

## ***Transmission Right-of-Way Compatible Tree / Shrub List***

The following is a list of trees & shrubs that are *generally* compatible within the border zone of the transmission right-of-way; as a rule only woody vegetation with a mature height of 3' or less is allowed in the wire zone. Site specific factors such as conductor height, terrain and corridor width must be taken into account when determining where on the right-of-way and which (if any) of the listed, or other, species are compatible. This list is subject to change and accurate only in ideal circumstances; only authorized PSE&G vegetation management personnel can determine compatibility of vegetation on PSE&G rights-of-way at any given location.
