

NOTICE TO PUBLIC SERVICE ELECTRIC AND GAS COMPANY ELECTRIC CUSTOMERS
Notice of Filing and Public Hearings

IN THE MATTER OF THE PROVISION OF BASIC GENERATION SERVICE ("BGS")
FOR THE PERIOD BEGINNING JUNE 1, 2027

BPU Docket No. ER26040105

PLEASE TAKE NOTICE that on July 1, 2026, Public Service Electric and Gas Company ("PSE&G" or "Company") filed an annual "Proposal for Basic Generation Service ("BGS") Requirements to be Procured Effective June 1, 2027" with the New Jersey Board of Public Utilities ("Board" or "BPU"), requesting that the Board approve the procurement of BGS through a statewide competitive auction process with new BGS charges to become effective June 1, 2027 ("Petition"). BGS is the default electric generation supply provided to all PSE&G customers who do not purchase their electricity supply from a third-party supplier.

The Board mandates that the New Jersey electric distribution companies ("EDCs"), including PSE&G, provide BGS in accordance with the requirements of the Electric Discount and Energy Competition Act N.J.S.A. 48:3-49, et seq. ("Act"). BGS is currently procured through a statewide competitive auction process in which all EDCs seek competitive offers for BGS supply from electric generation suppliers. In this auction process, electric generation suppliers bid in a descending-clock auction on specified portions of the electric requirements for BGS customers for each EDC. Since 2001, the Board has approved this type of auction and found that this process meets the statutory requirements of the Act. The Company's Petition is available at <https://www.bgs-auction.com/bgs.auction.regproc.asp>.

The final price for such supply, provided under the PSE&G Basic Generation Service – Residential Small Commercial Pricing ("BGS-RSCP") tariff and resulting from the BGS-RSCP auction conducted in 2026, was \$0.10938 per kilowatt-hour for a thirty-six (36)-month supply period. For supply provided under the PSE&G Basic Generation Service – Commercial and Industrial Energy Pricing ("BGS-CIEP") tariff—resulting from the auction conducted in 2026—the Generation Capacity Charge cleared at \$677.73 per MW-day.

The final auction clearing prices for the BGS supply procured in the 2027 BGS-RSCP and BGS-CIEP auctions may be higher or lower than the prices obtained in the 2026 auctions. Auction prices are converted to customer charges, which may be higher or lower than current charges, depending on the outcome of the auction consistent with market conditions. BGS charges also include applicable transmission charges set by the Federal Energy Regulatory Commission ("FERC"). BGS-RSCP and BGS-CIEP charges may change to reflect any increases or decreases in these FERC-approved transmission charges.

As proposed in the Petition, the criteria for BGS-CIEP eligibility would be set at a peak load share of 500 kW. Customer classes eligible to be served under the BGS-RSCP rate include customers served under PSE&G's distribution Rate Schedules RS, RHS, RLM, WH, WHS, HS, BPL, BPL-POF, PSAL, GLP and LPL-Secondary with a peak load share of less than 500 kW. Customers served on Rate Schedules HS, GLP and LPL-Secondary may elect to be served at BGS-CIEP as their default supply option. Additionally, PSE&G customers served under distribution Rate Schedules LPL-Primary, HTS-Subtransmission, HTS-Transmission, HTS-High Voltage, and those LPL-Secondary customers with a peak load share of 500 kW or greater are only eligible to be served under BGS-CIEP. These criteria for BGS-CIEP service are subject to change for this year's procurement at the discretion of the Board.

PLEASE TAKE FURTHER NOTICE that a virtual public hearing is scheduled on the following date and time so that members of the public may present their views on the Petition.
