Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-08832

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of July 28, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss

PSEG's Value Proposition

- A stable platform with a $15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 110-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

PSEG

*POWER ANNOUNCED RETIREMENTS OF HUDSON AND MERCER GENERATING STATIONS AS OF JUNE 1, 2017.

PSEG Policy and Regulatory focus

on mechanisms that provide customers clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- True-up data from 2010 base rate case for known changes in customers usage, taxes, O&M and investments

Long-Term Infrastructure Investment Platform

- Seek extension of existing infrastructure programs, e.g., GSMP, and broaden investment platform

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy to recognize the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-08845

PSE&G – Regulatory Agreement/Filing Support Long-term Objectives

PSE&G's recent filing to extend its Gas System Modernization Program (GSMP) and an agreement reached on its proposed Energy Efficiency investment program reinforce PSE&G's commitment to provide clean, reliable energy for its customers

Gas System Modernization Program II

In July, PSE&G filed for a 5-year extension of the GSMP which would accelerate the pace of replacement of its aging cast iron and unprotected steel mains and associated service. PSE&G is proposing to invest approximately $540 million per year, or up to $2.7 billion, over the 5-year program beginning in 2019. The filing is consistent with the draft regulations that the BPU issued in June regarding Infrastructure Investment Programs.

Energy Efficiency

In July, PSE&G reached an agreement in principle with BPU Staff and Rate Counsel related to its proposed request to extend its investment in Energy Efficiency. Under the agreement, PSE&G would invest $69 million in energy efficiency equipment for hospitals, multi-family housing and other sectors and a residential energy efficiency offering for smart thermostats and data analytics. The agreement represents more than 90% of PSE&G's request.

SI-SSA-0015-08846

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2012 - 2016

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2017-2021E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth rate

SI-SSA-0015-08847

PSE&G's capital spending drives high single-digit growth in rate base

E = ESTIMATE.

SI-SSA-0015-08848

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-08849

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2016 to 2021E

[1] REFLECTS RETIREMENT OF HUDSON AND MERCER UNITS ON JUNE 1, 2017.
ALL PERIODS EXCLUDE SOLAR (257 MW_{AC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.

PSEG has demonstrated an ability to control O&M, with plans to reduce in 2017

(1) POWER EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON / MERCER EARLY RETIREMENT WRITE-DOWN, DISTRIBUTION EXCLUDES ELECTRIC AND GAS BAD DEBT. E = ESTIMATE.

SI-SSA-0015-08852

Opportunity for meaningful and sustainable dividend growth

SI-SSA-0015-08853

PSEG Summary

- 2016 Operating Earnings (non-GAAP) at upper end of revised guidance of $2.80 - $2.95 per share
- PSE&G capital spending provides high single-digit rate base growth for foreseeable future balanced between Transmission and Distribution
- Power expected to generate significant free cash flow following CCGT construction program and transformation to a more efficient generation fleet
- Strong balance sheet and cash flow support current capital program and new investment opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2017 demonstrates meaningful and sustainable dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

SI-SSA-0015-08854

PSEG's Value Proposition

- A stable platform with a $15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 110-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

SI-SSA-0015-08855

PSEG FINANCIAL APPENDIX

PSEG

We make things work for you.

SI-SSA-0015-08856

Q2 2017–Solid financial results at both businesses

Second Quarter Highlights

- Net Income of $0.22 vs. Net Income of $0.37 per share in Q2 2016, reflecting Hudson & Mercer retirements
- Non-GAAP Operating Earnings* of $0.62 vs. $0.57 per share in Q2 2016
- PSE&G achieved 17% growth in Q2 earnings per share over Q2 2016 – supported by increased investment in transmission and distribution, and cost containment
- PSEG Power results aided by continued cost control

Operational Excellence

- Nuclear fleet achieved a capacity factor of 89.6% for Q2 and 94.8% for H1 2017
- PSE&G named Smart Electric Power Alliance's (SEPA) 2017 Investor Owned Utility of the Year, recognizing PSE&G's Solar 4 All program and its leadership in landfill and brownfield solar development

Disciplined Capital Investment – Producing Results

- PSEG to invest ~$4.7 billion in 2017, consisting of ~$3.4 billion at PSE&G and ~$1.2 billion at PSEG Power
- Regulatory/Policy Focus: New Jersey Board of Public Utilities (BPU) actions support infrastructure investment; Energy Efficiency agreement in principle reached; $2.7 billion, 5-year Gas System Modernization Program (GSMP) extension/expansion filing
- Hudson and Mercer coal/gas generating stations retired on June 1

SI-SSA-0015-08857

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as competition for certain transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies, and
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slides A and B at the end of this presentation include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

CHIEF FINANCIAL OFFICER

Kathleen Lally

VICE PRESIDENT –
INVESTOR RELATIONS

PSEG

We make things work for you.

SI-SSA-0015-08865

PSEG's Strategy – delivering results

Our businesses' focus on cost-effective, reliable operations yields strong cash flow

We are funding growth-oriented investments aligned with customer needs and state energy policies

We are enhancing the competitiveness of our environmentally well-positioned generation business

The results of our financial strategy support a credit profile capable of meeting our corporate objectives and providing sustained dividend growth for our shareholders

SI-SSA-0015-08866

Two complementary businesses

Strong asset platform, performing well and positioned for the future

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Positioned to meet customers' needs as we respond to state and federal energy policy and economic growth objectives **Value Proposition:** An $11.3 billion infrastructure program – focused on transmission – that is expected to produce double-digit rate base growth through 2016	**Strategy:** Fuel diverse fleet is geographically and environmentally well positioned, with investments to enhance competitiveness **Value Proposition:** Provides substantial free cash flow in current environment and poised for price recovery
2013 — Assets $20B Operating Earnings $612M	2013 — Assets $12B Operating Earnings $710M

SI-SSA-0015-08867

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2013.
PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT, PSEG LONG ISLAND AND ENERGY HOLDINGS ACTIVITY.
SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

Delivering on commitments and pursuing opportunities for growth

Operational Excellence	• Power: Record 2013 output at Linden CCGT and Salem 2; nuclear capacity factor greater than 90% for 9th straight year • PSE&G: Mid-Atlantic Reliability Award (12th consecutive year) • PSEG Long Island: Went "live" on January 1, 2014 • PSEG: Cost-control benefits continue
Financial Strength	• Strong cash flows supported credit rating increases • Pension more than fully funded • Dividend increased
Disciplined Investment	• PSE&G ✓ Transmission capital program execution and growth ✓ Energy Strong infrastructure program underway ✓ Solar 4 All Extension and Solar Loan III programs • Power: Investments to enhance the fleet's competitiveness – 130 MW Nuclear uprate, 150 MW CCGT uprate and efficiency improvement

SI-SSA-0015-08868

PSEG 2014 Operating Earnings expected to be at the upper end of guidance range

Reflects increased level of utility investment, pension savings and assumes normal weather and unit operations for the rest of year

PSEG

SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. E = ESTIMATE.

Operating Earnings Mix

Long term investment program has driven increased earnings contribution from stable, regulated business

Power's diverse fuel mix and dispatch flexibility continues to generate earnings and free cash flow

PSE&G's investment in transmission has diversified its asset base and, coupled with other investments and cost controls, supported compound annual earnings growth of ~18% over 2009 – 2013

SI-SSA-0015-08870

PSEG

Maintaining a robust capital program focused on growth

PSEG 2009 - 2013 Capital Spending $11.3 Billion	PSEG 2014 - 2018E Capital Spending $13.1 Billion

SI-SSA-0015-08871

PSEG

NOTE: POWER 2009–2013 ACTUALS ARE RESTATED TO INCLUDE SOLAR CAPITAL SPEND. POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. E=ESTIMATE

PSEG's business profile has been transformed through significant growth in utility capital spending

SI-SSA-0015-08872

Energy Strong Agreement recognizes benefits of system investments

- Energy Strong Agreement reached with all parties
  - ✓ Agreement recognizes the benefits of system investments that prevent or shorten outages
  - ✓ Supports $1.22 billion capital program over several years on reasonable terms: $1 billion recovered through accelerated, rate recovery mechanism
    - $820 million Electric
    - $400 million Gas
  - ✓ Allows PSE&G to earn a 9.75% ROE on the $1 billion recovered on accelerated basis
  - ✓ Requires PSE&G to file a base rate case by November 2017
  - ✓ Approved by the NJBPU in May 2014
- Over 100 New Jersey municipalities supported Energy Strong
- Energy Strong agreement clears path for PSE&G to begin the initial phase of this robust capital program

SI-SSA-0015-08873

PSEG Power – Value-advantaged through asset diversity, fuel flexibility, location and installed environmental controls

Fuel Diversity
Total MW: 13,450

SI-SSA-0015-08874

Balance Sheet Strength

2009 – 2013: Reduced risk profile and transformed business mix

- Invested $8.4 billion in PSE&G
- Improved credit ratings
- Monetized and de-risked Holdings' portfolio

2014 – Forward: Strong cash flows and increasingly regulated business mix fully support:

- PSE&G's $11.3 billion approved investment program through 2018
- Consistent and sustainable dividend growth
- Additional investment capacity to deploy in opportunities beyond those in the current capital plan
- No need to issue equity

SI-SSA-0015-08875

PSEG Annual Dividend – A long history of growth and returning cash to shareholders with a financial position that provides opportunity for consistent and sustained growth

*INDICATED ANNUAL RATE.
**2014 PAYOUT RATIO REFLECTS THE MIDPOINT OF OPERATING EARNINGS GUIDANCE. E=ESTIMATE

SI-SSA-0015-08876

PSEG Q2 2014 Financial Highlights

- **Earnings on Track**
  - ✓ Operating earnings of $0.49 vs. $0.48 per share in Q2 2013
  - ✓ Increased earnings contribution from PSE&G's investment in Transmission
  - ✓ Expect 2014 Operating Earnings to be at the upper end of the $2.55 to $2.75 per share guidance range – assuming normal weather and plant operations for the balance of the year
- **Operating Review**
  - ✓ PSEG Power output down 5% vs. Q2 2013 from Linden and Salem 2 outages, partially offset by improvement in coal generation
  - ✓ PSE&G placed the 230 kV North Central Reliability transmission project in service
  - ✓ Power's fleet fully restored from storm outages
- **PSEG Disciplined Capital Investment**
  - ✓ BPU approved $1.22 billion investment in PSE&G's Energy Strong infrastructure program
  - ✓ PJM deferred a final decision on its recommended solution, to be built by PSE&G, for the Artificial Island project via FERC 1000 competitive bidding process
- **Market Developments**
  - ✓ Recent EPA actions on 316(b) and GHGs

SI-SSA-0015-08877

*SEE SLIDE B FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO OPERATING EARNINGS

Value Proposition

PSEG is positioned to **expand its investment in PSE&G** projects that provide reasonable, risk-adjusted returns, in ways that meet customer needs and state goals, given **strong cash flow of Power** and growing cash contribution from PSE&G.

PSEG will maintain a **strong financial profile** that provides the opportunity to achieve our growth objectives and maintains our **track record** of **returning cash to shareholders**.

PSE&G's capital program has expanded

with the addition of Energy Strong

SI-SSA-0015-08887

PSEG

E = ESTIMATE

Energy Strong Agreement supports customers' needs in the aftermath of Superstorm Sandy

- Settled with NJBPU Staff and all other parties in May 2014 for $1.22 billion; approved by the NJBPU in May 2014
- Program addresses system resiliency and hardening by:
  - ✓ $620 million to raise, relocate or protect 29 switching and substations that were damaged by water in recent storms
  - ✓ $350 million to replace and modernize 250 miles of low-pressure, cast iron gas mains in or near flood areas
  - ✓ $100 million to create redundancy in the electric system, reducing outages when damage occurs
  - ✓ $100 million to deploy smart grid technologies to better monitor system operations to increase our ability to more swiftly deploy repair teams
  - ✓ $50 million to protect five natural gas metering stations and a liquefied natural gas station affected by Sandy or located in flood zones

SI-SSA-0015-08888

Over 70% of PSE&G's $11.3 billion investment program will be recovered through contemporaneous mechanisms

2014-2018E PSE&G Capital Spending by Recovery Method

$11.3 Billion

Clause Recovery Mechanisms

North Central Reliability	11.68%	✓	✓	$390	Completed
Burlington–Camden 230kV	11.68%	✓	✓	$399	Completed
Mickleton–Gloucester–Camden 230kV	11.68%	✓	✓	$435	June 2015

SI-SSA-0015-08893

Susquehanna-Roseland consists of constructing 150 miles of 500kV circuit (46 miles in NJ) with two new 500kV GIS switching stations at Roseland and Hopatcong

Project Estimate Up To*	Through Year-end 2013	Expected In-service Date
$790M	$661M	Phase 1 – **Completed** Phase 2 – June 2015

- PJM RTEP project b0489
- ROE of 12.93% (including 1.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves reliability and reduces congestion

Project Status: The eastern part of line from Hopatcong to Roseland, NJ in service April 2014; NJ construction planned to be completed in Q3 2014. PA portion outside plant construction in progress. Western portion in NJ and the PA portion is planned to go in service June 2015.

SI-SSA-0015-08894

*PROJECT IS SHARED WITH PPL. PROJECT ESTIMATE REPRESENTS PSE&G'S CONSTRUCTION RESPONSIBILITY FOR THE NJ PORTION.

Northeast Grid Reliability consists of upgrading approximately 50 overhead circuit miles of 138kV transmission line to 230kV, constructing ~18 miles of new underground 230kV lines, and converting/upgrading 12 existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$907M	$228M	June 2015

- PJM RTEP project b1304
- ROE of 11.93% (including 0.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment
- Project estimate has increased ~$12M associated with hardening related scope changes as a result of Superstorm Sandy

Customer Benefit: Improves reliability and increases transfer capability

Project Status: Nearing completion of engineering/design and licensing/permitting phase. Outside and inside plant construction are in progress

SI-SSA-0015-08895

North Central Reliability consists of upgrading 55 circuit miles of 138kV transmission line to 230kV, and converting six existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$390M	$349M	Completed

- PJM RTEP project b1154
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves power quality and increases transfer capability

Project Status: In service April 2014

SI-SSA-0015-08896

Burlington-Camden 230kV consists of upgrading 37 circuit miles (30 miles of overhead and 7 miles of underground) of 138kV transmission line to 230kV, converting the existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$399M	$301M	Completed

- PJM RTEP project b1156
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses voltage reliability and increases transfer capability

Project Status: In service April 2014

SI-SSA-0015-08897

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$435M	$122M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses thermal reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-08898

Bergen-Linden Corridor is a recently approved project which will provide a double-circuit 345kV line to maintain reliability

Project Estimate Up To	Through Year-end 2013	Expected Completion Date
$1,200M	-	June 2018

- PJM RTEP project b2436
- 30 miles of underground cable
  - New ~ 23 miles
  - Reconductor (Upgrade of 138 to 345) ~7 miles
- 13 miles of double circuit overhead conductor (replacing double circuit 138 with double circuit 345)
- 11 station upgrades to 345kV

Customer Benefit: Addresses thermal and short-circuit reliability

Project Status: Engineering

SI-SSA-0015-08899

Planned transmission spend of $6.8 billion

is driven by PJM reliability projects, 69kV conversions and life-cycle replacement projects

SI-SSA-0015-08900

PSE&G's processes and culture are the foundation for project execution success

People

- Diverse, well-rounded team
- Culture with a focus for on-time, on-scope and on-budget execution
- Successful recruitment, development and retention strategies
- Strong unions and supplier relationships

Process

- Cradle to grave project execution organization
- Processes designed to be scalable, repeatable and improvable
- Emphasis on best practices and lessons learned sharing
- Improvements driven by performance metric management

Environment

- Collaborative relationship with regulatory agencies
- Innovative design and construction practices to minimize environmental impacts
- Robust environmental compliance system

SI-SSA-0015-08901

PSE&G's demonstrated ability to successfully execute large projects leaves us well positioned to pursue new opportunities

- Future RTEP as identified by PJM
- Near-term participation in RTO competitive open planning windows
  - PJM
  - MISO
  - NYISO
- Participating in competitive solicitations under FERC 1000 -- Artificial Island recommendation

SI-SSA-0015-08902

PSE&G's 2014 operating earnings

PSEG LONG ISLAND

PSEG

We make things work for you.

SI-SSA-0015-08904

PSEG was selected to operate Long Island Power Authority's (LIPA) electric transmission and distribution system for 12 years starting in 2014

- Pursuant to the Operating Services Agreement (OSA), all expenses and capital costs to operate the system are pre-funded by LIPA and passed through to their customers
- Compensation consists of a fixed fee and an incentive fee
  - Fixed compensation fee for 2014 with scheduled increases in 2015 and 2016
  - Starting in 2015 PSEG Energy Resources and Trading (ER&T) begins managing fuel/energy contracts
  - PSEG Long Island expected to contribute $0.03 to operating earnings in 2014 increasing to $0.07 per share in 2016 including contribution at ER&T
- Potential for an 8-year extension of the OSA

SI-SSA-0015-08905

PSEG Long Island commenced operations

on January 1, 2014

Key elements of Operating Services Agreement

Increased PSEG scope and control	Use of PSEG brand as PSEG Long Island	3-Year rate freeze (2013-2015)
Performance metrics	NY Department of Public Service oversight	Potential for "Utility 2.0" investment

Early performance

Successful transition to PSEG Long Island	Stakeholder communication	Winter storm response

SI-SSA-0015-08906

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-08907

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-08908

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units operated at over 90% capacity factors for the 9th consecutive year through 2013 • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing conditions • Linden CCGT and Salem 2 nuclear unit achieved record output in 2013	• "Getting the most out of existing fleet" • Locational advantage • O&M control programs have delivered a CAGR of 1.6% between 2009 and 2014 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-08909

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2013 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch • Completed 19 MW solar project, 4 MW project under construction, established robust pipeline • Nuclear ESP is expected in 2015

SI-SSA-0015-08910

PSEG Power met 2013 challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• SuperStorm Sandy impacted our generating sites • Cold and hot weather extremes created challenging operating environment, but also presented opportunities		• Unit outages and planned transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Optimized unit dispatch across fleet during storm recovery • Expedited return from storm outages, restored margin opportunities • High availability when needed • Achieved fuel cost savings • Captured value through coal/gas switching, unit flexibility • Coal & oil sales optimized inventory • Flexibility of portfolio captured real-time basis opportunities

SI-SSA-0015-08911

PSEG Power exceeded 2013's earnings guidance

OPERATING EARNINGS FOR PSEG POWER IN 2013; SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. *ASSETS TRANSFERRED TO POWER AT YEAR-END 2013.

SI-SSA-0015-08912

PSEG Power has generating assets

in three competitive markets

- Assets near loads
- Low cost portfolio
- Fuel flexibility with gas cost advantage
- Poised to benefit from volatility in real-time markets
- Fleet will maintain diversity and efficiency after HEDD
- Most sites suitable for expansion

SI-SSA-0015-08913

PSEG Power will maintain diversity and efficiency after a realignment of the fleet due to HEDD

Objective 2013 → 2017

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Environmental improvement
- Peach Bottom (PB) uprate
- Advanced Gas Path (AGP)
- Kalaeloa and Solar transfer adds ~200MW of capacity

Fuel Diversity

Energy Produced

E=ESTIMATE

SI-SSA-0015-08914

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel flexibility for >60% of fleet

SI-SSA-0015-08915

PSEG Power Nuclear is a critical element of our success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3
• Operated by PSEG Nuclear • PSEG Ownership: 100% • Technology: Boiling Water Reactor • Total Capacity: 1,178 MW • Owned Capacity: 1,178 MW • License Expiration: 2046 • Next Refueling ➢ Spring 2015	• Operated by PSEG Nuclear • PSEG Ownership: 57% • Technology: Pressurized Water Reactor • Total Capacity: 2,365 MW • Owned Capacity: 1,358 MW • License Expiration: 2036 and 2040 • Next Refueling ➢ Unit 1 – Fall 2014 ➢ Unit 2 – Fall 2015	• Operated by Exelon • PSEG Ownership: 50% • Technology: Boiling Water Reactor • Total Capacity: 2,251 MW • Owned Capacity: 1,125 MW • License Expiration: 2033 and 2034 • Next Refueling ➢ Unit 2 – Fall 2014 ➢ Unit 3 – Fall 2015 • Uprate: 130 MW in 2015/2016

SI-SSA-0015-08916

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations: nine consecutive years of >90% capacity factor through 2013
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - FLEX* plan submitted with implementation starting with Fall outage
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-08917

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

Power's nuclear fleet is well positioned

with significantly lower-than-average US cost structure

*SOURCE: ELECTRIC UTILITY COST GROUP
** SOURCE: PSEG NUCLEAR

SI-SSA-0015-08918

PSEG Power's Fossil Fleet Performance

has shown improvement

- Fossil Capacity Factor rebounded with market
- Peaking Units maintain high start success

- Coal EFORp improving
- CC EFORp less than 1% in 2013
- Consistent recipient of EFORp payments

SI-SSA-0015-08919

PSEG

*LM6000 AND 7EA UNITS

PSEG Power improvements achieved in combined cycle fleet efficiency

Combined Cycle Operating Heat Rate

Actions Taken to Create Value

- Operational Excellence Model
- Training programs
- Unit testing initiative
- Outage work to restore efficiency
- Second gas line at BEC

- Heat rate improvement 2008-2013 translates to meaningful fuel savings at current market prices

- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional fuel savings

SI-SSA-0015-08920

Investing to expand CCGT capacity and improve efficiency

PSEG Power - CCGT Uprate Project

- Expand Power's CCGT fleet, one of the largest gas-fired portfolios in PJM, with incremental base and peaking MWs
- Retrofit Bergen, Linden and BEC with Advanced Gas Path (AGP) components at cost of ~$120M over 2014 - 2018

AGP Project Benefits

- ✓ CCGT capacity uprates of ~150 MW:
  - Linden (63 MW – Completed)
  - Bergen (31 MW – 2015)
  - BEC (58 MW – 2017-2018)
- ✓ Increases Efficiency - Combined Cycle (CC) heat rate improvement ~ 1.2%
- ✓ Upgrades technology and extends maintenance outage cycles

SI-SSA-0015-08921

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- Cost control through testing coordination program

SI-SSA-0015-08922

PSEG Power's capital expenditures for environmental requirements are essentially complete*

*BASED ON CURRENTLY KNOWN AND QUANTIFIABLE ENVIRONMENTAL REQUIREMENTS. E=ESTIMATE

SI-SSA-0015-08923

PSEG Power is well-positioned for growth when market conditions warrant

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Transmission Interconnections • Access to Gas Pipelines • Space • Emissions

SI-SSA-0015-08924

SI-SSA-0015-08927

PSEG Power: Enjoys real and sustainable advantages in the merchant generation space

Market Review

- Gas, Power, Spark Spreads
- Regulatory construct

PSEG's Competitive Advantage

- Fuel flexibility
- Heat Rate diversity
- Access to Marcellus Shale gas
- Asset flexibility

PSEG's Sustainable Advantage

- Positive cash-flow hedging into the long-term
- Robust capacity market pricing in most concentrated load pocket in US
- Long-term access to discounted Marcellus gas

SI-SSA-0015-08928

Market Review: Long-term fundamentals remain sound

- Environmental restrictions may tighten market
- Insufficient gas infrastructure continues to place upward pressure on fuel prices during seasonal peaks
- Market liquidity remains weak beyond 2015

SI-SSA-0015-08929

F=FORWARDS AS OF 7/25/2014, 2014F INCLUDES HISTORY AND FORWARDS

Market Review: New generation in PJM not keeping pace with coal retirements

Cumulative Generation Retirements*

Forecast Reserve Margin (PJM January 2014)

- PJM forecasts a declining Reserve Margin through 2018, which may improve forward prices
- Brattle estimates energy prices could rise at least $3-4/MWh from today's prices

SI-SSA-0015-08930

*PJM AS OF FEBRUARY 20, 2014
SOURCE OF CHART DATA: PJM

Market Review: Regulatory framework showing signs of improvement

	ISSUE / POLICY	REGULATORY GAINS
PJM	SUBSIDIZED GENERATION (NJ and MD)	• Comprehensively defeated in federal court (appeals currently pending)
	DEMAND RESPONSE RULES	• PJM and ISO-NE enacted stricter rules of eligibility and deployment
	ENERGY PRICE FORMATION	• Concerted drive to improve price formation for generation and ancillary services • Waiver of price caps during extreme market conditions
NYISO	TRANSMISSION	• Significant progress made to relieve bottling of upstate generation
ISO-NE	CAPACITY	• Improvement in price formation to better reflect tight supply conditions • Implementation of sloping demand curve in Forward Capacity Auction (FCA) 9
	ENERGY	• Demand response required to participate in Day Ahead markets
FEDERAL	GAS to ELECTRIC	• Better coordination between pipelines and ISO's will promote efficiency
	ENVIRONMENTAL REGULATIONS	• HEDD, HAPS/MACT may lead to tightening of supply in 2015+ timeframe

SI-SSA-0015-08931

Competitive Advantage: Heat Rate Diversity & Flexible Dispatch

SI-SSA-0015-08932

Competitive Advantage: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

SI-SSA-0015-08933

Competitive Advantage: ~25% of Power's gas for generation comes from Marcellus

- Our combined cycle and peaking assets have been able to take advantage of locational gas price volatility driven by production and logistical constraints
- Lower cost shale supply provides additional savings during periods of lower residential gas demand

SI-SSA-0015-08934

*AS OF 7/25/2014

Competitive Advantage: Locational advantage from short term basis volatility

PS Zone Annual Basis to PJM-W

PS Zone Day Ahead On Peak Monthly Basis to PJM-W

- Annual basis benefits baseload units
- Intermediate units flexible to seasonal opportunities
- Combined Cycle and Peaking units positioned to optimize daily and hourly volatility

PS Zone Real Time On Peak Hourly Basis to PJM-W

ANNUAL FORWARD (F) BASIS TO PJM-WEST AS OF 12/31/2013.

Sustainable Advantage: BGS Auction provides excellent opportunity to forward hedge our generation

BGS sales account for about a quarter of our forward portfolio of hedges

PSEG FINANCIAL REVIEW & OUTLOOK

PSEG

We make things work for you.

SI-SSA-0015-08941

Strong financial position to support our business initiatives

2013 Financial Position

- ✓ Exceeded upwardly revised 2013 earnings guidance
- ✓ Pension fully funded
- ✓ Strong balance sheet and upgraded credit ratings

2014 and Beyond

- ✓ Continued positive earnings trend in 2014
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investments without equity issuance
- ✓ Growth in PSE&G investments with contemporaneous returns
- ✓ Diversified Power assets with a balanced hedge profile
- ✓ Growth in PSE&G Cash from Operations, with continued significant Cash from Operations/FFO at Power
- ✓ Increased Dividend by $0.04 to indicative annual rate of $1.48 for 2014
- ✓ Opportunity for consistent and sustainable dividend growth

SI-SSA-0015-08942

Exceeded upwardly revised guidance

in both businesses

PSEG Operating Earnings		
$ Millions (except EPS)	**2012**	**2013**

Upwardly Revised Earnings Guidance (Nov 2013)	**$2.40 - $2.55**
Earnings Guidance (Feb 2013)	**$2.25 - $2.50**

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

NOTE: 2012 OPERATING EARNINGS RE-STATED FOR TRANSFER OF ASSETS FROM PSEG HOLDINGS TO PSEG POWER.

SI-SSA-0015-08943

In 2013, Power had significant free cash flow

SI-SSA-0015-08944

In 2013, PSE&G invested over $2B, using $1.4B of internally generated cash flow and debt, while maintaining its capital structure

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.

SI-SSA-0015-08945

In 2013, Power's Free Cash Flow supported PSE&G's capital program and shareholder dividend

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.
(2) OTHER CASH FLOW INCLUDES HOLDINGS NET CASH FLOW AND PARENT CASH.

SI-SSA-0015-08946

PSEG growth spend, including Energy Strong, of ~$6.4B represents ~76% of total investment

E = ESTIMATE; CAPITAL INCLUDES AFUDC AND IDC.

SI-SSA-0015-08947

PSE&G's Capital Program drives double-digit growth in rate base and earnings over the 2013 to 2016 period

SI-SSA-0015-08948

PSE&G's Cash from Operations and Power's Free Cash Flow support growth investments without the need for new equity

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$500M FROM 2014-2016
(2) OTHER CASH FLOW INCLUDES PSEG LI, HOLDINGS NET CASH FLOW, CASH, AND SHORT TERM DEBT
E = ESTIMATE

SI-SSA-0015-08949

Power's key credit metric supports incremental investment opportunities

- Increased contribution to earnings from the more stable regulated business allows us to reset Power's FFO/Debt threshold from 35% to 30%, providing additional financial flexibility
- Power's annual Cash From Operations and Funds From Operations each average ~$1.1B over the 2014 to 2016 period supported by:
  - Capacity Revenues
  - Hedged Generation
  - O&M Control
- Financial strength can be used to pursue future growth in both businesses beyond current plans

SI-SSA-0015-08950

Pension: Our Long Term Asset allocation strategy resulted in a ~17% increase in pension assets during 2013

PBO Funded Ratio	83%			Fully Funded Pension →	106%

SI-SSA-0015-08951

Our Pension Management is expected to result in pension income in 2014 and over the planning horizon

SI-SSA-0015-08952

SI-SSA-0015-08955

PSEG Summary

- Our 2013 earnings of $2.58 exceeded our upwardly revised operating earnings guidance of $2.40 - $2.55 per share
- Double digit earnings growth at PSE&G on one and three-year basis from 2013 to 2016, driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support full capital program and new potential opportunities without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for consistent and sustainable growth

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as for transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies, and
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-08976

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Income from Continuing Operations/Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP.
PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends.

PSEG is presenting Adjusted EBITDA because it provides investors with additional information to compare our business performance to other companies and understand performance trends. Adjusted EBITDA excludes the same items as our Operating Earnings measure as well as income tax expense, interest expense, depreciation and amortization and major maintenance expense costs at Power's fossil generation facilities. This information is not intended to be viewed as an alternative to GAAP information. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings and Adjusted EBITDA with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

Power's fleet has the desired attributes to be successful in today's and tomorrow's market

Economic Drivers	Outlook	Combined Cycle	Nuclear	Scrubbed Coal	Peakers	Renewable
Energy Margins	• Low natural gas and energy prices • Robust portfolio of gas pipeline contracts	✓	✓	✓	n/a	n/a
Capacity Markets	• Tightened rules proposed for capacity performance	✓	✓	✓	✓	n/a
Environmental Regulations	• Tighter air emissions standards	✓	✓	✓	✓	✓
Location	• Assets in well-designed markets, premium regions • Opportunities on brownfield sites	✓	✓	✓	✓	n/a
	PSEG Power Capacity (GW) Total 13 GW	3.2	3.6	2.4	3.7	0.1

- **Largest nuclear site** in the eastern U.S. and ownership in **large, fully scrubbed coal facilities** at Keystone and Conemaugh provide **economies of scale** that enhance energy margins in current low market, and provide for upside potential if prices improve.
- **Dual fuel peakers** meet reliability criteria in capacity markets and provide option value in energy market. Opportunity exists to repower peakers that do not meet NJ HEDD environmental regulations.

SI-SSA-0015-08988

Power – Growing value by improving market rules and developing investment opportunities

Value Source	Opportunities and Actions Taken
Improving rules will better recognize value of our fleet	• PJM's Capacity market – 2014 limits on demand response and August 2015 Capacity Performance auction • Demand response treatment at U.S. Courts / FERC • Energy price formation at FERC • Increasing air standards through Federal and State regulations
Our footprint provides growth opportunities	• Nuclear and Combined Cycle plant uprates underway • New build Keys CCGT in SWMAAC (Maryland) • Brownfield expansions at existing sites ➢ New peakers built at New Haven and Kearny sites ➢ Continue to explore further opportunities • PennEast pipeline - equity investment and gas portfolio enhancement • Solar Source owns ~148 MW*, with significant project pipeline • Continue to seek opportunities to expand the fleet

SI-SSA-0015-09000

A robust pipeline of Transmission

investments focus on reliability improvements and replacement of aging infrastructure

Major Transmission Investments

Project Roster	Approved ROE	Program Description	Estimate Up To ($ Millions)	Expected In-service Date
Artificial Island – Upgrade Project	11.68%	FERC 1000 project	$110-$130	2019
Bergen—Linden Corridor 345kV	11.68%	PJM baseline project receiving CWIP in rate base treatment	$1,200	June 2018
PJM Regional Transmission Expansion Plan (RTEP) – multiple projects	11.68%	PJM mandated system reliability projects	$1,900	Various
69kV Upgrade – multiple projects	11.68%	Upgrade of 26kV to 69kV	$1,500	Various
Transmission Lifecycle – multiple projects	11.68%	Replacement of aging infrastructure	$1,100	Various
Transmission Hardening– multiple projects	11.68%	Reliability projects focused on system resiliency	$650	Various

*INCREMENTAL INVESTMENT IN HARDENING INCLUDED AS PART OF OTHER PROGRAMS.

Bergen-Linden Corridor is a project which will provide a double-circuit 345kV line designed to maintain system reliability

Project Estimate Up To	Through Year-end 2014	Expected Completion Date
$1,200M	$40M	June 2018

- PJM RTEP project b2436 and b2437 with phased in-service dates
- 30 miles of underground cable
  - New ~ 23 miles
  - Reconductor (Upgrade of 138 to 345) ~7 miles
- 13 miles of double circuit overhead conductor (replacing double circuit 138 with double circuit 345)
- 11 station upgrades to 345kV

Customer Benefit: Addresses thermal and short-circuit reliability

Project Status: Engineering, Licensing and Construction

Marion Substation Pile Installation

SI-SSA-0015-09002

Major Transmission programs focus on reliability and replacing aging infrastructure

- PJM's Regional Transmission Expansion Plan (RTEP) identifies system enhancements needed for reliability
- 69kV system upgrades improve system reliability and provide capacity for future growth
- Transmission Lifecycle is an ongoing program to manage transmission asset life to maintain and improve system integrity and reliability
- Transmission Hardening projects focus on increasing system resiliency

SI-SSA-0015-09003

PSE&G has successfully worked with regulators to develop multiple solutions for New Jersey's energy and economic development goals

RENEWABLES
creative solutions to install solar generation

- Solar Loan I – 2008
- Solar Loan II – 2009
- Solar 4 All – 2009
- Solar Loan III – 2013
- Solar 4 All Ext – 2013

ENERGY EFFICIENCY
assisting customers with controlling energy usage

- Carbon Abatement – 2008
- Demand Response – 2009
- Energy Efficiency (EE) – 2009
- EE Extension – 2011
- EE Extension II – 2015

DISTRIBUTION
improving electric and gas delivery infrastructure

- NJ Capital Infrastructure Program 1 (CIP 1) – 2009
- NJ Capital Infrastructure Program 2 (CIP 2) – 2011
- Energy Strong – 2014

To date we have invested over $2B in the above programs

Over $1B ahead in Energy Strong, Energy Efficiency Ext II and Solar programs

Gas System Modernization Program may increase potential investment by ~$1.6B

SI-SSA-0015-09004

PSE&G is successfully executing on Energy Strong with ~$150M deployed during the latter half of 2014

Program	Approved	Spend thru 2014
Flood Mitigation	$620M	$19M
Electric Contingency Reconfiguration	$100M	$26M
Electric Advanced Technology	$100M	$10M
Gas Utilization Pressure Cast Iron (UPCI)	$350M	$94M
Gas Metering & Regulating (M&R)	$50M	$1M
TOTAL	$1,220M	$150M

SI-SSA-0015-09005

Energy Strong will provide increased reliability and resiliency

- **Electric Flood Mitigation**
  - Engineering and scheduling began on 16 of the 29 total planned substation projects
- **Electric Contingency Reconfiguration**
  - Over 100 projects have been started and 15 projects have been completed to date, including installation of over 900 poles and 70 reclosers
- **Advanced Technology**
  - A total of 60 relays replaced and 3 remote terminal units (RTU) installed
- **Gas Utilization Pressure Cast Iron (UPCI)**
  - Installed ~110 miles of gas main and replaced ~5,300 services
- **Gas Metering & Regulating (M&R)**
  - Design and engineering completed for all of the eight stations scheduled

SI-SSA-0015-09006

Extension of PSE&G's award winning Energy Efficiency program

- Energy Efficiency Extension II approved by the BPU in April 2015 will extend the investment and time frame for three previously approved programs already in the marketplace, allowing PSE&G to factor in lessons learned and balance policy issues
- $95M of rate base investment approved at an ROE of 9.75%
- Extends existing programs, two of which have sizable waiting lists:
  - Hospitals
  - Multifamily
  - Direct install – government, non-profit, and small business
- Allows PSE&G to leverage past investments in people, capabilities, systems and processes

SI-SSA-0015-09007

Gas System Modernization Program of ~$1.6B focusing on aging gas mains

- PSE&G's gas distribution system currently operates and maintains over 4,800 miles of cast iron and unprotected steel main, the largest such system in any single state
- The program provides for investment of ~$1.6B focused on replacing cast iron and unprotected steel main over a five-year period, beginning mid-2016
- Program will replace approximately 160 miles of main per year
  - Requested accelerated clause-based recovery similar to the Energy Strong program with a 9.75% ROE
  - This program is the first phase of a long-term, 30-year cast iron and unprotected steel replacement plan
- Benefits:
  - Methane emission reduction is estimated at 24,500 metric tons of CO_2 equivalent per year*
  - Directly creates and supports 500 New Jersey jobs
  - Higher pressure system allows usage of high efficiency appliances by customers

SI-SSA-0015-09008

PSEG LONG ISLAND

SI-SSA-0015-09012

PSEG

We make things work for you.

PSEG Long Island is focused on improving customer service and reliability

- Provide best-in-class customer service, including building on our new Call Center Technology platform to better serve our customers
  - According to J.D. Power, in 2014 PSEG Long Island showed the most improvement in overall customer satisfaction of any large electric utility, anywhere in the nation
- Work to maintain industry-leading service reliability
- Improve every aspect of the storm response process
  - Leveraged our new Outage Management System to improve storm logistics and outage coordination
- Contributed $0.02* to PSEG's earnings per share in 2014, as expected

SI-SSA-0015-09013

PSEG

* EXCLUDES THE ENERGY RESOURCES & TRADE CONTRACT, WHICH WILL BE INCLUDED IN PSEG POWER'S RESULTS.

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-09014

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-09015

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units have performed well for ten consecutive years • Hope Creek recorded its second highest output in its history • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing market conditions • Bergen 1 & 2 and Linden 1 individually, and the CCGT fleet in total, set generation records in 2014 • Kearny 13 & 14 have shown increasing output in each year since start-up	• Getting the most out of existing fleet • Locational advantage • O&M control programs have delivered a CAGR of 2.6% between 2009 and 2015 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-09016

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program between Nuclear & Fossil initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2014 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch began January 1, 2015 • Solar Source's portfolio is 148 MW_{DC} • Nuclear ESP is expected in 2016 • New build Keys CCGT targeted in-service 2018 in Maryland

SI-SSA-0015-09017

PSEG Power met 2014's challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• All of the generation sites affected by SuperStorm Sandy were restored to service by mid-2014, with ongoing repairs • Cold weather extremes created a challenging operating environment, but also presented opportunities		• Transmission (outages and build outs) and gas markets resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Expedited return from storm outages, restored margin opportunities • High availability when needed • Flexibility of portfolio captured real-time basis opportunities • Captured value through coal/gas switching, unit flexibility • Management of gas assets benefited customers and fleet • Achieved fuel cost savings

SI-SSA-0015-09018

PSEG Power exceeded 2014's earnings guidance

2014 PSEG Power Operating Earnings*
($ Millions)

Over $60M of additional value gained from:

- Weather, basis volatility
- Fuel flexibility
- Lower gas cost
- Spark/dark spread

SI-SSA-0015-09019

PSEG

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS.
SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO OPERATING EARNINGS.

PSEG Power has generating assets

in three competitive markets

- Assets located near load centers
- Low cost portfolio
  - Fuel flexibility with gas cost advantage
- Positioned to benefit from volatility in real-time markets
- Readiness for capacity performance (CP) in PJM
- Fleet positioned to maintain diversity and efficiency after HEDD
- Sites suitable for expansion

SI-SSA-0015-09020

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape
- Readiness for Capacity Performance (CP)
- Keys CCGT to be added to dispatch in 2018E

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel capability at 87% of load following and peaking units

SI-SSA-0015-09021

PSEG Power positioned to maintain diversity and efficiency after a realignment of the fleet following HEDD retirements

Objective 2015 → 2017

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Improve environmental & heat rate profiles
- Complete
  - Peach Bottom (PB) uprate
  - Advanced Gas Path (AGP)

Fuel Diversity

Energy Produced

E=ESTIMATE

SI-SSA-0015-09022

PSEG Power's fleet is expected to see improvement in heat rate and decline in emissions

- AGP (Advanced Gas Path) investments
- Other Efficiency improvements
- HEDD retirements

SI-SSA-0015-09023

PSEG

E=ESTIMATE

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing

SI-SSA-0015-09024

PSEG Power Nuclear is a critical element of our success

Hope Creek

- Operated by PSEG Nuclear
- PSEG Ownership: 100%
- Technology: Boiling Water Reactor
- Total Capacity: 1,178 MW
- Owned Capacity: 1,178 MW
- License Expiration: 2046
- Next Refueling
  - Fall 2016

Salem Units 1 and 2

- Operated by PSEG Nuclear
- PSEG Ownership: 57%
- Technology: Pressurized Water Reactor
- Total Capacity: 2,307 MW
- Owned Capacity: 1,324 MW
- License Expiration: 2036 and 2040
- Next Refueling
  - Unit 1 – Spring 2016
  - Unit 2 -- Fall 2015

Peach Bottom Units 2 and 3

- Operated by Exelon
- PSEG Ownership: 50%
- Technology: Boiling Water Reactor
- Total Capacity: 2,242 MW
- Owned Capacity: 1,121 MW
- License Expiration: 2033 and 2034
- Next Refueling
  - Unit 2 - Spring 2016
  - Unit 3 - Fall 2015
- Uprate: 130 MW (PS Share)
  - Unit 2 - March 2015
  - Unit 3 - 2016

SI-SSA-0015-09025

PSEG Power Nuclear has competitive advantages

- Continued strong nuclear operations
- Nuclear excellence program
- Top quartile of cost performance/MWh
  - Brought security services in-house
- Significant earnings contributor
- Recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - FLEX* plan submitted with implementation underway
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

SI-SSA-0015-09026

Power's nuclear fleet is well positioned

with significantly lower-than-average US cost structure

*SOURCE: ELECTRIC UTILITY COST GROUP.
** SOURCE: PSEG NUCLEAR.

SI-SSA-0015-09027

PSEG Power's focus on costs

has resulted in moderate increase in O&M for seven years

Cost control actions taken:	
• Fossil plant assessment • CCGT material condition assessment • Vendor contract renegotiations • Nuclear security services brought in-house to control costs	• Nuclear maintenance productivity study • Nuclear outage efficiency initiative • Materials management

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS. E=ESTIMATE

SI-SSA-0015-09028

PSEG Power's Fossil Fleet has shown improvement in performance

Fossil Generation

Coal Generation

Peaking Start Success*

- Fossil Generation rebounded with market
- Peaking Units maintain high start success
- Record output from Kearny 13 & 14 peakers

Combined Cycle Generation

- Combined Cycle Generation set record
- Bergen AGP uprate project scheduled for 2015

PSEG Power CCGT/Fossil initiatives

Actions Taken to Create Value

Capacity
- New Keys CCGT 755MW online in 2018E adds geographic diversity to fleet
- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional efficient capacity, heat rate improvements
- New lower cost gas line at BEC with Dominion

Performance
- EPRI efficiency initiatives
- GE initiatives for large data analytic
- Consolidation of unit testing
- Auto tuning software

Maintenance
- Ongoing outage efficiency improvement
- Improvements to reliability
- Central fleet monitoring and diagnostic center

SI-SSA-0015-09031

E = ESTIMATE

PSEG Keys Energy Center, our new-build CCGT in SWMAAC* extends our geographic footprint in PJM

- PSEG Fossil acquired the Keys Energy Center in Maryland in June 2015
- **Construction to begin this Fall** to build a new, 755MW natural gas fired, combined-cycle gas turbine in the SWMAAC region of PJM at an estimated cost of **$825 to $875 million**
- **Commercial operation is targeted for 2018**; Keys has already cleared the 2017/2018 RPM auction
- PSEG Fossil will oversee the construction and operation of the PSEG Keys Energy Center
- PSEG Keys Energy Center project creates local construction jobs, permanent operating positions, and adds to the local tax base
- Positioned to benefit from access to new gas transportation and infrastructure additions (Dominion-Transco)

*SWMAAC = SOUTHWEST MID-ATLANTIC AREA COUNCIL - LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

SI-SSA-0015-09032

PSEG POWER
ER&T

SI-SSA-0015-09042

PSEG

We make things work for you.

Market Review: 2014 was influenced by extremes in weather highlighting the importance of winter

Q1: Periods of extreme cold temperatures resulted in high gas prices, significant basis differentials, and higher energy demand.

Q3: A cooler than normal summer, combined with increased supply of gas, reduced energy prices and basis.

SI-SSA-0015-09043

Market Review: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

Power's Gas for Generation in 2014

- PSEG Power maintains a robust portfolio of pipeline and storage assets in the Mid-Atlantic
- PSEG Power's gas for generation was ~100 BCF in 2014, of which >60% was supplied by Shale gas
- PSEG Power procured over 400 BCF in 2014 with ~75% going to PSE&G's utility gas customers
- When gas is surplus to customer needs, PSEG Power sells surplus to others; margins from such sales benefit PSE&G gas customers and PSEG Power

SI-SSA-0015-09044

Market Review: Winter Z6 gas prices retain seasonal volatility; spark spreads have continued to be robust in PJM

2015 YTD Z6

2015-2018 Z6

PJM West vs. PS Zone Spark Spreads (2013-2018)

SI-SSA-0015-09045

Market Review: New pipelines will move significant quantities of Marcellus gas out of the region by 2018

Historical and Expected Marcellus Production

Pipeline capacity grows significantly by 2018

New pipeline investment is expected to increase takeaway capacity from the low cost Marcellus/Utica shale and reduce regional surpluses and increase gas prices by 2018

SI-SSA-0015-09046

Power Basis in Eastern PJM: Expected to be volatile and negative on an annual basis for 2015 and 2016

Electric Basis is negative however it is viewed to be stabilizing and turning back to positive within 2 years due to:

- Export of ~18 bcf/day of gas which will significantly strengthen regional gas prices
- Easing of transmission constraints in Virginia/Maryland
- Construction of significant new gas-fired generation in VA/MD

ANNUAL FORWARD BASIS TO PJM-WEST AS OF AUGUST 3, 2015.
E = YTD ACTUAL PLUS FORWARD; F = FORWARD

SI-SSA-0015-09047

Regulatory Framework: Significant reforms already implemented and new rules being promulgated to improve energy and capacity market designs

	ISSUE /POLICY	OUTCOME
PJM	CAPACITY	• Higher payments for enhanced reliability (Capacity Performance)
	DEMAND RESPONSE RULES	• Stricter rules for eligibility and deployment
	ENERGY PRICE FORMATION	• PJM and FERC forcing improvements to energy price formation; higher caps
ISO-NE	CAPACITY	• Higher prices in recent auction better reflect tight supply conditions • Implementation of sloping demand curve in FCA 9 • Zonal demand curves expected in FCA 10
	ENERGY	• Demand response required to participate in Day Ahead markets • Implemented hourly offers/real time reoffers • Reserve market prices better reflect scarcity prices • 5 minute interval LMP settlements expected Q1 2016
NYISO	CAPACITY	• New Capacity Zone (LHV) leads to more accurate price signals
	ENERGY	• Improvement in price formation during reserve shortage conditions
FEDERAL	DEMAND RESPONSE	• EPSA VS. FERC and national implications; US Supreme Court will hear case
	ENVIRONMENTAL REGULATIONS	• HEDD, CPP, HAPS/MACT will lead to tightening of supply in 2015+ timeframe

SI-SSA-0015-09048

PJM Capacity Performance Proposal: aims to increase electric supply reliability

- **Capacity performance (CP)** product places emphasis on reliability, with robust performance standards, imposition of higher penalty structure and enhanced opportunities for cost recovery to encourage reliability
- **Generator performance/flexibility is key** objective for units with secure fuel supply capable of meeting more stringent operating standards
- **Elimination of 2.5% holdback offsetting weak demand growth**, making all capacity resources annual products in end state, net CONE bidding safe harbor, and the change in the demand curve (VRR) support price formation and improve resource adequacy

SI-SSA-0015-09049

Capacity Performance: >90% of PSEG's PJM capacity meets the new capacity performance standards with minimal to moderate investment

How does our fleet stack up?*

CP Compliant Assets**

SI-SSA-0015-09050

PSEG

* EXCLUDES 205MW OF PUMPED STORAGE.
** KEYS 755 MW CCGT UNIT EXPECTED TO BE CP COMPLIANT IN 2018

Northeast Portfolio: New York and New England

New England (972 MW)

- Small but dynamic market
- Significant improvement in market construct
- High volatility due to extreme (winter) weather conditions
- Significant siting and permitting challenges
- Gas pipeline infrastructure poses supply challenges/opportunity

New York (774 MW)

- Single state ISO
- Investment in new lateral to connect to the Dominion pipeline at Bethlehem Energy Center (BEC) allows for access to fuel supply from Marcellus
- Long Island Power Authority Management Contract

SI-SSA-0015-09051

Northeast Portfolio: Expanding our footprint with PSEG Long Island

PSEG Power acting as an agent for LIPA began January 2015

- Performing ISO bidding for LIPA's 6,000 MWs of generation/tolls
- Procuring natural gas and oil for the majority of these assets
- Scheduling two DC transmission cables (ISO-NE and PJM) into Long Island
- Entering into financial hedges to reduce LIPA customer's price volatility

This relationship has provided PSEG Power:

- Additional experience in Eastern NY and Connecticut markets
- Bigger natural gas footprint
- Fee-based services contract

SI-SSA-0015-09052

Capacity Market Pricing: PJM's capacity market is transitioning to recognize operating performance as well as locational value

RPM Auction Results

SI-SSA-0015-09055

PSEG Power's Value Proposition

- Well-positioned fleet of merchant generating assets in attractive markets
- Advantaged by low cost structure, fuel diversity and dispatch flexibility
- Value add from strong gas supply capability
- Significant drive by regulatory bodies to improve market constructs
- Low capital requirements to meet enhanced performance standards
- Organic growth opportunities to increase nuclear and combined cycle generation
- Hedging strategy is responsive to changing market dynamics, providing attractive returns and free cash flow

SI-SSA-0015-09056

PSEG FINANCIAL REVIEW & OUTLOOK

SI-SSA-0015-09057

PSEG

We make things work for you.

Strong financial position to support our business initiatives

2014 Financial Position

- ✓ Strong 2014 earnings growth
- ✓ Exceeded earnings guidance
- ✓ Executed major PSE&G capital program
- ✓ Strong balance sheet with no long term Parent debt
- ✓ Solid credit metrics

2015 and Beyond

- ✓ Third year of anticipated positive earnings growth in 2015
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investment program without equity issuance
- ✓ Substantial additional investment capacity
- ✓ Growth in PSE&G investments with contemporaneous/formula rate returns and new Power investment
- ✓ Consistent and strong cash flow from both Power and PSE&G
- ✓ Potential for accelerated and sustainable dividend growth

SI-SSA-0015-09058

Earnings increase of 7% exceeded guidance

SI-SSA-0015-09072

PSEG Summary

- Our 2014 earnings of $2.76 exceeded our revised operating earnings guidance of $2.60 - $2.75 per share
- Continued third year of anticipated positive earnings trend in 2015 with updated operating earnings guidance of $2.80 to $2.95 per share
- Continued 5th straight year of expected double digit, 5 year growth in rate base
- Anticipated high single digit earnings growth at PSE&G on three-year basis from 2014 to 2017, driven by transmission investments and planned programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support PSE&G's capital program and Power's new investment opportunity without the need for equity
- Our $0.08 per share dividend increase is consistent with our long history of returning cash to the shareholder through the common dividend, with potential for consistent and sustainable growth

Forward-Looking Statements

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or ongoing low pricing of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulations, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators, including prudency reviews, disallowances and changes in authorized returns,
- any deterioration in our credit quality or the credit quality of our counterparties,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations or increase the cost of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- delays or unforeseen cost escalations in our construction and development activities, or the inability to recover the carrying amount of our assets,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- increases in competition in energy supply markets as well as for transmission projects,
- changes in technology, such as distributed generation, storage and micro grids, and greater reliance on these technologies,
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- an extended economic recession,
- an inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce, and
- changes in the credit quality and the ability of lessees to meet their obligations under our domestic leveraged leases.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09098

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and material one-time items. Adjusted EBITDA excludes the same items as our Operating Earnings measure as well as income tax expense, interest expense, depreciation and amortization and major maintenance expense costs at Power's fossil generation facilities. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to Operating Earnings and Adjusted EBITDA with a reference to that slide included on each of the slides where the non-GAAP information appears.

Management uses Operating Earnings and Adjusted EBITDA in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of Operating Earnings and Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, Operating Earnings and Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of Operating Earnings and Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

From time to time, PSEG, PSE&G and Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "Email Alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and /or Really Simple Syndication (RSS) feeds regarding new postings. PSEG STRATEGY: GROWING A HIGH-QUALITY, LOW-RISK ENERGY INFRASTRUCTURE COMPANY

Dan Cregg

EXECUTIVE VICE PRESIDENT AND
CHIEF FINANCIAL OFFICER

SI-SSA-0015-09100

PSEG

We make things work for you.

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A ~$12 billion infrastructure program producing high single digit rate base growth through 2020	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow in current environment and upside from market rule improvements
2015 **Assets $24B** **Operating Earnings $787M**	2015 **Assets $12B** **Operating Earnings $653M**

SI-SSA-0015-09101

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2015. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT AND PSEG LONG ISLAND ACTIVITY. SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS

PSEG's Strategy

Investment program delivering results

Operational Excellence: Maintaining reliability and improving performance as we control costs in low price environment

Financial Strength: Strong financial position supports investment program and dividend growth

Disciplined Investment:
- Balanced business mix
- Robust pipeline of opportunities

Results:
- 3rd year of Operating EPS* growth
- Continued dividend growth
- Best in class utility growth rate
- Addition of efficient CCGT capacity enhances market position

SI-SSA-0015-09102

* SECOND YEAR OF EPS GROWTH.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: ReliabilityOne Mid-Atlantic Region's Most Reliable Electric Utility (14th consecutive year), Electric Light & Power's 2015 Utility of the Year, ReliabilityOne Outstanding Outage Response Time and Outstanding Customer Engagement • PSEG Power: Record output from combined cycle units • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Cost-control benefits continue
Financial Strength	• Operating earnings for 2015 of $2.91 per share at upper end of guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased dividend in 2015
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2016-2020) with increased investment in Transmission, Energy Strong, Gas System Modernization Program, and Electric and Gas distribution • Power capital program focusing on growth investments including Keys, Sewaren and Bridgeport Harbor, Nuclear and Fossil uprates, PennEast Pipeline, and Solar Source

Focus on building a reliable, efficient, clean energy infrastructure

2011 → 2012 → 2013 → 2014 → 2015

Selected Accomplishments

2011
- Expanded investment programs focused on infrastructure upgrades, energy efficiency, and major transmission projects*
- Sale of Texas generating assets
- Nuclear license extensions and uprates

2012
- Award winning Superstorm Sandy storm response restoring 2.1M customers
- Final federal approval for Susquehanna-Roseland transmission project
- 400 MW of new peaker capacity**

2013
- Expanded Solar investment
- 90% nuclear capacity factor for 9th straight year
- Record output from Linden CCGT and Salem 2 Nuclear Unit

2014
- Energy Strong program approved
- Advanced Gas Path uprates (through 2018)
- PSEG Long Island management contract effective

2015
- Gas System Modernization Project (GSMP) and Energy Efficiency Extension II approved
- New generation build starts Power fleet transformation
- Solar Source portfolio reaches 277 MW_{DC}***

← Cost Control →

SI-SSA-0015-09104

PSEG

* INVESTMENT CONTINUED FOR SUSQUEHANNA-ROSELAND, BURLINGTON-CAMDEN, NORTH CENTRAL RELIABILITY, AND STARTED FOR NORTHEAST GRID AND MICKLETON-GLOUCESTER. ** KEARNY AND NEW HAVEN. *** AS OF MARCH 2016.

Growth in capital spending aligned with customer needs

PSEG Capital Spending

2011 – 2015: ~$14.3 Billion | **2016E – 2020E*: ~$16.0 Billion**

*INCLUDES ALL PLANNED SPENDING. **POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. ***INCLUDES PENNEAST PIPELINE EQUITY INVESTMENT OF $0.1B. E=ESTIMATE.

SI-SSA-0015-09105

Building an efficient, clean, reliable energy platform

Timeframe	Actions taken
2011 – 2015: Transformed business mix	• Applied ~$14.3 billion towards investments • Improved credit ratings • Monetized Energy Holdings' portfolio • Strong balance sheet sustained during period of low power prices, while increasing the dividend
2016 – Forward: Strong financial position supports continued growth	• Continued dividend growth in 2016 • ~$16 billion investment program through 2020 • Utility investments focused on improving reliability and replacing aging infrastructure • Continued investment in reliable and efficient energy infrastructure at Power • Financial capability supports further expansion of the current capital plan

SI-SSA-0015-09106

PSE&G's investment program

Meeting public policy goals and customer needs

SI-SSA-0015-09107

PSEG

* DISTRIBUTION RATE BASE INCLUDES SOLAR AND ENERGY EFFICIENCY

Managing the total costs to customers while investing in the system

PSE&G Typical Residential Customer Bills*

- PSE&G customers' combined electric and gas bills declined 28% over the period
- Low gas prices and elimination of transition charges drove rate decreases

SI-SSA-0015-09108

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

Transforming Power's fleet to maintain strong market position

Economic Drivers	Outlook	Combined Cycle	Nuclear	Scrubbed Coal	Peakers	Renewable
Energy Margins	• Low natural gas and energy prices • Robust portfolio of gas pipeline contracts	✓	✓	✓	n/a	n/a
Capacity Markets	• Tightened rules proposed for capacity performance	✓	✓	✓	✓	n/a
Environmental Regulations	• Tighter air emissions standards	✓	✓	✓	✓	✓
Location	• Assets in well-designed markets, premium regions • Opportunities on brownfield sites	✓	✓	✓	✓	n/a
2016 - PSEG Power Total Capacity 11.9 GW		3.3	3.7	2.4	2.3	0.2
2019 - PSEG Power Total Capacity 13.5 GW *		5.3	3.8	2.4	1.8	0.2

- **Largest nuclear site** in the eastern U.S. and ownership in **large, fully scrubbed coal facilities** at Keystone and Conemaugh provide **economies of scale** that enhance energy margins in current low market, and provide for upside potential if prices improve
- **Dual fuel peakers** meet reliability criteria in capacity markets and provide option value in energy market. Opportunity exists to repower peakers that do not meet NJ HEDD environmental regulations
- **Combined cycle units Keys and Sewaren expected to be operational in 2018, and Bridgeport 5 expected to be operational in 2019,** will enhance emissions performance and have a combined average heat rate of approximately 6,600

SI-SSA-0015-09109

PSEG

*AS OF FEBRUARY 2016 APPROXIMATELY 1.8 GW OF CCGT GENERATION UNDER DEVELOPMENT – KEYS, SEWAREN 7 AND BRIDGEPORT HARBOR 5 , WHICH ARE TARGETED TO GO INTO SERVICE IN 2018/2019 ALONG WITH RETIREMENT OF OLDER SEWAREN UNITS.

Operating Earnings

Disciplined investment program and focus on operational excellence have supported growth

Power's diverse fuel mix and dispatch flexibility continue to generate strong earnings and free cash flow in low price environment

PSE&G's investment program has resulted in an increased contribution to PSEG's earnings

SI-SSA-0015-09110

PSEG

Focus areas over the business plan horizon

PSE&G

- **Operational excellence and cost control**
- **Capital program execution** – Transmission, Energy Strong and GSMP program
- **Regulatory framework** – Advocate for regulatory framework that provides support for long-term infrastructure programs
- **Continue to develop incremental growth opportunities**

PSEG Power

- **Operational excellence and cost control**
- **Timely and on budget construction of new growth opportunities** – Keys Energy Center, Sewaren 7 and Bridgeport Harbor
- **Strong performance at Nuclear and Fossil** to maximize fleet value in dynamic markets
- **Advocacy of constructive market rules** - Capacity markets and environmental regulations

PSEG Long Island

- **Continue execution** – Achievement of performance metrics

SI-SSA-0015-09112

PSEG's Value Proposition

- A stable platform with predictable earnings and a robust investment pipeline
- PSE&G – Best in class utility performance and growth profile
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Strong balance sheet – Supports stable credit rating, growth objectives and the potential for consistent and sustainable dividend growth

2011
- NJ Capital Infrastructure Program 2
- Energy Efficiency extension
- Major Transmission capital projects*
- Hurricane Irene/ October Snowstorm
- Mid-Atlantic ReliabilityOne Award

2012
- Hurricane Sandy storm response (2.1M customers restored)
- Transmission: Final federal approval for Susquehanna-Roseland (S-R) project
- National ReliabilityOne Excellence Award
- Mid-Atlantic ReliabilityOne Award
- EEI's Emergency Response Award

2013
- Solar Loan III
- Solar 4 All Extension
- Energy Strong program filed
- Mid-Atlantic ReliabilityOne Award
- Award for Outstanding Response to a Major Event

2014
- Energy Strong approved
- Transmission: North Central Reliability and Burlington-Camden projects placed in-service
- Bergen-Linden Corridor Upgrade project investment started
- Mid-Atlantic ReliabilityOne Award

2015
- Gas System Modernization Project (GSMP)
- Energy Efficiency Extension II
- Transmission: S-R and Mickleton-Gloucester projects placed in-service
- Mid-Atlantic ReliabilityOne Award
- Recognized for customer satisfaction by J.D. Power for both large electric and gas business service in the East

← Cost Control →

SI-SSA-0015-09117

PSEG

* INVESTMENT CONTINUED FOR SUSQUEHANNA-ROSELAND, BURLINGTON-CAMDEN, NORTH CENTRAL RELIABILITY, AND STARTED FOR NORTHEAST GRID AND MICKLETON-GLOUCESTER

Building on our track record

Operational Excellence

- Strong reliability record, with plans for further improvement
- Cost control efforts

Financial Strength

- Meeting or exceeding earnings targets
- Maintain solid investment grade credit ratings

Disciplined Investment

- 14 investment programs approved over past seven years
  - ✓ Infrastructure focused
  - ✓ Policy alignment – across administrations – Solar, EE and other
- Win-Win: Job creation, environment benefits, low commodity prices, low interest costs, labor availability, federal tax benefits

SI-SSA-0015-09118

Operational Excellence

Reliability and Customer Service

- Named most reliable electric utility in the Mid-Atlantic region for 14th consecutive year
- Recognized by PA Consulting with the Outstanding Customer Engagement and Outstanding Outage Response Time awards
- Named 2015 Utility of the Year by Electric Light & Power Magazine
- Received Star of Energy Efficiency Award

SI-SSA-0015-09119

Achieved ~11% annual earnings growth

over the past four years through implementation of supportive rate mechanisms on our expanded capital program and cost control

SI-SSA-0015-09120

Receive contemporaneous recovery on over 70% of our investments

2011-2015 PSE&G Capital Spending by Recovery Method

2016-2020E PSE&G Capital Spending by Recovery Method

FERC Formula Rates
- Transmission

Traditional Recovery Mechanisms
- Distribution Base Rates

Clause Recovery Mechanisms
- Infrastructure/ Solar/Energy Efficiency

PSEG DEFINES CONTEMPORANEOUS RECOVERY TO MEAN EITHER A FORWARD LOOKING FORMULA RATE OR A RATE THAT PROVIDES FOR CLAUSE BASED RECOVERY IN A DEFINED PERIOD PRIOR TO A BASE RATE CASE. E = ESTIMATE. INCLUDES AFUDC

SI-SSA-0015-09121

Increasing investment across our portfolio

Transmission

- Large portfolio of projects to meet ongoing reliability and life-cycle requirements

Electric Distribution

- Base spending
- Infrastructure investment programs with clause recovery
  - Energy Strong (ES) and related programs
  - Electric System Modernization Program (ESMP)

Gas Distribution

- Base spending
- Infrastructure investment programs with clause recovery
  - Energy Strong (ES) and related programs
  - Gas System Modernization Program (GSMP)

Solar and Energy Efficiency

- Recently filed with NJBPU to extend our successful Solar 4 All program, with a request to invest an additional ~$240 million to develop an additional 100 MW_{dc} of grid-connected solar capacity on landfills and brownfields by year-end 2021

SI-SSA-0015-09122

Continued identification of investment opportunities focused on improving reliability for our customers

SI-SSA-0015-09137

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-09138

Focus on transforming Power's portfolio with reliable, efficient, and cleaner energy infrastructure

2011	2012	2013	2014	2015

Selected Accomplishments

2011
- Hope Creek set annual output record
- Nuclear license extensions and uprates achieved

2012
- Peach Bottom 3 set annual output record
- Additional 400 MW of new peaker capacity at Kearny and New Haven
- Superstorm Sandy recovery initiated

2013
- Record annual output from Linden CCGT and Salem 2 Nuclear Unit
- 90% + nuclear capacity factor for 9th straight year
- Bethlehem Energy Center, 2nd gas pipeline connection added

2014
- Record annual output from Bergen CCGT
- PennEast pipeline investment
- CCGT Advanced Gas Path (AGP) uprate investment completed at Linden 1 & 2, 63 MW
- Established PSEG Long Island fuel management operations for 2015 start-up

2015
- Record CCGT fleet annual output
- Continued growth in fleet with 1,300 MW new CCGT's announced
  - Keys
  - Sewaren 7
- Prepared successful bid for 485 MW Bridgeport Harbor 5
- Projects Completed:
  - Peach Bottom EPU, 130 MW
  - Bergen 2 AGP uprate, 31 MW
- HEDD retirement
- Solar portfolio reaches 277 MW_{DC} as of March 2016

Cost Control

SI-SSA-0015-09139

PSEG Power's value is advantaged

by asset diversity, fuel flexibility and location

2015 Actual

Fuel Diversity*

Total MW: 11,678

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

Energy Market Served*

Total MW: 11,678

- Load Following, 87% dual fuel
- Peaking
- Baseload

Energy Produced*

Total GWh: 55,213

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

SI-SSA-0015-09140

PSEG

* EXCLUDES SOLAR AND KALAELOA.

**INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

Power investing $2 billion of capital in new capacity

SI-SSA-0015-09141

E=ESTIMATE. DATA AS OF MARCH 2016

Power's PJM assets are becoming more efficient

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape
- Readiness for Capacity Performance (CP), successful in CP auction

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel capability at 87% of load following and peaking units

SI-SSA-0015-09142

PSEG

* KEYS & SEWAREN 7 TO BE ADDED TO DISPATCH IN 2018E AND SEWAREN 1-4 WILL RETIRE.

PSEG Power has generating assets in three competitive markets

- Assets located near load
- Low cost portfolio with gas cost advantage
- Positioned to benefit from volatility in real-time markets
- Fleet meets new capacity performance standards
- 1,800 MW of new CCGT capacity under construction in PJM and ISO-NE

SI-SSA-0015-09143

PSEG Power developing 1,800 MW of new, efficient CCGT capacity in MD, NJ and CT

- Constructing the 755 MW CCGT Keys Energy Center in Maryland (SWMAAC*) at an estimated cost of $825 to $875 million
- Constructing a new 540 MW CCGT unit, Sewaren in New Jersey (EMAAC*) at a cost of $625 to $675 million which will replace older Sewaren units
- Constructing a new 485 MW CCGT unit, Bridgeport Harbor 5 (ISO NE), at a cost of $525 to $575 million
- Both Keys and Sewaren 7 are targeted to be in-service in 2018 and Bridgeport Harbor 5 in 2019
- Expanding civic stewardship roles and programs in neighboring communities

*SWMAAC = SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL
LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

SI-SSA-0015-09144

Power's fleet to be transformed with addition of Keys, Sewaren 7 and Bridgeport Harbor in 2018-2019

Projected Fleet Comparison 2015 to 2020E

*EXCLUDES SOLAR AND KALAELOA E = ESTIMATE **INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

SI-SSA-0015-09145

PSEG Power's fossil fleet expected to see improvements in efficiency

- AGP (Advanced Gas Path) investments
- CCGT material condition assessment
- Unit testing and testing coordination initiatives
- HEDD retirements
- Keys/Sewaren Combined Cycle Development (2018)
- Bridgeport Harbor 5 Combined Cycle Development (2019)
- Heat Rate Improvement converts to potential savings of $60-$65M in fuel expense (assuming $3/MB gas price)

SI-SSA-0015-09146

E = ESTIMATE

PSEG Power's fossil fleet …

Among the lowest emitting in the industry

- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- With the addition of new units, emissions continue to improve

Expected to reduce its carbon footprint

- Carbon emission rates projected to steadily approach EPA national pollution standards for New and Reconstructed Natural Gas Combined Cycle (1,000 lbs CO_2/MWh-gross)

SI-SSA-0015-09147

Nuclear is a critical element of our success

Hope Creek

- Operated by PSEG Nuclear
- PSEG Ownership: 100%
- Technology: Boiling Water Reactor
- Total Capacity: 1,176 MW
- Owned Capacity: 1,176 MW
- License Expiration: 2046
- Next Scheduled Refueling
  - Fall 2016
- Uprate 18MW Spring 2018

Salem Units 1 and 2

- Operated by PSEG Nuclear
- PSEG Ownership: 57%
- Technology: Pressurized Water Reactor
- Total Capacity: 2,294 MW
- Owned Capacity: 1,317 MW
- License Expiration: 2036 and 2040
- Next Scheduled Refueling
  - Unit 1 – Fall 2017
  - Unit 2 – Spring 2017

Peach Bottom Units 2 and 3

- Operated by Exelon
- PSEG Ownership: 50%
- Technology: Boiling Water Reactor
- Total Capacity: 2,502 MW
- Owned Capacity: 1,251 MW
- License Expiration: 2033 and 2034
- Next Scheduled Refueling
  - Unit 2 – Fall 2016
  - Unit 3 – Fall 2017
- Uprate: 130 MW (PS Share)
  - Unit 2 – March 2015
  - Unit 3 – December 2015

SI-SSA-0015-09148

PSEG Power's Growth Investments

Site	Project	Estimate ($ Millions)	Benefits	Status
Peach Bottom	Peach Bottom EPU (2014 – 2015)	$403	Increased capacity: 130 MW	PB2 & PB3 completed in 2015
Linden/ Bergen/ BEC	Advanced Gas Path Uprates (AGP): Linden -- 63 MW Bergen -- 31 MW BEC – 58 MW	$120	Increased capacity and improved heat rate: ~152 MW capacity increase ~1.2% heat rate improvement	Completed: Linden (2014) Bergen (2015) Planned: BEC 2017/2018E
Kearny 13 & 14	LM6000 Engine Throttle Push	--	Increased capacity: 14.5 MW	2016E
Maryland	Keys, 755 MW CCGT	$825 - $875	Geographic diversity within PJM; highly efficient gas fired unit in SWMAAC	2018E
Sewaren	Sewaren Unit 7, 540 MW CCGT	$625 - $675	Improved efficiency and reliability; replaces Sewaren 1-4 steam units	2018E
Bridgeport, CT	Bridgeport Harbor 5, 485 MW CCGT	$525 - $575	Highly efficient gas fired unit in ISO-NE	2019E
Eastern PA to Mercer, NJ	PennEast Pipeline	$123	Estimated Earnings in 2019: $13 million	Underway
Various	6 Solar Projects	$241	2016/2017E increase renewable capacity by 136 MW_{DC}/105 MW_{AC}	2016/2017E

Total New Capacity – 2,200 MW

E = ESTIMATE.

SI-SSA-0015-09149

A position in renewable energy – Power's Solar Source

Solar Source portfolio

- Utility scale solar projects in 12 states in operation or under construction
- Long-term PPA's with creditworthy counterparties
- Lump sum, full wrap EPC* agreements

Asset Optimization

- Maintain high equipment availability
- Minimize operating expenses
- Seek additional revenue streams

SI-SSA-0015-09150

* EPC = ENGINEERING PROCUREMENT & CONSTRUCTION. E = ESTIMATE.

PSEG Power has other attractive sources of revenues to round out a robust portfolio

Gas Asset Optimization

- Large wholesale provider to PSE&G and others
  - Storage capacity of approximately 75 Bcf (in the Gulf and market regions)
  - Firm transportation of 1.3 Bcf/day on seven pipelines
- Off-system sales margins shared with residential customers
- Commercial & Industrial gas sales

Ancillary Services – Black start, reactive power, area regulation

LIPA fuel and energy dispatch management – Began management of 10-year contract in 2015

Kalaeloa, HI – 50% equity interest in a 208 MW combined cycle oil unit

New Haven Peakers – 129 MW, rate based contract with ISO-NE

SI-SSA-0015-09151

PSEG Power has demonstrated ability to control O&M

Cost control actions taken:

- Fossil plant assessment
- CCGT material condition assessment
- Vendor contract renegotiations
- Nuclear security services brought in-house to control costs
- Nuclear maintenance productivity study
- Nuclear outage efficiency initiative
- Materials management
- Nuclear excellence initiative
- Nuclear staff – Right sizing

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS. E=ESTIMATE

SI-SSA-0015-09154

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO OPERATING EARNINGS. E = ESTIMATE.
UPDATED AS OF JULY 29, 2016.

PSEG Power – Delivering on priorities

Operational Excellence

- Fuel and technology-diverse fleet produced 55 TWh, 2% higher than 2014
- Nuclear capacity factor exceeded 90%; output of 30 TWh, close to 30.3 TWh is third best ever, record set in 2009
- Production records set at BEC, Linden and the CCGT fleet in total; Kearny 13 & 14 CTs
- Successful implementation of LIPA contract for fuel / generation dispatch.

Financial Strength

- Achieved earnings guidance in 2015
- Cost control programs held O&M to a 0.8% CAGR between 2011 and 2016
- Successful ongoing effort to influence outcomes in key markets showing success, e.g., price formation

Disciplined Investment

- Completed Peach Bottom EPU and AGP at Bergen 2; AGP planned for BEC in 2017/2018
- Repositioning the fleet with three new CCGTs:
  - Keys (2018)
  - Sewaren 7 (2018)
  - Bridgeport Harbor 5 (2019)
- Solar Source's portfolio is 277 MW_{DC}

SI-SSA-0015-09155

PSEG POWER
ER&T

SI-SSA-0015-09156

PSEG

We make things work for you.

Market Review: Markets in 2015 were affected by abnormal weather conditions

Q1: Periods of extremely cold temperatures resulted in high gas prices, significant basis differentials, and higher energy demand

Q2-Q4: A normal summer and mild December, combined with increased supply of gas, reduced energy prices and basis

SI-SSA-0015-09157

Market Review: YTD 2016 impacted by weather but forward gas and electric prices retain seasonal volatility

SI-SSA-0015-09158

Market Review: PSEG's extensive gas asset portfolio provides unparalleled access to Marcellus Shale gas

- PSEG Power maintains a robust portfolio of pipeline and storage assets in the Mid-Atlantic
- Marcellus Shale gas production reached 18.8 BCF/day in 2015
- PSEG Power procured over 423 BCF in 2015 with approximately 50% going to PSE&G's utility gas customers
- PSEG Power's gas for generation was 150 BCF in 2015, of which >75% was supplied by Northeast Shale gas
- Severe financial stress among the natural gas producer industry is expected to reduce production growth until gas prices rebalance to higher levels
- Investment in the PennEast pipeline expected to provide more access to Marcellus for PSEG

SI-SSA-0015-09159

Market Review: Completion of new pipeline infrastructure expected to move significant quantities of Marcellus gas out of the region by 2018

Pipeline capacity grows significantly by 2018

- Significant amount of new pipelines have already been built and more are in the advanced planning and development stage through 2018
- Gas production and pipeline takeaway capacity estimated to reach equilibrium in 2018 timeframe based on new pipeline development

SI-SSA-0015-09160

Regulatory Framework: New capacity and energy market designs in PSEG's core markets will better reward reliable generation units

	ISSUE /POLICY	OUTCOME
PJM	CAPACITY	• Higher payments for enhanced reliability (Capacity Performance) and lower energy revenues have raised absolute and relative value of capacity
	ENERGY PRICE FORMATION	• FERC is driving ISO's to improve their pricing constructs and rules – NOPRs and RTO reports addressing critical price formation issues
	DEMAND RESPONSE RULES	• Stricter rules for eligibility and deployment; focus returns to wholesale reliability/comparability after U.S. Supreme Court (SCOTUS) ruling
	STATE INTERVENTION	• SCOTUS dismissed the Maryland and New Jersey appeals in April 2016 • Ohio PPAs: FERC rescinded the previously approved waivers of the affiliate transaction standards and will review the PPAs under the affiliate abuse standards
ISO-NE	CAPACITY	• Continued tightness in capacity markets • Zonal demand curves submitted for FERC approval (FCA 11) • Nuclear and coal units under pressure; closure of Pilgrim nuclear plant
	ENERGY	• Proposed gas pipelines are receiving regulatory approvals slowly • 5 minute interval LMP settlements and fast start pricing expected Q2 2017
NYISO	CAPACITY	• Retirement of Fitzpatrick and Ginna and Western steam plants tighten market, but NYPSC directed to develop a clean energy standard that recognizes the value of nuclear
	ENERGY	• Improvement in price formation during reserve shortage conditions
FEDERAL	ENVIRONMENTAL REGULATIONS	• CPP rules stayed by SCOTUS • Some states will still prepare implementation plans for 2020+ timeframe • New PJM DR rules requiring that BTM diesel-fired generation employ environmental controls

SI-SSA-0015-09161

PSEG Power's Portfolio: Our fleet is well positioned in key markets

Right Location

with robust spark spreads

Right Technology

PSEG Power's Value Proposition

Low cost fleet	Advantaged locations	Investing to grow

- Well-positioned fleet of merchant generating assets in attractive markets
- Portfolio transformed with addition of 1,800 MWs of new efficient CCGT
- Low capital requirements to meet capacity performance standards
- Growth in fast-growing DC area
- Hedging strategy has capably protected value of assets in declining price environment providing attractive returns and free cash flow

1 - BASED ON MID-POINT OF 2016 OPERATING EARNINGS GUIDANCE. E= ESTIMATE UPDATED AS OF JULY 29, 2016.

Strong financial position to support our business initiatives in 2016 and beyond

	2016 and Beyond
Earnings	✓ Continuing strong earnings trend in 2016 with guidance of $2.80 to $3.00 per share
Investment	✓ Deploying significant capital at PSE&G for projects with contemporaneous returns ✓ Pursuing Power projects that satisfy risk adjusted return targets
Cash Flow and Credit Metrics	✓ Continuing strong internal cash flow aided by bonus depreciation ✓ Funding investment program without equity issuance
Dividends	✓ Providing $0.08 per share dividend increase in 2016 with opportunity for consistent and sustainable growth

SI-SSA-0015-09174

Growth spend represents ~75% of total investment with new investment opportunities of ~$2.0B

E = ESTIMATE; CAPITAL INCLUDES AFUDC AND IDC

SI-SSA-0015-09175

We increased our Capital Program by $3B

since last year

PSEG 5-Year Capital Spending Forecast

2015E – 2019E ~$13.0B

Increased Capital Program by $3B

2016E – 2020E ~$16.0B

- During the common 4-year forecast period of 2016 to 2019, our capital spend forecast increased by $4.1B

SI-SSA-0015-09176

E = ESTIMATE; CAPITAL INCLUDES AFUDC AND IDC

PSE&G's spending drives high single-digit growth in rate base through 2020 with known investments

E = ESTIMATE.

SI-SSA-0015-09177

Bonus Depreciation adds $1.7B cash

through 2019

- **PSE&G cash benefit of $1.2B**
  - Identified additional growth opportunities to offset rate base decrease
- **PSEG Power cash benefit of $0.5B**
  - Power's strong financial profile allows monetization of tax benefits to more efficiently invest in new generation

SI-SSA-0015-09178

Utilizing our Strong Balance Sheet

and Cash Flow to support current capital program and new potential opportunities without the need for equity

1) INCLUDES FINANCING COST, TREASURY SHARES, AND SHORT TERM DEBT POSITION
2) INCLUDES FINANCING COST
3) INCLUDES FINANCING COST AND SHORT TERM INVESTMENTS E = ESTIMATE

PSEG's credit metrics remain strong

providing substantial investment capacity to pursue additional growth opportunities

Minimum Funds From Operations / Debt
2016E – 2018E

	Power	PSEG
Estimate	Mid – 40's	Low – 20's
Minimum Threshold	30%	High - teens

Total Incremental Investment Capacity
through 2018E

- We have flexibility between Power and Parent for utilization of our Investment Capacity

E = ESTIMATE.

We have consistently identified investment opportunities beyond our approved forecasted expenditures

SI-SSA-0015-09181

Manageable Pension and OPEB Expense

with a reduction of $25 million in 2016

- Adopted the Yield curve (Spot rate) methodology for calculating 2016 pension expense
  - reduces Pension expense by $34 million
  - reduces OPEB expense by $13 million
- Historical 3-year and 5-year annualized Pension returns each exceeded 9%
- 2015 Pension funded ratio ~91%
- Annual Pension contributions ~$30M

SI-SSA-0015-09182

E = ESTIMATE.

PSEG has demonstrated ability to control O&M, with plans to keep O&M flat through 2018

SI-SSA-0015-09183

(1) POWER EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND RELATED INSURANCE PROCEEDS. NM = NOT MATERIAL
E = ESTIMATE

Opportunity for meaningful and sustainable

dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

Payout Ratio	50%	58%	56%	54%	54%	57% (1)

SI-SSA-0015-09184

(1) THE 2016 PAYOUT RATIO IS BASED ON THE MIDPOINT OF PSEG'S 2016 OPERATING EARNINGS GUIDANCE OF $2.80-$3.00E PER SHARE. E=ESTIMATE

PSEG's longer-term outlook is influenced by Power's hedge position and increased investment at PSE&G

SI-SSA-0015-09185

PSEG Summary

- 2015 Operating Earnings of $2.91 were at the upper end of our upwardly revised guidance of $2.85 - $2.95 per share
- Forecast high single-digit rate base growth at PSE&G on five year basis from 2015 to 2020, driven by investment in transmission and approved programs
- Power's investment program and continued focus on operational excellence with financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support current capital program and investment in new opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2016 is consistent with our long history of returning cash to the shareholder through the common dividend, with opportunity for consistent and sustainable growth

PSEG FINANCIAL APPENDIX

SI-SSA-0015-09194

PSEG Financial Highlights

Maintaining full-year 2016 Operating Earnings guidance of $2.80 - $3.00 per share*

- ✓ Reaching the upper end of our guidance range in 2016 will be difficult even with improvements seen in the power markets, expectations for warm summer weather, normal operations and management of O&M
- ✓ Focused on meeting customer needs for clean, reliable, efficient delivery of energy

Infrastructure Spend

- ✓ PSE&G capital spending on T&D for 2016 expected to top $3 billion
- ✓ PSE&G's Gas System Modernization Program (GSMP) and Energy Strong continue
- ✓ Keys and Sewaren CCGTs construction is on schedule and on budget
- ✓ PSE&G has identified more than $500 million of additional infrastructure spend over the current capital spending plan of $12 billion in the 2016-2020 period

Financial position remains strong

- ✓ Positive cash from Power and increasing cash flow from operations at PSE&G supports dividend growth and funds capital spending program without the need to issue equity
- ✓ Debt as a percentage of capitalization was 45% at June 30

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09204

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

These materials and other financial releases can be found on the PSEG website at www.pseg.com , under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. PSEG

We make things work for you.

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A $12 - $14 billion infrastructure program with opportunities to expand, producing high single digit rate base growth through 2021	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow and upside from market rule improvements
2016 — Assets $26B Net Income $889M	2016 — Assets $12B Net Income $18M Non-GAAP Operating Earnings* $514M

SI-SSA-0015-09207

ASSETS AND NET INCOME ARE FOR THE YEAR ENDED 12/31/2016. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO ENTERPRISE / OTHER ACTIVITY. *SEE SLIDE A FOR A RECONCILIATION OF NET INCOME TO NON-GAAP OPERATING EARNINGS AND SLIDE B FOR RECONCILIATIONS FOR PSEG POWER AND ENTERPRISE/OTHER.

PSE&G –New Jersey's largest:

- Electric and Gas Distribution utility
- Transmission business
- Investor in renewables and energy efficiency
- Appliance service provider

	Electric	Gas
Customers Growth (2012 – 2016)	2.2 Million 0.5%	1.8 Million 0.4%
2016 Electric and Gas Sales	41,580 GWh	2,360M Therms*
Projected Annual Sales Growth (2017 – 2019)**	0.3%	0.7%
Sales Mix (2016)		
Residential	33%	59%
Commercial	58%	37%
Industrial	9%	4%

PSE&G 2016 Rate Base

SI-SSA-0015-09208

PSEG

* GAS FIRM SALES ONLY.
** ESTIMATED ANNUAL GROWTH PER YEAR, ASSUMES NORMAL WEATHER.

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (326 MW_{DC}/257 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-09209

*POWER ANNOUNCED RETIREMENTS OF HUDSON AND MERCER GENERATING STATIONS AS OF JUNE 1, 2017.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: 15 consecutive years of recognition as the most reliable utility in the Mid-Atlantic region • PSEG Power: Lowest CCGT EFORd in last 5 years, while moving the fleet towards improved efficiency and environmental position • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Maintaining focus on efficiency, resiliency, and customer satisfaction
Financial Strength	• Non-GAAP Operating Earnings for 2016 at midpoint of original guidance range and upper end of revised guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased dividend in February 2017 – 13th increase in last 14 years
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2017-2021) with increased investment in Gas System Modernization Program, Electric and Gas distribution, and Energy Efficiency • Potential for additional investments in Renewables, Expanded Energy Efficiency and integration of Infrastructure with Customer Access • Power capital program focusing on growth investments including Keys Energy Center, Sewaren and Bridgeport Harbor

SI-SSA-0015-09210

PSEG Regulatory and Policy focus

on mechanisms that provide customers clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- True-up data from 2010 base rate case for known changes in customers usage, taxes, O&M and investments

Long-Term Infrastructure Investment Platform

- Seek extension of existing infrastructure programs, e.g., GSMP, and broaden investment platform

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy to recognize the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-09218

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2016 to 2021E

2021E Fuel Diversity[1]
Total MW: 11,900

2016 Fuel Diversity
Total MW: 11,577

2021E Energy Produced[1]
Total GWh: 61,000

2016 Energy Produced
Total GWh: 51,510

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

Energy Produced increases by >18%

[1] REFLECTS ANNOUNCED EARLY RETIREMENT OF HUDSON AND MERCER UNITS IN MID-2017.
ALL PERIODS EXCLUDE SOLAR (257 MW_{AC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.
**2016 COAL INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS. E= ESTIMATE.

Power's free cash flow improves as construction program ends, providing funding for growth

PSEG Power
2017E – 2021E Capital Spending (1)

PSE&G
2017E – 2021E Capital Spending (1)

(1) CAPITAL INCLUDES IDC AND AFUDC. E = ESTIMATE.

Strong credit metrics provide substantial investment capacity for increased utility investment

Average Funds From Operations / Debt
2017E – 2019E

	Power	PSEG
Estimate	~40%	Low – 20's
Minimum Threshold	30%	High - teens

Total Incremental Investment Capacity

Incremental capacity invested in utility would be matched with utility debt

SI-SSA-0015-09221

PSEG has demonstrated an ability to control O&M, with plans to reduce in 2017

(1) POWER EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON / MERCER EARLY RETIREMENT WRITE-DOWN, DISTRIBUTION EXCLUDES ELECTRIC AND GAS BAD DEBT. E = ESTIMATE.

SI-SSA-0015-09222

Strong financial position driven by PSE&G with meaningful contribution from Power

	2016 Financial Position
Earnings	✓ Delivered on 2016 guidance under challenging conditions ✓ Increased PSE&G earnings contribution
Investment	✓ Executed major PSE&G capital program balanced between Transmission and Distribution ✓ Focused on optimizing Power's generation portfolio
Cash Flow and Credit Metrics	✓ Produced stable and strong PSE&G cash from operations ✓ Generated significant cash flow at Power to fund growth investments ✓ Maintained strong credit metrics
Dividends	✓ Increased common dividend by 5% or $0.08 per share

SI-SSA-0015-09223

2017 Federal Tax Reform – PSEG is well positioned

Given positive non-utility contribution to earnings and a strong balance sheet, PSEG is well positioned for potential tax reform

Assumption	PSE&G	PSEG Power	PSEG Parent
Reduction of Corporate Tax Rate	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period	After-tax earnings and cash flow increase One-time non-cash earnings benefit from reduction in deferred tax liability	After-tax earnings and cash flow improve
100% Expensing of Capital Expenditures	Impact on rate base growth comparable to existing bonus depreciation rules	Cash flow improves	
Elimination of Deductibility of Interest Expense and Border Adjustment Tax	Change in cost anticipated to be passed through to customers	Well positioned given low debt balance Uncertainty on Border Adjustment Tax	Well positioned given low debt balance

SI-SSA-0015-09224

Opportunity for meaningful and sustainable dividend growth

SI-SSA-0015-09225

PSEG Summary

- 2016 Operating Earnings (non-GAAP) at upper end of revised guidance of $2.80 - $2.95 per share
- PSE&G capital spending provides high single-digit rate base growth for foreseeable future balanced between Transmission and Distribution
- Power expected to generate significant free cash flow following CCGT construction program and transformation to a more efficient generation fleet
- Strong balance sheet and cash flow support current capital program and new investment opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2017 demonstrates meaningful and sustainable dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

SI-SSA-0015-09226

PSEG's Value Proposition

- A stable platform with a robust investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile supporting the potential for consistent and sustainable dividend growth

SI-SSA-0015-09227

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09231

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of July 28, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. PSEG STRATEGY: GROWING A HIGH-QUALITY, FINANCIALLY SOUND ENERGY INFRASTRUCTURE COMPANY

Dan Cregg

EXECUTIVE VICE PRESIDENT AND CHIEF FINANCIAL OFFICER

PSEG

We make things work for you.

SI-SSA-0015-09233

PSEG's Value Proposition

- A stable platform with a $15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 110-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

SI-SSA-0015-09234

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A $12 - $14 billion infrastructure program with opportunities to expand, producing high single digit rate base growth through 2021	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow and upside from market rule improvements
2016 — Assets $26B Net Income $889M	2016 — Assets $12B Net Income $18M Non-GAAP Operating Earnings* $514M

** ESTIMATED ANNUAL GROWTH PER YEAR, ASSUMES NORMAL WEATHER.

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (326 MW_{DC}/257 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-09237

*POWER ANNOUNCED RETIREMENTS OF HUDSON AND MERCER GENERATING STATIONS AS OF JUNE 1, 2017.

PSEG Policy and Regulatory focus

on mechanisms that provide customers clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- True-up data from 2010 base rate case for known changes in customers usage, taxes, O&M and investments

Long-Term Infrastructure Investment Platform

- Seek extension of existing infrastructure programs, e.g., GSMP, and broaden investment platform

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy to recognize the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-09244

PSE&G – Regulatory Agreement/Filing Support Long-term Objectives

PSE&G's recent filing to extend its Gas System Modernization Program (GSMP) and an agreement reached on its proposed Energy Efficiency investment program reinforce PSE&G's commitment to provide clean, reliable energy for its customers

Gas System Modernization Program II

In July, PSE&G filed for a 5-year extension of the GSMP which would accelerate the pace of replacement of its aging cast iron and unprotected steel mains and associated service. PSE&G is proposing to invest approximately $540 million per year, or up to $2.7 billion, over the 5-year program beginning in 2019. The filing is consistent with the draft regulations that the BPU issued in June regarding Infrastructure Investment Programs.

Energy Efficiency

In July, PSE&G reached an agreement in principle with BPU Staff and Rate Counsel related to its proposed request to extend its investment in Energy Efficiency. Under the agreement, PSE&G would invest $69 million in energy efficiency equipment for hospitals, multi-family housing and other sectors and a residential energy efficiency offering for smart thermostats and data analytics. The agreement represents more than 90% of PSE&G's request.

SI-SSA-0015-09245

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2012 - 2016

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2017-2021E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth rate

SI-SSA-0015-09246

PSE&G's capital spending drives high single-digit growth in rate base

E = ESTIMATE.

SI-SSA-0015-09247

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-09248

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2016 to 2021E

2021E Fuel Diversity[1]
Total MW: 11,900

2016 Fuel Diversity
Total MW: 11,577

2021E Energy Produced[1]
Total GWh: 61,000

2016 Energy Produced
Total GWh: 51,510

Energy Produced increases by >18%

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

[1] REFLECTS RETIREMENT OF HUDSON AND MERCER UNITS ON JUNE 1, 2017.

SI-SSA-0015-09251

Opportunity for meaningful and sustainable dividend growth

SI-SSA-0015-09252

PSEG Summary

- 2016 Operating Earnings (non-GAAP) at upper end of revised guidance of $2.80 - $2.95 per share
- PSE&G capital spending provides high single-digit rate base growth for foreseeable future balanced between Transmission and Distribution
- Power expected to generate significant free cash flow following CCGT construction program and transformation to a more efficient generation fleet
- Strong balance sheet and cash flow support current capital program and new investment opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2017 demonstrates meaningful and sustainable dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

SI-SSA-0015-09253

PSEG's Value Proposition

- A stable platform with a $15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 110-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

SI-SSA-0015-09254

PSEG FINANCIAL APPENDIX

SI-SSA-0015-09255

PSEG

We make things work for you.

Q2 2017–Solid financial results at both businesses

Second Quarter Highlights

- Net Income of $0.22 vs. Net Income of $0.37 per share in Q2 2016, reflecting Hudson & Mercer retirements
- Non-GAAP Operating Earnings* of $0.62 vs. $0.57 per share in Q2 2016
- PSE&G achieved 17% growth in Q2 earnings per share over Q2 2016 – supported by increased investment in transmission and distribution, and cost containment
- PSEG Power results aided by continued cost control

Operational Excellence

- Nuclear fleet achieved a capacity factor of 89.6% for Q2 and 94.8% for H1 2017
- PSE&G named Smart Electric Power Alliance's (SEPA) 2017 Investor Owned Utility of the Year, recognizing PSE&G's Solar 4 All program and its leadership in landfill and brownfield solar development

Disciplined Capital Investment – Producing Results

- PSEG to invest ~$4.7 billion in 2017, consisting of ~$3.4 billion at PSE&G and ~$1.2 billion at PSEG Power
- Regulatory/Policy Focus: New Jersey Board of Public Utilities (BPU) actions support infrastructure investment; Energy Efficiency agreement in principle reached; $2.7 billion, 5-year Gas System Modernization Program (GSMP) extension/expansion filing
- Hudson and Mercer coal/gas generating stations retired on June 1

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending and any future rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09262

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include lists of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of May 31, 2018.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. Electric & Gas Distribution and Transmission

Strategy: Investments aligned with public policy and customer needs

Value Proposition: A $12 Billion - $15.5 Billion infrastructure program expected to produce **8%-10%** annual rate base growth through 2022

2017	Assets $29B Net Income $973M Non-GAAP Operating Earnings* $963M

Regional Competitive Generation

Strategy: Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity

Value Proposition: Provides substantial free cash flow and upside from market rule improvements

2017	Assets $12B Net Income $479M Non-GAAP Operating Earnings* $505M

SI-SSA-0015-09266

ASSETS AND NET INCOME ARE FOR THE YEAR ENDED 12/31/2017. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO ENTERPRISE / OTHER ACTIVITY. *SEE SLIDE A FOR A RECONCILIATION OF NET INCOME TO NON-GAAP OPERATING EARNINGS, SLIDE B FOR RECONCILIATIONS FOR PSE&G AND PSEG POWER.

Strategic focus produced growth in non-GAAP Operating Earnings as regulated business contribution grew to ~65%

2012	PSEG 5-Year Capital Investment Program of $18 Billion*	2017

- ✓ Regulated annual Rate Base growth of 13% to $17 Billion
- ✓ Transmission has grown to 46% of Rate Base
- ✓ Efficient growth: O&M held flat
- ✓ Overall customer bill is down

$2.44	Non-GAAP Operating Earnings +4% per year	$2.93
43%	Regulated Net Income Contribution Increased	65%
$1.42	Common Dividend Per Share +4% per year	$1.72

*CAPITAL INCLUDES YEARS 2013-2017.

SI-SSA-0015-09267

Next Steps: Building on a successful and sustainable platform that meets the needs of customers and shareholders

2018	PSEG 5-Year Capital Investment Program $14B - $17B

- ✓ Investing $12 Billion-$15.5 Billion to upgrade New Jersey infrastructure and meet NJ's Clean Energy goals
- ✓ Minimizing risk/volatility of merchant generation
- ✓ Continued cost discipline in operations
- ✓ Maintaining high customer satisfaction levels
- ✓ Tax reform benefits customers and shareholders
- ✓ Financial strength remains a core operating principle

Rate Base	Expected 8%-10% Compound Annual Growth in Rate Base through 2022
$1.80	Opportunity for Consistent and Sustainable Growth in Common Dividend

SI-SSA-0015-09268

$12B-$15.5B investment program focused on grid modernization, reliability and clean energy

E = ESTIMATE.
HASHED PORTION OF THE CHART REPRESENTS PLANS FOR EXTENSION OF ENERGY STRONG (ES2) AND A CLEAN ENERGY FUTURE (CEF) PROGRAM.

SI-SSA-0015-09269

Expanded utility investment program of $12B - $15.5B provides opportunity for rate base growth of 8% - 10%

SI-SSA-0015-09270

PSEG

E = ESTIMATE.
HASHED PORTION OF THE CHART REPRESENTS PLANS FOR EXTENSION OF ENERGY STRONG (ES2) AND A CLEAN ENERGY FUTURE (CEF) PROGRAM.

Power's generating assets mainly located in three competitive markets

- Power Ventures assets:
  - Solar (414 MW_{DC}/325 MW_{AC})
  - Kalaeloa, HI (104 MW)

- Major assets located near key load centers
- Constructing three new, highly efficient combined-cycle units
- Positioned to benefit from market volatility

SI-SSA-0015-09271

Power's fleet transformed with focus on improvement in efficiency

Projected Fleet Comparison 2017 to 2022E

[1] REFLECTS RETIREMENT OF HUDSON AND MERCER UNITS IN JUNE 2017
E=ESTIMATE

SI-SSA-0015-09272

Regulatory/legislative policy initiatives strengthen foundation for providing clean, affordable and resilient energy supply

Base Rate Case Provides Opportunity for Long-Term Rate Stability

- Decision expected in Q4 2018

NJ regulators endorse streamlined process supporting long-term investment

- GSMP II Approved; ES II Filing Shortly

NJ Advances Clean Energy Future

- PSEG Power will request NJBPU determination of eligibility for our NJ nuclear plants to receive Zero Emission Certificates
- PSE&G plans to accelerate investment in Energy Efficiency, Energy Storage and EVs

FERC/PJM Wholesale Market Reforms Underway

- Fast start pricing reform expected in 2018

SI-SSA-0015-09273

NJ Zero Emission Certificates (ZEC) support carbon free nuclear generation

- ✓ Legislation signed by New Jersey Governor Murphy on May 23
- ✓ Starts a 330-Day process – NJ Board of Public Utilities to determine eligibility and selection of nuclear plants eligible for ZECs
- ✓ Hope Creek and Salem produce >90% of NJ's carbon free generation, support ~6,000 jobs, and benefit fuel diversity and grid reliability

SI-SSA-0015-09274

Zero Emission Certificate (ZEC) Process

2018	2019	2020

Enacted May 23 (Day One)

November 2018 (Day 180), BPU issues Order establishing ZEC program

April 2019 (Day 330), BPU ranks applicants and selects plants to receive ZECs. Utilities begin purchasing ZECs for 'stub' period. Cash payment follows

During 'stub' period (end of energy year), ZECs earned through May 31

Within 90 days of May 31, cash payment occurs for ZECs earned during 'stub' period

June 2019, utilities purchase ZECs for new energy year, with cash payment within 90 days of the energy year ending May 31, 2020

Subsequent years work the same

Annual revenues estimated at ~$200 million, or ~$0.28 per share if all three NJ units are selected

SI-SSA-0015-09275

PSEG's future direction aligned with customer needs and NJ's Clean Energy agenda

2012-2017	2018 – 2022	Utility of the Future
Transmission expansion Storm hardening and resiliency New peaking generation and generation uprates Regulated & Unregulated Renewables	Upgrade aging infrastructure and Transmission Storm hardening and resiliency New, efficient CCGTs Clean Energy Legislation • Expanded Energy Efficiency • EV infrastructure • Battery storage Regulated & Unregulated Renewables	Clean Energy Legislation • Expanded Energy Efficiency • EV infrastructure • Battery storage Greater use of technology to enhance 2-way customer communication; AMI Regulated Renewables

SI-SSA-0015-09276

NJ has advanced a new Clean Energy agenda

Energy Policy	Description	Investment Opportunity for PSEG
Energy Efficiency (EE)	• Requires electric utilities to reduce energy consumption by 2% and gas utilities to reduce energy consumption by 0.75% from average annual usage over prior 3-year period within 5 years • Allows utilities to recover "reasonable and prudent costs" including return of and on capital and revenue impact of lost sales	☑
Renewable Portfolio Standard (RPS)	• Increases percentage of energy to be supplied from renewable energy resources to 50% by 2030	☑
Solar	• Annual solar requirement increases to 4.8% in 2025 before declining to 4.5% in 2026 and 1.1% in 2033 as net metering cap increased to 5.8% from 2.9% • BPU must complete a study on how to modify/replace SREC program by 24 months after enactment	☑
Community Solar	• BPU must develop rules and regulations establishing a "Community Solar Energy Pilot Program"	☑
Offshore Wind (OSW)	• BPU to establish Offshore Renewable Energy Certificate (OREC) to support 3,500 MW by 2030 • Allows OSW projects to receive tax credits from the Energy Development Agency (EDA) • NJ Dept. of Labor directed to develop job training programs to support OSW development	☑
Energy Storage	• BPU to provide Governor and Legislature with analysis of "energy storage needs and opportunities" • BPU to initiate process within six months of delivering report that establishes a process and mechanism for achieving 600 MW of energy storage by 2021 and 2,000 MW by 2030	☑
EV Infrastructure	• Charging stations and related infrastructure for workplace, multi-family and travel corridors	☑

SI-SSA-0015-09277

Partnership for a Clean Energy Future:

~$2.9 Billion investment program to provide cost-effective and innovative solutions supporting NJ's clean energy goals

- **Energy Efficiency**: Residential and C&I programs to lower energy bills and combat climate change
  - Savings targeting 2% electric and 0.75% gas savings consistent with NJ Clean Energy Legislation
- **Electric Vehicles**: "Smart" electric vehicle infrastructure: residential, workplace, multi-family, travel corridors
- **Battery Storage**: Utility-scale systems to defer traditional distribution investment, enable additional solar, and enhance critical infrastructure resiliency

Program Investment	$ Billion
Energy Efficiency	$2.5
Electric Vehicles	$0.3
Battery Storage	$0.1
Investment Total	$2.9

- 6-year investment program starting in 2019
- Seeking contemporaneous recovery
- Contingent on approval of decoupling
- Expect to file in the near-term

SI-SSA-0015-09278

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~20% since our last rate case, 30% adjusted for inflation
- Also provided BGSS bill credits totaling ~$680 per customer since 2012

- Regional price comparison** - Gas is 2nd lowest and Electric is lower than average
- Distribution revenue component is the lowest in the state for Gas and second lowest for Electric
- Investing at the filing levels of the infrastructure extension and clean energy future programs will keep rates under 2010 levels for over a decade (adjusted for growth in CPI)

SI-SSA-0015-09279

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

Forward-Looking Statements

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or ongoing low pricing of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulations, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators, including prudency reviews and disallowances,
- any deterioration in our credit quality or the credit quality of our counterparties,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations or increase the cost of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- delays or unforeseen cost escalations in our construction and development activities, or the inability to recover the carrying amount of our assets,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- increases in competition in energy supply markets as well as for transmission projects,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies,
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- an extended economic recession,
- an inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce, and
- changes in the credit quality and the ability of lessees to meet their obligations under our domestic leveraged leases.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.
The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09290

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items.

PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. The last two slides in this presentation (Slides A and B) include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

Focus on building a reliable, efficient, clean energy infrastructure

2011	2012	2013	2014	2015

Selected Accomplishments

2011
- Expanded investment programs focused on infrastructure upgrades, energy efficiency, and major transmission projects*
- Sale of Texas generating assets
- Nuclear license extensions and uprates

2012
- Award winning Superstorm Sandy storm response restoring 2.1M customers
- Final federal approval for Susquehanna-Roseland transmission project
- 400 MW of new peaker capacity**

2013
- Expanded Solar investment
- 90% nuclear capacity factor for 9th straight year
- Record output from Linden CCGT and Salem 2 Nuclear Unit

2014
- Energy Strong program approved
- Advanced Gas Path uprates (through 2018)
- PSEG Long Island management contract effective

2015
- Gas System Modernization Project (GSMP) and Energy Efficiency Extension II approved
- New generation build starts Power fleet transformation
- Solar Source portfolio reaches 277 MW_{DC}***

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

Transforming Power's fleet to maintain strong market position

Economic Drivers	Outlook	Combined Cycle	Nuclear	Scrubbed Coal	Peakers	Renewable
Energy Margins	• Low natural gas and energy prices • Robust portfolio of gas pipeline contracts	✓	✓	✓	n/a	n/a
Capacity Markets	• Tightened rules proposed for capacity performance	✓	✓	✓	✓	n/a
Environmental Regulations	• Tighter air emissions standards	✓	✓	✓	✓	✓
Location	• Assets in well-designed markets, premium regions • Opportunities on brownfield sites	✓	✓	✓	✓	n/a
2016 - PSEG Power Total Capacity 11.9 GW		3.3	3.7	2.4	2.3	0.2
2019 - PSEG Power Total Capacity 13.5 GW *		5.3	3.8	2.4	1.8	0.2

- **Largest nuclear site** in the eastern U.S. and ownership in **large, fully scrubbed coal facilities** at Keystone and Conemaugh provide **economies of scale** that enhance energy margins in current low market, and provide for upside potential if prices improve
- **Dual fuel peakers** meet reliability criteria in capacity markets and provide option value in energy market. Opportunity exists to repower peakers that do not meet NJ HEDD environmental regulations
- **Combined cycle units Keys and Sewaren expected to be operational in 2018, and Bridgeport 5 expected to be operational in 2019,** will enhance emissions performance and have a combined average heat rate of approximately 6,600

SI-SSA-0015-09301

*AS OF FEBRUARY 2016 APPROXIMATELY 1.8 GW OF CCGT GENERATION UNDER DEVELOPMENT – KEYS, SEWAREN 7 AND BRIDGEPORT HARBOR 5 , WHICH ARE TARGETED TO GO INTO SERVICE IN 2018/2019 ALONG WITH RETIREMENT OF OLDER SEWAREN UNITS.

Operating Earnings

Disciplined investment program and focus on operational excellence have supported growth

Power's diverse fuel mix and dispatch flexibility continue to generate strong earnings and free cash flow in low price environment

PSE&G's investment program has resulted in an increased contribution to PSEG's earnings

SI-SSA-0015-09302

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. E=ESTIMATE ** 2016 PERCENTS USE MIDPOINT OF 2016 OPERATING EARNINGS GUIDANCE.

Focus areas over the business plan horizon

PSE&G
• **Operational excellence and cost control** • **Capital program execution** – Transmission, Energy Strong and GSMP program • **Regulatory framework** – Advocate for regulatory framework that provides support for long-term infrastructure programs • **Continue to develop incremental growth opportunities**

PSEG Power
• **Operational excellence and cost control** • **Timely and on budget construction of new growth opportunities** – Keys Energy Center, Sewaren 7 and Bridgeport Harbor • **Strong performance at Nuclear and Fossil** to maximize fleet value in dynamic markets • **Advocacy of constructive market rules** - Capacity markets and environmental regulations

PSEG Long Island
• **Continue execution** – Achievement of performance metrics

SI-SSA-0015-09304

PSEG's Value Proposition

- A stable platform with predictable earnings and a robust investment pipeline
- PSE&G – Best in class utility performance and growth profile
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Strong balance sheet – Supports stable credit rating, growth objectives and the potential for consistent and sustainable dividend growth

SI-SSA-0015-09305

PSE&G

PSE&G strategy

Building a sustainable platform that balances reliability, customer rates and public policy to ensure growth at reasonable returns

SI-SSA-0015-09308

PSE&G's focus on meeting customer reliability and policy objectives are key to our investment strategy

2011 → 2012 → 2013 → 2014 → 2015

Selected Accomplishments

2011
- NJ Capital Infrastructure Program 2
- Energy Efficiency extension
- Major Transmission capital projects*
- Hurricane Irene/ October Snowstorm
- Mid-Atlantic ReliabilityOne Award

2012
- Hurricane Sandy storm response (2.1M customers restored)
- Transmission: Final federal approval for Susquehanna-Roseland (S-R) project
- National ReliabilityOne Excellence Award
- Mid-Atlantic ReliabilityOne Award
- EEI's Emergency Response Award

2013
- Solar Loan III
- Solar 4 All Extension
- Energy Strong program filed
- Mid-Atlantic ReliabilityOne Award
- Award for Outstanding Response to a Major Event

2014
- Energy Strong approved
- Transmission: North Central Reliability and Burlington-Camden projects placed in-service
- Bergen-Linden Corridor Upgrade project investment started
- Mid-Atlantic ReliabilityOne Award

2015
- Gas System Modernization Project (GSMP)
- Energy Efficiency Extension II
- Transmission: S-R and Mickleton-Gloucester projects placed in-service
- Mid-Atlantic ReliabilityOne Award
- Recognized for customer satisfaction by J.D. Power for both large electric and gas business service in the East

← Cost Control →

* INVESTMENT CONTINUED FOR SUSQUEHANNA-ROSELAND, BURLINGTON-CAMDEN, NORTH CENTRAL RELIABILITY, AND STARTED FOR NORTHEAST GRID AND MICKLETON-GLOUCESTER

SI-SSA-0015-09309

Building on our track record

Operational Excellence

- Strong reliability record, with plans for further improvement
- Cost control efforts

Financial Strength

- Meeting or exceeding earnings targets
- Maintain solid investment grade credit ratings

Disciplined Investment

- 14 investment programs approved over past seven years
  - ✓ Infrastructure focused
  - ✓ Policy alignment – across administrations – Solar, EE and other
- Win-Win: Job creation, environment benefits, low commodity prices, low interest costs, labor availability, federal tax benefits

SI-SSA-0015-09310

Operational Excellence

Reliability and Customer Service

- Named most reliable electric utility in the Mid-Atlantic region for 14th consecutive year
- Recognized by PA Consulting with the Outstanding Customer Engagement and Outstanding Outage Response Time awards
- Named 2015 Utility of the Year by Electric Light & Power Magazine
- Received Star of Energy Efficiency Award

SI-SSA-0015-09311

Achieved ~11% annual earnings growth

over the past four years through implementation of supportive rate mechanisms on our expanded capital program and cost control

PSE&G Operating Earnings Per Share

SI-SSA-0015-09312

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-09329

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-09330

Focus on transforming Power's portfolio with reliable, efficient, and cleaner energy infrastructure

Selected Accomplishments

2011

- Hope Creek set annual output record
- Nuclear license extensions and uprates achieved

2012

- Peach Bottom 3 set annual output record
- Additional 400 MW of new peaker capacity at Kearny and New Haven
- Superstorm Sandy recovery initiated

2013

- Record annual output from Linden CCGT and Salem 2 Nuclear Unit
- 90% + nuclear capacity factor for 9th straight year
- Bethlehem Energy Center, 2nd gas pipeline connection added

2014

- Record annual output from Bergen CCGT
- PennEast pipeline investment
- CCGT Advanced Gas Path (AGP) uprate investment completed at Linden 1 & 2, 63 MW
- Established PSEG Long Island fuel management operations for 2015 start-up

2015

- Record CCGT fleet annual output
- Continued growth in fleet with 1,300 MW new CCGT's announced
  - Keys
  - Sewaren 7
- Prepared successful bid for 485 MW Bridgeport Harbor 5
- Projects Completed:
  - Peach Bottom EPU, 130 MW
  - Bergen 2 AGP uprate, 31 MW
- HEDD retirement
- Solar portfolio reaches 277 MW_{DC} as of March 2016

Cost Control

SI-SSA-0015-09331

PSEG Power's value is advantaged

by asset diversity, fuel flexibility and location

2015 Actual

Fuel Diversity*
Total MW: 11,678

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

Energy Market Served*
Total MW: 11,678

- Load Following, 87% dual fuel
- Peaking
- Baseload

Energy Produced*
Total GWh: 55,213

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

SI-SSA-0015-09332

PSEG

* EXCLUDES SOLAR AND KALAELOA.
**INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

Power investing $2 billion of capital in new capacity

E=ESTIMATE. DATA AS OF MARCH 2016

SI-SSA-0015-09333

Power's PJM assets are becoming more efficient

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape
- Readiness for Capacity Performance (CP), successful in CP auction

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel capability at 87% of load following and peaking units

SI-SSA-0015-09334

PSEG

* KEYS & SEWAREN 7 TO BE ADDED TO DISPATCH IN 2018E AND SEWAREN 1-4 WILL RETIRE.

PSEG Power has generating assets in three competitive markets

- Assets located near load
- Low cost portfolio with gas cost advantage
- Positioned to benefit from volatility in real-time markets
- Fleet meets new capacity performance standards
- 1,800 MW of new CCGT capacity under construction in PJM and ISO-NE

SI-SSA-0015-09335

PSEG Power developing 1,800 MW of new, efficient CCGT capacity in MD, NJ and CT

- Constructing the 755 MW CCGT Keys Energy Center in Maryland (SWMAAC*) at an estimated cost of $825 to $875 million
- Constructing a new 540 MW CCGT unit, Sewaren in New Jersey (EMAAC*) at a cost of $625 to $675 million which will replace older Sewaren units
- Constructing a new 485 MW CCGT unit, Bridgeport Harbor 5 (ISO NE), at a cost of $525 to $575 million
- Both Keys and Sewaren 7 are targeted to be in-service in 2018 and Bridgeport Harbor 5 in 2019
- Expanding civic stewardship roles and programs in neighboring communities

*SWMAAC = SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL
LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

SI-SSA-0015-09336

Power's fleet to be transformed with addition of Keys, Sewaren 7 and Bridgeport Harbor in 2018-2019

Projected Fleet Comparison 2015 to 2020E

*EXCLUDES SOLAR AND KALAELOA E = ESTIMATE **INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

SI-SSA-0015-09337

PSEG Power's fossil fleet expected to see improvements in efficiency

- AGP (Advanced Gas Path) investments
- CCGT material condition assessment
- Unit testing and testing coordination initiatives
- HEDD retirements
- Keys/Sewaren Combined Cycle Development (2018)
- Bridgeport Harbor 5 Combined Cycle Development (2019)
- Heat Rate Improvement converts to potential savings of $60-$65M in fuel expense (assuming $3/MB gas price)

SI-SSA-0015-09338

PSEG Power's fossil fleet …

Among the lowest emitting in the industry

- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- With the addition of new units, emissions continue to improve

Expected to reduce its carbon footprint

- Carbon emission rates projected to steadily approach EPA national pollution standards for New and Reconstructed Natural Gas Combined Cycle (1,000 lbs CO_2/MWh-gross)

SI-SSA-0015-09339

Nuclear is a critical element of our success

Hope Creek

- Operated by PSEG Nuclear
- PSEG Ownership: 100%
- Technology: Boiling Water Reactor
- Total Capacity: 1,176 MW
- Owned Capacity: 1,176 MW
- License Expiration: 2046
- Next Refueling
  - Fall 2016
- Uprate 18MW Spring 2018

Salem Units 1 and 2

- Operated by PSEG Nuclear
- PSEG Ownership: 57%

Various	6 Solar Projects	$241	2016/2017E increase renewable capacity by 136 MW_{DC}/105 MW_{AC}	2016/2017E

Total New Capacity – 2,200 MW

E = ESTIMATE.

SI-SSA-0015-09341

A position in renewable energy – Power's Solar Source

Solar Source portfolio

- Utility scale solar projects in 12 states in operation or under construction
- Long-term PPA's with creditworthy counterparties
- Lump sum, full wrap EPC* agreements

Asset Optimization

- Maintain high equipment availability
- Minimize operating expenses
- Seek additional revenue streams

SI-SSA-0015-09342

* EPC = ENGINEERING PROCUREMENT & CONSTRUCTION. E = ESTIMATE.

PSEG Power has other attractive sources of revenues to round out a robust portfolio

Gas Asset Optimization

- Large wholesale provider to PSE&G and others
  - Storage capacity of approximately 75 Bcf (in the Gulf and market regions)
  - Firm transportation of 1.3 Bcf/day on seven pipelines
- Off-system sales margins shared with residential customers
- Commercial & Industrial gas sales

Ancillary Services – Black start, reactive power, area regulation

LIPA fuel and energy dispatch management – Began management of 10-year contract in 2015

Kalaeloa, HI – 50% equity interest in a 208 MW combined cycle oil

New Haven Peakers – 129 MW, rate based contract with ISO-NE

SI-SSA-0015-09343

PSEG Power has demonstrated ability to control O&M

Cost control actions taken:

- Fossil plant assessment
- CCGT material condition assessment
- Vendor contract renegotiations
- Nuclear security services brought in-house to control costs
- Nuclear maintenance productivity study
- Nuclear outage efficiency initiative
- Materials management
- Nuclear excellence initiative
- Nuclear staff – Right sizing

SI-SSA-0015-09346

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO OPERATING EARNINGS. E = ESTIMATE.

PSEG Power – Delivering on priorities

Operational Excellence

- Fuel and technology-diverse fleet produced 55 TWh, 2% higher than 2014
- Nuclear capacity factor exceeded 90%; output of 30 TWh, close to 30.3 TWh is third best ever, record set in 2009
- Production records set at BEC, Linden and the CCGT fleet in total; Kearny 13 & 14 CTs
- Successful implementation of LIPA contract for fuel / generation dispatch.

Financial Strength

- Achieved earnings guidance in 2015
- Cost control programs held O&M to a 0.8% CAGR between 2011 and 2016
- Successful ongoing effort to influence outcomes in key markets showing success, e.g., price formation

Disciplined Investment

- Completed Peach Bottom EPU and AGP at Bergen 2; AGP planned for BEC in 2017/2018
- Repositioning the fleet with three new CCGTs:
  - Keys (2018)
  - Sewaren 7 (2018)
  - Bridgeport Harbor 5 (2019)
- Solar Source's portfolio is 277 MW_{DC}

SI-SSA-0015-09347

PSEG POWER
ER&T

SI-SSA-0015-09348

PSEG

We make things work for you.

Market Review: Markets in 2015 were affected by abnormal weather conditions

Q1: Periods of extremely cold temperatures resulted in high gas prices, significant basis differentials, and higher energy demand

Q2-Q4: A normal summer and mild December, combined with increased supply of gas, reduced energy prices and basis

SI-SSA-0015-09349

Market Review: Q1 2016 impacted by weather but forward gas and electric prices retain seasonal volatility

SI-SSA-0015-09350

Market Review: PSEG's extensive gas asset portfolio provides unparalleled access to Marcellus Shale gas

- PSEG Power maintains a robust portfolio of pipeline and storage assets in the Mid-Atlantic
- Marcellus Shale gas production reached 18.8 BCF/day in 2015
- PSEG Power procured over 423 BCF in 2015 with approximately 50% going to PSE&G's utility gas customers
- PSEG Power's gas for generation was 150 BCF in 2015, of which >75% was supplied by Northeast Shale gas
- Severe financial stress among the natural gas producer industry is expected to reduce production growth until gas prices rebalance to higher levels
- Investment in the PennEast pipeline expected to provide more access to Marcellus for PSEG

SI-SSA-0015-09351

Market Review: Completion of new pipeline infrastructure expected to move significant quantities of Marcellus gas out of the region by 2018

Pipeline capacity grows significantly by 2018

- Significant amount of new pipelines have already been built and more are in the advanced planning and development stage through 2018
- Gas production and pipeline takeaway capacity estimated to reach equilibrium in 2018 timeframe based on new pipeline development

SI-SSA-0015-09352

Regulatory Framework: New capacity and energy market designs in PSEG's core markets will better reward reliable generation units

	ISSUE /POLICY	OUTCOME
PJM	CAPACITY	• Higher payments for enhanced reliability (Capacity Performance) and lower energy revenues have raised absolute and relative value of capacity
	ENERGY PRICE FORMATION	• FERC is driving ISO's to improve their pricing constructs and rules – NOPRs and RTO reports addressing critical price formation issues
	DEMAND RESPONSE RULES	• Stricter rules for eligibility and deployment; focus returns to wholesale reliability/comparability after U.S. Supreme Court (SCOTUS) ruling
	STATE INTERVENTION	• SCOTUS dismissed the Maryland and New Jersey appeals in April 2016 • Ohio PPAs: FERC rescinded the previously approved waivers of the affiliate transaction standards and will review the PPAs under the affiliate abuse standards
ISO-NE	CAPACITY	• Continued tightness in capacity markets • Zonal demand curves submitted for FERC approval (FCA 11) • Nuclear and coal units under pressure; closure of Pilgrim nuclear plant
	ENERGY	• Proposed gas pipelines are receiving regulatory approvals slowly • 5 minute interval LMP settlements and fast start pricing expected Q2 2017
NYISO	CAPACITY	• Retirement of Fitzpatrick and Ginna and Western steam plants tighten market, but NYPSC directed to develop a clean energy standard that recognizes the value of nuclear
	ENERGY	• Improvement in price formation during reserve shortage conditions
FEDERAL	ENVIRONMENTAL REGULATIONS	• CPP rules stayed by SCOTUS • Some states will still prepare implementation plans for 2020+ timeframe • New PJM DR rules requiring that BTM diesel-fired generation employ environmental controls

SI-SSA-0015-09353

PSEG Power's Portfolio: New York and New England

New York (757 MW)

- Single state ISO
- Multiple gas supplies to BEC gives fuel flexibility and access to Marcellus
- Long Island Power Authority Management Contract

New England (976 MW plus 485 MW new build)

- Small but dynamic market
- Significant improvement in market construct
- Ongoing potential for volatility in extreme (winter) weather conditions
- PSEG Bridgeport Coal plant retirement in 2021
- Gas pipeline infrastructure poses supply challenges/opportunity

+INCLUDES 485 MW NEW BUILD
*SUMMER INSTALLED GENERATING CAPACITY AS OF DECEMBER 31,2015

SI-SSA-0015-09355

Capacity Market Pricing: PJM's capacity market is transitioning to recognize operating performance as well as locational value

PJM's RPM Auction Results				
($/MW-day)	2015 / 2016*	2016 / 2017*+	2017 / 2018+	2018 /2019
Power's Average Prices	$168	$172	$177	$215

SI-SSA-0015-09377

PSEG Summary

- 2015 earnings of $2.91 were at the upper end of our upwardly revised operating earnings guidance of $2.85 - $2.95 per share
- Forecast growth at PSE&G supports our 2016 guidance of $2.80 to $3.00 per share
- Forecast high single-digit rate base growth at PSE&G on five year basis from 2015 to 2020, driven by investment in transmission and approved programs
- Power's investment program and continued focus on operational excellence with financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support current capital program and investment in new opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2016 is consistent with our long history of returning cash to the shareholder through the common dividend, with opportunity for consistent and sustainable growth

PSEG Financial Highlights

Maintaining 2016 Operating Earnings* guidance of $2.80 - $3.00 per share

- ✓ Focused on maintaining operating efficiency and customer reliability
- ✓ Salem Q2 refueling outage extended to replace and repair baffle bolts in reactor vessel
- ✓ PSE&G expected to contribute over 60% of 2016 Operating Earnings*

Infrastructure spend

- ✓ PSE&G T&D spend for 2016 expected to be $3 billion
- ✓ Power has begun construction of its CCGT units in Maryland and New Jersey

Financial position remains strong

- ✓ Positive cash from Power and increasing cash flow from operations at PSE&G support dividend growth and fund capital spending program without the need to issue equity
- ✓ Debt as a percentage of capitalization was 44% at March 31

Increased common dividend 5.1% to indicative annual rate of $1.64 per share

- ✓ Increasing regulated earnings mix supports opportunity for dividend growth

PSEG

We make things work for you.

Daniel Cregg

EXECUTIVE VICE PRESIDENT AND CHIEF FINANCIAL OFFICER

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED, PUBLIC SERVICE ELECTRIC AND GAS COMPANY, PSEG POWER LLC AND PSEG SERVICES CORPORATION

Daniel J. Cregg was named executive vice president and chief financial officer for Public Service Enterprise Group Incorporated (PSEG) and its subsidiaries in October 2015.

Mr. Cregg is responsible for all financial functions, including Internal Audit Services, Investor Relations and Corporate Development. Given the array of financial instruments which serve as the primary means of selling wholesale energy to customers, Mr. Cregg also has responsibility for the Risk Management function, which provides independent oversight of the PSEG Power trading organization. In addition to finance, Mr. Cregg is responsible for the Strategy and Planning function. He is a member of PSEG's Executive Officer Group.

Prior to his current position, Mr. Cregg was vice president – finance for PSE&G, a role he assumed in June 2013. In 2006, Mr. Cregg was named vice president – finance for PSEG Power. In that capacity and in previous financial roles for Power, Mr. Cregg held leadership positions related to financial reporting and forecasting, investor communications, financings, rating agency interactions, external reporting, cash forecasting, financial valuations, competitive intelligence, and fundamental market modeling, with critical responsibilities in Power's development and strategic planning activities.

Previously, Mr. Cregg was director of PSEG corporate development. He joined PSEG in 1991 with overall responsibility for tax planning, strategy and compliance for PSEG Energy Holdings, including domestic and international tax structuring work for PSEG Global and PSEG Resources.

Before joining PSEG, Mr. Cregg spent five years with the accounting and consulting firm of Deloitte and Touche, providing consulting services to a wide range of clients with an emphasis on the energy industry.

Mr. Cregg holds a Master of Business Administration degree from the Wharton School of the University of Pennsylvania and is a graduate of Lehigh University, where he received a bachelor's degree in accounting.

SI-SSA-0015-09394

Kathleen Lally

VICE PRESIDENT – INVESTOR RELATIONS

PSEG SERVICES CORPORATION

Kathleen A. Lally was named vice president – investor relations of PSEG Services Corporation in January 2007.

Prior to joining PSEG Ms. Lally was a portfolio manager at the investment firm of Angelo Gordon & Company. She has extensive and diverse Wall Street experience, on both the buy side as an investor and sell side as an equity research analyst. She has worked on the buy side at JK Utility Advisory and Silcap, and has sell side experience at firms such as Salomon Brothers, Brown Brothers Harriman and DLJ-Pershing.

Ms. Lally currently serves on the Board of the NJ Chapter of the Leukemia & Lymphoma Society. Ms. Lally holds a Bachelor of Arts degree in political science from St. Peter's College and is a chartered financial analyst.

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as for transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies, and
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09399

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Income from Continuing Operations/Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP.
PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends.

PSEG is presenting Adjusted EBITDA because it provides investors with additional information to compare our business performance to other companies and understand performance trends. Adjusted EBITDA excludes the same items as our Operating Earnings measure as well as income tax expense, interest expense, depreciation and amortization and major maintenance expense costs at Power's fossil generation facilities. This information is not intended to be viewed as an alternative to GAAP information. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings and Adjusted EBITDA with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

PSEG OVERVIEW

Ralph LaRossa

PRESIDENT & CHIEF OPERATING OFFICER
PSE&G

Kathleen Lally

VICE PRESIDENT
INVESTOR RELATIONS

PSEG

We make things work for you.

SI-SSA-0015-09401

PSEG's Strategy

Investment program delivering results

Operational Excellence: Maintaining reliability and improving performance as we control costs in low price environment

Financial Strength: Strong financial position supports investment program and dividend growth

Disciplined Investment:
- Balanced business mix
- Robust pipeline of opportunities

Results:
- Project 3rd year of EPS growth
- Increased rate of dividend growth
- Best in class utility growth rate
- Addition of efficient CCGT capacity enhances market position
- Upside potential from power markets

SI-SSA-0015-09402

Two complementary businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A $12 billion infrastructure program – focused on transmission – produces double-digit rate base growth through 2019	**Strategy:** Investment program enhances competitive position with addition of efficient CCGT capacity **Value Proposition:** Provides substantial free cash flow in current environment and upside from market rule improvements
2014 Assets $22B Operating Earnings $725M	2014 Assets $12B Operating Earnings $642M

SI-SSA-0015-09403

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2014.
PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT AND PSEG LONG ISLAND ACTIVITY.
SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: Mid-Atlantic Reliability Award (13th consecutive year), top ranked among eastern electric and gas utilities in business customer satisfaction • PSEG Power: Record output from combined cycle units • PSEG Long Island: Demonstrated management and integration capability through a successful transition in first year • PSEG: Cost-control benefits continue
Financial Strength	• Updated operating earnings guidance for 2015 to $2.80-$2.95 per share from $2.75-$2.95 per share • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased rate of dividend growth in 2015
Disciplined Investment	• PSE&G ✓ Capital program = rate base growth of 11% over 5 years with increased investment in Transmission; Electric and Gas distribution; and Gas System Modernization Program • Power: Keys & Sewaren CCGTs, uprates, PennEast Pipeline, and Solar Source

SI-SSA-0015-09404

Robust pipeline of investment opportunities

supports >20% growth in capital spending over the period

PSEG Capital Spending

2010 – 2014: $12.6 Billion | **2015E - 2019E*: $15.6Billion**

SI-SSA-0015-09405

PSEG

*INCLUDES ALL PLANNED SPENDING. **ENERGY STRONG EXCLUDES RISK AND CONTINGENCY. ***POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. ****INCLUDES PENNEAST PIPELINE EQUITY INVESTMENT OF $0.1B. E=ESTIMATE. DATA AS OF SEPTEMBER 2015.

Balance sheet strength supports capital allocation

Timeframe	Actions taken
2010 – 2014: Transformed business mix	• Applied $16 billion towards investments and dividends • Improved credit ratings • Monetized Energy Holdings' portfolio • Strong balance sheet sustained during period of low power prices, while increasing the dividend
2015 – Forward: Strong financial position supports continued growth	• Increased rate of dividend growth in 2015 • **$15.5 billion+** investment program through 2019 • Gas System Modernization Program settlement of ~ $900 million of capital investment through 2019 • Financial capability supports further expansion of the current capital plan

SI-SSA-0015-09406

PSE&G's investment program

Meeting public policy goals and customer needs

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/ NET INCOME TO RECONCILE TO OPERATING EARNINGS.

SI-SSA-0015-09407

Containing customer bills while investing in the system

PSE&G Typical Residential Customer Bills*

- PSE&G customers' combined electric and gas bills declined 23% over the period.
- Low gas prices drove rate decreases; in addition, gas customers received bill credits of ~$400 in total from 2012 through 2014.

SI-SSA-0015-09408

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

PSE&G's robust capital investment pipeline

drives double-digit rate base growth through 2019

- Planned capital spend supports high single digit earnings growth at PSE&G through 2017
- Transmission expected to grow to >50% of rate base in 2019
- Seeking to broaden platform to expand energy efficiency and other investments

E=ESTIMATE

SI-SSA-0015-09409

PSEG Power increased capital spending

by $1.6 billion with addition of new generating capacity focused on improving efficiency and reliability

SI-SSA-0015-09410

*BASED ON CURRENTLY KNOWN AND QUANTIFIABLE ENVIRONMENTAL REQUIREMENTS. E=ESTIMATE.

Power's fleet has the desired attributes to be successful in today's and tomorrow's market

Economic Drivers	Outlook	Combined Cycle	Nuclear	Scrubbed Coal	Peakers	Renewable
Energy Margins	• Low natural gas and energy prices • Robust portfolio of gas pipeline contracts	✓	✓	✓	n/a	n/a
Capacity Markets	• Tightened rules proposed for capacity performance	✓	✓	✓	✓	n/a
Environmental Regulations	• Tighter air emissions standards	✓	✓	✓	✓	✓
Location	• Assets in well-designed markets, premium regions • Opportunities on brownfield sites	✓	✓	✓	✓	n/a
2015 - PSEG Power Total Capacity 11.8 GW		3.3	3.7	2.4	2.3	0.1
2018 - PSEG Power Total Capacity 12.8 GW *		4.7	3.8	2.4	1.8	0.1

- **Largest nuclear site** in the eastern U.S. and ownership in **large, fully scrubbed coal facilities** at Keystone and Conemaugh provide **economies of scale** that enhance energy margins in current low market, and provide for upside potential if prices improve.
- **Dual fuel peakers** meet reliability criteria in capacity markets and provide option value in energy market. Opportunity exists to repower peakers that do not meet NJ HEDD environmental regulations.
- **Combined cycle units Keys and Sewaren, expected to be operational in 2018,** will enhance emissions performance and have a combined average heat rate of approximately 6,800.

SI-SSA-0015-09411

PSEG

*AS OF AUGUST 2015 APPROXIMATELY 1.3 GW UNDER DEVELOPMENT - KEYS AND SEWAREN CCGT UNITS, WHICH ARE TARGETED TO GO INTO SERVICE IN 2018 ALONG WITH RETIREMENT OF OLDER SEWAREN UNITS

Operating Earnings

Disciplined investment program and focus on operational excellence have supported growth

Power's diverse fuel mix and dispatch flexibility continue to generate strong earnings and free cash flow in low price environment

PSE&G's investment program has driven double digit compound annual earnings growth since 2010

SI-SSA-0015-09412

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/ NET INCOME TO RECONCILE TO OPERATING EARNINGS. E=ESTIMATE
** 2015 PERCENTS USE MIDPOINT OF UPDATED EARNINGS GUIDANCE.

Power – Growing value by improving market rules and developing investment opportunities

Value Source	Opportunities and Actions Taken
Improving rules will better recognize value of our fleet	• PJM's Capacity market – 2014 limits on demand response and August 2015 Capacity Performance auction • Demand response treatment at U.S. Courts / FERC • Energy price formation at FERC • Increasing air standards through Federal and State regulations

Our footprint provides growth opportunities	• Nuclear and Combined Cycle plant uprates underway
	• New build Keys CCGT in SWMAAC* (MD) and Sewaren 7 in EMAAC*
	• Brownfield expansions at existing sites
	  ➢ New peakers built at New Haven and Kearny sites
	  ➢ Continue to explore further opportunities
	• PennEast pipeline - equity investment and gas portfolio enhancement
	• Solar Source owns ~148 MW**, with significant project pipeline
	• Continue to seek opportunities to expand the fleet

SI-SSA-0015-09413

PSEG

* SWMAAC = SOUTHWEST MID-ATLANTIC AREA COUNCIL \EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

**PROJECT SIZE IN MEGAWATTS SHOWN IN DC (DIRECT CURRENT), AC EQUIVALENT IS 115 MW.

PSEG Annual Dividend

An increased dividend growth rate with potential for consistent and sustainable growth given our business mix and financial position

	2011	2012	2013	2014	2015E
Payout Ratio	50%	58%	56%	54%	54%*

Mickleton–Gloucester–Camden 230kV	11.68%	✓	✓	$435	Completed

SI-SSA-0015-09423

A robust pipeline of Transmission

investments focus on reliability improvements and replacement of aging infrastructure

Project Roster	Approved ROE	Program Description	Estimate Up To ($ Millions)	Expected In-service Date
Northeast Grid Reliability	11.93%	PJM baseline project receiving CWIP in rate base treatment	$907	Jun-Dec 2015
Bergen—Linden Corridor 345kV	11.68%	PJM baseline project receiving CWIP in rate base treatment	$1,200	June 2018
PJM Regional Transmission Expansion Plan (RTEP) – multiple projects	11.68%	PJM mandated system reliability projects	$1,900	Various
69kV Upgrade – multiple projects	11.68%	Upgrade of 26kV to 69kV	$1,500	Various
Transmission Lifecycle – multiple projects	11.68%	Replacement of aging infrastructure	$1,100	Various
Transmission Hardening– multiple projects	11.68%	Reliability projects focused on system resiliency	$650	Various
Artificial Island	11.68%	PJM Baseline Project	$110-$130*	2019*

SI-SSA-0015-09424

PSEG

* PJM ESTIMATE

Major Transmission programs focus on reliability and replacing aging infrastructure

- PJM's Regional Transmission Expansion Plan (RTEP) identifies system enhancements needed for reliability
- 69kV system upgrades improve system reliability and provide capacity for future growth
- Transmission Lifecycle is an ongoing program to manage transmission asset life to maintain and improve system integrity and reliability
- Transmission Hardening projects focus on increasing system resiliency

SI-SSA-0015-09425

PSE&G is successfully executing on Energy Strong with ~$330M deployed

Program	Approved	Spend thru June 2015
Flood Mitigation	$620M	$56M
Electric Contingency Reconfiguration	$100M	$49M
Electric Advanced Technology	$100M	$32M
Gas Utilization Pressure Cast Iron (UPCI)	$350M	$185M
Gas Metering & Regulating (M&R)	$50M	$6M
TOTAL	$1,220M	$328M

SI-SSA-0015-09426

PSE&G has successfully worked with regulators to develop multiple solutions for New Jersey's energy and economic development goals

RENEWABLES
creative solutions to install solar generation

- Solar Loan I – 2008
- Solar Loan II – 2009
- Solar 4 All – 2009
- Solar Loan III – 2013
- Solar 4 All Ext – 2013

ENERGY EFFICIENCY
assisting customers with controlling energy usage

- Carbon Abatement – 2008
- Demand Response – 2009
- Energy Efficiency (EE) – 2009
- EE Extension – 2011
- EE Extension II – 2015

DISTRIBUTION
improving electric and gas delivery infrastructure

- NJ Capital Infrastructure Program 1 (CIP 1) – 2009
- NJ Capital Infrastructure Program 2 (CIP 2) – 2011
- Energy Strong – 2014

To date we have invested over $2B in the above programs

Over $1B ahead in Energy Strong, Energy Efficiency Ext II and Solar programs

Gas System (GSMP) settlement increases investment by ~$900M through 2019

SI-SSA-0015-09427

Extension of PSE&G's award winning Energy Efficiency program

- Energy Efficiency Extension II approved by the BPU in April 2015 will extend the investment and time frame for three previously approved programs already in the marketplace, allowing PSE&G to factor in lessons learned and balance policy issues
- $95M of rate base investment approved at an ROE of 9.75%
- Extends existing programs, two of which have sizable waiting lists:
  - Hospitals
  - Multifamily
  - Direct install – government, non-profit, and small business
- Allows PSE&G to leverage past investments in people, capabilities, systems and processes

SI-SSA-0015-09428

Settlement reached on Gas System Modernization Program for ~$900 million over three years

- Agreement in principle reached with Staff of the NJBPU and the Division of Rate Counsel
- GSMP is the next phase of a long-term, cast iron and unprotected steel replacement strategy
- Three-year program with total capital investment of $905 million, beginning January 2016
  - ✓ The program provides for investment of $650M recovered through a clause similar to the Energy Strong program – with a 9.75% ROE
  - ✓ Additional capital investment of $255M to be recovered in rate case scheduled to be filed November 2017

SI-SSA-0015-09429

PSE&G continues to receive contemporaneous/ formula rate recovery on ~70% of its investment program

2010-2014 PSE&G Capital Spending by Recovery Method

$9.8B

2015-2019E PSE&G Capital by Recovery Method

$11.8B

Clause Recovery Mechanisms
- Energy Strong / GSMP / Infrastructure / Solar / Energy Efficiency

FERC Formula Rates
- Transmission

Traditional Recovery Mechanisms
- Distribution Base Rates

SI-SSA-0015-09430

PSEG

E = ESTIMATE. DATA AS OF SEPTEMBER 2015.

PSE&G has controlled costs

through process improvements and will continue to drive future efficiencies

Cost control actions taken:

- PSE&G is utilizing the Lean Six Sigma discipline to achieve costs savings and process improvements
- Conducted organizational reviews resulting in streamlining of processes through restructuring
- Continued focus on vendor and inventory practices ensuring maximum value
- Successful management of pension

E=ESTIMATE

We make things work for you.

SI-SSA-0015-09433

PSEG Long Island is focused on improving customer service and reliability

- Provide best-in-class customer service, including building on our new Call Center Technology platform to better serve our customers
  - According to J.D. Power, in 2014 PSEG Long Island showed the most improvement in overall customer satisfaction of any large electric utility, anywhere in the nation
- Work to maintain industry-leading service reliability
- Improve every aspect of the storm response process
  - Leveraged our new Outage Management System to improve storm logistics and outage coordination
- Contributed $0.02* to PSEG's earnings per share in 2014, as expected

SI-SSA-0015-09434

* EXCLUDES THE ENERGY RESOURCES & TRADE CONTRACT, WHICH WILL BE INCLUDED IN PSEG POWER'S RESULTS.

PSEG

We make things work for you.

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-09436

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units have performed well for ten consecutive years • Hope Creek recorded its second highest output in its history • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing market conditions • Bergen 1 & 2 and Linden 1 individually, and the CCGT fleet in total, set generation records in 2014 • Kearny 13 & 14 have shown increasing output in each year since start-up	• Getting the most out of existing fleet • Locational advantage • O&M control programs have delivered a CAGR of 2.6% between 2009 and 2015 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-09437

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program between Nuclear & Fossil initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2014 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch began January 1, 2015 • Solar Source's portfolio is 148 MW_{DC} • Nuclear ESP is expected in 2016 • New build Keys CCGT in Maryland and Sewaren 7 in New Jersey – both targeted in-service 2018

SI-SSA-0015-09438

PSEG Power met 2014's challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• All of the generation sites affected by SuperStorm Sandy were restored to service by mid-2014, with ongoing repairs • Cold weather extremes created a challenging operating environment, but also presented opportunities		• Transmission (outages and build outs) and gas markets resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Expedited return from storm outages, restored margin opportunities • High availability when needed • Flexibility of portfolio captured real-time basis opportunities • Captured value through coal/gas switching, unit flexibility • Management of gas assets benefited customers and fleet • Achieved fuel cost savings

SI-SSA-0015-09439

PSEG Power has generating assets

in three competitive markets

- Assets located near load centers
- Low cost portfolio
  - Fuel flexibility with gas cost advantage
- Positioned to benefit from volatility in real-time markets
- Readiness for capacity performance (CP) in PJM
- Fleet positioned to maintain diversity and efficiency after HEDD
- Sites suitable for expansion

SI-SSA-0015-09440

PSEG Power value advantaged

by asset diversity, fuel flexibility and location

Energy Produced*

Total GWh: 54,162

- Gas
- Pumped Storage
- Nuclear
- Oil
- Coal**

Energy Market Served*

Total MW: 13,146

- Load Following
- Peaking
- Base load

Fuel Diversity*

Total MW: 13,146

- Gas
- Pumped Storage
- Nuclear
- Oil
- Coal**

SI-SSA-0015-09441

PSEG

*2014, EXCLUDES SOLAR AND KALAELOA.
**INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape
- Readiness for Capacity Performance (CP)
- Keys & Sewaren 7 to be added to dispatch in 2018E

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel capability at 87% of load following and peaking units

SI-SSA-0015-09442

PSEG

E = ESTIMATE

PSEG Power will improve diversity and efficiency as we invest in the fleet

Objective 2015 → 2018

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Environmental improvement
- Peach Bottom (PB) uprate
- Advanced Gas Path (AGP)
- Combined cycle units Keys and Sewaren operational in 2018

Fuel Diversity

13,146 MW 12,600 MW

Energy Produced

54 TWh 57 - 59 TWh

E=ESTIMATE.

SI-SSA-0015-09443

PSEG Power's fleet will experience heat rate and emissions improvements

- AGP (Advanced Gas Path) investments
- Other Efficiency improvements
- HEDD retirements
- Keys/Sewaren Combined Cycle Development (2018)

SI-SSA-0015-09444

E = ESTIMATE

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing

SI-SSA-0015-09445

PSEG Power Nuclear is a critical element of our success

Hope Creek

- Operated by PSEG Nuclear
- PSEG Ownership: 100%
- Technology: Boiling Water Reactor
- Total Capacity: 1,178 MW
- Owned Capacity: 1,178 MW
- License Expiration: 2046
- Next Refueling
  - Fall 2016

Salem Units 1 and 2

- Operated by PSEG Nuclear
- PSEG Ownership: 57%
- Technology: Pressurized Water Reactor
- Total Capacity: 2,307 MW
- Owned Capacity: 1,324 MW
- License Expiration: 2036 and 2040
- Next Refueling
  - Unit 1 – Spring 2016
  - Unit 2 -- Fall 2015

Peach Bottom Units 2 and 3

- Operated by Exelon
- PSEG Ownership: 50%
- Technology: Boiling Water Reactor
- Total Capacity: 2,242 MW
- Owned Capacity: 1,121 MW
- License Expiration: 2033 and 2034
- Next Refueling
  - Unit 2 - Spring 2016
  - Unit 3 - Fall 2015
- Uprate: 130 MW (PS Share)
  - Unit 2 - March 2015
  - Unit 3 - 2016

SI-SSA-0015-09446

PSEG Power Nuclear has competitive advantages

- Continued strong nuclear operations
- Nuclear excellence program
- Top quartile of cost performance/MWh
  - Brought security services in-house
- Significant earnings contributor
- Recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - FLEX* plan submitted with implementation underway
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

SI-SSA-0015-09447

PSEG Power's Fossil Fleet has shown improvement in performance

Fossil Generation

Coal Generation

Peaking Start Success*

- Fossil Generation rebounded with market
- Peaking Units maintain high start success
- Record output from Kearny 13 & 14 peakers

Combined Cycle Generation

- Combined Cycle Generation set record
- Bergen AGP uprate project scheduled for 2015

SI-SSA-0015-09448

PSEG

*LM6000 AND 7EA UNITS E = ESTIMATE.

PSEG Power initiatives result in

continuing improvement in combined cycle heat rate

*The weighted average Combined Cycle Operating Heat Rate in 2018, with the addition of Sewaren 7 and Keys Energy Center, will be approximately 7,250

SI-SSA-0015-09449

PSEG

E= ESTIMATE.

PSEG Power CCGT/Fossil initiatives

Actions Taken to Create Value

Capacity
- New Keys CCGT 755MW online in 2018 adds geographic diversity to fleet
- Sewaren 7 CCGT 540 MW online in 2018 improves fleet efficiency
- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional efficient capacity, heat rate improvements
- New lower cost gas line at BEC with Dominion

Performance
- EPRI efficiency initiatives
- GE initiatives for large data analytic
- Consolidation of unit testing
- Auto tuning software

Maintenance
- Ongoing outage efficiency improvement
- Improvements to reliability
- Central fleet monitoring and diagnostic center

SI-SSA-0015-09450

PSEG Power developing 1,300 MW of new, efficient CCGT capacity in MD and NJ

- **Construction of 755 MW Keys Energy Center to begin this Fall** to build a new, natural gas fired power plant in Maryland (SWMAAC*) at an estimated cost of **$825 to $875 million**
- Power cleared a new **540 MW CCGT unit, Sewaren 7 located in New Jersey (EMAAC*)**, in the recent 2018/2019 RPM auction; the unit is expected to cost ~$600 million and is targeted to be in service in 2018; older Sewaren units will be retired upon completion of the new unit
- **PSEG Fossil** will oversee the construction and operation of both PSEG Keys Energy Center and Sewaren 7

SI-SSA-0015-09451

PSEG

*SWMAAC = SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

PSEG Power's Growth Investments

Site	Project	Estimate ($ millions)	Benefits	Status
Maryland	Keys 755 MW CCGT	$825 - $875	Geographic diversity within PJM; highly efficient gas fired unit in SWMAAC	2018E
Sewaren	Unit 7 540 MW CCGT	$600	Improved efficiency and reliability; increase in capacity	2018E
Peach Bottom	Peach Bottom EPU (2014 – 2015)	$417	Increased capacity: 130 MW	PB2 May 2015, PB3 in 2016
Bergen / BEC	Future AGP Upgrades: Bergen (2015) BEC (2017-2018)	$98	Increased capacity and improved heat rate: 88 MW capacity increase ~1.2% heat rate improvement	Underway
Various	Interim ISA's*	No cost	Increased capacity: 69 MW	Completed
Eastern PA to Mercer, NJ	PennEast Pipeline	$119	Estimated Earnings in 2019: $13 million	Underway

Total Increased Capacity – 1,132 MW **

We make things work for you.

Market Review: Winter Z6 gas prices retain seasonal volatility; spark spreads have continued to be robust in PJM

2015 YTD Z6

2015-2018 Z6

PJM West vs. PS Zone Spark Spreads (2013-2018)

FORWARDS AS OF AUGUST 3, 2015

SI-SSA-0015-09460

Power Basis in Eastern PJM: Expected to be volatile and negative on an annual basis for 2015 and 2016

Electric Basis is negative however it is viewed to be stabilizing and turning back to positive within 2 years due to:

- Export of ~18 bcf/day of gas which will significantly strengthen regional gas prices
- Easing of transmission constraints in Virginia/Maryland
- Construction of significant new gas-fired generation in VA/MD

ANNUAL FORWARD BASIS TO PJM-WEST AS OF AUGUST 3, 2015.
E = YTD ACTUAL PLUS FORWARD; F = FORWARD

SI-SSA-0015-09461

Market Review: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

Power's Gas for Generation in 2014

- PSEG Power maintains a robust portfolio of pipeline and storage assets in the Mid-Atlantic
- PSEG Power's gas for generation was ~100 BCF in 2014, of which >60% was supplied by Shale gas
- PSEG Power procured over 400 BCF in 2014 with ~75% going to PSE&G's utility gas customers
- When gas is surplus to customer needs, PSEG Power sells surplus to others; margins from such sales benefit PSE&G gas customers and PSEG Power

SI-SSA-0015-09462

Market Review: New pipelines will move significant quantities of Marcellus gas out of the region by 2018

Historical and Expected Marcellus Production

Pipeline capacity grows significantly by 2018

New pipeline investment is expected to increase takeaway capacity from the low cost Marcellus/Utica shale and reduce regional surpluses and increase gas prices by 2018

SI-SSA-0015-09463

Northeast Portfolio: New York and New England

New England (972 MW)

- Small but dynamic market
- Significant improvement in market construct
- High volatility due to extreme (winter) weather conditions
- Significant siting and permitting challenges
- Gas pipeline infrastructure poses supply challenges/opportunity

New York (774 MW)

- Single state ISO
- Investment in new lateral to connect to the Dominion pipeline at Bethlehem Energy Center (BEC) allows for access to fuel supply from Marcellus
- Long Island Power Authority Fuel Management Contract

SI-SSA-0015-09464

Northeast Portfolio: Expanding our footprint with PSEG Long Island

PSEG Power acting as an agent for LIPA began January 2015

- Performing ISO bidding for LIPA's 6,000 MWs of generation/tolls
- Procuring natural gas and oil for the majority of these assets
- Scheduling two DC transmission cables (ISO-NE and PJM) into Long Island
- Entering into financial hedges to reduce LIPA customer's price volatility

This relationship has provided PSEG Power:

- Additional experience in Eastern NY and Connecticut markets
- Bigger natural gas footprint
- Fee-based services contract

SI-SSA-0015-09465

Capacity Market Pricing: ~98% of Power's PJM fleet that cleared the 2018/2019 RPM auction **met the new CP standards**

RPM – Auction Results				
Delivery Year	2015 / 2016*	2016 / 2017*+	2017 / 2018+	2018 / 2019
Power's Average Prices*($/MW-day)	$168	$172	$177	**$215**
RTO Prices ($/MW-day)	$136	$59	$120	$165/$150 (CP/Base)
Power's Cleared Capacity (MW)	8,750	8,700	8,700	**8,650**

SI-SSA-0015-09468

PSEG Power's Value Proposition

- Re-positioning fleet to improve efficiency and reliability in attractive markets
- Advantaged by low cost structure, fuel diversity and dispatch flexibility
- Value add from strong gas supply capability
- Significant drive by regulatory bodies to improve market constructs
- Low capital requirements to meet enhanced performance standards
- Organic growth opportunities to increase nuclear and combined cycle generation
- Hedging strategy is responsive to changing market dynamics, providing attractive returns and free cash flow

SI-SSA-0015-09469

PSEG FINANCIAL REVIEW & OUTLOOK

SI-SSA-0015-09470

PSEG

We make things work for you.

Strong financial position to support our business initiatives

2014 Financial Position

- ✓ Strong 2014 earnings growth
- ✓ Exceeded earnings guidance
- ✓ Executed major PSE&G capital program
- ✓ Strong balance sheet with no long term Parent debt
- ✓ Solid credit metrics

2015 and Beyond

- ✓ Third year of anticipated positive earnings growth in 2015
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investment program without equity issuance
- ✓ Substantial additional investment capacity
- ✓ Growth in PSE&G investments with contemporaneous/formula rate returns and new Power investment
- ✓ Consistent and strong cash flow from both Power and PSE&G
- ✓ Potential for accelerated and sustainable dividend growth

PSEG Summary

- Continued third year of anticipated positive earnings trend in 2015 with updated operating earnings guidance of $2.80 to $2.95 per share
- Continued 5th straight year of expected double digit, 5-year growth in rate base
- Anticipated high single digit earnings growth at PSE&G on a three-year basis from 2014 to 2017, driven by transmission investments and planned programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Power realigning its portfolio with new, efficient CCGT investments in MD and NJ
- Strong Balance Sheet and Cash Flow support PSE&G's capital program and Power's new investment opportunities without the need for equity
- Our $0.08 per share dividend increase for 2015 is consistent with our long history of returning cash to the shareholder through the common dividend, with potential for consistent and sustainable growth

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09500

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of October 31, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss

* GAS FIRM SALES ONLY.
** ESTIMATED ANNUAL GROWTH PER YEAR, ASSUMES NORMAL WEATHER.

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, highly efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (349 MW_{DC}/275 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-09505

*HUDSON AND MERCER GENERATING STATIONS WERE RETIRED AS OF JUNE 1, 2017.

Regulatory and Policy initiatives drive long-term value creation

Long-Term Infrastructure Investment Platform

- In July, PSE&G filed for a 5-year, $2.7 billion extension of the Gas System Modernization Program (GSMP2)
- In October, the BPU approved $69 million of PSE&G's request to extend its investment in Energy Efficiency (EE)
- A final BPU decision on the Infrastructure Investment Program (IIP) providing for 5-year investment programs is expected by year-end
- PSE&G preparing a multi-year extension filing for Energy Strong in coming months
- PSE&G developing a large, multi-year EE investment program to bring benefits to more customers

Preserve the Value of Nuclear Supply

- Advocating for legislative strategy to recognize the value of nuclear energy under terms and conditions that provide proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- FERC/PJM considering DOE Notice of Proposed Rulemaking (NOPR) issues of Price Formation and fuel-secure resource preservation

Opportunity for consistent and sustainable dividend growth

SI-SSA-0015-09515

PSEG's Value Proposition

- A stable platform with a $15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 110-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

Forward-Looking Statement

Certain of the matters discussed in this communication about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com.

These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient coverage or recover proceeds of insurance with respect to such events,
- cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as competition from certain transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies and changes in customer behaviors, including energy efficiency, net metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09520

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slide A at the end of this presentation includes a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

SI-SSA-0015-09522

PSEG's Strategy – delivering results

Our businesses' focus on cost-effective, reliable operations yields strong cash flow

We are funding growth-oriented investments aligned with customer needs and state energy policies

We are enhancing the competitiveness of our environmentally well-positioned generation business

The results of our financial strategy support a credit profile capable of meeting our corporate objectives and providing sustained dividend growth for our shareholders

SI-SSA-0015-09523

Two complementary businesses

Strong asset platform, performing well and positioned for the future

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Positioned to meet customers' needs as we respond to state and federal energy policy and economic growth objectives **Value Proposition:** A $10 billion infrastructure program - focused on transmission – that produces double-digit rate base growth through 2016	**Strategy:** Fuel diverse fleet is geographically and environmentally well positioned, with investments to enhance competitiveness **Value Proposition:** Provides substantial free cash flow in current environment and poised for price recovery
2013 — Assets $20B Operating Earnings $612M	2013 — Assets $12B Operating Earnings $710M

SI-SSA-0015-09524

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2013.
PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT, PSEG LONG ISLAND AND ENERGY HOLDINGS ACTIVITY.
SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

Delivering on commitments and pursuing opportunities for growth

Operational Excellence	• Power: Record 2013 output at Linden CCGT and Salem 2; nuclear capacity factor greater than 90% for 9th straight year • PSE&G: Mid-Atlantic Reliability Award (12th consecutive year) • PSEG Long Island: Went "live" on January 1, 2014 • PSEG: Cost-control benefits continue
Financial Strength	• Strong cash flows supported credit rating increases • Pension more than fully funded • Dividend increased
Disciplined Investment	• PSE&G ✓ Transmission capital program execution and growth ✓ Energy Strong program under discussion ✓ Solar 4 All Extension and Solar Loan III programs • Power: Investments to enhance the fleet's competitiveness – 130 MW Nuclear uprate, 150 MW CCGT uprate and efficiency improvement

Operating Earnings Mix

Long term investment program has driven increased earnings contribution from stable, regulated business

Power's diverse fuel mix and dispatch flexibility continues to generate earnings and free cash flow

PSE&G's investment in transmission has diversified its asset base and, coupled with other investments and cost controls, supported compound annual earnings growth of ~18% over 2009 – 2013

SI-SSA-0015-09527

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/ NET INCOME TO RECONCILE TO OPERATING EARNINGS; DISCONTINUED OPERATIONS REFLECT TEXAS. E=ESTIMATE ** 2014 PERCENTS USE MIDPOINT OF EARNINGS GUIDANCE.

Maintaining a robust capital program focused on growth

PSEG 2009 - 2013 Capital Spending $11.3 Billion	PSEG 2014 - 2018E Capital Spending $11.8 Billion

NOTE: POWER 2009–2013 ACTUALS ARE RESTATED TO INCLUDE SOLAR CAPITAL SPEND. POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. E=ESTIMATE

SI-SSA-0015-09528

PSEG's business profile has been transformed through significant growth in utility capital spending

SI-SSA-0015-09529

Energy Strong Proposal recognizes need to strengthen and harden the distribution system

- Energy Strong is:
  - ✓ A $2.6 Billion investment program over 5 years as the first phase of a 10-year, $3.9 Billion infrastructure program
  - ✓ Proposal is based on contemporaneous recovery of investment, subject to NJ Board of Public Utilities (BPU) review
- Energy Strong proposal would harden 29 electric substations, modernize the gas distribution system, make the grid smarter, and improve the system's ability to communicate with customers
- Over 100 New Jersey municipalities support Energy Strong
- Proposed Energy Strong program would create approximately 5,800 jobs and stimulate NJ's economy

SI-SSA-0015-09530

PSEG Power – Value-advantaged through asset diversity, fuel flexibility, location and installed environmental controls

PSEG Power – Our diverse fleet and flexible portfolio allow us to capture opportunities arising from market volatility

SI-SSA-0015-09532

*AT THE BEGINNING OF EACH YEAR. **EXCLUDES BGSS.

Balance Sheet Strength

2009 – 2013: Reduced risk profile and transformed business mix

- Invested $8.4 billion in PSE&G
- Improved credit ratings
- Monetized and de-risked Holdings' portfolio

2014 – Forward: Strong cash flows and increasingly regulated business mix fully support:

- PSE&G's $10B approved investment program through 2018
- Consistent and sustainable dividend growth
- Additional investment capacity to deploy in opportunities beyond those in the current capital plan
- No need to issue equity

SI-SSA-0015-09533

Where we're going … actions taken to focus on more predictable growth

Energy Strong filing for resiliency and hardening to support customers' needs in the wake of Superstorm Sandy

- Filed 5-year $2.6 billion capital program with NJ Board of Public Utilities (BPU) in February 2013
- Program addresses system resiliency and hardening by:
  - Protecting distribution substations from severe storms
  - Making the electric grid smarter and easier to repair
  - Adding backup distribution lines and system redundancies
  - Moving overhead distribution lines underground
  - Modernizing the gas distribution system
- Currently in confidential negotiations with Staff of BPU and major intervenors; hearings conclude March 7, 2014
- Anticipate a final order following either settlement or litigated decision by the end of April 2014

SI-SSA-0015-09548

Over 70% of PSE&G's $10 billion investment program will be recovered through contemporaneous mechanisms

ENERGY STRONG BILL IMPACTS ARE BASED UPON CURRENT FORECAST.

SI-SSA-0015-09550

PSE&G TRANSMISSION

PSEG

We make things work for you.

SI-SSA-0015-09551

Transmission has delivered, and has grown to represent ~36% of rate base

Transmission represented ~36% of rate base at YE 2013 up from ~15% at YE 2009

SI-SSA-0015-09552

PSE&G's existing major transmission

investment program remains on schedule and on budget

Major Transmission Projects

	Approved ROE	Inclusion of CWIP in Rate Base	100% Recovery of Costs Due to Abandonment	Project Estimate Up To ($ Millions)	Expected In-service Date
Susquehanna-Roseland	12.93%	✓	✓	$790	June 2014 / June 2015
Northeast Grid Reliability	11.93%	✓	✓	$907	June 2015
North Central Reliability	11.68%	✓	✓	$390	June 2014
Burlington–Camden 230kV	11.68%	✓	✓	$399	June 2014
Mickleton–Gloucester–Camden 230kV	11.68%	✓	✓	$435	June 2015

SI-SSA-0015-09553

Susquehanna-Roseland consists of constructing 150 miles of 500kV circuit (46 miles in NJ) with two new 500kV GIS switching stations at Roseland and Hopatcong

Project Estimate Up To*	Through Year-end 2013	Expected In-service Date
$790M	$661M	June 2014 / June 2015

- PJM RTEP project b0489
- ROE of 12.93% (including 1.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves reliability and reduces congestion

Project Status: Major permitting & siting complete, outside plant construction in progress, inside plant construction is complete and commissioning is in progress

SI-SSA-0015-09554

*PROJECT IS SHARED WITH PPL. PROJECT ESTIMATE REPRESENTS PSE&G'S CONSTRUCTION RESPONSIBILITY FOR THE NJ PORTION.

Northeast Grid Reliability consists of upgrading approximately 50 overhead circuit miles of 138kV transmission line to 230kV, constructing ~18 miles of new underground 230kV lines, and converting/upgrading 12 existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$907M	$228M	June 2015

- PJM RTEP project b1304
- ROE of 11.93% (including 0.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment
- Project estimate has increased ~$12M associated with hardening related scope changes as a result of Superstorm Sandy

Customer Benefit: Improves reliability and increases transfer capability

Project Status: Nearing completion of engineering/design and licensing/permitting phase. Outside and inside plant construction are in progress

SI-SSA-0015-09555

North Central Reliability consists of upgrading 55 circuit miles of 138kV transmission line to 230kV, and converting six existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$390M	$349M	June 2014

- PJM RTEP project b1154
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves power quality and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction is essentially complete, commissioning is in progress

SI-SSA-0015-09556

Burlington-Camden 230kV consists of upgrading 37 circuit miles (30 miles of overhead and 7 miles of underground) of 138kV transmission line to 230kV, converting the existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$399M	$301M	June 2014

- PJM RTEP project b1156
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses voltage reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside plant construction is complete, and inside plant construction and commissioning is in progress

SI-SSA-0015-09557

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$435M	$122M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses thermal reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-09558

Bergen-Linden Corridor is a recently approved project which will provide a double-circuit 345kV line to maintain reliability

Project Estimate Up To	Through Year-end 2013	Expected Completion Date
$1,200M	-	June 2018

- PJM RTEP project b2436
- 30 miles of underground cable
  - New ~ 23 miles
  - Reconductor (Upgrade of 138 to 345) ~7 miles
- 13 miles of double circuit overhead conductor (replacing double circuit 138 with double circuit 345)
- 11 station upgrades to 345kV

Customer Benefit: Addresses thermal and short-circuit reliability

Project Status: Engineering

SI-SSA-0015-09559

Planned transmission spend of $6.8 billion

is driven by PJM reliability projects, 69kV conversions and life-cycle replacement projects

E= ESTIMATE

SI-SSA-0015-09560

PSE&G's processes and culture are the foundation for project execution success

People

- Diverse, well-rounded team
- Culture with a focus for on-time, on-scope and on-budget execution
- Successful recruitment, development and retention strategies
- Strong unions and supplier relationships

Process

- Cradle to grave project execution organization
- Processes designed to be scalable, repeatable and improvable
- Emphasis on best practices and lessons learned sharing
- Improvements driven by performance metric management

Environment

- Collaborative relationship with regulatory agencies
- Innovative design and construction practices to minimize environmental impacts
- Robust environmental compliance system

SI-SSA-0015-09561

PSE&G's demonstrated ability to successfully execute large projects leaves us well positioned to pursue new opportunities

- Future RTEP as identified by PJM
- Near-term participation in RTO competitive open planning windows
  - PJM
  - MISO
  - NYISO
- Anticipate participating in future competitive solicitations under FERC 1000

PSEG LONG ISLAND

SI-SSA-0015-09564

PSEG

We make things work for you.

PSEG was selected to operate Long Island Power Authority's (LIPA) electric transmission and distribution system for 12 years starting in 2014

- Pursuant to the Operating Services Agreement (OSA), all expenses and capital costs to operate the system are pre-funded by LIPA and passed through to their customers
- Compensation consists of a fixed fee and an incentive fee
  - Fixed compensation fee for 2014 with scheduled increases in 2015 and 2016
  - Starting in 2015 PSEG Energy Resources and Trading (ER&T) begins managing fuel/energy contracts
  - PSEG Long Island expected to contribute $0.03 to operating earnings in 2014 increasing to $0.07 per share in 2016 including contribution at ER&T
- Potential for an 8-year extension of the OSA

SI-SSA-0015-09565

PSEG Long Island commenced operations

on January 1, 2014

Key elements of Operating Services Agreement

Increased PSEG scope and control	Use of PSEG brand as PSEG Long Island	3-Year rate freeze (2013-2015)
Performance metrics	NY Department of Public Service oversight	Potential for "Utility 2.0" investment

Early performance

Successful transition to PSEG Long Island	Stakeholder communication	Winter storm response

SI-SSA-0015-09566

PSEG POWER

SI-SSA-0015-09567

PSEG

We make things work for you.

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-09568

Agenda

- Delivering Value
- Fleet Advantage, Location, Flexibility and Fuel Diversity
- Nuclear Operation
- Fossil Operation
- Financial Performance
- Expansion Opportunities
- Regulatory
- Engaged Workforce

SI-SSA-0015-09569

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units continue to achieve strong operational results, operating at over 90% capacity factors for the 9th consecutive year • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing conditions • Linden CCGT and Salem 2 nuclear unit achieved record output in 2013	• "Getting the most out of existing fleet" • Locational advantage • O&M control programs have delivered a CAGR of 1.6% between 2009 and 2014 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-09570

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2013 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch • Completed 19 MW solar project, 4 MW project under construction, established robust pipeline • Nuclear ESP is expected in 2015

SI-SSA-0015-09571

PSEG Power met 2013 challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• SuperStorm Sandy impacted our generating sites • Cold and hot weather extremes created challenging operating environment, but also presented opportunities		• Unit outages and planned transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Optimized unit dispatch across fleet during storm recovery • Expedited return from storm outages, restored margin opportunities • High availability when needed • Achieved fuel cost savings • Captured value through coal/gas switching, unit flexibility • Coal & oil sales optimized inventory • Flexibility of portfolio captured real-time basis opportunities

SI-SSA-0015-09572

PSEG Power exceeded 2013's earnings guidance

OPERATING EARNINGS FOR PSEG POWER IN 2013; SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. *ASSETS TRANSFERRED TO POWER AT YEAR-END 2013.

SI-SSA-0015-09573

PSEG Power has generating assets

in three competitive markets

- Assets near loads
- Low cost portfolio
- Fuel flexibility with gas cost advantage
- Poised to benefit from volatility in real-time markets
- Fleet will maintain diversity and efficiency after HEDD
- Most sites suitable for expansion

SI-SSA-0015-09574

PSEG Power will maintain diversity and efficiency after a realignment of the fleet due to HEDD

Objective 2013 → 2017

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Environmental improvement
- Peach Bottom (PB) uprate
- Advanced Gas Path (AGP)
- Kalaeloa and Solar transfer adds ~200MW of capacity

Fuel Diversity

Energy Produced

SI-SSA-0015-09575

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel flexibility for >60% of fleet

SI-SSA-0015-09576

PSEG Power Nuclear is a critical element of our success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,178 MW
• Owned Capacity: 1,178 MW
• License Expiration: 2046
• Next Refueling
  • Spring 2015
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,365 MW
	• Owned Capacity: 1,358 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 -- Fall 2014
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,251 MW
		• Owned Capacity: 1,125 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2015
		• Uprate: 130 MW in 2015/2016

SI-SSA-0015-09577

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations: nine consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - ✓ FLEX* plan submitted with implementation starting with Fall outage
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

SI-SSA-0015-09578

Power's nuclear fleet is well positioned

with significantly lower-than-average US cost structure

*SOURCE: ELECTRIC UTILITY COST GROUP
** SOURCE: PSEG NUCLEAR

SI-SSA-0015-09579

PSEG Power's Fossil Fleet Performance

has shown improvement

- Fossil Capacity Factor rebounded with market
- Peaking Units maintain high start success

- Coal EFORp improving
- CC EFORp less than 1% in 2013
- Consistent recipient of EFORp payments

SI-SSA-0015-09580

PSEG

*LM6000 AND 7EA UNITS

PSEG Power improvements achieved in combined cycle fleet efficiency

Combined Cycle Operating Heat Rate

Actions Taken to Create Value

- Operational Excellence Model
- Training programs
- Unit testing initiative
- Outage work to restore efficiency
- Second gas line at BEC

- Heat rate improvement 2008-2013 translates to meaningful fuel savings at current market prices

- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional fuel savings

SI-SSA-0015-09581

Investing to expand CCGT capacity and improve efficiency

PSEG Power - CCGT Uprate Project

- Expand Power's CCGT fleet, one of the largest gas-fired portfolios in PJM, with incremental base and peaking MWs
- Retrofit Bergen, Linden and BEC with Advanced Gas Path (AGP) components at cost of ~$120M over 2014 - 2018

AGP Project Benefits

- ✓ CCGT capacity uprates of ~150 MW:
  - Linden (63 MW – 2014)
  - Bergen (31MW – 2015)
  - BEC (58 MW – 2017-18)
- ✓ Increases Efficiency - Combined Cycle (CC) heat rate improvement ~ 1.2%
- ✓ Upgrades technology and extends maintenance outage cycles

SI-SSA-0015-09582

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- Cost control through testing coordination program

SI-SSA-0015-09583

PSEG Power's capital expenditures for environmental requirements are essentially complete*

SI-SSA-0015-09584

*BASED ON CURRENTLY KNOWN AND QUANTIFIABLE ENVIRONMENTAL REQUIREMENTS. E=ESTIMATE

PSEG Power's focus on costs

has resulted in

moderate increase

in O&M for

six years

Power O&M Expense*

2009 to 2014 CAGR = 1.6%

Cost control actions taken:	
• Fossil plant assessment • CCGT material condition assessment • Contract renegotiations	• Nuclear maintenance productivity study • Nuclear outage efficiency initiative • Materials management

SI-SSA-0015-09585

PSEG

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS
E=ESTIMATE

PSEG Power is well-positioned for growth when market conditions warrant

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Transmission Interconnections • Access to Gas Pipelines • Space • Emissions

SI-SSA-0015-09586

PSEG Solar Source owns 88 MW of operating solar facilities and has one project under construction

Hackettstown (Mars)
New Jersey (2 MW)
COD September 2009
Thin film panels – fixed tilt
Investment $13 million
15 year PPA with Mars, Inc.

Queen Creek
Arizona (25 MW)
COD October 2012
Polycrystalline - single axis tracker
Investment $79 million
20 year PPA with SRP

Wyandot
Ohio (12 MW)
COD May 2010
Thin film panels – fixed tilt
Investment $45 million
20 year PPA with AEP

Milford
Delaware (15 MW)
COD December 2012
Polycrystalline - fixed tilt
Investment $49 million
20 year PPA with DEMEC

JEA
Florida (15 MW)
COD September 2010
Thin film panels – fixed tilt
Investment $59 million
30 year PPA with JEA

Badger I
Arizona (19 MW)
COD November 2013
Polycrystalline - single axis tracker
Investment $50 million
30 year PPA with APS

Shasta
California (4 MW)
Expected COD March 2014
Polycrystalline - single axis tracker
Investment $13 million est.
20 year PPA with PG&E

- Continue to seek high quality projects with creditworthy off-takers.
- Solar portfolio delivers strong EBITDA post-construction period.

Portfolio Management Strategy

Optimize value of assets

Manage risk vs. reward

Directly engage with regulatory agencies

SI-SSA-0015-09591

PSEG Power: Enjoys real and sustainable advantages in the merchant generation space

Market Review

- Gas, Power, Spark Spreads
- Regulatory construct

PSEG's Competitive Advantage

- Fuel flexibility
- Heat Rate diversity
- Access to Marcellus Shale gas
- Asset flexibility

PSEG's Sustainable Advantage

- Positive cash-flow hedging into the long-term
- Robust capacity market pricing in most concentrated load pocket in US
- Long-term access to discounted Marcellus gas

SI-SSA-0015-09592

Market Review: Prices have stabilized

- Energy and gas prices appear to have stabilized
- Environmental restrictions may tighten market
- Insufficient gas infrastructure continues to place upward pressure on fuel prices during seasonal peaks

SI-SSA-0015-09593

F=FORWARDS AS OF 12/31/2013

Market Review: New generation in PJM not keeping pace with coal retirements

Cumulative Generation Retirements*

Forecast Reserve Margin (PJM January 2014)

- PJM forecasts a declining Reserve Margin through 2018, which may improve forward prices
- Brattle estimates energy prices could rise at least $3-4/MWh from today's prices

SI-SSA-0015-09594

PSEG

*PJM AS OF FEBRUARY 20, 2014
SOURCE OF CHART DATA: PJM

Market Review: Regulatory framework showing signs of improvement

	ISSUE / POLICY	REGULATORY GAINS
PJM	SUBSIDIZED GENERATION (NJ and MD)	• Comprehensively defeated in federal court (appeals currently pending)
	DEMAND RESPONSE RULES	• PJM and ISO-NE enacted stricter rules of eligibility and deployment
	ENERGY PRICE FORMATION	• Concerted drive to improve price formation for generation and ancillary services • Waiver of price caps during extreme market conditions
NYISO	TRANSMISSION	• Significant progress made to relieve bottling of upstate generation
ISO-NE	CAPACITY	• Improvement in price formation to better reflect tight supply conditions • Implementation of sloping demand curve in Forward Capacity Auction (FCA) 9
	ENERGY	• Demand response required to participate in Day Ahead markets
FEDERAL	GAS to ELECTRIC	• Better coordination between pipelines and ISO's will promote efficiency
	ENVIRONMENTAL REGULATIONS	• HEDD, HAPS/MACT may lead to tightening of supply in 2015+ timeframe

SI-SSA-0015-09595

Competitive Advantage: Heat Rate Diversity & Flexible Dispatch

SI-SSA-0015-09596

Competitive Advantage: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

SI-SSA-0015-09597

Competitive Advantage: ~25% of Power's gas for generation comes from Marcellus

- Our combined cycle and peaking assets have been able to take advantage of locational gas price volatility driven by production and logistical constraints
- Lower cost shale supply provides additional savings during periods of lower residential gas demand

SI-SSA-0015-09598

Competitive Advantage: Locational advantage from short term basis volatility

PS Zone Annual Basis to PJM-W

PS Zone Day Ahead On Peak Monthly Basis to PJM-W

- Annual basis benefits baseload units
- Intermediate units flexible to seasonal opportunities
- Combined Cycle and Peaking units positioned to optimize daily and hourly volatility

PS Zone Real Time On Peak Hourly Basis to PJM-W

SI-SSA-0015-09599

ANNUAL FORWARD BASIS TO PJM-WEST AS OF 12/31/2013.

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on January 7, 2014

On Peak Basis to PJM-W on January 7, 2014

Hourly Generation and Load on January 7, 2014

- High gas market at $58/MMbtu setting power prices in PS zone on 1/7/14
- Higher basis to generation
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional steam and peaking generation available above day ahead commitment to gain value from real time market
- Fuel flexibility with coal/gas/oil optionality among available units

SI-SSA-0015-09600

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on July 18, 2013

On Peak Basis to PJM-W on July 18, 2013

Hourly Generation and Load on July 18, 2013

- High demand in constrained northern NJ
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional generation available above obligations to gain value from real time market spikes
- Gas advantage in procuring low cost shale supply to capture savings

SI-SSA-0015-09601

Sustainable Advantage: BGS Auction provides excellent opportunity to forward hedge our generation

BGS sales account for about a quarter of our forward portfolio of hedges

SI-SSA-0015-09602

$/MWH; BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2012-2014 WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2014.

Sustainable Advantage: Hedging strategy designed to protect gross margin while leveraging the portfolio

		2014	2015	2016
Base Load (Nuclear and Base Load Coal)	Volume TWh	35	35	35
	% Hedged	100%	75-80%	30-35%
	Price $/MWh	$48	$51	$53
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	20	19	19
	% Hedged	35-40%	0%	0%
	Price $/MWh	$48	$51	$53
Total	Volume TWh	53-55	53-55	53-55
	% Hedged	75-80%	45-55%	20-30%
	Price $/MWh	$48	$51	$53

HEDGE PERCENTAGES AND PRICES AS OF FEBRUARY 11, 2014. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS. EXCLUDES SOLAR AND KALAELOA.

SI-SSA-0015-09603

Sustainable Advantage: PJM's capacity market is expected to continue to recognize locational value

RPM Auction Results*					
($/MW-day)	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016	2016 / 2017
Power's Average Prices	$153	$242	$166	$166	$166
Rest of Pool Prices	$16	$28	$126	$136	$59
Power's Cleared Capacity (MW)	10,400	10,890	10,710	9,210	8,610

2017/2018 RPM Auction Influenced By:

- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Updated Transfer Capabilities
- New Build/Cost of New Entry
- Demand Response

PSEG

*PSEG POWER'S AVERAGE PRICES AND CLEARED CAPACITY (MW) REFLECT BASE AND INCREMENTAL RPM AUCTION RESULTS. DELIVERY YEAR RUNS FROM JUNE 1 TO MAY 31 OF THE NEXT CALENDAR YEAR.

Sustainable Advantage: Fuel advantage continues throughout the curve

Forward curve shows that Marcellus shale supply averages over $1.50/MMbtu discount year-round through 2018

SI-SSA-0015-09605

2013 AVERAGE 6/1/13-12/31/13; F= FORWARDS AS OF 12/31/13. LEIDY BASIS FROM ICE/BROKER QUOTES

PSEG Power's Value Proposition

- Well-positioned fleet of merchant generating assets concentrated in PJM market
- Advantaged by low cost structure, fuel diversity and dispatch flexibility
- Low environmental capital requirements
- Capacity uprates to enhance value of nuclear and combined cycle stations
- Consistent hedging strategy recognizes asset flexibility
- Continue to meet commitments and to provide free cash flow

SI-SSA-0015-09606

PSEG FINANCIAL REVIEW & OUTLOOK

PSEG

We make things work for you.

SI-SSA-0015-09607

Strong financial position to support our business initiatives

2013 Financial Position

- ✓ Exceeded upwardly revised 2013 earnings guidance
- ✓ Pension fully funded
- ✓ Strong balance sheet and upgraded credit ratings

2014 and Beyond

- ✓ Continued positive earnings trend in 2014
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investments without equity issuance
- ✓ Growth in PSE&G investments with contemporaneous returns
- ✓ Diversified Power assets with a balanced hedge profile
- ✓ Growth in PSE&G Cash from Operations, with continued significant Cash from Operations/FFO at Power
- ✓ Increased Dividend by $0.04 to indicative annual rate of $1.48 for 2014
- ✓ Opportunity for consistent and sustainable dividend growth

In 2013, Power had significant free cash flow

SI-SSA-0015-09610

In 2013, PSE&G invested over $2B, using $1.4B of internally generated cash flow and debt, while maintaining its capital structure

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.

SI-SSA-0015-09611

In 2013, Power's Free Cash Flow supported PSE&G's capital program and shareholder dividend

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.
(2) OTHER CASH FLOW INCLUDES HOLDINGS NET CASH FLOW AND PARENT CASH.

SI-SSA-0015-09612

PSEG growth spend of ~$5.4B represents ~72% of total investment with Energy Strong potentially enhancing the profile

PSEG 2014 – 2016E Capital Investment

E = ESTIMATE; CAPITAL INCLUDES AFUDC AND IDC.

SI-SSA-0015-09613

PSE&G's Capital Program drives double-digit growth in rate base and earnings over the 2013 to 2016 period

2013 – 2016E Rate Base CAGR in approved Growth of ~10%

SI-SSA-0015-09614

PSE&G's Cash from Operations and Power's Free Cash Flow support growth investments without the need for new equity

PSEG Sources and Uses

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$500M FROM 2014-2016
(2) OTHER CASH FLOW INCLUDES PSEG LI, HOLDINGS NET CASH FLOW, CASH, AND SHORT TERM DEBT
E = ESTIMATE

SI-SSA-0015-09615

Power's key credit metric supports incremental investment opportunities

- Increased contribution to earnings from the more stable regulated business allows us to reset Power's FFO/Debt threshold from 35% to 30%, providing additional financial flexibility
- Power's annual Cash From Operations and Funds From Operations each average ~$1.1B over the 2014 to 2016 period supported by:
  - Capacity Revenues
  - Hedged Generation
  - O&M Control
- Financial strength can be used to pursue future growth in both businesses beyond current plans

(1) ESTIMATE BASED ON APPROVED PROGRAMS

SI-SSA-0015-09616

Pension: Our Long Term Asset allocation strategy resulted in a ~17% increase in pension assets during 2013

PBO Funded Ratio	83%	Fully Funded Pension →	106%

SI-SSA-0015-09622

PSEG Summary

- Our 2013 earnings of $2.58 exceeded our upwardly revised operating earnings guidance of $2.40 - $2.55 per share
- Double digit earnings growth at PSE&G on one and three year basis from 2013 to 2016, driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support full capital program and new potential opportunities without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for consistent and sustainable growth

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, capacity market design, transmission planning and cost allocation rules, including how transmission projects are planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as competition for certain transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies, and
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09639

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The last slides in this presentation include a list of items excluded from Net Income to reconcile to Operating Earnings, with a reference to those slides included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

CHIEF FINANCIAL OFFICER

Kathleen Lally

VICE PRESIDENT
INVESTOR RELATIONS

PSEG

We make things work for you.

SI-SSA-0015-09641

PSEG's Strategy – delivering results

Our businesses' focus on cost-effective, reliable operations yields strong cash flow

We are funding growth-oriented investments aligned with customer needs and state energy policies

We are enhancing the competitiveness of our environmentally well-positioned generation business

The results of our financial strategy support a credit profile capable of meeting our corporate objectives and providing sustained dividend growth for our shareholders

SI-SSA-0015-09642

Two complementary businesses

Strong asset platform, performing well and positioned for the future

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Positioned to meet customers' needs as we respond to state and federal energy policy and economic growth objectives	**Strategy:** Fuel diverse fleet is geographically and environmentally well positioned, with investments to enhance competitiveness
Value Proposition: An $11.3 billion infrastructure program – focused on transmission – that is expected to produce double-digit rate base growth through 2016	**Value Proposition:** Provides substantial free cash flow in current environment and poised for price recovery
2013 — Assets $20B; Operating Earnings $612M	2013 — Assets $12B; Operating Earnings $710M

SI-SSA-0015-09643

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2013.
PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT, PSEG LONG ISLAND AND ENERGY HOLDINGS ACTIVITY.
SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

Delivering on commitments and pursuing opportunities for growth

Operational Excellence	• Power: Record 2013 output at Linden CCGT and Salem 2; nuclear capacity factor greater than 90% for 9th straight year • PSE&G: Mid-Atlantic Reliability Award (12th consecutive year) • PSEG Long Island: Went "live" on January 1, 2014 • PSEG: Cost-control benefits continue
Financial Strength	• Strong cash flows supported credit rating increases • Pension fully funded • Dividend increased
Disciplined Investment	• PSE&G ✓ Transmission capital program execution and growth ✓ Energy Strong infrastructure program underway ✓ Solar 4 All Extension and Solar Loan III programs • Power: Investments to enhance the fleet's competitiveness – 130 MW Nuclear uprate, 150 MW CCGT uprate and efficiency improvement

SI-SSA-0015-09644

Operating Earnings Mix

Long term investment program has driven increased earnings contribution from stable, regulated business

Power's diverse fuel mix and dispatch flexibility continues to generate earnings and free cash flow

PSE&G's investment in transmission has diversified its asset base and, coupled with other investments and cost controls, supported compound annual earnings growth of ~18% over 2009 – 2013

PSEG's business profile has been transformed

through significant growth in utility capital spending, and we have consistently identified attractive opportunities for additional investment

SI-SSA-0015-09647

Energy Strong Agreement recognizes benefits of system investments

- Energy Strong Agreement reached with all parties
  - ✓ Agreement recognizes the benefits of system investments that prevent or shorten outages
  - ✓ Supports $1.22 billion capital program over several years on reasonable terms: $1 billion recovered through accelerated, rate recovery mechanism
    - $820 million Electric
    - $400 million Gas
  - ✓ Allows PSE&G to earn a 9.75% ROE on the $1 billion recovered on accelerated basis
  - ✓ Requires PSE&G to file a base rate case by November 2017
  - ✓ Approved by the NJBPU in May 2014
- Over 100 New Jersey municipalities supported Energy Strong
- Energy Strong agreement clears path for PSE&G to begin the initial phase of this robust capital program

SI-SSA-0015-09649

PSEG – Year to Date 2014 Highlights

- **Operating Earnings YTD up 9% to $2.27 per share from $2.09 for YTD 2013**
  - ✓ PSE&G on track to record double-digit growth in earnings on expanded capital investment program
  - ✓ PSEG Power expected to earn at upper level of expectations for the full year
  - ✓ Narrowed 2014 full–year, operating earnings guidance to $2.60-$2.75 per share, from $2.55-$2.75 per share prior

- **Executing on our capital program**
  - ✓ Replacement of PSE&G's gas cast-iron pipe underway as part of $1.22 billion Energy Strong capital program
  - ✓ Major transmission projects under $6.8 billion capital program are on-time and on-budget

- **Market developments**
  - ✓ PJM proposed changes to its Reliability Price Mechanism, Demand Curve Adjustment and pending Demand Response (DR) issues supportive of price formation

PSEG – 2014 Another Year of Growth

2014 operating earnings guidance narrowed; forecast full-year at upper end of range, assuming normal weather and unit operations for rest of year

SI-SSA-0015-09651

SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. E = ESTIMATE.

Balance Sheet Strength

2009 – 2013: Reduced risk profile and transformed business mix

- Invested $8.4 billion in PSE&G
- Improved credit ratings
- Monetized and de-risked Holdings' portfolio

2014 – Forward: Strong cash flows and increasingly regulated business mix fully support:

- PSE&G's $11.3 billion approved investment program through 2018
- Consistent and sustainable dividend growth
- Additional investment capacity to deploy in opportunities beyond those in the current capital plan
- No need to issue equity

SI-SSA-0015-09652

Investment opportunities exceeding $1 billion

Focused on providing our customers with access to low-cost gas
and cost-effective technologies that reduce emissions
as they also improve system reliability

Potential Investment	Description	Amount
Bridgeport Harbor Station	New 450 MW CCGT Unit	$500 -- $700
PSEG -- Long Island	Utility 2.0 Energy Efficiency Filing	$200 -- $345
Artificial Island	FERC 1000 Project*	$250 -- $300
PennEast Pipeline	Equity Interest	$100 -- $120
PSE&G Energy Efficiency	Program Extension	$100 -- $100
Total		$1,150-$1,565

*Artificial Island Project includes amount for related compensator which has been assigned to PSE&G.

SI-SSA-0015-09653

PSEG Annual Dividend – A long history of growth and returning cash to shareholders with a financial position that provides opportunity for consistent and sustained growth

SI-SSA-0015-09663

Energy Strong Agreement supports customers' needs in the aftermath of Superstorm Sandy

- Settled with NJBPU Staff and all other parties in May 2014 for $1.22 billion; approved by the NJBPU in May 2014
- Program addresses system resiliency and hardening by:
  - ✓ $620 million to raise, relocate or protect 29 switching and substations that were damaged by water in recent storms
  - ✓ $350 million to replace and modernize 250 miles of low-pressure, cast iron gas mains in or near flood areas
  - ✓ $100 million to create redundancy in the electric system, reducing outages when damage occurs
  - ✓ $100 million to deploy smart grid technologies to better monitor system operations to increase our ability to more swiftly deploy repair teams
  - ✓ $50 million to protect five natural gas metering stations and a liquefied natural gas station affected by Sandy or located in flood zones

SI-SSA-0015-09664

Over 70% of PSE&G's $11.3 billion investment program will be recovered through contemporaneous mechanisms

PSE&G TRANSMISSION

PSEG

We make things work for you.

SI-SSA-0015-09667

Transmission has delivered, and has grown to represent ~36% of rate base

Transmission represented ~36% of rate base at YE 2013 up from ~15% at YE 2009

SI-SSA-0015-09668

PSE&G's existing major transmission

investment program remains on schedule and on budget

Major Transmission Projects

Project Roster	Approved ROE	Inclusion of CWIP in Rate Base	100% Recovery of Costs Due to Abandonment	Project Estimate Up To ($ Millions)	Expected In-service Date
Susquehanna-Roseland	12.93%	✓	✓	$790	June 2014 / June 2015
Northeast Grid Reliability	11.93%	✓	✓	$907	June 2015
North Central Reliability	11.68%	✓	✓	$390	Completed
Burlington–Camden 230kV	11.68%	✓	✓	$399	Completed
Mickleton–Gloucester–Camden 230kV	11.68%	✓	✓	$435	June 2015
Bergen—Linden Corridor 345kV	11.68%	✓	✓	$1,200	June 2018

SI-SSA-0015-09669

Susquehanna-Roseland consists of constructing 150 miles of 500kV circuit (46 miles in NJ) with two new 500kV GIS switching stations at Roseland and Hopatcong

Project Estimate Up To*	Through Year-end 2013	Expected In-service Date
$790M	$661M	Phase 1 – **Completed** Phase 2 – June 2015

- PJM RTEP project b0489
- ROE of 12.93% (including 1.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves reliability and reduces congestion

Project Status: The eastern part of line from Hopatcong to Roseland, NJ in service April 2014; NJ construction planned to be completed in Q3 2014. PA portion outside plant construction in progress. Western portion in NJ and the PA portion is planned to go in service June 2015.

SI-SSA-0015-09670

*PROJECT IS SHARED WITH PPL. PROJECT ESTIMATE REPRESENTS PSE&G'S CONSTRUCTION RESPONSIBILITY FOR THE NJ PORTION.

Northeast Grid Reliability consists of upgrading approximately 50 overhead circuit miles of 138kV transmission line to 230kV, constructing ~18 miles of new underground 230kV lines, and converting/upgrading 12 existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$907M	$228M	June 2015

- PJM RTEP project b1304
- ROE of 11.93% (including 0.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment
- Project estimate has increased ~$12M associated with hardening related scope changes as a result of Superstorm Sandy

Customer Benefit: Improves reliability and increases transfer capability

Project Status: Nearing completion of engineering/design and licensing/permitting phase. Outside and inside plant construction are in progress

SI-SSA-0015-09671

North Central Reliability consists of upgrading 55 circuit miles of 138kV transmission line to 230kV, and converting six existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$390M	$349M	Completed

- PJM RTEP project b1154
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves power quality and increases transfer capability

Project Status: In service April 2014

SI-SSA-0015-09672

Burlington-Camden 230kV consists of upgrading 37 circuit miles (30 miles of overhead and 7 miles of underground) of 138kV transmission line to 230kV, converting the existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$399M	$301M	Completed

- PJM RTEP project b1156
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses voltage reliability and increases transfer capability

Project Status: In service April 2014

SI-SSA-0015-09673

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$435M	$122M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses thermal reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-09674

Bergen-Linden Corridor is a recently approved project which will provide a double-circuit 345kV line to maintain reliability

Project Estimate Up To	Through Year-end 2013	Expected Completion Date
$1,200M	-	June 2018

- PJM RTEP project b2436
- 30 miles of underground cable
  - New ~ 23 miles
  - Reconductor (Upgrade of 138 to 345) ~7 miles
- 13 miles of double circuit overhead conductor (replacing double circuit 138 with double circuit 345)
- 11 station upgrades to 345kV

Customer Benefit: Addresses thermal and short-circuit reliability

Project Status: Engineering

SI-SSA-0015-09675

Planned transmission spend of $6.8 billion

is driven by PJM reliability projects, 69kV conversions and life-cycle replacement projects

E= ESTIMATE

SI-SSA-0015-09676

PSE&G's processes and culture are the foundation for project execution success

People

- Diverse, well-rounded team
- Culture with a focus for on-time, on-scope and on-budget execution
- Successful recruitment, development and retention strategies
- Strong unions and supplier relationships

Process

- Cradle to grave project execution organization
- Processes designed to be scalable, repeatable and improvable
- Emphasis on best practices and lessons learned sharing
- Improvements driven by performance metric management

Environment

- Collaborative relationship with regulatory agencies
- Innovative design and construction practices to minimize environmental impacts
- Robust environmental compliance system

SI-SSA-0015-09677

PSE&G's demonstrated ability to successfully execute large projects leaves us well positioned to pursue new opportunities

- Future RTEP as identified by PJM
- Near-term participation in RTO competitive open planning windows
  - PJM
  - MISO
  - NYISO
- Participating in competitive solicitations under FERC 1000 -- Artificial Island recommendation

PSEG LONG ISLAND

PSEG

We make things work for you.

SI-SSA-0015-09680

PSEG was selected to operate Long Island Power Authority's (LIPA) electric transmission and distribution system for 12 years starting in 2014

- Pursuant to the Operating Services Agreement (OSA), all expenses and capital costs to operate the system are pre-funded by LIPA and passed through to their customers
- Compensation consists of a fixed fee and an incentive fee
  - Fixed compensation fee for 2014 with scheduled increases in 2015 and 2016
  - Starting in 2015 PSEG Energy Resources and Trading (ER&T) begins managing fuel/energy contracts
  - PSEG Long Island expected to contribute $0.03 to operating earnings in 2014 increasing to $0.07 per share in 2016 including contribution at ER&T
- Potential for an 8-year extension of the OSA

SI-SSA-0015-09681

PSEG Long Island commenced operations

on January 1, 2014

Key elements of Operating Services Agreement

Increased PSEG scope and control	Use of PSEG brand as PSEG Long Island	3-Year rate freeze (2013-2015)
Performance metrics	NY Department of Public Service oversight	Utility 2.0 – Expanded program filed ~$345 million

Early performance

Successful transition to PSEG Long Island	Improved stakeholder communications	Achieving reliability and customer satisfaction metrics

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-09683

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-09684

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units operated at over 90% capacity factors for the 9th consecutive year through 2013 • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing conditions • Linden CCGT and Salem 2 nuclear unit achieved record output in 2013	• "Getting the most out of existing fleet" • Locational advantage • O&M control programs have delivered a CAGR of 1.6% between 2009 and 2014 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-09685

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2013 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch • Completed 19 MW solar project, 4 MW project under construction, established robust pipeline • Nuclear ESP is expected in 2015

SI-SSA-0015-09686

PSEG Power met 2013 challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• SuperStorm Sandy impacted our generating sites • Cold and hot weather extremes created challenging operating environment, but also presented opportunities		• Unit outages and planned transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Optimized unit dispatch across fleet during storm recovery • Expedited return from storm outages, restored margin opportunities • High availability when needed • Achieved fuel cost savings • Captured value through coal/gas switching, unit flexibility • Coal & oil sales optimized inventory • Flexibility of portfolio captured real-time basis opportunities

SI-SSA-0015-09687

PSEG Power exceeded 2013's earnings guidance

OPERATING EARNINGS FOR PSEG POWER IN 2013; SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. *ASSETS TRANSFERRED TO POWER AT YEAR-END 2013.

SI-SSA-0015-09688

PSEG Power has generating assets

in three competitive markets

- Assets near loads
- Low cost portfolio
- Fuel flexibility with gas cost advantage
- Poised to benefit from volatility in real-time markets
- Fleet will maintain diversity and efficiency after HEDD
- Most sites suitable for expansion

SI-SSA-0015-09689

PSEG Power will maintain diversity and efficiency after a realignment of the fleet due to HEDD

Objective 2013 → 2017

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Environmental improvement
- Peach Bottom (PB) uprate
- Advanced Gas Path (AGP)
- Kalaeloa and Solar transfer adds ~200MW of capacity

Fuel Diversity

Energy Produced

E=ESTIMATE

SI-SSA-0015-09690

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel flexibility for >60% of fleet

SI-SSA-0015-09691

PSEG Power Nuclear is a critical element of our success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3
• Operated by PSEG Nuclear • PSEG Ownership: 100% • Technology: Boiling Water Reactor • Total Capacity: 1,178 MW • Owned Capacity: 1,178 MW • License Expiration: 2046 • Next Refueling ➢ Spring 2015	• Operated by PSEG Nuclear • PSEG Ownership: 57% • Technology: Pressurized Water Reactor • Total Capacity: 2,365 MW • Owned Capacity: 1,358 MW • License Expiration: 2036 and 2040 • Next Refueling ➢ Unit 1 – Spring 2016 ➢ Unit 2 -- Fall 2015	• Operated by Exelon • PSEG Ownership: 50% • Technology: Boiling Water Reactor • Total Capacity: 2,251 MW • Owned Capacity: 1,125 MW • License Expiration: 2033 and 2034 • Next Refueling ➢ Unit 2 – Spring 2016 ➢ Unit 3 – Fall 2015 • Uprate: 130 MW (PS Share) Unit 2 - 2015/Unit 3 - 2016

SI-SSA-0015-09692

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations: nine consecutive years of >90% capacity factor through 2013
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - FLEX* plan submitted with implementation starting with Fall outage
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

SI-SSA-0015-09693

Power's nuclear fleet is well positioned

with significantly lower-than-average US cost structure

*SOURCE: ELECTRIC UTILITY COST GROUP

SI-SSA-0015-09694

PSEG Power's Fossil Fleet Performance

has shown improvement

- Fossil Capacity Factor rebounded with market
- Peaking Units maintain high start success

- Coal EFORp improving
- CC EFORp less than 1% in 2013
- Consistent recipient of EFORp payments

SI-SSA-0015-09695

PSEG

*LM6000 AND 7EA UNITS

PSEG Power improvements achieved in combined cycle fleet efficiency

Combined Cycle Operating Heat Rate

Actions Taken to Create Value

- Operational Excellence Model
- Training programs
- Unit testing initiative
- Outage work to restore efficiency
- Second gas line at BEC

- Heat rate improvement 2008-2013 translates to meaningful fuel savings at current market prices

- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional fuel savings

SI-SSA-0015-09696

Investing to expand CCGT capacity and improve efficiency

PSEG Power - CCGT Uprate Project

- Expand Power's CCGT fleet, one of the largest gas-fired portfolios in PJM, with incremental base and peaking MWs
- Retrofit Bergen, Linden and BEC with Advanced Gas Path (AGP) components at cost of ~$120M over 2014 - 2018

AGP Project Benefits

- ✓ CCGT capacity uprates of ~150 MW:
  - Linden (63 MW – Completed)
  - Bergen (31 MW – 2015)
  - BEC (58 MW – 2017-2018)
- ✓ Increases Efficiency - Combined Cycle (CC) heat rate improvement ~ 1.2%
- ✓ Upgrades technology and extends maintenance outage cycles

SI-SSA-0015-09697

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- Cost control through testing coordination program

SI-SSA-0015-09698

PSEG Power's capital expenditures for environmental requirements are essentially complete*

PSEG expanding supply of low-cost Marcellus gas

Proposed PennEast Pipeline Project

- PSEG plans to invest $100 - $120 million in the to-be-constructed PennEast Pipeline, a 105.5 mile pipeline that would bring gas from eastern Pennsylvania to New Jersey
- PSEG ER&T would contract for approximately 125mmcf/day of PennEast's 1 bcf/day capacity under a 15-year contract; other project sponsors have committed to offtake ~500mmcf/day
- PSEG and its customers would benefit from the displacement of higher-cost, Gulf Coast gas supply
- Targeted in-service date is November 2017

SI-SSA-0015-09708

Industry infrastructure build through 2018

to meet demand growth

New investment will increase pipeline takeaway capacity from low-cost Marcellus and Utica shale basins to meet demand in the South and Midwest

SI-SSA-0015-09709

Sustainable Advantage: Forward power curves indicate PSEG Zone retains premium price

Growing importance of the winter peak has influenced PJM reliability planning … with supportive implications for price formation

SI-SSA-0015-09710

PSEG

* MARKET AS OF OCTOBER 22, 2014. SOURCE: ICE/BROKER QUOTES.

Competitive Advantage: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

SI-SSA-0015-09711

Competitive Advantage: ~25% of Power's gas for generation comes from Marcellus

- Our combined cycle and peaking assets have been able to take advantage of locational gas price volatility driven by production and logistical constraints
- Lower cost shale supply provides additional savings during periods of lower residential gas demand

SI-SSA-0015-09712

PSEG

*AS OF 8/13/2014

Competitive Advantage: Locational advantage from short term basis volatility

PS Zone Annual Basis to PJM-W

PS Zone Day Ahead On Peak Monthly Basis to PJM-W

PS Zone Real Time On Peak Hourly Basis to PJM-W

- Annual basis benefits baseload units
- Intermediate units flexible to seasonal opportunities
- Combined Cycle and Peaking units positioned to optimize daily and hourly volatility

SI-SSA-0015-09713

ANNUAL FORWARD (F) BASIS TO PJM-WEST AS OF 8/13/2014. 2014F INCLUDES HISTORY AND FORWARDS.

Sustainable Advantage: BGS Auction provides excellent opportunity to forward hedge our generation

BGS sales account for about a quarter of our forward portfolio of hedges

SI-SSA-0015-09714

$/MWH; BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2012-2014 ARE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2014.

Sustainable Advantage: Hedging strategy designed to protect gross margin while leveraging the portfolio

		Oct-Dec 2014	2015	2016
Base Load (Nuclear and Base Load Coal)	Volume TWh	8	36	36
	% Hedged	100%	100%	55-60%
	Price $/MWh	$49	$50	$49
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	5	21	21
	% Hedged	50-55%	5-10%	0%
	Price $/MWh	$49	$50	$49
Total	Volume TWh	13	55-57	55-57
	% Hedged	80-85%	65-70%	35-40%
	Price $/MWh	$49	$50	$49

HEDGE PERCENTAGES AND PRICES AS OF SEPTEMBER 30, 2014. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS. EXCLUDES SOLAR AND KALAELOA.

SI-SSA-0015-09715

Sustainable Advantage: PJM's capacity market continues to recognize locational value

RPM Auction Results					
($/MW-day)	2013 / 2014*	2014 / 2015*	2015 / 2016*	2016 / 2017*	2017 / 2018
Power's Average Prices	$242	$166	$166	$166	**$165**
Rest of Pool Prices	$28	$126	$136	$59	**$120**
Power's Cleared Capacity (MW)	10,890	10,710	9,210	8,610	**~8,700**

2017/2018 RPM Auction Influenced By:

- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Updated Transfer Capabilities
- New Build/Cost of New Entry
- Demand Response

SI-SSA-0015-09716

PSEG

*PSEG POWER'S AVERAGE PRICES AND CLEARED CAPACITY (MW) REFLECT BASE AND INCREMENTAL RPM AUCTION RESULTS. DELIVERY YEAR RUNS FROM JUNE 1 TO MAY 31 OF THE NEXT CALENDAR YEAR.

PJM Capacity Performance Proposal:
aims to increase electric supply reliability

- **Capacity performance (CP)** proposal places **emphasis on reliability** given observed outages during times of extreme weather stress and anticipated retirements; Imposition of higher penalty structure to **encourage availability**

- **Generator availability/flexibility is key** objective for units with secure fuel supply capable of meeting operating standards

- **Elimination of 2.5% holdback**, making all capacity resources annual products, net CONE bidding safe harbor, and the change in the demand curve (VRR) support price formation and improve resource adequacy

December 2014
PJM Expected to File
Final CP Proposal

February 2015
Expected FERC Response
to PJM CP Proposal

May 2015
RPM Auction for
2018/2019 Capacity Year

SI-SSA-0015-09717

PSEG Power's Value Proposition

- Well-positioned fleet of merchant generating assets concentrated in PJM market
- Advantaged by low cost structure, fuel diversity and dispatch flexibility
- Low environmental capital requirements
- Capacity uprates to enhance value of nuclear and combined cycle stations
- Consistent hedging strategy recognizes asset flexibility
- Continue to meet commitments and to provide free cash flow

SI-SSA-0015-09718

PSEG FINANCIAL REVIEW & OUTLOOK

PSEG

We make things work for you.

SI-SSA-0015-09719

Strong financial position to support our business initiatives

2013 Financial Position

- ✓ Exceeded upwardly revised 2013 earnings guidance
- ✓ Pension fully funded
- ✓ Strong balance sheet and upgraded credit ratings

2014 and Beyond

- ✓ Continued positive earnings trend in 2014
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investments without equity issuance
- ✓ Growth in PSE&G investments with contemporaneous returns
- ✓ Diversified Power assets with a balanced hedge profile
- ✓ Growth in PSE&G Cash from Operations, with continued significant Cash from Operations/FFO at Power
- ✓ Increased Dividend by $0.04 to indicative annual rate of $1.48 for 2014
- ✓ Opportunity for consistent and sustainable dividend growth

SI-SSA-0015-09720

Exceeded upwardly revised guidance

in both businesses

PSEG Operating Earnings		
$ Millions (except EPS)	**2012**	**2013**
PSE&G	$528	$612
PSEG Power	$663	$710
Other	$45	($13)
Operating Earnings	$1,236	$1,309
*Operating EPS**	**$2.44**	**$2.58**

Upwardly Revised Earnings Guidance (Nov 2013)	**$2.40 - $2.55**
Earnings Guidance (Feb 2013)	**$2.25 - $2.50**

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

NOTE: 2012 OPERATING EARNINGS RE-STATED FOR TRANSFER OF ASSETS FROM PSEG HOLDINGS TO PSEG POWER.

In 2013, PSE&G invested over $2B, using $1.4B of internally generated cash flow and debt, while maintaining its capital structure

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.

SI-SSA-0015-09722

In 2013, Power's Free Cash Flow supported PSE&G's capital program and shareholder dividend

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.
(2) OTHER CASH FLOW INCLUDES HOLDINGS NET CASH FLOW AND PARENT CASH.

SI-SSA-0015-09723

PSEG growth spend, including Energy Strong, of ~$6.4B represents ~76% of total investment

E = ESTIMATE; CAPITAL INCLUDES AFUDC AND IDC.

SI-SSA-0015-09724

PSE&G's Capital Program drives double-digit growth in rate base and earnings over the 2013 to 2016 period

SI-SSA-0015-09725

PSE&G's Cash from Operations and Power's Free Cash Flow support growth investments without the need for new equity

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$500M FROM 2014-2016
(2) OTHER CASH FLOW INCLUDES PSEG LI, HOLDINGS NET CASH FLOW, CASH, AND SHORT TERM DEBT
E = ESTIMATE

SI-SSA-0015-09726

Power's key credit metric supports incremental investment opportunities

- Increased contribution to earnings from the more stable regulated business allows us to reset Power's FFO/Debt threshold from 35% to 30%, providing additional financial flexibility
- Power's annual Cash From Operations and Funds From Operations each average ~$1.1B over the 2014 to 2016 period supported by:
  - Capacity Revenues
  - Hedged Generation
  - O&M Control
- Financial strength can be used to pursue future growth in both businesses beyond current plans

SI-SSA-0015-09727

Pension: Our Long Term Asset allocation strategy resulted in a ~17% increase in pension assets during 2013

PBO Funded Ratio	83%			Fully Funded Pension →	106%

SI-SSA-0015-09728

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09751

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of April 28, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com , under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. PSEG

We make things work for you.

PSEG's Value Proposition

- A stable platform with a $15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 110-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

SI-SSA-0015-09754

Two strong businesses

A stable platform, each with growth opportunities

* GAS FIRM SALES ONLY.
** ESTIMATED ANNUAL GROWTH PER YEAR, ASSUMES NORMAL WEATHER.

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (326 MW_{DC}/257 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-09757

PSEG

*POWER ANNOUNCED RETIREMENTS OF HUDSON AND MERCER GENERATING STATIONS AS OF JUNE 1, 2017.

PSEG Policy and Regulatory focus

on mechanisms that provide customers clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- True-up data from 2010 base rate case for known changes in customers usage, taxes, O&M and investments

Long-Term Infrastructure Investment Platform

- Seek extension of existing infrastructure programs, e.g., GSMP, and broaden investment platform

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy to recognize the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-09764

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2012 - 2016

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2017-2021E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth rate

SI-SSA-0015-09765

PSE&G's capital spending drives high single-digit growth in rate base

E = ESTIMATE.

SI-SSA-0015-09766

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-09767

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2016 to 2021E

[1] REFLECTS ANNOUNCED EARLY RETIREMENT OF HUDSON AND MERCER UNITS IN MID-2017.
ALL PERIODS EXCLUDE SOLAR (257 MW_{AC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.
**2016 COAL INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS. E= ESTIMATE.

Power's free cash flow improves as construction program ends, providing funding for growth

PSEG Power
2017E – 2021E Capital Spending (1)

PSE&G
2017E – 2021E Capital Spending (1)

(1) CAPITAL INCLUDES IDC AND AFUDC. E = ESTIMATE.

SI-SSA-0015-09769

Strong credit metrics provide substantial investment capacity for increased utility investment

Average Funds From Operations / Debt
2017E – 2019E

	Power	PSEG
Estimate	~40%	Low – 20's
Minimum Threshold	30%	High - teens

Total Incremental Investment Capacity

Incremental capacity invested in utility would be matched with utility debt

SI-SSA-0015-09770

E=ESTIMATE.

PSEG has demonstrated an ability to control O&M, with plans to reduce in 2017

SI-SSA-0015-09771

PSEG

(1) POWER EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON / MERCER EARLY RETIREMENT WRITE-DOWN, DISTRIBUTION EXCLUDES ELECTRIC AND GAS BAD DEBT. E = ESTIMATE.

2017 Federal Tax Reform – PSEG is well positioned

Given positive non-utility contribution to earnings and a strong balance sheet, PSEG is well positioned for potential tax reform

Assumption	PSE&G	PSEG Power	PSEG Parent
Reduction of Corporate Tax Rate	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period	After-tax earnings and cash flow increase One-time non-cash earnings benefit from reduction in deferred tax liability	After-tax earnings and cash flow improve
100% Expensing of Capital Expenditures	Impact on rate base growth comparable to existing bonus depreciation rules	Cash flow improves	
Elimination of Deductibility of Interest Expense and Border Adjustment Tax	Change in cost anticipated to be passed through to customers	Well positioned given low debt balance Uncertainty on Border Adjustment Tax	Well positioned given low debt balance

SI-SSA-0015-09772

Opportunity for meaningful and sustainable dividend growth

SI-SSA-0015-09773

PSEG Summary

- 2016 Operating Earnings (non-GAAP) at upper end of revised guidance of $2.80 - $2.95 per share
- PSE&G capital spending provides high single-digit rate base growth for foreseeable future balanced between Transmission and Distribution
- Power expected to generate significant free cash flow following CCGT construction program and transformation to a more efficient generation fleet
- Strong balance sheet and cash flow support current capital program and new investment opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2017 demonstrates meaningful and sustainable dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

SI-SSA-0015-09774

PSEG's Value Proposition

- A stable platform with a $15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 110-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

SI-SSA-0015-09775

PSEG FINANCIAL APPENDIX

PSEG

We make things work for you.

SI-SSA-0015-09776

Q1 2017 – Achieved Solid Financial Results

First Quarter Highlights

- Net Income of $0.22 vs. Net Income of $0.93 per share in Q1 2016
- Non-GAAP Operating Earnings* of $0.92 vs. $0.91 per share in Q1 2016
- Net Income reflects decision to retire Hudson-Mercer in June 2017 and REMA lease reserve
- PSE&G achieved 13% growth in Q1 Net Income over Q1 2016, supported by increased investment in transmission and distribution
- PSEG Power results aided by continued cost containment

Operational Excellence

- Nuclear fleet performance achieved 100% capacity factor for Q1

Disciplined Capital Investment – Producing Results

- PSEG expected to invest ~$4.7 billion in 2017, consisting primarily of $3.4 billion at PSE&G and $1.2 billion at PSEG Power
- Regulatory/Legislative Focus: NJ Needs Nuclear advocacy efforts; Energy Efficiency extension and expansion filing in March
- Major capital initiatives on track: Bridgeport Harbor 5 received all needed permits to begin construction phase

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of April 28, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com , under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. * GAS FIRM SALES ONLY.
** ESTIMATED ANNUAL GROWTH PER YEAR, ASSUMES NORMAL WEATHER.

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (326 MW_{DC}/257 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-09789

PSEG

*POWER ANNOUNCED RETIREMENTS OF HUDSON AND MERCER GENERATING STATIONS AS OF JUNE 1, 2017.

PSEG Policy and Regulatory focus

on mechanisms that provide customers clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- True-up data from 2010 base rate case for known changes in customers usage, taxes, O&M and investments

Long-Term Infrastructure Investment Platform

- Seek extension of existing infrastructure programs, e.g., GSMP, and broaden investment platform

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy to recognize the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-09796

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2012 - 2016

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2017-2021E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth rate

SI-SSA-0015-09797

PSE&G's capital spending drives high single-digit growth in rate base

E = ESTIMATE.

SI-SSA-0015-09798

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-09799

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2016 to 2021E

Energy Produced increases by >18%

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

[1] REFLECTS ANNOUNCED EARLY RETIREMENT OF HUDSON AND MERCER UNITS IN MID-2017.
ALL PERIODS EXCLUDE SOLAR (257 MW_{AC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.
**2016 COAL INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS. E= ESTIMATE.

Power's free cash flow improves as construction program ends, providing funding for growth

PSEG Power
2017E – 2021E Capital Spending (1)

PSE&G
2017E – 2021E Capital Spending (1)

(1) CAPITAL INCLUDES IDC AND AFUDC. E = ESTIMATE.

SI-SSA-0015-09801

Strong credit metrics provide substantial investment capacity for increased utility investment

Average Funds From Operations / Debt
2017E – 2019E

	Power	PSEG
Estimate	~40%	Low – 20's
Minimum Threshold	30%	High - teens

Total Incremental Investment Capacity

Incremental capacity invested in utility would be matched with utility debt

SI-SSA-0015-09802

PSEG

E=ESTIMATE.

PSEG has demonstrated an ability to control O&M, with plans to reduce in 2017

SI-SSA-0015-09803

PSEG

(1) POWER EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON / MERCER EARLY RETIREMENT WRITE-DOWN, DISTRIBUTION EXCLUDES ELECTRIC AND GAS BAD DEBT. E = ESTIMATE.

2017 Federal Tax Reform – PSEG is well positioned

Given positive non-utility contribution to earnings and a strong balance sheet, PSEG is well positioned for potential tax reform

Assumption	PSE&G	PSEG Power	PSEG Parent
Reduction of Corporate Tax Rate	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period	After-tax earnings and cash flow increase One-time non-cash earnings benefit from reduction in deferred tax liability	After-tax earnings and cash flow improve
100% Expensing of Capital Expenditures	Impact on rate base growth comparable to existing bonus depreciation rules	Cash flow improves	
Elimination of Deductibility of Interest Expense and Border Adjustment Tax	Change in cost anticipated to be passed through to customers	Well positioned given low debt balance Uncertainty on Border Adjustment Tax	Well positioned given low debt balance

SI-SSA-0015-09804

Opportunity for meaningful and sustainable dividend growth

SI-SSA-0015-09805

PSEG Summary

- 2016 Operating Earnings (non-GAAP) at upper end of revised guidance of $2.80 - $2.95 per share
- PSE&G capital spending provides high single-digit rate base growth for foreseeable future balanced between Transmission and Distribution
- Power expected to generate significant free cash flow following CCGT construction program and transformation to a more efficient generation fleet
- Strong balance sheet and cash flow support current capital program and new investment opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2017 demonstrates meaningful and sustainable dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

SI-SSA-0015-09806

PSEG's Value Proposition

- A stable platform with a $15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 110-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

SI-SSA-0015-09807

PSEG FINANCIAL APPENDIX

SI-SSA-0015-09808

PSEG

We make things work for you.

Q1 2017 – Achieved Solid Financial Results

First Quarter Highlights

- Net Income of $0.22 vs. Net Income of $0.93 per share in Q1 2016
- Non-GAAP Operating Earnings* of $0.92 vs. $0.91 per share in Q1 2016
- Net Income reflects decision to retire Hudson-Mercer in June 2017 and REMA lease reserve
- PSE&G achieved 13% growth in Q1 Net Income over Q1 2016, supported by increased investment in transmission and distribution
- PSEG Power results aided by continued cost containment

Operational Excellence

- Nuclear fleet performance achieved 100% capacity factor for Q1

Disciplined Capital Investment – Producing Results

- PSEG expected to invest ~$4.7 billion in 2017, consisting primarily of $3.4 billion at PSE&G and $1.2 billion at PSEG Power
- Regulatory/Legislative Focus: NJ Needs Nuclear advocacy efforts; Energy Efficiency extension and expansion filing in March
- Major capital initiatives on track: Bridgeport Harbor 5 received all needed permits to begin construction phase

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, capacity market design, transmission planning and cost allocation rules, including how transmission projects are planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as competition for certain transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies, and
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09815

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slide A at the end of this presentation includes a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

*ENERGY HOLDINGS INCLUDES PARENT.

PSEG's Strategy – delivering results

Our businesses' focus on cost-effective, reliable operations yields strong cash flow

We are funding growth-oriented investments aligned with customer needs and state energy policies

We are enhancing the competitiveness of our environmentally well-positioned generation business

The results of our financial strategy support a credit profile capable of meeting our corporate objectives and providing sustained dividend growth for our shareholders

SI-SSA-0015-09822

PSE&G Service Territory

Transmission Statistics (as of December 31, 2013)

	Network Circuit Miles	Billing Peak (MW)	Historical Annual Load Growth 2009-2013
Electric Transmission	1,499	10,414	(0.5)%

PSE&G is NJ's oldest and largest publicly-owned utility

Public Service Corp. was formed in 1903 by amalgamating more than 400 gas, electric and transportation companies in NJ, and renamed Public Service Electric & Gas in 1948

PSE&G currently serves nearly three quarters of NJ's population in a 2,600-square-mile diagonal corridor across the state from Bergen to Gloucester counties.

PSE&G is NJ's largest provider of gas and electric service, servicing 1.8 million gas customers and 2.2 million electric customers in more than 300 urban, suburban and rural communities, including NJ's six largest cities.

NJ is ranked 2nd nationally in personal income per capita

Energy Strong Agreement supports customers' needs in the aftermath of Superstorm Sandy

- Settled with NJBPU Staff and all other parties in May 2014 for $1.22 billion; approved by the NJBPU in May 2014
- Program addresses system resiliency and hardening by:
  - ✓ $620 million to raise, relocate or protect 29 switching and substations that were damaged by water in recent storms
  - ✓ $350 million to replace and modernize 250 miles of low-pressure, cast iron gas mains in or near flood areas
  - ✓ $100 million to create redundancy in the electric system, reducing outages when damage occurs
  - ✓ $100 million to deploy smart grid technologies to better monitor system operations to increase our ability to more swiftly deploy repair teams
  - ✓ $50 million to protect five natural gas metering stations and a liquefied natural gas station affected by Sandy or located in flood zones

SI-SSA-0015-09826

PSEG LONG ISLAND

PSEG

We make things work for you.

SI-SSA-0015-09827

PSEG was selected to operate Long Island Power Authority's (LIPA) electric transmission and distribution system for 12 years starting in 2014

- Pursuant to the Operating Services Agreement (OSA), all expenses and capital costs to operate the system are pre-funded by LIPA and passed through to their customers
- Compensation consists of a fixed fee and an incentive fee
  - Fixed compensation fee for 2014 with scheduled increases in 2015 and 2016
  - Starting in 2015 PSEG Energy Resources and Trading (ER&T) begins managing fuel/energy contracts
  - PSEG Long Island expected to contribute $0.03 to operating earnings in 2014 increasing to $0.07 per share in 2016 including contribution at ER&T
- Potential for an 8-year extension of the OSA

SI-SSA-0015-09828

PSEG Long Island commenced operations

on January 1, 2014

Key elements of Operating Services Agreement

Increased PSEG scope and control	Use of PSEG brand as PSEG Long Island	3-Year rate freeze (2013-2015)
Performance metrics	NY Department of Public Service oversight	Utility 2.0 – Expanded program filed ~$345 million

Early performance

Successful transition to PSEG Long Island	Improved stakeholder communications	Achieving reliability and customer satisfaction metrics

SI-SSA-0015-09829

PSEG Power has generating assets

in three competitive markets

- Assets near loads
- Low cost portfolio
- Fuel flexibility with gas cost advantage
- Poised to benefit from volatility in real-time markets
- Fleet will maintain diversity and efficiency after HEDD
- Most sites suitable for expansion

SI-SSA-0015-09830

PSEG Power – Value-advantaged through asset diversity, fuel flexibility, location and installed environmental controls

Fuel Diversity
Total MW: 13,450

Energy Produced
Total GWh: 54,264

Energy Market Served
Total MW: 13,450

- Gas
- Pumped Storage
- Nuclear
- Oil
- Coal*
- Solar

- Load Following
- Peaking
- Base load

SI-SSA-0015-09831

Competitive Advantage:

Heat Rate Diversity & Flexible Dispatch

*EXCLUDES 383 MW BRIDGEPORT HARBOR COAL PLANT IN CT.
** EXCLUDES 1,527 MW OF GAS/OIL/SOLAR OUTSIDE OF PJM AS WELL AS 200 MW OF PUMPED STORAGE.

SI-SSA-0015-09832

PSEG

PSEG ER&T – Maximizing the value of Power's assets

- Among the nation's first energy trading operations
- Marketing the output of PSEG Power's generating assets – comprised of one of the largest portfolios in the PJM market (PA, NJ, and MD) – one of the largest electricity markets in the world
- Trading of electricity, generating capacity, natural gas, emission credits, transmission rights, coal and oil, and renewables throughout the greater Northeastern U.S.
- Among the few trading operations with an integrated trading / generation model

SI-SSA-0015-09833

Competitive/Sustainable Advantage:

PSEG expanding supply of low-cost Marcellus gas

Proposed PennEast Pipeline Project

- PSEG plans to invest $100 - $120 million for An equity interest in the to-be-constructed PennEast Pipeline, a 105.5 mile pipeline that would bring gas from eastern Pennsylvania to New Jersey
- PSEG ER&T would contract for approximately 125mmcf/day of PennEast's 1 bcf/day capacity under a 15-year contract; other project sponsors have committed to offtake ~500mmcf/day
- PSEG and its customers would benefit from the displacement of higher-cost, Gulf Coast gas supply
- Targeted in-service date is November 2017

SI-SSA-0015-09834

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09850

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of February 23, 2018.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss

PSEG Policy and Regulatory focus

on mechanisms that provide customers with clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- Requested ~1% increase in revenue primarily to recover investments, partially offset by benefits related to tax reform

Long-Term Infrastructure Investment Platform

- BPU approved policy providing for constructive investment recovery mechanism encouraging investment in long-term infrastructure

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy that recognizes the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-09879

PSEG's Value Proposition

- A stable platform with a $13-$15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 111-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

SI-SSA-0015-09880

PSEG APPENDIX

SI-SSA-0015-09881

PSEG

We make things work for you.

PSE&G Distribution Base Rate Case Filing

- **Dockets** ER 18010029 (Electric) and GR 18010030 (Gas)
- **Filed** January 12, 2018; **Anticipate new rates** Fourth Quarter 2018
- **Test year** – July 1, 2017 through June 30, 2018 (with certain pro forma adjustments)
- **Rate base** of $9.6B ($5.6B E; $4B G) as of December 31, 2018
- **ROE** request of 10.3%; **Capitalization structure** with 54% equity
- **Requested Increase:** ~1% relative to overall revenue
- **O&M and Sales** are roughly flat to last rate case eight years ago
- **Capital recovery** beyond clauses and $125M increase in Depreciation rate
- **Decoupling** of revenues from sales volumes
- **Taxes** – lower tax rate and flow back of deferred taxes to offset storm costs and reduce impact on customer bills
- **Pending updates:**
  - **Taxes** - BPU order to lower rates effective April 1 will accelerate savings planned in rate case; update for other tax impacts such as loss of bonus depreciation
  - **9x3 update** to be filed in May

Overall bill for the typical PSE&G residential customer, even after consideration of the ~1% request, would remain ~20% lower than bills after last base rate case

SI-SSA-0015-09882

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~20% since our last rate case
- Provided Gas bill credits totaling ~$670 per customer since 2012
- Continued investment at the current rate of growth would take about a decade to equal the 2010 bill rates (adjusted for growth in CPI/disposable income)

- Regional price comparison** - Gas is 2nd lowest and Electric is lower than average
- Distribution revenue component is the lowest in the state for Gas and second lowest for Electric

SI-SSA-0015-09883

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Tax Cuts and Jobs Act: PSEG is well positioned

given positive non-utility contribution to earnings and a strong balance sheet

Federal Tax Reform	PSE&G	PSEG Power	Enterprise/Other
Reduction of Corporate Tax Rate to 21%	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period Estimated excess deferred tax balance of $2.1 Billion at YE 2017	After-tax earnings and cash flow increase One-time, non-cash earnings benefit from reduction in deferred tax liability reflected in 2017 GAAP results: $588 Million	After-tax earnings and cash flow increase One-time, non-cash earnings benefit from reduction in deferred tax liability reflected in 2017 GAAP results: $147 Million
Expensing of Capital Expenditures	Bonus depreciation eliminated post 2017 Rate base growth increases by ~1%/year through 2022 relative to prior tax rules	100% expensing -- cash flow increases	
Interest Disallowance Rule 30% Limitation Based on Tax – EBITDA	Not applicable	Well positioned given low debt balance	Well positioned given low debt balance

OUR ESTIMATES AND ANALYSIS ARE PRELIMINARY. THE SEC HAS PROVIDED COMPANIES ONE YEAR TO FINALIZE 2017 ACCOUNTING REQUIREMENTS. FURTHER ADJUSTMENTS IN 2018 MAY BE REQUIRED.

SI-SSA-0015-09887

Tax reform impacts – PSE&G

Lowered federal corporate tax rate from 35% to 21%

- Lowers costs and annual revenue requirements by ~$275M
- Updated Transmission Formula rate lowered by $148M effective 1/1/2018
- Incorporated ~$130M reduction into Distribution base rate case filing

Lower tax depreciation benefits (no bonus depreciation, lower tax rate)

Excess deferred taxes due to lower tax rate of ~$2.1B

- Protected ~$1.6B – Flow back period over the lives of the assets (ARAM method)
- Unprotected ~$0.5B – Flow back period will be addressed with the BPU and FERC

Financial impact

✓ **Rate base growth** - Lower deductions and planned flow back increases rate base by >$1B

✓ Average annual earnings increase by ~$20M in 2019 growing to ~$30M in 2022

✓ Investment program and metrics to support strong credit rating is maintained

PSEG EXECUTIVE PROFILES

PSEG

We make things work for you.

SI-SSA-0015-09889

Ralph Izzo

CHAIRMAN, PRESIDENT AND CHIEF EXECUTIVE OFFICER

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED

Ralph Izzo was elected chairman and chief executive officer of Public Service Enterprise Group Incorporated (PSEG) in April 2007. He was named as the company's president and chief operating officer and a member of the board of directors of PSEG in October 2006. Previously, Mr. Izzo was president and chief operating officer of Public Service Electric and Gas Company (PSE&G).

Since joining PSE&G in 1992, Mr. Izzo was elected to several executive positions within PSEG's family of companies, including PSE&G senior vice president – utility operations; PSE&G vice president – appliance service; PSEG vice president - corporate planning; and PSE&G vice president - electric ventures. In these capacities he broadened his experience in the areas of general management, strategic planning and finance.

Mr. Izzo is a well-known leader within the utility industry, as well as the public policy arena. He is frequently asked to testify before Congress and speak to organizations on matters pertaining to national energy policy.

Mr. Izzo's career began as a research scientist at the Princeton Plasma Physics Laboratory, performing numerical simulations of fusion energy experiments. He has published or presented over 35 papers on magnetohydrodynamic modeling. Mr. Izzo received his Bachelor of Science and Master of Science degrees in mechanical engineering and his Doctor of Philosophy degree in applied physics from Columbia University.

He also received a Master of Business Administration degree, with a concentration in finance from the Rutgers Graduate School of Management. He is listed in numerous editions of Who's Who and has been the recipient of national fellowships and awards. Mr. Izzo has received honorary degrees from the New Jersey Institute of Technology (Doctor of Science), Thomas Edison State University (Doctor of Humane Letters), Bloomfield College (Doctor of Humane Letters), Rutgers University (Doctor of Humane Letters), and Raritan Valley Community College (Associate of Science).

Mr. Izzo is on the board of directors for the New Jersey Chamber of Commerce, the Edison Electric Institute (EEI), the Nuclear Energy Institute (NEI) and the New Jersey Performing Arts Center. He is also a member of the Board of Trustees of Peddie School and the Princeton University Andlinger Center for Energy and the Environment Advisory Council, as well as a member of the Visiting Committee for the Department of Nuclear Engineering at MIT. Mr. Izzo is a former member of the Columbia University School of Engineering Board of Visitors. In addition, he is a former chair of the Rutgers University Board of Governors and the New Jersey Chamber of Commerce.

SI-SSA-0015-09890

Daniel Cregg

EXECUTIVE VICE PRESIDENT AND CHIEF FINANCIAL OFFICER

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED, PUBLIC SERVICE ELECTRIC AND GAS COMPANY, PSEG POWER LLC AND PSEG SERVICES CORPORATION

Daniel J. Cregg was named executive vice president and chief financial officer for Public Service Enterprise Group Incorporated (PSEG) and its subsidiaries in October 2015.

Mr. Cregg is responsible for all financial functions, including Internal Audit Services, Investor Relations and Corporate Development. Given the array of financial instruments which serve as the primary means of selling wholesale energy to customers, Mr. Cregg also has responsibility for the Risk Management function, which provides independent oversight of the PSEG Power trading organization. In addition to finance, Mr. Cregg is responsible for the Strategy and Planning function. He is a member of PSEG's Executive Officer Group.

Prior to his current position, Mr. Cregg was vice president – finance for PSE&G, a role he assumed in June 2013. In 2006, Mr. Cregg was named vice president – finance for PSEG Power. In that capacity and in previous financial roles for Power, Mr. Cregg held leadership positions related to financial reporting and forecasting, investor communications, financings, rating agency interactions, external reporting, cash forecasting, financial valuations, competitive intelligence, and fundamental market modeling, with critical responsibilities in Power's development and strategic planning activities.

Previously, Mr. Cregg was director of PSEG corporate development. He joined PSEG in 1991 with overall responsibility for tax planning, strategy and compliance for PSEG Energy Holdings, including domestic and international tax structuring work for PSEG Global and PSEG Resources.

Before joining PSEG, Mr. Cregg spent five years with the accounting and consulting firm of Deloitte and Touche, providing consulting services to a wide range of clients with an emphasis on the energy industry.

Mr. Cregg holds a Master of Business Administration degree from the Wharton School of the University of Pennsylvania and is a graduate of Lehigh University, where he received a bachelor's degree in accounting.

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-09896

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of February 23, 2018.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss

PSEG STRATEGY: GROWING A HIGH-QUALITY, FINANCIALLY SOUND ENERGY INFRASTRUCTURE COMPANY

Dan Cregg

EXECUTIVE VICE PRESIDENT AND
CHIEF FINANCIAL OFFICER

PSEG

We make things work for you.

SI-SSA-0015-09898

PSEG Strategy - Delivering Value

Operational Excellence: Improving reliability and customer service as we control costs in a low price environment

Financial Strength: Strong financial position supports investment program

Disciplined Investment:

- Program focused on achieving objectives through infrastructure investment that meets customer and shareholder needs
- Robust pipeline of opportunities

Results:

- Double digit growth in rate base and net income at PSE&G
- Reconfiguration of Power's generating fleet: higher quality, more efficient
- Annual growth in common dividend
- Strong credit metrics

SI-SSA-0015-09899

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G

Electric & Gas Delivery and Transmission

Strategy: Investments aligned with public policy and customer needs

Value Proposition: A $11.5 - $13.2 billion infrastructure program with opportunities to expand, producing 7% - 9% annual rate base growth through 2022

2017

Assets $29B
Net Income $973M
Non-GAAP Operating Earnings* $963M

PSEG Power LLC

Regional Competitive Generation

Strategy: Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity

Value Proposition: Provides substantial free cash flow and upside from market rule improvements

2017

Assets $12B
Net Income $479M
Non-GAAP Operating Earnings* $505M

SI-SSA-0015-09900

ASSETS AND NET INCOME ARE FOR THE YEAR ENDED 12/31/2017. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO ENTERPRISE / OTHER ACTIVITY. *SEE SLIDE A FOR A RECONCILIATION OF NET INCOME TO NON-GAAP OPERATING EARNINGS, SLIDE B FOR RECONCILIATIONS FOR PSE&G AND PSEG POWER, AND SLIDE C FOR ENTERPRISE/OTHER.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: 16 consecutive years of recognition as the most reliable utility in the Mid-Atlantic region • PSEG Power: Improved nuclear capacity factors to ~94% in 2017; Fleet moving towards improved efficiency and environmental position • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Maintaining focus on efficiency, resiliency, and customer satisfaction
Financial Strength	• Non-GAAP Operating Earnings for 2017 exceeded the mid-point of guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • PSEG is a net beneficiary of recent tax legislation • Increased dividend in February 2018 – 14th increase in last 15 years
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2018-2022) with investments in Gas System Modernization Program (GSMP), Transmission, Electric and Gas distribution, Energy Strong and Clean Energy • Potential for additional investments in Renewables and integration of Infrastructure with Customer Access • Power capital program, focused on completing construction at Keys, Sewaren and Bridgeport Harbor, will improve fleet efficiency and geographic diversity

SI-SSA-0015-09901

Focus on earning our cost of capital has provided for growth in operating earnings* and dividends

SI-SSA-0015-09902

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO NON-GAAP OPERATING EARNINGS.

PSEG Policy and Regulatory focus

on mechanisms that provide customers with clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- Requesting ~1% increase in revenue primarily to recover investments, partially offset by benefits related to tax reform

Long-Term Infrastructure Investment Platform

- BPU approved policy providing for constructive investment recovery mechanism encouraging investment in long-term infrastructure

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy that recognizes the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-09903

PSE&G – New Jersey's largest:

- Electric and Gas Distribution utility
- Transmission business
- Investor in renewables and energy efficiency
- Appliance service provider

	Electric	Gas
Customers Growth (2013 – 2017)	2.2 Million 0.6%	1.8 Million 0.6%
2017 Electric and Gas Sales	40,740 GWh	2,397M Therms*
Sales Mix (2017)		
Residential	32%	59%
Commercial	58%	37%
Industrial	10%	4%

PSE&G 2017 Rate Base

SI-SSA-0015-09904

* GAS FIRM SALES ONLY.

PSE&G Investment – Delivering growth

- Our rate base is roughly balanced between federal and state jurisdictions
- Non-GAAP operating earnings growth aligned with rate base growth

SI-SSA-0015-09905

Developing investment opportunities

with near-contemporaneous recovery mechanisms

2018-2022E PSE&G Capital with Program extensions by Recovery Method

$11.5B - $13.2B

$13B plan includes program extension filings comparable to current investment levels:

- GSMP II
- Energy Strong (ES) II
- Clean Energy Future (CEF) filing
  - expansion of current energy efficiency programs
  - electric vehicle programs
  - energy storage
  - LED streetlights

Broad opportunity set of investment potential driven by customer expectations and public policy

FERC Formula Rates	Traditional Recovery Mechanisms	Clause Recovery Mechanisms
Transmission	Distribution Base Rates	Infrastructure / Clean Energy

SI-SSA-0015-09906

Operational Excellence – O&M costs

Demonstrated ability to control O&M, preserving earnings and returns in a low sales growth environment

Cost control actions:

- PSE&G is utilizing the Lean Six Sigma discipline to achieve costs savings and process improvements
- Regular organizational refinement to streamline processes
- Continued focus on vendor and inventory practices ensuring maximum value
- Successful management of pension

SI-SSA-0015-09907

Continued strong rate base growth – off a higher base

E = ESTIMATE.
HASHED PORTION OF THE CHART REPRESENTS EXTENSIONS OF DISTRIBUTION CLAUSE PROGRAMS INCLUDING GSMP II, ES II AND A LARGE CLEAN ENERGY PROGRAM

SI-SSA-0015-09908

Tax reform impacts – PSE&G

Lowered federal corporate tax rate from 35% to 21%,

- Lowers costs and annual revenue requirements by ~$275M
- Updated Transmission Formula rate lowered by $148M effective 1/1/2018
- Incorporated ~$130M reduction into Distribution base rate case filing

Lower tax depreciation benefits (no bonus depreciation, lower tax rate)

Excess deferred taxes due to lower tax rate of ~$2.1B

- Protected ~$1.6B – Flow back period over the lives of the assets (ARAM method)
- Unprotected ~$0.5B – Flow back period will be addressed with the BPU and FERC

Financial impact

✓ **Rate base growth** - Lower deductions and planned flow back increases rate base by >$1B

✓ **Average annual earnings increase by ~$20M in 2019 growing to ~$30M in 2022**

✓ **Investment program and metrics to support strong credit rating is maintained**

SI-SSA-0015-09909

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2013 - 2017

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2018-2022E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth into the next decade

SI-SSA-0015-09910

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, highly efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (414 MW_{DC}/325 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-09911

Power has a diverse fleet of generating assets which enables it to respond to market needs

Fuel Diversity 2017*

Total MW: 10,458

Energy Produced 2017*

Total GWh: 51,089

- Gas
- Nuclear
- Coal
- Oil
- Pumped Storage

SI-SSA-0015-09912

PSEG

* EXCLUDES SOLAR (414MW$_{DC}$ /325MW$_{AC}$) AND KALAELOA (104MW).

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2017 to 2020E

2020E Fuel Diversity
Total MW: 11,800

2020E Energy Produced
Total GWh: 65,500

2017 Fuel Diversity[1]
Total MW: 10,458

2017 Energy Produced[1]
Total GWh: 51,089

- Gas
- Nuclear
- Coal
- Oil
- Pumped Storage

Energy Produced increases by >28%

SI-SSA-0015-09927

Distribution Base Rate Case Filing

- **Dockets** ER 18010029 (Electric) and GR 18010030 (Gas)
- **Filed** January 12, 2018; **Anticipate new rates** Fourth Quarter 2018
- **Test year** – July 1, 2017 through June 30, 2018 (with certain pro forma adjustments)
- **Rate base** of $9.6B ($5.6B E; $4B G) as of December 31, 2018
- **ROE** request of 10.3%; **Capitalization structure** with 54% equity
- **Requested Increase:** ~1% relative to overall revenue
- **O&M and Sales** are roughly flat to last rate case eight years ago
- **Capital recovery** beyond clauses and $125M increase in Depreciation rate
- **Decoupling** of revenues from sales volumes
- **Taxes** – lower tax rate and flow back of deferred taxes to offset storm costs and reduce impact on customer bills
- **Pending updates:**
  - **Taxes** - BPU order to lower rates effective April 1 will accelerate savings planned in rate case; update for other tax impacts such as loss of bonus depreciation
  - **9x3 update** to be filed in May

Overall bill for the typical PSE&G residential customer, even after consideration of the ~1% request, would remain >15% lower than bills after last base rate case

SI-SSA-0015-09928

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~20% since our last rate case
- Provided Gas bill credits totaling ~$670 per customer since 2012
- Continued investment at the current rate of growth would take about a decade to equal the 2010 bill rates (adjusted for growth in CPI/disposable income)

- Regional price comparison** - Gas is 2nd lowest and Electric is lower than average
- Distribution revenue component is the lowest in the state for Gas and second lowest for Electric

SI-SSA-0015-09929

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

Forward Looking Statement

Readers are cautioned that statements contained in this presentation about our future performance, including future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical, are forward-looking statements for purposes of the safe harbor provisions under The Private Securities Litigation Reform Act of 1995. When used herein, the words “anticipate”, “intend”, “estimate”, “believe”, “expect”, “plan”, “should”, “hypothetical”, “potential”, “forecast”, “project”, variations of such words and similar expressions are intended to identify forward-looking statements. Although we believe that our expectations are based on reasonable assumptions, they are subject to risks and uncertainties and we can give no assurance they will be achieved. The results or developments projected or predicted in these statements may differ materially from what may actually occur. Factors which could cause results or events to differ from current expectations include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units, delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers,
- increase in competition in energy supply markets as well as competition for certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and changes in technology and customer usage patterns.

For further information, please refer to our Annual Report on Form 10-K, including Item 1A. Risk Factors, and subsequent reports on Form 10-Q and Form 8-K filed with the Securities and Exchange Commission. These documents address in further detail our business, industry issues and other factors that could cause actual results to differ materially from those indicated in this presentation. In addition, any forward-looking statements included herein represent our estimates only as of today and should not be relied upon as representing our estimates as of any subsequent date. While we may elect to update forward-looking statements from time to time

SI-SSA-0015-09939

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The last slide in this presentation includes a list of items excluded from Income from Continuing Operations to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

SI-SSA-0015-09943

PSEG – 2012 Highlights

2012 Earnings in-line with guidance

- Achieved operating earnings of $2.44 per share, at the high end of guidance range of $2.25-$2.50, including storm-related costs at PSE&G
- PSE&G represented 43% of consolidated operating earnings with growth in transmission

Operational excellence

- Record output from CCGTs, continued strong production from Nuclear, and Power's control of O&M supported results
- PSE&G recognized for reliability: National ReliabilityOne Excellence Award, Mid-Atlantic Reliability Award, and Award for Outstanding Response to a Major Outage Event; as well as EEI's Emergency Response Award
- Restored service to 2.1 million customers in a two-week period of time in the aftermath of Superstorm Sandy and the Nor'easter that followed
- Extension of major labor contracts

PSEG disciplined capital investment

- Key regulatory approvals received for major transmission projects
- BPU decisions pending on Solar4All Extension and Solar Loan III
- Power added 400 MW of new peakers in time to respond to summer demand
- Holdings added 40 MW of new solar capacity

PSE&G's Energy Strong Capital Program addresses new reality

- New $3.9 Billion Infrastructure Program filed with the NJBPU to strengthen PSE&G's electric and gas system focusing on hardening and resiliency
- Plan to invest an additional $1.5 Billion in Transmission grid over the ten-year period
- PSE&G's Infrastructure proposal includes:
  - Protecting 40 utility installations from severe storms (**$1.7 Billion**)
  - Making the electric grid smarter and easier to repair (**$454 Million**)
  - Adding backup distribution lines and system redundancies (**$415 Million**)
  - Undergrounding 20 miles of overhead distribution lines (**$60 Million**)
  - Modernizing the gas distribution system (**$1.1 Billion**)
- Better protection for homes and businesses during severe weather and improved day to day system reliability
- Proposed filing creates ~5,800 jobs and stimulates economic activity for New Jersey businesses

North Central Reliability	11.68%	✓	✓	$390	June 2014
Burlington – Camden 230kV	11.68%	✓	✓	$399	June 2014
Mickleton – Gloucester-Camden 230kV	11.68%	✓	✓	$435	June 2015

SI-SSA-0015-09973

Susquehanna-Roseland consists of constructing 150 miles of 500kV circuit (46 miles in NJ) with two new 500kV GIS switching stations at Roseland and Hopatcong

Project Estimate Up To*	Through Year-end 2012	2013-2015E	Expected In-service Date
$790M	$324M	$466M	June 2014 / June 2015

- PJM RTEP project b0489
- ROE of 12.93% (including 1.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-09974

PSEG

*PROJECT IS SHARED WITH PPL. PROJECT ESTIMATE REPRESENTS PSE&G'S CONSTRUCTION RESPONSIBILITY FOR THE NJ PORTION. E = ESTIMATE

Northeast Grid Reliability consists of upgrading approximately 50 overhead circuit miles of 138kV transmission line to 230kV, constructing ~18 miles of new underground 230kV lines, and converting twelve existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2012	2013-2015E	Expected In-service Date
$895M	$88M	$807M	June 2015

- PJM RTEP project b1304
- ROE of 11.93% (including 0.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Engineering, licensing, and outside plant underground construction in progress

SI-SSA-0015-09975

North Central Reliability consists of upgrading 55 circuit miles of 138kV transmission line to 230kV, and converting six existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2012	2013-2015E	Expected In-service Date
$390M	$163M	$227M	June 2014

- PJM RTEP project b1154
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-09976

Burlington-Camden 230kV consists of upgrading 37 circuit miles (30 miles of overhead and 7 miles of underground) of 138kV transmission line to 230kV, converting the existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2012	2013-2014E	Expected In-service Date
$399M	$169M	$230M	June 2014

- PJM RTEP project b1156
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-09977

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2012	2013-2015E	Expected In-service Date
$435M	$24M	$411M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-09978

State policy imperatives have been redefined by SuperStorm Sandy

Storm report issued by NJBPU focusing on:

- Preparedness Efforts
- Communications
- Restoration and Response
- Post Event Analysis
- Underlying Infrastructure Issues

Storm Deferral Filings:

- On December 19, 2012 the Board granted a PSE&G request for general authority to defer storm restoration costs, thereby making such costs potentially recoverable in future rate filings
- On February 20, 2013, at its open public meeting, the Board voted that the recovery of all such storm restoration costs would be reviewed in a generic (multi-utility) proceeding

SI-SSA-0015-09979

We have also responded with a plan focused on infrastructure hardening and resiliency

- PSE&G filed a petition on February 20, 2013, with the NJBPU seeking approval for the Energy Strong Program (ES) which will harden electric and gas distribution infrastructure and increase the resiliency of the electric distribution system
- The filing complements the NJBPU's recently issued order requiring all Electric Distribution Companies to take specific actions to improve preparedness and response to major storms
- ES program represents a potential investment of approximately $3.9 billion over the next 10 years. PSE&G has asked for initial funding approval of $2.6 billion during the first five years
- Additional Transmission investment of approximately $1.5 billion would be included in future FERC Formula Rate filings

SI-SSA-0015-09980

PSE&G is continuing to provide solutions to assist New Jersey in achieving its EMP goals

Solar 4 All extension (S4Ae)*

- Filed July 2012
- Investment up to $690 million and 136 MW
- The program will assist the state in developing solar for underserved market segments by installing solar systems on landfills, brownfields and other underutilized land

Solar Loan III (SL3)*

- Filed July 2012
- Investment up to $193 million and 97 MW
- The program will assist the state in meeting its solar policy objective by providing loans to solar developers and generation owners focused on residential, small non-residential and large non-residential customers

Energy Efficiency 4 All (EE4A)

- Investment up to $470 million
- The program will target four residential and three commercial and industrial segments
- To be filed

SI-SSA-0015-09981

*PENDING APPROVAL.

Lower commodity costs and expiration of certain transition charges are expected to fully offset the impact to customer bills

*2018 BGS/BGSS RATES AS WELL AS SBC AND DISTRIBUTION RATES HELD CONSTANT AT CURRENT 2013 RATES. RATES RELATED TO ELECTRIC RESTRUCTURING: SECURITIZATION (STC), NON-UTILITY GENERATION CHARGE (NGC), & TRANSITIONAL ENERGY FACILITIES ASSESSMENT (TEFA), ARE REDUCED TO ZERO BY 2018. THE RGGI RECOVERY CHARGE (RRC), SOLAR PILOT RECOVERY CHARGE (SPRC), AND CAPITAL ECONOMIC STIMULUS INFRASTRUCTURE INVESTMENT PROGRAM EXTENSION (CIP II) BILL IMPACTS ARE INCLUDED IN THEIR RESPECTIVE GAS AND ELECTRIC BARS AND FORECASTED IN 2018 BASED UPON LATEST ESTIMATE. THE 2018 BILL IMPACTS OF ES, EE4ALL, AND S4AEXT/SL3 IMPACTS ARE BASED UPON CURRENT ESTIMATES.

LONG ISLAND POWER AUTHORITY

SI-SSA-0015-09984

LIPA T&D management contract

In December 2011, the Long Island Power Authority (LIPA) selected PSEG to manage its electric transmission and distribution system for 10 years starting in 2014

- Reasons for selecting PSEG included:
- Proven technical capabilities and track record of top quartile customer service and reliability
  - Commitment to cost control and investment optimization
  - Corporate culture of transparency and data-driven decision making
  - Transition activities on-track – successfully achieving all milestones through February 2013

- Evaluating impact of SuperStorm Sandy and recent LIPA management changes on the overall schedule and transition

Successful management of the LIPA transmission and distribution system may lead to additional growth opportunities

Financial Strength
Disciplined Investment

SI-SSA-0015-09992

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-09993

PSEG Power strategy

Focused on safety performance, unit reliability, competitive cost structure with control of maintenance costs, achieving operational excellence, and supporting market rules to maintain a level playing field

SI-SSA-0015-09994

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus

Fleet Diversity/Efficiency Focus

- Fleet diversity across the dispatch curve and fuel types provides flexibility
- Nuclear units continue to achieve strong operational results and are well positioned for the future
- Peach Bottom steam path retrofit completed
- Fossil fleet is suited for market dynamics
- CCGT achieved record output in 2012
- Installed 400 MW new peaking capacity in 2012

Financial/Economic Focus

- O&M cost control programs have delivered
- Sites offering competitive advantage suited for expansion

Regulatory Focus

- Strong regulatory performance
- Industry leadership in the changing regulatory environment

SI-SSA-0015-09995

PSEG Power delivered in 2012

Storm and weather challenges	Market challenges	Value delivered
• SuperStorm Sandy impacted our generating sites • Warm winter put pressure on demand and pricing for both electricity and gas • Hot summer weather created challenging operating environment	• Unit outages and transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by weather and economy	• Cost control • Lower dispatch and fuel cost • Captured value through coal/gas switching, unit flexibility • Improved unit availability • Coal & oil sales optimized inventory • Expedited return from storm outages, restored margin opportunities • Optimized unit dispatch across fleet during storm recovery

SI-SSA-0015-09996

PSEG Power has generating assets

in three competitive markets

- Low cost portfolio
- Fuel flexibility
- Assets near loads
- Poised to benefit in real time markets
- Fleet will maintain diversity and efficiency in 2016 after HEDD
- Most sites suitable for expansion

SI-SSA-0015-09997

PSEG Power Nuclear fleet is a critical element of success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,174 MW
• Owned Capacity: 1,174 MW
• License Expiration: 2046
• Next Refueling
  • Fall 2013
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%, Exelon – 43%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,326 MW
	• Owned Capacity: 1,335 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 -- Spring 2013
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,245 MW
		• Owned Capacity: 1,123 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2013

SI-SSA-0015-09998

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations – eight consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent and attractive training program
- Developing Fukushima action plan in response to NRC staff review
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-09999

PSEG Power's Fossil Fleet availability has shown steady improvement

EFORd improvement resulted in over 200 MW of additional capacity available

EFORp improvement and availability at peak demand times has resulted in performance payments in each of the last four years

SI-SSA-0015-10000

PSEG Power improvements achieved in combined cycle fleet efficiency

Actions Taken to Create Value	
• Heat rate improvement program • Operational Excellence Model	• Training programs • Unit testing initiative • Outage work to restore efficiency

SI-SSA-0015-10001

SuperStorm Sandy affected the fleet;

when the load returned, Power was ready

SI-SSA-0015-10002

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- Power is well positioned for HAPS

SI-SSA-0015-10003

PSEG Power's focus on costs has resulted in moderate increase in O&M for six years

Cost control actions taken:	
• Coal assessment • CCGT material condition assessment • Contract renegotiation	• Material management • Nuclear maintenance productivity study • Nuclear outage efficiency initiative

SI-SSA-0015-10004

* INCLUDES IMPACTS FROM STORM RECOVERY COSTS AND POTENTIAL RELATED INSURANCE PROCEEDS.
E = ESTIMATE.

PSEG Power is well positioned for growth in the fleet when market conditions dictate

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Interconnection • Gas Pipeline Access • Sites/Space • Emissions

SI-SSA-0015-10005

PSEG Power will maintain diversity and efficiency after a realignment of the fleet in 2016

Objective
2012 → 2016E

- Maintain fuel diversity
- Maintain load serving capability
- Improve fleet heat rate by 6%
- Maintain low cost structure
- Environmental improvement

Fuel Diversity
13,226 MW 11,200 MW

Energy Produced
52.5 TWh 52-54 TWh

SI-SSA-0015-10007

PSEG Power has added value with focus on operational excellence

2008		2012
3,622	Nuclear capacity (MW)	3,632
92%	Nuclear equivalent availability	93%
29.3	Nuclear generation (TWhrs)	29.8
55	Total generation (TWhrs)	53
3,157	CCGT capacity (MW)	3,176
12.1	CCGT generation (TWhrs)	16.2
8.9%	Fossil EFORd	6.3%*
87%	Fossil equivalent availability	90%
63	SO_2 (Ktons)	9
16	NO_x (Ktons)	10

SI-SSA-0015-10008

PSEG

* EXCLUDES SANDY IMPACT.

PSEG POWER
ER&T

SI-SSA-0015-10009

PSEG

We make things work for you.

PSEG Power
ER&T strategy

Focused on optimizing the value of its asset portfolio and providing outstanding service to our customers, while prudently managing risk

SI-SSA-0015-10010

Diversified assets and flexible dispatch

High performing, baseload nuclear assets	3,632 MW
Fuel advantaged, baseload coal plants in PA	776 MW
Flexible combined cycle fleet	3,176 MW
Well leveraged intermediate & peaking assets	5,642 MW

Integrated trading and dispatch capability around fleet

SI-SSA-0015-10011

Fleet capacity has been advanced by:

Improved Heat Rate capability

Trading acumen to execute fuel switching opportunities

Reduced O&M and increased start-up success

Capturing new products opportunity with minimal investment

SI-SSA-0015-10012

Spark spread replaces dark spread as major value driver

- Spark spread has risen above dark spread in PJM markets
- Power's gas units operating at record throughput
- Gas operation provides much more operational flexibility
- Enhances the ability of trading organization to capture volatility

SI-SSA-0015-10013

2013 BGS Auction Results for PSE&G Zone

BGS sales account for about a third of our forward portfolio of hedges

SI-SSA-0015-10014

BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2011-2013 WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2013.

Our hedging mix has changed with the market but still captures the fleet's locational advantage

- 3 Year forward BGS sales comprise smaller percentage of Power's hedges
- Other full requirement load deals help capture additional locational and load shape premium

SI-SSA-0015-10015

PSEG

NOTE: PERCENTAGES REPRESENT HEDGED VOLUMES IN PLACE AFTER BGS AUCTION.

Hedging strategy designed to protect gross margin and leverage the portfolio

Ratable Hedging on Baseload:

- 3 year ratable hedge tactics
- 3 year PJM hedge of capacity (not included in table)
- Load following sales (such as BGS) have strong correlation to our units for hedging basis and load shaping premium

Dynamic Hedging on Intermediate Coal, Combined Cycle and Peaking:

- Position fleet to take advantage of market volatility
- Gas and load-following fleet left open until prompt year to capture volatility
- Use all trading products to capture option value of assets and benefit from market dislocations

		2013	2014	2015
Baseload (Nuclear and Baseload Coal)	Volume TWh	35	35	35
	% Hedged	100%	80-85%	40-45%
	Price $/MWh	$50	$49	$51
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	20	19	18
	% Hedged	30-35%	0%	0%
	Price $/MWh	$50	$49	$51
TOTAL	Volume TWh	53-55	53-55	52-54
	% Hedged	75-80%	50-60%	25-30%
	Price $/MWh	$50	$49	$51

SI-SSA-0015-10016

PSEG

* HEDGE PERCENTAGES AND PRICES AS OF FEBRUARY 11, 2013. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS.

PSEG's locational advantage

and electric basis

- Basis (PS Zone to PJM West) will continue to trend downward for forward sales
- Volatility will remain significant in the prompt periods (especially summer/winter)
- Power maintains sufficient length to participate in upside volatility as well as a valuable 250MW transmission position into NYC
- Basis will continue to have a positive impact on PSEG Power profitability

SI-SSA-0015-10017

*AS OF FEBRUARY 14, 2013.

PSEG's locational advantage

and gas basis

- Lower cost supplies of shale gas have been beneficial to both PSE&G customers and PSEG Power
- Over 50% of our available pipeline capacity can access market area supplies of shale gas
- Power's generating units sit in close proximity to the Marcellus fairway
- Power buys approximately 350BCF/year of gas
- We have been able to arbitrage gas values from South to North and East to West using our storage and pipeline capacity

SI-SSA-0015-10018

PJM's capacity market continues to recognize locational value of our fleet

$/MW-day	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016
Power's Average Prices	$153	$244	$162	$167
Rest of Pool Prices	$16	$28	$126	$136
Power's Capacity (MW)	10,400	10,600	10,300	9,000

2016/2017 RPM Auction Influenced By:

- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Updated Transfer Capabilities
- New Build/Cost of New Entry
- Demand Response

SI-SSA-0015-10019

Reserve margins in PJM declining with retirements

Generation Deactivation Notifications

Source: PJM TEAC, 1/10/2013

- PJM Pending Deactivation Requests of 12,634 MW as of January 22, 2013
- Approximately 4,000 MW of additional owner announced retirements in PJM through next auction

PSEG's long-term outlook is influenced by Power's hedge position and increased investment at PSE&G

Segment EPS Drivers

PSEG Power LLC	2014E	2015E
Each $1/mcf Change in Natural Gas	$0.03 - $0.06	$0.10 - $0.13
Each $2/MWh Change in Spark Spread	$0.04	$0.04
Each $2/MWh Change in Dark Spread	$0.01	$0.01
Each 1% Change in Nuclear Capacity Factor	$0.01	$0.01

PSE&G		
Each $100 Million of Incremental Investment	$0.01	$0.01
Each 1% Change in Sales		
Electric	$0.01	$0.01
Gas	$0.01	$0.01
Each 1% Change in O&M	$0.01	$0.01
Each 10 bp Change in ROE	$0.01	$0.01

SI-SSA-0015-10036

Opportunity for modest and sustainable

dividend increases consistent with stable regulated growth and cash generation outlook at PSEG Power

SI-SSA-0015-10037

PSEG Summary

- Operating Earnings Guidance for 2013 of $2.25 - $2.50 per share with earnings mix shifting to 50% regulated
- Double digit operating earnings growth at PSE&G starting in 2013, and continuing through 2015 driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength reduces risk in low price environment
- Strong Balance Sheet and Cash Flow support full capital program without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for further growth

PSE&G provides high reliability at below average cost which creates superior value to customers

SAIDI = SYSTEM AVERAGE INTERRUPTION DURATION INDEX, A MEASURE OF AVERAGE OUTAGE DURATION FOR ALL CUSTOMERS SERVED.

PSE&G prioritizes public safety

while maintaining value to customers

LEAK RESPONSE RATE = PERCENTAGE OF UTILITY RESPONSES TO REPORTED LEAKS WITHIN ONE HOUR.

SI-SSA-0015-10043

Formula rates for transmission make the process more predictable with contemporaneous returns

	Transmission (Federal)	Distribution Base Rate Case (State)
Current ROE	• 11.68% base • 12.93% with incentives on Susquehanna-Roseland • 11.93% with incentives on Northeast Grid	• 10.3%
Volatility of Returns	• Low – prospective recovery with annual true-ups for over/under recovery	• Higher – performance impacted positively/negatively by cost management, weather, customer demands, etc.
Process	• Formula – The rate template and specific elements like ROE are predetermined with annual updates and true ups	• Litigated case with each element (depreciation, ROE, O&M levels, Rate Base) scrutinized and settled
Intervenors	• State consumer advocates usually participate	• State consumer advocates • Large customers • Other parties affected by the case, e.g. Solar Developers
Test Year	• PSE&G has fully **forecasted** test year for both Capital and O&M	• **Historical** test year with pro-forma adjustments for known and measurable items, e.g. wage escalation
Time to resolve	• Annual Formula updates are filed in October with January 1 effective date	• Typically settled within 12-15 months

SI-SSA-0015-10044

New Jersey Board of Public Utilities (BPU)

- The Board of Public Utilities consists of five commissioners appointed by the Governor. These appointees are confirmed by the NJ Senate for six-year, staggered terms. The Governor appoints one of the five to serve as Commission President. Currently, the commissioners are:
  - Robert M. Hanna, Commission President
  - Jeanne M. Fox
  - Joseph L. Fiordaliso
  - Mary-Anna Holden
- Stefanie Brand, Director of the Division of Rate Counsel

SI-SSA-0015-10045

Slow economic recovery in NJ is constraining growth in all market sectors

Modest residential growth limited by housing market inactivity and the slow economic recovery

Consumer spending is trending with the slow economic recovery and impacting growth in the commercial sector

Industrial sales growth continues to be constrained by slow economic recovery

2013 - 2015 Projected Sales
Growth – Gas*

2013 - 2015 Projected
Sales Growth – Electric*

SI-SSA-0015-10046

* WEATHER NORMALIZED ESTIMATED ANNUAL GROWTH PER YEAR OVER FORECAST PERIOD

Key economic indicators forecast renewed growth over the 2012 to 2015 timeframe

The New Jersey economy increased by 0.3% annually from 2010 to 2012 and is anticipated to grow 2.3% per year from 2012 to 2015

New Jersey total non-farm employment increased by 0.6% annually from 2010 to 2012 and is expected to grow 1.4% per year from 2012 to 2015

Real personal income in New Jersey increased by 1.4% annually from 2010 to 2012 and is expected to increase 2.5% per year from 2012 to 2015

Single family housing starts declined by 2.6% annually from 2010 to 2012 and are expected to increase ~24% per year from 2012 to 2015

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10056

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of February 23, 2018.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss

PSEG STRATEGY: GROWING A HIGH-QUALITY, FINANCIALLY SOUND ENERGY INFRASTRUCTURE COMPANY

Dan Cregg

EXECUTIVE VICE PRESIDENT AND
CHIEF FINANCIAL OFFICER

SI-SSA-0015-10058

PSEG

We make things work for you.

PSEG Strategy - Delivering Value

Operational Excellence: Improving reliability and customer service as we control costs in a low price environment

Financial Strength: Strong financial position supports investment program

Disciplined Investment:
- Program focused on achieving objectives through infrastructure investment that meets customer and shareholder needs
- Robust pipeline of opportunities

Results:
- Double digit growth in rate base and net income at PSE&G
- Reconfiguration of Power's generating fleet: higher quality, more efficient
- Annual growth in common dividend
- Strong credit metrics

SI-SSA-0015-10059

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A $11.5 - $13.2 billion infrastructure program with opportunities to expand, producing 7% - 9% annual rate base growth through 2022	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow and upside from market rule improvements
2017	2017
Assets $29B **Net Income $973M** **Non-GAAP Operating Earnings* $963M**	**Assets $12B** **Net Income $479M** **Non-GAAP Operating Earnings* $505M**

ASSETS AND NET INCOME ARE FOR THE YEAR ENDED 12/31/2017. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO ENTERPRISE / OTHER ACTIVITY. *SEE SLIDE A FOR A RECONCILIATION OF NET INCOME TO NON-GAAP OPERATING EARNINGS, SLIDE B FOR RECONCILIATIONS FOR PSE&G AND PSEG POWER, AND SLIDE C FOR ENTERPRISE/OTHER.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: 16 consecutive years of recognition as the most reliable utility in the Mid-Atlantic region • PSEG Power: Improved nuclear capacity factors to ~94% in 2017; Fleet moving towards improved efficiency and environmental position • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Maintaining focus on efficiency, resiliency, and customer satisfaction
Financial Strength	• Non-GAAP Operating Earnings for 2017 exceeded the mid-point of guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • PSEG is a net beneficiary of recent tax legislation • Increased dividend in February 2018 – 14th increase in last 15 years
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2018-2022) with investments in Gas System Modernization Program (GSMP), Transmission, Electric and Gas distribution, Energy Strong and Clean Energy • Potential for additional investments in Renewables and integration of Infrastructure with Customer Access • Power capital program, focused on completing construction at Keys, Sewaren and Bridgeport Harbor, will improve fleet efficiency and geographic diversity

SI-SSA-0015-10061

Focus on earning our cost of capital has provided for growth in operating earnings* and dividends

SI-SSA-0015-10062

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO NON-GAAP OPERATING EARNINGS.

PSEG Policy and Regulatory focus

on mechanisms that provide customers with clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- Requesting ~1% increase in revenue primarily to recover investments, partially offset by benefits related to tax reform

Long-Term Infrastructure Investment Platform

- BPU approved policy providing for constructive investment recovery mechanism encouraging investment in long-term infrastructure

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy that recognizes the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-10063

PSE&G – New Jersey's largest:

- Electric and Gas Distribution utility
- Transmission business
- Investor in renewables and energy efficiency
- Appliance service provider

	Electric	Gas
Customers Growth (2013 – 2017)	2.2 Million 0.6%	1.8 Million 0.6%
2017 Electric and Gas Sales	40,740 GWh	2,397M Therms*
Sales Mix (2017)		
Residential	32%	59%
Commercial	58%	37%
Industrial	10%	4%

PSE&G 2017 Rate Base

SI-SSA-0015-10064

* GAS FIRM SALES ONLY.

PSE&G Investment – Delivering growth

- Our rate base is roughly balanced between federal and state jurisdictions
- Non-GAAP operating earnings growth aligned with rate base growth

SI-SSA-0015-10065

Developing investment opportunities

with near-contemporaneous recovery mechanisms

2018-2022E PSE&G Capital with Program extensions by Recovery Method

$11.5B - $13.2B

$13B plan includes program extension filings comparable to current investment levels:

- GSMP II
- Energy Strong (ES) II
- Clean Energy Future (CEF) filing
  - expansion of current energy efficiency programs
  - electric vehicle programs
  - energy storage
  - LED streetlights

Broad opportunity set of investment potential driven by customer expectations and public policy

FERC Formula Rates	Traditional Recovery Mechanisms	Clause Recovery Mechanisms
Transmission	Distribution Base Rates	Infrastructure / Clean Energy

E = ESTIMATE. DATA AS OF FEBRUARY 2018. INCLUDES AFUDC.

Operational Excellence – O&M costs

Demonstrated ability to control O&M, preserving earnings and returns in a low sales growth environment

Cost control actions:

- PSE&G is utilizing the Lean Six Sigma discipline to achieve costs savings and process improvements
- Regular organizational refinement to streamline processes
- Continued focus on vendor and inventory practices ensuring maximum value
- Successful management of pension

SI-SSA-0015-10067

Continued strong rate base growth – off a higher base

E = ESTIMATE.
HASHED PORTION OF THE CHART REPRESENTS EXTENSIONS OF DISTRIBUTION CLAUSE PROGRAMS INCLUDING GSMP II, ES II AND A LARGE CLEAN ENERGY PROGRAM

SI-SSA-0015-10068

Tax reform impacts – PSE&G

Lowered federal corporate tax rate from 35% to 21%,

- Lowers costs and annual revenue requirements by ~$275M
- Updated Transmission Formula rate lowered by $148M effective 1/1/2018
- Incorporated ~$130M reduction into Distribution base rate case filing

Lower tax depreciation benefits (no bonus depreciation, lower tax rate)

Excess deferred taxes due to lower tax rate of ~$2.1B

- Protected ~$1.6B – Flow back period over the lives of the assets (ARAM method)
- Unprotected ~$0.5B – Flow back period will be addressed with the BPU and FERC

Financial impact

✓ **Rate base growth** - Lower deductions and planned flow back increases rate base by >$1B

✓ **Average annual earnings increase by ~$20M in 2019 growing to ~$30M in 2022**

✓ **Investment program and metrics to support strong credit rating is maintained**

SI-SSA-0015-10069

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2013 - 2017

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2018-2022E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth into the next decade

SI-SSA-0015-10070

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, highly efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (414 MW_{DC}/325 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-10071

Power has a diverse fleet of generating assets which enables it to respond to market needs

Fuel Diversity 2017*

Total MW: 10,458

Energy Produced 2017*

Total GWh: 51,089

- Gas
- Nuclear
- Coal
- Oil
- Pumped Storage

PSEG

* EXCLUDES SOLAR (414MW$_{DC}$ /325MW$_{AC}$) AND KALAELOA (104MW).

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2017 to 2020E

2020E Fuel Diversity
Total MW: 11,800

2020E Energy Produced
Total GWh: 65,500

2017 Fuel Diversity[1]
Total MW: 10,458

2017 Energy Produced[1]
Total GWh: 51,089

- Gas
- Nuclear
- Coal
- Oil
- Pumped Storage

Energy Produced increases by >28%

[1] REFLECTS RETIREMENT OF HUDSON AND MERCER UNITS ON JUNE 1, 2017.
ALL PERIODS EXCLUDE SOLAR (414 MW_{DC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.
E= ESTIMATE.

SI-SSA-0015-10073

PSEG

Power's fleet is well-located with access to shale gas production

- PSEG Power procured approximately 360 BCF in 2017 with approximately 50% going towards PSE&G's utility gas customer usage
- PSEG Power's gas for PJM generation was ~65 BCF in 2017, of which >85% was supplied by Northeast Shale gas

- Significant amount of new pipelines have already been built and more are in construction / development
- Gas production and pipeline takeaway capacity expected to be more balanced in 2018 timeframe

SI-SSA-0015-10074

PSEG

E = ESTIMATE.

Power has demonstrated its ability to control O&M

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON/MERCER EARLY RETIREMENT.

Power's capital needs decline following construction of new capacity, enhancing free cash flow

SI-SSA-0015-10087

Distribution Base Rate Case Filing

- **Dockets** ER 18010029 (Electric) and GR 18010030 (Gas)
- **Filed** January 12, 2018; **Anticipate new rates** Fourth Quarter 2018
- **Test year** – July 1, 2017 through June 30, 2018 (with certain pro forma adjustments)
- **Rate base** of $9.6B ($5.6B E; $4B G) as of December 31, 2018
- **ROE** request of 10.3%; **Capitalization structure** with 54% equity
- **Requested Increase:** ~1% relative to overall revenue
- **O&M and Sales** are roughly flat to last rate case eight years ago
- **Capital recovery** beyond clauses and $125M increase in Depreciation rate
- **Decoupling** of revenues from sales volumes
- **Taxes** – lower tax rate and flow back of deferred taxes to offset storm costs and reduce impact on customer bills
- **Pending updates:**
  - **Taxes** - BPU order to lower rates effective April 1 will accelerate savings planned in rate case; update for other tax impacts such as loss of bonus depreciation
  - **9x3 update** to be filed in May

Overall bill for the typical PSE&G residential customer, even after consideration of the ~1% request, would remain >15% lower than bills after last base rate case

SI-SSA-0015-10088

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~20% since our last rate case
- Provided Gas bill credits totaling ~$670 per customer since 2012
- Continued investment at the current rate of growth would take about a decade to equal the 2010 bill rates (adjusted for growth in CPI/disposable income)

- Regional price comparison** - Gas is 2nd lowest and Electric is lower than average
- Distribution revenue component is the lowest in the state for Gas and second lowest for Electric

SI-SSA-0015-10089

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

New Jersey BGS accounts for ~10 TWh of our hedging

Retail marketing will complement BGS

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as competition for certain transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies, and
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10098

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slide A at the end of this presentation includes a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

Maintaining a robust capital program focused on growth

PSEG 2009 - 2013 Capital Spending $11.3 Billion	PSEG 2014 - 2018E Capital Spending $13.1 Billion

SI-SSA-0015-10103

PSEG

NOTE: POWER 2009–2013 ACTUALS ARE RESTATED TO INCLUDE SOLAR CAPITAL SPEND. POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. E=ESTIMATE

PSEG's business profile has been transformed through significant growth in utility capital spending, and we have consistently identified attractive opportunities for additional investment

SI-SSA-0015-10104

Successfully worked with regulators

to develop multiple solutions for New Jersey's energy and economic development goals

RENEWABLES
creative solutions to install solar generation: $0.7B

- Solar Loan I – 2008
- Solar Loan II – 2009
- Solar 4 All – 2009
- Solar Loan III – 2013
- Solar 4 All Ext – 2013

ENERGY EFFICIENCY
assisting customers with controlling energy usage: $0.3B

- Carbon Abatement – 2008
- Energy Efficiency – 2009
- Demand Response – 2009
- Energy Efficiency Ext – 2011

DISTRIBUTION
improving electric and gas delivery infrastructure: $1.0B

- NJ Capital Infrastructure Program 1 (CIP 1) – 2009
- NJ Capital Infrastructure Program 2 (CIP 2) – 2011
- Energy Strong – 2014

Invested ~$2.0B through 2013 → Plan to invest additional ~$1.6B through 2018 in approved programs → Filed for Energy Efficiency Extension II in August 2014 for ~$100 million

SI-SSA-0015-10105

NOTE: SPENDING THROUGH 2013 UNLESS INDICATED OTHERWISE

Planned transmission spend of $6.8 billion

is driven by PJM reliability projects, 69kV conversions and life-cycle replacement projects

E= ESTIMATE

SI-SSA-0015-10106

PSEG Power – Value-advantaged through asset diversity, fuel flexibility, location and installed environmental controls

Fuel Diversity
Total MW: 13,450

Energy Produced
Total GWh: 54,264

Energy Market Served
Total MW: 13,450

- Gas
- Pumped Storage
- Nuclear
- Oil
- Coal*
- Solar

- Load Following
- Peaking
- Base load

SI-SSA-0015-10107

Competitive Advantage: Heat Rate Diversity & Flexible Dispatch

SI-SSA-0015-10108

Competitive Advantage: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

SI-SSA-0015-10109

Competitive/Sustainable Advantage:

PSEG expanding supply of low-cost Marcellus gas

Proposed PennEast Pipeline Project

- PSEG plans to invest $100 - $120 million for a 12% equity interest in the to-be-constructed PennEast Pipeline, a 105.5 mile pipeline that would bring gas from eastern Pennsylvania to New Jersey
- PSEG ER&T would contract for approximately 125mmcf/day of PennEast's 1 bcf/day capacity under a 15-year contract; other project sponsors have committed to offtake ~500mmcf/day
- PSEG and its customers would benefit from the displacement of higher-cost, Gulf Coast gas supply
- Targeted in-service date is November 2017

SI-SSA-0015-10110

Sustainable Advantage: Hedging strategy designed to protect gross margin while leveraging the portfolio

		Jul-Dec 2014	2015	2016
Base Load (Nuclear and Base Load Coal)	Volume TWh	17	36	36
	% Hedged	100%	100%	45-50%
	Price $/MWh	$50	$50	$51
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	13	21	19
	% Hedged	35-40%	5-10%	0%
	Price $/MWh	$50	$50	$51
Total	Volume TWh	30	55-57	55-57
	% Hedged	70-75%	65-70%	30-35%
	Price $/MWh	$50	$50	$51

HEDGE PERCENTAGES AND PRICES AS OF JUNE 30, 2014. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS. EXCLUDES SOLAR AND KALAELOA.

SI-SSA-0015-10111

Sustainable Advantage: PJM's capacity market continues to recognize locational value

RPM Auction Results					
($/MW-day)	2013 / 2014*	2014 / 2015*	2015 / 2016*	2016 / 2017*	2017 / 2018
Power's Average Prices	$242	$166	$166	$166	**$165**
Rest of Pool Prices	$28	$126	$136	$59	**$120**
Power's Cleared Capacity (MW)	10,890	10,710	9,210	8,610	**~8,700**

2017/2018 RPM Auction Influenced By:

- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Updated Transfer Capabilities
- New Build/Cost of New Entry
- Demand Response

PSEG

*PSEG POWER'S AVERAGE PRICES AND CLEARED CAPACITY (MW) REFLECT BASE AND INCREMENTAL RPM AUCTION RESULTS. DELIVERY YEAR RUNS FROM JUNE 1 TO MAY 31 OF THE NEXT CALENDAR YEAR.

PSE&G's Cash from Operations and Power's Free Cash Flow support growth investments without the need for new equity

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$500M FROM 2014-2016
(2) OTHER CASH FLOW INCLUDES PSEG LI, HOLDINGS NET CASH FLOW, CASH, AND SHORT TERM DEBT
E = ESTIMATE

SI-SSA-0015-10113

Power's key credit metric supports incremental investment opportunities

- Increased contribution to earnings from the more stable regulated business allows us to reset Power's FFO/Debt threshold from 35% to 30%, providing additional financial flexibility
- Power's annual Cash From Operations and Funds From Operations each average ~$1.1B over the 2014 to 2016 period supported by:
  - Capacity Revenues
  - Hedged Generation
  - O&M Control
- Financial strength can be used to pursue future growth in both businesses beyond current plans

SI-SSA-0015-10114

Operating Earnings Mix

Long term investment program has driven increased earnings contribution from stable, regulated business

Power's diverse fuel mix and dispatch flexibility continues to generate earnings and free cash flow

PSE&G's investment in transmission has diversified its asset base and, coupled with other investments and cost controls, supported compound annual earnings growth of ~18% over 2009 – 2013

energy
to make things better
... for you, for our investors
and for our stakeholders.

PSEG

We make things work for you.

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10122

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of March 6, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com , under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss .

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2012 - 2016

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2017-2021E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth rate

SI-SSA-0015-10135

PSE&G's capital spending drives high single-digit growth in rate base

E = ESTIMATE.

SI-SSA-0015-10136

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-10137

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2016 to 2021E

2021E Fuel Diversity[1]
Total MW: 11,900

2016 Fuel Diversity
Total MW: 11,577

2021E Energy Produced[1]
Total GWh: 61,000

2016 Energy Produced
Total GWh: 51,510

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

Energy Produced increases by >18%

[1] REFLECTS ANNOUNCED EARLY RETIREMENT OF HUDSON AND MERCER UNITS IN MID-2017.
ALL PERIODS EXCLUDE SOLAR (257 MW_{AC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.
**2016 COAL INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS. E= ESTIMATE.

Power's free cash flow improves as construction program ends, providing funding for growth

2017E – 2021E Capital Spending (1)

PSE&G
2017E – 2021E Capital Spending (1)

(1) CAPITAL INCLUDES IDC AND AFUDC. E = ESTIMATE.

Strong credit metrics provide substantial investment capacity for increased utility investment

Average Funds From Operations / Debt
2017E – 2019E

	Power	PSEG
Estimate	~40%	Low – 20's
Minimum Threshold	30%	High - teens

Total Incremental Investment Capacity

Incremental capacity invested in utility would be matched with utility debt

SI-SSA-0015-10140

PSEG

E=ESTIMATE.

PSEG has demonstrated an ability to control O&M, with plans to reduce in 2017

(1) POWER EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON / MERCER EARLY RETIREMENT WRITE-DOWN, DISTRIBUTION EXCLUDES ELECTRIC AND GAS BAD DEBT. E = ESTIMATE.

SI-SSA-0015-10141

2017 Federal Tax Reform – PSEG is well positioned

Given positive non-utility contribution to earnings and a strong balance sheet, PSEG is well positioned for potential tax reform

Assumption	PSE&G	PSEG Power	PSEG Parent
Reduction of Corporate Tax Rate	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period	After-tax earnings and cash flow increase One-time non-cash earnings benefit from reduction in deferred tax liability	After-tax earnings and cash flow improve
100% Expensing of Capital Expenditures	Impact on rate base growth comparable to existing bonus depreciation rules	Cash flow improves	
Elimination of Deductibility of Interest Expense and Border Adjustment Tax	Change in cost anticipated to be passed through to customers	Well positioned given low debt balance Uncertainty on Border Adjustment Tax	Well positioned given low debt balance

SI-SSA-0015-10142

Opportunity for meaningful and sustainable dividend growth

SI-SSA-0015-10143

PSEG Summary

- 2016 Operating Earnings (non-GAAP) at upper end of revised guidance of $2.80 - $2.95 per share
- PSE&G capital spending provides high single-digit rate base growth for foreseeable future balanced between Transmission and Distribution
- Power expected to generate significant free cash flow following CCGT construction program and transformation to a more efficient generation fleet
- Strong balance sheet and cash flow support current capital program and new investment opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2017 demonstrates meaningful and sustainable dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

SI-SSA-0015-10144

PSEG's Value Proposition

- A stable platform with a robust investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile supporting the potential for consistent and sustainable dividend growth

SI-SSA-0015-10145

Reconciliation of Non-GAAP Operating Earnings

Public Service Enterprise Group Incorporated -- Consolidated Operating Earnings (non-GAAP) Reconciliation

Reconciling Items	Year Ended December 31, 2016	2015	2014	2013	2012
	($ millions, Unaudited)				
Net Income (Loss)	**$ 887**	**$ 1,679**	**$ 1,518**	**$ 1,243**	**$ 1,275**

Nuclear Energy 2016: Status and Outlook

Annual Briefing for the Financial Community

February 11, 2016

SI-SSA-0015-10148

Today's Briefing

- Industry performance
- 2015 Recap: Key events and activities
- Creating additional margin:
  - by increasing value
  - by improving efficiency
- Looking forward: 2016 and beyond

SI-SSA-0015-10149

Impacts of Losing A Nuclear Plant

A typical nuclear power plant:

- 400-700 permanent jobs plus equivalent number of indirect jobs in local area to support the plant
- Plant salaries 36% higher than average in the local area
- $16 million per year in state and local taxes

SI-SSA-0015-10150

Better Deal for Consumers ... Existing Nuclear or New Combined Cycle Gas?

Sources: Existing nuclear costs are 2014 total generating costs (fuel, O&M, capital) from Electric Utility Cost Group. Gas-fired combined cycle costs are levelized costs from (1) Energy Information Administration, *Annual Energy Outlook 2015;* (2) Dominion Virginia Power 2015 Integrated Resource Plan; (3) Lazard, *Levelized Cost of Energy Analysis*, 9.0, 2014.

SI-SSA-0015-10151

Better Deal for Consumers ... Existing Nuclear or New Combined Cycle Gas?

Sources

- Nuclear costs are 2014 total generating costs (fuel, O&M, capital) from Electric Utility Cost Group.
- Gas-fired combined cycle costs are levelized costs from:
  1. Energy Information Administration, *Levelized Cost and Levelized Avoided Cost of New Generation Resources in the Annual Energy Outlook 2015,* June 2015, Table 2. In the Reference case, the Henry Hub natural gas spot price (in 2013 dollars) rises from $3.69/MMBtu in 2015 to $4.88/MMBtu in 2020 and to $7.85/MMBtu in 2040. The cost range reflects regional variations, such as differences in terrain, weather, population, and labor wages. For power plants that use combustion turbine technologies, regional adjustments are also made to reflect the impacts of ambient conditions (temperature, humidity and pressure) on output. Available at https://www.eia.gov/forecasts/aeo/pdf/electricity_generation.pdf
  2. Dominion Virginia Power 2015 Integrated Resource Plan, July 2015, Figure 5.5.6.3, page 103. Reference case assumes Henry Hub natural gas price of $6.51/MMBtu in 2030, Dominion Zone delivered gas price of $6.60/MMBtu (all nominal 2030 dollars). Available at https://www.dom.com/library/domcom/pdfs/electric-generation/2015-irp-final-public-version-internal-cover.pdf?la=en
  3. Lazard*, Levelized Cost of Energy Analysis*, 9.0, November 2015. Assumes natural gas price of $3.50/MMBtu. Available at https://www.lazard.com/media/2390/lazards-levelized-cost-of-energy-analysis-90.pdf

SI-SSA-0015-10152

Industry Performance

SI-SSA-0015-10153

Record Capacity Factor in 2015

- U.S. reactors set record capacity factor: 91.9%
- Nuclear plants generated 798 billion kWh in 2015
- Average refueling outage duration declined again:
  - 2015: 36 days
  - 2014: 37 days
  - 2013: 41 days

Source: Energy Information Administration
** NEI estimate*

SI-SSA-0015-10154

Snapshot of 2014 U.S. Nuclear Plant Costs

($ per MWh)

- Average generating costs have decreased from peak of $39.70/MWh in 2012 to $36.27/MWh in 2014
- Fuel costs down slightly in 2014, operating costs flat
- Capital spending down significantly
- $6.5 billion in 2014 capex, 26% decrease from $8.7 billion in 2012

2014 Generating Cost

2014 Average Generating Costs

Total generating cost = fuel + capital + operating.
Source: Electric Utility Cost Group.

SI-SSA-0015-10155

Nuclear Plant Capital Spending Trends

(2014 Billions of $)

Distribution of Capex in 2014	
Uprates, Extended Operation	32%
Equipment Replacement	28%
Regulatory	31%
Other	9%

Source: Electric Utility Cost Group

SI-SSA-0015-10156

Regulatory CapEx Expected to Moderate Significantly Going Forward

(2014 $ in millions)

Source: Electric Utility Cost Group

SI-SSA-0015-10157

Trends in U.S. Nuclear Operating Costs

Source: Electric Utility Cost Group

- Operating costs increased from $18.59/MWh in 2002 to $20.92/MWh in 2014
- Increase not driven by any single category
- Operating costs have declined 4% from the peak in 2011

SI-SSA-0015-10158

2015 Recap: Key Events and Activities

SI-SSA-0015-10159

New Nuclear Plant Construction

- Watts Bar 2 ready for commercial operation around midyear

Fuel assemblies being loaded into Watts Bar 2

SI-SSA-0015-10160

New Nuclear Plant Construction

- Major project management improvements at Vogtle, Summer projects
  - Westinghouse purchase of CB&I/Stone & Webster
  - EPC contracts restructured
  - Litigation resolved
  - Fluor managing construction

SI-SSA-0015-10161

Preserving the Nuclear Option

Projects with applications for combined construction/operating licenses under review by the Nuclear Regulatory Commission	
Company/Site	Design (# Reactors)
Nuclear Innovation North America: South Texas Project 3 & 4	ABWR (2)
Dominion Resources: North Anna 3	ESBWR (1)
Duke Energy: William States Lee 1 & 2	AP1000 (2)
Duke Energy: Levy County	AP1000 (2)
PPL Bell Bend LLC: Bell Bend	EPR (1)
Florida Power & Light: Turkey Point 6 & 7	AP1000 (2)

SI-SSA-0015-10162

Preserving the Nuclear Option

- NuScale Power expects to file design certification for its small modular reactor in 4th quarter
- Growing interest in GEN-IV reactors

SI-SSA-0015-10163

Fukushima Response Substantially Complete by End of 2016

- U.S. reactors have implemented post-Fukushima safety requirements ahead of the NRC's schedule
- Significant improvement to safety
- U.S. industry's FLEX strategy sets standard worldwide for preventing fuel damage

Five full sets of emergency backup equipment are stored at the two national FLEX centers in Memphis and Phoenix

SI-SSA-0015-10164

Global Market Leadership

- Global nuclear market could reach $750 billion over the next 10 years
- U.S. technology among the most innovative – e.g., the only "passive safety" designs
- U.S. nuclear technology is a strategic instrument of U.S. foreign policy
- Participation in the world market enhances U.S. ability to achieve nonproliferation goals, export safety practices

SI-SSA-0015-10165

Major Referendum in 2015 on U.S. Role in World Nuclear Market

- Export-Import Bank reauthorized
- Nuclear trade agreements with China, South Korea renewed
- Department of Energy's export control regulations updated
- Joint industry-government nuclear trade missions to India, United Arab Emirates

SI-SSA-0015-10166

Status of First License Renewal

- Forty reactors have passed 40-year mark
- Approximately 31,000 MW of nuclear capacity will reach 60 years between 2029 and 2035
- Approximately one-half U.S. nuclear capacity will reach 60 years by 2040

Source: Nuclear Regulatory Commission

SI-SSA-0015-10167

Status of Second License Renewal

- NRC regulatory process stable, well-understood; existing regulations adequate
- In November 2015, Dominion Virginia Power announced intent to file second license renewal application for Surry nuclear plant

- Decision to renew a second time depends on whether market conditions justify capital investment required

SI-SSA-0015-10168

Creating Additional Margin By Increasing Value

SI-SSA-0015-10169

Market Stresses … In Brief

- Low growth (in some cases, no growth) in electricity demand
- Continuing surge in supply of low-cost shale gas
- Fuel/technology diversity is taken for granted and undervalued
- State and federal mandates and subsidies for renewables distort markets
- Transmission constraints
- Market design issues
  - Failure of markets to recognize valuable attributes
  - Price suppression in energy markets

SI-SSA-0015-10170

Solutions Emerging Among the States

- States beginning to recognize need to act
  - Ohio considering PPA for Davis-Besse
  - New York – Reliability Support Services Agreement for Ginna
  - Illinois considering low-carbon portfolio standard, New York developing Clean Energy Standard
- States can also use tools available under Clean Power Plan

Closing nuclear facilities "would eviscerate the emission reductions achieved through the state's renewable energy programs, diminish fuel diversity, increase price volatility, and financially harm host communities."

– New York Gov. Andrew Cuomo
Dec. 2, 2015

SI-SSA-0015-10171

Progress in Improving Markets

- Capacity market reforms
  - New model in PJM better recognizes important nuclear attribute
  - No benefit in markets that have not taken steps to improve
- Energy market reforms
  - Accurate "day ahead" pricing is the key for nuclear energy

NY-NE-PJM Revenue Source by Technology

Sources: Velocity Suite; Entergy Research and Analysis
A.S.: Ancillary Services; PTC: Production Tax Credits; REC: Renewable Energy Credits

SI-SSA-0015-10172

PJM, Others Moving in the Right Direction

- PJM Capacity Performance: Welcome recognition that attributes must be priced in market
  - Rewards resources committed to be available when needed (substantial penalties if not)
  - $1.4 billion to Exelon, $1.1 billion to FirstEnergy
- MISO recently acknowledged concerns about resource adequacy
- FERC denied ISO-NE proposal to include nuclear in winter reliability program

PJM Capacity Auctions $/MWd	
2016-2017 Original	2016-2017 CP Transition
59.37	134.00
2017-2018 Original	2017-2018 CP Transition
120.00	151.50

2018-2019 CP		
RTO	EMAAC	COMED
164.7	225.42	215.00

Market reforms do work. Additional revenues from PJM Capacity Performance gave short-term reprieve to some nuclear plants in western PJM. But market reforms to date are not enough by themselves.

SI-SSA-0015-10173

Price Formation Must Reflect All Costs

- Energy markets: 80-90% of revenue for baseload resources
- Accurate price formation is key: minimize "out of market" revenues (uplift), ensure all costs necessary to operate system reflected in price
- Uplift dampens the wholesale price; impact varies by region but is significant

SI-SSA-0015-10174

Energy Market Reform Goals

- Accurate day-ahead and real-time price signals
- Reflect all RTO actions, all costs of all units used, in setting the market-clearing price
- Allow fast-start units to set market prices

- Ensure day-ahead signals are correct for both energy and reserve needs
- Transparency into reasons for out-of-market actions

SI-SSA-0015-10175

Movement on Energy Market Reforms

- FERC technical conferences in late 2014 on price formation in energy markets
- FERC Notice of Proposed Rulemaking on two issues
  - Settlement intervals
  - Shortage pricing
- NOPR on price formation only addresses real-time market issues, not day-ahead markets
- Order directing reports from RTOs on uplift and other issues
- Proposal to lift offer caps

SI-SSA-0015-10176

Recognizing Nuclear Energy's Carbon-Free Value

U.S. Electric Power Industry CO_2 Avoided

Million Metric Tons 2014

Sources: Emissions avoided are calculated using regional and national fossil fuel emissions rates from the Environmental Protection Agency and generation data from the Energy Information Administration.

U.S. Carbon-Free Electricity Sources

2014

SI-SSA-0015-10177

Recognizing Nuclear Energy's Value Under the Clean Power Plan

- Two compliance pathways:
  - Rate-based (pounds/MWh)
  - Mass-based (tons)
- Clean Power Plan (CPP) favors mass-based compliance:
  - Easier, less expensive for states
  - All existing pollution control programs (SO_2, NOx, etc.) are mass-based
- Mass-based compliance plans could be structured to recognize nuclear plants' compliance value

FACTSHEET

epa.gov/cleanpowerplan

THE CLEAN POWER PLAN

#ActOnClimate #CleanPowerPlan

OPPORTUNITIES FOR NUCLEAR POWER

On August 3, 2015, President Obama and EPA announced the Clean Power Plan – an historic and important step in reducing carbon pollution from power plants that takes real action on climate change. Shaped by years of unprecedented outreach and public engagement, the final Clean Power Plan is fair, flexible and designed to strengthen the fast-growing trend toward cleaner and lower-polluting American energy. With strong but achievable standards for power plants, and customized goals for states to cut the carbon pollution that is driving climate change, the Clean Power Plan provides national consistency, accountability and a level playing field while reflecting each state's energy mix. It also shows the world that the United States is committed to leading global efforts to address climate change.

Nuclear power is part of an "all the above" energy strategy that supports economic growth and job creation, enhances our nation's energy security, and protects the planet for future generations. The Clean Power Plan (CPP) ensures that zero carbon nuclear power will continue to play a prominent and meaningful role in America's energy mix.

EPA expects nuclear power to be a key partner in achieving the goals of the CPP. States can use new nuclear generation to help meet their Clean Power Plan goals. This includes new nuclear reactors that come on-line, including those under construction, and existing facilities that expand their capacity (uprates).

The CPP creates incentives for nuclear energy. Nuclear energy accounts for nearly 20 percent of the power produced in the U.S., and is a reliable, carbon free generation source. The CPP provides multiple pathways and approaches for leveraging the value of clean energy in state plans, and creates incentives for clean energy technologies, including nuclear power. There are incentives to continue operation of existing nuclear units so that emissions from affected fossil-fuel fired sources will

With CPP, Nuclear Power Remains Nearly 20% of the Energy Mix in 2030

SI-SSA-0015-10178

Creating Additional Margin By Increasing Efficiency

SI-SSA-0015-10179

Industry Goals:
Safety, Reliability and Improved Efficiency

- Sustain high levels of safety and reliability
- Identify opportunities and re-design plant processes to improve efficiency and effectiveness
- Use innovative technology to increase efficiency across the industry

The goal: $12/megawatt-hour cost reduction industrywide

SI-SSA-0015-10180

The Goal: 30% Reduction in Cost

Why 30%? To drive innovative thinking, not just tinkering at the margin

How the Arithmetic Works	
Starting point: 2012 total generating cost*	$40/MWh
Goal	$12/MWh reduction

Where Does the $12/MWh Reduction Come From?	
Reduction in capex 2012-2014	$3.50/MWh
Estimated reduction in capex through 2020	$3/MWh
Estimated reduction in fuel costs through 2020	$2/MWh
Estimated cost reductions from improved industry efficiency	$3.50/MWh

* 2012 was peak year for total generating cost

SI-SSA-0015-10181

U.S. Nuclear Plant Costs 2004-2014

(2014 $ per MWh)

Year	Fuel	Capital	Operating
2004	5.28	5.65	18.54
2005	5.02	5.80	18.95
2006	5.04	5.56	19.21
2007	5.13	6.12	19.07
2008	5.35	6.76	19.51
2009	5.93	8.91	20.49
2010	6.76	9.16	20.63
2011	7.10	10.06	21.88
2012	7.46	10.76	21.47
2013	7.73	8.20	20.93
2014	7.17	8.18	20.92

Source: Electric Utility Cost Group

SI-SSA-0015-10182

First Improvement Opportunities Have Been Identified

- Based on analysis of costs, CNO-led teams produced over 180 ideas (Improvement Opportunities)
- These were ranked until 53 initial ideas were identified for pursuit in 2016

- Ten CNO-led teams working on the 53 initial IOs, with plans to develop more during 2016/17

SI-SSA-0015-10183

Improving Regulatory Efficiency: Major Initiatives and Results

- NRC has started self-assessment (Project AIM) to improve performance and "right-size" the agency
- Commission instructed staff to rebaseline and set priorities among regulatory activities
- Commission terminated several rulemakings, including proposal for filtered containment vents ($1.6-billion in avoided costs)

NRC Chairman Stephen Burns

SI-SSA-0015-10184

Looking Forward: 2016 and Beyond

SI-SSA-0015-10185

All Electricity Is Not The Same

- Basic economics
  - Markets operate efficiently only when goods have a price
  - Goods will only be produced when markets assign a price to them
- Different forms of electricity have different "goods" or attributes: Every kilowatt-hour has a pedigree
- Those attributes have varying degrees of value to the market

SI-SSA-0015-10186

Nuclear Energy's Solid Value Proposition

Safe, Reliable Electricity 24/7 Plus …

- Supports Grid Stability
- Provides Price Stability
- Runs When Needed (Fuel on Site)
- Provides Clean Air Compliance Value
- Contributes to Fuel and Technology Diversity (Portfolio Value)
- Avoids Carbon Emissions
- Anchors the Local Community: Jobs, Tax Base

Forward-Looking Statements

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or ongoing low pricing of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulations, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators, including prudency reviews and disallowances,
- any deterioration in our credit quality or the credit quality of our counterparties,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations or increase the cost of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- delays or unforeseen cost escalations in our construction and development activities, or the inability to recover the carrying amount of our assets,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- increases in competition in energy supply markets as well as for transmission projects,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies,
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- an extended economic recession,
- an inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce, and
- changes in the credit quality and the ability of lessees to meet their obligations under our domestic leveraged leases.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.
The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10190

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items.

PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. The last two slides in this presentation (Slides A and B) include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

PSEG STRATEGY: GROWING A HIGH-QUALITY, LOW-RISK ENERGY INFRASTRUCTURE COMPANY

Dan Cregg

EXECUTIVE VICE PRESIDENT AND
CHIEF FINANCIAL OFFICER

PSEG

We make things work for you.

SI-SSA-0015-10192

The PSEG Organization – By the Numbers

Public **S**ervice **E**nterprise **G**roup (PSEG) is a publicly traded (NYSE: PEG) diversified energy company headquartered in New Jersey

- PSEG is one of the ten largest electric companies in the U.S.
- Total Assets (at 12/31/2015): **$37.5 billion**
- 2015 Total Annual Revenues: **$10.4 billion**
- Approximately **13,025** employees at year-end 2015 with inclusion of PSEG-Long Island
- PSEG celebrated its 100th anniversary in 2003
- PSEG has paid a dividend annually since 1907, 2016 marks our **109th year**
- PSEG is ranked 464 on the 2015 Forbes Global 2000 list
- PSEG is ranked 274 on the 2015 Fortune 500 list
- PSEG was named to the Dow Jones Sustainability North America Index for the 8th consecutive year in 2015
- PSEG was awarded the 2010 Edison Award, presented by the Edison Electric Institute, the electric industry's most prestigious honor

SI-SSA-0015-10193

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A ~$12 billion infrastructure program producing high single digit rate base growth through 2020	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow in current environment and upside from market rule improvements
2015 **Assets $24B** **Operating Earnings $787M**	2015 **Assets $12B** **Operating Earnings $653M**

SI-SSA-0015-10194

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2015. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT AND PSEG LONG ISLAND ACTIVITY. SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS

PSEG's Strategy

Investment program delivering results

Operational Excellence: Maintaining reliability and improving performance as we control costs in low price environment

Financial Strength: Strong financial position supports investment program and dividend growth

Disciplined Investment:
- Balanced business mix
- Robust pipeline of opportunities

Results:
- 3rd year of EPS growth
- Continued dividend growth
- Best in class utility growth rate
- Addition of efficient CCGT capacity enhances market position

SI-SSA-0015-10195

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: ReliabilityOne Mid-Atlantic Region's Most Reliable Electric Utility (14th consecutive year), Electric Light & Power's 2015 Utility of the Year, ReliabilityOne Outstanding Outage Response Time and Outstanding Customer Engagement • PSEG Power: Record output from combined cycle units • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Cost-control benefits continue
Financial Strength	• Operating earnings for 2015 of $2.91 per share at upper end of guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased dividend in 2015
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2016-2020) with increased investment in Transmission, Energy Strong, Gas System Modernization Program, and Electric and Gas distribution • Power capital program focusing on growth investments including Keys, Sewaren and Bridgeport Harbor, Nuclear and Fossil uprates, PennEast Pipeline, and Solar Source

SI-SSA-0015-10196

Growth in capital spending aligned with customer needs

PSEG Capital Spending

2011 – 2015: ~$14.3 Billion | **2016E – 2020E*: ~$16.0 Billion**

*INCLUDES ALL PLANNED SPENDING. **POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. ***INCLUDES PENNEAST PIPELINE EQUITY INVESTMENT OF $0.1B. E=ESTIMATE.

SI-SSA-0015-10197

Building an efficient, clean, reliable energy platform

Timeframe	Actions taken
2011 – 2015: Transformed business mix	• Applied ~$14.3 billion towards investments • Improved credit ratings • Monetized Energy Holdings' portfolio • Strong balance sheet sustained during period of low power prices, while increasing the dividend
2016 – Forward: Strong financial position supports continued growth	• Continued dividend growth in 2016 • ~$16 billion investment program through 2020 • Utility investments focused on improving reliability and replacing aging infrastructure • Continued investment in reliable and efficient energy infrastructure at Power • Financial capability supports further expansion of the current capital plan

SI-SSA-0015-10198

PSE&G's investment program

Meeting public policy goals and customer needs

SI-SSA-0015-10199

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/
NET INCOME TO RECONCILE TO OPERATING EARNINGS. DISTRIBUTION RATE BASE INCLUDES SOLAR AND ENERGY EFFICIENCY

Managing the total costs to customers while investing in the system

PSE&G Typical Residential Customer Bills*

- PSE&G customers' combined electric and gas bills declined 28% over the period
- Low gas prices and elimination of transition charges drove rate decreases

SI-SSA-0015-10200

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

Investment program combined with cost control drives growth in earnings

Bonus depreciation

- Lowered rate base and growth rate but growth still remains strong
- Investments are less expensive for customers, providing an opportunity for incremental cost-effective system improvements

SI-SSA-0015-10201

PSEG

* INCLUDES IMPACTS OF BONUS DEPRECIATION. E = ESTIMATE.

PSEG Long Island - Focused on improving

customer service and reliability while managing costs

- Earned $0.03* per share in 2015 as expected
  - Realized 18/21 metrics in 2014 and 2015
    - Customer service
    - Reliability
    - Economic
    - Green
    - Safety

- A contracted increase in revenues expected to bring contribution to earnings to $0.07* per share

SI-SSA-0015-10202

* INCLUDES IMPACT OF ENERGY RESOURCES & TRADE CONTRACT.

PSEG Power has generating assets in three competitive markets

- Assets located near load
- Low cost portfolio with gas cost advantage
- Positioned to benefit from volatility in real-time markets
- Fleet meets new capacity performance standards
- 1,800 MW of new CCGT capacity under construction in PJM and ISO-NE

SI-SSA-0015-10203

PSEG Power developing 1,800 MW of new, efficient CCGT capacity in MD, NJ and CT

- Constructing the 755 MW CCGT Keys Energy Center in Maryland (SWMAAC*) at an estimated cost of $825 to $875 million
- Constructing a new 540 MW CCGT unit, Sewaren in New Jersey (EMAAC*) at a cost of $625 to $675 million which will replace older Sewaren units
- Constructing a new 485 MW CCGT unit, Bridgeport Harbor 5 (ISO NE), at a cost of $525 to $575 million
- Both Keys and Sewaren 7 are targeted to be in-service in 2018 and Bridgeport Harbor 5 in 2019
- Expanding civic stewardship roles and programs in neighboring communities

*SWMAAC = SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL
LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

SI-SSA-0015-10204

Power's fleet to be transformed with addition of Keys, Sewaren 7 and Bridgeport Harbor in 2018-2019

Projected Fleet Comparison 2015 to 2020E

*EXCLUDES SOLAR AND KALAELOA E = ESTIMATE **INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third-party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations, and PSE&G's ability to recover costs and earn returns on authorized investments;
- the impact of pending and any future rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10216

PSEG is a diversified energy company consisting of a regulated utility, a merchant generation business, and a utility operations provider.

PSEG

$43B Assets; $9B Operating Revenue (2017)

PSE&G	PSEG Power LLC	PSEG LONG ISLAND
Electric & Gas Delivery and Transmission	Regional Competitive Generation	Operational Services

1.1MM Electric Customers

SI-SSA-0015-10217

Session Overview: The Health of US Power Markets

Electric Supply & Demand
- Load growth vs Generation build
- Traditional generation vs. Renewable generation

Impact of changing market forces: The Gold Rush
- Californian electric markets
- Is Offshore Wind next?
- Global LNG has come of age

Key items to address:

How healthy are the wholesale power markets?
- profitability, customer satisfaction, trading liquidity

What are the key drivers?
- market constructs, Governmental incentives, commodity markets

What are the emerging opportunities?
- Batteries, Offshore Wind, Electric vehicles

What are the potential risks?

SI-SSA-0015-10218

U.S. electricity demand has lagged GDP growth

Source: EIA Annual Energy Outlook 2018 (reference case)

Source: EPRI; ECOS Consulting

Energy efficiency (state mandates, federal building codes, appliance standards and technology adoption) is having a material impact on electricity consumption.

SI-SSA-0015-10219

Most U.S. power markets have excess generation and are expected to remain in excess through 2027. ERCOT is a notable exception.

Source: NERC "2017 Long-Term Reliability Assessment" – December 2017

ERCOT's increasing dependence on wind generation is resulting in periods of sustained low energy prices, and is causing coal and older gas technology generation to retire.

SI-SSA-0015-10220

Fuel economics, Federal air quality standards, and state renewable mandates have driven these changes

Source: U.S. Energy Information Administration, Annual Energy Outlook 2018
Note: Renewable Sources includes wind, solar, geothermal and old hydro and biomass

SI-SSA-0015-10221

40 GW of generating capacity under construction in the US

Generating capacity under construction in the US Lower 48 (as of March 2018)

Note: SERC = SERC Reliability Corporation. DSW = Desert Southwest. NWPP = Northwest Power Pool. CC = combined cycle. CT = combustion turbine. ST = steam turbine. Excludes coal conversions.

After many false starts, offshore wind may finally make strides over the next decade in the U.S. Northeast.

U.S. Offshore Wind Targets and Projects

Source: S&P Global

State Offshore Wind Targets and Awards (MW)

State	End Goal	By Year	RFP Awarded	Already Online	RFP Pending
NJ	3,500	2030	24	-	3,476
NY	2,400	2030	90	-	2,310
MA	1,600	2027	800	-	800
MD	368	2022	368	-	-
RI	430	2022	400	30	-
CT	200	2025	200	-	-
Total	**8,498**		**1,882**	**30**	**6,586**

Potential Build Timeline by State

Six states established offshore wind targets of ~8.5 GWs of capacity, with ~2 GWs already awarded.

SI-SSA-0015-10229

The majority of proposed offshore wind projects in the Northeast are in the early stages of development with only one project operational.

Data Source: U.S. Department of Energy's National Renewable Energy Laboratory "2017 Offshore Wind Technologies Market Update" - August 2018
Note: The MA offshore wind winning bid is about 55% lower than the MD winning bids, due to technology advances, lower costs and other factors.

SI-SSA-0015-10230

Productivity improvements have driven down and flattened the natural gas production cost curve to the $2 – 4/MMBtu break-even range.

Cost Reduction Drivers

Drilling Efficiency

- Increase lateral lengths
- Better identification and pursuit of sweet spots
- Efficiencies in multi-well pad drilling

Service Cost Deflation

- Rig rental costs
- Casing and cement costs
- Cost of fracturing equipment and crews

Source: IHS Markit
Note: In 2017, the United States consumed about 27.1 trillion cubic feet (Tcf) of natural gas.

About 150 Tcf of associated gas can be produced at a negative break-even price from high-performing areas of oil plays and NGL-rich plays.

North American gas production has increased dramatically, largely driven by the Marcellus/Utica Shale.

U.S. Dry Natural Gas Production by Source
2000–2050 (trillion cubic feet)

U.S. Shale Gas Production by Source
2000 – 2050 (trillion cubic feet)

Source: U.S. Energy Information Administration, Annual Energy Outlook 2018
Note: "Other" includes Alaska and coalbed methane

Marcellus/Utica shale gas production grew from zero in 2009, to a peak of ~30Bcf/day in 2018, leading to this region being a net exporter and reversing pipeline flows to the Gulf coast and Rockies.

Bitcoin vs Energy Commodities

(Source: Thomson Reuters, Coindesk.com)

Bitcoin vs Energy Commodities

The above is hardly a surprise as we expected Bitcoin to be more volatile than currencies and equities. How about versus energy commodities which tend to be much more volatile than currencies and equities due to issues like storage constraints and weather. **Once again Bitcoin outshines most energy commodities like oil and natural gas.** Oil has a volatility of 22.8% and implied daily move of 1.43%, while US Natural Gas has a volatility of 45.4% and implied daily move of 2.84%. Yet while neither WTI nor US Natural Gas come close to being as volatile as Bitcoin, **there is one energy commodity that Bitcoin lags behind - the one that Enron for various reasons had a particular affinity for: Electricity.** And boy does it lag it: PJM Western Hub Day Ahead Peak prices, one of several US electricity pricing hubs and the most liquidly traded electricity market, **has a volatility of 192.8% and an implied daily move of 12.05%.** Making it a little more than twice as volatile as Bitcoin. The inability of electricity to be stored causes it to be highly volatile. Unfortunately for “Mr. Watanabe”, power prices are traded on an institutional basis, making it difficult for retail investors to partake in such a highly volatile market.

Forward Looking Statement

Certain of the matters discussed in this report constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in Item 1. Financial Statements—Note 8. Commitments and Contingent Liabilities, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, and other factors discussed in filings we make with the United States Securities and Exchange Commission (SEC). These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to sufficiently obtain coverage or recover proceeds of insurance on such matters,
- increase in competition in energy supply markets as well as competition for certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology and customer usage patterns.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws. The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The last slide in this presentation includes a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

SI-SSA-0015-10244

PSEG – 2012 Highlights

2012 Earnings in-line with guidance

- Achieved operating earnings of $2.44 per share, at the high end of guidance range of $2.25-$2.50, including storm-related costs at PSE&G
- PSE&G represented 43% of consolidated operating earnings with growth in transmission

Operational excellence

- Record output from CCGTs, continued strong production from Nuclear, and Power's control of O&M supported results
- PSE&G recognized for reliability: National ReliabilityOne Excellence Award, Mid-Atlantic Reliability Award, and Award for Outstanding Response to a Major Outage Event; as well as EEI's Emergency Response Award
- Restored service to 2.1 million customers in a two-week period of time in the aftermath of Superstorm Sandy and the Nor'easter that followed
- Extension of major labor contracts

PSEG disciplined capital investment

- Key regulatory approvals received for major transmission projects
- BPU decisions pending on Solar4All Extension and Solar Loan III
- Power added 400 MW of new peakers in time to respond to summer demand
- Holdings added 40 MW of new solar capacity

PSE&G's Energy Strong Capital Program addresses new reality

- New ten-year, $3.9 Billion Infrastructure Program filed with the NJBPU to strengthen PSE&G's distribution system focusing on hardening and resiliency
- Plan to invest an additional $1.5 Billion in transmission grid over the ten-year period
- Energy Strong proposal includes:
  - ✓ Protecting 40 utility installations from severe storms (**$1.7 Billion**)
  - ✓ Making the electric grid smarter and easier to repair (**$454 Million**)
  - ✓ Adding backup distribution lines and system redundancies (**$415 Million**)
  - ✓ Undergrounding 20 miles of overhead distribution lines (**$60 Million**)
  - ✓ Modernizing the gas distribution system (**$1.1 Billion**)

- Better protection for homes and businesses during severe weather and improved day to day system reliability
- Proposed filing creates ~5,800 jobs and stimulates economic activity for New Jersey businesses

SI-SSA-0015-10252

34 Local NJ towns and 3 counties support

- 34 local NJ governments, and the counties of Hudson, Passaic and Somerset, have approved resolutions in support of Energy Strong, PSE&G's infrastructure proposal to improve and fortify its electric and gas distribution systems

- The Energy Strong proposal is currently being evaluated by the NJ Board of Public Utilities

- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-10280

State policy imperatives have been redefined by Superstorm Sandy

Storm report issued by NJBPU focusing on:

- Preparedness Efforts
- Communications
- Restoration and Response
- Post Event Analysis
- Underlying Infrastructure Issues

Storm Deferral Filings:

- On December 19, 2012 the Board granted a PSE&G request for general authority to defer storm restoration costs, thereby making such costs potentially recoverable in future rate filings
- On February 20, 2013, at its open public meeting, the Board voted that the recovery of all such storm restoration costs would be reviewed in a generic (multi-utility) proceeding

SI-SSA-0015-10281

We have also responded with a plan focused on infrastructure hardening and resiliency

- PSE&G filed a petition on February 20, 2013, with the NJBPU seeking approval for the Energy Strong Program (ES) which will harden electric and gas distribution infrastructure and increase the resiliency of the electric distribution system
- The filing complements the NJBPU's recently issued order requiring all Electric Distribution Companies to take specific actions to improve preparedness and response to major storms
- ES program represents a potential investment of approximately $3.9 billion over the next 10 years. PSE&G has asked for initial funding approval of $2.6 billion during the first five years
- Additional Transmission investment of approximately $1.5 billion would be included in future FERC Formula Rate filings

SI-SSA-0015-10282

PSE&G is continuing to provide solutions

to assist New Jersey in achieving its EMP goals

Solar Agreement Reached

- Agreement reached with NJBPU Staff and certain other parties provides for investment of $446 million over a 3-year period, and a return on equity of 10%
- A decision by the New Jersey BPU is anticipated no later than May 31

Solar 4 All extension (S4Ae)	Solar Loan III (SL3)
Agreement to invest up to $247 million to develop new solar capacity on landfills, brownfields (42MW) and 3 MW in smaller pilot programs	Agreement to invest up to $199 million on 97.5 MW of new solar

SI-SSA-0015-10283

Lower commodity costs and expiration of certain transition charges are expected to fully offset the impact to customer bills

*2018 BGS/BGSS RATES AS WELL AS SBC AND DISTRIBUTION RATES HELD CONSTANT AT CURRENT 2013 RATES. RATES RELATED TO ELECTRIC RESTRUCTURING: SECURITIZATION (STC), NON-UTILITY GENERATION CHARGE (NGC), & TRANSITIONAL ENERGY FACILITIES ASSESSMENT (TEFA), ARE REDUCED TO ZERO BY 2018. THE RGGI RECOVERY CHARGE (RRC), SOLAR PILOT RECOVERY CHARGE (SPRC), AND CAPITAL ECONOMIC STIMULUS INFRASTRUCTURE INVESTMENT PROGRAM EXTENSION (CIP II) BILL IMPACTS ARE INCLUDED IN THEIR RESPECTIVE GAS AND ELECTRIC BARS AND FORECASTED IN 2018 BASED UPON LATEST ESTIMATE. THE 2018 BILL IMPACTS OF ES, EE4ALL, AND S4AEXT/SL3 IMPACTS ARE BASED UPON CURRENT ESTIMATES.

SI-SSA-0015-10284

PSE&G's 2013 operating earnings

LONG ISLAND POWER AUTHORITY

SI-SSA-0015-10286

LIPA T&D management contract

In December 2011, the Long Island Power Authority (LIPA) selected PSEG to manage its electric transmission and distribution system for 10 years starting in 2014

- Reasons for selecting PSEG included:
- Proven technical capabilities and track record of top quartile customer service and reliability
  - ✓ Commitment to cost control and investment optimization
  - ✓ Corporate culture of transparency and data-driven decision making
  - ✓ Transition activities on-track – successfully achieving all milestones through February 2013

- Evaluating impact of Superstorm Sandy and recent LIPA management changes on the overall schedule and transition

Successful management of the LIPA transmission and distribution system may lead to additional growth opportunities

SI-SSA-0015-10294

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-10295

PSEG Power strategy

Focused on safety performance, unit reliability, competitive cost structure with control of maintenance costs, achieving operational excellence, and supporting market rules to maintain a level playing field

SI-SSA-0015-10296

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus

Fleet Diversity/Efficiency Focus

- Fleet diversity across the dispatch curve and fuel types provides flexibility
- Nuclear units continue to achieve strong operational results and are well positioned for the future
- Peach Bottom steam path retrofit completed
- Fossil fleet is suited for market dynamics
- CCGT achieved record output in 2012
- Installed 400 MW new peaking capacity in 2012

Financial/Economic Focus

- O&M cost control programs have delivered
- Sites offering competitive advantage suited for expansion

Regulatory Focus

- Strong regulatory performance
- Industry leadership in the changing regulatory environment

SI-SSA-0015-10297

PSEG Power delivered in 2012

Storm and weather challenges	Market challenges	Value delivered
• SuperStorm Sandy impacted our generating sites • Warm winter put pressure on demand and pricing for both electricity and gas • Hot summer weather created challenging operating environment	• Unit outages and transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by weather and economy	• Cost control • Lower dispatch and fuel cost • Captured value through coal/gas switching, unit flexibility • Improved unit availability • Coal & oil sales optimized inventory • Expedited return from storm outages, restored margin opportunities • Optimized unit dispatch across fleet during storm recovery

SI-SSA-0015-10298

PSEG Power has generating assets

in three competitive markets

- Low cost portfolio
- Fuel flexibility
- Assets near loads
- Poised to benefit in real time markets
- Fleet will maintain diversity and efficiency in 2016 after HEDD
- Most sites suitable for expansion

SI-SSA-0015-10299

PSEG Power Nuclear fleet is a critical element of success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,174 MW
• Owned Capacity: 1,174 MW
• License Expiration: 2046
• Next Refueling
  • Fall 2013
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%, Exelon – 43%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,326 MW
	• Owned Capacity: 1,335 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 -- Spring 2013
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,245 MW
		• Owned Capacity: 1,123 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2013

SI-SSA-0015-10300

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations – eight consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent and attractive training program
- Developing Fukushima action plan in response to NRC staff review
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-10301

PSEG Power's Fossil Fleet availability has shown steady improvement

EFORd improvement resulted in over 200 MW of additional capacity available

EFORp improvement and availability at peak demand times has resulted in performance payments in each of the last four years

SI-SSA-0015-10302

PSEG Power improvements achieved in combined cycle fleet efficiency

Actions Taken to Create Value	
• Heat rate improvement program • Operational Excellence Model	• Training programs • Unit testing initiative • Outage work to restore efficiency

SI-SSA-0015-10303

Superstorm Sandy affected the fleet;

when the load returned, Power was ready

SI-SSA-0015-10304

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- Power is well positioned for HAPS

SI-SSA-0015-10305

PSEG Power's focus on costs has resulted in moderate increase in O&M for six years

Cost control actions taken:	
• Coal assessment • CCGT material condition assessment • Contract renegotiation	• Material management • Nuclear maintenance productivity study • Nuclear outage efficiency initiative

SI-SSA-0015-10306

* INCLUDES IMPACTS FROM STORM RECOVERY COSTS AND POTENTIAL RELATED INSURANCE PROCEEDS.
E = ESTIMATE.

PSEG Power is well positioned for growth in the fleet when market conditions dictate

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Interconnection • Gas Pipeline Access • Sites/Space • Emissions

SI-SSA-0015-10307

PSEG Power will maintain diversity and efficiency after a realignment of the fleet in 2016

Objective
2012 → 2016E

- Maintain fuel diversity
- Maintain load serving capability
- Improve fleet heat rate by 6%
- Maintain low cost structure
- Environmental improvement

Fuel Diversity
13,226 MW 11,200 MW

Energy Produced
52.5 TWh 52-54 TWh

SI-SSA-0015-10308

PSEG Power is an established leader

SI-SSA-0015-10309

PSEG Power has added value with focus on operational excellence

2008		2012
3,622	Nuclear capacity (MW)	3,632
92%	Nuclear equivalent availability	93%
29.3	Nuclear generation (TWhrs)	29.8
55	Total generation (TWhrs)	53
3,157	CCGT capacity (MW)	3,176
12.1	CCGT generation (TWhrs)	16.2
8.9%	Fossil EFORd	6.3%*
87%	Fossil equivalent availability	90%
63	SO_2 (Ktons)	9
16	NO_x (Ktons)	10

SI-SSA-0015-10310

PSEG

* EXCLUDES SANDY IMPACT.

PSEG POWER
ER&T

SI-SSA-0015-10311

PSEG

We make things work for you.

PSEG Power
ER&T strategy

Focused on optimizing the value of its asset portfolio and providing outstanding service to our customers, while prudently managing risk

SI-SSA-0015-10312

Diversified assets and flexible dispatch

High performing, baseload nuclear assets	3,632 MW
Fuel advantaged, baseload coal plants in PA	776 MW
Flexible combined cycle fleet	3,176 MW
Well leveraged intermediate & peaking assets	5,642 MW

Integrated trading and dispatch capability around fleet

SI-SSA-0015-10313

Fleet capacity has been advanced by:

Improved Heat Rate capability

Trading acumen to execute fuel switching opportunities

Reduced O&M and increased start-up success

Capturing new products opportunity with minimal investment

SI-SSA-0015-10314

Spark spread replaces dark spread as major value driver

- Spark spread has risen above dark spread in PJM markets
- Power's gas units operating at record throughput
- Gas operation provides much more operational flexibility
- Enhances the ability of trading organization to capture volatility

SI-SSA-0015-10315

2013 BGS Auction Results for PSE&G Zone

BGS sales account for about a third of our forward portfolio of hedges

SI-SSA-0015-10316

BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2011-2013 WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2013.

Our hedging mix has changed with the market but still captures the fleet's locational advantage

- 3 Year forward BGS sales comprise smaller percentage of Power's hedges
- Other full requirement load deals help capture additional locational and load shape premium

SI-SSA-0015-10317

PSEG

NOTE: PERCENTAGES REPRESENT HEDGED VOLUMES IN PLACE AFTER BGS AUCTION.

Hedging strategy designed to protect gross margin and leverage the portfolio

Ratable Hedging on Baseload:

- 3 year ratable hedge tactics
- 3 year PJM hedge of capacity (not included in table)
- Load following sales (such as BGS) have strong correlation to our units for hedging basis and load shaping premium

Dynamic Hedging on Intermediate Coal, Combined Cycle and Peaking:

- Position fleet to take advantage of market volatility
- Gas and load-following fleet left open until prompt year to capture volatility
- Use all trading products to capture option value of assets and benefit from market dislocations

		Apr-Dec 2013	2014	2015
Base Load (Nuclear and Base Load Coal)	Volume TWh	26	35	35
	% Hedged	100%	80-85%	40-45%
	Price $/MWh	$50	$50	$50
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	15	19	18
	% Hedged	30-35%	0%	0%
	Price $/MWh	$50	$50	$50
Total	Volume TWh	40-42	53-55	52-54
	% Hedged	70-75%	50-55%	25-30%
	Price $/MWh	$50	$50	$50

HEDGE PERCENTAGES AND PRICES AS OF MARCH 28, 2013. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS.

SI-SSA-0015-10318

PSEG's locational advantage

and electric basis

- Basis (PS Zone to PJM West) will continue to trend downward for forward sales
- Volatility will remain significant in the prompt periods (especially summer/winter)
- Power maintains sufficient length to participate in upside volatility as well as a valuable 250MW transmission position into NYC
- Basis will continue to have a positive impact on PSEG Power profitability

SI-SSA-0015-10319

*AS OF MAY 15, 2013.

PSEG's locational advantage

and gas basis

- Lower cost supplies of shale gas have been beneficial to both PSE&G customers and PSEG Power
- Over 50% of our available pipeline capacity can access market area supplies of shale gas
- Power's generating units sit in close proximity to the Marcellus fairway
- Power buys approximately 350BCF/year of gas
- We have been able to arbitrage gas values from South to North and East to West using our storage and pipeline capacity

SI-SSA-0015-10320

PJM's capacity market continues to recognize locational value of our fleet

$/MW-day	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016
Power's Average Prices	$153	$244	$162	$167
Rest of Pool Prices	$16	$28	$126	$136
Power's Capacity (MW)	10,400	10,600	10,300	9,000

2016/2017 RPM Auction Influenced By:

- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Updated Transfer Capabilities
- New Build/Cost of New Entry
- Demand Response

SI-SSA-0015-10321

Reserve margins in PJM declining with retirements

Generation Deactivation Notifications

Source: PJM TEAC, 1/10/2013

- PJM Pending Deactivation Requests of 12,634 MW as of January 22, 2013
- Approximately 4,000 MW of additional owner announced retirements in PJM through next auction

Forecast Reserve Margin (PJM January 2013)

- PJM forecasts a declining Reserve Margin through 2017

SI-SSA-0015-10322

Regulatory Advocacy

	ISSUE /POLICY	HOW ADDRESSED?
PJM	MOPR	Sufficiency/Exceptions before FERC and courts
	DEMAND RESPONSE RULES	Performance/eligibility/compensation issues before courts, FERC, and PJM stakeholder process
	ANCILLARY/ENERGY	Regulation/Black-start modifications under consideration in PJM stakeholder process before FERC

PSE&G provides high reliability at below average cost which creates superior value to customers

SI-SSA-0015-10344

SAIDI = SYSTEM AVERAGE INTERRUPTION DURATION INDEX, A MEASURE OF AVERAGE OUTAGE DURATION FOR ALL CUSTOMERS SERVED.

PSE&G prioritizes public safety

while maintaining value to customers

LEAK RESPONSE RATE = PERCENTAGE OF UTILITY RESPONSES TO REPORTED LEAKS WITHIN ONE HOUR.

Formula rates for transmission make the process more predictable with contemporaneous returns

	Transmission (Federal)	Distribution Base Rate Case (State)
Current ROE	• 11.68% base • 12.93% with incentives on Susquehanna-Roseland • 11.93% with incentives on Northeast Grid	• 10.3%
Volatility of Returns	• Low – prospective recovery with annual true-ups for over/under recovery	• Higher – performance impacted positively/negatively by cost management, weather, customer demands, etc.
Process	• Formula – The rate template and specific elements like ROE are predetermined with annual updates and true ups	• Litigated case with each element (depreciation, ROE, O&M levels, Rate Base) scrutinized and settled
Intervenors	• State consumer advocates usually participate	• State consumer advocates • Large customers • Other parties affected by the case, e.g. Solar Developers
Test Year	• PSE&G has fully **forecasted** test year for both Capital and O&M	• **Historical** test year with pro-forma adjustments for known and measurable items, e.g. wage escalation
Time to resolve	• Annual Formula updates are filed in October with January 1 effective date	• Typically settled within 12-15 months

SI-SSA-0015-10346

New Jersey Board of Public Utilities (BPU)

- The Board of Public Utilities consists of five commissioners appointed by the Governor. These appointees are confirmed by the NJ Senate for six-year, staggered terms. The Governor appoints one of the five to serve as Commission President.
  Currently, the commissioners are:
  - Robert M. Hanna, Commission President
  - Jeanne M. Fox

* WEATHER NORMALIZED ESTIMATED ANNUAL GROWTH PER YEAR OVER FORECAST PERIOD

Key economic indicators forecast renewed growth over the 2012 to 2015 timeframe

The New Jersey economy increased by 0.3% annually from 2010 to 2012 and is anticipated to grow 2.3% per year from 2012 to 2015

New Jersey total non-farm employment increased by 0.6% annually from 2010 to 2012 and is expected to grow 1.4% per year from 2012 to 2015

Real personal income in New Jersey increased by 1.4% annually from 2010 to 2012 and is expected to increase 2.5% per year from 2012 to 2015

Single family housing starts declined by 2.6% annually from 2010 to 2012 and are expected to increase ~24% per year from 2012 to 2015

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as for transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies, and
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The last slide in this presentation includes a list of items excluded from Net Income to reconcile to Operating Earnings, with a reference to those slides included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

Is the shale gas boom distorting market design?

Shale gas is an example of markets doing what they do best

- Response to a price signal
- Creative application of technology
- Unexpected / unplanned solution
- Game-changer, and customers reap economic benefits

But it does change the market economics for all generators.

- Is this a "distortion", or just an "impact"?

SI-SSA-0015-10362

Should nuclear and coal be valued the same as natural gas in a competitive power marketplace?

Two fundamental disconnects hinder our collective ability to allow energy markets to function.

- What is the cost / value of providing energy?
- Should centralized planning of generation resource types play a role, and if so, how does it interact with market functioning?

SI-SSA-0015-10363

What is the cost of providing energy?

Is the cost too high?

The study says more infrastructure is needed to reduce energy costs,…

Manhattan on Oct. 30, after Superstorm Sandy left much of New York without power

… when they don't have it.

SI-SSA-0015-10366

Should centralized planning play a role, and if so, how does it interact with market functioning?

prices were higher in 2014 than in 2013 and capacity market prices were slightly lower in 2014 in 10 eastern zones and substantially higher in six western zones. Net revenues for all plant types were significantly affected by the high prices and high demand in January 2014 which resulted in an increase in profitable run hours for dispatchable units.

In 2014, average net revenues increased by 74 percent for a new combustion turbine, 30 percent for a new combined cycle, 113 percent for a new coal plant, 43 percent for a new nuclear plant, 24 percent for a new wind installation, and 7 percent for a new solar installation. Increases in 2014 net revenues were primarily the result of higher energy net revenues in January 2014. A new combined cycle would have been profitable in 12 of 19 zones while a new CT would have been profitable in 10 eastern zones. A new coal unit and a new nuclear unit would not have been profitable in any zone in PJM.

In 2014, a substantial portion of units did not achieve full recovery of avoidable costs through net revenue from energy markets alone, illustrating the critical role of the PJM capacity market in providing incentives for continued operation and investment. In 2014, RPM capacity revenues were sufficient to cover the shortfall between energy revenues and avoidable costs for the majority of units and technology types in PJM, with the exception of some coal and oil or gas steam units.

The impact of a relatively short period of high loads on net revenues illustrates how scarcity pricing can work to address the missing money issue in wholesale power markets. The net revenue impacts of a short period of unpredictable high load were substantial. But the question is whether relying on such revenues for the incentive to invest in new and existing resources is a preferred alternative to relying on more predictable revenues from a capacity market which is tightly linked to scarcity pricing in the energy market through a functional net revenue offset.

Particularly in times of stress on markets and when some flaws in markets are revealed, non-market solutions may appear attractive. Top down, integrated resource planning approaches are tempting because it is easy to think that experts know exactly the right mix and location of generation resources and the appropriate definition of resource diversity and therefore which technologies should be favored through exceptions to market rules. The provision of subsidies to favored technologies, whether solar, wind or nuclear, is tempting for those who would benefit but subsidies are a form of integrated resource planning that is not consistent with markets. Subsidies to existing units are no different in concept than subsidies to planned units and are equally inconsistent with markets. Cost of service regulation is tempting because guaranteed rates of return and fixed prices may look attractive to asset owners in uncertain markets and because cost of service regulation incorporates integrated resource planning.

But the market paradigm and the non-market paradigm are mutually exclusive. Once the decision is made that market outcomes must be fundamentally modified, it will be virtually impossible to return to markets.

Much of the reason that market outcomes are subject to legitimate criticism is that the markets have not been permitted to reveal the underlying supply and demand fundamentals in prices. Before market outcomes are rejected in favor of non-market choices, markets should be permitted to work.

It is more critical than ever to get capacity market prices correct. A number of capacity market design elements have resulted in a substantial suppression of capacity market prices for multiple years. The impact of continued inclusion of limited DR products in the capacity market was $2.2 billion in the 2017/2018 Base Residual Auction, a price reduction of 22.9 percent, holding everything else constant. The impact of the 2.5 percent offset to demand was $2.4 billion, a price reduction of 24.5 percent, holding everything else constant. The impact of continued inclusion of limited DR products combined with the impact of the 2.5 percent offset to demand, was $3.4 billion, a price reduction of 31.3 percent, holding everything else constant. The PJM market results in January highlighted the inadequacy of performance incentives in the current capacity market design.

These market design choices have substantial impacts. PJM is addressing the fundamental issues of the capacity market design in its Capacity Performance proposal, including price formation, product definition and performance incentives.

Particularly in times of stress on markets and when some flaws in markets are revealed, non-market solutions may appear attractive. Top down, integrated resource

But the market paradigm and the non-market paradigm are mutually exclusive. Once the decision is made that market outcomes must be fundamentally modified, it will be virtually impossible to return to markets.

Much of the reason that market outcomes are subject to legitimate criticism is that the markets have not been permitted to reveal the underlying supply and demand fundamentals in prices. Before market outcomes are

SI-SSA-0015-10367

What happens to capacity markets if demand response is removed in response to recent litigation?

Demand response is a key element of a functioning competitive energy market. But how it participates is important.

- Consistent with EPSA v. FERC, DR belongs on the demand side
- DR should have comparable performance obligations as supply

FERC Commissioner Tony Clark's dissent in order denying PJM's Stop-Gap proposal:

"Today's order…perpetuates system inefficiencies created by the overcompensation of demand response products in wholesale electricity markets…I continue to believe that calling a "nega-watt" the equivalent of a "mega-watt" is clever rhetoric, but it defies common sense…Enabling functioning price-responsive demand is the right answer… Price-responsive demand provides all of the proper price-forming benefits the Commission seeks, but without concocting bureaucratically complex schemes to pay consumers not to consume power."

SI-SSA-0015-10368

Are energy and ancillary services markets being operated in a way that produces accurate price signals?

FERC Technical Conferences identified numerous opportunities to improve price formation, including:

- Use sub-hourly settlement intervals
- Allow block-loaded units to set prices
- Model all constraints and reliability requirements in dispatch software
- Allow real-time bid updates
- Improve shortage pricing
- Improve transparency, particularly of operator actions
- Develop ISO performance metrics that incentivize accurate price formation

ISO's are at various stages of implementing or considering these best practices, but opportunities to improve remain

1Q 2013 Performance Update

"PSEG delivered for shareholders in the first quarter of 2013. We reported operating earnings of $0.85 cents per share compared with operating earnings of $0.85 cents per share earned in 2012's first quarter. We remain on track to meet our objectives for full year operating earnings of $2.25 - $2.50 per share. Results for the quarter demonstrated the locational value of Power' assets which, along with the strong performance of the nuclear fleet and our long position, allowed us to take advantage of a favorable price environment in the energy marketplace. Our results also reflect a contribution from PSE&G's increased capital investment in transmission and the continued benefit to results from our focus on operational excellence. PSEG is committed to delivering on the long-term promise associated with our proposed 10-year, $3.9 billion Energy Strong investment program. The proposal is a natural extension of our strategy to maintain PSE&G as one of the nation's most reliable utilities, and would occur during a period of time when certain major charges on the electric bill are scheduled to expire. The combination of growth at PSE&G with PSEG Power's free cash flow and our strong balance sheet provide the diversification and financial flexibility to help us contend with various market conditions and meet the long-term goals of our customers and shareowners."

– Ralph Izzo, CEO & Chairman, April 30, 2013

PSEG – 1Q 2013 HIGHLIGHTS

Earnings Strong

- Operating earnings of $0.85 vs. $0.85 per share in Q1 2012
- Power benefitted from higher pricing and increased output
- Increased contribution to earnings from PSE&G's investment in transmission

Operational Excellence

- PSEG Power output up 7.7% in quarter; nuclear capacity factor at 101%
- Diversity and location of Power's fleet provided flexibility to participate in market
- PSE&G's O&M on track to meet full-year expectations

PSEG Disciplined Capital Investment

- BPU decision pending on Solar 4 All extension and Solar Loan III agreement
- 33 local NJ governments have approved resolutions in support of PSE&G's Energy Strong proposal to fortify its electric & gas distribution systems
- Credit ratings upgraded by Standard & Poor's for PSEG, PSE&G and Power to BBB+/A/BBB+, respectively
- Increased common dividend to indicative annual rate of $1.44 per share

Quarterly UPDATE

Q1 2017

Q1 2017 - Quarterly Performance Update

NYSE: PEG

"The company reported today Q1 2017 Net Income of $114 million, or $0.22 per share as compared to Net Income of $471 million, or $0.93 per share in Q1 2016. Non-GAAP Operating Earnings for Q1 2017 were $466 million or $0.92 per share compared non-GAAP Operating Earnings of $463 million or $0.91 per share in 2016's first quarter. PSEG's Net Income results of $0.22 per share reflect our decision last year to retire the Hudson and Mercer coal-fired generating units in June 2017; results also reflect an increase in a reserve for the impairment of our leveraged lease investment in the Keystone – Conemaugh generating stations. Non-GAAP Operating Earnings for the first quarter benefitted from the on-going successful execution of our investment program. Growth of our regulated utility business and effective cost management offset the impact on Power's earnings of a decline in energy prices. PSE&G is expected to grow 8.5% in 2017 to represent 66% of our full year 2017 non-GAAP Operating Earnings guidance of $2.80 - $3.00 per share.

We have also turned our attention to achieving key policy objectives that we set for ourselves. First among these is getting recognition for the value of our nuclear generating assets. We have initiated discussions with key stakeholders at the federal and regional levels, and here in New Jersey to improve awareness of the importance of nuclear power. In addition, our company-wide investment program of $15 billion over 2017-2021 is focused on building an infrastructure that improves system reliability. We will update you throughout the year on our efforts to preserve the value of nuclear energy for NJ and to secure approval for regulatory mechanisms that provide customers clean, affordable, resilient energy supply. With the support of our dedicated 13,000 plus employees we expect to be able to successfully deliver on the promise of our investment program that should provide growth for our shareholders and a sustainable energy future for our customers."

Ralph Izzo, Chairman, President & CEO - April 28, 2017

PSEG – Q1 2017 Highlights

Achieved Solid Financial Results

- Net Income of $0.22 vs. Net Income of $0.93 per share in Q1 2016; Non-GAAP Operating Earnings* of $0.92 vs. $0.91 per share in Q1 2016;
- Net Income reflects decision to retire Hudson-Mercer in June 2017 and REMA lease reserve
- PSE&G achieved 13% growth in Q1 Net Income over Q1 2016, supported by increased investment in transmission and distribution
- PSEG Power results aided by continued cost containment

Operational Excellence

- Nuclear fleet performance achieved 100% capacity factor for Q1

PSEG Disciplined Capital Investment – Producing Results

- PSEG expected to invest ~$4.7 billion in 2017, consisting primarily of $3.4 billion at PSE&G and $1.2 billion at PSEG Power
- Regulatory/Legislative Focus: NJ Needs Nuclear advocacy efforts; Energy Efficiency extension and expansion filing in March
- Major capital initiatives on track: Bridgeport Harbor 5 received all needed permits to begin construction phase

Re-affirming 2017 Full-Year Guidance

Growth in utility infrastructure investments continue to drive a higher regulated earnings contribution in 2017

Non-GAAP Operating Earnings* and 2017 Guidance

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Non-GAAP Operating Earnings is a financial measures that differ from Net Income in that it excludes the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. The table below includes a list of items excluded from Net Income to reconcile to non-GAAP Operating Earnings. Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of non-GAAP Operating Earnings is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings guidance, PSEG is unable to reconcile this non-GAAP financial measure to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of April 28, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com , under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss .

PSEG Earnings Conference Call

1st Quarter 2018

April 30, 2018

SI-SSA-0015-10375

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending and any future rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10376

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss.

PSEG
2018 Q1 Review

Ralph Izzo

Chairman, President and Chief Executive Officer

SI-SSA-0015-10378

PSEG Q1 2018

- **First Quarter Highlights**
  - ✓ Net Income of $1.10 vs. Net Income of $0.22 per share in Q1 2017
  - ✓ Non-GAAP Operating Earnings* of $0.97, up 5.4% over $0.92 per share in Q1 2017
  - ✓ Operational & Regulatory focus achieving objectives for growth as risk is managed
  - ✓ PSE&G Earnings Per Share up 6.8% aided by growth in investment
  - ✓ PSEG Power non-GAAP results up 10% aided by tax reform

- **Operational Excellence**
  - ✓ Nuclear fleet performance remains strong as Hope Creek experiences record 517 day run
  - ✓ PSE&G responded to four major storms within 30 days in Q1 2018
  - ✓ Power's fleet diversity/availability responsive to January cold snap

- **Disciplined Investment – Producing Results**
  - ✓ PSEG expected to invest ~$3.4 billion in 2018, consisting primarily of $2.7 billion at PSE&G and $0.6 billion at PSEG Power
  - ✓ Regulatory/Legislative Focus: Legislative support for Nuclear and Clean Energy initiatives awaiting Governor's signature; GSMP II Settlement, subject to BPU approval, consistent with rate base growth objectives
  - ✓ Major capital Initiatives: Keys Energy Center & Sewaren 7 in-service by mid-2018; Bridgeport Harbor 5 in-service mid-2019

* See Slides A, B and C for Items excluded from Net Income/(Loss) to reconcile to Operating Earnings (non-GAAP).

SI-SSA-0015-10380

Key Provisions of the Zero Emissions Certificate Bill*

Zero Emission Certificate

Upon enactment, directs NJ Board of Public Utilities (BPU) to pursue contracts with generators of nuclear energy for Zero Emission Certificates (ZEC) equal to no more than 40% of NJ's retail electric deliveries. BPU will assess a nuclear plant's financial need in addition to its impact on the state's air quality, fuel diversity, and environmental attributes.

ZEC Revenue = $0.004/KWh X Retail Electric Deliveries ÷ Greater of 40% of Retail Electric Deliveries, or KWhs from selected nuclear plants = ZEC Payment**

Process

BPU, upon enactment, has 180 days to complete a proceeding for commencement of a program and 330 days to establish criteria and determine eligibility and selection of nuclear power plants for ZEC payment.

Term

Selected nuclear power plants shall initially receive ZECs for a period that shall run from date of selection through the end of the first energy year plus an additional three years; 13 months prior to the conclusion of the 3-year period, the nuclear power plant must demonstrate its eligibility to receive ZECs for additional three-year periods.

*Awaiting Governor's signature

**There is no assurance that any PSEG Power facility will satisfy the eligibility requirements for ZEC payments or, if satisfied, whether such ZEC payments will provide a sufficient safety net for continued operations.

Clean Energy Bill – New Direction for NJ Energy Policy*

Energy Efficiency (EE)	• Electric utilities must reduce energy consumption by 2% and Gas utilities must reduce energy consumption by 0.75% from average annual usage over prior 3-year period within 5 years • Annual filing required for utilities to recover "reasonable and prudent costs" including return of and on capital and revenue impact of sales losses • Utilities subject to incentive/penalty mechanism associated with meeting EE savings targets
Renewable Portfolio Standard (RPS)	• Class 1 obligation increases to 21% by January 2020; 35% by January 2025 and 50% by January 2030 • Caps impact of RPS on customer bill at 9% over 2019 – 2021 and 7% over subsequent years • Cap on customer bill excludes the cost of offshore wind and storage
Solar	• Annual solar requirement increases to 4.8% in 2025 from current requirement of 3.3% in 2019 and 3.8% in 2025 before declining to 4.5% in 2026 and 1.1% in 2033 • BPU must complete a study on how to modify or replace the SREC program by 24 months after enactment • Net metering cap increased to 5.8% from 2.9%
Community Solar	• BPU must develop rules and regulations establishing a "Community Solar Energy Pilot Program"
Offshore Wind (OSW)	• Offshore Wind obligation increases to 3,500 MW from 1,100 MW • Allows OSW projects to receive tax credits from the Energy Development Agency (EDA) • Dept. of Labor directed to develop job training programs to support OSW development
Energy Storage	• BPU to provide Governor and Legislature with analysis of "energy storage needs and opportunities" • BPU to initiate process within six months of delivering report that establishes a process and mechanism for achieving 600 MW of energy storage by 2021 and 2,000 MW by 2030

*Awaiting Governor's signature

PSE&G EPS Reconciliation – Q1 2018 versus Q1 2017

Investment drives growth in Q1 earnings

*Reflects the impact of new accounting guidance effective January 1, 2018 which no longer allows capitalization of non-service components of pension and OPEB costs and requires the reclassification of these costs below Operating Income.

SI-SSA-0015-10389

PSE&G – Monthly Heating Degree Days

1Q 2018 winter weather, as defined by heating degree days, was ~1.5% warmer than normal and 8% colder than 1Q 2017; a colder than normal March offset a normal January and one of the warmest Februarys on record.

SI-SSA-0015-10390

GSMP II settlement extends and expands accelerated gas mains replacement program

Gas System Modernization Program

2016

Investment term: 3 years

- $905M Total investment
- Replaces ~150 miles per year
- Recovery: Annual recovery
  $215M/year via clause;
  $85M/year via base rate case;
  ROE: 9.75%

Gas System Modernization Program II

2018

Investment term: 5 years

- Settlement increases annual investment
- $1.9 billion Total investment starts 2019
- Replaces ~175 miles per year
- Recovery: Semiannual recovery
  $315M/year via clause;
  $300M of additional spend recoverable in next rate case;
  ROE to be set in pending rate review
- PSE&G agrees to file a base rate case within 5 years of starting GSMP II
- Awaiting BPU approval

PSE&G 2018 Distribution Rate Case Filing

- **Dockets** ER 18010029 (Electric) and GR 18010030 (Gas)
- **Filed** January 12, 2018; **Anticipate new rates** Fourth Quarter 2018
- **Test year** – July 1, 2017 through June 30, 2018 (with certain pro forma adjustments)
- **Rate base request** of $9.6B ($5.6B E; $4B G) as of December 31, 2018
- **ROE** request of 10.3%; **Capitalization structure** with 54% equity
- **Requested Increase:** >1% due to April, 2018 decrease in revenue due to tax reform
- **O&M and Sales** are roughly flat to last rate case eight years ago
- **Capital recovery** beyond clauses and $125M increase in Depreciation rate
- **Decoupling** of revenues from sales volumes
- **Taxes** –Flow back of deferred taxes to offset storm costs and reduce bill impact
- **Updates since filing:**
  - **Taxes** –lowered rates on April 1 to accelerate return of tax rate savings to customers; Updated filing for other tax impacts such as loss of bonus depreciation
  - **9x3 update** to be filed in May

Overall bill for the typical PSE&G residential customer, even after consideration of the requested change, would remain~20% lower than bills after last base rate case

SI-SSA-0015-10392

PSE&G – Q1 Operating Highlights

Operations

- ✓ Residential and commercial electric sales rose by 0.4% on weather-normalized basis; total sales declined 1.1% due to absence of one-time event that increased industrial sales in year-ago period
- ✓ Total firm gas sales rose by 1.6% on a weather-normalized basis
- ✓ PSE&G responded to four major storms during 1Q within 30 days

Regulatory and Market Environment

- ✓ GSMP II settlement will provide for 5-year investment of $1.9 billion
- ✓ FERC formula rate revenue increase of $64 million, net of $148 million due to lower tax rate, implemented January 1
- ✓ PSE&G lowered distribution rates by $114 million effective April 1, 2018 to pass through tax reform benefits
- ✓ Q1 weather 1% warmer than normal but 8% colder than Q1 2017
- ✓ Commissioner Fiordaliso (D) named President of NJ Board of Public Utilities (BPU); Robert Gordon (D) appointed to BPU; Commissioner Holden (R) reappointed to BPU

Financial

- ✓ PSE&G plan to invest $2.7 billion in 2018 part of 5-year, $11.5 billion - $13.2 billion capital program providing 7% - 9% annual growth in rate base
- ✓ PSE&G's Q1 2018 earnings increased by $0.04 per share, or 6.8%
- ✓ PSE&G's 2018 Net Income guidance range remains unchanged at $1,000 million - $1,030 million

	Price $/MWh	$38	$37	$36

* Hedge percentages and prices as of March 31, 2018 and reflect revenues of full requirement load deals based on contract price, including renewable energy credits, ancillary, and transmission components but excluding capacity. Hedges include positions with MTM accounting treatment and options.

SI-SSA-0015-10399

PSEG Power – Q1 Operating Highlights

Operations

- ✓ Q1 output affected by mild February and CCGT maintenance outages in March
- ✓ 2018 expected generation output unchanged at 55 – 57 TWh
- ✓ Nuclear fleet achieved average capacity factor of 99.5% as Hope Creek operated for record 517 days prior to Spring 2018 refueling outage; CCGT fleet had a capacity factor of 37% producing 2.7 TWh of energy; Coal fleet produced 1.5 TWh of energy

Regulatory and Market Environment

- ✓ PJM seeking FERC approval for one of two alternative & mutually exclusive proposals to reform capacity market in response to state subsidies for base load capacity
- ✓ PJM Staff directed to complete analysis on implementation of fast-start pricing by 3Q 2018 to enable implementation for Winter 2018/2019
- ✓ Keys Energy Center and Sewaren 7 projected to be in-service by mid-2018; Bridgeport Harbor 5 target completion remains mid-2019
- ✓ PSEG Power resolved cost-based bidding issue with FERC from 2014 with no material financial impact

Financial

- ✓ Power's total debt as a percentage of capitalization at March 31 was 28%
- ✓ 1Q 2018 non-GAAP EPS increased by 10% benefiting from tax reform
- ✓ Power's 2018 non-GAAP Operating Earnings guidance range remains unchanged at $485 million - $560 million; non-GAAP Adjusted EBITDA guidance for 2018 remains unchanged at $1,075 million - $1,180 million

SI-SSA-0015-10400

PSEG

PSEG Financial Highlights

- Affirming 2018 non-GAAP Operating Earnings guidance of $3.00 - $3.20 per share
- NJ Legislative initiatives, awaiting Governor's approval, support nuclear capacity and advance clean energy agenda
- PSEG's 5-Year capital spending forecast of $13 billion - $15 billion over the 2018 – 2022 period mainly directed at PSE&G capital program
- PSE&G capital spend forecast of $11.5 billion - $13.2 billion supports annual growth in rate base of 7% - 9% over 2018 – 2022
- GSMP II agreement providing for 5-year, $1.9B investment program, awaiting BPU approval
- PSEG Power's capital program, including completion of new generation, will improve fleet efficiency
- Financial position remains strong:
  - ✓ Increased 2018 indicative common dividend by 4.7% to $1.80 per share
  - ✓ PSEG is a net beneficiary from the Tax Act
  - ✓ No need to issue equity to finance capital program; credit metrics support additional balance sheet capacity
  - ✓ Debt as a percentage of capitalization was 49% at March 31

Quarterly UPDATE

Q1 2014

NYSE: PEG

Q1 2014 Performance Update

"I'm extremely pleased with PSEG's results: The first quarter was very strong financially and operationally. Operating earnings for the first quarter were $1.01 per share, compared to operating earnings for the first quarter of 2013 of $0.85 per share. The weather in the quarter represented a significant challenge. Through it, we demonstrated the strength of our assets and the talent of PSEG's employees. Volatile market conditions highlighted the diversity of PSEG Power's fuel mix, and dispatch flexibility supported the needs of customers and allowed Power to capture margin during extreme weather conditions as PSE&G's investment program is yielding improved growth. We are maintaining our operating earnings guidance for 2014 of $2.55 - $2.75 per share given the importance of normal weather to third quarter earnings expectations for PSE&G and Power.

PSE&G is expected to invest $2.2 billion in electric and gas infrastructure in 2014 and remains on course to achieve double-digit growth in operating earnings through 2016 with a 5-year, $10 billion capital spending program. These infrastructure investments will continue to drive improvement in customer reliability as it also transforms the profile of our company.

PSEG Power is enhancing its market position through economic investments in capacity uprates as the flexibility of our merchant generation business continues to provide earnings and cash flow to finance our investment program. Power has increased its forecast of generation output for the full year to 56 – 58 TWh from 53 – 55 TWh. The revised forecast reflects the increase in output during the first quarter and an improvement in the economic dispatch of the fleet.

Our strong earnings demonstrated the ability of our business model to perform for our customers and shareholders. We continue to reap benefits from our robust business mix: A strong financial position will allow us to meet our goals without the need to dilute shareholders through the issuance of equity, and our employees provide me with the confidence in our ability to achieve our long-term goals."

Ralph Izzo, Chairman, President & CEO - May 1, 2014

PSEG – Q1 Highlights

Strong Earnings

- Operating earnings of $1.01 per share, up 19% from $0.85 in Q1 2013
- Power benefited from higher market pricing, market volatility and increased output
- Increased contribution to earnings from PSE&G's investment in transmission

Operational Excellence

- PSEG Power output up 3% in quarter; nuclear capacity factor at 100%
- Diversity and location of Power's fleet provided flexibility to participate in market
- PSEG O&M on track to meet full-year expectations

PSEG Disciplined Capital Investment

- BPU decision pending on Energy Strong infrastructure proposal
- PSE&G brought 230 kV Burlington-Camden line in-service ahead of schedule; energized a portion of the Susquehanna-Roseland 500 kV transmission line; and 230 kV North Central Reliability line expected in-service this summer
- PSEG Power adding 63 MWs at Linden CCGT station with completion of AGP uprate

Financial Strength

- Increased common dividend to indicative annual rate of $1.48 per share

PSEG - Maintaining 2014 EPS Guidance

2014 Operating Earnings guidance reflects increased level of investment, pension savings and assumes normal weather and unit operations for rest of year

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The table below includes a list of items excluded from Net Income to reconcile to Operating Earnings.

Quarterly UPDATE

Q1 2015

NYSE: PEG

Q1 2015 Performance Update

"PSEG performed extremely well in the first quarter. We reported operating earnings for the first quarter of 2015 of $1.04 per share; a 3% increase over the first quarter of 2014's operating earnings of $1.01 per share. Based on the strong start to the current year – both operationally and financially – 2015 would represent the third year of growth in PSEG's operating earnings. Given that it is still early in 2015, we are maintaining our forecast of operating earnings for the full year of $2.75 - $2.95 per share.

PSE&G's capital program is on schedule and on budget. The Susquehanna-Roseland (S-R) 500-Kv transmission line is expected to be fully operational later this month...a major achievement. S-R's 2015 operational date will be 12 years after the August 2003 blackout and almost a decade after PJM identified the critical system needs. The NJ Board of Public Utilities (BPU) recently approved an expansion of PSE&G's successful energy efficiency programs, authorizing an additional investment of $95 million over the next three years. The first quarter results for Power demonstrate the strength of its asset mix. PSEG Power's earnings continue to benefit from strong operations and the capable management of its gas supply. On a separate matter, I'm pleased with the outcome of the settlement we reached with our insurers over claims related to Superstorm Sandy losses: In the end we have been fully compensated for the insurable spending we made on Sandy-related repairs.

Our business model is working the way it should. Operational excellence produces the financial strength that allows us to invest in a disciplined way for growth. This financial capability supports our current plans to invest $13 billion through 2019. The successful implementation of our investment plans will provide PSEG with a strong foundation to deliver customer satisfaction and shareholder value."

Ralph Izzo, Chairman, President & CEO - May 1, 2015

PSEG – Q1 Highlights

Strong Operating Performance – Delivering Results

- Operating Earnings of $1.04 per share, up 3% from $1.01 per share in Q1 '14
- Power benefited from higher prices on its hedged output, monetization of its gas supply and improved performance from CCGTs
- Increased earnings contribution from PSE&G's investment in transmission

Continued Operational Excellence

- PSEG Power CCGT units improved fleet availability; nuclear capacity factor at 95%
- PSE&G maintained high system reliability during record setting cold temperatures

PSEG Disciplined Capital Investment

- Major Transmission projects under construction – on schedule and on budget S-R transmission line expected to be fully energized in May
- BPU approved Energy Efficiency Ext II for $95 million additional investment
- Settlement reached on Superstorm Sandy related insurance claims fully compensates PSEG for repairs covered by our policies

Financial Strength

- Common dividend increased by 5.4% to indicative annual rate of $1.56 per share

PSEG -- Maintaining 2015 Guidance

Quarterly UPDATE

Q1 2016

NYSE: PEG

Q1 2016 Performance Update

"PSEG delivered solid operations this quarter executing on our five-year, $16 billion capital program. We reported Net Income for the first quarter of 2016 of $471 million, or $0.93 per share as compared to Net Income of $586 million, or $1.15 per share, in the first quarter of 2015. Operating Earnings* for the first quarter of 2016 were $463 million, or $0.91 per share, compared to Operating Earnings for the first quarter of 2015 of $529 million, or $1.04 per share. We experienced extremes in weather conditions in this Q1 compared to Q1 2015 which hurt demand and margins. We are maintaining Operating Earnings guidance for the full year of $2.80 to $3.00 per share.

PSE&G is expected to invest $3 billion in 2016 as part of its 5-year $12 billion capital investment program. Transmission is the largest part of this effort, representing 60% of planned capital spend. PSE&G's investment program – and a continued focus on controlling costs – will help drive our forecast for double-digit growth in PSE&G's 2016 Operating Earnings. PSEG Power's Q1 results were impacted by extremely mild weather conditions compared to the year-ago period. Significantly lower weather-related demand hurt sales comparisons and wholesale market prices for energy. Power remains focused on operating efficiently and safely in an environment of low gas prices, and its $2 billion investment in three new combined cycle gas turbines (CCGTs) in Maryland, New Jersey and Connecticut will add 1,800 MWs of clean, reliable and efficient capacity to its fleet.

As we move forward, the weather and market conditions, especially during Q3, will be important for both PSEG Power and PSE&G. Current market conditions and the absence of a winter require that we maintain our relentless focus on identifying efficiencies and maintaining strong operating performance. However, continued growth in investment and strong operations help us withstand these short-term challenges as we focus on growing a reliable, efficient, clean energy infrastructure platform capable of meeting customer requirements.

Ralph Izzo, Chairman, President & CEO - April 29, 2016

PSEG – Q1 Highlights

Strong Operating Earnings – Maintaining Guidance or 2016

- Operating Earnings* of $0.91 per share vs. $1.04 per share in Q1 '15
- Power results impacted by extremes in weather comparisons and low prices
- PSE&G's expanded investment in transmission and distribution drives improvement in earnings

Operational Excellence

- PSEG Power operations performed well in Q1: Nuclear output up 7.5% on improvement in fleet capacity factor to 99.7%
- CCGT units improved fleet availability

PSEG Disciplined Capital Investment

- Executing on our $16 billion capital program with ~75% directed toward PSE&G infrastructure investments in reliability/resiliency/replacement programs
- Construction commenced on Keys and Sewaren CCGTs for targeted commercial operation in 2018
- Power pursuing permits on new 485 MW CCGT plant at Bridgeport Harbor

Financial Strength

- Increased common dividend 5.1% to indicative annual rate of $1.64 per share

PSEG – Maintaining 2016 Guidance

2016 Operating Earnings guidance assumes normal weather and plant operations

2Q 2013 Performance Update

"We reported operating earnings for the second quarter of $0.48 per share compared with operating earnings of $0.43 per share in 2012's second quarter. For the first half of 2013, operating earnings were $1.33 per share compared with operating earnings of $1.28 per share earned in 2012's first half. Based on our performance thus far in the year, and assuming normal weather and operations in the remainder of the year, we expect operating earnings for the full year to be at the upper end of our guidance of $2.25 - $2.50 per share.

Our results continue to benefit from employees' execution of our strategic goals as well as the locational value enjoyed by our merchant generating fleet. We remain on track to meet our capital investment and operations-related goals. We also remain focused on building support for PSE&G's $3.9 billion "Energy Strong" proposal, meeting our commitment to operate the Long Island Power Authority's transmission and distribution system at the start of 2014, and controlling our cost structure. These actions will strengthen our infrastructure and improve on system reliability. In the true spirit of how PSEG has operated for a century, this will enable us to serve our customers better while providing the opportunity for double-digit growth in PSE&G's earnings through 2015."

Ralph Izzo, Chairman, President & CEO - July 30, 2013

PSEG – 2Q 2013 HIGHLIGHTS

Strong Earnings

- Operating earnings of $0.48 vs. $0.43 per share in Q2 2012
- Power benefitted from higher PJM capacity prices and higher energy prices
- Increased contribution to earnings from PSE&G's investment in transmission

Operational Excellence

- PSEG Power output was flat in Q2 despite extended refueling at Salem 1
- Diversity and location of Power's fleet provided flexibility to participate in market
- PSE&G's O&M on track to meet full-year expectations

PSEG Disciplined Capital Investment

- BPU approved Agreement to extend Solar 4 All and Solar Loan III investment
- 54 NJ municipalities and five counties have approved resolutions in support of PSE&G's Energy Strong proposal to fortify its distribution systems
- Transmission construction program continues on schedule

Market Developments

- 2016/2017 RPM again recognized the locational advantage of Power's assets
- US District Court decision on LCAPP litigation awaited in both NJ and MD
- New LIPA agreement under consideration would broaden and extend original contract

PSEG – Maintaining 2013 EPS Guidance

Based on our performance year-to-date, we expect full-year operating earnings to be at the upper end of guidance, assuming normal weather and unit operations

Quarterly UPDATE

Q2 2014

NYSE: PEG

Q2 2014 Performance Update

"Our results in the second quarter reflect the benefit of our diversified business model, the growth in our regulated utility company capital program and our long-term focus on operating in a safe, reliable manner. The primary driver of growth – increased investment in transmission in our utility, PSE&G – remained strong in the second quarter offsetting the impact from mixed operating conditions. Operating earnings for the second quarter of 2014 were $245 million or $0.49 per share compared to the second quarter of 2013 operating earnings of $243 million or $0.48 per share. The results for the quarter bring operating earnings for the first half of 2014 to $1.50 per share compared with operating earnings of $1.33 per share earned in 2013's first half.

We are delivering on the growth potential of our multi-billion dollar capital program while at the same time our favorable natural gas supply position continues to yield benefits for customers and shareholders. PSE&G remains on course to provide greater than 50% of our forecast operating earnings for the year as Power is well positioned to generate solid earnings and free cash flow. Based on our performance thus far in the year, and assuming normal weather and operations over the remainder of the year, we expect operating earnings for 2014 to be at the upper end of our guidance of $2.55 - $2.75 per share."

Ralph Izzo, Chairman, President & CEO - July 30, 2014

PSEG – Q2 Highlights

Earnings on Track

- Operating earnings of $0.49 per share vs. $0.48 in Q2 2013
- Increased contribution to earnings from PSE&G's investment in Transmission
- Expect 2014 Operating Earnings to be at upper end of $2.55 - $2.75 guidance range

Operating Review

- PSEG Power output down 5% vs. Q2 2013 from Linden & Salem 2 outages, partially offset by improvement in coal generation
- PSE&G placed the 230 kV North Central Reliability transmission project in service

PSEG Disciplined Capital Investment

- BPU approved $1.22 billion investment in PSE&G Energy Strong program
- PJM deferred a final decision on its recommended solution, to be built by PSE&G for the Artificial Island project via FERC 1000 competitive bidding process
- PSEG Power added 63 MW at Linden CCGT station with AGP uprate

Financial Strength

- Standard & Poor's revised the credit rating outlooks of PSEG, PSE&G and PSEG Power from Stable to Positive in May

PSEG - Maintaining 2014 EPS Guidance

Based on our performance year-to-date, we expect full-year operating earnings to be at the upper end of guidance, assuming normal weather and unit operations

Quarterly UPDATE

Q2 2017

Q2 2017 - Quarterly Performance Update

NYSE: PEG

"PSEG reported today Q2 2017 Net Income of $0.22 per share as compared to Net Income of $0.37 per share in Q2 2016. Non-GAAP Operating Earnings for Q2 2017 were $0.62 per share compared with non-GAAP Operating Earnings of $0.57 per share in Q2 2016. PSEG's Net Income during the first half of 2017 reflects the June 1 retirement of the Hudson and Mercer coal/gas generating stations. The non-GAAP Operating Earnings increase in the second quarter 2017 of 9% reflects strong performance at both PSE&G and PSEG Power. PSE&G's earnings contribution is expected to grow to represent 66% of our full- year 2017 non-GAAP Operating Earnings guidance of $2.80 - $3.00 per share.

Growth in PSE&G's earnings reflects the benefits of its expanded investment program. Our commitment to improving NJ's aging infrastructure continues, evidenced by our filing earlier this week of a 5-year $2.7 billion extension of our Gas System Modernization Program. PSE&G has also reached an agreement in principle in its Energy Efficiency (EE) filing with NJ regulatory staff and other parties to provide for a $69 million extension of PSE&G's investment in EE, bringing the total to ~$400 million. The Smart Electric Power Alliance (SEPA) also recently named PSE&G the 2017 Investor Owned Utility of the Year, in recognition of its leadership in building solar farms on landfills and brownfield sites in the State.

PSEG Power's quarterly results improved as on-going programs to reduce operating expenses supported earnings, and construction at its three CCGT generating stations is on schedule and on budget. Going forward, we expect that the growth prospects of PSE&G, the re-configuration of our merchant generating fleet and successful execution of our policy initiatives will allow PSEG to extend its track record of delivering value for our customers and growth for our shareholders – while we maintain a strong balance sheet and credit metrics."

Ralph Izzo, Chairman, President & CEO - July 28, 2017

PSEG – Q2 2017 Highlights

Achieved Solid Financial Results

- Net Income of $0.22 vs. Net Income of $0.37 per share in Q2 2016, reflecting Hudson and Mercer coal/gas generating station retirements on June 1
- Non-GAAP Operating Earnings* of $0.62 vs. $0.57 per share in Q2 2016
- PSE&G achieved 17% growth in Q2 earnings per share over Q2 2016 – supported by increased investment in transmission and distribution, and cost containment
- PSEG Power results aided by continued cost control

Operational Excellence

- Nuclear fleet performance achieved 89.6% capacity factor for Q2
- PSE&G named Smart Electric Power Alliance's (SEPA) 2017 Investor Owned Utility of the Year, recognizing PSE&G's leadership in landfill and brownfield solar

PSEG Disciplined Capital Investment – Producing Results

- PSEG to invest ~$4.7 billion in 2017, consisting of ~$3.4 billion at PSE&G and ~$1.2 billion at PSEG Power
- Regulatory & Policy Focus: New Jersey Board of Public Utilities (BPU) actions support infrastructure investment; Energy Efficiency agreement in principal reached; $2.7 billion Gas System Modernization Program (GSMP) extension and expansion filing

Re-affirming 2017 Full-Year Guidance

Growth in utility infrastructure investments drives higher regulated earnings contribution in 2017

Non-GAAP Operating Earnings* and 2017 Guidance

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Non-GAAP Operating Earnings is a financial measure that differs from Net Income in that it excludes the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. The table below includes a list of items excluded from Net Income to reconcile to non-GAAP Operating Earnings. Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of non-GAAP Operating Earnings is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings guidance, PSEG is unable to reconcile this non-GAAP financial measure to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of July 28, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss.

2nd Quarter 2018

August 1, 2018

SI-SSA-0015-10420

Forward-Looking Statements

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third-party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations, and PSE&G's ability to recover costs and earn returns on authorized investments;
- the impact of pending and any future rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10421

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

These materials and other financial releases can be found on the PSEG website at https://investor.pseg.com. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at https://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at https://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at https://investor.pseg.com/rss.

PSEG
2018 Q2 Review

Ralph Izzo
Chairman, President and Chief Executive Officer

SI-SSA-0015-10423

PSEG Q2 2018 Highlights

- **Second Quarter Results**
  - ✓ Net Income of $0.53 vs. Net Income of $0.22 per share in Q2 2017
  - ✓ Non-GAAP Operating Earnings* of $0.64, up 3% over $0.62 per share in Q2 2017
  - ✓ PSE&G Earnings Per Share up 12% driven by growth in T & D investment
  - ✓ PSEG Power results continue to benefit from tax reform and cost control
- **Operational Excellence**
  - ✓ PSEG Power placed into service Keys Energy Center and Sewaren 7, adding 1,300 MW of clean gas-fired CCGT capacity; Sewaren 1-4 retired 445 MW
  - ✓ PSE&G completed the final phase of the 345 kV Bergen-Linden Corridor upgrade project
- **Disciplined Investment – Producing Results**
  - ✓ PSEG on track to invest ~$3.6 billion in 2018: $2.8 billion at PSE&G, $0.7 billion at Power
  - ✓ Regulatory/Legislative Focus: GSMP II approved by BPU; Energy Strong (ES2) infrastructure program extension filed; Governor Murphy signed Nuclear ZEC and Clean Energy legislation into law
  - ✓ Major Capital Initiatives: PSEG Power completed construction of Keys Energy Center and Sewaren 7; Bridgeport Harbor 5 expected to be completed in mid-2019; PSE&G completing GSMP I and Energy Strong in 2018, GSMP II to begin in 2019

PSE&G Monthly Weather Summary
2018 vs. 2017 vs. Normal

Monthly Heating Degree Days (HDD)

Monthly Temperature Humidity Index (THI)

Q2 2018 heating degree days were ~19% higher than Q2 2017 and ~12% higher than normal

Q2 2018 temperature-humidity index was ~5% lower than Q2 2017 and ~3% higher than normal

SI-SSA-0015-10435

Energy Strong Program Filing

PSE&G filed its Energy Strong II infrastructure program (ES2) which seeks to invest $2.5 billion, over a five-year period to further strengthen the utility's electric and gas systems to better withstand storms, increase reliability and significantly enhance resiliency

Electric:

- ✓ Provide flood mitigation for 16 stations within FEMA designated flood zones
- ✓ Rebuild 15 outdoor stations (most are pre-1956 vintage) in need of replacement
- ✓ Elevate and harden ~475 circuit miles
- ✓ Harden and increase redundancy/resiliency through circuit reconfiguration
- ✓ Modernize grid with an advanced distribution management system (ADMS) and fiber/mesh communication network

Gas:

- ✓ Improve the resiliency of PSE&G's gas distribution system to protect against potential interstate gas pipeline supply curtailments
- ✓ Rebuild and modernize seven gas Metering and Regulation stations

Dockets:

- ✓ EO 18060629 (Electric), GO 18060630 (Gas)

PSE&G 2018 Distribution Rate Case Update

- **Dockets** ER 18010029 (Electric) and GR 18010030 (Gas)
- **Filed** January 12, 2018; **Anticipate new rates** Fourth Quarter 2018
- **Test year** – July 1, 2017 through June 30, 2018 (with certain pro forma adjustments)
- **ROE** request of 10.3%; **Capitalization structure** with 54% equity
- **Requested Increase** of ~3% due to April, 2018 decrease in revenue due to tax reform
- **O&M and Sales** are roughly flat to last rate case eight years ago
- **Capital recovery** beyond clauses and $125 million increase in Depreciation rate
- **Decoupling** proposed via Green Enabling Mechanism (GEM) in support of expanded energy efficiency investments
- **Taxes** – Flow back of deferred taxes to offset storm costs and reduce bill impact
- **Updates since filing:**
  - ✓ **Taxes** – Lowered rates on April 1 to accelerate return of tax rate savings to customers; Updated filing for other tax impacts such as loss of bonus depreciation
  - ✓ **12+0 update** to be filed August 8th with all actual data

Overall bill for the typical PSE&G residential customer, even after consideration of the requested change, would remain ~20% lower than bills after last base rate case

PSE&G – Q2 Operating Highlights

Operations

- ✓ For the trailing 12-months ended June 30, weather-normalized electric sales were flat and weather-normalized firm gas sales were 3% higher, driven by increased commercial and industrial sales
- ✓ PSE&G's electric service continues to achieve high customer satisfaction scores

Regulatory and Market Environment

- ✓ Obtained final BPU approval of PSE&G's $1.9 billion GSMP II investment program to begin in 2019
- ✓ Filed the Energy Strong II infrastructure program which proposes $2.5 billion investment over 5 years
- ✓ Average residential electric customers benefit from 1.9% reduction in bills starting with the new BGS price on June 1, estimated savings of $24 per year
- ✓ Residential gas customers expected to benefit from continued low natural gas prices with another proposed reduction this fall
- ✓ PSE&G expects to file its Clean Energy Future (CEF) program later in 2018, a $2.9 billion, 6-year plan to invest in energy efficiency, electric vehicle infrastructure and battery storage

Financial

- ✓ PSE&G invested $1.6 billion during the first six months of 2018, on track to invest $2.8 billion for the year
- ✓ PSE&G's Q2 2018 earnings increased by $0.05 per share, or 12%
- ✓ In May, PSE&G issued $375 million of 10-year Medium-Term Notes (MTNs) at 3.70% and $325 million of 30-year MTNs at 4.05%, and retired $400 million of 5.30% MTNs
- ✓ PSE&G's 2018 Net Income guidance range remains unchanged at $1,000 million - $1,030 million

PSEG Power – Q2 Operating Highlights

Operations

- ✓ Q2 output down 5% from Hope Creek refueling and other planned fossil maintenance at Linden
- ✓ Nuclear achieved average capacity factor of 86% in Q2; CCGT fleet had a capacity factor of 46% producing 3.5 TWh of energy; Coal fleet achieved 81% capacity factor producing 1.4 TWh of energy
- ✓ Keys Energy Center and Sewaren 7 placed in service mid-year; Bridgeport Harbor 5 target completion remains mid-2019

Regulatory and Market Environment

- ✓ 2018 expected generation output reduced to 53 – 55 TWh on lower market demand
- ✓ FERC recent order found the existing PJM capacity market unjust and unreasonable because it allows resources supported by out-of-market payments to suppress capacity prices; FERC initiated a new proceeding to address modifications to PJM's capacity market
- ✓ Fast-start market price reform continues to progress with PJM targeted implementation in 2019

Financial

- ✓ Power's total debt as a percentage of capitalization at June 30 was 34%
- ✓ In June, Power issued $700 million of 3.85% Senior Notes due 2023
- ✓ In July, the State of NJ imposed a 4-year tax surcharge on corporate income of 2.5% in 2018 and 2019 and 1.5% in 2020 and 2021 – expected to have a modest negative impact on Power
- ✓ Power's 2018 guidance ranges for non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA remain unchanged at $485 million - $560 million and $1,075 million - $1,180 million, respectively

SI-SSA-0015-10445

PSEG

PSEG Financial Highlights

- Reaffirming 2018 non-GAAP Operating Earnings guidance of $3.00 - $3.20 per share
- PSEG's 5-Year capital spending forecast of $14 billion - $17 billion over the 2018 - 2022 period mainly directed at PSE&G capital program
- PSE&G capital spend forecast of $12 billion - $15.5 billion supports annual growth in rate base of 8% - 10% over 2018 - 2022
- Recent NJ Legislative initiatives support nuclear capacity and advance clean energy agenda
- GSMP II agreement provides for 5-year, $1.9 billion investment program; Energy Strong II filed, proposing a 5-year, $2.5 billion program
- Expect to file Clean Energy Future program (6-year, $2.9 billion) later in 2018
- PSEG Power's capital program, nearing completion with Bridgeport Harbor 5 targeted mid-2019 in-service date, will improve fleet efficiency
- Financial position remains strong:
  - ✓ PSEG is a net beneficiary from the Tax Cut and Jobs Act
  - ✓ No need to issue equity to finance capital program; credit metrics support additional balance sheet capacity
  - ✓ Debt as a percentage of capitalization was 50% at June 30
  - ✓ Opportunity for consistent and sustainable dividend growth with Q1 increase in full year indicative dividend to $1.80 per share

Quarterly UPDATE

Q2 2015

Q2 2015 Performance Update

NYSE: PEG

"PSEG reported strong results for the second quarter: Operating earnings were $289 million or $0.57 per share compared to $245 million or $0.49 per share in Q2 2014 – up 16%. The results for the quarter bring operating earnings for the first half of 2015 to $1.61 per share, a 7% increase over operating earnings of $1.50 per share earned in 2014's first half. Our businesses are performing well and meeting the challenges of today's low energy price environment. PSE&G's expanded investment program is successfully translating into improvements in customer satisfaction as operational improvements at PSEG Power supported increased output.

PSE&G's focus on improving resiliency of the grid and increasing efficiency has also translated into strong performance in a number of areas of customer satisfaction, including price, billing and payment, corporate citizenship and field service. PSE&G invested $1.3 billion in the first half of the year as part of its planned capital investment for 2015 of $2.6 billion in upgrades to the electric and gas distribution and transmission system. PSE&G was also recently awarded work at Artificial Island as part of PJM's recently approved upgrades. This program will increase PSE&G's investment in transmission by $100 - $130 million over 4 years through 2019. The NJ Board of Public Utilities (BPU) has begun proceedings related to PSE&G's proposed $1.6 billion Gas System Modernization program. PSEG Power's earnings demonstrate the strength of its asset mix. Recent investments have increased the capacity of existing nuclear and fossil units and improved the fleet's operating efficiency and its capability. Power also announced it has acquired the rights to develop the 755-MW Keys Energy Center in Maryland, representing an investment of $825 - $875 million and targeted for completion in 2018. The Keys plant will expand our footprint in our core PJM market and provide a strong operational and financial fit for the portfolio.

Based on the strength of our results for the first half of the year and outlook for the remainder of the year, we are updating our full-year 2015 guidance for operating earnings to $2.80 - $2.95 per share from $2.75 - $2.95 per share. We are focused on executing on our investment strategies and expanding our infrastructure in a disciplined manner – a manner that supports the goals of customers and shareholders."

Ralph Izzo, Chairman, President & CEO - July 31, 2015

PSEG – Q2 Highlights

Strong Operating Performance – Delivering Results

- Operating Earnings of $0.57 per share, up 16% from $0.49 per share in Q2 '14
- Updating full-year 2015 operating earnings guidance to $2.80 - $2.95 per share, from $2.75 - $2.95 per share
- Increased earnings contribution from PSE&G's investment in transmission

Continued Operational Excellence

- PSEG Power generating output up by 10% vs. Q2 2014
- PSE&G placed the 500kV Susquehanna Roseland transmission line in service

PSEG Disciplined Capital Investment

- PSE&G's $1.6 billion, 5-year Gas System Modernization Program filing pending
- Power acquired the Keys CCGT new build plant in Maryland; 755 MW unit targeted for 2018, estimated cost $825 to $875 million
- FERC assigned PSE&G a portion of the Artificial Island upgrade project; adds ~$100-$130 million of transmission spend over next four years

Market Developments

- FERC issued order supporting PJM Capacity Performance product

PSEG -- Updating 2015 Guidance

Full-year 2015 guidance update reflects the strength of results for both businesses for the first half of the year, and assumes normal weather and unit operations

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The table below includes a list of items excluded from Net Income to reconcile to Operating Earnings with a reference to this table where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

Quarterly UPDATE

Q2 2016

NYSE: PEG

Q2 2016 Performance Update

"PSEG's second quarter earnings benefited from its expanded investment program and an alignment of costs with current power market dynamics. We reported second quarter 2016 Net Income of $187 million or $0.37 per share as compared to Net Income of $345 million or $0.68 per share reported for the second quarter of 2015. Operating Earnings for both the second quarter of 2016 and 2015 were $289 million or $0.57 per share. We are maintaining our Operating Earnings guidance for 2016 of $2.80 - $3.00 per share. However, reaching the upper end of guidance will be difficult even with improvements seen in the power markets, expectations for warm summer weather, normal operations and management of O&M for the remainder of the year.

PSE&G invested ~$1.4 billion in the first half of 2016 as part of its planned capital investment for 2016 of $3 billion in upgrades to the electric and gas distribution and transmission system. In May 2016, PSE&G filed with the New Jersey Board of Public Utilities (BPU) to extend its existing landfill/brownfield Solar 4 All program, representing a capital investment of up to $240 million over a 5-year period. PSE&G has also increased its estimate of Distribution capital expenditures over 2016–2018 by $300 million to address new business requests and replace certain aging equipment and infrastructure. The expansion of capital spending under these programs could represent an increase of over $500 million in PSE&G's planned $12 billion capital spending program over the 5-year period ended 2020, and would improve on PSE&G's growth in rate base of 8% per year over the same period.

PSEG Power's second quarter results reflect the impact of the known decline in PJM capacity revenues and average prices on energy hedges in addition to the effect of an extended refueling outage at Salem 1. In May, Power cleared ~8,900 MW of capacity at an average price of $116 MW/day in the 2019/2020 RPM auction, which reflected PJM's downward revisions to the demand forecast and the effects of both new generation and uncleared generation from the prior year's auction. We remain focused on investments that meet customers' demand for reliable, efficient, and clean energy as well as drive long-term value creation.

Ralph Izzo, Chairman, President & CEO - July 29, 2016

PSEG – Q2 Highlights

Solid Results – Maintaining Guidance

- Net Income of $0.37 vs. $0.68 per share in Q2 2015
- Operating Earnings* of $0.57 per share vs. $0.57 per share in Q2 2015
- Increased earnings contribution from PSE&G's investment in Transmission

Operating Review

- PSEG Power generating output declined by 6% vs. Q2 2015 – reflecting mild weather, low gas prices and impact of extended outage at Salem nuclear facility

PSEG Disciplined Capital Investment

- PSE&G identifies more than $500 million of additional capital opportunities through 2020
- Solar 4 All Extension II filing made with NJBPU in May with decision expected in Q4
- Power's construction of Keys and Sewaren CCGTs on schedule and on budget

Market Developments

- RPM auction results for 2019/2020 reflected PJM's downward revisions to demand forecast and effects of both new and uncleared generation from prior year's auction

PSEG – Maintaining 2016 Guidance

Reaching the upper end of our guidance range in 2016 will be difficult even with improvements seen in the power markets, expectations for warm summer weather, normal operations and management of O&M

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and material one-time items. Adjusted EBITDA excludes the same items as our Operating Earnings measure as well as income tax expense, interest expense, depreciation and amortization and major maintenance expense costs at Power's fossil generation facilities. The table below includes a list of items excluded from Net Income to reconcile to Operating Earnings with a reference included where the non-GAAP information appears.

Management uses Operating Earnings and Adjusted EBITDA in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of Operating Earnings and Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, Operating Earnings and Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of Operating Earnings and Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

3Q 2013 Performance Update

"We reported operating earnings for the third quarter of $0.76 per share compared with operating earnings of $0.75 per share in 2012's third quarter. For the first nine months of 2013, operating earnings were $2.09 per share compared with operating earnings of $2.03 per share earned in 2012's comparable period. Based on our performance year to date, we have raised our guidance for full year 2013 Operating Earnings to $2.40 - $2.55 per share from $2.25 to $2.50 per share prior. Once again, we have delivered solid results that are consistent with our operating objectives. For the year, PSE&G is on track to provide double-digit growth in earnings on increased investment in transmission, as PSEG Power's results benefit from its strong locational advantages.

Our shareholders continue to realize the benefit to earnings from the expansion of our investment in transmission and distribution while our customers enjoy the improvements in reliability that come along with it. PSE&G's $3.4 billion transmission investment program includes 5 major transmission lines – all 5 are on time and on budget. PSEG is now also benefiting from our location which gives us access to low-cost gas in the Marcellus Basin through our gas pipeline and storage contracts. PSE&G's residential customers are the primary beneficiaries of this contractual position. PSE&G recently announced a two-month bill credit for its residential customers that will reduce the typical monthly gas bill by 33% in both November and December of this year.

We made a move several years ago to use the strength of our balance sheet to invest primarily in our more stable, regulated business in ways that meet customer needs as we also sought to protect the upside of our strong merchant business. Our focus is yielding returns, and we are well positioned to meet the needs of our customers and perform for our shareholders.

Ralph Izzo, Chairman, President & CEO - October 30, 2013

PSEG – 3Q HIGHLIGHTS

Operating Earnings of $0.76 vs. $0.75 per share in Q3 2012

- Delivered solid results for the quarter driven by Power's locational value and PSEG's continuing investment in Transmission
- Raised 2013 full-year Operating Earnings guidance to $2.40-$2.55 per share

Executing on Operational Goals

- PSEG Power met summer demand using diverse fleet
- Continued control of O&M supports full year expectations

PSEG Disciplined Capital Investment

- Transmission program of $3.4 billion, including contstruction of 5 major projects, continues on schedule and on budget
- Review of Energy Strong proposal underway by BPU; Over 80 NJ municipalities, including 7 county governments, have passed resolutions in support of the Energy Strong infrastructure proposal

Market Developments

- US District Courts in both NJ and MD rendered decisions supportive of competitive markets and FERC's ratemaking authority
- New LIPA agreement broadens and extends original contract

PSEG – Updating 2013 EPS Guidance

Based on performance year-to-date, we have raised guidance for full-year 2013 Operating Earnings to $2.40 to $2.55 per share, based on normal weather and unit operations

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. NYSE: PEG

Q3 2014 Performance Update

"PSEG had strong results in the third quarter. We continue to see the benefit to earnings from the expansion of our regulated utility capital programs. Our results also benefitted from the focus placed on controlling the growth in our operating expenses which offset the impact of less favorable weather conditions on demand. Operating earnings for the third quarter of 2014 were $0.77 per share compared with operating earnings of $0.76 per share earned in 2013's third quarter. The results for the third quarter bring PSEG's operating earnings for the nine months ended September 30, 2014 to $2.27 per share, a 9% increase over the $2.09 per share earned during the first nine months of last year.

Investment opportunities under active consideration amounting to approximately $1 billion will provide our customers with access to low-cost gas and cost-effective technologies that reduce emissions as they also improve system reliability. Based on the strength of our results for the quarter and year-to-date, we are raising the low end of our full year operating earnings guidance to $2.60 from $2.55 per share, and, as we indicated last quarter, we remain on track to achieve results at the upper end of our revised operating earnings guidance of $2.60 - $2.75 per share. Our investments are meeting our expectations, our costs are under control and we remain well positioned to deploy our balance sheet to meet shareholder objectives for long-term growth.

Ralph Izzo, Chairman, President & CEO - October 30, 2014

PSEG – Q3 Highlights

Earnings on Track

- Operating earnings of $0.77 per share vs. $0.76 in Q3 2013
- Increased contribution to earnings from PSE&G's investment in Transmission
- Narrowed 2014 full-year Operating Earnings guidance to $2.60 - $2.75 per share, from $2.55 to $2.75 per share

Operating Review

- PSEG Power output up 4% vs. Q3 2013 – with increased availability
- Control of O&M supports full-year expectations

Executing on our Capital Program

- Transmission program of $6.8 billion continues on schedule and on budget
- Energy Strong investment underway – gas mains replacement prioritized
- Power announced a new $100-$120 million investment in the PennEast Pipeline

Market Developments

- PJM proposed changes on Capacity Performance, Demand Curve adjustment and pending Demand Response (DR) issues supportive of price formatio
- PJM decision on FERC 1000 Artificial Island solution expected early 2015
- Updated PSEG-Long Island "Utility 2.0" filing submitted to NY regulators

PSEG - 2014 Another Year of Growth

2014 operating earnings guidance narrowed; forecast full-year operating earnings at the upper end of range, assuming normal weather and unit operations for rest of year

Quarterly UPDATE

Q3 2017

NYSE: PEG

Q3 2017 - Quarterly Performance Update

"PSEG reported today Q3 2017 Net Income of $0.78 per share as compared to Net Income of $0.64 per share in Q3 2016. Non-GAAP Operating Earnings for Q3 2017 were $0.82 per share compared with non-GAAP Operating Earnings of $0.88 per share in Q3 2016. We experienced solid results for the quarter, executing well on major operational and policy initiatives, delivering reliable, efficient service as we continue to upgrade our transmission system, replace cast-iron pipe and construct three new clean gas-fired combined cycle generating stations. Despite the impact of abnormally cool weather on sales and earnings at both businesses, we remain within our non-GAAP Operating Earnings guidance for the full year of $2.80 - $3.00 per share.

For the year, PSE&G currently expects to invest $3.1 billion of capital in its infrastructure; this is lower than the plan of $3.4 billion due to a delay in timing on certain projects and better than anticipated efficiencies. However, based on the development of our various investment programs, we are increasingly comfortable with PSE&G's ability to achieve growth in rate base at the upper end of our forecast rate of growth of 7 – 9% per year for the five-year period ended in 2021.

PSEG Power's Q3 results were impacted by a decline in energy prices and the effect of cooler than normal weather on demand and output, which offset a decline in operating and maintenance expense. We are supportive of the Department of Energy's (DOE) recent initiative to immediately address the erosion occurring in the resiliency of our electric grid due to the risk of premature retirements of baseload generation. Successful execution of PSEG's key policy and regulatory initiatives would assure PSEG's ability to provide customers with the service, reliability and resiliency that they have come to want–and expect–that is also affordable."

Ralph Izzo, Chairman, President & CEO - October 31, 2017

PSEG – Q3 2017 Highlights

Solid Financial Results

- Net Income of $0.78 vs. Net Income of $0.64 per share in Q3 2016
  Non-GAAP Operating Earnings* of $0.82 vs. $0.88 per share in Q3 2016
- PSE&G results benefited from increased investment in electric and gas transmission and distribution
- Power results aided by continued cost control and improved nuclear performance
- Unseasonably mild weather weighed on results of both business

Operational Excellence

- Nuclear fleet achieved a capacity factor of ~96% for Q3 and ~95% for the YTD

Disciplined Capital Investment

- PSE&G investing ~$3.1 billion to upgrade transmission, replace cast-iron pipe and improve the resilience of the electric distribution system in 2017 and PSEG Power investing ~$1.2 billion constructing three new highly efficient gas-fired CCGTs
- Regulatory Focus: Per Board of Public Utilities (BPU) agreement, PSE&G will delay the Distribution Base Rate Case filing to no later than 12/1/17; Decision by BPU on Infrastructure Investment Proposal expected by year-end
- Policy Focus: FERC seeking response to DOE proposed rule making to preserve the viability of fuel-secure, base load resources; Reply comments due 11/7/17

Re-affirming 2017 Full-Year Guidance

Growth in utility infrastructure investments drives higher regulated earnings contribution in 2017

Non-GAAP Operating Earnings* and 2017 Guidance

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Non-GAAP Operating Earnings is a financial measure that differs from Net Income in that it excludes the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. The table below includes a list of items excluded from Net Income to reconcile to non-GAAP Operating Earnings. Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of non-GAAP Operating Earnings is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings guidance, PSEG is unable to reconcile this non-GAAP financial measure to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of October 31, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss.

PSEG Earnings Conference Call

3rd Quarter 2018

October 30, 2018

SI-SSA-0015-10463

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third-party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations, and PSE&G's ability to recover costs and earn returns on authorized investments;
- the impact of pending and any future rate case proceedings;
- risks associated with our ownership and operation of nuclear facilities, including regulatory risks, such as compliance with the Atomic Energy Act and trade control, environmental and other regulations, as well as financial, environmental and health and safety risks;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10464

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

These materials and other financial releases can be found on the PSEG website at https://investor.pseg.com. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at https://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at https://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at https://investor.pseg.com/rss.

PSEG
2018 Q3 Review

SI-SSA-0015-10466

PSEG Q3 2018 Highlights

- **Third Quarter Results**
  - ✓ Net Income per share of $0.81 up 4% vs. $0.78 in Q3 2017
  - ✓ Non-GAAP Operating Earnings* per share of $0.95 up 16% vs. $0.82 in Q3 2017
  - ✓ PSE&G Earnings per share up 10% from growth in T & D investment and weather
  - ✓ PSEG Power non-GAAP Operating Earnings* per share improved driven by lower taxes
  - ✓ Updating 2018 non-GAAP Operating Earnings guidance to $3.05 - $3.15 per share
- **Operational Excellence**
  - ✓ Nuclear achieved an average capacity factor of 93% for Q3 and YTD; the CCGT fleet ran at a capacity factor of 68% in Q3
  - ✓ PSE&G maintained high system reliability throughout second hottest third quarter on record
- **Disciplined Investment – Producing Results**
  - ✓ PSEG on track to invest ~$3.6 billion in 2018: $2.8 billion at PSE&G, $0.7 billion at Power
  - ✓ Regulatory/Legislative Focus: PSE&G settled its Distribution Rate Case in October; Clean Energy Future (CEF) programs filed; Energy Strong II pending before the Board of Public Utilities (BPU); Zero Emission Certificate (ZEC) public hearings concluded
  - ✓ Major Capital Initiatives: PSEG Power CCGT construction program expected to conclude with Bridgeport Harbor 5 completion in mid-2019; GSMP II investments to begin in 2019

Clean Energy Future

Clean Energy Future, totaling ~$3.6 Billion over 6 years, seeks to provide cost-effective and innovative solutions supporting NJ's clean energy goals

- ✓ **Energy Efficiency**: Residential and C&I programs to lower energy bills and combat climate change
  - Savings support 2% electric and 0.75% gas savings consistent with NJ Clean Energy Legislation
  - Customer benefits exceed costs
- ✓ **Electric Vehicles**: "Smart" electric vehicle infrastructure: residential, workplace, multi-family, travel corridors
- ✓ **Energy Storage**: Utility-scale systems to defer traditional distribution investment, enable additional solar, and enhance critical infrastructure resiliency
- ✓ **Energy Cloud: Advanced Metering Infrastructure (AMI):** Accelerated roll-out of 2.2 million electric meters and supporting infrastructure. Compelling customer benefits.

Program Investment	$ Billion
Energy Efficiency	$2.5
Electric Vehicles	$0.3
Energy Storage	$0.1
Energy Cloud – AMI	$0.7
Investment Total	$3.6

- 6-year investment program starting in 2019
- Seeking contemporaneous recovery
- Contingent on approval of lost revenue recovery mechanism

SI-SSA-0015-10479

Distribution Rate Case Settlement Approved

- New rates become effective November 1, 2018
- Bill impact is generally <1% per rate class. Typical residential combined electric & gas customer bills are ~30% lower versus 2008 in nominal dollars

Key Terms

- ROE of 9.6%; 54% equity ratio
- Rate Base of $9.5B: $5.5B Electric and $4.0B Gas
- Base revenues include recovery of deferred storm costs (~$50M/year)
- Tax Adjustment Clause – Two tax items flowed back to customers, with a return on the portion related to rate base:
  - Excess deferred taxes – Unprotected over five years; Protected via ARAM
  - 'Safe Harbor Adjusted Repair Deduction' (SHARE) - Ongoing and 1/3 of historic balance
- Rate design changes:
  - Higher monthly fixed service charges for electric and gas bring us more in line with other NJ utilities
  - Decoupling/lost revenues to be addressed in CEF filings

Annual Revenue Impact ($ millions)	Electric	Gas	Total
Base Revenue	$89	$123	$212
Tax Adjustment Clause	(80)	(145)	(225)
Net Revenue Change	$9	$(22)	$(13)

Note: ROE= Return on Equity, ARAM = Average Rate Assumption Method

SI-SSA-0015-10480

PSE&G – Q3 Operating Highlights

Operations

- ✓ Q3 2018 electric sales up ~6% on weather that was 35% warmer than Q3 2017 and 25% warmer than normal
- ✓ Weather normalized electric sales were flat for the trailing 12 month period ending September 30

Regulatory and Market Environment

- ✓ Filed for 2019 FERC Formula Rate increase of approximately $100 million to be effective January 1, 2019, reflects increase in transmission investment; Additional filing to return excess deferred taxes
- ✓ Distribution Rate Case settlement approved by NJ BPU, a positive outcome that benefits PSE&G and provides customers with rate stability
  - Typical residential combined electric and gas customer bills are ~30% lower since 2008 in nominal dollars
  - Rates go into effect November 1st
- ✓ Filed Clean Energy Future programs, totaling $3.6 billion including $0.7 billion in Energy Cloud/AMI investment
- ✓ Energy Strong II filing, which proposes $2.5 billion investment over 5 years, is pending before the BPU

Financial

- ✓ PSE&G invested $2.3 billion during the first nine months of 2018, on track to invest $2.8 billion for the year
- ✓ PSE&G's Q3 2018 earnings increased by $0.05 per share, or 10%
- ✓ In September, PSE&G issued $325 million of 5-year Medium-Term Notes (MTNs) at 3.25% and $325 million of 10-year MTNs at 3.65%; and retired $350 million of 2.30% MTNs
- ✓ PSE&G's 2018 Net Income guidance range has been updated to $1,055 million - $1,070 million, from $1,000 million - $1,030 million as a result of stronger sales mostly due to warmer than normal summer weather

SI-SSA-0015-10485

PSEG Power – Gross Margin Performance

- ✓ Higher gas prices compressed Power's spark spread
- ✓ Higher generation due to commencement of Keys and Sewaren 7 commercial operation and increased market demand
- ✓ Capacity revenues up vs. Q3 2017 reflecting a step-up in PJM and ISO-NE capacity pricing to an average of $205 and $314 MW/day, respectively

PSEG Power Gross Margin ($/MWh)

Quarter ended September 30

Regional Performance		
Region	**Q3 Gross Margin ($M)**	**Q3 2018 Performance**
PJM	$495	Keys and Sewaren 7 commercial operations, higher capacity prices and higher market demand partially offset by re-contracting and lower spark spreads
New England	$24	Higher generation, market prices and capacity prices
New York	$22	Lower market demand partially offset by higher prices

SI-SSA-0015-10486

Hedging Update

Contracted Energy*

		Oct – Dec 2018	2019	2020

	% Hedged	55-60%	35-40%	0%
	Price $/MWh	$37	$36	$-
Total	Volume TWh	13-15	58-60	62-64
	% Hedged	80-85%	70-75%	40-45%
	Price $/MWh	$37	$36	$36

* Hedge percentages and prices as of September 28, 2018 and reflect revenues of full requirement load deals based on contract price, including renewable energy credits, ancillary, and transmission components but excluding capacity. Hedges include positions with MTM accounting treatment and options.

PSEG Power – Q3 Operating Highlights

Operations

- ✓ Q3 output up 24% as Sewaren 7 and Keys Energy Center commenced commercial operations
- ✓ Nuclear achieved an average capacity factor of 93% in Q3 and YTD; the CCGT fleet ran at a capacity factor of 68%, producing 7.0 TWh of energy; and the Coal fleet achieved a 79% capacity factor, producing 1.3 TWh of energy

Regulatory and Market Environment

- ✓ 2018 expected generation output modestly increased to 54 – 56 TWh on higher market demand
- ✓ Power submitted comments largely supporting PJM's capacity redesign proposals
- ✓ ZEC public hearings have been completed; Power anticipates submitting applications for its three NJ nuclear units in December
- ✓ Fast-start market price reform remains pending, with PJM targeted implementation anticipated in 2019

Financial

- ✓ Power's total debt as a percentage of capitalization at September 30 was 34%
- ✓ Power's 2018 guidance ranges for non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA have been updated to $465 million - $500 million and $1,045 million - $1,100 million from $485 million - $560 million and $1,075 million - $1,180 million, respectively, reflecting lower realized margins from Power's portfolio

SI-SSA-0015-10488

PSEG

PSEG Financial Highlights

- Updating 2018 (non-GAAP) Operating Earnings guidance to $3.05 - $3.15 per share, and adjusted subsidiary contribution ranges
- PSEG's 5-Year capital spending forecast of $14 billion - $17.5 billion over the 2018 - 2022 period, 90% directed at PSE&G capital program
- PSE&G capital spend forecast of $12 billion - $16 billion supports expected annual growth in rate base of 8% - 10% over 2018 - 2022
- Clean Energy Future filings made, totaling $3.6 billion over 6 years
- Energy Strong II, totaling $2.5 billion over 5 years, pending
- PSEG Power's capital program nearing completion with Bridgeport Harbor 5 targeted mid-2019 in-service
- Financial position remains strong:
  - ✓ PSEG is a net beneficiary from the Tax Cut and Jobs Act
  - ✓ No need to issue equity to finance capital program; credit metrics support additional balance sheet capacity
  - ✓ Debt as a percentage of capitalization was 51% at September 30
  - ✓ Opportunity for consistent and sustainable dividend growth

MANAGEMENT DISCUSSION SECTION

Operator

Good morning, My name is Brian, and I will be your conference operator today. At this time, I would like to welcome everyone to the Public Service Enterprise Third Quarter 2013 Earnings Conference Call. All lines have been placed on mute to prevent any background noise. After the speakers remarks there will be a question-and-answer session. [Operator Instructions] Thank you.

Ms. Lally, you may begin your conference.

Kathleen A. Lally

Thank you, Brian. Good morning everyone. Thank you for participating in our call this morning. We understand it's a very busy day for earnings. But as you are aware, we released our third quarter 2013 earnings statements earlier today. Both the release and attachments are posted on our website at www.pseg.com, under the Investor section. We also posted a series of slides that detail the operating results by company for the quarter and our 10-Q for the period ended September 30, 2013, is expected to be filed shortly.

I will go through the full disclaimer statements or the comments we have on the difference between operating earnings and GAAP results. But as you know, the earnings release and other matters that we will discuss in today's call contain forward-looking statements and estimates that are subject to various risks and uncertainties. Although we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so even if our estimate changes, unless we are required to do so. Our release also contains adjusted non-GAAP operating earnings. Please refer to today's 8-K for other filings for a discussion of the factors that may cause results to differ from management projections, forecast and expectations, and for a reconciliation of operating earnings to GAAP results.

I would now like to turn the call over to Ralph Izzo, Chairman, President, Chief Executive Officer of Public Service Enterprise Group. And joining Ralph on the call is Caroline Dorsa, Executive Vice President and CFO. At the conclusion of their remarks, there will be time for your questions. I'm not going to ask that you limit yourself to one question and one follow-up, but please take note of others who may be on the call ready to ask a question. Thank you. Ralph.

Bloomberg Transcript

Ralph Izzo

Thank you, Kathleen, and thank you, everyone, for joining us today. It's hard to believe that it was a year ago when we were reporting results for the third quarter of 2012 while we were responding to the damage to our system caused by Superstorm Sandy. Our utility PSE&G restored service to 2.1 million customers within 10 days, and PSEG powers asset, you will recall, were severely tested as well, but performed so as to ensure that electricity was available to every one of those 2.1 million customers as they were being restored. Both companies in the past year have embarked on programs to strengthen their systems.

But enough of the past. It's with a great sense of satisfaction, and in fact, it's somewhat remarkable when looking back at what we faced that time, that I can report to you stronger operating earnings for the third quarter 2013 and, in fact, the nine months of 2013. And on top of that, I can report to you this morning an increase in our operating earnings guidance for the full year from what had initially been $2.25 to $2.50 per share to our new guidance range of $2.40 to $2.55 per share.

So earlier this morning, we reported operating earnings for the third quarter of 2013 of $0.76 per share compared with operating earnings of $0.75 per share earned in 2012 third quarter. We've delivered solid results that are consistent with our operating objectives. And once again, it is due to the tireless efforts of a dedicated workforce that we are on track to meet our near and long term targets for capital investment and operational efficiency and that we can raise our guidance for full year operating earnings.

Our shareholders continue to realize the benefits earned from the expansion of our investment in transmission and distribution, while our customers enjoy the improvements in reliability that come along with it. PSEG's $3.4 billion transmission investment program includes five major transmission lines that require substantial sighting and logistical support, yet all projects are on time and on budget and schedule to be operational during 2014 through 2015.

Since PSEG began its transmission expansion program in 2009, its investment in transmission has grown to represent 28% of rate base at the end of 2012. This represents a net investment of $2.5 billion iand expected to grow to represent approximately 40% of PSEG's rate base at the end of 2015 or an investment of approximating $4.8 billion. As I've already mentioned, the investment in these major transmission projects will further enhance reliability for our customers.

Shifting our attention to PSEG Power for a moment, Power in an impressive comeback restoring operations at most of its peaking generation stations to pre-Sandy levels to assure their availability during the critical summer months. And Power continues to benefit from its favorable location. Now in the past, when we refer to Power's location value, it was typically a reference to the benefits associated with the assets in the east located close to load and of course this remains true.

But then, Power is also benefiting from our location which gives us access to low cost gas in the Marcellus Basin through our gas pipeline and storage contracts. PSE&G's residential customers are the primary beneficiaries of this contracted position. And for that reason, PSE&G announced last week that it will be providing a two-month bill credit for its residential gas customers that will reduce the typical monthly bill by 33% in both November and December this year.

However, to the extent that we have firm pipeline capacity in excess of the need for serving residential customers, this firm transportation capacity may be used and in fact is used to supply power generation fleet under BPU approved agreement. Power configure this firm gas transmission capability over the past 15 years with the object of building a network at the most liquid supply hubs to support the needs of its customers.

PSEG Power as a result is one of the largest shippers of gas in the Marcellus Basin. As new interstate pipelines become operational later this year, they will provide an additional outlet for some of the Marcellus supply. We believe, however, that Power should continue to experience periods of higher spark spreads given PSEG Power's gas transportation condition. Power's earnings are currently benefiting from favorable prices it receives on capacity located at PJM.

We were very pleased that the U.S. District Courts in Maryland and New Jersey ruled in manner that preserves competitive wholesale generation markets. We believe that a competitive market is the best approach for ensuring there is a sufficient supply of electric capacity to meet customer demand at the lowest cost. The court's decision is not expected to have an impact on markets over the near term. PJM has and will continue to address improvements in market design. It's important however, that the market rules are understood, and the playing field is leveled to support new investment when needed over the long term.

Now as I've stated already, our strong operating performances due to the dedication shown by our employees to meeting our corporate objectives. This dedication has been recognized with the recently approved enhancements to our contract to operate the Long Island Power Authority's transmission and distribution systems. The contract enhancement will allow Power's energy resources and trade group to manage LIPA's electric dispensing fuel procurement needs in 2015 and provide for an increase in our management fee in 2016. The agreement remains contingent on LIPA receiving a private letter ruling from the IRS on the continued tax exempt status of its debt.

We also remained focused on securing approval for PSE&G's Energy Strong proposal. At this moment, 74 municipalities and 7 county governments have submitted resolutions to the board of public utilities in support of our proposal. Public hearings have been held and we expect the proposal to receive careful consideration given the opportunity to improve the resiliency of the distribution system with little net income on the customer's bill due to the coincidental expiration of areas of the charges.

And for the year, PSE&G's on track to provide double digit growth in earnings, on increased investment in transmission as PSEG Power's results benefit from the strong location advantages I've already described. We made a move several years ago to use the strength of our balance sheet to invest primarily in more stable regulated business in ways that meet customer needs as we also sought to protect the upside of our strong merchant business. Our focus is yielding returns, and we're well-positioned to meet the needs of our customers and to perform for our shareholders.

I'll turn the call over to Caroline to review our operating results in greater detail, and then I'll rejoin her at the end to answer your questions.

Caroline D. Dorsa

Thank you, Ralph and good morning, everyone. I'll review our quarterly operating earnings as well as the outlook for full year operating results by subsidiary company. As Ralph said, PSEG reported operating earnings for the third quarter of 2013 of $0.76 per share versus operating earnings of $0.75 per share in last year's third quarter. For the nine months ended September 30, we reported operating earnings of $2.09 per share versus $2.03 per share last year.

Slide 4 and 5 in our webcast deck provide a reconciliation of operating earnings to income from continuing operations and net income for the quarter and year-to-date. We've provided, as always, a waterfall chart on slide 10 that takes you through the net changes in quarter-over-quarter operating earnings by major business, and a similar chart on slide 12 to provide you with the changes in operating earnings by each business on a year-to-date basis.

I'll now review each company in more detail and I'll start with Power. As shown on slide 14, PSEG Power reported operating earnings for the third quarter of $0.43 compared with $0.43 per share a year ago. Power's third quarter earnings benefited from higher PJM capacity prices and improvement in the market price of energy, a decline in the supply cost of gas and strong operating performance.

Before reviewing the earnings in detail, I want to spend some time on Power's gas position. Power currently sells wholesale natural gas under a full requirement basic gas supply service or BGSS contract with PSE&G to meet the gas supply requirements of PSE&G's residential customers. Power has configured its contractual arrangements with Intrastate pipelines over the years, which amount to 1.3 billion cubic feet per day of firm transportation capacity to meet its obligations under the BGSS contract. Approximately 46% of PSE&G's peak daily gas requirements is provided from Power's firm transportation capacity, which is available every day of the year. Power satisfies the remainder of PSE&G's requirements and storage contracts, L&G, seasonal purchases and other sources of supply.

Bloomberg
SI-SSA-0015-10498
initial
Bloomberg Transcript

The transportation contract source gas from both the Marcellus basin at about 0.6 Bcf per day and the Gulf Coast at about 0.7 Bcf per day. This supply is supplemented with 0.9 Bcf per day of storage deliverability from a total storage capacity of about 76 billion cubic feet.

So the primary beneficiary of these contractual arrangements, as I mentioned, is the firm utility customer. When capacity beyond daily demand and storage injections is available, it may be used to serve the gas supply need of Power's generation fleet under a BPU-approved agreement.

Over the years, having firm transportation contracts for gas has provided Power with direct and indirect market benefits. The firm gas contracts and Power's electric hedging strategy have allowed Power to take advantage of market volatility created by weather and supplier positions.

Gas market volatility also has an impact on the electric market and can affect the value of basis as well as the value of ancillary services provided by Power's generation fleet. We experienced this favorable impact on earnings of the volatility earlier this year as we have in past years in varying degrees, and you'll recall we discussed this on the first quarter call.

Because production from the Marcellus Basin has increased faster than the availability of infrastructure to move the gas, the cost of gas from the Marcellus relative to other basins has declined in 2013, particularly since July of this year. The cost decline has occurred at the time of low heating demand while storage was being filled to meet the needs of residential customers in the upcoming winter heating season. Excess supply is normally available in the third quarter and this year was available to meet the needs of our generating fleet.

So, you should think of Power's firm transportation contracts providing benefits in the following order: Utility customers are first in line including the need to fill storage in a summer month; then to the extent supply existence excess of this firm customer needs Power would be able to make off-system sales a large portion of which benefit the utility customer; and lastly, provide gas for each generation fleet. Customer demand and the use of these gas assets will differ by season of the year and is largely dependent on the weather. The ability of generation to access the low cost Marcellus supply is more likely to occur during the summer months and the shoulder periods for the reasons I just noted.

So now I'll provide you with more detail behind Power's third quarter operating earnings. During the third quarter, Power's combined cycle fleet realized spark spreads which were approximately 40% to 45% greater than what it realized in the third quarter of 2012, the direct benefit of its Marcellus position. Power's results also benefited from the favorable impact which higher overall market prices for natural gas and an improvement in PS Zone bases had on spot market prices for energy. So combined, the improvement in the wholesale price of energy and the decline in fuel cost added $0.04 per share to earnings quarter-over-quarter with the majority of the benefit coming from the Marcellus impact.

An increase in capacity prices improved Power's quarter-over-quarter earnings by $0.11 per share. The improvement in capacity revenue on wholesale energy margins more than offset the $0.10 per share decline in quarter-over-quarter earnings from a reduction in the average price on hedged volumes.

A reduction in generation volumes, as a result of more normal weather and the maintenance-related outage at the gas-fired Bethlehem Energy Center or BEC reduced Power's quarter-over-quarter earnings comparisons by $0.02 per share.

The major maintenance outage at BEC which concluded in October resulted in an increase in Power's operating and maintenance expense exclusive of storm-related activity and reduced quarter-over-quarter earnings comparisons by $0.04 per share. Taxes and other items added about $0.01 per share to quarter-over-quarter earnings comparisons.

Volume declined by 5.4% in the quarter. There were more normal weather conditions and the BEC maintenance outage reduced output from the fossil fleet by 10% in the quarter.

The nuclear fleet maintained its strong operating performance with an average capacity factor of 91% in the quarter and 93.2% for the nine months ended September. While volumes were lower, overall performance was strong including

initial

Bloomberg
SI-SSA-0015-10499

excellent summer availability.

The combination of higher capacity prices and lower fuel costs resulted in gross margins for Power of approximately $51 per megawatt hour in the third quarter versus gross margins of $47 per megawatt hour in the year ago period. Remember, capacity prices increased to an average of $244 per megawatt day from $153 per megawatt day on June 1 of this year and those higher prices remained in effect through May 31, 2014.

Slide 19 on your deck provides detail on Power's realized gross margin. Power continues to forecast output for both 2013 and 2014 of between 53 and 55 terawatt hours. Output for the fourth quarter of approximately of 13 to 14 terawatt hours this year is 70% to 75% hedged at an average price of $50 per megawatt hour.

Of 2014 forecast output, Power has hedged approximately 65% to 70% at an average price of $48 per megawatt hour. Power has hedged approximately 35% to 40% of 2015 forecast generation of 52 to 54 terawatt hours at an average price of $48 per megawatt hour. Power's forecast of total generation output in each of the next two years is unchanged from prior guidance. The percentage of generation hedged in each of the next two years is greater than our prior forecast and the average price of energy hedged is declined by $1 per megawatt hour.

The changes reflect both in upward adjustment to the forecasted BGS-related hedges as well as an increase in the percentage of energy hedged at PJM West prices. The data for 2014 now assumes BGS volumes of about 11 terawatt hours versus prior guidance of 10 terawatt hours as customers switching to third party suppliers has slowed during the year. Power continues to resume BGS-related load in hedges in 2013 will represent about 12 terawatt hours of generation for this year.

Results for the remainder of the year will continue to be influenced by higher capacity prices as well as the decline in the average price of our hedges. We also continue to forecast an increase in Power's quarter-over-quarter O&M expense given a refueling outage at our 100%-owned Hope Creek nuclear facility currently underway as well as the maintenance work at BEC which concluded as I mentioned earlier in October.

Based on the performance of Power through the year including the third quarter, we have raised the forecast range of Power to operating earnings for 2013 to $630 million to $685 million from $535 million to $600 million. Let's now turn to PSE&G, PSE&G reported operating earnings for the third quarter of 2013 of $0.33 per share compared with $0.30 per share for the third quarter of 2012. The utility third quarter earnings reflect increased revenue associated with an increase level of investment.

Higher transmission revenue effective on January 1, 2013 increased quarter-over-quarter earnings by $0.04 per share. Revenue from investments made under PSE&G's distribution capital infrastructure investment program contributed $0.01 per share to earnings in the quarter.

Electric demand in the third quarter was influenced by weather which was hotter than normal, but cooler than the weather condition experienced in the year-ago quarter. Also, demand for electricity continues to be impacted by customer conservation in a slowly improving economic environment. Weather normalized electric sales led by a decline in the residential sector are estimated to have declined by 2.3% in the third quarter.

Sales of gas, although not as important in the third quarter as the demand for electricity, increased 10.4% from year-ago levels and year-to-date are 1.9% higher than last year. This continues the pattern we've seen this year and talked about earlier and could be reflective of customers' adjustment to an overall lower cost of gas.

You'll note PSE&G announced last week that it will be providing its residential customers with a two-month bill credit that will reduce the typical monthly bill by approximately 33% in both November and December. And this is on top of the ongoing 39% reduction in BGS rates that have been announced over the past four years.

The net impact on earnings from weather and the change in sales was a reduction in quarter-over-quarter earnings of $0.02 per share. A slight increase in distribution-related O&M and depreciation expense was offset by a decline in interest expense and other items. PSE&G is investing $3.4 billion in transmission-related programs over the period from 2013 through 2015. This program, which as Ralph mentioned, includes five major transmission lines remains on time and on budget. All five lines are expected to be operational over 2014 to 2015.

initial
Bloomberg Transcript

And PSE&G filed an annual update of its revenue requirements associated with the transmission investment program with the Federal Energy Regulatory Commission in mid-October. If accepted, transmission revenue in 2014 would increase by $176 million at the start of next year. PSE&G's control of its operating expenses and recovery of its transmission investment capital on a formula rate basis should continue to allow the company to earn its authorized return.

We're tightening our forecast of PSE&G's operating earnings for 2013 from $585 million to $600 million, from the prior $580 to $635 million. Results from the year will be influenced by a full-year increase in transmission revenue, weaker demand and the absence of a negative impact of Superstorm Sandy on sales and O&M in the fourth quarter.

We continue to anticipate double-digit growth in PSE&G's operating earnings this year and through 2015 based on approved programs, and we'll update you on expectations for 2014 through 2016 in February on our fourth quarter call.

Let me now turn to Energy Holdings and Enterprise. PSEG Energy Holdings, together with the parent, reported operating earnings of $1 million for the third quarter of 2013 versus operating earnings of $10 million or $0.02 per share during the third quarter of 2012. Results for the quarter reflect a continued monetization of assets within Holdings portfolio and the absence of a gain on an asset sale that occurred in the year ago quarter.

As many of you are aware, the terms of NRG Energy's recent announcement to acquire Edison Mission Energy, or EME, as part of an EME Chapter 11 reorganization would protect the entirety of Holdings equity value in the Powerton and Joliet leverage leases. This transaction is expected to close in the first quarter of 2014.

We've adjusted our forecast of PSEG Energy Holdings and Enterprise full year operating earnings to zero to $10 million from the prior $25 million to $35 million. The updated guidance reflects the impact of revised estimates for the legacy Holding's portfolio and related taxes completely separate from merchant energy leases which are expected to more than offset the benefit to operating earnings from the commercial operation of Holding's sixth solar facility in the fourth quarter. Recall that our strategy in Holdings is to wind down the portfolio, reduce risk and sell off assets, and we think we've been very successful to date in achieving this strategy.

Next, I'd like to briefly mention PSEG Long Island. The board of directors for the Long Island Power Authority, or LIPA, recently approved amendments to PSEG Long Island's original operating services agreement for LIPA's transmission and distribution system. When all regulatory approvals are received, we will begin to operate under the new contract. The revised terms are expected to add an estimated $0.04 to $0.05 per share to PSEG's earnings when fully effective in 2016 versus the original agreement which provided a run rate of earnings of about $0.03 per share.

Lastly, on the financing front, we continue to be in a strong position to finance our capital program. At the end of September, we had approximately $448 million in cash on hand, debt represented about 41% of PSEG's consolidated capital with debt at Power approximating 28% of its capital base. Power's cash flow remains strong and PSE&G's cash generation has improved with its ability to earn its authorized return on increased levels of capital investment.

As we said before, we can finance our existing capital program without the need to issue equity and we can finance an expanded capital program that includes spending on energy strong related projects also without the need to issue equity. And that still leaves us with the opportunity for modest and sustainable growth and a common dividend as we look to the future.

So finally, just to reiterate, as Ralph said earlier, I'm pleased to be raising our guidance for the forecast of operating earnings for the full year of 2013 to $2.40 to $2.55 per share. That concludes my remarks, and Bryan, I will now turn it over to you to introduce the Q&A.

Q&A

Bloomberg Transcript

<Q>: Good morning. A couple of areas, on the decline in demand, 2.3% in the third quarter, can you give us what that is year-to-date and a little color maybe on what you think is going on there and what the outlook is going forward from here?

<A>: Yes. So year-to-date, it was 2.7%. Remember these are weather-normalized numbers and I think I've done 26 of these quarterly calls and I always get the same caveat which is weather normalization. This is much art as a science. And we had some extreme weather conditions, so trying to back that out is not always easy. The big change this quarter was in the residential sector that was down 2.9%. The good news, if you will, is we're primarily a commercial sector-driven service territory and that was down 1% in the third quarter which is a little bit stronger than – which is less of a down that it had been prior year-to-date.

It's a combination of a slowly recovering economy as the unemployment levels in New Jersey are well published as about [ph] 8.3% (30:39). We've seen some modest recovery in housing starts, but the status didn't go down as far as others in 2008 and hasn't sprung back as quickly as others, but it's a combination, we think, of economic factors and just greater use of energy efficiency.

<Q>: And Ralph do you see that – is there some kind of structural change going on here where the new normal is going to be that there's negative sales or do you expect this to be cyclical and bounce back and what do you see as the, say, three to five-year growth rate?

<A - Ralph Izzo>: So what we told regulators is that we think that the – certainly the old days of loan growth being proportional GDP are gone and the more recent year of loan growth I think half of GDP are likely to not be the case anymore. And that is an important part of why we are so insistent upon contemporaneous returns on our significant investment approach in utility. Remember, as you well know, [ph] Kit (31:43), PSE&G's earnings growth are not driven by load growth. Our earnings growth are triggered by in reliability enhancements, infrastructure replacement and in enhanced resiliency. And the old system of regulatory lag, giving you some load growth to kind of carry you until the next rate case, is one that doesn't work when you have zero-ish load growth as we've been experiencing, and that zero-ish is obviously being a little bit kind when we've just reported negative numbers.

So whatever the future holds in terms of load growth, which looks to be something that is less than it has been in the past, I think that buttresses our argument for the need for clause recovery mechanisms while we're making significant and necessary capital investments. So PSE&G is not about load growth. It's about rate-based growth, and the regulatory system has to reflect the new load growth paradigm.

<Q>: Great. And one other area, if I could. Can you just give us a little more color, obviously you mentioned on energy strong, the resolutions that have been passed by the local governments. Clearly you're getting a lot of support there. Has it become – been mentioned at all in the gubernatorial race? And assuming it's not going to get done till after the election, when – what kind of timing do you think we have on getting approval?

<A>: Sure, [ph] Kit. (33:15). So you will remember that two of the last three major storms occurred within one week of election day, they were the Superstorm Sandy and the Halloween snowstorm of 2012 and third storm is Irene which is in August.

So mayors and elected officials know only too well the inconvenience and problems associated with local residents being without power. So as a result, we've had these 81 jurisdictions, a combination of counties and municipalities rallied to show up at public hearings which went extremely well, I would characterize it, in the months of September and early October. But it wasn't limited to local jurisdictions that showed up in support. We had strong support from a myriad of business associations, hospital associations and labor unions.

The schedule now calls for evidentiary hearings to take place, I believe, it's in February through the beginning of March. So on a fully litigated track, this won't be resolved until the end of March and the first quarter. But we remain hopeful that we could settle this because the conversations with the staff have been very, very reasonable. I mean, this is a big investment and they're asking good questions about engineering studies and expectations for what might be the range of cost associated with some of the proposals we've made.

initial

Bloomberg
SI-SSA-0015-10502

I'm not aware of comments that have been made by the candidates. I think early on, the governor said he expects the BPU to give this a full and thorough review kind of sort of reasonable and rational project that you would expect from this governor, just in light of the complexity of it. And the fact that he has a full BPU that's supposed to look after this. And I don't believe it's hit the radar screen of his opponent. I'm looking around the room here and everyone shaking their head no. So I don't think I missed the article that might have mentioned that.

So see, we're still hopeful that we'll come through some settlement agreement around the end of the year and as long as you allow me to define the end of year as possible including January, I feel very confident of that. So that's where things stand right now.

<Q>: Great. Thank you.

<A>: Next question.

Operator

And now our next question comes from the line of Dan Eggers of Credit Suisse.

<Q - Daniel Eggers>: Good morning. I guess – thanks for all detail on the gas positioning and kind of the benefit you guys were seeing from basis differentials. But, Caroline, [ph] further thing (35:47) about this a little more, what is the full year benefit you guys are seeing if you got about $0.04 in the third quarter? If you look at kind of the basis over the year, how much of the benefit have you guys seen this year?

<A - Caroline Dorsa>: Thanks, Dan. So if you remember some of the things I've said in my remarks. Because of the way in which our contract structure works and the primary benefit goes to the PSE&G residential customer, you're going to see us get these benefits when they're available in those sort of shoulder seasons or seasons where the residential customer doesn't need a lot of heat like this summer.

So, we saw the Marcellus prices really come down this summer. That was sort of the single biggest drop we saw and that lies immediately right into our shoulder summer period. So, the $0.04 I just described in this quarter, the majority of it is coming from the Marcellus, is the quarter in which you saw the gas to electric benefit from Marcellus have the biggest impact on us this year. So, that's the way to think about it from sort of a gas to electrics primarily been this quarter and you wouldn't expect to see on the gas to electric a lot of benefit in the winter because the benefits going – the pipeline is going to the residential customer.

That being said, remember in the first quarter, we talked about the fact that some of the volatility that was happening in gas given our position and given our ability to sell off capacity in off-system sales when there is a need on actually contributed $0.04 per share quarter-over-quarter in the first quarter, but that was not the gas to electric, right? That was the BGSS itself in terms of the ability to recover our fixed cost which we hadn't in the first quarter of 2012 because you may remember it's so mild that winter.

So the way to think about it going forward, though I don't encourage you to think about it, is you'll see us to the extent that this differential persist and, again, we don't know how long it will persist, but we have probably the single best positioning to garner it when it persists, is going to be in shoulder periods or summer periods where the residential customer doesn't have that gas demand.

We didn't see it as much this spring because that Marcellus price drop really happened in July. So going forward, I'd encourage you to look for it in the sort of spring and fall periods or shoulder periods or from gas to electric. It's been this quarter that you've really seen it come through the P&L.

<A>: I think one of the other things we've noticed, Dan, it's been quite favorable and it's difficult to quantify is that to the extent that benefit is not available to Power that's because residential gas demand is high which would tend to mean that we have some severe weather conditions which benefits Power and utility in other ways. And to the extent that there is not a strong demand which would suggest that there is weather condition that is not beneficial to Power in the utility, then the basis of differences seems to expand which offsets that negative outcome. So there's also this kind of

initial
Bloomberg Transcript

natural hedge phenomenon taking place that seems to work to our favor.

<Q - Daniel Eggers>: Okay. So just done with it, your 4% benefit spreads stayed where they are today, kind of in the second quarter we could replicate something like we saw on the third quarter of this year because that would be another low gas demand period, is that a reasonable way of thinking about things?

<A - Caroline D. Dorsa>: I don't want to forecast the specific, right? Because it depends on what happens to that differential and of course recognizing. As we've said, there are some lines that are coming in right into the New York region [ph] Spectra (39:19) Line and the Williams Line, so not certain how that basis will actually move n the future. But to the extent the basis is there, we think we're well positioned to capture it. But I wouldn't want to get specific on a number because that all depends on weather conditions and everything else.

<Q - Daniel Eggers>: Okay, that's fair. And I guess just along those lines, is that going to – with this opportunity or maybe more obvious of an opportunity. Are you guys going to reevaluate how you hedge the gas generation in the future or maybe the structuring of the hedges or the magnitude of the hedges?

<A - Caroline D. Dorsa>: So, I don't think so, Dan, for this reason, right? Because if you think about where I was citing the benefit, it's the spark spread widening that we received, a realized spark spread at that 40% to 45% level. Remember as we look at our hedge table, as we always break out for you, the base load versus the intermediate, this combined cycle, that's a part of the stack that you see us do very little hedging in advance of the current year.

So for example, it's about 10% hedged, that whole category right now for next year, that's typically what you see us optimize in the year. So to the extent that we see combined cycle as opportunities here, those opportunities are still going to be available to us and we're going to hedge in essentially the same way for that part of the stack which is in the year. And in the year is where we tend to have some visibility.

<Q - Daniel Eggers>: Okay, great. Thank you for clarifying that. I appreciate it.

<A - Caroline D. Dorsa>: Sure. Next question?

Operator

Our next question comes from the line of Neel Mitra of Tudor Pickering.

<Q - Neel Mitra>: Hi, good morning. I just wanted to understand the contract structure of the Marcellus Gas at Power. So is the way to look at it that the firm pipeline capacity cost is borne by the PSE&G rate payers and the off-system sales when the gas isn't needed for them, kind of accrues to Power as a variable cost with no operating cost associated with it?

<A - Caroline D. Dorsa>: Neel, so good question. So the cost of the pipeline is passed through to the residential customer. So it's not a net cost to power. So the residential customer is covering the full cost of distribution, as you would expect, nor is the pass-through of the gas to the residential customer process center for Power. It simply goes through to the residential customer.

When there is excess beyond what the residential customers need, then we have the ability to make off-system sales. And when you make those off-system sales, the value that's garnered there is shared with the PSE&G customer. In fact, the majority goes to the PSE&G customer, and then there's a small amount that's left for Power.

So think of Power as providing this on a pass-through basis to the customer. Customer covers the cost. Power doesn't make money on the actual throughput. Then to the extent there's excess, there's value garnered from the off-system. Majority goes to the customer, residential customer, and a minority of that comes to the bottom line for Power.

<Q - Neel Mitra>: Okay. Great. So is the way we should think about it is that as these contracts kind of roll off, you'll re-contract them just from the perspective that PSE&G needs Marcellus gas to supply its LDC and customers, or is it more of kind of a speculative bet that Marcellus' pricing is lower?

Bloomberg
SI-SSA-0015-10504
initial
Bloomberg Transcript

<A - Caroline D. Dorsa>: So good question as well. It's not a speculative bet. So if you remember, I think Ralph said this in his remarks, we set up this network of our contracting about 15 years ago, and it was designed and developed to cover the PSE&G load from liquid sources. So it's not speculative, but it's also not short term. These are actually very long-term evergreen-like contracts that we have rights to together with the contracts we have for storage. The entire design was to support our PSE&G customers. The real story and then the story you've been telling this quarter is, as has always been the case when the customer needs are lower and the access can be used for PSEG Power, we do that. It turns out this summer that that's turned out to be very beneficial because of Marcellus, but the original design and purpose which has been for many years and will continue to be for many years, is to pass this value through to our customers. And then if there's excess and only then if there's excess, we use it for PSEG Power.

<Q - Neel Mitra>: Okay, great. Thank you very much.

<A - Caroline D. Dorsa>: Sure. Next question?

Operator

Our next question comes from the line of Julien Dumoulin-Smith of UBS.

<Q - Julien Dumoulin-Smith>: Hi, good morning.

<A - Caroline D. Dorsa>: Good morning.

<A - Ralph Izzo>: Good morning, Julien.

<Q - Julien Dumoulin-Smith>: So switching topics a bit, if you will. I wanted to focus quickly on the switching phenomenon you described. And I suppose the question is, is it that just fundamentally the offers out there is just less competitive and is less headroom in a rising capacity price environment or is it rather that we're reaching some sort of lowering customer migration and there's something of customer lethargy to be explained? That's all.

<A - Ralph Izzo>: Julien, as you know, we're not in the retail business. But our responsibility at this product combination of those two that your most price-sensitive customers are the first to go and now, just having folks switch is a bit more of a challenge, the declining BGS prices. So our headroom has been single digit delta throughout the year and that headroom has to be something that your cost of customer acquisition leaves under, so it's not a business, as I said, we're in. So I think it's a combination of two things you mentioned.

<Q - Julien Dumoulin-Smith>: And just to be clear, what level of switching did that correspond to for 2014? I'm not sure I caught that.

<A - Ralph Izzo>: In the percentage basis?

<Q - Julien Dumoulin-Smith>: Yeah, if you don't mind.

<A - Caroline D. Dorsa>: Yeah. On percentage basis, we don't forecast it any longer but I can tell you the numbers that we see in terms of this is the overall aggregate switching from BGS, right, or in that sort of mid-high 30 percentage point range and that has not really changed in the past few quarters. So we use to try and track it every quarter and give you targets for it. What we think makes more sense is to give those targets we now give you for BGS, which is I remember from my remarks, we just raise by 1 terawatt hour for next year.

So it's just not coming through to be that much more switching and the reason really is, as Ralph said, the headroom just isn't that large. Whatever the retailers are doing on those dynamics and their profitability obviously a question through them. But it appears to have leveled out and of course, as BGS prices have come down, right, the average price came down $1 when we started this year BGSs and given what was rolling off and rolling on, there's just not much difference.

<Q - Julien Dumoulin-Smith>: Right. And then looking at the Long Island opportunity here, just to think about perhaps beyond the fees that you could receive here, could you be a little bit more explicit about the investment

Bloomberg
SI-SSA-0015-10505
initial
Bloomberg Transcript

opportunities perhaps rate base-like or otherwise that you could earn on?

<A - Ralph Izzo>: Sure. So, Julien, so as Carol and I try to point out, the $0.03 in 2014 grows to $0.07 or $0.08 by 2016. And then there is a provision in the contract that requires that we propose a concept that really is just a concept by July 1, 2014 on utility 2.0. But what's interesting about it is that it describes in the contract in words that are similar to many of things that PSE&G has done successfully in New Jersey under various clause mechanisms and those are renewable energy sources, energy efficiency and behind-the-meter services.

So we have a team of people looking at that. That's not something that we can forecast the number right now or even the timeframe. But the proposal is due from us to the LIPA board on July – by July 1 of next year. And we're excited about that because there are good some things we've been able to do for customers in New Jersey that we'd like to do for customers on Long Island and I'm sure we get fair treatment in terms of competition for doing so.

<Q>: Okay. And then lastly, not to beat up the subject one more time. But on the gas issue looking towards 2014 rather 2013, I presume a full year of sort of wider gas basis, the positive but meanwhile you could ask some offsets from new gas infrastructure reducing that basis. Is that the right – a fair way to characterize a full year impact in 2014?

<A - Caroline D. Dorsa>: Yeah. I think that's very fair, Julien. I guess the way that I think about this all in is, don't know what the basis will turn out to be. Obviously, that's determined by the market. Obviously, we serve our residential customers first. But we have a large position, as you saw from what we put in the slides here, right, of 0.6 BCF per day of shale supply.

So we have nice opportunity. And to the extent that that opportunity presents itself in terms of a differential, we think we're actually pretty optimally positioned to take advantage. And so, in those periods where the customers need the PSE&G are low, to the extent that basis is still there, we're going to be able to capture it.

So I think that – I think all in, that's the way I'd encourage you to think about it. We can't predict it anymore than you can predict it, but when it's there to be garnered, we garner it. We garner it first for our E&G customers. But after that, we garner it for Power. And we're pretty pleased about that opportunity of positioning, which wasn't developed for that reason but has now given us a real opportunity.

<Q>: Great. Thank you very much for the time.

<A - Caroline D. Dorsa>: Sure. Next question?

Operator

And now our next question comes from the line of [ph] Greg Gordon (49:25).

<Q>: Thanks. Good morning.

<A - Ralph Izzo>: Good morning, Greg.

<A - Caroline D. Dorsa>: Good morning.

<Q>: Guys, your balance sheet capacity is still quite robust and all the more so bolstered by the strong performance you're seeing at PEG Power. If you don't get approval for the full $3.8 billion of Energy Strong, would that spare balance sheet capacity then be redeployed into perhaps a more robust growth in the dividend?

<A - Ralph Izzo>: Greg, so, we maintained that our number one priority is reinvesting in the business. As you know, in addition to Energy Strong, we have some transmission resiliency of programs that we are in pursuit of with PJM. So, you would see us make sure that we're exhausting all regulated growth opportunities. Then, we've been talking to PJM as is everyone else and very publically about the 2012 [indiscernible] (50:22) enhancements that were put forth. That was grandfather on the FERC Order 1000, so those projects would come to us as an incumbent.

Bloomberg Transcript
initial
Bloomberg
SI-SSA-0015-10506

We proposed some projects coming out of Artificial Island as on FERC Order 1000 basis as well. So, I'm running through a laundry list of regulated utility investments that are beyond Energy Strong, but of course our primary focus right now is over the near term getting Energy Strong. Having said that, yes number two on the hit parade is the dividend. And then number three on the hit parade in anticipation of somebody else following up would be share repurchase. But I would put far away number one is reinvesting the business and then number two would be dividend growth.

<Q>: Great. Two more questions. First is with the decision on LCAPP, does that change your calculus on whether or not you would bid to see Warren into the next PJM Base Residual Auction?

<A - Ralph Izzo>: Well, so partially, right? I mean, what it does is it reduces the risk of a competitively big unit having challenges come through subsidized plants. We would do the same kind of return analysis, we use the forward price curve for the near term and then we use our fundamental models over the longer term, and then we have our own internal hurdle rate that I think we've been implying in a fairly disciplined way. So those numbers have to pass muster, first and foremost. And then, of course, as the qualitative discussion, which is all around well, if you would, we think the rules will be like X years from now and the recent court decisions helped mitigate some of that risk, but they don't help in terms of the market fundamentals.

By the way, [ph] Greg (52:03), the risk of beating a dead horse, I want to go back to your first question. Even with all of the Energy Strong and transmission opportunities that we see, at the risk of stating the obvious, the balance sheet is strong enough to support modest and sustained growth in that dividend. I think just your question was sort of without those things, would you do more? And I was responding in that vein earlier.

<Q>: Yes, that was clear. Thank you. Last question, is the lack of load growth in the service territory, perhaps to some degree related to the very high degree of rooftop solar penetration you have in the state. And if so, can you comment on trends in further penetration of distributed generation, mainly rooftop solar? And I guess that dovetails with the commentary on how the [ph] export (52:55) markets are performing.

<A - Ralph Izzo>: Yes. So, clearly, all of these things are contributing factors. To [ph] Kit's (53:02) point before, I mean, there's energy efficiency. There's lack of very strong and robust economic response, distributed generation. I think we're still the number one developer of solar energy in the state, and when the programs finished it, it's about 200 megawatts or so, 180 megawatts, with a capacity factor of about 12%.

So from an energy sales point of view, it's really fairly miniscule which is kind of the challenge, right, around solar that when you take that numerator which is sizeable in terms of capital invested and you divide by energy output which is not so sizeable, you get a pretty high cost of solar electricity which is something that we're very clear with our regulators that in pursuit of these RPS [indiscernible] (53:52) mindful of the rate impact to the customer from a point of view of cents per kilowatt hour. So short answer of course would be yes, it's a contributor. Longer answer would be, if you do the arithmetic, it's not that big a contributor.

<Q>: Then going forward, do you see penetration continuing at the current sort of rate or do you see solar investment both from utilities both yourself and independents declining?

<A - Ralph Izzo>: Yeah, I think that the real challenge – it's a tough question to answer. The real challenge is if we're determined to live by the renewable portfolio standard then the question I would post to the policy maker is when we originally cash that standard, it's under the assumption that as we nurture the industry in the early stages, it would then achieve certain economic efficiencies either in the form of lower cost of panels or in the form of higher efficiency rates that it would become kind of self-sustaining and so the prices will come down and probably the ITC will go away at the federal level.

We've seen those panel prices come down, but it has not come down – those prices have not come down enough to be economically competitive with $4 gas. I think you're beginning to see the first example of that reflected in our own solar filing, right? We went in and asked for $800 million-plus over five years and we got $440 million over three years.

Bloomberg Transcript

SI-SSA-0015-10507

And I think, based on conversations I had with Paul, that was kind a reflection of, hey, we can't do this forever. We need to start seeing some of those expectations be realized in terms of the economic viability of the technology, and that makes perfect sense. I mean it's just – I'm a huge solar fan. We've invested over a billion in solar, but you can't keep doing this at the price points that it's been achieving and do it at the RPS levels that we hope to see in 2020 or 2022.

<Q>: Thank you very much. Take care.

<A - Caroline D. Dorsa>: Sure. Next question?

Operator

And our next question comes from the line of Paul Fremont of Jefferies & Company.

<Q - Paul Fremont>: Thanks. So if I look at the – you're expecting, I think, $85 million to $95 million of uplift at PEG Power versus where you had been previously. If I look at the $0.04 in the third quarter and then the other gas-related item in the first quarter, that makes up roughly, I guess, $70 million. So what makes up – would gas in some way, shape or form also make up the remaining piece of the $85 million to $95 million, or is that coming from somewhere else?

<A - Caroline D. Dorsa>: So, Paul, in terms of the – you correctly pointed out the factors that we've highlighted, and so which we talked about today gas in the first quarter and in terms of BGSS, and then the $0.04 this quarter. Remember that one of the things we've talked about during the year is we have had some higher market prices than original expectations. So on a year-over-year basis, that has given us some uplift tool that's different than what we expected. So prices have come up and that you see that of course across the fleet in every quarter offset by the hedges but a little bit more positive than our expectations. So I think it's been – we've got great operational performance now. We do expect that, but it's certainly come through.

We did have weather that was warmer than normal this summer, cooler than last year but warmer than normal, and we always plan on normal weather. So when you put all of those factors together with the benefits we've actually seen on those specific things that I've called out and you just called out, that's overall but really lifts us across the fleet. So it's a confluence of factors that all worked in our direction but of course, which we've been able to take advantage of because of our good operational performance.

<Q - Paul Fremont>: And then if I look at BGSS volumes, I guess on a steady state throughout the year, roughly 75% is residential, roughly 25% is non-residential. Would you not get the benefit for the non-residential portions even in the winter months in terms of pipe usage?

<A - Caroline D. Dorsa>: So the – just to clarify, for the residential customer, It's a pass through cost so there's no profitability kind of either way relative to that. And for the commercial customer that uses some of that gas and territory, I think we've gone specifically into all of that but really think of it is in general, it's sort of a formula based on market prices and in competitive markets. So I wouldn't look to that, frankly, as a significant source of overall earnings going forward. Think of that as a little bit more on just a competitive market basis.

<Q - Paul Fremont>: I'm still not sure. In terms of my question, my question just relates specifically to winter months. In other words, in winter months, should we allocate some benefit because there's a roughly 75/25 split where 25% of the cost – of the volume at least are going to customers on which you are able to make a margin.

<A - Caroline D. Dorsa>: Yes. That's right. So, again a competitive sort of a market-based approach for BGS for the non-residential customer. I just want to be sure to distinguish between a residential and non-residential because there isn't margin in the structure for the residential customer. There is some margin for us under the contract for the non-residential customer. But again, I wouldn't look into that as a significant source of earnings. And that's something we've been getting overall all time, right? That's something that's been baked into our numbers, so baked into our year-on-year.

Bloomberg
SI-SSA-0015-10508
initial
Bloomberg Transcript

<Q - Paul Fremont>: Right. But the – I think the price differential at – in the Marcellus is a recent phenomena, but what you're saying is even in months where you at peak usage, you are still – there will still be benefit that is essentially going to benefit PEG Power?

<A - Caroline D. Dorsa>: Yes.

<Q - Paul Fremont>: From the lower cost gas?

<A - Caroline D. Dorsa>: That's right. That's exactly right. Yes.

<Q - Paul Fremont>: And then if I look at third quarter, I would assume third quarter would be less for profit opportunity for you than the fourth quarter because you also are dedicating a certain amount of pipe to storage delivery, correct?

<A - Caroline D. Dorsa>: So, we are dedicating pipe to storage delivery, as I mentioned, but keep in mind you've got some going into storage, but you don't have the residential customer draw. So, actually from – if you're just looking at the issue of what kind of benefit does Marcellus gives to the combined cycle, the best opportunities for that are in the shoulder periods where the customer demand residential PSE&G customer is pulling less of the pipe. So we definitely are filling storage. We absolutely do that, but given the flow that we have that you've seen in the slides in our deck, we fill the storage but we still have extra room. And so we typically fill the storage earlier in the summer months, and then when the store is essentially filling up, we have that extra flow on the pipe. We can use it for our own generation or we can sell that pipe capacity to others.

So I would say when you think about the gas pipeline and the benefit, you think about the potential benefit for us is the least in the winter and the most in the seasons other than the winter because you've got the least draw on the one class of utilization of the pipe that isn't the profit opportunity and that's the PSE&G residential customer.

<Q - Paul Fremont>: And then my last question just has to do with the, for the LIPA contribution, you say it's $0.03 in 2014 going to $0.07 to $0.08 in 2016. So in 2015, should we just pick something like a $0.05 contribution? In other words it goes -- I assume it goes up from the $0.03 but not quite to the $0.07 to $0.08?

<A - Ralph Izzo>: That's exactly right. You should add another $0.02 in that point, Paul.

<A - Caroline D. Dorsa>: Yeah.

<Q - Paul Fremont>: Thank you very much.

<A - Caroline D. Dorsa>: You're welcome

Kathleen A. Lally

I think operator that brings us to the hour and I know everyone's busy with earnings calls today. So, Ralph, back to you then.

Ralph Izzo

So, thanks, Kathleen. So hopefully you've noticed that Caroline and I and the team are quite pleased with our quarter. We're pleased with the year-to-date and moreover we're greatly encouraged by our opportunities and the fact that we have the financial strength to take advantage of those opportunities and have demonstrated the execution when the opportunities come our way. So we hope to see you all at EEI. Thank you for joining us today.

Caroline D. Dorsa

Thank you.

We make things work for you.

Quarterly UPDATE

Q3 2015

NYSE: PEG

Q3 2015 Performance Update

"PSEG delivered solid earnings in the third quarter and year-to-date and we made excellent progress on our objectives for growing our business. Operating earnings were $403 million or $0.80 per share compared to $393 million or $0.77 per share in Q3 2014 -- up 4%. The results for the quarter bring operating earnings for the first nine months of 2015 to $2.41 per share, a 6% increase over the $2.27 per share earned in 2014's first nine months. Based on the strength of our year-to-date results and the outlook for the remainder of the year, we are updating full-year 2015 guidance for operating earnings to $2.85 - $2.95 per share from $2.80 - $2.95 per share.

PSE&G continues to deliver on the earnings promise of its expanded capital program. During the quarter, PSE&G reached an agreement with the Staff of the NJ Board of Public Utilities (BPU) and the NJ Division of Rate Counsel that provides for PSE&G to invest $905 million over a three-year period beginning next year to replace aging cast iron gas mains. Approval by the BPU later this year will allow PSE&G to continue the work begun under Energy Strong supporting a clean, safe and reliable gas system well into the future. PSE&G's focus on improving the resiliency of the grid and increasing operational efficiency has translated once again into PSE&G being recognized as the most reliable utility in the Mid-Atlantic region for the 14th year.

PSEG Power achieved solid operational and financial results driven by improved performance from its nuclear and combined cycle fleet. Power is increasing its investment in clean, efficient gas-fired capacity, clearing a new 540 MW combined cycle gas plant (CCGT) at the Sewaren Station as part of PJM's Reliability Pricing Model Base Residual Auction. The new Sewaren unit represents an investment of $625 - $675 million and is in addition to Power's announced plans to construct and operate a new 755 MW combined cycle unit at the Keys Energy Center in Maryland for $825 - $875 million. Both units are expected to achieve operational status in 2018.

We have maintained a disciplined approach to investing as our strong financial position supports growth without the need to issue equity. We intend to utilize our financial strength to meet the high standards for reliability expected by our customers and enhance the returns required by our shareholders."

Ralph Izzo, Chairman, President & CEO - October 30, 2015

PSEG – Q3 Highlights

Strong Operating Performance – Successful Quarter

- Operating Earnings of $0.80 per share, up 4% from $0.77 per share in Q3 '14
- Updating 2015 operating earnings guidance to $2.85 - $2.95 per share, from $2.80 - $2.95 per share
- Increased earnings contribution from PSE&G's investment in transmission, weather, and Power's strong hedging and plant operations

Continued Operational Excellence

- PSEG Power solid capacity factor performance: Nuclear at 95% and CCGTs at 73%
- PSE&G electric sales up 7% in Q3, the 5th hottest summer on record

PSEG Disciplined Capital Investment

- PSE&G reached settlement with BPU Staff on GSMP ($905 million/3 years)
- Power will invest $1.5 billion over the next 3 years to build 2 new CCGTs: Sewaren 7 in NJ (estimated cost of $625 to $675 million) along with the 755 MW Keys Energy Center in Maryland (estimated cost $825 to $875 million)

Market Developments

- FERC NOPR and PJM Capacity Performance auctions supportive of price formation

PSEG -- Updating Full-Year 2015 Guidance

Updated 2015 guidance reflects the strength of operating results for the year-to-date period, and assumes normal weather and unit operations

Q3 Operating Earnings -- by Subsidiary

Quarterly UPDATE

Q3 2016

Q3 2016 Performance Update

NYSE: PEG

"Public Service Enterprise Group (PSEG) reported strong results for the third quarter 2016: Net Income of $327 million or $0.64 per share as compared to Net Income of $439 million or $0.87 per share reported for the third quarter of 2015. Non-GAAP Operating Earnings for the third quarter of 2016 were $444 million or $0.88 per share as compared to non-GAAP Operating Earnings for the third quarter of 2015 of $403 million or $0.80 per share. PSEG's performance continues to demonstrate the benefits from its expanded investment program. A focus on controlling costs supported results as demand was aided by the warmer than normal weather experienced this past summer. Net Income was also impacted by our decision to retire the Hudson and Mercer coal-fired generating stations in 2017. Retirement of these units continues the evolution of PSEG Power's assets into a portfolio of reliable, low-cost, flexible assets capable of competing in today's energy market. By the end of this decade, our nuclear and gas-fired generation facilities will provide more than 90% of our generation output. This decision will allow us to meet market conditions and aids PSEG Power's future cash flow and return profile.

PSE&G has reached a settlement with key parties to extend its existing Solar 4 All program to invest approximately $80 million to construct 33MWs of grid-connected solar facilities over three years. In addition, PSE&G recently filed a proposal with the BPU to partner with NJ Transit (NJT) on an investment partnership to develop a new $270 million substation. Including the solar settlement and potential partnership with NJT, PSE&G has identified >$600 million year to date of additional capital opportunities through 2020.

Strong third quarter results weren't sufficient to offset the lack of a winter, and we are adjusting our guidance for 2016's non-GAAP Operating Earnings to $2.80-$2.95 per share from $2.80-$3.00 per share. We remain committed to our core operating philosophy of operational excellence, investing in a disciplined manner and maintaining a strong financial position to support the growth expected by our shareholders."

Ralph Izzo, Chairman, President & CEO - October 31, 2016

PSEG – Q3 Highlights

Results in Q3

- Net Income of $0.64 vs. $0.87 per share in Q3 2015
- Non-GAAP Operating Earnings* of $0.88 per share vs. $0.80 per share in Q3 2015
- Increased earnings contribution from PSE&G's investment in Transmission

Operating Review

- PSEG Power generation met demand of the hottest summer weather in our 37 years of data
- Returned Salem units in late July following refueling and baffle bolt repairs at Unit 1 and transformer issues at Unit 2
- PSE&G maintained high system reliability throughout extreme summer conditions

PSEG Disciplined Capital Investment

- PSE&G identified >$600M year to date of additional capital opportunities through 2020
- Recent PSE&G Solar 4 All Extension II settlement to invest $80 million over 3 years
- Power's construction of Keys/Sewaren/Bridgeport Harbor on schedule and on budget

Market Developments

- Power announced retirement of the Hudson and Mercer generating stations (~1,250 MW) planned for mid-2017
- Energy Holdings recorded an impairment of $86 million (after-tax) related to the NRG REMA, LLC leveraged leases residual value

PSEG – Updating 2016 Full-Year Guidance

Strong Q3 results were not sufficient to make up for the lack of a winter in the first half of the year

Non-GAAP Operating Earnings*

Q3 Results by Subsidiary

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and material one-time items. The table below includes a list of items excluded from Net Income to reconcile to Operating Earnings with a reference included where the non-GAAP information appears.

Management uses Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of Operating Earnings is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, Operating Earnings as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of Operating Earnings guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the investor tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss.

Quarterly UPDATE Q4 & FY 2013

NYSE: PEG

4Q & FY 2013 Performance Update

"PSEG delivered outstanding results in 2013. Operating Earnings for the year 2013 were $1,309 million or $2.58 per share compared to 2012 Operating Earnings of $1,236 million or $2.44 per share. An increased level of investment in our regulated utility company produced double-digit earnings growth at PSE&G. PSEG Power's earnings benefited from the locational premium placed on the capacity price for its generating assets. Power also realized the benefits from higher wholesale prices on its open position and successful management of its gas supply arrangements.

We executed well on our business plan in 2013, and a strong balance sheet continues to support our growth initiatives without the need to issue equity. Our approach to managing supply risk has been affirmed during the recent period of extreme weather and volatility in the power markets. We have successfully responded to record demand while our customers have benefited from our ability to pass along savings in gas costs. The emphasis we have placed on the anchor principles of our strategy – operational excellence, financial strength and disciplined investment – created benefits in 2013 and is expected to continue to yield results over the coming year.

For 2014, we are initiating Operating Earnings guidance of $2.55 - $2.75 per share. Our optimism was demonstrated by the Board's recent decision to increase the common dividend by 2.8% to the indicative annual level of $1.48 per share. Double-digit growth in earnings from our stable, regulated business, Power's strong free cash flow and the benefits from successful management of our cost structure -- including our pension obligations -- are expected to yield long lasting benefits to Operating Earnings. The strong commitment and dedication shown by our employees to our customers has been a major contributor to our success and provides me with confidence in our ability to achieve our long-term goals."

Ralph Izzo, Chairman, President & CEO - February 20, 2014

PSEG – 2013 Highlights

Strong 2013 Financial Performance – Exceeded Guidance

- Achieved operating earnings of $2.58 per share, up 5.7% from $2.44 in 2012
- PSE&G posted double-digit earnings growth, representing 47% of consolidated operatitng earnings, and Power's operating earnings exceeded high end of guidance

Continued Operational Excellence

- PSEG Power set record output at Linden CCGT and Salem 2 nuclear
- PSE&G awarded 12th consecutive year as the Mid-Atlantic Region's Most Reliable Electric Utility

PSEG Disciplined Capital Investment

- Five major Transmission projects under construction – on schedule and on budget
- New PJM transmission projects add to utility rate base growth beyond 2015
- PSEG Power adding 150 MWs through uprates at CCGTs

Financial Strength

- Common dividend increased by 2.8% to indicative annual rate of $1.48 per share for 2014 from $1.44 per share, the 10th increase in the last 11 years

PSEG 2014 Guidance - Building on Success

2014 Operating Earnings guidance reflects increased level of investment, pension savings and assumes normal weather and unit operations

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended tobe viewed as an alternative to GAAP information. The table below includes a list of items excluded from Net Income to reconcile to Operating Earnings.

NYSE: PEG

4Q & FY 2014 Performance Update

"I am pleased to report that 2014 was a year that we continued to make progress on our plans to deliver for our customers and shareholders. Operating Earnings for the fourth quarter were $0.49 per share versus $0.49 per share in 2013 bringing results for the full year to $2.76 per share, or 7% greater than 2013's operating earnings of $2.58 per share and above our guidance of $2.60-$2.75 per share. Our core strategy – focused on operational excellence, financial strength and disciplined investment – is expected to yield a third year of growth in operating earnings over the coming year. For 2015, we are initiating Operating Earnings guidance of $2.75 - $2.95 per share.

Earnings from our regulated company grew to represent 52% of consolidated operating earnings as PSE&G's investment in transmission has grown to represent 39% of its $11.4 billion rate base at the end of 2014. PSEG Power's successful management of its gas supply arrangements supported earnings in excess of guidance for the full year, and delivered substantial savings to our customers. In 2014, we received approval to invest $1.22 billion in Energy Strong – a program that will improve the resiliency of our electric and gas distribution systems. We successfully grew PSEG Solar Source's portfolio by adding projects in three states, and now have 122 MWs of clean, renewable energy. And, we had a successful 1st year of managing the electric system of the Long Island Power Authority.

We are focused on growing our business: A robust pipeline of investment opportunities supports an expansion of our five year capital program. Our financial position remains strong. An acknowledgement of our success in mitigating risk and growth in earnings was the recent decision by our Board of Directors to meaningfully increase the common dividend by 5.4% to the indicative annual level of $1.56 per share. We've made significant strides in meeting our objectives for growth as we also satisfy customer requirements ,,, and we're not done."

Ralph Izzo, Chairman, President & CEO - February 20, 2015

PSEG – 2014 Highlights

Strong 2014 Financial Performance – Delivering Results

- Achieved Operating Earnings of $2.76 per share, up 7% from $2.58 in 2013
- PSE&G posted 18% earnings growth, representing 52% of consolidated Operating Earnings, and Power's results again exceeded the high end of guidance

Continued Operational Excellence

- PSEG Power set record CCGT generating output
- PSE&G awarded 13th consecutive year as the Mid-Atlantic Region's Most Reliable Electric Utility

PSEG Disciplined Capital Investment

- Major Transmission projects under construction – on schedule and on budget
- PJM transmission projects add to utility rate base growth beyond 2015
- Energy Strong investments underway - gas mains replacement prioritized

Financial Strength

- Common dividend increased by 5.4% to indicative annual rate of $1.56 per share for 2015 from $1.48 per share, the 11th increase in the last 12 years

Quarterly UPDATE

Q4 & YE 2016

Q4 & Year-End 2016 Performance Update

NYSE: PEG

"We delivered strong results in 2016: Net Income of $887 million or $1.75 per share, as compared to Net Income of $1,679 million, or $3.30 per share, for 2015. Non-GAAP Operating Earnings for the year 2016 were $1,475 million, or $2.90 per share, compared to 2015 non-GAAP Operating Earnings of $1,476 million, or $2.91 per share. Net Income for 2016 was largely impacted by expenses associated with the early retirement of coal-gas units at the Hudson and Mercer generating stations and reserves for a leveraged lease impairment. Net Income for 2015 includes insurance proceeds for the recovery of storm costs. PSEG also reported a Net Loss for the fourth quarter of 2016 of $98 million or $0.19 per share. This compares to fourth quarter 2015 Net Income of $309 million or $0.60 per share. Non-GAAP Operating Earnings for the fourth quarter of 2016 were $279 million, or $0.54 per share, compared to fourth quarter 2015 non-GAAP Operating Earnings of $255 million, or $0.50 per share. Net Loss in the fourth quarter reflects the impact of incremental depreciation expense and other expenses of $555 million pre-tax associated with the early retirement of the Hudson and Mercer.

We continue to pursue opportunities to enhance earnings and reduce financial risk. Actions to transition our business mix in response to changing market conditions have supported earnings. For 2017, we forecast non-GAAP Operating Earnings of $2.80 - $3.00 per share. Based on the growth in our regulated utility's investment program, PSE&G's Net Income is forecast to grow 8.5% at the mid-point of 2017's guidance to represent 66% of our forecast non-GAAP Operating Earnings.

PSEG currently plans to invest approximately $10.2 billion over 2017 – 2019 primarily in PSE&G (77%) and PSEG Power (23%). Our investment program, coupled with the impact from the retirement of Hudson and Mercer (which is excluded from our non-GAAP Operating Earnings) is expected to improve the resiliency of our infrastructure and the economic efficiency of our generating fleet. Our ultimate goal is to provide an attractive earnings and dividend profile as we also deliver value to the customer. Our balance sheet remains strong, and we are well positioned to meet our goals."

Ralph Izzo, Chairman, President & CEO - February 24, 2017

PSEG – Q4 & FY 2016 Highlights

Another Year of Successful Capital Deployment

- Net Loss of $(0.19) vs. Net Income of $0.60 per share in Q4 2015; Full-Year Net Income of $1.75 vs. $3.30 per share in 2015; Decision to retire Hudson-Mercer units impacted results for Q4 and FY 2016
- Non-GAAP Operating Earnings* of $0.54 vs. $0.50 per share in Q4 2015; Full-year non-GAAP Operating Earnings* of $2.90 vs. $2.91 per share in 2015
- PSE&G achieved 13% growth in Net Income over 2015 on increased investment in T&D
- PSEG Power results exceeded revised guidance with stringent control of O&M

Operating Review

- PSE&G recognized for the 15th consecutive year as the Mid-Atlantic region's most reliable electric utility
- Nuclear performance stabilized following extended outages at Salem; Both units operating in excess of 98% capacity factor in Q4 2016

PSEG Disciplined Capital Investment

- PSEG invested $4.2 billion in 2016: $2.8 billion at PSE&G and $1.3 billion at PSEG Power
- PSE&G's $905 million GSMP and $1.2 billion Energy Strong infrastructure investments continue
- Solar 4 All programs total 158 MWDC with latest extension to provide $80 million for development of 33 MWDC of grid-connected, landfill/brownfield solar over next 3 years

PSEG – Initiating 2017 Full-Year Guidance

Growth in utility infrastructure investments continue to drive a higher regulated earnings contribution in 2017

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Non-GAAP Operating Earnings is a financial measures that differ from Net Income in that it excludes the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. The table below includes a list of items excluded from Net Income to reconcile to non-GAAP Operating Earnings. Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of non-GAAP Operating Earnings is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings guidance, PSEG is unable to reconcile this non-GAAP financial measure to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of March 6, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com , under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10522

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last three slides in this presentation (Slides A, B and C) include a list of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of February 23, 2018.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. SI-SSA-0015-10524

PSEG

We make things work for you.

PSEG Strategy - Delivering Value

Operational Excellence: Improving reliability and customer service as we control costs in a low price environment

Financial Strength: Strong financial position supports investment program

Disciplined Investment:
- Program focused on achieving objectives through infrastructure investment that meets customer and shareholder needs
- Robust pipeline of opportunities

Results:
- Double digit growth in rate base and net income at PSE&G
- Reconfiguration of Power's generating fleet: higher quality, more efficient
- Annual growth in common dividend
- Strong credit metrics

SI-SSA-0015-10525

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A $11.5 - $13.2 billion infrastructure program with opportunities to expand, producing 7% - 9% annual rate base growth through 2022	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow and upside from market rule improvements
2017 **Assets $29B** **Net Income $973M** **Non-GAAP Operating Earnings* $963M**	2017 **Assets $12B** **Net Income $479M** **Non-GAAP Operating Earnings* $505M**

ASSETS AND NET INCOME ARE FOR THE YEAR ENDED 12/31/2017. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO ENTERPRISE / OTHER ACTIVITY. *SEE SLIDE A FOR A RECONCILIATION OF NET INCOME TO NON-GAAP OPERATING EARNINGS, SLIDE B FOR RECONCILIATIONS FOR PSE&G AND PSEG POWER, AND SLIDE C FOR ENTERPRISE/OTHER.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: 16 consecutive years of recognition as the most reliable utility in the Mid-Atlantic region • PSEG Power: Improved nuclear capacity factors to ~94% in 2017; Fleet moving towards improved efficiency and environmental position • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Maintaining focus on efficiency, resiliency and customer satisfaction
Financial Strength	• Non-GAAP Operating Earnings for 2017 exceeded the mid-point of guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • PSEG is a net beneficiary of recent tax legislation • Increased dividend in February 2018 – 14th increase in last 15 years
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2018-2022) with investments in Transmission, Electric and Gas distribution, Gas System Modernization Programs (GSMP), Energy Strong and Clean Energy • Power capital program, focused on completing construction at Keys, Sewaren and Bridgeport Harbor, will improve fleet efficiency and geographic diversity

SI-SSA-0015-10527

Focus on earning our cost of capital has provided for growth in operating earnings* and dividends

SI-SSA-0015-10528

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO NON-GAAP OPERATING EARNINGS.

PSEG Policy and Regulatory focus

on mechanisms that provide customers with clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- Requested ~1% increase in revenue primarily to recover investments, partially offset by benefits related to tax reform

Long-Term Infrastructure Investment Platform

- BPU approved policy providing for constructive investment recovery mechanism encouraging investment in long-term infrastructure

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy that recognizes the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-10529

PUBLIC SERVICE ELECTRIC & GAS

PSEG

We make things work for you.

SI-SSA-0015-10530

PSE&G – New Jersey's largest:

- Electric and Gas Distribution utility
- Transmission business
- Investor in renewables and energy efficiency
- Appliance service provider

	Electric	Gas
Customers Growth (2013 – 2017)	2.2 Million 0.6%	1.8 Million 0.6%
2017 Electric and Gas Sales	40,740 GWh	2,397M Therms*
Sales Mix (2017)		
Residential	32%	59%
Commercial	58%	37%
Industrial	10%	4%

PSE&G 2017 Rate Base

* GAS FIRM SALES ONLY.

SI-SSA-0015-10531

PSE&G Investment – Delivering growth

- Our rate base is roughly balanced between federal and state jurisdictions
- Non-GAAP operating earnings growth aligned with rate base growth

SI-SSA-0015-10532

Developing investment opportunities

with near-contemporaneous recovery mechanisms

2018-2022E PSE&G Capital with Program extensions by Recovery Method

$11.5B - $13.2B

$13B plan includes program extension filings comparable to current investment levels:

- GSMP II
- Energy Strong (ES) II
- Clean Energy Future (CEF) filing
  - expansion of current energy efficiency programs
  - electric vehicle programs
  - energy storage
  - LED streetlights

Broad opportunity set of investment potential driven by customer expectations and public policy

FERC Formula Rates	Traditional Recovery Mechanisms	Clause Recovery Mechanisms
Transmission	Distribution Base Rates	Infrastructure / Clean Energy

PSEG

E = ESTIMATE. DATA AS OF FEBRUARY 2018. INCLUDES AFUDC.

Operational Excellence – O&M costs

Demonstrated ability to control O&M, preserving earnings and returns in a low sales growth environment

Cost control actions:

- PSE&G is utilizing the Lean Six Sigma discipline to achieve costs savings and process improvements
- Regular organizational refinement to streamline processes
- Continued focus on vendors, ensuring maximum value
- Successful management of pension

SI-SSA-0015-10534

Continued strong rate base growth – off a higher base

E = ESTIMATE.
HASHED PORTION OF THE CHART REPRESENTS EXTENSIONS OF DISTRIBUTION CLAUSE PROGRAMS INCLUDING GSMP II, ES II AND A LARGE CLEAN ENERGY PROGRAM

SI-SSA-0015-10535

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2013 - 2017

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2018-2022E

Complete hardening, begin system modernization, expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

EV Infrastructure and Battery storage

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth into the next decade

SI-SSA-0015-10536

PSEG POWER

PSEG

We make things work for you.

SI-SSA-0015-10537

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, highly efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (414 MW_{DC}/325 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-10538

Power has a diverse fleet of generating assets which enables it to respond to market needs

Fuel Diversity 2017*

Total MW: 10,458

Energy Produced 2017*

Total GWh: 51,089

- Gas
- Nuclear
- Coal
- Oil
- Pumped Storage

SI-SSA-0015-10539

PSEG

* EXCLUDES SOLAR (414MW$_{DC}$ /325MW$_{AC}$) AND KALAELOA (104MW).

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2017 to 2020E

2020E Fuel Diversity
Total MW: 11,800

2020E Energy Produced
Total GWh: 65,500

Energy hedging being moderated due to uncertainty around future operations of NJ nuclear units, given economic challenges

2017 Fuel Diversity[1]
Total MW: 10,458

2017 Energy Produced[1]
Total GWh: 51,089

- Gas
- Nuclear
- Coal
- Oil
- Pumped Storage

[1] REFLECTS RETIREMENT OF HUDSON AND MERCER UNITS ON JUNE 1, 2017.
ALL PERIODS EXCLUDE SOLAR (414 MW_{DC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.
E= ESTIMATE.

SI-SSA-0015-10540

Power's fleet is well-located with access to shale gas production

- PSEG Power procured approximately 360 BCF in 2017 with approximately 50% going towards PSE&G's utility gas customer usage
- PSEG Power's gas for PJM generation was ~65 BCF in 2017, of which >85% was supplied by Northeast Shale gas

- Significant amount of new pipelines have already been built and more are in construction / development
- Gas production and pipeline takeaway capacity expected to be more balanced in 2018 timeframe

SI-SSA-0015-10541

E = ESTIMATE.

Power has demonstrated its ability to control O&M

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON/MERCER EARLY RETIREMENT.

SI-SSA-0015-10542

Power's capital needs decline following construction of new capacity, enhancing free cash flow

SI-SSA-0015-10543

PSEG

EXCLUDES NUCLEAR FUEL. INCLUDES IDC. E=ESTIMATE. DATA AS OF MARCH 9, 2018.
*UPDATED TO REFLECT RECENT CANCELLATION OF NUCLEAR CAPITAL PROJECTS AT SALEM THAT ARE NOT REQUIRED FOR REGULATORY COMPLIANCE OR SAFE OPERATION.

PSEG FINANCIAL REVIEW & OUTLOOK

SI-SSA-0015-10544

PSEG

We make things work for you.

Strong financial position driven by PSE&G with meaningful contribution from Power

	2017 Financial Position
Earnings	✓ Delivered on 2017 guidance under challenging conditions ✓ Increased PSE&G earnings contribution
Investment	✓ Executed major PSE&G capital program balanced between Transmission and Distribution ✓ Focused on completion of Power's construction program
Cash Flow and Credit Metrics	✓ PSEG business mix yields net benefits from recent tax reform ✓ Produced stable and strong PSE&G cash from operations ✓ Maintained strong credit metrics
Dividends	✓ Increased common dividend by 4.7% or $0.08 per share

Opportunity for consistent and sustainable dividend growth

E=ESTIMATE.

SI-SSA-0015-10551

PSEG's Value Proposition

- A stable platform with a $13-$15 billion infrastructure investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 111-year record of paying common dividend with opportunity for consistent, sustainable growth
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile

SI-SSA-0015-10552

PSEG APPENDIX

SI-SSA-0015-10553

PSEG

We make things work for you.

PSE&G Distribution Base Rate Case Filing

- **Dockets** ER 18010029 (Electric) and GR 18010030 (Gas)
- **Filed** January 12, 2018; **Anticipate new rates** Fourth Quarter 2018
- **Test year** – July 1, 2017 through June 30, 2018 (with certain pro forma adjustments)
- **Rate base** of $9.6B ($5.6B E; $4B G) as of December 31, 2018
- **ROE** request of 10.3%; **Capitalization structure** with 54% equity
- **Requested Increase:** ~1% relative to overall revenue
- **O&M and Sales** are roughly flat to last rate case eight years ago
- **Capital recovery** beyond clauses and $125M increase in Depreciation rate
- **Decoupling** of revenues from sales volumes
- **Taxes** – lower tax rate and flow back of deferred taxes to offset storm costs and reduce impact on customer bills
- **Pending updates:**
  - **Taxes** - BPU order to lower rates effective April 1 will accelerate savings planned in rate case; update for other tax impacts such as loss of bonus depreciation
  - **9x3 update** to be filed in May

Overall bill for the typical PSE&G residential customer, even after consideration of the ~1% request, would remain ~20% lower than bills after last base rate case

SI-SSA-0015-10554

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~20% since our last rate case
- Provided Gas bill credits totaling ~$670 per customer since 2012
- Continued investment at the current rate of growth would take about a decade to equal the 2010 bill rates (adjusted for growth in CPI/disposable income)

- Regional price comparison** - Gas is 2nd lowest and Electric is lower than average
- Distribution revenue component is the lowest in the state for Gas and second lowest for Electric

SI-SSA-0015-10555

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

New Jersey BGS accounts for ~10 TWh of our hedging

Retail marketing will complement BGS

Full Requirements Component

Capacity Markets/RPM

Growing Renewable Energy/Transmission

Component for Market Risk

Latest auction results reflect mix of lower prices for energy and higher transmission costs

NOTE: BGS PRICES ARE QUOTED IN $/MWH AND REFLECT PSE&G ZONE; RESULTS FROM THE 2016-2018 AUCTIONS WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2018.

SI-SSA-0015-10556

Capacity Markets provide a solid and continuing revenue stream

PJM's RPM Auction Results*					
Delivery Year	2016/2017	2017/2018	2018/2019	2019/2020	2020/2021
Power's Average Prices ($/MW-day)	$172	$177	$215	$116	$174
Rest of Pool Prices ($/MW-day)	$59	$120	$165/$150 (CP/Base)	$100/$80 (CP/Base)	$77 (CP)

Tax Cuts and Jobs Act: PSEG is well positioned

given positive non-utility contribution to earnings and a strong balance sheet

Federal Tax Reform	PSE&G	PSEG Power	Enterprise/Other
Reduction of Corporate Tax Rate to 21%	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period Estimated excess deferred tax balance of $2.1 Billion at YE 2017	After-tax earnings and cash flow increase One-time, non-cash earnings benefit from reduction in deferred tax liability reflected in 2017 GAAP results: $588 Million	After-tax earnings and cash flow increase One-time, non-cash earnings benefit from reduction in deferred tax liability reflected in 2017 GAAP results: $147 Million
Expensing of Capital Expenditures	Bonus depreciation eliminated post 2017 Rate base growth increases by ~1%/year through 2022 relative to prior tax rules	100% expensing -- cash flow increases	
Interest Disallowance Rule 30% Limitation Based on Tax – EBITDA	Not applicable	Well positioned given low debt balance	Well positioned given low debt balance

OUR ESTIMATES AND ANALYSIS ARE PRELIMINARY. THE SEC HAS PROVIDED COMPANIES ONE YEAR TO FINALIZE 2017 ACCOUNTING REQUIREMENTS. FURTHER ADJUSTMENTS IN 2018 MAY BE REQUIRED.

SI-SSA-0015-10559

Tax reform impacts – PSE&G

Lowered federal corporate tax rate from 35% to 21%

- Lowers costs and annual revenue requirements by ~$275M
- Updated Transmission Formula rate lowered by $148M effective 1/1/2018
- Incorporated ~$130M reduction into Distribution base rate case filing

Lower tax depreciation benefits (no bonus depreciation, lower tax rate)

Excess deferred taxes due to lower tax rate of ~$2.1B

- Protected ~$1.6B – Flow back period over the lives of the assets (ARAM method)
- Unprotected ~$0.5B – Flow back period will be addressed with the BPU and FERC

Financial impact

✓ **Rate base growth** - Lower deductions and planned flow back increases rate base by >$1B

✓ Average annual earnings increase by ~$20M in 2019 growing to ~$30M in 2022

✓ Investment program and metrics to support strong credit rating is maintained

PSEG EXECUTIVE PROFILES

PSEG

We make things work for you.

SI-SSA-0015-10561

Ralph Izzo

CHAIRMAN, PRESIDENT AND CHIEF EXECUTIVE OFFICER

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED

Ralph Izzo was elected chairman and chief executive officer of Public Service Enterprise Group Incorporated (PSEG) in April 2007. He was named as the company's president and chief operating officer and a member of the board of directors of PSEG in October 2006. Previously, Mr. Izzo was president and chief operating officer of Public Service Electric and Gas Company (PSE&G).

Since joining PSE&G in 1992, Mr. Izzo was elected to several executive positions within PSEG's family of companies, including PSE&G senior vice president – utility operations; PSE&G vice president – appliance service; PSEG vice president - corporate planning; and PSE&G vice president - electric ventures. In these capacities he broadened his experience in the areas of general management, strategic planning and finance.

Mr. Izzo is a well-known leader within the utility industry, as well as the public policy arena. He is frequently asked to testify before Congress and speak to organizations on matters pertaining to national energy policy.

Mr. Izzo's career began as a research scientist at the Princeton Plasma Physics Laboratory, performing numerical simulations of fusion energy experiments. He has published or presented over 35 papers on magnetohydrodynamic modeling. Mr. Izzo received his Bachelor of Science and Master of Science degrees in mechanical engineering and his Doctor of Philosophy degree in applied physics from Columbia University.

He also received a Master of Business Administration degree, with a concentration in finance from the Rutgers Graduate School of Management. He is listed in numerous editions of Who's Who and has been the recipient of national fellowships and awards. Mr. Izzo has received honorary degrees from the New Jersey Institute of Technology (Doctor of Science), Thomas Edison State University (Doctor of Humane Letters), Bloomfield College (Doctor of Humane Letters), Rutgers University (Doctor of Humane Letters), and Raritan Valley Community College (Associate of Science).

Mr. Izzo is on the board of directors for the New Jersey Chamber of Commerce, the Edison Electric Institute (EEI), the Nuclear Energy Institute (NEI) and the New Jersey Performing Arts Center. He is also a member of the Board of Trustees of Peddie School and the Princeton University Andlinger Center for Energy and the Environment Advisory Council, as well as a member of the Visiting Committee for the Department of Nuclear Engineering at MIT. Mr. Izzo is a former member of the Columbia University School of Engineering Board of Visitors. In addition, he is a former chair of the Rutgers University Board of Governors and the New Jersey Chamber of Commerce.

SI-SSA-0015-10562

Daniel Cregg

EXECUTIVE VICE PRESIDENT AND CHIEF FINANCIAL OFFICER

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED, PUBLIC SERVICE ELECTRIC AND GAS COMPANY, PSEG POWER LLC AND PSEG SERVICES CORPORATION

Daniel J. Cregg was named executive vice president and chief financial officer for Public Service Enterprise Group Incorporated (PSEG) and its subsidiaries in October 2015.

Mr. Cregg is responsible for all financial functions, including Internal Audit Services, Investor Relations and Corporate Development. Given the array of financial instruments which serve as the primary means of selling wholesale energy to customers, Mr. Cregg also has responsibility for the Risk Management function, which provides independent oversight of the PSEG Power trading organization. In addition to finance, Mr. Cregg is responsible for the Strategy and Planning function. He is a member of PSEG's Executive Officer Group.

Prior to his current position, Mr. Cregg was vice president – finance for PSE&G, a role he assumed in June 2013. In 2006, Mr. Cregg was named vice president – finance for PSEG Power. In that capacity and in previous financial roles for Power, Mr. Cregg held leadership positions related to financial reporting and forecasting, investor communications, financings, rating agency interactions, external reporting, cash forecasting, financial valuations, competitive intelligence, and fundamental market modeling, with critical responsibilities in Power's development and strategic planning activities.

Previously, Mr. Cregg was director of PSEG corporate development. He joined PSEG in 1991 with overall responsibility for tax planning, strategy and compliance for PSEG Energy Holdings, including domestic and international tax structuring work for PSEG Global and PSEG Resources.

Before joining PSEG, Mr. Cregg spent five years with the accounting and consulting firm of Deloitte and Touche, providing consulting services to a wide range of clients with an emphasis on the energy industry.

Mr. Cregg holds a Master of Business Administration degree from the Wharton School of the University of Pennsylvania and is a graduate of Lehigh University, where he received a bachelor's degree in accounting.

Forward Looking Statement

Readers are cautioned that statements contained in this presentation about our future performance, including future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical, are forward-looking statements for purposes of the safe harbor provisions under The Private Securities Litigation Reform Act of 1995. When used herein, the words “anticipate”, “intend”, “estimate”, “believe”, “expect”, “plan”, “should”, “hypothetical”, “potential”, “forecast”, “project”, variations of such words and similar expressions are intended to identify forward-looking statements. Although we believe that our expectations are based on reasonable assumptions, they are subject to risks and uncertainties and we can give no assurance they will be achieved. The results or developments projected or predicted in these statements may differ materially from what may actually occur. Factors which could cause results or events to differ from current expectations include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units, delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers,
- increase in competition in energy supply markets as well as competition for certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and changes in technology and customer usage patterns.

For further information, please refer to our Annual Report on Form 10-K, including Item 1A. Risk Factors, and subsequent reports on Form 10-Q and Form 8-K filed with the Securities and Exchange Commission. These documents address in further detail our business, industry issues and other factors that could cause actual results to differ materially from those indicated in this presentation. In addition, any forward-looking statements included herein represent our estimates only as of today and should not be relied upon as representing our estimates as of any subsequent date. While we may elect to update forward-looking statements from time to time

SI-SSA-0015-10569

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The last slide in this presentation includes a list of items excluded from Income from Continuing Operations to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

SI-SSA-0015-10573

PSEG – 2012 Highlights

2012 Earnings in-line with guidance

- Achieved operating earnings of $2.44 per share, at the high end of guidance range of $2.25-$2.50, including storm-related costs at PSE&G
- PSE&G represented 43% of consolidated operating earnings with growth in transmission

Operational excellence

- Record output from CCGTs, continued strong production from Nuclear, and Power's control of O&M supported results
- PSE&G recognized for reliability: National ReliabilityOne Excellence Award, Mid-Atlantic Reliability Award, and Award for Outstanding Response to a Major Outage Event; as well as EEI's Emergency Response Award
- Restored service to 2.1 million customers in a two-week period of time in the aftermath of Superstorm Sandy and the Nor'easter that followed
- Extension of major labor contracts

PSEG disciplined capital investment

- Key regulatory approvals received for major transmission projects
- BPU decisions pending on Solar4All Extension and Solar Loan III
- Power added 400 MW of new peakers in time to respond to summer demand
- Holdings added 40 MW of new solar capacity

PSE&G's Energy Strong Capital Program addresses new reality

- New $3.9 Billion Infrastructure Program filed with the NJBPU to strengthen PSE&G's electric and gas system focusing on hardening and resiliency
- Plan to invest an additional $1.5 Billion in Transmission grid over the ten-year period
- PSE&G's Infrastructure proposal includes:
  - Protecting 40 utility installations from severe storms (**$1.7 Billion**)
  - Making the electric grid smarter and easier to repair (**$454 Million**)
  - Adding backup distribution lines and system redundancies (**$415 Million**)
  - Undergrounding 20 miles of overhead distribution lines (**$60 Million**)
  - Modernizing the gas distribution system (**$1.1 Billion**)
- Better protection for homes and businesses during severe weather and improved day to day system reliability
- Proposed filing creates ~5,800 jobs and stimulates economic activity for New Jersey businesses

*2013 PAYOUT RATIO REFLECTS THE MIDPOINT OF 2013 OPERATING EARNINGS GUIDANCE.
**INDICATED ANNUAL RATE.

Value Proposition

PSEG is positioned to expand its investment in PSE&G projects that provide reasonable, risk adjusted returns, in ways that meet customer needs and state goals, given strong cash flow of Power and growing cash contribution from PSE&G.

PSEG will maintain a strong financial profile that provides the opportunity to achieve our growth objectives and maintains our track record of returning cash to shareholders.

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-10607

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2012	2013-2015E	Expected In-service Date
$435M	$24M	$411M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-10608

State policy imperatives have been redefined by SuperStorm Sandy

Storm report issued by NJBPU focusing on:

- Preparedness Efforts
- Communications
- Restoration and Response
- Post Event Analysis
- Underlying Infrastructure Issues

Storm Deferral Filings:

- On December 19, 2012 the Board granted a PSE&G request for general authority to defer storm restoration costs, thereby making such costs potentially recoverable in future rate filings
- On February 20, 2013, at its open public meeting, the Board voted that the recovery of all such storm restoration costs would be reviewed in a generic (multi-utility) proceeding

SI-SSA-0015-10609

We have also responded with a plan focused on infrastructure hardening and resiliency

- PSE&G filed a petition on February 20, 2013, with the NJBPU seeking approval for the Energy Strong Program (ES) which will harden electric and gas distribution infrastructure and increase the resiliency of the electric distribution system
- The filing complements the NJBPU's recently issued order requiring all Electric Distribution Companies to take specific actions to improve preparedness and response to major storms
- ES program represents a potential investment of approximately $3.9 billion over the next 10 years. PSE&G has asked for initial funding approval of $2.6 billion during the first five years
- Additional Transmission investment of approximately $1.5 billion would be included in future FERC Formula Rate filings

SI-SSA-0015-10610

PSE&G is continuing to provide solutions to assist New Jersey in achieving its EMP goals

Solar 4 All extension (S4Ae)*

- Filed July 2012
- Investment up to $690 million and 136 MW
- The program will assist the state in developing solar for underserved market segments by installing solar systems on landfills, brownfields and other underutilized land

Solar Loan III (SL3)*

- Filed July 2012
- Investment up to $193 million and 97 MW
- The program will assist the state in meeting its solar policy objective by providing loans to solar developers and generation owners focused on residential, small non-residential and large non-residential customers

Energy Efficiency 4 All (EE4A)

- Investment up to $470 million
- The program will target four residential and three commercial and industrial segments
- To be filed

SI-SSA-0015-10611

*PENDING APPROVAL.

Lower commodity costs and expiration of certain transition charges are expected to fully offset the impact to customer bills

*2018 BGS/BGSS RATES AS WELL AS SBC AND DISTRIBUTION RATES HELD CONSTANT AT CURRENT 2013 RATES. RATES RELATED TO ELECTRIC RESTRUCTURING: SECURITIZATION (STC), NON-UTILITY GENERATION CHARGE (NGC), & TRANSITIONAL ENERGY FACILITIES ASSESSMENT (TEFA), ARE REDUCED TO ZERO BY 2018. THE RGGI RECOVERY CHARGE (RRC), SOLAR PILOT RECOVERY CHARGE (SPRC), AND CAPITAL ECONOMIC STIMULUS INFRASTRUCTURE INVESTMENT PROGRAM EXTENSION (CIP II) BILL IMPACTS ARE INCLUDED IN THEIR RESPECTIVE GAS AND ELECTRIC BARS AND FORECASTED IN 2018 BASED UPON LATEST ESTIMATE. THE 2018 BILL IMPACTS OF ES, EE4ALL, AND S4AEXT/SL3 IMPACTS ARE BASED UPON CURRENT ESTIMATES.

LONG ISLAND POWER AUTHORITY

SI-SSA-0015-10614

PSEG

LIPA T&D management contract

In December 2011, the Long Island Power Authority (LIPA) selected PSEG to manage its electric transmission and distribution system for 10 years starting in 2014

- Reasons for selecting PSEG included:
- Proven technical capabilities and track record of top quartile customer service and reliability
  - Commitment to cost control and investment optimization
  - Corporate culture of transparency and data-driven decision making
  - Transition activities on-track – successfully achieving all milestones through February 2013

- Evaluating impact of SuperStorm Sandy and recent LIPA management changes on the overall schedule and transition

Successful management of the LIPA transmission and distribution system may lead to additional growth opportunities

PSEG

We make things work for you.

SI-SSA-0015-10623

PSEG Power strategy

Focused on safety performance, unit reliability, competitive cost structure with control of maintenance costs, achieving operational excellence, and supporting market rules to maintain a level playing field

SI-SSA-0015-10624

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus

Fleet Diversity/Efficiency Focus

- Fleet diversity across the dispatch curve and fuel types provides flexibility
- Nuclear units continue to achieve strong operational results and are well positioned for the future
- Peach Bottom steam path retrofit completed
- Fossil fleet is suited for market dynamics
- CCGT achieved record output in 2012
- Installed 400 MW new peaking capacity in 2012

Financial/Economic Focus

- O&M cost control programs have delivered
- Sites offering competitive advantage suited for expansion

Regulatory Focus

- Strong regulatory performance
- Industry leadership in the changing regulatory environment

SI-SSA-0015-10625

PSEG Power delivered in 2012

Storm and weather challenges	Market challenges	Value delivered
• SuperStorm Sandy impacted our generating sites • Warm winter put pressure on demand and pricing for both electricity and gas • Hot summer weather created challenging operating environment	• Unit outages and transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by weather and economy	• Cost control • Lower dispatch and fuel cost • Captured value through coal/gas switching, unit flexibility • Improved unit availability • Coal & oil sales optimized inventory • Expedited return from storm outages, restored margin opportunities • Optimized unit dispatch across fleet during storm recovery

SI-SSA-0015-10626

PSEG Power has generating assets

in three competitive markets

- Low cost portfolio
- Fuel flexibility
- Assets near loads
- Poised to benefit in real time markets
- Fleet will maintain diversity and efficiency in 2016 after HEDD
- Most sites suitable for expansion

SI-SSA-0015-10627

PSEG Power Nuclear fleet is a critical element of success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,174 MW
• Owned Capacity: 1,174 MW
• License Expiration: 2046
• Next Refueling
  • Fall 2013
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%, Exelon – 43%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,326 MW
	• Owned Capacity: 1,335 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 -- Spring 2013
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,245 MW
		• Owned Capacity: 1,123 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2013

SI-SSA-0015-10628

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations – eight consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent and attractive training program
- Developing Fukushima action plan in response to NRC staff review
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-10629

PSEG Power's Fossil Fleet availability has shown steady improvement

EFORd improvement resulted in over 200 MW of additional capacity available

EFORp improvement and availability at peak demand times has resulted in performance payments in each of the last four years

SI-SSA-0015-10630

PSEG Power improvements achieved in combined cycle fleet efficiency

Actions Taken to Create Value	
• Heat rate improvement program • Operational Excellence Model	• Training programs • Unit testing initiative • Outage work to restore efficiency

SI-SSA-0015-10631

SuperStorm Sandy affected the fleet;

when the load returned, Power was ready

SI-SSA-0015-10632

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- Power is well positioned for HAPS

SI-SSA-0015-10633

PSEG Power's focus on costs has resulted in moderate increase in O&M for six years

Cost control actions taken:	
• Coal assessment • CCGT material condition assessment • Contract renegotiation	• Material management • Nuclear maintenance productivity study • Nuclear outage efficiency initiative

SI-SSA-0015-10634

* INCLUDES IMPACTS FROM STORM RECOVERY COSTS AND POTENTIAL RELATED INSURANCE PROCEEDS.
E = ESTIMATE.

PSEG Power is well positioned for growth in the fleet when market conditions dictate

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Interconnection • Gas Pipeline Access • Sites/Space • Emissions

SI-SSA-0015-10635

PSEG Power will maintain diversity and efficiency after a realignment of the fleet in 2016

Objective
2012 → 2016E

- Maintain fuel diversity
- Maintain load serving capability
- Improve fleet heat rate by 6%
- Maintain low cost structure
- Environmental improvement

Fuel Diversity
13,226 MW 11,200 MW

Energy Produced
52.5 TWh 52-54 TWh

SI-SSA-0015-10636

SI-SSA-0015-10638

PSEG

* EXCLUDES SANDY IMPACT.

PSEG POWER
ER&T

SI-SSA-0015-10639

PSEG

We make things work for you.

PSEG Power
ER&T strategy

Focused on optimizing the value of its asset portfolio and providing outstanding service to our customers, while prudently managing risk

SI-SSA-0015-10640

Diversified assets and flexible dispatch

High performing, baseload nuclear assets	3,632 MW
Fuel advantaged, baseload coal plants in PA	776 MW
Flexible combined cycle fleet	3,176 MW
Well leveraged intermediate & peaking assets	5,642 MW

Integrated trading and dispatch capability around fleet

SI-SSA-0015-10641

Fleet capacity has been advanced by:

Improved Heat Rate capability

Trading acumen to execute fuel switching opportunities

Reduced O&M and increased start-up success

Capturing new products opportunity with minimal investment

SI-SSA-0015-10642

Spark spread replaces dark spread as major value driver

- Spark spread has risen above dark spread in PJM markets
- Power's gas units operating at record throughput
- Gas operation provides much more operational flexibility
- Enhances the ability of trading organization to capture volatility

SI-SSA-0015-10643

2013 BGS Auction Results for PSE&G Zone

BGS sales account for about a third of our forward portfolio of hedges

SI-SSA-0015-10644

BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2011-2013 WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2013.

Our hedging mix has changed with the market but still captures the fleet's locational advantage

- 3 Year forward BGS sales comprise smaller percentage of Power's hedges
- Other full requirement load deals help capture additional locational and load shape premium

SI-SSA-0015-10645

NOTE: PERCENTAGES REPRESENT HEDGED VOLUMES IN PLACE AFTER BGS AUCTION.

Hedging strategy designed to protect gross margin and leverage the portfolio

Ratable Hedging on Baseload:

- 3 year ratable hedge tactics
- 3 year PJM hedge of capacity (not included in table)
- Load following sales (such as BGS) have strong correlation to our units for hedging basis and load shaping premium

Dynamic Hedging on Intermediate Coal, Combined Cycle and Peaking:

- Position fleet to take advantage of market volatility
- Gas and load-following fleet left open until prompt year to capture volatility
- Use all trading products to capture option value of assets and benefit from market dislocations

		2013	2014	2015
Baseload (Nuclear and Baseload Coal)	Volume TWh	35	35	35
	% Hedged	100%	80-85%	40-45%
	Price $/MWh	$50	$49	$51
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	20	19	18
	% Hedged	30-35%	0%	0%
	Price $/MWh	$50	$49	$51
TOTAL	Volume TWh	53-55	53-55	52-54
	% Hedged	75-80%	50-60%	25-30%
	Price $/MWh	$50	$49	$51

SI-SSA-0015-10646

PSEG

* HEDGE PERCENTAGES AND PRICES AS OF FEBRUARY 11, 2013. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS.

PSEG's locational advantage

and electric basis

- Basis (PS Zone to PJM West) will continue to trend downward for forward sales
- Volatility will remain significant in the prompt periods (especially summer/winter)
- Power maintains sufficient length to participate in upside volatility as well as a valuable 250MW transmission position into NYC
- Basis will continue to have a positive impact on PSEG Power profitability

SI-SSA-0015-10647

*AS OF FEBRUARY 14, 2013.

PSEG's locational advantage

and gas basis

- Lower cost supplies of shale gas have been beneficial to both PSE&G customers and PSEG Power
- Over 50% of our available pipeline capacity can access market area supplies of shale gas
- Power's generating units sit in close proximity to the Marcellus fairway
- Power buys approximately 350BCF/year of gas
- We have been able to arbitrage gas values from South to North and East to West using our storage and pipeline capacity

SI-SSA-0015-10648

PJM's capacity market continues to recognize locational value of our fleet

$/MW-day	2012 / 2013	2013 / 2014	2014 / 2015	2015 / 2016
Power's Average Prices	$153	$244	$162	$167
Rest of Pool Prices	$16	$28	$126	$136

Opportunity for modest and sustainable

dividend increases consistent with stable regulated growth and cash generation outlook at PSEG Power

SI-SSA-0015-10667

PSEG Summary

- Operating Earnings Guidance for 2013 of $2.25 - $2.50 per share with earnings mix shifting to 50% regulated
- Double digit operating earnings growth at PSE&G starting in 2013, and continuing through 2015 driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength reduces risk in low price environment
- Strong Balance Sheet and Cash Flow support full capital program without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for further growth

SI-SSA-0015-10668

APPENDIX

SI-SSA-0015-10669

* See Page A for Items excluded from Income from Continuing Operations to reconcile to Operating Earnings.

PSE&G provides high reliability at below average cost which creates superior value to customers

SI-SSA-0015-10672

SAIDI = SYSTEM AVERAGE INTERRUPTION DURATION INDEX, A MEASURE OF AVERAGE OUTAGE DURATION FOR ALL CUSTOMERS SERVED.

PSE&G prioritizes public safety

while maintaining value to customers

LEAK RESPONSE RATE = PERCENTAGE OF UTILITY RESPONSES TO REPORTED LEAKS WITHIN ONE HOUR.

SI-SSA-0015-10673

Formula rates for transmission make the process more predictable with contemporaneous returns

	Transmission (Federal)	Distribution Base Rate Case (State)
Current ROE	• 11.68% base • 12.93% with incentives on Susquehanna-Roseland • 11.93% with incentives on Northeast Grid	• 10.3%
Volatility of Returns	• Low – prospective recovery with annual true-ups for over/under recovery	• Higher – performance impacted positively/negatively by cost management, weather, customer demands, etc.
Process	• Formula – The rate template and specific elements like ROE are predetermined with annual updates and true ups	• Litigated case with each element (depreciation, ROE, O&M levels, Rate Base) scrutinized and settled
Intervenors	• State consumer advocates usually participate	• State consumer advocates • Large customers • Other parties affected by the case, e.g. Solar Developers
Test Year	• PSE&G has fully **forecasted** test year for both Capital and O&M	• **Historical** test year with pro-forma adjustments for known and measurable items, e.g. wage escalation
Time to resolve	• Annual Formula updates are filed in October with January 1 effective date	• Typically settled within 12-15 months

SI-SSA-0015-10674

New Jersey Board of Public Utilities (BPU)

- The Board of Public Utilities consists of five commissioners appointed by the Governor. These appointees are confirmed by the NJ Senate for six-year, staggered terms. The Governor appoints one of the five to serve as Commission President. Currently, the commissioners are:
  - Robert M. Hanna, Commission President
  - Jeanne M. Fox
  - Joseph L. Fiordaliso
  - Mary-Anna Holden
- Stefanie Brand, Director of the Division of Rate Counsel

SI-SSA-0015-10675

Slow economic recovery in NJ is constraining growth in all market sectors

Modest residential growth limited by housing market inactivity and the slow economic recovery

Consumer spending is trending with the slow economic recovery and impacting growth in the commercial sector

Industrial sales growth continues to be constrained by slow economic recovery

2013 - 2015 Projected Sales
Growth – Gas*

2013 - 2015 Projected
Sales Growth – Electric*

SI-SSA-0015-10676

* WEATHER NORMALIZED ESTIMATED ANNUAL GROWTH PER YEAR OVER FORECAST PERIOD

Key economic indicators forecast renewed growth over the 2012 to 2015 timeframe

The New Jersey economy increased by 0.3% annually from 2010 to 2012 and is anticipated to grow 2.3% per year from 2012 to 2015

New Jersey total non-farm employment increased by 0.6% annually from 2010 to 2012 and is expected to grow 1.4% per year from 2012 to 2015

Real personal income in New Jersey increased by 1.4% annually from 2010 to 2012 and is expected to increase 2.5% per year from 2012 to 2015

Single family housing starts declined by 2.6% annually from 2010 to 2012 and are expected to increase ~24% per year from 2012 to 2015

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10686

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of March 6, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com , under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss .

** ESTIMATED ANNUAL GROWTH PER YEAR, ASSUMES NORMAL WEATHER.

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (326 MW_{DC}/257 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-10691

*POWER ANNOUNCED RETIREMENTS OF HUDSON AND MERCER GENERATING STATIONS AS OF JUNE 1, 2017.

PSEG Regulatory and Policy focus

on mechanisms that provide customers clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- True-up data from 2010 base rate case for known changes in customers usage, taxes, O&M and investments

Long-Term Infrastructure Investment Platform

- Seek extension of existing infrastructure programs, e.g., GSMP, and broaden investment platform

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy to recognize the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

SI-SSA-0015-10698

PSE&G Investment Evolution: System needs, customer expectations and public policy objectives drive need for continued and increasing Distribution investments

2012 - 2016

Infrastructure Clauses focused on hardening and resiliency

Solar 4 All and Solar loans

Energy Efficiency

2017-2021E

Complete hardening, begin system modernization expand efficiency program

Transition from Energy Strong to Life cycle and automation work

Accelerate GSMP

Solar landfills

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth rate

SI-SSA-0015-10699

PSE&G's capital spending drives high single-digit growth in rate base

E = ESTIMATE.

SI-SSA-0015-10700

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-10701

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2016 to 2021E

Energy Produced increases by >18%

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

[1] REFLECTS ANNOUNCED EARLY RETIREMENT OF HUDSON AND MERCER UNITS IN MID-2017.
ALL PERIODS EXCLUDE SOLAR (257 MW_{AC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.

Strong credit metrics provide substantial investment capacity for increased utility investment

Average Funds From Operations / Debt
2017E – 2019E

	Power	PSEG
Estimate	~40%	Low – 20's
Minimum Threshold	30%	High - teens

Total Incremental Investment Capacity

Incremental capacity invested in utility would be matched with utility debt

SI-SSA-0015-10704

E=ESTIMATE.

PSEG has demonstrated an ability to control O&M, with plans to reduce in 2017

(1) POWER EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON / MERCER EARLY RETIREMENT WRITE-DOWN, DISTRIBUTION EXCLUDES ELECTRIC AND GAS BAD DEBT. E = ESTIMATE.

SI-SSA-0015-10705

2017 Federal Tax Reform – PSEG is well positioned

Given positive non-utility contribution to earnings and a strong balance sheet, PSEG is well positioned for potential tax reform

Assumption	PSE&G	PSEG Power	PSEG Parent
Reduction of Corporate Tax Rate	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period	After-tax earnings and cash flow increase One-time non-cash earnings benefit from reduction in deferred tax liability	After-tax earnings and cash flow improve
100% Expensing of Capital Expenditures	Impact on rate base growth comparable to existing bonus depreciation rules	Cash flow improves	
Elimination of Deductibility of Interest Expense and Border Adjustment Tax	Change in cost anticipated to be passed through to customers	Well positioned given low debt balance Uncertainty on Border Adjustment Tax	Well positioned given low debt balance

SI-SSA-0015-10706

Opportunity for meaningful and sustainable dividend growth

SI-SSA-0015-10707

PSEG Summary

- 2016 Operating Earnings (non-GAAP) at upper end of revised guidance of $2.80 - $2.95 per share
- PSE&G capital spending provides high single-digit rate base growth for foreseeable future balanced between Transmission and Distribution
- Power expected to generate significant free cash flow following CCGT construction program and transformation to a more efficient generation fleet
- Strong balance sheet and cash flow support current capital program and new investment opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2017 demonstrates meaningful and sustainable dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

SI-SSA-0015-10708

PSEG's Value Proposition

- A stable platform with a robust investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile supporting the potential for consistent and sustainable dividend growth

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as competition for certain transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies and changes in customer behaviors, including energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10714

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Income from Continuing Operations/Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Income from Continuing Operations/Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. Slides A and B at the end of this presentation include a list of items excluded from Income from Continuing Operations/Net Income to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

PSEG OVERVIEW

PSEG

We make things work for you.

SI-SSA-0015-10716

PSEG's Strategy – delivering results

Our businesses' focus on cost-effective, reliable operations yields strong cash flow

We are funding growth-oriented investments aligned with customer needs and state energy policies

We are enhancing the competitiveness of our environmentally well-positioned generation business

The results of our financial strategy support a credit profile capable of meeting our corporate objectives and providing sustained dividend growth for our shareholders

SI-SSA-0015-10717

Two complementary businesses

Strong asset platform, performing well and positioned for the future

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Positioned to meet customers' needs as we respond to state and federal energy policy and economic growth objectives	**Strategy:** Fuel diverse fleet is geographically and environmentally well positioned, with investments to enhance competitiveness
Value Proposition: An $11.3 billion infrastructure program – focused on transmission – that is expected to produce double-digit rate base growth through 2016	**Value Proposition:** Provides substantial free cash flow in current environment and poised for price recovery
2013 — Assets $20B; Operating Earnings $612M	2013 — Assets $12B; Operating Earnings $710M

SI-SSA-0015-10718

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2013.
PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT, PSEG LONG ISLAND AND ENERGY HOLDINGS ACTIVITY.
SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

Delivering on commitments and pursuing opportunities for growth

Operational Excellence	• Power: Record 2013 output at Linden CCGT and Salem 2; nuclear capacity factor greater than 90% for 9th straight year • PSE&G: Mid-Atlantic Reliability Award (12th consecutive year) • PSEG Long Island: Went "live" on January 1, 2014 • PSEG: Cost-control benefits continue
Financial Strength	• Strong cash flows supported credit rating increases • Pension more than fully funded • Dividend increased
Disciplined Investment	• PSE&G ✓ Transmission capital program execution and growth ✓ Energy Strong infrastructure program underway ✓ Solar 4 All Extension and Solar Loan III programs • Power: Investments to enhance the fleet's competitiveness – 130 MW Nuclear uprate, 150 MW CCGT uprate and efficiency improvement

SI-SSA-0015-10719

Maintaining PSEG 2014 Operating Earnings Guidance

Reflects increased level of utility investment, pension savings and assumes normal weather and unit operations for the rest of year

SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. E = ESTIMATE.

SI-SSA-0015-10720

Operating Earnings Mix

Long term investment program has driven increased earnings contribution from stable, regulated business

Power's diverse fuel mix and dispatch flexibility continues to generate earnings and free cash flow

PSE&G's investment in transmission has diversified its asset base and, coupled with other investments and cost controls, supported compound annual earnings growth of ~18% over 2009 – 2013

PSEG's business profile has been transformed through significant growth in utility capital spending

SI-SSA-0015-10723

Energy Strong Agreement recognizes benefits of system investments

- Energy Strong Agreement reached with all parties
  - ✓ Agreement recognizes the benefits of system investments that prevent or shorten outages
  - ✓ Supports $1.22 billion capital program over several years on reasonable terms: $1 billion recovered through accelerated, rate recovery mechanism
    - $820 million Electric
    - $400 million Gas
  - ✓ Allows PSE&G to earn a 9.75% ROE on the $1 billion recovered on accelerated basis
  - ✓ Requires PSE&G to file a base rate case by November 2017
  - ✓ Approved by the NJBPU in May 2014
- Over 100 New Jersey municipalities supported Energy Strong
- Energy Strong agreement clears path for PSE&G to begin the initial phase of this robust capital program

SI-SSA-0015-10724

PSEG Power – Value-advantaged through asset diversity, fuel flexibility, location and installed environmental controls

SI-SSA-0015-10725

PSEG Power – Our diverse fleet and flexible portfolio allow us to capture opportunities arising from market volatility

SI-SSA-0015-10726

PSEG

*AT THE BEGINNING OF EACH YEAR. **EXCLUDES BGSS.

Balance Sheet Strength

2009 – 2013: Reduced risk profile and transformed business mix

- Invested $8.4 billion in PSE&G
- Improved credit ratings
- Monetized and de-risked Holdings' portfolio

2014 – Forward: Strong cash flows and increasingly regulated business mix fully support:

- PSE&G's $11.3 billion approved investment program through 2018
- Consistent and sustainable dividend growth
- Additional investment capacity to deploy in opportunities beyond those in the current capital plan
- No need to issue equity

SI-SSA-0015-10727

PSEG Annual Dividend – A long history of growth and returning cash to shareholders with a financial position that provides opportunity for consistent and sustained growth

SI-SSA-0015-10728

*INDICATED ANNUAL RATE.
**2014 PAYOUT RATIO REFLECTS THE MIDPOINT OF OPERATING EARNINGS GUIDANCE. E=ESTIMATE

PSEG Q1 2014 Financial Highlights

- Strong Q1 Earnings

✓ Operating earnings of $1.01 vs. $0.85 per share in Q1 2013*
✓ Power benefited from higher market pricing, market volatility and increased output
✓ Increased contribution to earnings from PSE&G's investment in transmission

- Maintaining 2014 operating earnings guidance of $2.55 - $2.75 per share

✓ Focused on maintaining operating efficiency and customer reliability
✓ PSE&G expected to grow at double-digit rate in 2014 and provide over 50% of operating earnings

- Executing existing 5-year, $6.8 billion transmission capital spending program on budget and on schedule

- Agreement on PSE&G's Energy Strong infrastructure program to invest $1.22 billion over 2014 – 2018

- Power recognized a liability in the quarter related to its discovery that it incorrectly calculated certain components of its cost-based bids for certain generating units in the PJM energy market, with resulting over-collection of revenues related to its fossil fleet. Power has notified FERC, PJM and the PJM Independent Market Monitor of this issue, which is still under review; we are unable to estimate the ultimate impact or predict any resulting penalties or other costs associated with the matter at this time

- Financial position remains strong

✓ Positive cash from Power and increasing cash flow from PSE&G supports dividend growth and funds capital spending program without the need to issue equity
✓ Increased common dividend to indicative annual rate of $1.48 per share in Q1 2014
✓ Debt as a percentage of capital was 41% at March 31, 2014

SI-SSA-0015-10729

*SEE SLIDE B FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO OPERATING EARNINGS

Value Proposition

PSEG is positioned to **expand its investment in PSE&G** projects that provide reasonable, risk-adjusted returns, in ways that meet customer needs and state goals, given **strong cash flow of Power** and growing cash contribution from PSE&G.

PSEG will maintain a **strong financial profile** that provides the opportunity to achieve our growth objectives and maintains our **track record** of **returning cash to shareholders**.

PSEG

E = ESTIMATE

Energy Strong Agreement supports customers' needs in the aftermath of Superstorm Sandy

- Settled with NJBPU Staff and all other parties in May 2014 for $1.22 billion; approved by the NJBPU in May 2014
- Program addresses system resiliency and hardening by:
  - ✓ $620 million to raise, relocate or protect 29 switching and substations that were damaged by water in recent storms
  - ✓ $350 million to replace and modernize 250 miles of low-pressure, cast iron gas mains in or near flood areas
  - ✓ $100 million to create redundancy in the electric system, reducing outages when damage occurs
  - ✓ $100 million to deploy smart grid technologies to better monitor system operations to increase our ability to more swiftly deploy repair teams
  - ✓ $50 million to protect five natural gas metering stations and a liquefied natural gas station affected by Sandy or located in flood zones

SI-SSA-0015-10740

Over 70% of PSE&G's $11.3 billion investment program will be recovered through contemporaneous mechanisms

PSE&G TRANSMISSION

PSEG

We make things work for you.

SI-SSA-0015-10743

Transmission has delivered, and has grown to represent ~36% of rate base

Transmission represented ~36% of rate base at YE 2013 up from ~15% at YE 2009

SI-SSA-0015-10744

PSE&G's existing major transmission

investment program remains on schedule and on budget

Major Transmission Projects

	Approved ROE	Inclusion of CWIP in Rate Base	100% Recovery of Costs Due to Abandonment	Project Estimate Up To ($ Millions)	Expected In-service Date
Susquehanna-Roseland	12.93%	✓	✓	$790	June 2014 / June 2015
Northeast Grid Reliability	11.93%	✓	✓	$907	June 2015
North Central Reliability	11.68%	✓	✓	$390	June 2014
Burlington–Camden 230kV	11.68%	✓	✓	$399	Completed
Mickleton–Gloucester–Camden 230kV	11.68%	✓	✓	$435	June 2015

SI-SSA-0015-10745

Susquehanna-Roseland consists of constructing 150 miles of 500kV circuit (46 miles in NJ) with two new 500kV GIS switching stations at Roseland and Hopatcong

Project Estimate Up To*	Through Year-end 2013	Expected In-service Date
$790M	$661M	June 2014 / June 2015

- PJM RTEP project b0489
- ROE of 12.93% (including 1.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves reliability and reduces congestion

Project Status: Major permitting & siting complete, outside plant construction in progress, inside plant construction is complete and commissioning is in progress

SI-SSA-0015-10746

PSEG

*PROJECT IS SHARED WITH PPL. PROJECT ESTIMATE REPRESENTS PSE&G'S CONSTRUCTION RESPONSIBILITY FOR THE NJ PORTION.

Northeast Grid Reliability consists of upgrading approximately 50 overhead circuit miles of 138kV transmission line to 230kV, constructing ~18 miles of new underground 230kV lines, and converting/upgrading 12 existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$907M	$228M	June 2015

- PJM RTEP project b1304
- ROE of 11.93% (including 0.25% incentive)
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment
- Project estimate has increased ~$12M associated with hardening related scope changes as a result of Superstorm Sandy

Customer Benefit: Improves reliability and increases transfer capability

Project Status: Nearing completion of engineering/design and licensing/permitting phase. Outside and inside plant construction are in progress

SI-SSA-0015-10747

North Central Reliability consists of upgrading 55 circuit miles of 138kV transmission line to 230kV, and converting six existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$390M	$349M	June 2014

- PJM RTEP project b1154
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Improves power quality and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction is essentially complete, commissioning is in progress

SI-SSA-0015-10748

Burlington-Camden 230kV consists of upgrading 37 circuit miles (30 miles of overhead and 7 miles of underground) of 138kV transmission line to 230kV, converting the existing stations to 230kV operation

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$399M	$301M	Completed

- PJM RTEP project b1156
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses voltage reliability and increases transfer capability

Project Status: In-service April 2014

SI-SSA-0015-10749

Mickleton-Gloucester-Camden 230kV

consists of upgrading 10 circuit miles of overhead transmission, installing ~16 circuit miles of new 230kV underground, 10 circuit miles of new 230kV overhead, and modifications/upgrades at five existing stations

Project Estimate Up To	Through Year-end 2013	Expected In-service Date
$435M	$122M	June 2015

- PJM RTEP project b1398
- ROE of 11.68%
- 100% CWIP in rate base during development
- 100% recovery of prudently incurred costs due to abandonment

Customer Benefit: Addresses thermal reliability and increases transfer capability

Project Status: Major permitting & siting complete, outside and inside plant construction in progress

SI-SSA-0015-10750

Bergen-Linden Corridor is a recently approved project which will provide a double-circuit 345kV line to maintain reliability

Project Estimate Up To	Through Year-end 2013	Expected Completion Date
$1,200M	-	June 2018

- PJM RTEP project b2436
- 30 miles of underground cable
  - New ~ 23 miles
  - Reconductor (Upgrade of 138 to 345) ~7 miles
- 13 miles of double circuit overhead conductor (replacing double circuit 138 with double circuit 345)
- 11 station upgrades to 345kV

Customer Benefit: Addresses thermal and short-circuit reliability

Project Status: Engineering

SI-SSA-0015-10751

Planned transmission spend of $6.8 billion

is driven by PJM reliability projects, 69kV conversions and life-cycle replacement projects

PSEG LONG ISLAND

PSEG

We make things work for you.

SI-SSA-0015-10756

PSEG was selected to operate Long Island Power Authority's (LIPA) electric transmission and distribution system for 12 years starting in 2014

- Pursuant to the Operating Services Agreement (OSA), all expenses and capital costs to operate the system are pre-funded by LIPA and passed through to their customers
- Compensation consists of a fixed fee and an incentive fee
  - Fixed compensation fee for 2014 with scheduled increases in 2015 and 2016
  - Starting in 2015 PSEG Energy Resources and Trading (ER&T) begins managing fuel/energy contracts
  - PSEG Long Island expected to contribute $0.03 to operating earnings in 2014 increasing to $0.07 per share in 2016 including contribution at ER&T
- Potential for an 8-year extension of the OSA

SI-SSA-0015-10757

PSEG Long Island commenced operations

on January 1, 2014

Key elements of Operating Services Agreement

Increased PSEG scope and control	Use of PSEG brand as PSEG Long Island	3-Year rate freeze (2013-2015)
Performance metrics	NY Department of Public Service oversight	Potential for "Utility 2.0" investment

Early performance

Successful transition to PSEG Long Island	Stakeholder communication	Winter storm response

SI-SSA-0015-10759

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-10760

Agenda

- Delivering Value
- Fleet Advantage, Location, Flexibility and Fuel Diversity
- Nuclear Operation
- Fossil Operation
- Financial Performance
- Expansion Opportunities
- Regulatory
- Engaged Workforce

SI-SSA-0015-10761

PSEG Power creating value by responding to changing markets and regulations

Safety/Environmental Focus Fleet Diversity/Efficiency Focus	Financial/Economic Focus	Regulatory Focus
• Nuclear units operated at over 90% capacity factors for the 9th consecutive year through 2013 • Fleet diversity across the dispatch curve and fuel types provide flexibility to meet changing conditions • Linden CCGT and Salem 2 nuclear unit achieved record output in 2013	• "Getting the most out of existing fleet" • Locational advantage • O&M control programs have delivered a CAGR of 1.6% between 2009 and 2014 • Sites offer competitive advantage for expansion	• Strong regulatory performance • Industry leadership in the changing business environment

SI-SSA-0015-10762

PSEG Power Delivering on priorities

Operational Excellence	• Maximize value of existing generating plants through implementation of the Operational Excellence Model (OEM) • Workforce engagement and development	• OEM implemented and achieving measures • Resource sharing program initiated
Financial Strength	• Deliver on Business Plan Commitments • Maintain competitive markets and improve constituent communication on issues important to Power	• Exceeded earnings guidance in 2013 • Ongoing effort in key markets showing success • Successful court outcome against subsidized generation
Disciplined Investment	• Successfully complete the Advanced Gas Path (AGP) uprates • Seek new opportunities in target markets (PJM, ISO-NE, NYISO) • Develop our renewables business (solar) • Maintain new nuclear option by successfully managing the Early Site Permit (ESP) process	• Accelerated schedule for AGP to maximize opportunity • LIPA contract for fuel and generation dispatch • Completed 19 MW solar project, 4 MW project under construction, established robust pipeline • Nuclear ESP is expected in 2015

SI-SSA-0015-10763

PSEG Power met 2013 challenges

Storm and weather challenges	+	Market challenges	=	Value delivered
• SuperStorm Sandy impacted our generating sites • Cold and hot weather extremes created challenging operating environment, but also presented opportunities		• Unit outages and planned transmission outages resulted in pressure on basis • Lower gas cost impacted dark spread pressuring coal unit dispatch • Load impacted by economy		• Optimized unit dispatch across fleet during storm recovery • Expedited return from storm outages, restored margin opportunities • High availability when needed • Achieved fuel cost savings • Captured value through coal/gas switching, unit flexibility • Coal & oil sales optimized inventory • Flexibility of portfolio captured real-time basis opportunities

SI-SSA-0015-10764

PSEG Power exceeded 2013's earnings guidance

OPERATING EARNINGS FOR PSEG POWER IN 2013; SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS. *ASSETS TRANSFERRED TO POWER AT YEAR-END 2013.

SI-SSA-0015-10765

PSEG Power has generating assets

in three competitive markets

- Assets near loads
- Low cost portfolio
- Fuel flexibility with gas cost advantage
- Poised to benefit from volatility in real-time markets
- Fleet will maintain diversity and efficiency after HEDD
- Most sites suitable for expansion

SI-SSA-0015-10766

PSEG Power will maintain diversity and efficiency after a realignment of the fleet due to HEDD

Objective 2013 → 2017

- Maintain fuel diversity
- Maintain load-serving capability
- Maintain low cost structure
- Environmental improvement
- Peach Bottom (PB) uprate
- Advanced Gas Path (AGP)
- Kalaeloa and Solar transfer adds ~200MW of capacity

Fuel Diversity

Energy Produced

SI-SSA-0015-10767

Power's PJM assets along the dispatch curve reduce the risk of serving full requirement load contracts and can take advantage of volatile market conditions

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel flexibility for >60% of fleet

SI-SSA-0015-10768

PSEG Power Nuclear is a critical element of our success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

• Operated by PSEG Nuclear
• PSEG Ownership: 100%
• Technology: Boiling Water Reactor
• Total Capacity: 1,178 MW
• Owned Capacity: 1,178 MW
• License Expiration: 2046
• Next Refueling
  • Spring 2015
	• Operated by PSEG Nuclear
	• PSEG Ownership: 57%
	• Technology: Pressurized Water Reactor
	• Total Capacity: 2,365 MW
	• Owned Capacity: 1,358 MW
	• License Expiration: 2036 and 2040
	• Next Refueling
	  • Unit 1 -- Fall 2014
	  • Unit 2 – Spring 2014
		• Operated by Exelon
		• PSEG Ownership: 50%
		• Technology: Boiling Water Reactor
		• Total Capacity: 2,251 MW
		• Owned Capacity: 1,125 MW
		• License Expiration: 2033 and 2034
		• Next Refueling
		  • Unit 2 – Fall 2014
		  • Unit 3 – Fall 2015
		• Uprate: 130 MW in 2015/2016

SI-SSA-0015-10769

PSEG Power Nuclear is core to the fleet and has competitive advantages

- Continued strong nuclear operations: nine consecutive years of >90% capacity factor
- Significant earnings contributor
- Top quartile of cost performance/MWh
- One third new staff, recruitment of the best new and experienced talent, and attractive training program
- Fukushima action plan in response to NRC staff review
  - ✓ FLEX* plan submitted with implementation starting with Fall outage
- Peach Bottom extended power uprate, 130 MW Power's share, scheduled in service 2015/2016
- Active and influential participation at INPO, NEI, EPRI, USA Alliance

SI-SSA-0015-10770

*STRATEGY KNOWN AS THE "DIVERSE AND FLEXIBLE MITIGATION CAPABILITY" OR FLEX, ADDRESSES RECOMMENDATIONS OF THE NUCLEAR REGULATORY COMMISSION'S FUKUSHIMA TASK FORCE.

Power's nuclear fleet is well positioned

with significantly lower-than-average US cost structure

*SOURCE: ELECTRIC UTILITY COST GROUP

SI-SSA-0015-10771

PSEG Power's Fossil Fleet Performance

has shown improvement

- Fossil Capacity Factor rebounded with market
- Peaking Units maintain high start success

- Coal EFORp improving
- CC EFORp less than 1% in 2013
- Consistent recipient of EFORp payments

SI-SSA-0015-10772

PSEG

*LM6000 AND 7EA UNITS

PSEG Power improvements achieved in combined cycle fleet efficiency

Combined Cycle Operating Heat Rate

Actions Taken to Create Value

- Operational Excellence Model
- Training programs
- Unit testing initiative
- Outage work to restore efficiency
- Second gas line at BEC

- Heat rate improvement 2008-2013 translates to meaningful fuel savings at current market prices

- Advanced Gas Path (AGP) investments 2014 through 2018 to provide additional fuel savings

SI-SSA-0015-10773

Investing to expand CCGT capacity and improve efficiency

PSEG Power - CCGT Uprate Project

- Expand Power's CCGT fleet, one of the largest gas-fired portfolios in PJM, with incremental base and peaking MWs
- Retrofit Bergen, Linden and BEC with Advanced Gas Path (AGP) components at cost of ~$120M over 2014 - 2018

AGP Project Benefits

- ✓ CCGT capacity uprates of ~150 MW:
  - Linden (63 MW – Completed)
  - Bergen (31 MW – 2015)
  - BEC (58 MW – 2017-2018)
- ✓ Increases Efficiency - Combined Cycle (CC) heat rate improvement ~ 1.2%
- ✓ Upgrades technology and extends maintenance outage cycles

SI-SSA-0015-10774

PSEG Power's fleet is among the lowest emitting in the industry

- Mercury reduced 80% across the timeframe above
- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- Cost control through testing coordination program

SI-SSA-0015-10775

PSEG Power's capital expenditures for environmental requirements are essentially complete*

*BASED ON CURRENTLY KNOWN AND QUANTIFIABLE ENVIRONMENTAL REQUIREMENTS. E=ESTIMATE

SI-SSA-0015-10776

PSEG Power is well-positioned for growth when market conditions warrant

Available locations		Our sites possess infrastructure advantages
• Bergen • Burlington • Essex • Edison • Kearny	• Hudson • Linden • Sewaren • Bridgeport Harbor	• Electric Transmission Interconnections • Access to Gas Pipelines • Space • Emissions

SI-SSA-0015-10777

PSEG Solar Source owns 92 MW of operating solar facilities*

Hackettstown (Mars)
New Jersey (2 MW)
COD September 2009
Thin film panels – fixed tilt
Investment $13 million
15 year PPA with Mars, Inc.

Queen Creek
Arizona (25 MW)

SI-SSA-0015-10782

PSEG Power: Enjoys real and sustainable advantages in the merchant generation space

Market Review

- Gas, Power, Spark Spreads
- Regulatory construct

PSEG's Competitive Advantage

- Fuel flexibility
- Heat Rate diversity
- Access to Marcellus Shale gas
- Asset flexibility

PSEG's Sustainable Advantage

- Positive cash-flow hedging into the long-term
- Robust capacity market pricing in most concentrated load pocket in US
- Long-term access to discounted Marcellus gas

SI-SSA-0015-10783

Market Review: Prices have stabilized

- Energy and gas prices appear to have stabilized
- Environmental restrictions may tighten market
- Insufficient gas infrastructure continues to place upward pressure on fuel prices during seasonal peaks

SI-SSA-0015-10784

F=FORWARDS AS OF 12/31/2013

Market Review: New generation in PJM not keeping pace with coal retirements

Cumulative Generation Retirements*

Forecast Reserve Margin (PJM January 2014)

- PJM forecasts a declining Reserve Margin through 2018, which may improve forward prices
- Brattle estimates energy prices could rise at least $3-4/MWh from today's prices

SI-SSA-0015-10785

PSEG

*PJM AS OF FEBRUARY 20, 2014
SOURCE OF CHART DATA: PJM

Market Review: Regulatory framework showing signs of improvement

	ISSUE / POLICY	REGULATORY GAINS
PJM	SUBSIDIZED GENERATION (NJ and MD)	• Comprehensively defeated in federal court (appeals currently pending)
	DEMAND RESPONSE RULES	• PJM and ISO-NE enacted stricter rules of eligibility and deployment
	ENERGY PRICE FORMATION	• Concerted drive to improve price formation for generation and ancillary services • Waiver of price caps during extreme market conditions
NYISO	TRANSMISSION	• Significant progress made to relieve bottling of upstate generation
ISO-NE	CAPACITY	• Improvement in price formation to better reflect tight supply conditions • Implementation of sloping demand curve in Forward Capacity Auction (FCA) 9
	ENERGY	• Demand response required to participate in Day Ahead markets
FEDERAL	GAS to ELECTRIC	• Better coordination between pipelines and ISO's will promote efficiency
	ENVIRONMENTAL REGULATIONS	• HEDD, HAPS/MACT may lead to tightening of supply in 2015+ timeframe

SI-SSA-0015-10786

Competitive Advantage: Heat Rate Diversity & Flexible Dispatch

SI-SSA-0015-10787

Competitive Advantage: PSEG's extensive gas asset portfolio gives unparalleled access to Marcellus Shale gas

SI-SSA-0015-10788

Competitive Advantage: ~25% of Power's gas for generation comes from Marcellus

- Our combined cycle and peaking assets have been able to take advantage of locational gas price volatility driven by production and logistical constraints
- Lower cost shale supply provides additional savings during periods of lower residential gas demand

SI-SSA-0015-10789

Competitive Advantage: Locational advantage from short term basis volatility

PS Zone Annual Basis to PJM-W

PS Zone Day Ahead On Peak Monthly Basis to PJM-W

- Annual basis benefits baseload units
- Intermediate units flexible to seasonal opportunities
- Combined Cycle and Peaking units positioned to optimize daily and hourly volatility

PS Zone Real Time On Peak Hourly Basis to PJM-W

ANNUAL FORWARD BASIS TO PJM-WEST AS OF 12/31/2013.

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on January 7, 2014

On Peak Basis to PJM-W on January 7, 2014

Hourly Generation and Load on January 7, 2014

- High gas market at $58/MMbtu setting power prices in PS zone on 1/7/14
- Higher basis to generation
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional steam and peaking generation available above day ahead commitment to gain value from real time market
- Fuel flexibility with coal/gas/oil optionality among available units

SI-SSA-0015-10791

Competitive Advantage: Trading & Asset Flexibility

PSEG Zone LMP's on July 18, 2013

On Peak Basis to PJM-W on July 18, 2013

Hourly Generation and Load on July 18, 2013

- High demand in constrained northern NJ
- Base load and load following generation sufficient to cover load and hedge obligations
- Additional generation available above obligations to gain value from real time market spikes
- Gas advantage in procuring low cost shale supply to capture savings

SI-SSA-0015-10792

Sustainable Advantage: BGS Auction provides excellent opportunity to forward hedge our generation

BGS sales account for about a quarter of our forward portfolio of hedges

SI-SSA-0015-10793

$/MWH; BGS PRICES REFLECT PSE&G ZONE; RESULTS FOR 2012-2014 WILL BE THE NEW BLENDED PRICES BEGINNING JUNE 1, 2014.

Sustainable Advantage: Hedging strategy designed to protect gross margin while leveraging the portfolio

		Apr-Dec 2014	2015	2016
Base Load (Nuclear and Base Load Coal)	Volume TWh	26	35	36
	% Hedged	100%	75-80%	35-40%
	Price $/MWh	$49	$51	$51
Intermediate Coal, Combined Cycle, Peaking	Volume TWh	18	21	19
	% Hedged	30-35%	0%	0%
	Price $/MWh	$49	$51	$51
Total	Volume TWh	42-44	54-56	54-56
	% Hedged	70-75%	50-55%	25-30%
	Price $/MWh	$49	$51	$51

Forecast output: Increased to reflect improvement in economic dispatch

SI-SSA-0015-10794

PSEG

HEDGE PERCENTAGES AND PRICES AS OF MARCH 31, 2014. REVENUES OF FULL REQUIREMENT LOAD DEALS BASED ON CONTRACT PRICE, INCLUDING RENEWABLE ENERGY CREDITS, ANCILLARY, AND TRANSMISSION COMPONENTS BUT EXCLUDING CAPACITY. HEDGES INCLUDE POSITIONS WITH MTM ACCOUNTING TREATMENT AND OPTIONS. EXCLUDES SOLAR AND KALAELOA.

Sustainable Advantage: PJM's capacity market continues to recognize locational value

RPM Auction Results					
($/MW-day)	2013 / 2014*	2014 / 2015*	2015 / 2016*	2016 / 2017*	2017 / 2018
Power's Average Prices	$242	$166	$166	$166	**$165**

Power's Cleared Capacity (MW)	10,890	10,710	9,210	8,610	**~8,700**

2017/2018 RPM Auction Influenced By:

- Updated Demand Curve
- Environmental Retirements
- Minimum Offer Price Rule
- Updated Transfer Capabilities
- New Build/Cost of New Entry
- Demand Response

SI-SSA-0015-10795

PSEG

*PSEG POWER'S AVERAGE PRICES AND CLEARED CAPACITY (MW) REFLECT BASE AND INCREMENTAL RPM AUCTION RESULTS. DELIVERY YEAR RUNS FROM JUNE 1 TO MAY 31 OF THE NEXT CALENDAR YEAR.

Sustainable Advantage: Fuel advantage continues throughout the curve

Forward curve shows that Marcellus shale supply averages over $1.50/MMbtu discount year-round through 2018

SI-SSA-0015-10796

2013 AVERAGE 6/1/13-12/31/13; F= FORWARDS AS OF 12/31/13. LEIDY BASIS FROM ICE/BROKER QUOTES

PSEG Power's Value Proposition

- Well-positioned fleet of merchant generating assets concentrated in PJM market
- Advantaged by low cost structure, fuel diversity and dispatch flexibility
- Low environmental capital requirements
- Capacity uprates to enhance value of nuclear and combined cycle stations
- Consistent hedging strategy recognizes asset flexibility
- Continue to meet commitments and to provide free cash flow

PSEG FINANCIAL REVIEW & OUTLOOK

PSEG

We make things work for you.

SI-SSA-0015-10798

Strong financial position to support our business initiatives

2013 Financial Position

- ✓ Exceeded upwardly revised 2013 earnings guidance
- ✓ Pension fully funded
- ✓ Strong balance sheet and upgraded credit ratings

2014 and Beyond

- ✓ Continued positive earnings trend in 2014
- ✓ Controlled O&M growth
- ✓ Balance Sheet and Cash Flow support investments without equity issuance
- ✓ Growth in PSE&G investments with contemporaneous returns
- ✓ Diversified Power assets with a balanced hedge profile
- ✓ Growth in PSE&G Cash from Operations, with continued significant Cash from Operations/FFO at Power
- ✓ Increased Dividend by $0.04 to indicative annual rate of $1.48 for 2014
- ✓ Opportunity for consistent and sustainable dividend growth

SI-SSA-0015-10799

Exceeded upwardly revised guidance

in both businesses

*SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS.

NOTE: 2012 OPERATING EARNINGS RE-STATED FOR TRANSFER OF ASSETS FROM PSEG HOLDINGS TO PSEG POWER.

In 2013, Power had significant free cash flow

SI-SSA-0015-10801

In 2013, PSE&G invested over $2B, using $1.4B of internally generated cash flow and debt, while maintaining its capital structure

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.

SI-SSA-0015-10802

In 2013, Power's Free Cash Flow supported PSE&G's capital program and shareholder dividend

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$220 MILLION.
(2) OTHER CASH FLOW INCLUDES HOLDINGS NET CASH FLOW AND PARENT CASH.

SI-SSA-0015-10803

PSEG growth spend, including Energy Strong, of ~$6.4B represents ~76% of total investment

E = ESTIMATE; CAPITAL INCLUDES AFUDC AND IDC.

SI-SSA-0015-10804

PSE&G's Capital Program drives double-digit growth in rate base and earnings over the 2013 to 2016 period

SI-SSA-0015-10805

PSE&G's Cash from Operations and Power's Free Cash Flow support growth investments without the need for new equity

(1) PSE&G CASH FROM OPERATIONS ADJUSTS FOR SECURITIZATION PRINCIPAL REPAYMENTS OF ~$500M FROM 2014-2016
(2) OTHER CASH FLOW INCLUDES PSEG LI, HOLDINGS NET CASH FLOW, CASH, AND SHORT TERM DEBT
E = ESTIMATE

SI-SSA-0015-10806

Power's key credit metric supports incremental investment opportunities

- Increased contribution to earnings from the more stable regulated business allows us to reset Power's FFO/Debt threshold from 35% to 30%, providing additional financial flexibility
- Power's annual Cash From Operations and Funds From Operations each average ~$1.1B over the 2014 to 2016 period supported by:
  - Capacity Revenues
  - Hedged Generation
  - O&M Control
- Financial strength can be used to pursue future growth in both businesses beyond current plans

SI-SSA-0015-10807

Pension: Our Long Term Asset allocation strategy resulted in a ~17% increase in pension assets during 2013

PBO Funded Ratio	83%	Fully Funded Pension →	106%

SI-SSA-0015-10808

Our Pension Management is expected to result in pension income in 2014 and over the planning horizon

SI-SSA-0015-10812

PSEG Summary

- Our 2013 earnings of $2.58 exceeded our upwardly revised operating earnings guidance of $2.40 - $2.55 per share
- Double digit earnings growth at PSE&G on one and three year basis from 2013 to 2016, driven by transmission investments and approved programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support full capital program and new potential opportunities without the need for equity
- Long history of returning cash to the shareholder through the common dividend, with opportunity for consistent and sustainable growth

Forward-Looking Statements

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words “anticipate,” “intend,” “estimate,” “believe,” “expect,” “plan,” “should,” “hypothetical,” “potential,” “forecast,” “project,” variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or ongoing low pricing of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulations, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators, including prudency reviews, disallowances and changes in authorized returns,
- any deterioration in our credit quality or the credit quality of our counterparties,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations or increase the cost of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- delays or unforeseen cost escalations in our construction and development activities, or the inability to recover the carrying amount of our assets,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- increases in competition in energy supply markets as well as for transmission projects,
- changes in technology, such as distributed generation, storage and micro grids, and greater reliance on these technologies,
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- an extended economic recession,
- an inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce, and
- changes in the credit quality and the ability of lessees to meet their obligations under our domestic leveraged leases.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Operating Earnings exclude gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and material one-time items. Adjusted EBITDA excludes the same items as our Operating Earnings measure as well as income tax expense, interest expense, depreciation and amortization and major maintenance expense costs at Power's fossil generation facilities. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to Operating Earnings and Adjusted EBITDA with a reference to that slide included on each of the slides where the non-GAAP information appears.

Management uses Operating Earnings and Adjusted EBITDA in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. The presentation of Operating Earnings and Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, Operating Earnings and Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of Operating Earnings and Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

PSEG STRATEGY: GROWING A HIGH-QUALITY, LOW-RISK ENERGY INFRASTRUCTURE COMPANY

Dan Cregg

EXECUTIVE VICE PRESIDENT AND
CHIEF FINANCIAL OFFICER

PSEG

We make things work for you.

SI-SSA-0015-10833

Two strong businesses

A stable platform, each with growth opportunities

PSEG

PSE&G	PSEG Power LLC
Electric & Gas Delivery and Transmission	**Regional Competitive Generation**
Strategy: Investments aligned with public policy and customer needs **Value Proposition:** A ~$12 billion infrastructure program producing high single digit rate base growth through 2020	**Strategy:** Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity **Value Proposition:** Provides substantial free cash flow in current environment and upside from market rule improvements
2015 **Assets $24B** **Operating Earnings $787M**	2015 **Assets $12B** **Operating Earnings $653M**

SI-SSA-0015-10834

ASSETS AND OPERATING EARNINGS ARE FOR THE YEAR ENDED 12/31/2015. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO PARENT AND PSEG LONG ISLAND ACTIVITY. SEE SLIDE A FOR ITEMS EXCLUDED FROM INCOME FROM CONTINUING OPERATIONS/NET INCOME TO RECONCILE TO OPERATING EARNINGS

PSEG's Strategy

Investment program delivering results

Operational Excellence: Maintaining reliability and improving performance as we control costs in low price environment

Financial Strength: Strong financial position supports investment program and dividend growth

Disciplined Investment:
- Balanced business mix
- Robust pipeline of opportunities

Results:
- 3rd year of Operating EPS* growth
- Continued dividend growth
- Best in class utility growth rate
- Addition of efficient CCGT capacity enhances market position

SI-SSA-0015-10835

* SECOND YEAR OF EPS GROWTH.

Delivering on commitments and realizing growth

Operational Excellence	• PSE&G: ReliabilityOne Mid-Atlantic Region's Most Reliable Electric Utility (14th consecutive year), Electric Light & Power's 2015 Utility of the Year, ReliabilityOne Outstanding Outage Response Time and Outstanding Customer Engagement • PSEG Power: Record output from combined cycle units • PSEG Long Island: Improved customer service and reliability while managing costs • PSEG: Cost-control benefits continue
Financial Strength	• Operating earnings for 2015 of $2.91 per share at upper end of guidance range • Cash flows and business mix support strong credit ratings and ability to fully fund robust investment pipeline without issuing new equity • Increased dividend in 2015
Disciplined Investment	• PSE&G capital program drives continued rate base growth over the 5-year period (2016-2020) with increased investment in Transmission, Energy Strong, Gas System Modernization Program, and Electric and Gas distribution • Power capital program focusing on growth investments including Keys, Sewaren and Bridgeport Harbor, Nuclear and Fossil uprates, PennEast Pipeline, and Solar Source

SI-SSA-0015-10836

Focus on building a reliable, efficient, clean energy infrastructure

2011	2012	2013	2014	2015

Selected Accomplishments

2011
- Expanded investment programs focused on infrastructure upgrades, energy efficiency, and major transmission projects*
- Sale of Texas generating assets
- Nuclear license extensions and uprates

2012
- Award winning Superstorm Sandy storm response restoring 2.1M customers
- Final federal approval for Susquehanna-Roseland transmission project
- 400 MW of new peaker capacity**

2013
- Expanded Solar investment
- 90% nuclear capacity factor for 9th straight year
- Record output from Linden CCGT and Salem 2 Nuclear Unit

2014
- Energy Strong program approved
- Advanced Gas Path uprates (through 2018)
- PSEG Long Island management contract effective

2015
- Gas System Modernization Project (GSMP) and Energy Efficiency Extension II approved
- New generation build starts Power fleet transformation
- Solar Source portfolio reaches 277 MW_{DC}***

← Cost Control →

PSEG

* INVESTMENT CONTINUED FOR SUSQUEHANNA-ROSELAND, BURLINGTON-CAMDEN, NORTH CENTRAL RELIABILITY, AND STARTED FOR NORTHEAST GRID AND MICKLETON-GLOUCESTER. ** KEARNY AND NEW HAVEN. *** AS OF MARCH 2016.

Growth in capital spending aligned with customer needs

PSEG Capital Spending

2011 – 2015: ~$14.3 Billion | **2016E – 2020E*: ~$16.0 Billion**

*INCLUDES ALL PLANNED SPENDING. **POWER CAPITAL SPENDING EXCLUDES NUCLEAR FUEL. ***INCLUDES PENNEAST PIPELINE EQUITY INVESTMENT OF $0.1B. E=ESTIMATE.

SI-SSA-0015-10838

Building an efficient, clean, reliable energy platform

Timeframe	Actions taken
2011 – 2015: Transformed business mix	• Applied ~$14.3 billion towards investments • Improved credit ratings • Monetized Energy Holdings' portfolio • Strong balance sheet sustained during period of low power prices, while increasing the dividend
2016 – Forward: Strong financial position supports continued growth	• Continued dividend growth in 2016 • ~$16 billion investment program through 2020 • Utility investments focused on improving reliability and replacing aging infrastructure • Continued investment in reliable and efficient energy infrastructure at Power • Financial capability supports further expansion of the current capital plan

SI-SSA-0015-10839

PSE&G's investment program

Meeting public policy goals and customer needs

SI-SSA-0015-10840

PSEG

* DISTRIBUTION RATE BASE INCLUDES SOLAR AND ENERGY EFFICIENCY

Managing the total costs to customers while investing in the system

PSE&G Typical Residential Customer Bills*

- PSE&G customers' combined electric and gas bills declined 28% over the period
- Low gas prices and elimination of transition charges drove rate decreases

SI-SSA-0015-10841

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE

Transforming Power's fleet to maintain strong market position

Economic Drivers	Outlook	Combined Cycle	Nuclear	Scrubbed Coal	Peakers	Renewable
Energy Margins	• Low natural gas and energy prices • Robust portfolio of gas pipeline contracts	✓	✓	✓	n/a	n/a
Capacity Markets	• Tightened rules proposed for capacity performance	✓	✓	✓	✓	n/a
Environmental Regulations	• Tighter air emissions standards	✓	✓	✓	✓	✓
Location	• Assets in well-designed markets, premium regions • Opportunities on brownfield sites	✓	✓	✓	✓	n/a
2016 - PSEG Power Total Capacity 11.9 GW		3.3	3.7	2.4	2.3	0.2
2019 - PSEG Power Total Capacity 13.5 GW *		5.3	3.8	2.4	1.8	0.2

- **Largest nuclear site** in the eastern U.S. and ownership in **large, fully scrubbed coal facilities** at Keystone and Conemaugh provide **economies of scale** that enhance energy margins in current low market, and provide for upside potential if prices improve
- **Dual fuel peakers** meet reliability criteria in capacity markets and provide option value in energy market. Opportunity exists to repower peakers that do not meet NJ HEDD environmental regulations
- **Combined cycle units Keys and Sewaren expected to be operational in 2018, and Bridgeport 5 expected to be operational in 2019,** will enhance emissions performance and have a combined average heat rate of approximately 6,600

SI-SSA-0015-10842

PSEG

*AS OF FEBRUARY 2016 APPROXIMATELY 1.8 GW OF CCGT GENERATION UNDER DEVELOPMENT – KEYS, SEWAREN 7 AND BRIDGEPORT HARBOR 5 , WHICH ARE TARGETED TO GO INTO SERVICE IN 2018/2019 ALONG WITH RETIREMENT OF OLDER SEWAREN UNITS.

Operating Earnings

Disciplined investment program and focus on operational excellence have supported growth

Power's diverse fuel mix and dispatch flexibility continue to generate strong earnings and free cash flow in low price environment

PSE&G's investment program has resulted in an increased contribution to PSEG's earnings

Focus areas over the business plan horizon

PSE&G

- **Operational excellence and cost control**
- **Capital program execution** – Transmission, Energy Strong and GSMP program
- **Regulatory framework** – Advocate for regulatory framework that provides support for long-term infrastructure programs
- **Continue to develop incremental growth opportunities**

PSEG Power

- **Operational excellence and cost control**
- **Timely and on budget construction of new growth opportunities** – Keys Energy Center, Sewaren 7 and Bridgeport Harbor
- **Strong performance at Nuclear and Fossil** to maximize fleet value in dynamic markets
- **Advocacy of constructive market rules** - Capacity markets and environmental regulations

PSEG Long Island

- **Continue execution** – Achievement of performance metrics

SI-SSA-0015-10845

PSEG's Value Proposition

- A stable platform with predictable earnings and a robust investment pipeline
- PSE&G – Best in class utility performance and growth profile
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Strong balance sheet – Supports stable credit rating, growth objectives and the potential for consistent and sustainable dividend growth

SI-SSA-0015-10846

PSE&G strategy

Building a sustainable platform that balances reliability, customer rates and public policy to ensure growth at reasonable returns

SI-SSA-0015-10849

PSE&G's focus on meeting customer reliability and policy objectives are key to our investment strategy

2011	2012	2013	2014	2015

Selected Accomplishments

2011
- NJ Capital Infrastructure Program 2
- Energy Efficiency extension
- Major Transmission capital projects*
- Hurricane Irene/ October Snowstorm
- Mid-Atlantic ReliabilityOne Award

2012
- Hurricane Sandy storm response (2.1M customers restored)
- Transmission: Final federal approval for Susquehanna-Roseland (S-R) project
- National ReliabilityOne Excellence Award
- Mid-Atlantic ReliabilityOne Award
- EEI's Emergency Response Award

2013
- Solar Loan III
- Solar 4 All Extension
- Energy Strong program filed
- Mid-Atlantic ReliabilityOne Award
- Award for Outstanding Response to a Major Event

2014
- Energy Strong approved
- Transmission: North Central Reliability and Burlington-Camden projects placed in-service
- Bergen-Linden Corridor Upgrade project investment started
- Mid-Atlantic ReliabilityOne Award

2015
- Gas System Modernization Project (GSMP)
- Energy Efficiency Extension II
- Transmission: S-R and Mickleton-Gloucester projects placed in-service
- Mid-Atlantic ReliabilityOne Award
- Recognized for customer satisfaction by J.D. Power for both large electric and gas business service in the East

← Cost Control →

SI-SSA-0015-10850

PSEG

* INVESTMENT CONTINUED FOR SUSQUEHANNA-ROSELAND, BURLINGTON-CAMDEN, NORTH CENTRAL RELIABILITY, AND STARTED FOR NORTHEAST GRID AND MICKLETON-GLOUCESTER

Building on our track record

Operational Excellence

- Strong reliability record, with plans for further improvement
- Cost control efforts

Financial Strength

- Meeting or exceeding earnings targets
- Maintain solid investment grade credit ratings

Disciplined Investment

- 14 investment programs approved over past seven years
  - ✓ Infrastructure focused
  - ✓ Policy alignment – across administrations – Solar, EE and other
- Win-Win: Job creation, environment benefits, low commodity prices, low interest costs, labor availability, federal tax benefits

SI-SSA-0015-10851

Operational Excellence

Reliability and Customer Service

- Named most reliable electric utility in the Mid-Atlantic region for 14th consecutive year
- Recognized by PA Consulting with the Outstanding Customer Engagement and Outstanding Outage Response Time awards
- Named 2015 Utility of the Year by Electric Light & Power Magazine
- Received Star of Energy Efficiency Award

SI-SSA-0015-10852

Achieved ~11% annual earnings growth

over the past four years through implementation of supportive rate mechanisms on our expanded capital program and cost control

SI-SSA-0015-10853

Receive contemporaneous recovery on over 70% of our investments

2011-2015 PSE&G Capital Spending by Recovery Method

PSEG Power strategy

Excellence in operating our units safely, reliably, cost-competitively and in an environmentally, responsible manner

SI-SSA-0015-10871

Focus on transforming Power's portfolio with reliable, efficient, and cleaner energy infrastructure

2011	2012	2013	2014	2015

Selected Accomplishments

2011
- Hope Creek set annual output record
- Nuclear license extensions and uprates achieved

2012
- Peach Bottom 3 set annual output record
- Additional 400 MW of new peaker capacity at Kearny and New Haven
- Superstorm Sandy recovery initiated

2013
- Record annual output from Linden CCGT and Salem 2 Nuclear Unit
- 90% + nuclear capacity factor for 9th straight year
- Bethlehem Energy Center, 2nd gas pipeline connection added

2014
- Record annual output from Bergen CCGT
- PennEast pipeline investment
- CCGT Advanced Gas Path (AGP) uprate investment completed at Linden 1 & 2, 63 MW
- Established PSEG Long Island fuel management operations for 2015 start-up

2015
- Record CCGT fleet annual output
- Continued growth in fleet with 1,300 MW new CCGT's announced
  - Keys
  - Sewaren 7
- Prepared successful bid for 485 MW Bridgeport Harbor 5
- Projects Completed:
  - Peach Bottom EPU, 130 MW
  - Bergen 2 AGP uprate, 31 MW
- HEDD retirement
- Solar portfolio reaches 277 MW_{DC} as of March 2016

Cost Control

SI-SSA-0015-10872

Total GWh: 55,213

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

* EXCLUDES SOLAR AND KALAELOA.

**INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

SI-SSA-0015-10873

Power investing $2 billion of capital in new capacity

SI-SSA-0015-10874

E=ESTIMATE. DATA AS OF MARCH 2016

Power's PJM assets are becoming more efficient

	Base Load Units	Load Following Units	Peaking Units
Energy Revenue	X	X	X
Capacity Revenue	X	X	X
Ancillary Revenue		X	X
Dual Fuel		X	X

- Base Load ensures cash flow certainty
- Load Following provides ability to serve load shape
- Readiness for Capacity Performance (CP), successful in CP auction

- Peaking takes advantage of real-time prices and reduces operational risk
- Dual fuel capability at 87% of load following and peaking units

SI-SSA-0015-10875

PSEG

* KEYS & SEWAREN 7 TO BE ADDED TO DISPATCH IN 2018E AND SEWAREN 1-4 WILL RETIRE.

PSEG Power has generating assets in three competitive markets

- Assets located near load
- Low cost portfolio with gas cost advantage
- Positioned to benefit from volatility in real-time markets
- Fleet meets new capacity performance standards
- 1,800 MW of new CCGT capacity under construction in PJM and ISO-NE

SI-SSA-0015-10876

PSEG Power developing 1,800 MW of new, efficient CCGT capacity in MD, NJ and CT

- Constructing the 755 MW CCGT Keys Energy Center in Maryland (SWMAAC*) at an estimated cost of $825 to $875 million
- Constructing a new 540 MW CCGT unit, Sewaren in New Jersey (EMAAC*) at a cost of $625 to $675 million which will replace older Sewaren units
- Constructing a new 485 MW CCGT unit, Bridgeport Harbor 5 (ISO NE), at a cost of $525 to $575 million
- Both Keys and Sewaren 7 are targeted to be in-service in 2018 and Bridgeport Harbor 5 in 2019
- Expanding civic stewardship roles and programs in neighboring communities

*SWMAAC = SOUTHWEST/EMAAC = EASTERN MID-ATLANTIC AREA COUNCIL
LOCATIONAL DELIVERABILITY AREA WITHIN PJM.

SI-SSA-0015-10877

Power's fleet to be transformed with addition of Keys, Sewaren 7 and Bridgeport Harbor in 2018-2019

Projected Fleet Comparison 2015 to 2020E

*EXCLUDES SOLAR AND KALAELOA E = ESTIMATE **INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS.

SI-SSA-0015-10878

PSEG Power's fossil fleet expected to see improvements in efficiency

- AGP (Advanced Gas Path) investments
- CCGT material condition assessment
- Unit testing and testing coordination initiatives
- HEDD retirements
- Keys/Sewaren Combined Cycle Development (2018)
- Bridgeport Harbor 5 Combined Cycle Development (2019)
- Heat Rate Improvement converts to potential savings of $60-$65M in fuel expense (assuming $3/MB gas price)

SI-SSA-0015-10879

E = ESTIMATE

PSEG Power's fossil fleet …

Among the lowest emitting in the industry

- More efficient testing and improved operational flexibility through utilization of Continuous Emission Monitoring System testing
- With the addition of new units, emissions continue to improve

Expected to reduce its carbon footprint

- Carbon emission rates projected to steadily approach EPA national pollution standards for New and Reconstructed Natural Gas Combined Cycle (1,000 lbs CO_2/MWh-gross)

SI-SSA-0015-10880

Nuclear is a critical element of our success

Hope Creek	Salem Units 1 and 2	Peach Bottom Units 2 and 3

PSEG Power's Growth Investments

Site	Project	Estimate ($ Millions)	Benefits	Status
Peach Bottom	Peach Bottom EPU (2014 – 2015)	$403	Increased capacity: 130 MW	PB2 & PB3 completed in 2015
Linden/ Bergen/ BEC	Advanced Gas Path Uprates (AGP): Linden -- 63 MW Bergen -- 31 MW BEC – 58 MW	$120	Increased capacity and improved heat rate: ~152 MW capacity increase ~1.2% heat rate improvement	Completed: Linden (2014) Bergen (2015) Planned: BEC 2017/2018E
Kearny 13 & 14	LM6000 Engine Throttle Push	--	Increased capacity: 14.5 MW	2016E
Maryland	Keys, 755 MW CCGT	$825 - $875	Geographic diversity within PJM; highly efficient gas fired unit in SWMAAC	2018E
Sewaren	Sewaren Unit 7, 540 MW CCGT	$625 - $675	Improved efficiency and reliability; replaces Sewaren 1-4 steam units	2018E
Bridgeport, CT	Bridgeport Harbor 5, 485 MW CCGT	$525 - $575	Highly efficient gas fired unit in ISO-NE	2019E
Eastern PA to Mercer, NJ	PennEast Pipeline	$123	Estimated Earnings in 2019: $13 million	Underway
Various	6 Solar Projects	$241	2016/2017E increase renewable capacity by 136 MW_{DC}/105 MW_{AC}	2016/2017E

Total New Capacity – 2,200 MW

E = ESTIMATE.

SI-SSA-0015-10882

A position in renewable energy – Power's Solar Source

Solar Source portfolio

- Utility scale solar projects in 12 states in operation or under construction
- Long-term PPA's with creditworthy counterparties
- Lump sum, full wrap EPC* agreements

Asset Optimization

- Maintain high equipment availability
- Minimize operating expenses
- Seek additional revenue streams

SI-SSA-0015-10883

* EPC = ENGINEERING PROCUREMENT & CONSTRUCTION. E = ESTIMATE.

PSEG Power has other attractive sources of revenues to round out a robust portfolio

Gas Asset Optimization

- Large wholesale provider to PSE&G and others
  - Storage capacity of approximately 75 Bcf (in the Gulf and market regions)
  - Firm transportation of 1.3 Bcf/day on seven pipelines
- Off-system sales margins shared with residential customers
- Commercial & Industrial gas sales

Ancillary Services – Black start, reactive power, area regulation

LIPA fuel and energy dispatch management – Began management of 10-year contract in 2015

Kalaeloa, HI – 50% equity interest in a 208 MW combined cycle oil unit

New Haven Peakers – 129 MW, rate based contract with ISO-NE

SI-SSA-0015-10884

PSEG Power has demonstrated ability to control O&M

Cost control actions taken:

- Fossil plant assessment
- CCGT material condition assessment
- Vendor contract renegotiations
- Nuclear security services brought in-house to control costs
- Nuclear maintenance productivity study
- Nuclear outage efficiency initiative
- Materials management
- Nuclear excellence initiative
- Nuclear staff – Right sizing

*EXCLUDES IMPACTS FROM STORM RECOVERY COSTS. E=ESTIMATE

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO OPERATING EARNINGS. E = ESTIMATE.
UPDATED AS OF JULY 29, 2016.

PSEG Power – Delivering on priorities

Operational Excellence

- Fuel and technology-diverse fleet produced 55 TWh, 2% higher than 2014
- Nuclear capacity factor exceeded 90%; output of 30 TWh, close to 30.3 TWh is third best ever, record set in 2009
- Production records set at BEC, Linden and the CCGT fleet in total; Kearny 13 & 14 CTs
- Successful implementation of LIPA contract for fuel / generation dispatch.

Financial Strength

- Achieved earnings guidance in 2015
- Cost control programs held O&M to a 0.8% CAGR between 2011 and 2016
- Successful ongoing effort to influence outcomes in key markets showing success, e.g., price formation

Disciplined Investment

- Completed Peach Bottom EPU and AGP at Bergen 2; AGP planned for BEC in 2017/2018
- Repositioning the fleet with three new CCGTs:
  - Keys (2018)
  - Sewaren 7 (2018)
  - Bridgeport Harbor 5 (2019)
- Solar Source's portfolio is 277 MW_{DC}

PSEG POWER
ER&T

SI-SSA-0015-10889

PSEG

We make things work for you.

Market Review: Markets in 2015 were affected by abnormal weather conditions

Q1: Periods of extremely cold temperatures resulted in high gas prices, significant basis differentials, and higher energy demand

Q2-Q4: A normal summer and mild December, combined with increased supply of gas, reduced energy prices and basis

SI-SSA-0015-10890

Market Review: YTD 2016 impacted by weather but forward gas and electric prices retain seasonal volatility

SI-SSA-0015-10891

Market Review: PSEG's extensive gas asset portfolio provides unparalleled access to Marcellus Shale gas

- PSEG Power maintains a robust portfolio of pipeline and storage assets in the Mid-Atlantic
- Marcellus Shale gas production reached 18.8 BCF/day in 2015
- PSEG Power procured over 423 BCF in 2015 with approximately 50% going to PSE&G's utility gas customers
- PSEG Power's gas for generation was 150 BCF in 2015, of which >75% was supplied by Northeast Shale gas
- Severe financial stress among the natural gas producer industry is expected to reduce production growth until gas prices rebalance to higher levels
- Investment in the PennEast pipeline expected to provide more access to Marcellus for PSEG

SI-SSA-0015-10892

Market Review: Completion of new pipeline infrastructure expected to move significant quantities of Marcellus gas out of the region by 2018

Pipeline capacity grows significantly by 2018

- Significant amount of new pipelines have already been built and more are in the advanced planning and development stage through 2018
- Gas production and pipeline takeaway capacity estimated to reach equilibrium in 2018 timeframe based on new pipeline development

SI-SSA-0015-10893

Regulatory Framework: New capacity and energy market designs in PSEG's core markets will better reward reliable generation units

	ISSUE /POLICY	OUTCOME
PJM	CAPACITY	• Higher payments for enhanced reliability (Capacity Performance) and lower energy revenues have raised absolute and relative value of capacity
	ENERGY PRICE FORMATION	• FERC is driving ISO's to improve their pricing constructs and rules – NOPRs and RTO reports addressing critical price formation issues
	DEMAND RESPONSE RULES	• Stricter rules for eligibility and deployment; focus returns to wholesale reliability/comparability after U.S. Supreme Court (SCOTUS) ruling
	STATE INTERVENTION	• SCOTUS dismissed the Maryland and New Jersey appeals in April 2016 • Ohio PPAs: FERC rescinded the previously approved waivers of the affiliate transaction standards and will review the PPAs under the affiliate abuse standards
ISO-NE	CAPACITY	• Continued tightness in capacity markets • Zonal demand curves submitted for FERC approval (FCA 11) • Nuclear and coal units under pressure; closure of Pilgrim nuclear plant
	ENERGY	• Proposed gas pipelines are receiving regulatory approvals slowly • 5 minute interval LMP settlements and fast start pricing expected Q2 2017
NYISO	CAPACITY	• Retirement of Fitzpatrick and Ginna and Western steam plants tighten market, but NYPSC directed to develop a clean energy standard that recognizes the value of nuclear
	ENERGY	• Improvement in price formation during reserve shortage conditions
FEDERAL	ENVIRONMENTAL REGULATIONS	• CPP rules stayed by SCOTUS • Some states will still prepare implementation plans for 2020+ timeframe • New PJM DR rules requiring that BTM diesel-fired generation employ environmental controls

SI-SSA-0015-10894

PSEG Power's Portfolio: Our fleet is well positioned in key markets

Right Location

PSEG FINANCIAL APPENDIX

SI-SSA-0015-10927

PSEG Financial Highlights

Maintaining full-year 2016 Operating Earnings guidance of $2.80 - $3.00 per share*

- ✓ Reaching the upper end of our guidance range in 2016 will be difficult even with improvements seen in the power markets, expectations for warm summer weather, normal operations and management of O&M
- ✓ Focused on meeting customer needs for clean, reliable, efficient delivery of energy

Infrastructure Spend

- ✓ PSE&G capital spending on T&D for 2016 expected to top $3 billion
- ✓ PSE&G's Gas System Modernization Program (GSMP) and Energy Strong continue
- ✓ Keys and Sewaren CCGTs construction is on schedule and on budget
- ✓ PSE&G has identified more than $500 million of additional infrastructure spend over the current capital spending plan of $12 billion in the 2016-2020 period

Financial position remains strong

- ✓ Positive cash from Power and increasing cash flow from operations at PSE&G supports dividend growth and funds capital spending program without the need to issue equity
- ✓ Debt as a percentage of capitalization was 45% at June 30

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10937

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include a list of items excluded from Net Income to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of March 6, 2017.

These materials and other financial releases can be found on the PSEG website at www.pseg.com , under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss .

Power has generating assets in three competitive markets

- Major assets located near key load centers
- Constructing three new, efficient combined-cycle units
- Positioned to benefit from market volatility
- Additional generation assets:
  - Solar (326 MW_{DC}/257 MW_{AC})
  - Kalaeloa, HI (104 MW)

SI-SSA-0015-10942

*POWER ANNOUNCED RETIREMENTS OF HUDSON AND MERCER GENERATING STATIONS AS OF JUNE 1, 2017.

PSEG Regulatory and Policy focus

on mechanisms that provide customers clean, affordable, resilient energy supply

NJ Distribution Base Rate Proceeding

- True-up data from 2010 base rate case for known changes in customers usage, taxes, O&M and investments

Long-Term Infrastructure Investment Platform

- Seek extension of existing infrastructure programs, e.g., GSMP, and broaden investment platform

Preserve the Value of Nuclear Supply

- Pursuing legislative strategy to recognize the value of nuclear energy under terms and conditions that are affordable for customers and provide the proper incentives for long-term operation

Ensure Federal Regulatory and Policy Framework

- Advocate for rules that preserve benefits of competitive markets while also recognizing the value of clean energy, supply diversity and grid reliability

Extend and broaden Energy Efficiency

Utility of the Future

Electric Infrastructure

Life cycle programs, distribution automation, EV Charging

Gas Infrastructure

GSMP Acceleration and Resiliency

CNG Charging

Distributed energy resources

Solar 4 All, Microgrids, Batteries, Fuel Cells

Energy Efficiency

Hospitals, Municipalities, Universities, Low Income Programs, EE for All (Residential, Small C&I), AMI, Bill Education

Utility of the Future represents potential investment opportunity to sustain annual rate base growth rate

SI-SSA-0015-10950

PSE&G's capital spending drives high single-digit growth in rate base

E = ESTIMATE.

SI-SSA-0015-10951

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~28% over the 2009-2017 period
  - Also provided BGSS bill credits totaling ~$590 per customer since 2012
  - Low gas prices and elimination of transition charges drove rate decreases
- Regional price comparison** Gas is 2nd lowest and Electric is lower than average
- Investing at the Utility of the Future level – would take about a decade to equal the 2009 bill rates (adjusted for growth in CPI/disposable income)

SI-SSA-0015-10952

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF SEPTEMBER 1, 2016, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Power's fleet is being **transformed** with focus on improvement in efficiency

Projected Fleet Comparison 2016 to 2021E

2021E Fuel Diversity[1]
Total MW: 11,900

2016 Fuel Diversity
Total MW: 11,577

2021E Energy Produced[1]
Total GWh: 61,000

2016 Energy Produced
Total GWh: 51,510

- Gas
- Nuclear
- Coal**
- Oil
- Pumped Storage

Energy Produced increases by >18%

[1] REFLECTS ANNOUNCED EARLY RETIREMENT OF HUDSON AND MERCER UNITS IN MID-2017.
ALL PERIODS EXCLUDE SOLAR (257 MW_{AC}) CAPACITY AND KALAELOA (104 MW) CAPACITY / ENERGY PRODUCED.
**2016 COAL INCLUDES NEW JERSEY UNITS THAT FUEL SWITCH TO GAS. E= ESTIMATE.

Power's free cash flow improves as construction program ends, providing funding for growth

PSE&G
2017E – 2021E Capital Spending (1)

(1) CAPITAL INCLUDES IDC AND AFUDC. E = ESTIMATE.

Strong credit metrics provide substantial investment capacity for increased utility investment

Average Funds From Operations / Debt
2017E – 2019E

	Power	PSEG
Estimate	~40%	Low – 20's
Minimum Threshold	30%	High - teens

Total Incremental Investment Capacity

Incremental capacity invested in utility would be matched with utility debt

SI-SSA-0015-10955

E=ESTIMATE.

PSEG has demonstrated an ability to control O&M, with plans to reduce in 2017

SI-SSA-0015-10956

PSEG

(1) POWER EXCLUDES IMPACTS FROM STORM RECOVERY COSTS AND THE HUDSON / MERCER EARLY RETIREMENT WRITE-DOWN, DISTRIBUTION EXCLUDES ELECTRIC AND GAS BAD DEBT. E = ESTIMATE.

2017 Federal Tax Reform – PSEG is well positioned

Given positive non-utility contribution to earnings and a strong balance sheet, PSEG is well positioned for potential tax reform

Assumption	PSE&G	PSEG Power	PSEG Parent
Reduction of Corporate Tax Rate	Customer rates lowered with reduction in tax rate Return of excess deferred tax liability – impact on cash and rate base growth dependent on payback period	After-tax earnings and cash flow increase One-time non-cash earnings benefit from reduction in deferred tax liability	After-tax earnings and cash flow improve
100% Expensing of Capital Expenditures	Impact on rate base growth comparable to existing bonus depreciation rules	Cash flow improves	
Elimination of Deductibility of Interest Expense and Border Adjustment Tax	Change in cost anticipated to be passed through to customers	Well positioned given low debt balance Uncertainty on Border Adjustment Tax	Well positioned given low debt balance

SI-SSA-0015-10957

Opportunity for meaningful and sustainable dividend growth

SI-SSA-0015-10958

PSEG Summary

- 2016 Operating Earnings (non-GAAP) at upper end of revised guidance of $2.80 - $2.95 per share
- PSE&G capital spending provides high single-digit rate base growth for foreseeable future balanced between Transmission and Distribution
- Power expected to generate significant free cash flow following CCGT construction program and transformation to a more efficient generation fleet
- Strong balance sheet and cash flow support current capital program and new investment opportunities without the need for equity
- Our indicative $0.08 dividend per share increase for 2017 demonstrates meaningful and sustainable dividend growth given significant contribution from PSE&G earnings and Power's strong financial profile

SI-SSA-0015-10959

PSEG's Value Proposition

- A stable platform with a robust investment pipeline providing opportunity for growth
- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- Strong balance sheet – Financial strength supported by stable credit rating and investment profile supporting the potential for consistent and sustainable dividend growth

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC) including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations;
- the impact of pending and any future rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10965

GAAP Disclaimer

PSEG presents Operating Earnings and Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings and Adjusted EBITDA are non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. Non-GAAP Adjusted EBITDA excludes the same items as our non-GAAP Operating Earnings measure as well as income tax expense, interest expense and depreciation and amortization. The last two slides in this presentation (Slides A and B) include lists of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA with a reference to those slides included on each of the slides where the non-GAAP information appears.

Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results. Management believes non-GAAP Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating operating performance because it provides them with an additional tool to compare business performance across companies and across periods. Management also believes that non-GAAP Adjusted EBITDA is widely used by investors to measure operating performance without regard to items such as income tax expense, interest expense and depreciation and amortization, which can vary substantially from company to company depending upon, among other things, the book value of assets, capital structure and whether assets were constructed or acquired. Non-GAAP Adjusted EBITDA also allows investors and other users to assess the underlying financial performance of our fleet before management's decision to deploy capital. The presentation of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA is intended to complement, and should not be considered an alternative to, the presentation of Net Income, which is an indicator of financial performance determined in accordance with GAAP. In addition, non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA as presented in this release may not be comparable to similarly titled measures used by other companies.

Due to the forward looking nature of non-GAAP Operating Earnings and non-GAAP Adjusted EBITDA guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility. Guidance included herein is as of May 31, 2018.

These materials and other financial releases can be found on the PSEG website at www.pseg.com, under the Investors tab. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at http://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at http://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at http://investor.pseg.com/rss

PSEG STRATEGY: BUILDING A SUSTAINABLE, FINANCIALLY SOUND ENERGY INFRASTRUCTURE COMPANY

Ralph Izzo
CHAIRMAN, PRESIDENT AND
CHIEF EXECUTIVE OFFICER

PSEG
We make things work for you.

SI-SSA-0015-10967

PSE&G Represents 65% of Non-GAAP Operating Earnings
4.7% Increase in 2018 Common Dividend
Promoting Sound Energy Policy
115 Years Investing in NJ's Critical Infrastructure
5–Year Investment Program Provides Opportunity for 8%-10% CAGR in PSE&G Rate Base
PSEG

Two strong businesses with a track record of success

Electric & Gas Distribution and Transmission

Strategy: Investments aligned with public policy and customer needs

Value Proposition: A $12 Billion - $15.5 Billion infrastructure program expected to produce **8%-10%** annual rate base growth through 2022

2017	Assets $29B Net Income $973M Non-GAAP Operating Earnings* $963M

Regional Competitive Generation

Strategy: Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity

Value Proposition: Provides substantial free cash flow and upside from market rule improvements

2017	Assets $12B Net Income $479M Non-GAAP Operating Earnings* $505M

ASSETS AND NET INCOME ARE FOR THE YEAR ENDED 12/31/2017. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO ENTERPRISE / OTHER ACTIVITY. *SEE SLIDE A FOR A RECONCILIATION OF NET INCOME TO NON-GAAP OPERATING EARNINGS, SLIDE B FOR RECONCILIATIONS FOR PSE&G AND PSEG POWER.

SI-SSA-0015-10969

Strategic focus produced growth in non-GAAP Operating Earnings as regulated business contribution grew to ~65%

2012	PSEG 5-Year Capital Investment Program of $18 Billion*	2017

- ✓ Regulated annual Rate Base growth of 13% to $17 Billion
- ✓ Transmission has grown to 46% of Rate Base
- ✓ Efficient growth: O&M held flat
- ✓ Overall customer bill is down

$2.44	Non-GAAP Operating Earnings +4% per year	$2.93
43%	Regulated Net Income Contribution Increased	65%
$1.42	Common Dividend Per Share +4% per year	$1.72

*CAPITAL INCLUDES YEARS 2013-2017.

SI-SSA-0015-10970

Next Steps: Building on a successful and sustainable platform that meets the needs of customers and shareholders

2018	PSEG 5-Year Capital Investment Program $14B - $17B

- ✓ Investing $12 Billion-$15.5 Billion to upgrade New Jersey infrastructure and meet NJ's Clean Energy goals
- ✓ Minimizing risk/volatility of merchant generation
- ✓ Continued cost discipline in operations
- ✓ Maintaining high customer satisfaction levels
- ✓ Tax reform benefits customers and shareholders
- ✓ Financial strength remains a core operating principle

Rate Base	Expected 8%-10% Compound Annual Growth in Rate Base through 2022
$1.80	Opportunity for Consistent and Sustainable Growth in Common Dividend

SI-SSA-0015-10971

$12B-$15.5B investment program focused on grid modernization, reliability and clean energy

E = ESTIMATE.
HASHED PORTION OF THE CHART REPRESENTS PLANS FOR EXTENSION OF ENERGY STRONG (ES2) AND A CLEAN ENERGY FUTURE (CEF) PROGRAM.

SI-SSA-0015-10972

Expanded utility investment program of $12B - $15.5B provides opportunity for rate base growth of 8% - 10%

E = ESTIMATE.
HASHED PORTION OF THE CHART REPRESENTS PLANS FOR EXTENSION OF ENERGY STRONG (ES2) AND A CLEAN ENERGY FUTURE (CEF) PROGRAM.

SI-SSA-0015-10973

Power's generating assets mainly located in three competitive markets

- Power Ventures assets:
  - Solar (414 MW_{DC}/325 MW_{AC})
  - Kalaeloa, HI (104 MW)

- Major assets located near key load centers
- Constructing three new, highly efficient combined-cycle units
- Positioned to benefit from market volatility

SI-SSA-0015-10974

Power's fleet transformed with focus on improvement in efficiency

Projected Fleet Comparison 2017 to 2022E

[1] REFLECTS RETIREMENT OF HUDSON AND MERCER UNITS IN JUNE 2017
E=ESTIMATE

SI-SSA-0015-10975

Regulatory/legislative policy initiatives strengthen foundation for providing clean, affordable and resilient energy supply

Base Rate Case Provides Opportunity for Long-Term Rate Stability

- Decision expected in Q4 2018

NJ regulators endorse streamlined process supporting long-term investment

- GSMP II Approved; ES II Filing Shortly

NJ Advances Clean Energy Future

- PSEG Power will request NJBPU determination of eligibility for our NJ nuclear plants to receive Zero Emission Certificates
- PSE&G plans to accelerate investment in Energy Efficiency, Energy Storage and EVs

FERC/PJM Wholesale Market Reforms Underway

- Fast start pricing reform expected in 2018

SI-SSA-0015-10976

NJ Zero Emission Certificates (ZEC) support carbon free nuclear generation

- ✓ Legislation signed by New Jersey Governor Murphy on May 23
- ✓ Starts a 330-Day process – NJ Board of Public Utilities to determine eligibility and selection of nuclear plants eligible for ZECs
- ✓ Hope Creek and Salem produce >90% of NJ's carbon free generation, support ~6,000 jobs, and benefit fuel diversity and grid reliability

SI-SSA-0015-10977

Zero Emission Certificate (ZEC) Process

2018	2019	2020

Enacted May 23 (Day One)

November 2018 (Day 180), BPU issues Order establishing ZEC program

April 2019 (Day 330), BPU ranks applicants and selects plants to receive ZECs. Utilities begin purchasing ZECs for 'stub' period. Cash payment follows

During 'stub' period (end of energy year), ZECs earned through May 31

Within 90 days of May 31, cash payment occurs for ZECs earned during 'stub' period

June 2019, utilities purchase ZECs for new energy year, with cash payment within 90 days of the energy year ending May 31, 2020

Subsequent years work the same

Annual revenues estimated at ~$200 million, or ~$0.28 per share if all three NJ units are selected

SI-SSA-0015-10978

PSEG's future direction aligned with customer needs and NJ's Clean Energy agenda

2012-2017	2018 – 2022	Utility of the Future
Transmission expansion Storm hardening and resiliency New peaking generation and generation uprates Regulated & Unregulated Renewables	Upgrade aging infrastructure and Transmission Storm hardening and resiliency New, efficient CCGTs Clean Energy Legislation • Expanded Energy Efficiency • EV infrastructure • Battery storage Regulated & Unregulated Renewables	Clean Energy Legislation • Expanded Energy Efficiency • EV infrastructure • Battery storage Greater use of technology to enhance 2-way customer communication; AMI Regulated Renewables

SI-SSA-0015-10979

NJ has advanced a new Clean Energy agenda

Energy Policy	Description	Investment Opportunity for PSEG
Energy Efficiency (EE)	• Requires electric utilities to reduce energy consumption by 2% and gas utilities to reduce energy consumption by 0.75% from average annual usage over prior 3-year period within 5 years • Allows utilities to recover "reasonable and prudent costs" including return of and on capital and revenue impact of lost sales	☑
Renewable Portfolio Standard (RPS)	• Increases percentage of energy to be supplied from renewable energy resources to 50% by 2030	☑
Solar	• Annual solar requirement increases to 4.8% in 2025 before declining to 4.5% in 2026 and 1.1% in 2033 as net metering cap increased to 5.8% from 2.9% • BPU must complete a study on how to modify/replace SREC program by 24 months after enactment	☑
Community Solar	• BPU must develop rules and regulations establishing a "Community Solar Energy Pilot Program"	☑
Offshore Wind (OSW)	• BPU to establish Offshore Renewable Energy Certificate (OREC) to support 3,500 MW by 2030 • Allows OSW projects to receive tax credits from the Energy Development Agency (EDA) • NJ Dept. of Labor directed to develop job training programs to support OSW development	☑
Energy Storage	• BPU to provide Governor and Legislature with analysis of "energy storage needs and opportunities" • BPU to initiate process within six months of delivering report that establishes a process and mechanism for achieving 600 MW of energy storage by 2021 and 2,000 MW by 2030	☑
EV Infrastructure	• Charging stations and related infrastructure for workplace, multi-family and travel corridors	☑

SI-SSA-0015-10980

Partnership for a Clean Energy Future:

~$2.9 Billion investment program to provide cost-effective and innovative solutions supporting NJ's clean energy goals

- **Energy Efficiency:** Residential and C&I programs to lower energy bills and combat climate change
  - Savings targeting 2% electric and 0.75% gas savings consistent with NJ Clean Energy Legislation
- **Electric Vehicles:** "Smart" electric vehicle infrastructure: residential, workplace, multi-family, travel corridors
- **Battery Storage:** Utility-scale systems to defer traditional distribution investment, enable additional solar, and enhance critical infrastructure resiliency

Program Investment	$ Billion
Energy Efficiency	$2.5
Electric Vehicles	$0.3
Battery Storage	$0.1
Investment Total	$2.9

- 6-year investment program starting in 2019
- Seeking contemporaneous recovery
- Contingent on approval of decoupling
- Expect to file in the near-term

SI-SSA-0015-10981

Customer's bills are materially lower, supporting needed investment in the system

- Combined electric and gas bills declined ~20% since our last rate case, 30% adjusted for inflation
- Also provided BGSS bill credits totaling ~$680 per customer since 2012

- Regional price comparison** - Gas is 2nd lowest and Electric is lower than average
- Distribution revenue component is the lowest in the state for Gas and second lowest for Electric
- Investing at the filing levels of the infrastructure extension and clean energy future programs will keep rates under 2010 levels for over a decade (adjusted for growth in CPI)

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY. E = ESTIMATE
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF DECEMBER 1, 2017, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

SI-SSA-0015-10982

Capital spending focused on regulated growth

PSEG
2018E – 2022E Capital Spending

Investment in regulated business represents ~90% of capital program

CAPITAL INCLUDES IDC AND AFUDC
HASHED PORTION OF THE CHART REPRESENTS PLANS FOR EXTENSIONS OF ENERGY STRONG (ES2) AND A CLEAN ENERGY FUTURE (CEF) PROGRAM. E=ESTIMATE

SI-SSA-0015-10983

Power's free cash flow improves as construction program ends

PSEG Power
2018E – 2022E Capital Spending [1]

PSE&G
2018E – 2022E Capital Spending [1] [2]

1) CAPITAL INCLUDES IDC AND AFUDC. E = ESTIMATE
2) HASHED PORTION OF THE CHART REPRESENTS PLANS FOR EXTENSIONS OF ENERGY STRONG (ES2) AND A CLEAN ENERGY FUTURE (CEF) PROGRAM. E = ESTIMATE.

SI-SSA-0015-10984

Solid credit metrics support additional investment capacity

**Average Funds From Operations/Debt*
2018E – 2020E**

	Power	PSEG
Estimate	Low - Forties	~20%
Minimum Threshold	30%	High - Teens

* Does not consider potential ZEC impact on estimated FFO/Debt

**Total Incremental Investment Capacity
2018E – 2020E (PSEG and Power)**

Incremental capacity invested in PSE&G would be matched with utility debt

SI-SSA-0015-10985

PSEG has controlled O&M

Cost Control Actions

- Continued focus on vendors to ensure maximum value
- Regular organizational refinement to streamline processes
- Managed Pension & OPEB Expense
- Retirement of un-economic generating plants
- 'Best practices' teams focused on improving performance while managing costs

1) EXCLUDES REGULATORY BALANCING ACCOUNT ITEMS AND NUCLEAR ARO ACCRETION EXPENSE ; INCLUDES THE IMPACT OF THE CHANGE IN PENSION ACCOUNTING STANDARDS. E = ESTIMATE.

SI-SSA-0015-10986

Strategic focus continues to deliver solid results

PSEG

*SEE SLIDE A FOR ITEMS EXCLUDED FROM NET INCOME TO RECONCILE TO NON-GAAP OPERATING EARNINGS.
**BASED ON THE MID-POINT OF 2018 NON-GAAP OPERATING EARNINGS GUIDANCE OF $3.00 TO $3.20 PER SHARE AS OF 5/31/2018.
E = ESTIMATE.

SI-SSA-0015-10987

Opportunity for consistent and sustainable dividend growth

E=ESTIMATE.

SI-SSA-0015-10988

PSEG Value Proposition

- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 111-year record of paying common dividends with opportunity for consistent, sustainable growth

SI-SSA-0015-10989

Ralph Izzo

CHAIRMAN, PRESIDENT AND CHIEF EXECUTIVE OFFICER

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED

Ralph Izzo was elected chairman and chief executive officer of Public Service Enterprise Group Incorporated (PSEG) in April 2007. He was named as the company's president and chief operating officer and a member of the board of directors of PSEG in October 2006. Previously, Mr. Izzo was president and chief operating officer of Public Service Electric and Gas Company (PSE&G).

Since joining PSE&G in 1992 Mr. Izzo was elected to several executive positions within PSEG's family of companies, including PSE&G senior vice president – utility operations; PSE&G vice president – appliance service; PSEG vice president - corporate planning; and PSE&G vice president - electric ventures. In these capacities he broadened his experience in the areas of general management, strategic planning and finance.

Mr. Izzo is a well-known leader within the utility industry, as well as the public policy arena. He is frequently asked to testify before Congress and speak to organizations on matters pertaining to national energy policy.

Mr. Izzo's career began as a research scientist at the Princeton Plasma Physics Laboratory, performing numerical simulations of fusion energy experiments. He has published or presented over 35 papers on magnetohydrodynamic modeling. Mr. Izzo received his Bachelor of Science and Master of Science degrees in mechanical engineering and his Doctor of Philosophy degree in applied physics from Columbia University.

He also received a Master of Business Administration degree, with a concentration in finance from the Rutgers Graduate School of Management. He is listed in numerous editions of Who's Who and has been the recipient of national fellowships and awards. Mr. Izzo has received honorary degrees from the New Jersey Institute of Technology (Doctor of Science), Thomas Edison State University (Doctor of Humane Letters), Bloomfield College (Doctor of Humane Letters), Rutgers University (Doctor of Humane Letters), and Raritan Valley Community College (Associate of Science).

Mr. Izzo is on the board of directors for the New Jersey Chamber of Commerce, the Edison Electric Institute (EEI), the Nuclear Energy Institute (NEI) and the New Jersey Performing Arts Center. He is also a member of the Board of Trustees of Peddie School and the Princeton University Andlinger Center for Energy and the Environment Advisory Council, as well as a member of the Visiting Committee for the Department of Nuclear Engineering at MIT. Mr. Izzo is a former member of the Columbia University School of Engineering Board of Visitors. In addition, he is a former chair of the Rutgers University Board of Governors and the New Jersey Chamber of Commerce.

Forward-Looking Statements

Certain of the matters discussed in this presentation about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K. These factors include, but are not limited to:

- fluctuations in wholesale power and natural gas markets, including the potential impacts on the economic viability of our generation units;
- our ability to obtain adequate fuel supply;
- any inability to manage our energy obligations with available supply;
- increases in competition in wholesale energy and capacity markets;
- changes in technology related to energy generation, distribution and consumption and customer usage patterns;
- economic downturns;
- third-party credit risk relating to our sale of generation output and purchase of fuel;
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements;
- changes in state and federal legislation and regulations, and PSE&G's ability to recover costs and earn returns on authorized investments;
- the impact of pending and any future rate case proceedings;
- regulatory, financial, environmental, health and safety risks associated with our ownership and operation of nuclear facilities;
- adverse changes in energy industry laws, policies and regulations, including market structures and transmission planning;
- changes in federal and state environmental regulations and enforcement;
- delays in receipt of, or an inability to receive, necessary licenses and permits;
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry;
- changes in tax laws and regulations;
- the impact of our holding company structure on our ability to meet our corporate funding needs, service debt and pay dividends;
- lack of growth or slower growth in the number of customers or changes in customer demand;
- any inability of Power to meet its commitments under forward sale obligations;
- reliance on transmission facilities that we do not own or control and the impact on our ability to maintain adequate transmission capacity;
- any inability to successfully develop or construct generation, transmission and distribution projects;
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers;
- our inability to exercise control over the operations of generation facilities in which we do not maintain a controlling interest;
- any inability to recover the carrying amount of our long-lived assets and leveraged leases;
- any inability to maintain sufficient liquidity;
- any inability to realize anticipated tax benefits or retain tax credits;
- challenges associated with recruitment and/or retention of key executives and a qualified workforce;
- the impact of our covenants in our debt instruments on our operations; and
- the impact of acts of terrorism, cybersecurity attacks or intrusions.

All of the forward-looking statements made in this presentation are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this presentation apply only as of the date of this presentation. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this presentation are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

SI-SSA-0015-10994

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Management uses non-GAAP Operating Earnings in its internal analysis, and in communications with investors and analysts, as a consistent measure for comparing PSEG's financial performance to previous financial results.

Operating Earnings is a non-GAAP financial measures that differ from Net Income. Non-GAAP Operating Earnings exclude the impact of returns (losses) associated with the Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting and material one-time items. The last two slides in this presentation (Slides A and B) include lists of items excluded from Net Income/(Loss) to reconcile to non-GAAP Operating Earnings with a reference to those slides included on each of the slides where the non-GAAP information appears.

Due to the forward looking nature of non-GAAP Operating Earnings guidance, PSEG is unable to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measure. Management is unable to project certain reconciling items, in particular MTM and NDT gains (losses), for future periods due to market volatility.

These materials and other financial releases can be found on the PSEG website at https://investor.pseg.com. From time to time, PSEG, PSE&G and PSEG Power release important information via postings on their corporate website at https://investor.pseg.com. Investors and other interested parties are encouraged to visit the corporate website to review new postings. The "email alerts" link at https://investor.pseg.com may be used to enroll to receive automatic email alerts and/or really simple syndication (RSS) feeds regarding new postings at https://investor.pseg.com/rss.

PSEG STRATEGY: BUILDING A SUSTAINABLE, FINANCIALLY SOUND ENERGY INFRASTRUCTURE COMPANY

Ralph Izzo

CHAIRMAN, PRESIDENT AND
CHIEF EXECUTIVE OFFICER

Dan Cregg

EXECUTIVE VICE PRESIDENT AND
CHIEF FINANCIAL OFFICER

SI-SSA-0015-10996

PSEG

We make things work for you.

PSE&G Represents **65%** of Non-GAAP Operating Earnings

4.7% Increase in 2018 Common Dividend

Promoting Sound Energy Policy

115 Years Investing in NJ's Critical Infrastructure

5–Year Investment Program Provides Opportunity for **8%-10%** CAGR in PSE&G Rate Base

PSEG

Two strong businesses with a track record of success

Electric & Gas Distribution and Transmission

Strategy: Investments aligned with public policy and customer needs

Value Proposition: A $12 Billion - $16 Billion infrastructure program expected to produce 8%-10% annual rate base growth through 2022

2017	Assets $29B Net Income $973M Non-GAAP Operating Earnings* $963M

Regional Competitive Generation

Strategy: Investment program enhances competitive position with addition of efficient, clean, reliable CCGT capacity

Value Proposition: Provides substantial free cash flow and upside from market rule improvements

2017	Assets $12B Net Income $479M Non-GAAP Operating Earnings* $505M

SI-SSA-0015-10998

ASSETS AND NET INCOME ARE FOR THE YEAR ENDED 12/31/2017. PSE&G AND POWER DO NOT ADD TO TOTAL DUE TO ENTERPRISE / OTHER ACTIVITY. PSE&G 5 YEAR CAPITAL SPEND FORECAST UPDATED FOR CLEAN ENERGY FUTURE PROGRAM FILED SEPTEMBER 26, 2018

*SEE SLIDE A FOR A RECONCILIATION OF NET INCOME TO NON-GAAP OPERATING EARNINGS AND SLIDE B FOR RECONCILIATIONS FOR PSE&G AND PSEG POWER.

Strategic focus produced growth in non-GAAP Operating Earnings as regulated business contribution grew to ~65%

2012	PSEG 5-Year Capital Investment Program of $18 Billion*	2017

- ✓ Regulated annual Rate Base growth of 13% to $17 Billion
- ✓ Transmission has grown to 46% of Rate Base
- ✓ Efficient growth: O&M held flat
- ✓ Overall customer bill is down

$2.44	Non-GAAP Operating Earnings +4% per year	$2.93
43%	Regulated Net Income Contribution Increased	65%
$1.42	Common Dividend Per Share +4% per year	$1.72

*CAPITAL INCLUDES YEARS 2013-2017.

SI-SSA-0015-10999

Next Steps: Building on a successful and sustainable platform that meets the needs of customers and shareholders

2018	PSEG 5-Year Capital Investment Program $14B - $17.5B

- ✓ Investing $12 Billion-$16 Billion to upgrade New Jersey infrastructure and meet NJ's Clean Energy goals
- ✓ Minimizing risk/volatility of merchant generation
- ✓ Continued cost discipline in operations
- ✓ Maintaining high customer satisfaction levels
- ✓ Tax reform benefits customers and shareholders
- ✓ Financial strength remains a core operating principle

Rate Base	Expected 8%-10% Compound Annual Growth in Rate Base through 2022
$1.80	Opportunity for Consistent and Sustainable Growth in Common Dividend

5 YEAR CAPITAL SPEND FORECAST UPDATED FOR CLEAN ENERGY FUTURE PROGRAM FILED SEPTEMBER 26, 2018 E = ESTIMATE.

Power's generating assets mainly located in three competitive markets

Power Ventures assets:

- Solar (414 MW_{DC}/325 MW_{AC})
- Kalaeloa, HI (104 MW)

- Major assets located near key load centers
- Completing construction program of three new, highly efficient combined-cycle units
- Positioned to benefit from market volatility

SI-SSA-0015-11003

Power's fleet transformed with focus on improvement in efficiency

Projected Fleet Comparison 2017 to 2022E

[1] REFLECTS RETIREMENT OF HUDSON AND MERCER UNITS IN JUNE 2017
E=ESTIMATE

SI-SSA-0015-11004

Regulatory/legislative policy initiatives strengthen foundation for providing clean, affordable and resilient energy supply

Base Rate Case Provides Opportunity for Long-Term Rate Stability

- Decision expected in Q4 2018

NJ regulators endorse streamlined process supporting long-term investment

- GSMP II Approved; ES II Filed in June 2018

NJ Advances Clean Energy Future

- PSEG Power will request NJBPU determination of eligibility for our NJ nuclear plants to receive Zero Emission Certificates
- PSE&G plans to accelerate investment in Energy Efficiency, Energy Storage, EVs and Energy Cloud - AMI

FERC/PJM Wholesale Market Reforms Underway

- Fast start pricing reform at PJM expected in 2019

SI-SSA-0015-11005

AMI = ADVANCED METERING INFRASTRUCTURE.

NJ Zero Emission Certificates (ZEC) support carbon free nuclear generation

- ✓ Legislation signed by New Jersey Governor Murphy on May 23
- ✓ 330-Day process underway – NJ Board of Public Utilities expected to determine eligibility and select nuclear plants to receive ZECs by mid-April 2019
- ✓ Hope Creek and Salem produce >90% of NJ's carbon free generation, support ~6,000 jobs, and benefit fuel diversity and grid reliability

SI-SSA-0015-11006

Zero Emission Certificate (ZEC) Process

2018	2019	2020

Enacted May 23 (Day One)

November 2018 (Day 180), BPU issues Order establishing ZEC program

April 19, 2019 (Day 330), BPU ranks applicants and selects plants to receive ZECs. Utilities begin purchasing ZECs for 'stub' period. Cash payment follows

During 'stub' period (end of energy year), ZECs earned through May 31

Within 90 days of May 31, cash payment occurs for ZECs earned during 'stub' period

June 2019, utilities purchase ZECs for new energy year, with cash payment within 90 days of the energy year ending May 31, 2020

Subsequent years work the same

Annual revenues estimated at ~$200 million, or ~$0.28 per share if all three NJ units are selected

SI-SSA-0015-11007

PSEG's future direction aligned with customer needs and NJ's Clean Energy agenda

2012-2017	2018 – 2022	Utility of the Future
Transmission expansion Storm hardening and resiliency New peaking generation and generation uprates Regulated & Unregulated Renewables	Upgrade aging infrastructure and Transmission Storm hardening and resiliency New, efficient CCGTs Clean Energy Legislation • Expanded Energy Efficiency • EV Infrastructure • Energy Storage • Energy Cloud – AMI Regulated & Unregulated Renewables	Clean Energy Legislation • Expanded Energy Efficiency • EV infrastructure • Battery storage Greater use of technology to enhance 2-way customer communication Regulated Renewables

SI-SSA-0015-11008

AMI = ADVANCED METERING INFRASTRUCTURE.

NJ has advanced a new Clean Energy agenda

Energy Policy	Description	Investment Opportunity for PSEG
Energy Efficiency (EE)	• Requires electric utilities to reduce energy consumption by 2% and gas utilities to reduce energy consumption by 0.75% from average annual usage over prior 3-year period within 5 years • Allows utilities to recover "reasonable and prudent costs" including return of and on capital and revenue impact of lost sales	☑
Renewable Portfolio Standard (RPS)	• Increases percentage of energy to be supplied from renewable energy resources to 50% by 2030	☑
Solar	• Annual solar requirement increases to 4.8% in 2025 before declining to 4.5% in 2026 and 1.1% in 2033 as net metering cap increased to 5.8% from 2.9% • BPU must complete a study on how to modify/replace SREC program by 24 months after enactment	☑
Community Solar	• BPU must develop rules and regulations establishing a "Community Solar Energy Pilot Program"	☑
Offshore Wind (OSW)	• BPU to establish Offshore Renewable Energy Certificate (OREC) to support 3,500 MW by 2030 • Allows OSW projects to receive tax credits from the Energy Development Agency (EDA) • NJ Dept. of Labor directed to develop job training programs to support OSW development	☑
Energy Storage	• BPU to provide Governor and Legislature with analysis of "energy storage needs and opportunities" • BPU to initiate process within six months of delivering report that establishes a process and mechanism for achieving 600 MW of energy storage by 2021 and 2,000 MW by 2030	☑
EV Infrastructure	• Charging stations and related infrastructure for workplace, multi-family and travel corridors	☑

SI-SSA-0015-11009

Partnership for a Clean Energy Future:

~$3.6 Billion investment program to provide cost-effective and innovative solutions supporting NJ's clean energy goals

- **Energy Efficiency:** Residential and C&I programs to lower energy bills and combat climate change
  - Savings targeting 2% electric and 0.75% gas savings consistent with NJ Clean Energy Legislation
  - Customer benefits exceed costs
- **Electric Vehicles:** "Smart" electric vehicle infrastructure: residential, workplace, multi-family, travel corridors
- **Energy Storage:** Utility-scale systems to defer traditional distribution investment, enable additional solar, and enhance critical infrastructure resiliency
- **Energy Cloud: Advanced Metering Infrastructure (AMI):** Accelerated roll-out of 2.2 million electric meters and supporting infrastructure. Compelling customer benefits

Program Investment	$ Billion
Energy Efficiency	$2.5
Electric Vehicles	$0.3
Energy Storage	$0.1
Energy Cloud – AMI	$0.7
Investment Total	$3.6

- 6-year investment program starting in 2019
- Seeking contemporaneous recovery
- Contingent on approval of lost revenue recovery mechanism

SI-SSA-0015-11010

Customer's bills are materially lower, supporting needed investment in the system

PSE&G Combined Typical Annual Residential Customer Bills*

- Combined, typical residential electric and gas customer bills are ~30% lower since the highpoint in 2008 and >40% lower when adjusted for inflation
- Also provided BGSS bill credits totaling ~$680 per customer since 2012

- Regional price comparison** - Gas is 2nd lowest and Electric is lower than average
- Delivery revenue component is the lowest in the state for Gas and second lowest for Electric
- PSE&G's infrastructure and clean energy investment programs would increase rates by approximately 2% - 3% annually, aligned with inflation

SI-SSA-0015-11011

PSEG

*FOR ALL YEARS THE BILLING ASSUMES 7,200 KWH FOR ELECTRIC AND 1,010 THERMS FOR GAS ANNUALLY.
** COMPARED AGAINST 12 REGIONAL UTILITIES AS OF DECEMBER 1, 2017, FOR A CUSTOMER THAT USES 500 KILOWATT-HOURS AND 100 THERMS IN A MONTH.

Capital spending focused on regulated growth

PSEG
2018E – 2022E Capital Spending

$14B to $17.5B

Investment in regulated business represents ~90% of capital program

PSEG Value Proposition

- PSE&G – Delivering on promise for rate base growth through disciplined investment, customer satisfaction and safety
- PSEG Power – Efficient, low-cost, clean fleet advantaged by asset diversity, fuel mix and location
- Focus on providing strong, sustainable returns of invested capital through operational excellence, regulatory and legislative mechanisms
- 111-year record of paying common dividends with opportunity for consistent, sustainable growth

SI-SSA-0015-11018

NOTE: PSEG 5 YEAR CAPITAL SPEND FORECAST UPDATED FOR CLEAN ENERGY FUTURE PROGRAM FILED SEPTEMBER 26, 2018

Sustainability is the hallmark of our 115 years of Public Service

- ✓ PSEG's climate goal is to eliminate 13 million tons of CO_2 equivalent emissions by 2030 from 2005 levels
- ✓ Named to the Dow Jones North America Sustainability Index for the 11th year in 2018
- ✓ Working to secure the economic viability of PSEG Power's nuclear fleet, which generates >90% of New Jersey's carbon free energy
- ✓ Invested approximately $1.7 Billion in the development of solar energy
- ✓ Proud sponsor of several sustainability and STEM programs including Montclair State's Institute for Sustainability Studies; the Andlinger Center for Energy & the Environment at Princeton; and the Stevens Institute of Technology's SURE House

PSEG EXECUTIVE PROFILES

SI-SSA-0015-11020

PSEG

We make things work for you.

Ralph Izzo

CHAIRMAN, PRESIDENT AND CHIEF EXECUTIVE OFFICER

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED

Ralph Izzo was elected chairman and chief executive officer of Public Service Enterprise Group Incorporated (PSEG) in April 2007. He was named as the company's president and chief operating officer and a member of the board of directors of PSEG in October 2006. Previously, Mr. Izzo was president and chief operating officer of Public Service Electric and Gas Company (PSE&G).

Since joining PSE&G in 1992 Mr. Izzo was elected to several executive positions within PSEG's family of companies, including PSE&G senior vice president – utility operations; PSE&G vice president – appliance service; PSEG vice president - corporate planning; and PSE&G vice president - electric ventures. In these capacities he broadened his experience in the areas of general management, strategic planning and finance.

Mr. Izzo is a well-known leader within the utility industry, as well as the public policy arena. He is frequently asked to testify before Congress and speak to organizations on matters pertaining to national energy policy.

Mr. Izzo's career began as a research scientist at the Princeton Plasma Physics Laboratory, performing numerical simulations of fusion energy experiments. He has published or presented over 35 papers on magnetohydrodynamic modeling. Mr. Izzo received his Bachelor of Science and Master of Science degrees in mechanical engineering and his Doctor of Philosophy degree in applied physics from Columbia University.

He also received a Master of Business Administration degree, with a concentration in finance from the Rutgers Graduate School of Management. He is listed in numerous editions of Who's Who and has been the recipient of national fellowships and awards. Mr. Izzo has received honorary degrees from the New Jersey Institute of Technology (Doctor of Science), Thomas Edison State University (Doctor of Humane Letters), Bloomfield College (Doctor of Humane Letters), Rutgers University (Doctor of Humane Letters), and Raritan Valley Community College (Associate of Science).

Mr. Izzo is on the board of directors for the New Jersey Chamber of Commerce, the Edison Electric Institute (EEI), the Nuclear Energy Institute (NEI) and the New Jersey Performing Arts Center. He is also a member of the Board of Trustees of Peddie School and the Princeton University Andlinger Center for Energy and the Environment Advisory Council, as well as a member of the Visiting Committee for the Department of Nuclear Engineering at MIT. Mr. Izzo is a former member of the Columbia University School of Engineering Board of Visitors. In addition, he is a former chair of the Rutgers University Board of Governors and the New Jersey Chamber of Commerce.

SI-SSA-0015-11021

Daniel J. Cregg

EXECUTIVE VICE PRESIDENT AND CHIEF FINANCIAL OFFICER

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED, PUBLIC SERVICE ELECTRIC AND GAS COMPANY, PSEG POWER LLC AND PSEG SERVICES CORPORATION

Daniel J. Cregg was named executive vice president and chief financial officer for Public Service Enterprise Group Incorporated (PSEG) and its subsidiaries in October 2015.

Mr. Cregg is responsible for all financial functions, including Internal Audit Services, Investor Relations and Corporate Development. Given the array of financial instruments which serve as the primary means of selling wholesale energy to customers, Mr. Cregg also has responsibility for the Risk Management function, which provides independent oversight of the PSEG Power trading organization. In addition to finance, Mr. Cregg is responsible for the Strategy and Planning function. He is a member of PSEG's Executive Officer Group.

Prior to his current position, Mr. Cregg was vice president – finance for PSE&G, a role he assumed in June 2013. In 2006, Mr. Cregg was named vice president – finance for PSEG Power. In that capacity and in previous financial roles for Power, Mr. Cregg held leadership positions related to financial reporting and forecasting, investor communications, financings, rating agency interactions, external reporting, cash forecasting, financial valuations, competitive intelligence, and fundamental market modeling, with critical responsibilities in Power's development and strategic planning activities.

Previously, Mr. Cregg was director of PSEG corporate development. He joined PSEG in 1991 with overall responsibility for tax planning, strategy and compliance for PSEG Energy Holdings, including domestic and international tax structuring work for PSEG Global and PSEG Resources.

Before joining PSEG, Mr. Cregg spent five years with the accounting and consulting firm of Deloitte and Touche, providing consulting services to a wide range of clients with an emphasis on the energy industry.

Mr. Cregg holds a Master of Business Administration degree from the Wharton School of the University of Pennsylvania and is a graduate of Lehigh University, where he received a bachelor's degree in accounting.

Forward Looking Statement

Readers are cautioned that statements contained in this presentation about our future performance, including future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical, are forward-looking statements for purposes of the safe harbor provisions under The Private Securities Litigation Reform Act of 1995. When used herein, the words “anticipate”, “intend”, “estimate”, “believe”, “expect”, “plan”, “should”, “hypothetical”, “potential”, “forecast”, “project”, variations of such words and similar expressions are intended to identify forward-looking statements. Although we believe that our expectations are based on reasonable assumptions, they are subject to risks and uncertainties and we can give no assurance they will be achieved. The results or developments projected or predicted in these statements may differ materially from what may actually occur. Factors which could cause results or events to differ from current expectations include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units, delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers,
- increase in competition in energy supply markets as well as competition for certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and changes in technology and customer usage patterns.

For further information, please refer to our Annual Report on Form 10-K, including Item 1A. Risk Factors, and subsequent reports on Form 10-Q and Form 8-K filed with the Securities and Exchange Commission. These documents address in further detail our business, industry issues and other factors that could cause actual results to differ materially from those indicated in this presentation. In addition, any forward-looking statements included herein represent our estimates only as of today and should not be relied upon as representing our estimates as of any subsequent date. While we may elect to update forward-looking statements from time to time

SI-SSA-0015-11027

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The last slide in this presentation includes a list of items excluded from Income from Continuing Operations to reconcile to Operating Earnings, with a reference to that slide included on each of the slides where the non-GAAP information appears.

SI-SSA-0015-11031

PSEG – 2012 Highlights

2012 Earnings in-line with guidance

- Achieved operating earnings of $2.44 per share, at the high end of guidance range of $2.25-$2.50, including storm-related costs at PSE&G
- PSE&G represented 43% of consolidated operating earnings with growth in transmission

Operational excellence

- Record output from CCGTs, continued strong production from Nuclear, and Power's control of O&M supported results
- PSE&G recognized for reliability: National ReliabilityOne Excellence Award, Mid-Atlantic Reliability Award, and Award for Outstanding Response to a Major Outage Event; as well as EEI's Emergency Response Award
- Restored service to 2.1 million customers in a two-week period of time in the aftermath of Superstorm Sandy and the Nor'easter that followed
- Extension of major labor contracts

PSEG disciplined capital investment

- Key regulatory approvals received for major transmission projects
- BPU decisions pending on Solar4All Extension and Solar Loan III
- Power added 400 MW of new peakers in time to respond to summer demand
- Holdings added 40 MW of new solar capacity

SI-SSA-0015-11035

SuperStorm Sandy met by an exceptional response

The storm affected PSE&G and Power

2.1 million **PSE&G** customer restorations (2X Hurricane Irene and 3X the October '11 Snowstorm) ● 96 Electric Substations Damaged (39% of the total) ● 14 Switching Stations Affected (33% of total) ● 51 of 154 Transmission Lines Interrupted (33% of total) ● 2,427 Utility Poles Replaced or Repaired ● 48,000 Trees Removed or Trimmed ● ~4,200 mutual aid or contract workers brought in to assist restoration efforts

PSEG Power's assets were stress tested by SuperStorm Sandy, but when the load returned in the days following, Power's assets were available

SI-SSA-0015-11036

PSEG Capital Spending focused on growth

PSE&G's Energy Strong Capital Program addresses new reality

- New $3.9 Billion Infrastructure Program filed with the NJBPU to strengthen PSE&G's electric and gas system focusing on hardening and resiliency
- Plan to invest an additional $1.5 Billion in Transmission grid over the ten-year period
- PSE&G's Infrastructure proposal includes:
  - Protecting 40 utility installations from severe storms (**$1.7 Billion**)
  - Making the electric grid smarter and easier to repair (**$454 Million**)
  - Adding backup distribution lines and system redundancies (**$415 Million**)
  - Undergrounding 20 miles of overhead distribution lines (**$60 Million**)
  - Modernizing the gas distribution system (**$1.1 Billion**)
- Better protection for homes and businesses during severe weather and improved day to day system reliability
- Proposed filing creates ~5,800 jobs and stimulates economic activity for New Jersey businesses

SI-SSA-0015-11039
