	$0.04	$0.04
Each 1% Change in Nuclear Capacity Factor	$0.01	$0.01

Each $100 Million of Incremental Investment	$0.01	$0.01
Each 1% Change in Sales		
Electric	$0.01	$0.01
Gas	$0.01	$0.01
Each 1% Change in O&M	$0.01	$0.01
Each 10 bp Change in ROE	$0.01	$0.01

* Estimated annual variability approximating one standard deviation based on 2011 – 2013 historical data and forward curve estimates applied to PSEG Power open positions

SI-SSA-0015-06295

PSEG Summary

- Our 2013 earnings of $2.58 exceeded our upwardly revised operating earnings guidance of $2.40 - $2.55 per share
- Double digit earnings growth at PSE&G on one and three year basis from 2013 to 2016, driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support full capital program and new potential opportunities without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for consistent and sustainable growth

Forward Looking Statement

Certain of the matters discussed in this report constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in Item 1. Financial Statements—Note 8. Commitments and Contingent Liabilities, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, and other factors discussed in filings we make with the United States Securities and Exchange Commission (SEC). These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to sufficiently obtain coverage or recover proceeds of insurance on such matters,
- increase in competition in energy supply markets as well as competition for certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology and customer usage patterns.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-06314

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The last slide in this presentation includes a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

SI-SSA-0015-06316

PSEG's locational advantage

and electric basis

- Basis (PS Zone to PJM West) will continue to trend downward for forward sales
- Volatility will remain significant in the prompt periods (especially summer/winter)
- Power maintains sufficient length to participate in upside volatility as well as a valuable 250MW transmission position into NYC
- Basis will continue to have a positive impact on PSEG Power profitability

SI-SSA-0015-06317

*AS OF MAY 15, 2013.

PSEG's locational advantage

and gas basis

- Lower cost supplies of shale gas have been beneficial to both PSE&G customers and PSEG Power
- Over 50% of our available pipeline capacity can access market area supplies of shale gas
- Power's generating units sit in close proximity to the Marcellus fairway
- Power buys approximately 350BCF/year of gas
- We have been able to arbitrage gas values from South to North and East to West using our storage and pipeline capacity

Forward-Looking Statement

Certain of the matters discussed in this communication about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com.

These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient coverage or recover proceeds of insurance with respect to such events,
- cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as competition from certain transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies and changes in customer behaviors, including energy efficiency, net metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-06327

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slide A at the end of this presentation includes a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

INVESTOR RELATIONS

PSEG

We make things work for you.

SI-SSA-0015-06329

PSEG's Strategy – delivering results

Our businesses' focus on cost-effective, reliable operations yields strong cash flow

We are funding growth-oriented investments aligned with customer needs and state energy policies

We are enhancing the competitiveness of our environmentally well-positioned generation business

The results of our financial strategy support a credit profile capable of meeting our corporate objectives and providing sustained dividend growth for our shareholders

SI-SSA-0015-06330

Two complementary businesses

Strong asset platform, performing well and positioned for the future

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Positioned to meet customers' needs as we respond to state and federal energy policy and economic growth objectives **Value Proposition:** A $10 billion infrastructure program - focused on transmission – that produces double-digit rate base growth through 2016	**Strategy:** Fuel diverse fleet is geographically and environmentally well positioned, with investments to enhance competitiveness **Value Proposition:** Provides substantial free cash flow in current environment and poised for price recovery
2013 — Assets $20B Operating Earnings $612M	2013 — Assets $12B Operating Earnings $710M

SI-SSA-0015-06331

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2013.
PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT, PSEG LONG ISLAND AND ENERGY HOLDINGS ACTIVITY.
SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

Delivering on commitments and pursuing opportunities for growth

Operational Excellence	• Power: Record 2013 output at Linden CCGT and Salem 2; nuclear capacity factor greater than 90% for 9th straight year • PSE&G: Mid-Atlantic Reliability Award (12th consecutive year) • PSEG Long Island: Went "live" on January 1, 2014 • PSEG: Cost-control benefits continue
Financial Strength	• Strong cash flows supported credit rating increases • Pension more than fully funded • Dividend increased
Disciplined Investment	• PSE&G ✓ Transmission capital program execution and growth ✓ Energy Strong program under discussion ✓ Solar 4 All Extension and Solar Loan III programs • Power: Investments to enhance the fleet's competitiveness – 130 MW Nuclear uprate, 150 MW CCGT uprate and efficiency improvement

SI-SSA-0015-06335

PSEG's business profile has been transformed through significant growth in utility capital spending

SI-SSA-0015-06336

Energy Strong Proposal recognizes need to strengthen and harden the distribution system

- Energy Strong is:
  - ✓ A $2.6 Billion investment program over 5 years as the first phase of a 10-year, $3.9 Billion infrastructure program
  - ✓ Proposal is based on contemporaneous recovery of investment, subject to NJ Board of Public Utilities (BPU) review
- Energy Strong proposal would harden 29 electric substations, modernize the gas distribution system, make the grid smarter, and improve the system's ability to communicate with customers
- Over 100 New Jersey municipalities support Energy Strong
- Proposed Energy Strong program would create approximately 5,800 jobs and stimulate NJ's economy

SI-SSA-0015-06337

PSEG Power – Value-advantaged through asset diversity, fuel flexibility, location and installed environmental controls

SI-SSA-0015-06339

PSEG

*AT THE BEGINNING OF EACH YEAR. **EXCLUDES BGSS.

Balance Sheet Strength

2009 – 2013: Reduced risk profile and transformed business mix

- Invested $8.4 billion in PSE&G
- Improved credit ratings
- Monetized and de-risked Holdings' portfolio

2014 – Forward: Strong cash flows and increasingly regulated business mix fully support:

- PSE&G's $10B approved investment program through 2018
- Consistent and sustainable dividend growth
- Additional investment capacity to deploy in opportunities beyond those in the current capital plan
- No need to issue equity

SI-SSA-0015-06340

Where we're going … actions taken to focus on more predictable growth

PSE&G's capital program could expand further with the addition of Energy Strong

E = ESTIMATE

SI-SSA-0015-06354

Energy Strong filing for resiliency and hardening to support customers' needs in the wake of Superstorm Sandy

- Filed 5-year $2.6 billion capital program with NJ Board of Public Utilities (BPU) in February 2013
- Program addresses system resiliency and hardening by:
  - Protecting distribution substations from severe storms
  - Making the electric grid smarter and easier to repair
  - Adding backup distribution lines and system redundancies
  - Moving overhead distribution lines underground
  - Modernizing the gas distribution system
- Currently in confidential negotiations with Staff of BPU and major intervenors; hearings conclude March 7, 2014
- Anticipate a final order following either settlement or litigated decision by the end of April 2014

SI-SSA-0015-06355

Over 70% of PSE&G's $10 billion investment program will be recovered through contemporaneous mechanisms

2014-2018E PSE&G Capital Spending by Recovery Method

$10.0 Billion

Clause Recovery Mechanisms

- Solar/Energy Efficiency

FERC Formula Rates

- Transmission

Traditional Recovery Mechanisms

- Distribution Base Rates

SI-SSA-0015-06356

The Energy Strong impact to customer bills is expected to be fully offset

OUT-YEAR BGS/BGSS, SBC, AND DISTRIBUTION RATES HELD CONSTANT AT CURRENT 2014 RATES.
RATES RELATED TO ELECTRIC RESTRUCTURING: SECURITIZATION (STC), NON-UTILITY GENERATION CHARGE (NGC), & TRANSITIONAL ENERGY FACILITIES ASSESSMENT (TEFA), ARE REDUCED TO ZERO BY 2017. THE RGGI RECOVERY CHARGE (RRC), SOLAR PILOT RECOVERY CHARGE (SPRC), AND CAPITAL ECONOMIC STIMULUS INFRASTRUCTURE INVESTMENT PROGRAM EXTENSION (CIP II) BILL IMPACTS ARE INCLUDED IN THEIR RESPECTIVE GAS AND ELECTRIC BARS AND FORECASTED IN OUT-YEARS BASED UPON LATEST ESTIMATE. ENERGY STRONG BILL IMPACTS ARE BASED UPON CURRENT FORECAST.

SI-SSA-0015-06357

PSE&G TRANSMISSION

PSEG

We make things work for you.

SI-SSA-0015-06358

Transmission has delivered, and has grown to represent ~36% of rate base

Transmission represented ~36% of rate base at YE 2013 up from ~15% at YE 2009

SI-SSA-0015-06359

PSE&G's existing major transmission

investment program remains on schedule and on budget

Major Transmission Projects

	Approved ROE	Inclusion of CWIP in Rate Base	100% Recovery of Costs Due to Abandonment	Project Estimate Up To ($ Millions)	Expected In-service Date
Susquehanna-Roseland	12.93%	✓	✓	$790	June 2014 / June 2015
Northeast Grid Reliability	11.93%	✓	✓	$907	June 2015
North Central Reliability	11.68%	✓	✓	$390	June 2014
Burlington–Camden 230kV	11.68%	✓	✓	$399	June 2014
Mickleton–Gloucester–Camden 230kV	11.68%	✓	✓	$435	June 2015

SI-SSA-0015-06360

Susquehanna-Roseland consists of constructing 150 miles of 500kV circuit (46 miles in NJ) with two new 500kV GIS switching stations at Roseland and Hopatcong

Project Estimate Up To*	Through Year-end 2013	Expected In-service Date
$790M	$661M	June 2014 / June 2015

- PJM RTEP project b0489
- ROE of 12.93% (including 1.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves reliability and reduces congestion

Project Status: Major permitting & siting complete, outside plant construction in progress, inside plant construction is complete and commissioning is in progress

SI-SSA-0015-06361

*PROJECT IS SHARED WITH PPL. PROJECT ESTIMATE REPRESENTS PSE&G'S CONSTRUCTION RESPONSIBILITY FOR THE NJ PORTION.

Northeast Grid Reliability consists of upgrading approximately 50 overhead circuit miles of 138kV transmission line to 230kV, constructing ~18 miles of new underground 230kV lines, and converting/upgrading 12 existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$907M	$228M	June 2015

- PJM RTEP project b1304
- ROE of 11.93% (including 0.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment
- Project estimate has increased ~$12M associated with hardening related scope changes as a result of Superstorm Sandy

Customer Benefit: Improves reliability and increases transfer capability

Project Status: Nearing completion of engineering/design and licensing/permitting phase. Outside and inside plant construction are in progress

SI-SSA-0015-06362

North Central Reliability consists of upgrading 55 circuit miles of 138kV transmission line to 230kV, and converting six existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$390M	$349M	June 2014

- PJM RTEP project b1154
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves power quality and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction is essentially complete, commissioning is in progress

SI-SSA-0015-06363

Burlington-Camden 230kV consists of upgrading 37 circuit miles (30 miles of overhead and 7 miles of underground) of 138kV transmission line to 230kV, converting the existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$399M	$301M	June 2014

- PJM RTEP project b1156
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses voltage reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside plant construction is complete, and inside plant construction and commissioning is in progress

SI-SSA-0015-06364

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$435M	$122M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses thermal reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-06365

Bergen-Linden Corridor is a recently approved project which will provide a double-circuit 345kV line to maintain reliability

Project Estimate Up To	Through Year-end 2013	Expected Completion Date
$1,200M	-	June 2018

- PJM RTEP project b2436
- 30 miles of underground cable
  - New ~ 23 miles
  - Reconductor (Upgrade of 138 to 345) ~7 miles
- 13 miles of double circuit overhead conductor (replacing double circuit 138 with double circuit 345)
- 11 station upgrades to 345kV

Customer Benefit: Addresses thermal and short-circuit reliability

Project Status: Engineering

SI-SSA-0015-06366

Planned transmission spend of $6.8 billion

is driven by PJM reliability projects, 69kV conversions and life-cycle replacement projects

E= ESTIMATE

SI-SSA-0015-06367

PSE&G's processes and culture are the foundation for project execution success

People

- Diverse, well-rounded team
- Culture with a focus for on-time, on-scope and on-budget execution
- Successful recruitment, development and retention strategies
- Strong unions and supplier relationships

Process

- Cradle to grave project execution organization
- Processes designed to be scalable, repeatable and improvable
- Emphasis on best practices and lessons learned sharing
- Improvements driven by performance metric management

Environment

- Collaborative relationship with regulatory agencies
- Innovative design and construction practices to minimize environmental impacts
- Robust environmental compliance system

SI-SSA-0015-06368

PSE&G's demonstrated ability to successfully execute large projects leaves us well positioned to pursue new opportunities

- Future RTEP as identified by PJM
- Near-term participation in RTO competitive open planning windows
  - PJM
  - MISO
  - NYISO
- Anticipate participating in future competitive solicitations under FERC 1000

PSEG LONG ISLAND

PSEG

We make things work for you.

SI-SSA-0015-06371

PSEG was selected to operate Long Island Power Authority's (LIPA) electric transmission and distribution system for 12 years starting in 2014

- Pursuant to the Operating Services Agreement (OSA), all expenses and capital costs to operate the system are pre-funded by LIPA and passed through to their customers
- Compensation consists of a fixed fee and an incentive fee
  - Fixed compensation fee for 2014 with scheduled increases in 2015 and 2016
  - Starting in 2015 PSEG Energy Resources and Trading (ER&T) begins managing fuel/energy contracts
  - PSEG Long Island expected to contribute $0.03 to operating earnings in 2014 increasing to $0.07 per share in 2016 including contribution at ER&T
- Potential for an 8-year extension of the OSA

SI-SSA-0015-06372

PSEG Long Island commenced operations

on January 1, 2014

Key elements of Operating Services Agreement

Increased PSEG scope and control	Use of PSEG brand as PSEG Long Island	3-Year rate freeze (2013-2015)
Performance metrics	NY Department of Public Service oversight	Potential for "Utility 2.0" investment

Early performance

Successful transition to PSEG Long Island	Stakeholder communication	Winter storm response

SI-SSA-0015-06373

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-06374

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-06375

Agenda

- Delivering Value
- Fleet Advantage, Location, Flexibility and Fuel Diversity
- Nuclear Operation
- Fossil Operation
- Financial Performance
- Expansion Opportunities
- Regulatory
- Engaged Workforce

SI-SSA-0015-06376

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units continue to achieve strong operational results, operating at over 90% capacity factors for the 9th consecutive year • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing conditions • Linden CCGT and Salem 2 nuclear unit achieved record output in 2013	• "Getting the most out of existing fleet" • Locational advantage • O&M control programs have delivered a CAGR of 1.6% between 2009 and 2014 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-06377

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2013 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch • Completed 19 MW solar project, 4 MW project under construction, established robust pipeline • Nuclear ESP is expected in 2015

SI-SSA-0015-06378

PSEG Power met 2013 challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• SuperStorm Sandy impacted our generating sites • Cold and hot weather extremes created challenging operating environment, but also presented opportunities		• Unit outages and planned transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Optimized unit dispatch across fleet during storm recovery • Expedited return from storm outages, restored margin opportunities • High availability when needed • Achieved fuel cost savings • Captured value through coal/gas switching, unit flexibility • Coal & oil sales optimized inventory • Flexibility of portfolio captured real-time basis opportunities

SI-SSA-0015-06379

PSEG Power exceeded 2013's earnings guidance

OPERATING EARNINGS FOR PSEG POWER IN 2013; SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. *ASSETS TRANSFERRED TO POWER AT YEAR-END 2013.

SI-SSA-0015-06380

PSEG Power has generating assets

in three competitive markets

- Assets near loads
- Low cost portfolio
- Fuel flexibility with gas cost advantage
- Poised to benefit from volatility in real-time markets
- Fleet will maintain diversity and efficiency after HEDD
- Most sites suitable for expansion

SI-SSA-0015-06381

PSEG Power will maintain diversity and efficiency after a realignment of the fleet due to HEDD

Objective 2013 → 2017

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Environmental improvement
- Peach Bottom (PB) uprate
- Advanced Gas Path (AGP)
- Kalaeloa and Solar transfer adds ~200MW of capacity

Fuel Diversity

Energy Produced

SI-SSA-0015-06382

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel flexibility for >60% of fleet

SI-SSA-0015-06383

PSEG Power Nuclear is a critical element of our success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,178 MW
• Owned Capacity: 1,178 MW
• License Expiration: 2046
• Next Refueling
  • Spring 2015
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,365 MW
	• Owned Capacity: 1,358 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 -- Fall 2014
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,251 MW
		• Owned Capacity: 1,125 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2015
		• Uprate: 130 MW in 2015/2016

SI-SSA-0015-06384

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations: nine consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - ✓ FLEX* plan submitted with implementation starting with Fall outage
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

SI-SSA-0015-06385

Power's nuclear fleet is well positioned

with significantly lower-than-average US cost structure

*SOURCE: ELECTRIC UTILITY COST GROUP
** SOURCE: PSEG NUCLEAR

SI-SSA-0015-06386

PSEG Power's Fossil Fleet Performance

has shown improvement

- Fossil Capacity Factor rebounded with market
- Peaking Units maintain high start success

- Coal EFORp improving
- CC EFORp less than 1% in 2013
- Consistent recipient of EFORp payments

SI-SSA-0015-06387

PSEG

*LM6000 AND 7EA UNITS

PSEG Power improvements achieved in combined cycle fleet efficiency

Combined Cycle Operating Heat Rate

Actions Taken to Create Value

- Operational Excellence Model
- Training programs
- Unit testing initiative
- Outage work to restore efficiency
- Second gas line at BEC

- Heat rate improvement 2008-2013 translates to meaningful fuel savings at current market prices

- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional fuel savings

SI-SSA-0015-06388

Investing to expand CCGT capacity and improve efficiency

PSEG Power - CCGT Uprate Project

- Expand Power's CCGT fleet, one of the largest gas-fired portfolios in PJM, with incremental base and peaking MWs
- Retrofit Bergen, Linden and BEC with Advanced Gas Path (AGP) components at cost of ~$120M over 2014 - 2018

AGP Project Benefits

- ✓ CCGT capacity uprates of ~150 MW:
  - Linden (63 MW – 2014)
  - Bergen (31MW – 2015)
  - BEC (58 MW – 2017-18)
- ✓ Increases Efficiency - Combined Cycle (CC) heat rate improvement ~ 1.2%
- ✓ Upgrades technology and extends maintenance outage cycles

SI-SSA-0015-06389

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- Cost control through testing coordination program

SI-SSA-0015-06390

PSEG Power's capital expenditures for environmental requirements are essentially complete*

SI-SSA-0015-06391

*BASED ON CURRENTLY KNOWN AND QUANTIFIABLE ENVIRONMENTAL REQUIREMENTS. E=ESTIMATE

PSEG Power's focus on costs

has resulted in

moderate increase

in O&M for

six years

Power O&M Expense*

2009 to 2014 CAGR = 1.6%

Cost control actions taken:	
• Fossil plant assessment • CCGT material condition assessment • Contract renegotiations	• Nuclear maintenance productivity study • Nuclear outage efficiency initiative • Materials management

SI-SSA-0015-06392

Portfolio Management Strategy

Optimize value of assets

Manage risk vs. reward

Directly engage with regulatory agencies

SI-SSA-0015-06398

PSEG Power: Enjoys real and sustainable advantages in the merchant generation space

Market Review

- Gas, Power, Spark Spreads
- Regulatory construct

PSEG's Competitive Advantage

- Fuel flexibility
- Heat Rate diversity
- Access to Marcellus Shale gas
- Asset flexibility

PSEG's Sustainable Advantage

- Positive cash-flow hedging into the long-term
- Robust capacity market pricing in most concentrated load pocket in US
- Long-term access to discounted Marcellus gas

SI-SSA-0015-06399

Market Review: Prices have stabilized

- Energy and gas prices appear to have stabilized
- Environmental restrictions may tighten market
- Insufficient gas infrastructure continues to place upward pressure on fuel prices during seasonal peaks

SI-SSA-0015-06400

F=FORWARDS AS OF 12/31/2013

Market Review: New generation in PJM not keeping pace with coal retirements

Cumulative Generation Retirements*

Forecast Reserve Margin (PJM January 2014)

- PJM forecasts a declining Reserve Margin through 2018, which may improve forward prices
- Brattle estimates energy prices could rise at least $3-4/MWh from today's prices

SI-SSA-0015-06401

PSEG

*PJM AS OF FEBRUARY 20, 2014
SOURCE OF CHART DATA: PJM

Market Review: Regulatory framework showing signs of improvement

	ISSUE / POLICY	REGULATORY GAINS
PJM	SUBSIDIZED GENERATION (NJ and MD)	• Comprehensively defeated in federal court (appeals currently pending)
	DEMAND RESPONSE RULES	• PJM and ISO-NE enacted stricter rules of eligibility and deployment
	ENERGY PRICE FORMATION	• Concerted drive to improve price formation for generation and ancillary services • Waiver of price caps during extreme market conditions
NYISO	TRANSMISSION	• Significant progress made to relieve bottling of upstate generation
ISO-NE	CAPACITY	• Improvement in price formation to better reflect tight supply conditions • Implementation of sloping demand curve in Forward Capacity Auction (FCA) 9
	ENERGY	• Demand response required to participate in Day Ahead markets
FEDERAL	GAS to ELECTRIC	• Better coordination between pipelines and ISO's will promote efficiency
	ENVIRONMENTAL REGULATIONS	• HEDD, HAPS/MACT may lead to tightening of supply in 2015+ timeframe

SI-SSA-0015-06402

Competitive Advantage: Heat Rate Diversity & Flexible Dispatch

SI-SSA-0015-06403

Competitive Advantage: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

SI-SSA-0015-06404

Competitive Advantage: ~25% of Power's gas for generation comes from Marcellus

- Our combined cycle and peaking assets have been able to take advantage of locational gas price volatility driven by production and logistical constraints
- Lower cost shale supply provides additional savings during periods of lower residential gas demand

SI-SSA-0015-06405

Competitive Advantage: Locational advantage from short term basis volatility

PS Zone Annual Basis to PJM-W

PS Zone Day Ahead On Peak Monthly Basis to PJM-W

- Annual basis benefits baseload units
- Intermediate units flexible to seasonal opportunities
- Combined Cycle and Peaking units positioned to optimize daily and hourly volatility

PS Zone Real Time On Peak Hourly Basis to PJM-W

ANNUAL FORWARD BASIS TO PJM-WEST AS OF 12/31/2013.

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on January 7, 2014

On Peak Basis to PJM-W on January 7, 2014

Hourly Generation and Load on January 7, 2014

- High gas market at $58/MMbtu setting power prices in PS zone on 1/7/14
- Higher basis to generation
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional steam and peaking generation available above day ahead commitment to gain value from real time market
- Fuel flexibility with coal/gas/oil optionality among available units

SI-SSA-0015-06407

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on July 18, 2013

On Peak Basis to PJM-W on July 18, 2013

Hourly Generation and Load on July 18, 2013

- High demand in constrained northern NJ
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional generation available above obligations to gain value from real time market spikes
- Gas advantage in procuring low cost shale supply to capture savings

SI-SSA-0015-06408

Sustainable Advantage: BGS Auction provides excellent opportunity to forward hedge our generation

BGS sales account for about a quarter of our forward portfolio of hedges

SI-SSA-0015-06409

$/MWH; BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2012-2014 WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2014.

Sustainable Advantage: Hedging strategy designed to protect gross margin while leveraging the portfolio

		2014	2015	2016
Base Load (Nuclear and Base Load Coal)	Volume TWh	35	35	35
	% Hedged	100%	75-80%	30-35%
	Price $/MWh	$48	$51	$53
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	20	19	19
	% Hedged	35-40%	0%	0%
	Price $/MWh	$48	$51	$53
Total	Volume TWh	53-55	53-55	53-55
	% Hedged	75-80%	45-55%	20-30%
	Price $/MWh	$48	$51	$53

HEDGE PERCENTAGES AND PRICES AS OF FEBRUARY 11, 2014. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS. EXCLUDES SOLAR AND KALAELOA.

SI-SSA-0015-06410

Sustainable Advantage: PJM's capacity market is expected to continue to recognize locational value

RPM Auction Results*					
($/MW-day)	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016	2016 / 2017
Power's Average Prices	$153	$242	$166	$166	$166
Rest of Pool Prices	$16	$28	$126	$136	$59
Power's Cleared Capacity (MW)	10,400	10,890	10,710	9,210	8,610

2017/2018 RPM Auction Influenced By:

- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Updated Transfer Capabilities
- New Build/Cost of New Entry
- Demand Response

PSEG

*PSEG POWER'S AVERAGE PRICES AND CLEARED CAPACITY (MW) REFLECT BASE AND INCREMENTAL RPM AUCTION RESULTS. DELIVERY YEAR RUNS FROM JUNE 1 TO MAY 31 OF THE NEXT CALENDAR YEAR.

Sustainable Advantage: Fuel advantage continues throughout the curve

Forward curve shows that Marcellus shale supply averages over $1.50/MMbtu discount year-round through 2018

SI-SSA-0015-06412

2013 AVERAGE 6/1/13-12/31/13; F= FORWARDS AS OF 12/31/13. LEIDY BASIS FROM ICE/BROKER QUOTES

PSEG Power's Value Proposition

- Well-positioned fleet of merchant generating assets concentrated in PJM market
- Advantaged by low cost structure, fuel diversity and dispatch flexibility
- Low environmental capital requirements
- Capacity uprates to enhance value of nuclear and combined cycle stations
- Consistent hedging strategy recognizes asset flexibility
- Continue to meet commitments and to provide free cash flow

SI-SSA-0015-06413

PSEG FINANCIAL REVIEW & OUTLOOK

PSEG

We make things work for you.

SI-SSA-0015-06414

Strong financial position to support our business initiatives

2013 Financial Position

- ✓ Exceeded upwardly revised 2013 earnings guidance
- ✓ Pension fully funded
- ✓ Strong balance sheet and upgraded credit ratings

2014 and Beyond

- ✓ Continued positive earnings trend in 2014
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investments without equity issuance
- ✓ Growth in PSE&G investments with contemporaneous returns
- ✓ Diversified Power assets with a balanced hedge profile
- ✓ Growth in PSE&G Cash from Operations, with continued significant Cash from Operations/FFO at Power
- ✓ Increased Dividend by $0.04 to indicative annual rate of $1.48 for 2014
- ✓ Opportunity for consistent and sustainable dividend growth

SI-SSA-0015-06429

PSEG Summary

- Our 2013 earnings of $2.58 exceeded our upwardly revised operating earnings guidance of $2.40 - $2.55 per share
- Double digit earnings growth at PSE&G on one and three year basis from 2013 to 2016, driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support full capital program and new potential opportunities without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for consistent and sustainable growth

PSE&G APPENDIX

SI-SSA-0015-06431

PSE&G provides high reliability at below average cost which creates superior value to customers

SI-SSA-0015-06432

SAIDI = SYSTEM AVERAGE INTERRUPTION DURATION INDEX, A MEASURE OF AVERAGE OUTAGE DURATION FOR ALL CUSTOMERS SERVED.

PSE&G prioritizes public safety

while maintaining value to customers

SI-SSA-0015-06433

LEAK RESPONSE RATE = PERCENTAGE OF UTILITY RESPONSES TO REPORTED LEAKS WITHIN ONE HOUR.

PSEG POWER AND ER&T APPENDIX

SI-SSA-0015-06434

Nuclear fuel needs have been hedged through 2016

SI-SSA-0015-06435

Power's coal hedging reflects 2014 supply matched with 2014 sales

Station	Coal Type	Pricing ($/MWh)*	Comments
Bridgeport Harbor	Adaro	Low $40's	Higher price, lower BTU, enviro coal
Hudson	CAPP	Mid $40's	Flexibility after BET in 2010
Mercer	Metallurgical CAPP/NAPP	Low $40's	More limited segment of coal market
Keystone	NAPP	Mid $20's	Prices steady
Conemaugh	NAPP	Mid $20's	Prices steady

*COMMODITY PLUS TRANSPORTATION.

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
