

Thanks to the PSE&G Direct Install Program, the family owned business, Dingman's Dairy, recently completed an affordable energy efficient LED lighting and HVAC upgrade. The installed LED lighting and HVAC will reduce their energy usage by an estimated 54% resulting in financial savings of approximately \$1,859 per year.

PSE&G paid for 70% of the LED lighting & HVAC upgrade. The remaining 30%, \$5,895 will be paid for by the company over the next 36 months utilizing PSE&G's 0% on-bill financing. Due to the savings, the facility will experience immediate ROI on their monthly bill.

The upgrade from out of date fluorescent lighting to new energy efficient LED lighting throughout the space improved light levels in all work areas. The customer's existing 9 year old 5-ton RTU was replaced with new, more energy efficient model. The new RTU allows the customer to not worry about the maintenance and repair typically done on older aged units.
