In The Matter of the Petition of
Public Service Electric and Gas Company
for Approval of Changes in its Electric Tax Adjustment
Credit and Gas Tax Adjustment Credit
"2026 TAC Filing"

BPU Docket No. _____

VIA BPU E-FILING SYSTEM & ELECTRONIC MAIL

Sherri L. Lewis, Board Secretary
Board of Public Utilities
44 South Clinton Avenue, 1st Floor
P.O. Box 350
Trenton, New Jersey 08625-0350
board.secretary@bpu.gov

Dear Secretary Lewis:

Enclosed for filing on behalf of petitioner Public Service Electric and Gas Company is the Petition, Testimony of Thomas Reichart and Testimony of Stephen Swetz, and Supporting Schedules in the above-referenced proceeding.

PSE&G is required to submit this petition consistent with previous orders of the New Jersey Board of Public Utilities ("BPU") to file changes associated with the Electric Tax Adjustment Credit ("ETAC") and Gas Tax Adjustment Credit ("GTAC") (collectively "TACs"), each year by October 31. The Company submitted the 2025 TAC Petition on October 23, 2025 for rates effective January 1, 2026. Resolution of the 2025 TAC Filing is paused; therefore the rate adjustments associated with the 2025 TAC rate adjustments have not been implemented. The attached filing is PSE&G's required 2026 TAC Petition. As such, the revenue requirements contained herein represent costs for both the 2025 TAC Petition as well as the current period.

Please be advised that workpapers are being provided via electronic version only.

Sincerely,

John P. Goncalves

STATE OF NEW JERSEY
BOARD OF PUBLIC UTILITIES

In The Matter of the Petition of	:	
Public Service Electric and Gas Company	:	
for Approval of Changes in its Electric Tax	:	DOCKET NO.
Adjustment Credit and Gas Tax Adjustment Credit	:	
("2026 TAC Filing")	:	

VERIFIED PETITION

Public Service Electric and Gas Company ("PSE&G", the "Company", or "Petitioner"), a corporation of the State of New Jersey, having its principal offices at 80 Park Plaza, Newark, New Jersey, respectfully petitions the New Jersey Board of Public Utilities (the "Board" or "BPU") pursuant to *N.J.S.A.* 48:2-21 as follows:

Introduction and Overview of the Filing

1. Petitioner is a public utility engaged in the distribution of electricity and the provision of electric Basic Generation Service, and distribution of gas and the provision of Basic Gas Supply Service, for residential, commercial, and industrial customers within the State of New Jersey. PSE&G provides service to approximately 2.4 million electric and 1.9 million gas customers in an area having a population more than 6.2 million persons and that extends from the Hudson River opposite New York City, southwest to the Delaware River at Trenton, and south to Camden, New Jersey.

2. Petitioner is subject to Board regulation for the purposes of setting its retail distribution rates and to assure safe, adequate, and reliable electric distribution and natural gas distribution service pursuant to *N.J.S.A.* 48:2-21 et seq.

3. The Company respectfully submits this Petition and supporting testimonies and exhibits seeking Board approval for electric and gas base rate changes associated with the Electric

Tax Adjustment Credit ("ETAC") and Gas Tax Adjustment Credit ("GTAC") (collectively "TACs") for 2027.

4. Pursuant to the Board's October 9, 2024 Order approving the Stipulation of Settlement of PSE&G's 2024 Base Rate Case[1], the Company submitted its annual TAC cost recovery filing on October 23, 2025[2]. This matter is still pending before the Board and therefore the rates associated with the Company's 2025 TAC Filing have not been implemented. The testimony of Stephen Swetz provides revenue requirements, calculations and impacts based on the currently approved TAC rates. Prior Board orders approving the Company's annual TAC cost recovery filings have provided a date certain that PSE&G was required to file its next TAC Petition which has been no later than October 31 each year.

Background

5. The Tax Cuts and Jobs Act was signed into law on December 22, 2017 (the "2017 Act"), with an effective date of January 1, 2018.

6. The 2017 Act set forth changes to the Federal Internal Revenue Tax Code ("Tax Code"), including a reduction in the maximum corporate tax rate from thirty-five percent (35%) to twenty-one percent (21%).

[1] *I/M/O The Petition of Public Service Electric and Gas Company for Approval of an Increase in Electric and Gas Rates and for Changes in Tariffs for Electric and Gas Service, B.P.U.N.J. NO. 17 Electric and B.P.U.N.J. NO. 17 Gas, and for Changes in Depreciation Rates, Pursuant to N.J.S.A. 48:2-18, N.J.S.A 48:2-21, and N.J.S. 48:2-21.1, and for Other Appropriate Relief, Docket Nos. ER23120924 and GR23120925, Order rel. October 9, 2024 ("2024 Rate Case Order").*

[2] *I/M/O The Petition of Public Service Electric and Gas Company for Approval of Changes in its Electric Tax Adjustment Credit and Gas Tax Adjustment Credit ("2025 TAC Filing") Docket Nos. ER25100577 and GR25100578*

7. The 2017 Act was reviewed by the Board in January 2018, and based upon this review the BPU found the reduction in the corporate tax rate resulted in a savings to New Jersey public utilities, and thus an over-collection of tax revenue that would not be paid in federal income taxes.[3]

8. On January 31, 2018, the Board issued its Consideration Order that expressed its goal to ensure that "the rate revenue resulting from expenses relating to taxes reflected in rates but no longer owed as the result of the 2017 Act shall be passed onto the ratepayers." With this goal in mind, the BPU directed several New Jersey public utilities, including PSE&G, to make filings detailing certain impacts of the 2017 Act. Consideration Order, at.[4]

9. On March 2, 2018, PSE&G filed a petition pursuant to the Consideration Order that included a proposed plan as well as final issued tariff sheets effective April 1, 2018.

10. By Order dated March 26, 2018,[5] the Board directed that PSE&G's proposed plan be reviewed in the Company's 2018 Base Rate Case that was filed January 12, 2018.

11. The March 26, 2018 Order also directed the Company to file tariffs reflecting its proposed rate reduction to be effective April 1, 2018 on an interim basis subject to the outcome of its 2018 base rate case proceeding.

12. Pursuant to the March 26, 2018 Order, the Company reduced its base rates effective April 1, 2018, three months post the legislatively enacted income tax reduction, to eliminate any further over-collection. PSE&G deferred the over-collection for the period January 1, 2018 through

---

[3] *I/M/O The New Jersey Board of Public Utilities' Consideration of the Tax Cuts and Jobs Act of 2017,* Docket No. AX18010001, Order rel. January 31, 2018 ("Consideration Order"). Specific directives from the 2018 Consideration Order have largely been superseded by the current requirements set forth in paragraph 24.

[4] *I/M/O The New Jersey Board of Public Utilities' Consideration of the Tax Cuts and Jobs Act of 2017, et.al.* Docket Nos. AX18010001, Order rel. January 31, 2018.

[5] *I/M/O The New Jersey Board of Public Utilities' Consideration of the Tax Cuts and Jobs Act of 2017, et.al.* Docket Nos. AX18010001 and ER1803023, Order rel. March 26, 2018.

March 31, 2018 on the books for return to customers ($5.6 million for electric and $21.8 million for gas, excluding interest).

13. On August 8, 2018, PSE&G updated its base rate case proceeding request based upon twelve (12) months of actual data and no estimated data for its test year ("12+0 update"). The Company's 12+0 update reflected a proposed increase in operating revenues of approximately $272 million annually on an ongoing basis for PSE&G's electric and gas operations (approximately $147 million in annual electric revenues and $125 million in annual gas revenues), or an approximate 3.6% increase in overall revenues, less an approximate $39 million refund provided in the first three months assuming rates effective October 1, 2018.

14. An agreement to settle the Company's 2018 Base Rate Case was reached in early October 2018, and the Stipulation of Settlement was approved by the Board on October 29, 2018[6], which included the terms and operation of the tax adjustment credits applicable to electric and gas rates.

15. Specifically, the parties agreed to implement an ETAC and GTAC as part of the terms and operation of the tax adjustment credits applicable to electric and gas rates.

16. The parties agreed to annual ETAC and GTAC cost filing dates.

17. Pursuant to the 2018 Board Order, aspects of the TAC, including the return on the increase in rate base-related excess deferred taxes, historic SHARE and historic Mixed Service Cost ("MSC"), will be adjusted at the conclusion of the Company's subsequent base rate cases.

[6] I/M/O The Petition of Public Service Electric and Gas Company for Approval of an Increase in Electric and Gas Rates and for Changes in Tariffs for Electric and Gas Service, B.P.U.N.J. NO. 16 Electric and B.P.U.N.J. NO. 16 Gas, and for Changes in Depreciation Rates, Pursuant to N.J.S.A. 48:2-18, N.J.S.A 48:2-21, and N.J.S. 48:2-21.1, and for Other Appropriate Relief, Docket Nos. ER18010029 and GR18010030, Order rel. October 29, 2018 ("2018 Rate Case Order").

18. On December 29, 2023, the Company filed a petition for approval of an increase in its current base rates for electric service and gas service ("2024 Base Rate Case") that included an adjustment to flow-back certain tax benefits to customers through the Tax Adjustment Credit ("TAC").

19. The Signatory Parties to the settlement of the Company's 2024 Base Rate Case agreed to set the new ETAC and GTAC rates effective from October 15, 2024 through December 31, 2025.

20. As part of the 2024 Rate Case Order, the Company was to submit its next annual TAC cost recovery filing by no later than October 31, 2025, with a proposed effective rate implementation date of January 1, 2026, based on actual results through June 30, 2025 and a forecast through December 31, 2026. The Company submitted the 2025 TAC Filing on October 23, 2025 for rates effective January 1, 2026. This matter is still pending before the Board.

21. Pursuant to the 2024 Base Rate Case settlement, the excess deferred taxes, historic SHARE, historic Mixed Service Costs ("MSC") balances the Company agreed to flow back to customers through the TACs are as follows:

2024 BASE RATE CASE				
Tax Flow-Through Balances as of December 31, 2024				
$000				
	Electric	**Gas**	**Total**	**Amortization**
Protected Excess Deferred Taxes (EDT)	330,922	273,073	603,996	ARAM
Historic SHARE balance Deferred Taxes	69,596	153,174	222,770	4 yr - Through 2028
Historic MSC balance Deferred Taxes	190,700	175,208	365,908	5 yr - Through 2029
Total	**591,218**	**601,455**	**1,192,674**	

22. The TAC amounts were allocated to each applicable rate class and then refunded to customers through a dollar per kWh or dollar per therm basis.

23. The 2024 Rate Case Order included the updated terms and operation of the tax adjustment credits applicable to electric and gas rates.

24. Specifically, the 2024 Rate Case Order approved updates to the Company's existing Electric and Gas TAC to include the following components:

a. Continued refund of the protected excess deferred tax balance, which are flowed back to customers using the Average Rate Assumption Method or any other method as required by the Internal Revenue Service ("IRS");

b. Continued refund of the historic Safe Harbor Adjusted Repair Expense ("SHARE") balance, a component of the Company's ADIT in the 2018 base rate case that is being flowed-back to customers over a 10-year period, with 1/3 of the balance returned in the first five years and the 2/3 remaining balance returned in the remaining five years through 2028;

c. A refund of the historic Mixed Service Cost ("MSC") tax benefits over a declining five (5) year period ending December 31, 2029 as shown in Attachment C of the Stipulation;

d. Return on the increase in rate base at the Company's after-tax WACC from the flow-through of rate base-related deferred taxes;

e. A fixed annual current period SHARE net deduction of $41.87 million ($13.75 million for electric and $28.12 million for gas);

f. A fixed annual current period MSC net deduction of $16.0 million ($9.0 million for electric and $7.0 million for gas);

g. Recovery of any impact to deferred taxes or income tax expense associated with any Corporate Alternative Minimum Tax ("CAMT") liability for PSE&G Electric Distribution or Gas Distribution; and

h. A revenue gross-up of the net tax flow-through.

25. The excess deferred taxes, including the Unprotected, Protected, SHARE, and MSC deductions that Company agreed to flow back to customers through the TACs are as follows:

	Electric Amortization from 2024 Rate Case							
	$000							
	Protected	Unprotected	Historic SHARE	Historic MSC	Current SHARE	Current MSC	CAMT	Total

Company's Submission

26. The Company now hereby submits its 2026 TAC cost recovery filing for rates effective January 1, 2027, based on actual results through June 30, 2026 and an eighteen-month period of forecasted financials through December 31, 2027. A matrix identifying the location of all minimum filing requirements for the TAC in the 2024 Base Rate Case is included as Appendix A to this Petition.

27. Appended to this Petition as Attachment 1 are the testimony and exhibits of Mr. Thomas Reichart, Vice-President of Tax and Assistant Controller PSEG Service Corporation. In his testimony, Mr. Reichart:

- Provides a background on the creation of excess ADIT as a result of the Tax Cuts and Jobs Act of 2017 ("the 2017 Act") and the purpose of this filing;
- Describes the components of TAC flow-back and provide the actual and projected TAC flow-back balances and activity on an actual basis through June 30, 2026 and on a forecast basis through December 31, 2027;
- Supports the forecasted flow-back of the current period SHARE and MSC deductions; and
- Provides background on and the impact of the Corporate Alternative Minimum Tax ("CAMT") on this TAC Filing.

28. Appended to this Petition as Attachment 2 is the testimony of Mr. Stephen Swetz, Senior Director – Corporate Rates and Revenue Requirements for PSEG Services Corporation. In his testimony, Mr. Swetz: (a) describes the mechanism by which PSE&G flows back savings to

customers; (b) recalculates the TACs to be effective January 1, 2027; and (c) addresses the treatment of PSE&G's income tax over or under-recovery, including interest.

29. Appended to this Petition as Attachment 3 are clean and red-lined electric and gas tariff sheets reflecting the changes in the ETAC and GTAC as identified in Attachment 2, Schedules SS-TAC-7E and SS-TAC-7G.

30. For the ETAC, the Company proposes a refund from January 1, 2027 through December 31, 2027 of approximately $88.7 million, which when added to the Company's estimated over-collected balance with interest at December 31, 2026 of ($2.7) million, results in a total proposed refund to customers of approximately $91.4 million.

31. The proposed refund represents a decrease in the credit to electric customers of approximately $49.4 million compared to the current ETAC.

32. The average monthly impact of the proposed rates to the typical residential electric customer using 683 kWh in a summer month and 558 kWh in an average month (6,700 kWh annually), would be an increase in their average monthly bill from $155.23 to $156.74, or $1.51 or approximately 1.0% (based upon Delivery Rates and BGS-RSCP charges in effect October 1, 2026 and assuming that the customer receives BGS-RSCP service from PSE&G).

33. For the GTAC, the Company estimates a refund from January 1, 2027 through December 31, 2027 of approximately $118.4 million, which when added to the Company's estimated over-collected balance with interest at December 31, 2026 of ($6.8) million, results in a total proposed refund to customers of approximately $125.2 million.

34. The proposed refund represents a decrease in the credit to gas customers of approximately $75.3 million compared to the current GTAC.

35. The annual impact of the proposed rates to the typical residential gas heating customers using 172 therms per month in a winter month and 87 therms in an average month (1,040 therms annually), would be an increase in the average monthly bill from $102.18 to $105.49, or $3.31 or approximately 3.2% (based upon Delivery Rates and BGSS-RSG charges in effect October 1, 2026, and assuming that the customer receives BGSS service from PSE&G).

36. Attachment 4 contains the residential customer bill impacts comparing the current and proposed ETAC and GTAC for the above-referenced typical customers.

37. Attachments 5 and 6 are the balance sheet and income statement, respectively, required by the Minimum Filing Requirements in the 2024 Rate Case Order.

38. Attachment 7 is a draft Form of Notice of Filing and of Public Hearings (Form of Notice). This Form of Notice sets forth the requested changes to the electric and gas rates and will be placed in newspapers having a circulation within the Company's electric and gas service territories upon receipt, scheduling, and publication of public hearing dates. A Notice will be served on the County Executives and Clerks of all municipalities within the Company's electric and gas service territories upon scheduling of public hearing dates.

39. In accordance with the Board's recent Covid-19 Order,[7] notice of this filing, the Petition, testimony, and schedules will be served upon the Department of Law and Public Safety and upon the Director, Division of Rate Counsel by electronic mail. Electronic copies of the Petition, testimony, and schedules will also be sent to the persons identified on the service list provided with this filing.

---

[7] *In the Matter of the New Jersey Board of Public Utilities' Response to the COVID-19 Pandemic for a Temporary Waiver of Requirements for Certain Non-Essential Obligations,* BPU Docket No. EO20030254, Order dated March 19, 2020.

40. PSE&G requests the Board find the proposed rates, as shown in Attachment 3, are just and reasonable, and that PSE&G should be authorized to implement the proposed rates as set forth herein, effective January 1, 2027 upon issuance of a written BPU order.

41. Any final rate relief found by the Board to be just and reasonable may be allocated by the Board for consistency with the provisions of N.J.S.A. 48:2-21 and for other good and legally sufficient reasons, to any class or classes of customers of the Company. Therefore, the average percentage changes in final rates may increase or decrease compared to the proposed rates based upon the Board's decision.

Conclusion and Requests for Approval

Based on the foregoing, PSE&G respectfully requests that the Board retain jurisdiction of this matter and review and expeditiously issue an order approving this Petition specifically finding that the proposed tariff changes are approved as just and reasonable and may become effective January 1, 2027.

Respectfully submitted,

PUBLIC SERVICE ELECTRIC AND GAS COMPANY

DATED: October 30, 2026

APPENDIX A

PUBLIC SERVICE ELECTRIC AND GAS Minimum Filing Requirements – Tax Adjustment Credit ("TACs")	
MINIMUM FILING REQUIREMENTS	**LOCATION IN FILING**
I. General Filing Requirements	
1. Income Statement for the most recent 12-month period, as filed with the BPU.	Attachment 6
2. Balance Sheet for the most recent 12-month period, as filed with the BPU.	Attachment 5
3. Amortization of the excess income tax recovery for the first quarter of 2018 as a result of the Tax Cuts and Jobs Act.	N/A
4. Actual and projected flow-back ADIT balances and activity for the recovery period, defined as actual results through June of the current year and a forecast through the following calendar year.	Attachment 2, Direct Testimony of Stephen Swetz, Schedule SS-TAC-3E/G, Attachment 1, Direct Testimony of Sallie Ann Marsh, Schedule SM-TAC-2
5. Monthly over/under balance worksheet detailing how the flow-backs in the TAC are returned to customers.	Attachment 2, Direct Testimony of Stephen Swetz, Schedule SS-TAC-4E/G
6. Workpaper detailing the estimate for the current period SHARE deduction as well as a comparison of the most recent filed tax return to the estimates used in the TAC Calculation.	N/A
7. A calculation of the proposed rate adjustment based on the revenue requirement calculation as provided in Attachment C. Each annual TAC filing will reflect an update for the latest estimates for the following period at the time of the filing and a true-up for actuals (e.g., the protected amortization will reflect the latest ARAM actuals/estimate)	Attachment 2, Direct Testimony of Stephen Swetz, Schedule SS-TAC-7E/G
8. A detailed explanation of the variances from the deferred tax balances provided in Attachment C or any subsequent cost recovery filing, including: a. An explanation for all transfers between protected and unprotected categories during the current rate period or any proposals for the next recovery period. This will include the basis for the reclassification of each temporary difference.	Attachment 1, Direct Testimony of Sallie Ann Marsh

b. Status of the Company's efforts to obtain additional guidance from the IRS concerning the proper classification of excess ADIT balances as protected or unprotected.	N/A
c. A copy of any Private Letter Ruling ("PLR") requests prepared by PSE&G related to the SHARE or excess deferred taxes.	N/A
d. A copy of any and all PLR requests or responses relied upon by PSE&G for any adjustments to the balances or amortizations as shown in Attachment C	N/A
e. A copy of any other related IRS announcements, adjustments, procedures or other authoritative guidance.	N/A

DIRECT TESTIMONY
OF
THOMAS REICHART

VICE-PRESIDENT OF TAX AND ASSISTANT CONTROLLER

October 30, 2026

ATTACHMENT 1

PUBLIC SERVICE ELECTRIC AND GAS COMPANY
DIRECT TESTIMONY
OF
Thomas Reichart
Vice-President of Tax and Assistant Controller
PSEG Services Corporation

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Thomas Reichart. My business address is 80 Park Plaza, Newark, New Jersey.

Q. By whom are you employed and in what capacity?

A. I am employed by PSEG Services Corporation as Vice-President of Tax and Assistant Controller. My professional credentials are attached as Schedule TR-TAC-1.

Q. What is the purpose of your testimony?

A. In this case, I am testifying on behalf of Public Service Electric and Gas Company ("PSE&G", or the "Company"). The purpose of this testimony is to present and support the flow-back of excess accumulated deferred income taxes ("ADIT") through the Electric and Gas Tax Adjustment Credits ("ETAC" and "GTAC" respectively, or collectively referred to as "TACs") as set forth in Attachment C of the Stipulation of Settlement approved by the Board in the Company's 2024 base rate case in Docket Nos. ER23120924 and GR23120925 on October 2, 2024. I will also support the flow-back of current and forecasted period tax benefits associated with the Safe Harbor Adjusted Repair Expense ("SHARE") and Mixed Service Costs. Specifically, my testimony will:

- Provide background on the creation of excess ADIT as a result of the Tax Cuts and Jobs Act of 2017 ("the 2017 Act") and the purpose of this filing;
- Describe the components of TAC flow-back and provide the actual and projected TAC flow-back balances and activity on an actual basis through June 30, 2026 and on a forecast basis through December 31, 2027;
- Support the forecasted flow-back of the current period SHARE and Mixed Service Cost ("MSC") deductions; and
- Provide background on and the impact of the Corporate Alternative Minimum Tax ("CAMT") on this TAC Filing.

Q. Do you sponsor any schedules as part of your prepared testimony?

A. Yes. I sponsor the following schedules that were prepared or compiled under my direct supervision:

- Schedule TR-TAC-1 describes my professional qualifications and business experience; and
- Schedule TR-TAC-2 summarizes the excess ADIT, Historic SHARE, and Historic MSC balances approved in the 2024 base rate case and the projected balances as of December 31, 2027 by component.

Q. Are there any other witnesses in this proceeding?

A. Yes. Mr. Stephen Swetz provides the calculation of revenue requirements and new proposed TACs.

II. BACKGROUND ON THE TAC COMPONENTS

Q. Please describe how income taxes are recovered in the ratemaking process.

A. PSE&G, through the ratemaking process, includes its current and deferred income tax expense in customers' rates. Current tax expense represents the tax expense expected to be paid to the government for that tax year. Deferred tax expense represents a future tax liability that will eventually be paid when related temporary differences between book and taxable income reverse. The plant-related accumulated deferred income taxes is the cumulative future tax liability, commonly referred to as ADIT, is not only a future tax liability but is also a reduction to the Company's rate base for rate making purposes as the Company retains the cash benefit of the tax deduction until the temporary differences between book and taxable income reverse.

Q. How did the 2017 Act tax rate change create excess deferred taxes?

A. Deferred taxes are calculated as the difference between the book basis and tax basis in assets and liabilities on the corporation's Balance Sheet multiplied by the enacted tax rate. However, when the tax rate decreased to 21%, those temporary differences, which were recorded at 35%, were remeasured at the new lower rate of 21%. This rate change reduced the ADIT balance and set up a Regulatory Liability to be refunded back to customers. Accordingly, the excess ADIT balance to be refunded to customers is essentially computed as follows: 14% (i.e. the difference between the previous and newly enacted federal corporate income tax rates) * (Accumulated federal deferred income tax balance / 35%) = Excess ADIT. Excess deferred taxes fall into three categories (a) those subject to the tax normalization rules

(referred to as "protected" plant related ADIT), (b) those that are not (referred to as "unprotected" plant related ADIT), and (c) those that are unprotected, non-plant related ADIT. As required by IRS normalization rules, the protected plant excess ADIT will be returned to PSE&G's customers, but no more rapidly than permitted under the Average Rate Assumption Method ("ARAM"). The ARAM provision provides for the reversal of excess ADIT on a vintage and class basis commencing as the related timing differences reverse (when book depreciation starts to exceed tax depreciation), over the remaining regulatory life of the asset. By way of contrast, the return of the unprotected excess ADIT to customers is unconstrained by the tax normalization rules and can be returned as parties see fit.

Q. Does the refund of the excess ADIT impact rate base?

A. Yes. The remaining protected and unprotected-plant related excess ADIT balances were all included in the Company's ADIT balance used to determine rate base in the 2024 base rate case. Plant-related ADIT is a reduction to the Company's rate base and, therefore, lowered the Company's return and revenue requirement.

As ADIT is a reduction in rate base, the Company is currently paying interest at its Weighted Average Cost of Capital ("WACC") on the plant-related excess ADIT balance that has yet to be returned to customers. As a result, the parties to the 2018 base rate case agreed that the refund of any plant related excess ADIT, which previously reduced rate base, would now result in a corresponding increase in rate base and revenue requirement. The non-plant related unprotected excess ADIT balance is not a component of the Company's rate base and the parties to the 2018 base rate case agreed the Company would pay interest at WACC on the unprotected excess ADIT balance until the excess balance is fully refunded to customers in

2024. The return on the change in rate base and the interest on the unprotected excess ADIT balance are discussed in the direct testimony of Mr. Swetz.

Q. How are excess deferred taxes returned to customers?

A. The TACs were created in the 2018 base rate case as the means to refund the excess ADIT. The TACs are dollar per kWh and dollar per therm credits for electric and gas, respectively. Please see the testimony and schedules of Mr. Swetz for the calculation of the revenue requirement and proposed rates for the TACs.

Q. Are there other components besides excess ADITs that are refunded to customers through the TACs?

A. Yes. In addition to the excess ADITs described above, the TACs also include the following items, which will be described further below:

- The refund of the historic SHARE ADIT balance;
- The flow-back of the net current SHARE deduction;
- The refund of the historic MSC ADIT balance;
- The flow-back of the net current MSC deduction; and
- Any adjustments, such as, but not limited to: CAMT, additional guidance issued by the US Department of Treasury, and updates to forecasted amounts.

Q. What is the SHARE deduction?

A. The SHARE deduction is an acronym for Safe Harbor Adjusted Repair Expense or the repair deductions discussed below.

Q. What are repair deductions?

A. On September 12, 2011, the IRS released Revenue Procedure 2011-43, which was later modified in Revenue Procedure 2014-16, detailing a safe harbor method for determining repair deductions for electric utilities. Generally, for book and tax purposes, costs are either capitalized into the depreciable basis of an asset or currently expensed for book purposes and deducted for tax purposes. For tax purposes, repair costs associated with a unit of property are considered deductible repair expenses and not capitalized unless they are incurred for either a) betterment of the property, b) restoration of the property, or c) to adapt the unit of property to a new or different use.

Q. How do the repair deduction rules apply?

A. These rules apply to all vintages of property and permit immediate expensing of all costs associated with projects considered a deductible repair expense pursuant to Internal Revenue Code ("IRC") section 162, resulting in a tax reduction in the year incurred, but are capital assets for financial reporting and ratemaking purposes. PSE&G began claiming enhanced repair deductions in 2010 for both its electric and gas distribution operations (referred to as a SHARE deduction). SHARE deductions are considered unprotected and are thus not subject to ARAM.

Q. How is the SHARE deduction returned to customers?

A. The SHARE deduction is returned to customers in two ways: 1) amortization of the historic SHARE balance and 2) flow-back of the current net SHARE tax deduction. The historic SHARE represents tax benefits the Company has claimed through October 31, 2018.

The historic SHARE was a component of the Company's ADIT in the 2018 base rate case and per the 2018 base rate case is being flowed-back to customers over a 10-year period, with 1/3 of the balance returned in the first five years and the 2/3 remaining balance returned in the remaining five years.

The current SHARE is calculated as the on-going, fixed annual SHARE tax deduction less the book depreciation associated with SHARE deductions multiplied by the federal tax rate. It is contemporaneously flowed back to PSEG's customers.

Q. Is the Current SHARE flowback to customers the same each year?

A. Yes. As set forth in Attachment C of the Stipulation of Settlement approved by the Board in the Company's 2024 base rate case, the Company will flowback a fixed annual amount of $41.87 million ($13.75 million for electric and $28.12 million for gas) for current period SHARE deductions.

Q. What is an MSC deduction?

A. IRC section 263A governs which costs are capitalizable, deductible, or both, referred to in Treasury Regulation Section 1.263A-1(e)(4)(ii)(C) as mixed service costs. That Treasury regulation defines MSCs as service costs that are partially allocable to production or resale activities (capitalizable) and partially allocable to non-production or non-resale activities (deductible). MSCs are typically thought of as general and administrative costs.

Q. How does the MSC deduction impact ADIT?

A. Treasury Regulation section 1.263A applies to all vintages of property and permits immediate deduction of all costs associated with projects pursuant to IRC section 162, resulting

in a tax deduction in the year incurred, but are capital assets for financial reporting and ratemaking purposes. ADIT results from the timing difference between financial reporting, which is depreciated over the life of the asset, and tax reporting, which is immediately deducted. MSC deductions are unprotected and not subject to the tax normalization rules.

Q. Is there more than one directive on how to calculate the MSC deduction?

A. Yes. The IRS has issued a number of Industry Director Directives ("IDDs") related to the computation of the MSC deduction. Generally, the regulated utility industry follows IDD No. 5 (LMSB 04-0809-033, 2009), which is based on the simplified service cost method.

Q. How is the MSC deduction returned to customers?

A. The MSC deduction is returned to customers in two ways: 1) amortization of the historic MSC balance and 2) flow-back of the current net MSC tax deduction. The historic MSC represents tax benefits the Company has claimed through August 31, 2024. The historic MSC is being flowed-back to customers over a declining 5-year period.

The current MSC is calculated as the on-going, fixed annual MSC tax deduction less the book depreciation associated with MSC deductions multiplied by the federal tax rate. It is contemporaneously flowed back to PSE&G's customers.

Q. Is the Current MSC flowback to customers the same each year?

A. Yes. As set forth in Attachment C of the Stipulation of Settlement approved by the Board in the Company's 2024 base rate case, the Company will flowback a fixed annual amount of $16.0 million ($9.0 million for electric and $7.0 million for gas).

Q. Can you please explain why the monthly amortization pattern of the TAC flowback is seasonal?

A. In 2023, the Company changed the monthly amortization pattern from straight-line to reflect the seasonality of pre-tax book income. Historically, approximately 33% of the Company's revenue is generated in the first quarter each year. However, the tax benefits from flowing back the EDIT and SHARE were amortized on a straight-line basis, which caused monthly volatility to the Company's effective tax rate. As a result, the Company changed the monthly amortization of the EDIT and SHARE flowback to follow the seasonal pattern as the Company generates pre-tax book income. This change did not impact the total annual amortization amounts refunded to customers and the Company's annual effective tax rate.

III. 2026 TAC REFUND

Balances

Q. What are the TAC balances by division approved to be refunded in the 2024 base rate case?

A. Please see the table below:

2024 BASE RATE CASE				
Tax Flow-Through Balances as of December 31, 2024				
$000				
	Electric	**Gas**	**Total**	**Amortization**
Protected Excess Deferred Taxes (EDT)	330,922	273,073	603,996	ARAM
Historic SHARE balance Deferred Taxes	69,596	153,174	222,770	4 yr - Through 2028
Historic MSC balance Deferred Taxes	190,700	175,208	365,908	5 yr - Through 2029
Total	**591,218**	**601,455**	**1,192,674**	

Q. Are these amounts currently being amortized back to customers?

A. Yes. As approved by the Board in the Company's 2024 base rate case in Docket Nos. ER23120924 and GR23120925, the amounts above are being amortized back to customers as follows:

a) Continued refund of the protected excess deferred tax balance, which will be flowed back to customers under the Average Rate Assumption Method;

b) Continued refund of the historic SHARE balance as of October 1, 2024 over the remaining four (4) years ending December 31, 2028;

c) Refund of the historic MSC balance as of August 31, 2024 over a declining five (5) year period beginning January 1, 2025 and ending December 31, 2029.

Q. Have you provided the projected balances specific to the recovery period?

A. Yes. Please see Schedule TR-TAC-2 for the actual balance as of June 30, 2026 and the forecasted balance as of December 31, 2027 at both the tax flowback and grossed-up revenue level. In addition, see Mr. Swetz's Schedule SS-TAC-2E/G for the monthly balances by component.

Q. How are the current SHARE and current MSC flow-backs being amortized back to customers?

A. Current SHARE and current MSC deductions are being amortized back to customers as follows:

a) Current period SHARE deductions are being amortized beginning in 2025 as a fixed annual refund of $41.87 million ($13.75 million for electric and $28.12 million

for gas). The actual current period SHARE deductions are calculated as the actual SHARE tax deduction less all associated SHARE book depreciation, multiplied by the Federal tax rate. If the actual current period SHARE deductions are greater than the fixed annual refund, the excess balance will be deferred and included in ADIT to offset any future period(s) where the fixed annual refund is greater than the actual current period SHARE deductions. Any net excess balance at the time of a subsequent base rate case can be refunded to customers over a period determined by the parties in that proceeding. If there is no excess balance to offset the underage when the actual current SHARE deduction is lower than the fixed annual deduction, the underage will be funded through a reduction of the final historic SHARE amortization to the extent of the final historic SHARE balance;

b) Current period MSC deductions are being amortized beginning in 2025 as a fixed annual refund of $16.0 million ($9.0 million for electric and $7.0 million for gas). The actual current period MSC deductions are calculated as the actual MSC tax deduction less all associated MSC book depreciation, multiplied by the Federal tax rate. If the actual current period MSC deductions are greater than the fixed annual refund, the excess balance will be deferred and included in ADIT to offset any future periods where the fixed annual refund is greater than the actual current period MSC deductions. Any net excess balance at the time of a subsequent base rate case will be refunded to customers over a period determined by the parties in that proceeding. If there is no excess balance to offset the underage when the actual current MSC deduction is lower

than the fixed annual deduction, the underage will be funded through a reduction of the final historic MSC amortization to the extent of the final historic MSC balance.

Q. What is the CAMT and is PSE&G subject to it?

A. The CAMT is a federal 15% tax on adjusted financial statement income ("AFSI") that was enacted as a part of the Inflation Reduction Act of 2022 and became effective in 2023. AFSI starts with net income of the corporation's applicable financial statements to which Treasury prescribed adjustments are made. Companies whose three-year historical average AFSI exceeds $1 billion are subject to CAMT from that point forward. Once subject to the CAMT, a corporation will pay the IRS the higher of the CAMT or regular income tax.

Based on the applicable statutes contained in the IRC, the Company is subject to the CAMT in the 2025 tax year. PSE&G is part of the consolidated federal tax return of PSEG, Inc., and the three-year average AFSI test applies at the consolidated group level. Once the PSEG consolidated group meets the threshold, PSE&G, as a member of that group, becomes subject to the CAMT.

Q. What is the impact of the CAMT on income tax expense?

A. The CAMT does not change PSE&G's total income tax expense. Any incremental CAMT liability increases current income tax expense but is equally offset by a reduction to deferred income tax expense from recording a Deferred Tax Asset ("DTA") to reflect the CAMT credit carryforward. The recording of a DTA decreases ADIT and would increase the Company's rate base until the Company's regular tax liability is higher than the CAMT, in which case the DTA would be utilized up to the CAMT amount.

Q. Is the Company seeking recovery of the CAMT through the TAC in this filing?

A. No. The Company proposed in the 2024 base rate case to recover any impact of the CAMT through the TAC, once the final rules are issued. While the Company continues awaiting additional guidance that could change the CAMT liability for PSE&G, the Company anticipates incurring CAMT liability in the 2026 tax year. However the final 2026 CAMT liability is unknown at this time, therefore the Company will not seek recovery in this filing.

Amortizations

Q. What were the annual amortizations approved in the 2024 base rate case?

A. The tables below summarize the annual amortizations for electric, gas and in total approved in the 2024 base rate case.

	Electric Amortization from 2024 Rate Case							
	$000							
	Protected	Unprotected	Historic SHARE	Historic MSC	Current SHARE	Current MSC	CAMT	Total
2024	(10,150)	(7,569)	(17,399)	-	(13,914)	-	-	(49,033)
2025	(7,214)	-	(17,399)	(82,921)	(13,750)	(9,000)	-	(130,284)
2026	(5,958)	-	(17,399)	(45,000)	(13,750)	(9,000)	-	(91,107)
2027	(6,259)	-	(17,399)	(33,000)	(13,750)	(9,000)	-	(79,408)
2028	(6,119)	-	(17,399)	(20,000)	(13,750)	(9,000)	-	(66,268)

	Total E&G Amortization from 2024 Rate Case							
	$000							
	Protected	Unprotected	Historic SHARE	Historic MSC	Current SHARE	Current MSC	CAMT	Total
2024	(15,281)	(14,548)	(55,693)	-	(35,792)	-	-	(121,313)
2025	(14,043)	-	(55,693)	(174,941)	(41,867)	(16,000)	-	(302,543)
2026	(12,787)	-	(55,693)	(90,000)	(41,867)	(16,000)	-	(216,347)
2027	(13,089)	-	(55,693)	(58,000)	(41,867)	(16,000)	-	(184,648)
2028	(12,949)	-	(55,693)	(25,000)	(41,867)	(16,000)	-	(151,509)
2029	(11,946)	-	-	(17,967)	(41,867)	(16,000)	-	(87,780)
Total	**(80,095)**	**(14,548)**	**(278,463)**	**(365,908)**	**(245,127)**	**(80,000)**	**-**	**(1,064,141)**

Q. Have you provided the actual and projected amortizations specific to the recovery period?

A. Yes. Please see Schedule TR-TAC-2 for the actual amortization as of June 30, 2026 and the forecasted amortization as of December 31, 2027 at both the tax flowback and grossed-up revenue level. In addition, see Schedule SS-TAC-2E/G for the monthly balances by component.

Q. Are there any other excess ADIT balances that are not currently being refunded to customers through the TAC?

A. No. All balances are currently being refunded or have been refunded to customers.

Q. Are there any impacts to this filing from the One Big Beautiful Bill Act ("OB3") that was enacted on July 4, 2025?

A. No. The enactment of the OB3 has no impact on the flowback amortization or balances reflected in my testimony. While the OB3 reenacted 100% bonus depreciation on qualified property acquired or placed into service after January 19, 2025, regulated public utilities, like PSE&G, do not qualify under IRC Section 168(k)(9)(A).

Q. Does this conclude your testimony?

A. Yes it does.

CREDENTIALS
OF
THOMAS REICHART
ASSISTANT CONTROLLER – VICE PRESIDENT TAX
PSEG SERVICES CORPORATION

EDUCATIONAL BACKGROUND

In 2003, I graduated from Susquehanna University with a Bachelor of Science degree in Accounting. I am also a licensed Certified Public Accountant in the State of Pennsylvania.

WORK EXPERIENCE

I joined PSEG in 2016 as the Assistant Controller – Power. Later my title was changed to Enterprise Assistant Controller as I had taken on other responsibilities outside of the generation assets. From their inception in 2018 I worked on the New Jersey Zero Emission Certificates (ZECs) to compensate eligible nuclear power plants for their zero-emission environmental attributes. I was responsible for all financial aspects regarding significant transactions, such as the sale of our solar and fossil generation assets, including investment tax credit impacts on the sale. Since enactment of the Inflation Reduction Act, I have been responsible for PSEG's implementation of the nuclear production tax credits, including development of the Company's credit calculations, integration of those calculations into New Jersey Zero Emission Certificate filings, and engagement with the U.S. Treasury regarding guidance on the determination of gross receipts. In 2025 I was promoted to the Assistant Controller, Vice President – Tax. As Assistant Controller, Vice President – Tax, I am responsible for PSEG's enterprise tax function, including tax strategy, planning, compliance, reporting, governance, and controversy management across federal, state, and local jurisdictions. I oversee the Company's income, indirect, and transactional tax matters while supporting strategic business initiatives and optimizing the Company's effective tax rate and cash tax position. I have worked extensively on tax matters affecting regulated utility operations, including the interaction

of federal tax legislation, tax credits, and New Jersey regulatory proceedings. In addition, I oversee the Company's implementation of significant federal and state tax legislation, including evaluating the impact of new tax laws and regulatory guidance on PSEG's operations and financial reporting. I advise executive leadership and business units on the tax implications of strategic transactions, capital investments and other significant business initiatives. I lead a team that provides tax support for regulatory proceedings, including the evaluation of tax matters affecting customer rates, regulatory accounting, and utility cost recovery mechanisms. I also oversee the Company's tax risk management framework and internal controls over tax and SEC reporting, ensuring compliance with applicable accounting standards, tax laws, and governance requirements. I am responsible for the Company's income tax accounting and financial reporting under U.S. GAAP, including quarterly and annual tax provisions, deferred taxes, valuation allowances, uncertain tax positions, and related financial statement disclosures.

I actively participate in the Edison Electric Institute Taxation Committee, collaborating with peer utilities on federal tax policy, emerging tax legislation, and industry tax issues.

Before joining PSEG, I was employed by Exelon/Constellation and held numerous positions focused on their wholesale electric and gas trading functions, and their significant transactions including mergers and acquisitions (M&A). I evaluated the tax implications of significant transactions, including mergers and acquisitions, with a focus on investment tax credits, production tax credits, tax equity and partnership structures.

Before Exelon, I started my career at Ernst & Young. During my time at Ernst & Young, I specialized in accounting for energy trading derivatives and financial instruments, supporting utility and energy clients on complex accounting matters involving wholesale energy markets.

"2026 TAC Filing"

BPU Docket Nos. _____

DIRECT TESTIMONY

OF

STEPHEN SWETZ
SR. DIRECTOR – CORPORATE RATES AND REVENUE REQUIREMENTS

October 30, 2026

ATTACHMENT 2

PUBLIC SERVICE ELECTRIC AND GAS COMPANY
DIRECT TESTIMONY
OF
STEPHEN SWETZ
SR. DIRECTOR – CORPORATE RATES AND REVENUE REQUIREMENTS

Q. Please state your name, affiliation, and business address.

A. My name is Stephen Swetz, and I am the Senior Director – Corporate Rates and Revenue Requirements for PSEG Services Corporation. My credentials are set forth in the attached Schedule SS-TAC-1.

Q. Please describe your responsibilities as the Senior Director – Corporate Rates and Revenue Requirements for PSEG Services Corporation.

A. As the Senior Director of Corporate Rates and Revenue Requirements, I plan, develop, and direct Public Service Electric and Gas Company's ("PSE&G", the "Company") electric and gas retail pricing strategies, retail rate design, embedded and marginal cost studies, and tariff provisions. I also direct the calculation of revenue requirements for PSE&G's base rates as well as all those for the Company's cost recovery clauses. Acting as a key regulatory resource to PSE&G on regulatory matters, strategies and policies, I have negotiated settlements on rate design, cost of service, recovery clauses including renewable and energy efficiency cost recovery, and base rates.

Q. What is the purpose of your testimony in this proceeding?

A. My testimony supports the Company's proposed changes to the Electric and Gas Tax Adjustment Credits ("ETAC" and "GTAC" respectively or collectively addressed as the "TACs") for 2027. PSE&G's filing is consistent with the terms and conditions outlined in the

Stipulation of Settlement (the "Stipulation") in the 2024 Rate Case Order.[1] While the Company's 2025 TAC Filing[2] is still pending before the Board, prior Board orders require the Company's annual filings are to be made no later than October 31 each year. PSE&G is submittiing its 2026 TAC Filing with actual results through June 30, 2026. The Company is seeking new rates effective January 1, 2027.

The revenue requirements for the ETAC and GTAC are based upon actual financial results through June 30, 2026 and forecasted financial results from July 1, 2026 through December 31, 2027. Because the Company's 2025 TAC Filing is still pending before the Board, my testimony is providing revenue requirements, calculations and impacts based on the currently approved TAC rates.

This testimony provides an overview of the TACs cost recovery mechanism along with a description of the revenue requirements calculations and rate design mechanisms.

COST RECOVERY MECHANISM

Q. Please briefly describe PSE&G's proposed cost recovery.

A. Per the Company's 2018 Rate Case Order,[3] the TACs were initially implemented as the mechanisms to refund or collect revenue requirements to or from customers on an annual basis. Subsequently, PSE&G's 2024 Base Rate Case petition sought approval of increases to

[1] I/M/O The Petition of Public Service Electric and Gas Company for Approval of an Increase in Electric and Gas Rates and for Changes in Tariffs for Electric and Gas Service, B.P.U.N.J. NO. 17 Electric and B.P.U.N.J. NO. 17 Gas, and for Changes in Depreciation Rates, Pursuant to N.J.S.A. 48:2-18, N.J.S.A 48:2-21, and N.J.S.A. 48:2-21.1, and for Other Appropriate Relief, Docket Nos. ER23120924 and GR23120925, Order rel. October 9, 2024 ("2024 Rate Case Order").

[2] I/M/O The Petition of Public Service Electric and Gas Company for Approval of Changes in its Electric Tax Adjustment Credit and Gas Tax Adjustment Credit ("2025 TAC Filing")

[3] I/M/O The Petition of Public Service Electric and Gas Company for Approval of an Increase in Electric and Gas Rates and for Changes in Tariffs for Electric and Gas Service, B.P.U.N.J. NO. 16 Electric and B.P.U.N.J. NO. 16 Gas, and for Changes in Depreciation Rates, Pursuant to N.J.S.A. 48:2-18, N.J.S.A 48:2-21, and N.J.S.A. 48:2-21.1, and for Other Appropriate Relief, Docket Nos. ER18010029 and GR18010030, Order rel. October 29, 2018 ("2018 Rate Case Order").

its then current base rates for electric service and gas service and proposed adjustments to flow-back certain tax benefits to customers through the TAC.

The revenue requirements, pursuant to the Company's 2024 Base Rate Case, are comprised of the following components:

a. Continued refund of the protected excess deferred tax balance, which are flowed back to customers using the Average Rate Assumption Method or any other method as required by the Internal Revenue Service ("IRS");

b. Continued refund of the historic Safe Harbor Adjusted Repair Expense ("SHARE") balance, a component of the Company's ADIT in the 2018 base rate case that is being flowed-back to customers over a 10-year period, with 1/3 of the balance returned in the first five years and the 2/3 remaining balance returned in the remaining five years through 2028;

c. A refund of the Historic Mixed Service Cost ("MSC") tax benefits over a declining five (5) year period ending December 31, 2029 as shown in Attachment C of the Stipulation;

d. Return on the increase in rate base at the Company's after-tax WACC from the flow-through of rate base-related deferred taxes;

e. A fixed annual current period SHARE net deduction of $41.87 million ($13.75 million for electric and $28.12 million for gas);

f. A fixed annual Current Period MSC net deduction of $16.0 million ($9.0 million for electric and $7.0 million for gas);

g. Recovery of any impact to deferred taxes or income tax expense associated with any Corporate Alternative Minimum Tax ("CAMT") liability for PSE&G Electric Distribution or Gas Distribution; and

h. A revenue gross-up of the net tax flow-through.

Q. What are the forecasted annual electric and gas revenue requirements proposed for this TACs filing?

A. The Company proposes an ETAC refund to customers from January 1, 2027 through December 31, 2027 of approximately $88.7 million, which when added to the Company's estimated over-collected balance with interest at December 31, 2026 of ($2.7) million, results in a total proposed refund to customers of approximately $91.4 million, representing an approximate $49.4 million increase to electric customers (a lower credit) compared to the current ETAC.

The Company proposes a GTAC refund to customers from January 1, 2027 through December 31, 2027 of approximately $118.4 million, which when added to the Company's estimated over-collected balance with interest at December 31, 2026 of ($6.8) million, results in a total proposed refund to customers of approximately $125.2 million, representing an approximate $75.3 million increase to gas customers (a lower credit) compared to the current GTAC.

Please see Schedule SS-TAC-2 for the total target revenue calculations and net increases from the current TAC rates.

Q. How are the revenue requirements calculated?

A. The ETAC and GTAC revenue requirements are calculated on a monthly basis and are expressed as follows:

*TACs Revenue Requirement = (Protected Excess ADIT Amortization + Historic ESHARE/GSHARE Deduction Flow-Through + Historic EMSC/GMSC Deduction Flow-Through +After-Tax Return on Cumulative Change in Rate Base + Current ESHARE/GSHARE Deduction Flow-Through + Current EMSC/GMSC Deduction Flow-Through + IRS Audit Electric/CAMT/Gas Adjustments + Other Major Electric/Gas Tax Adjustments) * Electric/Gas Revenue Factor*

Protected Excess ADIT Amortization

Q. What are Protected Excess ADIT and what is the amortization period to flow this benefit to customers?

A. The Protected Excess Amortizations will continue to refund the protected excess deferred tax balances to customers under the Average Rate Assumption Method. The amortization of the Protected Excess ADIT can be located in Column 5 of Schedules SS-TAC-3E and SS-TAC-3G. For additional information regarding Unprotected Excess ADIT, please see the direct testimony of Mr. Thomas Reichart.

Historic ESHARE/GSHARE Deduction Flow-Back

Q. What is the Historic ESHARE/GSHARE Deduction Flow-Back?

A. The Historic ESHARE/GSHARE Deduction Flow-Back represents prior period's tax repair deduction. The associated federal deferred taxes represent the difference between the immediate tax repair deduction and the capitalization of these expenses for financial reporting

purposes, which eventually over time manifest themselves as part of book depreciation. As the tax repair deduction is not subject to tax depreciation it is not subject to the tax normalization rules. For additional information regarding Historic ESHARE/GSHARE, please see the direct testimony of Mr. Thomas Reichart.

Q. Are the Historic ESHARE/GSHARE Deduction Flow-Through being amortized as required from the 2018 Rate Case Order?

A. Yes. The amortization of the Historic ESHARE and GSHARE, located in Column 8 of Schedules SS-TAC-3E and SS-TAC-3G, are being flowed back to cusomers in accordance with the Order.

Q. What is the Historic MSC Deduction?

A. The Historic MSC are service costs that are partially allocable to production or resale activities (capitalizable) and partially allocable to nonproduction or non-resale activities (deductible). The amortization of these historical deferred taxes can be located in Column 11 of Schedules SS-TAC-3E and SS-TAC-3G. For additional information regarding Historic MSC deductions, please see the direct testimony of Mr. Thomas Reichart .

Q. Are the monthly Excess ADIT amortizations seasonally patterened?

A. Yes, Beginning March 2023, the TAC's monthly amortizations were aligned with the seasonal pattern of PSE&G's pre-tax book income to minimize the monthly volatility to the Company's effective tax rate. While this changes the monthly excess ADIT amortizations, there is no impact to the total annual amortization amounts refunded to customers. Please see

the testimony of Mr. Thomas Reichart for additional details regarding the aligininment of the monthly TAC amortizations with PSE&G's monthly pre-tax book income.

After-Tax Return on Cumulative Change in Rate Base

Q. What is the Cumulative Change in Rate Base and its after-tax return?

A. The cumulative change in rate base is attributable to the:

- Prorated amortization of the Protected Excess ADIT,
- Amortization of the Historic SHARE ADIT, and
- Amortization of the Historic MSC ADIT

As PSE&G flows back the aforementioned ADIT to its customers, there is a decrease to the Company's deferred taxes and an increase to rate base. The Cumulative Change in Rate Base is shown in Column 16 of Schedule SS-TAC-3E and Schedule SS-TAC-3G. Per the Stipulation, PSE&G's return on the increase in rate base is calculated at the Company's after-tax WACC.

Q. Why does the Cumulative Change in Rate Base not include the Current SHARE Deduction or the Current MSC Deduction?

A. The Current SHARE and the Current MSC Deductions are both contemporaneously flowed back to customers, and accordingly these flow backs are not associated with deferred taxes. The Current SHARE deduction represents any given year's electric and gas tax repair deduction less the associated book depreciation. In general, the Current MSC Deduction is an immediate tax deduction in the year incurred for service costs, which are generally general and administrative costs, that are partially allocable to production or resale activities and

capitalizable and partially allocable to nonproduction, but are treated as capital assets for financial reporting and ratemaking purposes and are depreciated over the life of the asset. MSC deductions are unprotected and not subject to the tax normalization rules. As there are no deferred taxes for both of these flow backs, there are no changes in rate base. Please see the testimony of Mr. Thomas Reichart for additional details regarding the Current SHARE and/or the Current MSC.

Q. Why is the Company utilizing the proration methodology for the Protected Excess ADIT change in rate base?

A. Using the proration methodology is in accordance with IRS regulations. For the ADIT balance used in the calculation of Net Investment to be compliant with the IRS Normalization Rules, applying the proration methodology to the forecasted changes in the ADIT balance for depreciable utility-owned plant recovered over a forecasted period must be used.

Q. How does the proration methodology work?

A. During the forecasted rate period, which is proposed to be January 1 through December 31, the monthly Federal deferred income tax balance associated with the Protected Excess ADIT Amortization is adjusted by a proration percentage. However, at the conclusion of each forecasted rate period the actual increase in rate base from Protected Excess ADIT Amortization is substituted for the prorated balance.

Q. How is the proration percentage calculated?

A. The proration percentage is calculated as a fraction, of which the numerator is the remaining days in the forecasted portion of the rate period at the end of each month and the denominator is the total number of days in the forecasted portion of the rate period.

Q. Does proration apply to the Historic SHARE Amortizations or Historic MSC deductions?

A. No. The proration methodology only applies to depreciable property recovered over a forecasted time-period. For tax purposes, the Historic SHARE deductions and Historic MSC are not considered depreciable property; therefore,the proration methodology does not apply.

Q. Do you show the calculation of the change in rate base?

A. Yes. The cumulative change in rate base calculations supporting Column 15 is located in Worksheets "RateBase-E" and "RateBase-G" in "WP-SS-TAC-2.xlsx".

Q. What is the After-Tax Return on the Increase in Rate Base?

A. The calculation of the After-Tax Return on the Cumulative Change in Rate Base can be located in Column 16 of Schedule SS-TAC-3E and Schedule SS-TAC-3G. The After-Tax Return on the Increase in Rate Base is the average ending monthly increase in rate base multiplied by the Company's WACC.

Q. What is the WACC utilized in the calculation of the revenue requirement?

A. Per the 2024 Rate Case Order, the WACC utilized for the TACs is a weighted cost of 7.07%, or 6.57% on an after-tax basis, which is based on a Return on Equity of 9.60% and a

long-term embedded cost of debt of 3.98%. For the components and the calculation of the WACC and after-tax WACC, see Schedule SS-TAC-5.

Current ESHARE/GSHARE Deduction Flow-Through

Q. What is the return of the Current Period SHARE?

A. The flow back of the Current SHARE less the associated book depreciation to customers included in this filing is PSE&G's best annual estimate of the current period's federal SHARE deduction less the associated book depreciation, which is intended to ensure customers receive the full flow through of the tax benefit. Please see the testimony of Mr. Thomas Reichart for additional details regarding the Current SHARE Tax Deduction.

Q. How is the Company refunding the Current Period SHARE?

A. Beginning in 2025, the Company started to flow back a total fixed annual benefit of $41.9 million, consisting of a $13.8 million electric flowback and a $28.1 million gas flowback. The actual SHARE deduction will continue to be calculated and tracked annually. To the extent the actual deduction is higher than the flow back amount, the excess would be added to the ADIT balance, and that benefit would be flowed back to customers in a subsequent rate case.

Q. Why is the annual benefit fixed when refunding the Current Period SHARE?

A. The Current Period SHARE deduction has the potential to significantly vary year-to-year based on the actual plant activity and mix of capital projects placed in service each year that qualifies as repair, which causes volatility in the deduction. The amortizations of the

Current Period SHARE can be located in Column 25 of Schedules SS-TAC-3E and SS-TAC-3G.

Current MSC Deduction Flow-Through

Q. What is the return of the Current Period MSC?

A. The flow back of the Current MSC is calculated as the on-going, fixed annual MSC tax deduction less the book depreciation associated with MSC deductions multiplied by the federal tax rate. It is contemporaneously flowed back to PSE&G's customers. Please see the testimony of Mr. Thomas Reichart for additional details regarding the Current MSC Deduction.

Q. How is the Company refunding the Current Period MSC?

A. Beginning in 2025, the Company included a fixed annual Current Period MSC net deduction of $16.0 million ($9.0 million for electric and $7.0 million for gas) as set forth in Attachment C of the Stipulation of Settlement approved by the Board in the Company's 2024 base rate case. The amortizations of the Current Period MSC can be located in Column 26 of Schedules SS-TAC-3E and SS-TAC-3G.

Q. Why is the annual benefit fixed when refunding the Current Period MSC?

A. As with the Current Period SHARE, a fixed flow back of the Current MSC amount will help reduce the rate volatility and revenue requirement of the TAC. A fixed annual flow back of the Current MSC will reduce the variability - the difference between the actual and proposed flow back amounts are tracked and deferred. The deferral ensures customers will receive the benefit and the increase in ADIT will provide an incemental unprotected balance that can be refunded to customers in a future rate case. Please see the testimony of Mr. Thomas Reichart

for additional details regarding the flow back of the Current MSC and application of any excess deferral.

TAC Adjustments

Q. Are there any IRS Audit or Other Major Tax Adjustments?

A. No, there have been no adjustments since the settlement of the Company's 2011 through 2016 tax return audit with the IRS in the fourth quarter of 2020, which were incorporated in PSE&G's TAC 2021 filing. However, please see the testimony of Mr. Thomas Reichart for additional details regarding IRS or other major tax adjustments, including Corporate Alternative Minimum Tax ("CAMT") on this TAC Filing.

Electric/Gas Revenue Factor

Q. What is the Revenue Factor?

A. The Revenue Factor adjusts the revenue requirement net of tax for federal and state income taxes and the costs associated with the BPU and Division of Rate Counsel ("RC") Annual Assessments. The BPU/RC Assessment Expenses consist of payments, based upon a percentage of revenues collected (updated annually), to the State based on the electric and gas intrastate operating revenues for the utility. The Company has utilized the respective BPU/RC assessment rates based on the 2026 fiscal year assessment, which are 0.20% and 0.05%, respectively. See Schedule SS-TAC-6 for the calculation of the revenue factor.

Over/Under Balance

Q. Does the Company have an Over/Under Balance?

A. Yes. Schedules SS-TAC-4E and SS-TAC-4G show the monthly calculation of the over/under balance for the electric and gas components of the TAC, respectively. The over or under-collection is calculated monthly as the difference between the revenue requirement, as calculated in Schedules SS-TAC-3E and SS-TAC-3G, and the actual credits to customers. Interest is accrued on any over/under collection based upon the Company's interest rate obtained on its commercial paper and/or bank credit lines utilized in the preceding month.

Q. How does the Company ensure all flow-backs are returned to customers?

A. As shown in Schedule SS-TAC-2, the over or under-collection is included in the target revenue requirement for the next annual period, ensuring customers receive the full refund of the excess deferred taxes.

Q. Have you provided the detailed calculations supporting the revenue requirements?

A. Yes. The detailed calculations supporting the revenue requirement calculation described above are provided in electronic workpaper WP-SS-TAC-2.xlsx.

TAC Mechanism

Q. How are the ETAC and GTAC revenue requirements refunded to customers?

A. The electric and gas revenue requirements are allocated to each rate class based upon their respective percent share of overall gas or electric distribution revenue set by the 2024 Rate Case Order. This rate class revenue allocation will stay the same until the conclusion of the next base rate case (see Line 2 of Schedule SS-TAC-7E and SS-TAC-7G). The amount of

allocated revenue requirement to each rate class is then divided by each class' most recent forecast of kilowatt-hour or therm sales for the corresponding recovery period.

The detailed calculations supporting the electric and gas rate designs are shown in Schedule SS-TAC-7E and Schedule SS-TAC-7G, respectively. These schedules contain the proposed ETAC and GTAC effective January 1, 2027.

Q. What are the annual rate impacts to the typical residential customer?

A. The average monthly impact of the proposed rates to the typical residential electric customer using 683 kWh in a summer month and 558 kWh in an average month (6,700 kWh annually), would be an increase in their average monthly bill from $155.23 to $156.74, or $1.51 or approximately 1.0% (based upon Delivery Rates and BGS-RSCP charges in effect October 1, 2026 and assuming that the customer receives BGS-RSCP service from PSE&G).

The annual impact of the proposed rates to the typical residential gas heating customers using 172 therms per month in a winter month and 87 therms in an average month (1,040 therms annually), would be an increase in the average monthly bill from $102.18 to $105.49, or $3.31 or approximately 3.2% (based upon Delivery Rates and BGSS-RSG charges in effect October 1, 2026, and assuming that the customer receives BGSS service from PSE&G).

The residential customer bill impacts comparing the current and proposed ETAC and GTAC are included in Attachment 4 for the aforementioned typical customers as well as other typical customer usage patterns.

ATTACHMENT 2

Q. Is the Company issuing a Public Notice in this proceeding?

A. Yes, PSE&G's electric and gas customers will see an increase (i.e. a lower credit), therefore the Company will issue a Public Notice. Please see Attachment 7 for a draft Form of Notice of Filing and of Public Hearings.

Q. Does this conclude your testimony?

A. Yes, it does.

CREDENTIALS
OF
STEPHEN SWETZ
SR. DIRECTOR-CORPORATE RATES AND REVENUE REQUIREMENTS

My name is Stephen Swetz, and I am employed by PSEG Services Corporation. I am the Sr. Director - Corporate Rates and Revenue Requirements where my main responsibility is to contribute to the development and implementation of electric and gas rates for Public Service Electric and Gas Company (PSE&G, the Company).

WORK EXPERIENCE

I have over 30 years of experience in Rates, Financial Analysis and Operations for three Fortune 500 companies. Since 1991, I have worked in various positions within PSEG. I have spent most of my career contributing to the development and implementation of PSE&G electric and gas rates, revenue requirements, pricing and corporate planning with over 20 years of direct experience in Northeastern retail and wholesale electric and gas markets.

As Sr. Director of the Corporate Rates and Revenue Requirements department, I have submitted pre-filed direct cost recovery testimony as well as oral testimony to the New Jersey Board of Public Utilities and the New Jersey Office of Administrative Law for base rate cases, as well as several clauses including infrastructure investments, renewable energy, and energy efficiency programs. A list of my prior testimonies can be found on pages 3 and 4 of this document. I have also contributed to

other filings including unbundling electric rates and Off-Tariff Rate Agreements. I have had a leadership role in various economic analyses, asset valuations, rate design, pricing efforts and cost of service studies.

I am an active member of the American Gas Association's Rate and Strategic Issues Committee, the Edison Electric Institute's Rates and Regulatory Affairs Committee and the New Jersey Utility Association (NJUA) Finance and Regulatory Committee.

EDUCATIONAL BACKGROUND

I hold a B.S. in Mechanical Engineering from Worcester Polytechnic Institute and an MBA from Fairleigh Dickinson University.

Tax Adjustment Credit

This mechanism is designed to return net tax benefits from the Tax Cuts and Jobs Act of 2017, and other income tax related adjustments to customers. The charge will be reset on an annual basis. Interest at the weighted average of the interest rates on PSE&G's commercial paper and bank credit lines utilized in the prior month will be accrued monthly on any under or over recovered balances. The interest rate shall be reset each month.

Tax Adjustment Credit

This mechanism is designed to return net tax benefits from the Tax Cuts and Jobs Act of 2017, and other income tax related adjustments to customers. The charge will be reset on an annual basis. Interest at the weighted average of the interest rates on PSE&G's commercial paper and bank credit lines utilized in the prior month will be accrued monthly on any under or over recovered balances. The interest rate shall be reset each month.

Date of Issue: Effective:

Issued by RICARDO G. FONSECA – VP Finance – PSEG Services Corp.
80 Park Plaza, Newark, New Jersey 07102
Filed pursuant to Order of Board of Public Utilities dated
in Docket No.

TYPICAL RESIDENTIAL ELECTRIC BILL IMPACTS

The effect of the introduction of the Tax Adjustment Credit (TAC) on typical residential electric bills is illustrated below:

Residential Electric Service - Average Monthly Bill					
If Your Average Monthly kWh. Use Is:	And Your Jun. to Sep. Avg. Monthly kWh Use Is:	Then Your Present Monthly Bill (1) Would Be:	And Your Proposed Monthly Bill (2) Would Be:	Your Monthly Bill Change Would Be:	And Your Percent Change Would Be:
140	171	$43.23	$43.61	$0.38	0.9 %
279	342	80.47	81.23	0.76	0.9
558	683	155.23	156.74	1.51	1.0
650	803	180.29	182.04	1.75	1.0
977	1,279	270.53	273.17	2.64	1.0

(1) Based upon current Basic Generation Service Residential Small Commercial Pricing (BGS-RSCP) and Delivery Rates in effect October 1, 2026, and assumes that the customer receives commodity service from Public Service.

(2) Same as (1) except includes increase due to TAC.

Residential Electric Service - Monthly Summer Bill				
If Your Monthly Summer kWh Use Is:	Then Your Present Monthly Summer Bill (3) Would Be:	And Your Proposed Monthly Summer Bill (4) Would Be:	Your Monthly Summer Bill Change Would Be:	And Your Percent Change Would Be:
171	$54.91	$55.38	$0.47	0.9 %
342	103.82	104.74	0.92	0.9
683	202.48	204.33	1.85	0.9
803	238.27	240.45	2.18	0.9
1,279	381.14	384.60	3.46	0.9

(3) Based upon current Basic Generation Service Residential Small Commercial Pricing (BGS-RSCP) and Delivery Rates in effect October 1, 2026, and assumes that the customer receives commodity service from Public Service.

(4) Same as (3) except includes increase due to TAC.

TYPICAL RESIDENTIAL GAS BILL IMPACTS

The effect of the proposed changes in the Tax Adjustment Credit (TAC) on typical residential gas bills, if approved by the Board, is illustrated below:

Residential Gas Service - Average Monthly Bill					
If Your Average Monthly Therm Use	And Your Avg. Dec. to Mar. Monthly Therm Use Is:	Then Your Present Monthly Bill (1) Would Be:	And Your Proposed Monthly Bill (2) Would Be:	Your Monthly Bill Change Would Be:	And Your Percent Change Would Be:
16	25	$26.81	$27.44	$0.63	2.4%
33	50	43.63	44.88	1.25	2.9
51	100	63.88	65.81	1.93	3.0
87	172	102.18	105.49	3.31	3.2
100	198	116.40	120.22	3.82	3.3
152	300	171.28	177.07	5.79	3.4

(1) Based upon Basic Gas Supply Service (BGSS-RSG) and Delivery Rates in effect October 1, 2026, and assumes that the customer receives commodity service from Public Service.

(2) Same as (1) except includes increase due to TAC.

Residential Gas Service - Monthly Winter Bill				
If Your Monthly Winter Therm Use Is:	Then Your Present Monthly Winter Bill (3) Would Be:	And Your Proposed Monthly Winter Bill (4) Would Be:	Your Monthly Winter Bill Change Would Be:	And Your Percent Change Would Be:
25	$36.24	$37.20	$0.96	2.7%
50	62.49	64.40	1.91	3.1
100	117.53	121.35	3.82	3.3
172	195.02	201.59	6.57	3.4
198	223.00	230.57	7.57	3.4
300	332.64	344.10	11.46	3.5

(3) Based upon Basic Gas Supply Service (BGSS-RSG) and Delivery Rates in effect October 1, 2026, and assumes that the customer receives commodity service from Public Service.

(4) Same as (3) except includes increase due to TAC.

NOTICE TO PUBLIC SERVICE ELECTRIC AND GAS COMPANY CUSTOMERS

IN THE MATTER OF THE PETITION OF PUBLIC SERVICE ELECTRIC AND GAS COMPANY FOR APPROVAL OF CHANGES IN ITS ELECTRIC TAX ADJUSTMENT CREDIT AND GAS TAX ADJUSTMENT CREDIT

Notice of a Filing and Notice of Public Hearings
BPU Docket Nos.

PLEASE TAKE NOTICE that, on October 30, 2026, Public Service Electric and Gas Company ("PSE&G," or "Company") filed a petition and supporting documentation with the New Jersey Board of Public Utilities ("Board" or "BPU") requesting a resetting of the Company's electric and gas Tax Adjustment Credits ("TACs") ("2026 TAC Filing"). The TACs are designed to return net tax benefits from the Tax Cuts and Jobs Act of 2017, and other income tax related adjustments to customers. If approved by the Board, the 2026 TAC Filing would reduce the rate credits paid to the Company's electric customers, thereby increasing customer electric bills, by $49.4 million annually, and would reduce the rate credits paid to the Company's gas customers, thereby increasing customer gas bills, by $75.3 million annually. The proposed electric and gas TAC rate changes are shown in Tables #1 and #2 below.

The approximate effects of the proposed changes on typical electric and gas residential monthly bills, if approved by the Board, are illustrated in Tables #3 and #4 below.

Based upon the 2026 TAC Filing, a typical residential electric customer using 683 kWh in a summer month and 558 kWh in an average month or 6,700 kWh annually, would see an increase in their average monthly bill from $155.23 to $156.74, or $1.51 or approximately 1.0%.

Based upon the 2026 TAC Filing, a typical residential gas heating customer using 172 therms per month during the winter months, and 87 therms in an average month or 1,040 therms annually, would see an increase in the average monthly bill from $102.18 to $105.49 or $3.31 or approximately 3.2%.

The Board has the statutory authority pursuant to N.J.S.A. 48:2-21, to establish the TACs credits at levels it finds just and reasonable. Therefore, the Board may establish the TACs credits at levels other than that proposed by PSE&G. As a result, the described charges may increase or decrease based upon the Board's decision.

All PSE&G's costs, including those addressed in the 2026 TAC Filing will remain subject to audit by the Board, and Board approval shall not preclude or prohibit the Board from taking any such actions deemed appropriate as a result of any such audit.

Any assistance required by customers in ascertaining the impact of the proposed rate increase will be provided by the Company upon request.

A copy of this Notice of a Filing and Notice of Public hearings is being served upon the clerk, executive or administrator of each municipality and county within the Company's service territory. The 2026 TAC Filing is available for review online at the PSE&G website at http://www.pseg.com/pseandgfilings and was provided to the New Jersey Division of Rate Counsel ("Rate Counsel"), who will represent the interests of all PSE&G customers in this proceeding. The 2026 TAC Filing may also be viewed on the Board's website, https://publicaccess.bpu.state.nj.us, where you can search by the docket number(s) identified in the caption above. The 2026 TAC Filing and Board file may also be reviewed at the Board located at 44 South Clinton Avenue, 1st Floor, Trenton, NJ, with an appointment. To make an appointment, please call (609) 913-6298.

PLEASE TAKE FURTHER NOTICE that virtual public hearings are scheduled on the following date and times so that members of the public may present their views on the 2026 TAC Filing.

DATE:
TIMES: 4:30 p.m. and 5:30 p.m.

There are two options for joining.
Either go to this website:
https://www.microsoft.com/en-us/microsoft-teams/join-a-meeting
and enter the following information:

Meeting ID: 992 979 119 781
Passcode: 3X59PZ

-or-

Join by Phone
Dial In: (973) 536-2286
Phone conference ID: 537 811 425#

When prompted, enter the Meeting ID number to access the meeting.

Representatives from the Company, Board Staff, and Rate Counsel will participate in the virtual public hearings. Members of the public may participate by utilizing the link or Dial-In number set forth above to express their views on the 2026 TAC Filing. All comments will be made a part of the final record in this proceeding and will be considered by the Board. To encourage full participation in this opportunity for public comment, please submit any requests for needed accommodations, such as

interpreters and/or listening assistance, forty-eight (48) hours prior to the above hearings to the Secretary at board.secretary@bpu.nj.gov.

Comments may be submitted directly to the specific docket numbers listed above using the "Post Comments" button on the Board's Public Document Search tool https://publicaccess.bpu.state.nj.us/. Comments are considered public documents for purposes of the State's Open Public Records Act. Only documents that are intended for the public should be submitted using the "Post Comments" button on the Board's Public Document Search tool. Any confidential information should be submitted in accordance with the procedures set forth in N.J.A.C. 14:1-12.3. In addition to hard copy submissions, confidential information may be filed electronically via the Board's e-filing system or by email to the Secretary of the Board, Sherri L. Lewis. Please include "Confidential Information" in the subject line of any email. Instructions for confidential e-filing are found on the Board's webpage, https://www.nj.gov/bpu/agenda/efiling/.

Emailed and/or written comments may also be submitted to:

Sherri L. Lewis, Secretary of the Board
44 South Clinton Ave.
PO Box 350
Trenton, NJ 08625-0350
Phone: 609-913-6241
Email: board.secretary@bpu.nj.gov
