

Thanks to the PSE&G Direct Install Program, the Our Lady of Mount Virgin School in Middlesex recently completed an affordable energy efficient LED lighting upgrade. The installed LED lighting will reduce the energy usage by an estimated 56% resulting in financial savings of approximately \$5,546 per year.

PSE&G paid for 70% of the LED lighting upgrade. The remaining 30%, \$12,386.27 will be paid for by the school over the next 36 months utilizing PSE&G's 0% on-bill financing. Due to the savings, they will experience an immediate ROI on their monthly bill.

The upgrade from existing fluorescent lighting to new energy efficient LED lighting improved light levels throughout the school providing the faculty and students brighter learning space.
