

**Paving Notification
PSE&G Gas System Upgrade Project**

Dear Valued Customer:

As customers like you rely upon electric and gas to power their daily lives, PSE&G is considered an essential service. As we continue this critical work to keep the power system safe and reliable, we're taking prudent measures and maintaining safety as our number one priority.

PSE&G has completed the gas system upgrades in your neighborhood to ensure continued safe, reliable gas service. Now that the ground has settled, we will restore roads with permanent paving.

For more information about this work in your town, as well as a video about the upgrade project, visit pseg.com/gaswork.

The milling and paving activities will occur during daytime hours between 7:00 a.m. and 6:00 p.m. Work is scheduled to start in the upcoming weeks, weather permitting. **Please abide by all emergency “No Parking” signs, as they will be posted 24 hours before work is scheduled to begin on each street.**

In light of the COVID-19 pandemic, and in the interest of maintaining the safety of our customers, our employees, and their families, PSE&G workers and PSE&G contractors follow safety guidelines put into place by the CDC and NJ State Department of Health, as well as all directives from the Governor’s Office and county/municipal governments. This includes that our workers practice social distancing and we ask that you also maintain a safe distance from our crews. PSE&G will not need to enter your home or property as a result of this work.

Our goal is to complete this work with minimal impact to your neighborhood. Police will be directing traffic, and residents will be able to drive on the roads during non-paving hours.

As schedules may be subject to change, please visit our website at pseg.com/gaswork for updated information on the timing of the paving project. Additionally, if you have any questions you may call our project hotline at 1-833-661-6XXX.

We appreciate your patience and cooperation as we work to restore your streets.

Sincerely,

PSE&G Gas Construction Team
