GAAP to Operating Adjustments

- **Exelon's 2017 adjusted (non-GAAP) operating earnings excludes the earnings effects of the following:**
  - Mark-to-market adjustments from economic hedging activities
  - Unrealized gains from NDT fund investments to the extent not offset by contractual accounting as described in the notes to the consolidated financial statements
  - Non-cash amortization of intangible assets, net, related to commodity contracts recorded at fair value at the ConEdison Solutions and FitzPatrick acquisition dates
  - Certain merger and integration costs associated with the PHI and FitzPatrick acquisitions
  - Adjustments to reserves for uncertain tax positions related to the deductibility of certain merger commitments associated with the 2012 CEG and 2016 PHI acquisitions
  - Impairments as a result of the ExGen Texas Power, LLC assets held for sale
  - Plant retirements and divestitures at Generation
  - Non-cash impact of the remeasurement of state deferred income taxes, related to changes in statutory tax rates and changes in forecasted apportionment
  - Costs incurred related to a cost management program
  - Certain adjustments related to Exelon's like-kind exchange tax position
  - Non-cash benefit pursuant to the annual update of the Generation nuclear decommissioning obligation related to the non-regulatory units
  - Benefits related to the favorable settlement of certain income tax positions related to PHI's unregulated business interests
  - The excess of the fair value of assets and liabilities acquired over the purchase price for the FitzPatrick acquisition
  - Generation's noncontrolling interest, primarily related to CENG exclusion items

Exelon.

GAAP to Non-GAAP Reconciliations

YE 2017 Exelon FFO Calculation ($M)[1,2,10,11]	
GAAP Operating Income	$3,500
Depreciation & Amortization	$3,350
EBITDA	$6,850
+/- Non-operating activities and nonrecurring items[3]	$450
- Interest Expense	($1,450)
+ Current Income Tax (Expense)/Benefit	$325
+ Nuclear Fuel Amortization	$1,075
+/- Other S&P Adjustments[4]	$350
= FFO (a)	**$7,600**

YE 2017 Exelon Adjusted Debt Calculation ($M)[1,2,10]	
Long-Term Debt (including current maturities)	$32,050
Short-Term Debt	$1,125
+ PPA Imputed Debt[5]	$350
+ Operating Lease Imputed Debt[6]	$875
+ Pension/OPEB Imputed Debt[7]	$4,100
- Off-Credit Treatment of Debt[8]	($1,725)
- Surplus Cash Adjustment[9]	($600)
+/- Other S&P Adjustments[4]	($650)
= Adjusted Debt (b)	**$35,525**

YE 2017 Exelon FFO/Debt[1,2]		
FFO (a) / Adjusted Debt (b)	=	21%

(1) All amounts rounded to the nearest $25M
(2) Calculated using S&P Methodology. Due to ring-fencing, S&P deconsolidates BGE from Exelon and analyzes solely as an equity investment.
(3) Reflects impact of operating adjustments on GAAP EBITDA
(4) Includes other adjustments as prescribed by S&P
(5) Reflects present value of net capacity purchases
(6) Reflects present value of minimum future operating lease payments
(7) Reflects after-tax unfunded pension/OPEB
(8) Includes non-recourse project debt
(9) Applies 75% of excess cash against balance of LTD
(10) Reflects removal of EGTP
(11) Reflects delay in Illinois ZEC revenue recognition from 2017 to 2018

Exelon.

GAAP to Non-GAAP Reconciliations

YE 2017 ExGen Net Debt Calculation ($M)[1,3]	
Long-Term Debt (including current maturities)	$8,775
Short-Term Debt	$350
- Surplus Cash Adjustment	($300)
= Net Debt (a)	**$8,825**

YE 2017 ExGen Net Debt Calculation ($M)[1,3]	
Long-Term Debt (including current maturities)	$8,775
Short-Term Debt	$350
- Surplus Cash Adjustment	($300)
- Nonrecourse Debt	($1,925)
= Net Debt (a)	**$6,900**

YE 2017 ExGen Operating EBITDA Calculation ($M)[1,3,4]	
GAAP Operating Income	$775
Depreciation & Amortization	$1,375
EBITDA	$2,150
+/- Non-operating activities and nonrecurring items[2]	$725
= Operating EBITDA (b)	**$2,875**

YE 2017 ExGen Operating EBITDA Calculation ($M)[1,3,4]	
GAAP Operating Income	$775
Depreciation & Amortization	$1,375
EBITDA	$2,150
+/- Non-operating activities and nonrecurring items[2]	$725
- EBITDA from projects financed by nonrecourse debt	($250)
= Operating EBITDA (b)	**$2,625**

YE 2017 Book Debt / EBITDA		
Net Debt (a) / Operating EBITDA (b)	=	3.1x

YE 2017 Recourse Debt / EBITDA		
Net Debt (a) / Operating EBITDA (b)	=	2.6x

(1) All amounts rounded to the nearest $25M
(2) Reflects impact operating adjustments on GAAP EBITDA
(3) Reflects removal of EGTP
(4) Reflects delay in Illinois ZEC revenue recognition from 2017 to 2018

Exelon.

GAAP to Non-GAAP Reconciliations

Q3 2017 Operating ROE Reconciliation ($M)[1]	ACE	Delmarva	Pepco	Legacy EXC	Consolidated EU
Net Income (GAAP)[1]	$85	$114	$210	$1,281	$1,690

GAAP to Non-GAAP Reconciliations

2017 Adjusted Cash from Ops Calculation ($M)[1]	ComEd	PECO	BGE	PHI	ExGen	Other	Exelon
Net cash flows provided by operating activities (GAAP)	$1,375	$750	$775	$1,175	$3,400	($250)	$7,225
Other cash from investing activities	-	-	-	-	($275)	-	($275)
Intercompany receivable adjustment	($350)	-	-	-	-	$350	-
Counterparty collateral activity	-	-	-	-	$200	-	$200
Adjusted Cash Flow from Operations	**$1,025**	**$750**	**$775**	**$1,175**	**$3,350**	**$75**	**$7,150**

2017 Cash From Financing Calculation ($M)[1]	ComEd	PECO	BGE	PHI	ExGen	Other	Exelon
Net cash flow provided by financing activities (GAAP)	$825	$175	$150	$125	($300)	$400	$1,375
Dividends paid on common stock	$425	$300	$200	$325	$650	($675)	$1,225
Intercompany receivable adjustment	$350	-	-	-	-	($350)	-
Financing Cash Flow	**$1,600**	**$475**	**$350**	**$450**	**$350**	**($625)**	**$2,625**

Exelon Total Cash Flow Reconciliation[1]	2017
GAAP Beginning Cash Balance	**$650**
Adjustment for Cash Collateral Posted	$400
Adjusted Beginning Cash Balance[3]	$1,050
Net Change in Cash (GAAP)[2]	$400
Adjusted Ending Cash Balance[3]	$1,450
Adjustment for Cash Collateral Posted	($625)
GAAP Ending Cash Balance	**$825**

(1) All amounts rounded to the nearest $25M. Items may not sum due to rounding.
(2) Represents the GAAP measure of net change in cash, which is the sum of cash flow from operations, cash from investing activities, and cash from financing activities. Figures reflect cash capital expenditures and CENG fleet at 100%.
(3) Adjusted Beginning and Ending cash balances reflect GAAP Beginning and End Cash Balances excluding counterparty collateral activity

Exelon.

GAAP to Non-GAAP Reconciliations

ExGen Adjusted O&M Reconciliation ($M)[1]	2017	2018	2019	2020
GAAP O&M	**$6,325**	**$5,300**	**$5,150**	**$5,025**
Decommissioning[2]	25	50	50	50
TMI Retirement	(75)	-	-	-
EGTP Impairment	(450)	-	-	-
Direct cost of sales incurred to generate revenues for certain Constellation and Power businesses[3]	(425)	(325)	(325)	(325)
O&M for managed plants that are partially owned	(425)	(425)	(400)	(425)
Other	(125)	(25)	(25)	(25)
Adjusted O&M (Non-GAAP)	**$4,850**	**$4,600**	**$4,450**	**$4,300**

2017-2020 ExGen Free Cash Flow Calculation ($M)[1]	
Cash from Operations (GAAP)	$15,150
Other Cash from Investing and Activities	($650)
Baseline Capital Expenditures[4]	($4,025)
Nuclear Fuel Capital Expenditures	($3,625)
Free Cash Flow before Growth CapEx and Dividend	**$6,825**

(1) All amounts rounded to the nearest $25M. Items may not sum due to rounding.
(2) Reflects earnings neutral O&M
(3) Reflects the direct cost of sales of certain businesses, which are included in Total Gross Margin*
(4) Baseline capital expenditures refer to maintenance and required capital expenditures necessary for day-to-day plant operations and includes merger commitments

Section 7 – Regulation FD

Item 7.01. Regulation FD Disclosure.

On November 7-8, 2016, Exelon Corporation (Exelon) will participate in the Edison Electric Institute (EEI) conference. During the conference, Exelon will re-affirm its 2016 adjusted (non-GAAP) operating earnings guidance range of $2.55—$2.75 per share, as disclosed in its third quarter 2016 earnings release and the slides for its earnings call, as furnished to the SEC in the Current Report on Form 8-K on October 26, 2016. The materials Exelon will discuss at the conference have been previously furnished to the SEC in either that 8-K or in the 8-K furnished on August 10, 2016 with the materials for Exelon's Analyst Day presentation. The slides for the EEI conference have been posted on Exelon's website, www.exeloncorp.com , on the Investor Relations page.

This combined Current Report on Form 8-K is being furnished separately by Exelon, Exelon Generation Company, LLC, Commonwealth Edison Company, PECO Energy Company, Baltimore Gas and Electric Company, Pepco Holdings LLC (PHI), Potomac Electric Power Company, Delmarva Power & Light Company, and Atlantic City Electric Company (Registrants). Information contained herein relating to any individual Registrant has been furnished by such Registrant on its own behalf. No Registrant makes any representation as to information relating to any other Registrant.

This report contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, that are subject to risks and uncertainties. The factors that could cause actual results to differ materially from the forward-looking statements made by Registrants include those factors discussed herein, as well as the items discussed in (1) Exelon's 2015 Annual Report on Form 10-K in (a) ITEM 1A. Risk Factors, (b) ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) ITEM 8. Financial Statements and Supplementary Data: Note 23; (2) PHI's 2015 Annual Report on Form 10-K in (a) ITEM 1A. Risk Factors, (b) ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) ITEM 8. Financial Statements and Supplementary Data: Note 16; (3) Exelon's Third Quarter 2016 Quarterly Report on Form 10-Q in (a) Part II, Other Information, ITEM 1A. Risk Factors; (b) Part 1, Financial Information, ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) Part I, Financial Information, ITEM 1. Financial Statements: Note 18 and (4) other factors discussed in filings with the SEC by the Registrants. Readers are cautioned not to place undue reliance on these forward-looking statements, which apply only as of the date of this report. None of the Registrants undertakes any obligation to publicly release any revision to its forward-looking statements to reflect events or circumstances after the date of this report.

EEI Financial Conference

November 2017

Exelon.

S1-SSA-0009 - 10020

Cautionary Statements Regarding Forward-Looking Information

This presentation contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, that are subject to risks and uncertainties. The factors that could cause actual results to differ materially from the forward-looking statements made by Exelon Corporation, Exelon Generation Company, LLC, Commonwealth Edison Company, PECO Energy Company, Baltimore Gas and Electric Company, Pepco Holdings LLC, Potomac Electric Power Company, Delmarva Power & Light Company, and Atlantic City Electric Company (Registrants) include those factors discussed herein, as well as the items discussed in (1) Exelon's 2016 Annual Report on Form 10-K in (a) ITEM 1A. Risk Factors, (b) ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) ITEM 8. Financial Statements and Supplementary Data: Note 24, Commitments and Contingencies; (2) Exelon's Third Quarter 2017 Quarterly Report on Form 10-Q in (a) Part II, Other Information, ITEM 1A. Risk Factors; (b) Part 1, Financial Information, ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) Part I, Financial Information, ITEM 1. Financial Statements: Note 18; and (2) other factors discussed in filings with the SEC by the Registrants. Readers are cautioned not to place undue reliance on these forward-looking statements, which apply only as of the date of this press release. None of the Registrants undertakes any obligation to publicly release any revision to its forward-looking statements to reflect events or circumstances after the date of this presentation.

Exelon.

Non-GAAP Financial Measures

Exelon reports its financial results in accordance with accounting principles generally accepted in the United States (GAAP). Exelon supplements the reporting of financial information determined in accordance with GAAP with certain non-GAAP financial measures, including:

- ***Adjusted operating earnings*** exclude certain costs, expenses, gains and losses and other specified items, including mark-to-market adjustments from economic hedging activities, unrealized gains and losses from nuclear decommissioning trust fund investments, merger and integration related costs, impairments of certain long-lived assets, certain amounts associated with plant retirements and divestitures, costs related to a cost management program and other items as set forth in the reconciliation in the Appendix
- ***Adjusted operating and maintenance expense*** excludes regulatory operating and maintenance costs for the utility businesses and direct cost of sales for certain Constellation and Power businesses, decommissioning costs that do not affect profit and loss, the impact from operating and maintenance expense related to variable interest entities at Generation, EDF's ownership of O&M expenses, and other items as set forth in the reconciliation in the Appendix
- ***Total gross margin*** is defined as operating revenues less purchased power and fuel expense, excluding revenue related to decommissioning, gross receipts tax, Exelon Nuclear Partners, JExel Nuclear JV, variable interest entities, and net of direct cost of sales for certain Constellation and Power businesses
- ***Adjusted cash flow from operations*** primarily includes net cash flows from operating activities and net cash flows from investing activities excluding capital expenditures, net merger and acquisitions, and equity investments
- ***Free cash flow*** primarily includes net cash flows from operating activities and net cash flows from investing activities excluding certain capital expenditures, net merger and acquisitions, and equity investments
- ***Operating ROE*** is calculated using operating net income divided by average equity for the period. The operating income reflects all lines of business for the utility business (Electric Distribution, Gas Distribution, Transmission).
- ***EBITDA*** is defined as earnings before interest, taxes, depreciation and amortization. Includes nuclear fuel amortization expense.
- ***Revenue net of purchased power and fuel expense*** is calculated as the GAAP measure of operating revenue less the GAAP measure of purchased power and fuel expense

Due to the forward-looking nature of some forecasted non-GAAP measures, information to reconcile the forecasted adjusted (non-GAAP) measures to the most directly comparable GAAP measure may not be currently available, as management is unable to project all of these items for future periods

Exelon.

Non-GAAP Financial Measures Continued

This information is intended to enhance an investor's overall understanding of period over period financial results and provide an indication of Exelon's baseline operating performance by excluding items that are considered by management to be not directly related to the ongoing operations of the business. In addition, this information is among the primary indicators management uses as a basis for evaluating performance, allocating resources, setting incentive compensation targets and planning and forecasting of future periods.

These non-GAAP financial measures are not a presentation defined under GAAP and may not be comparable to other companies' presentation. Exelon has provided these non-GAAP financial measures as supplemental information and in addition to the financial measures that are calculated and presented in accordance with GAAP. These non-GAAP measures should not be deemed more useful than, a substitute for, or an alternative to the most comparable GAAP measures provided in the materials presented.

Non-GAAP financial measures are identified by the phrase "non-GAAP" or an asterisk. Reconciliations of these non-GAAP measures to the most comparable GAAP measures are provided in the appendices and attachments to this presentation, except for the reconciliation for total gross margin, which appears on slide 45 of this presentation.

Exelon: An Industry Leader

Note: All numbers reflect year-end 2016; revenue accounts for PHI as of the merger effective date of March 24, 2016 through December 31, 2016.

Exelon.

The Exelon Value Proposition

- **Regulated Utility Growth** with utility EPS rising 6-8% annually from 2017-2020 and rate base growth of 6.5%, representing an expanding majority of earnings
- **ExGen's strong free cash generation** will support utility growth while also reducing debt by ~$3B over the next 4 years
- **Optimizing ExGen value by:**
  - Seeking fair compensation for the zero-carbon attributes of our fleet;
  - Closing uneconomic plants;
  - Monetizing assets; and
  - Maximizing the value of the fleet through our generation to load matching strategy
- **Strong balance sheet is a priority** with all businesses comfortably meeting investment grade credit metrics through the 2020 planning horizon
- **Capital allocation priorities targeting:**
  - Organic utility growth;
  - Return of capital to shareholders with 2.5% annual dividend growth through 2018(1),
  - Debt reduction; and
  - Modest contracted generation investments

(1) Quarterly dividends are subject to declaration by the board of directors

Exelon.

Exelon Utilities Overview

$31.7B
2016 Rate Base

$15.1B
In Revenue

24.9
Thousand mi²
Combined
Service Territory

8.5 M
Smart Meters
Installed

Note: All numbers reflect year-end 2016; revenue number accounts for PHI revenue as of March 24, 2016 merger date.

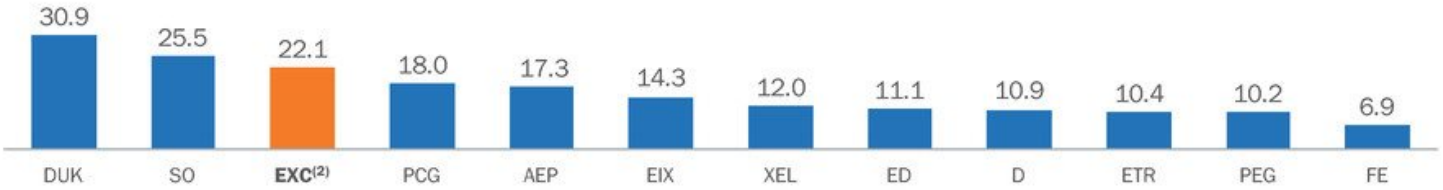
Exelon.

S1-SSA-0009 - 10026

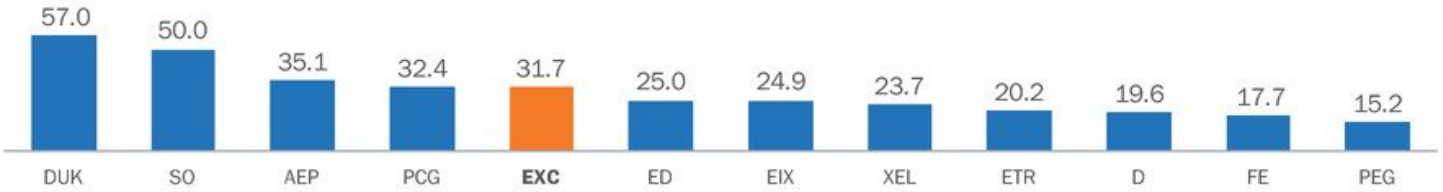
Exelon Utilities are an Industry Leader

US Utility Customers (millions)

Total Capital Expenditures 2017-2019 ($B)[1]



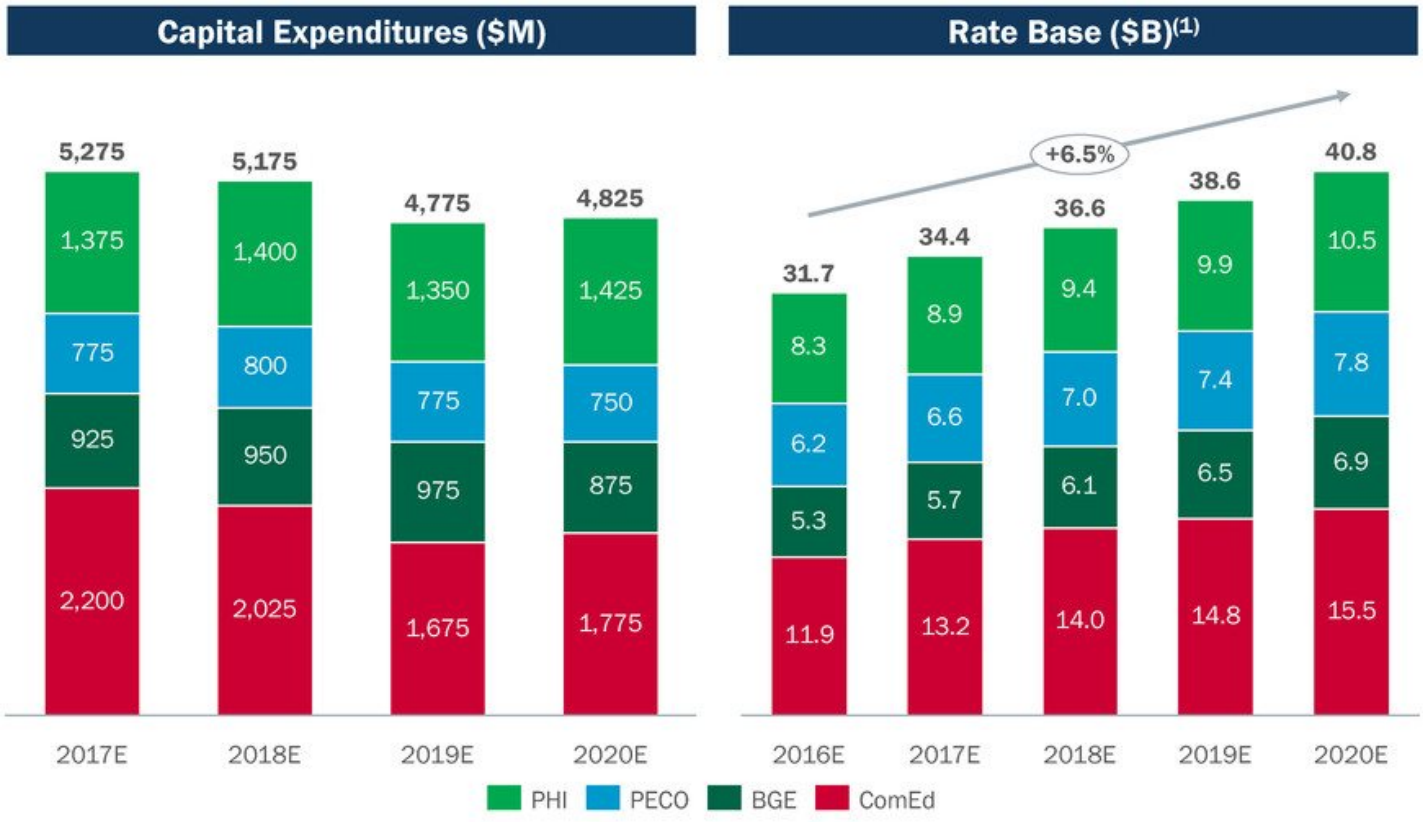
Total Utility Rate Base ($B)[1]



Source: Company Filings
(1) Includes utility and generation
(2) $23B includes $15.2B of utility capital expenditures and $6.9B of generation capital expenditures

Exelon.

Our Capital Plan Drives Stable Earnings Growth



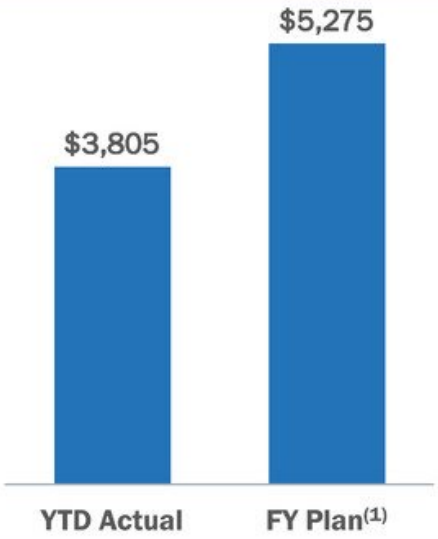
Over $20B of capital is being invested at utilities from 2017-2020 to improve reliability

Note: CapEx numbers are rounded to nearest $25M and numbers may not add due to rounding
(1) Rate base reflects year-end estimates

Exelon.

Utility CapEx Update

2017 Exelon Utilities CapEx Spend ($M)



Notable Projects

- **Pepco's Waterfront Substation**
  - $182 million invested to date. Expected completion by end of 2017
  - Part of "Capital Grid" project
  - Replaces aging infrastructure and improves substation performance
  - Will support existing customers and planned development in the Capitol Riverfront and Southwest Waterfront areas
- **ComEd's Grand Prairie Gateway transmission line**
  - $203 million investment
  - 60-mile, 345kV line through four northern Illinois counties
  - Energized April 2017
  - Estimated customer savings of $121 to $325 million, net of construct costs, within the first 15 years
  - Reduces carbon emissions by nearly 500,000 tons within the first 15 years

Exelon Utilities on track to meet their 2017 capital investment commitments to the benefit of customers

(1) FY Plan rounded to the nearest $25M

Exelon.

Proven Track Record of Improving Operational Performance

Operations	Metric	At CEG Merger (2012)			2015	Q3 2017			
		BGE	ComEd	PECO	PHI	BGE	ComEd	PECO	PHI
Electric Operations	OSHA Recordable Rate								
	2.5 Beta SAIFI (Outage Frequency)(1)								
	2.5 Beta CAIDI (Outage Duration)								
Customer Operations	Customer Satisfaction				N/A				
	Service Level % of Calls Answered in <30 sec								
	Abandon Rate								
Gas Operations	Percent of Calls Responded to in <1 Hour		No Gas Operations				No Gas Operations		
Overall Rank	Electric Utility Panel of 24 Utilities(2)	23rd	2nd	2nd	18th				

Performance Quartiles: Q1 | Q2 | Q3 | Q4

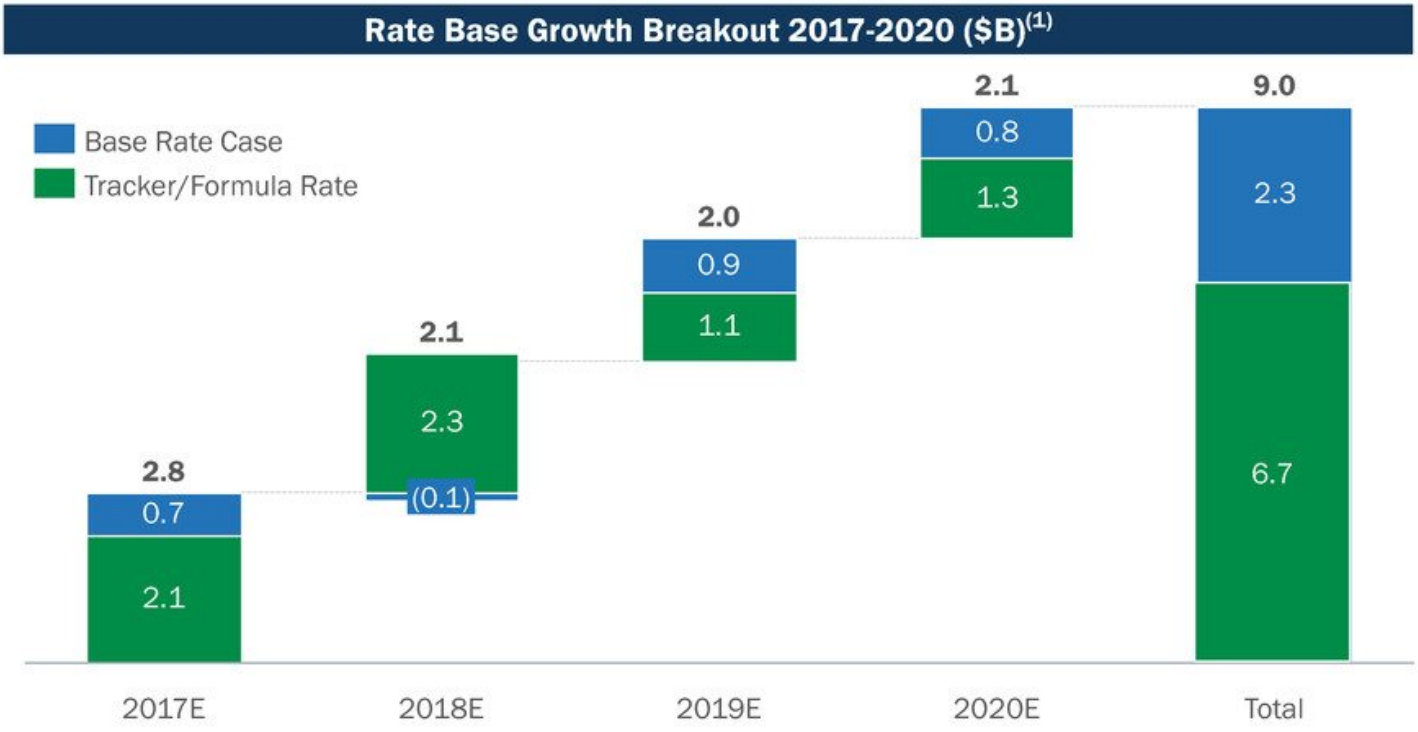
Exelon Utilities has identified and transferred best practices at each of its utilities to improve operating performance in areas such as:

- System Performance
- Emergency Preparedness
- Corrective and Preventive Maintenance

(1) 2.5 Beta SAIFI is YE projection
(2) Ranking based on results of five key industry performance indicators – CAIDI, SAIFI, Safety, Customer Satisfaction, and Cost per Customer

Exelon.

Formulaic Mechanisms Cover Bulk of Rate Base Growth

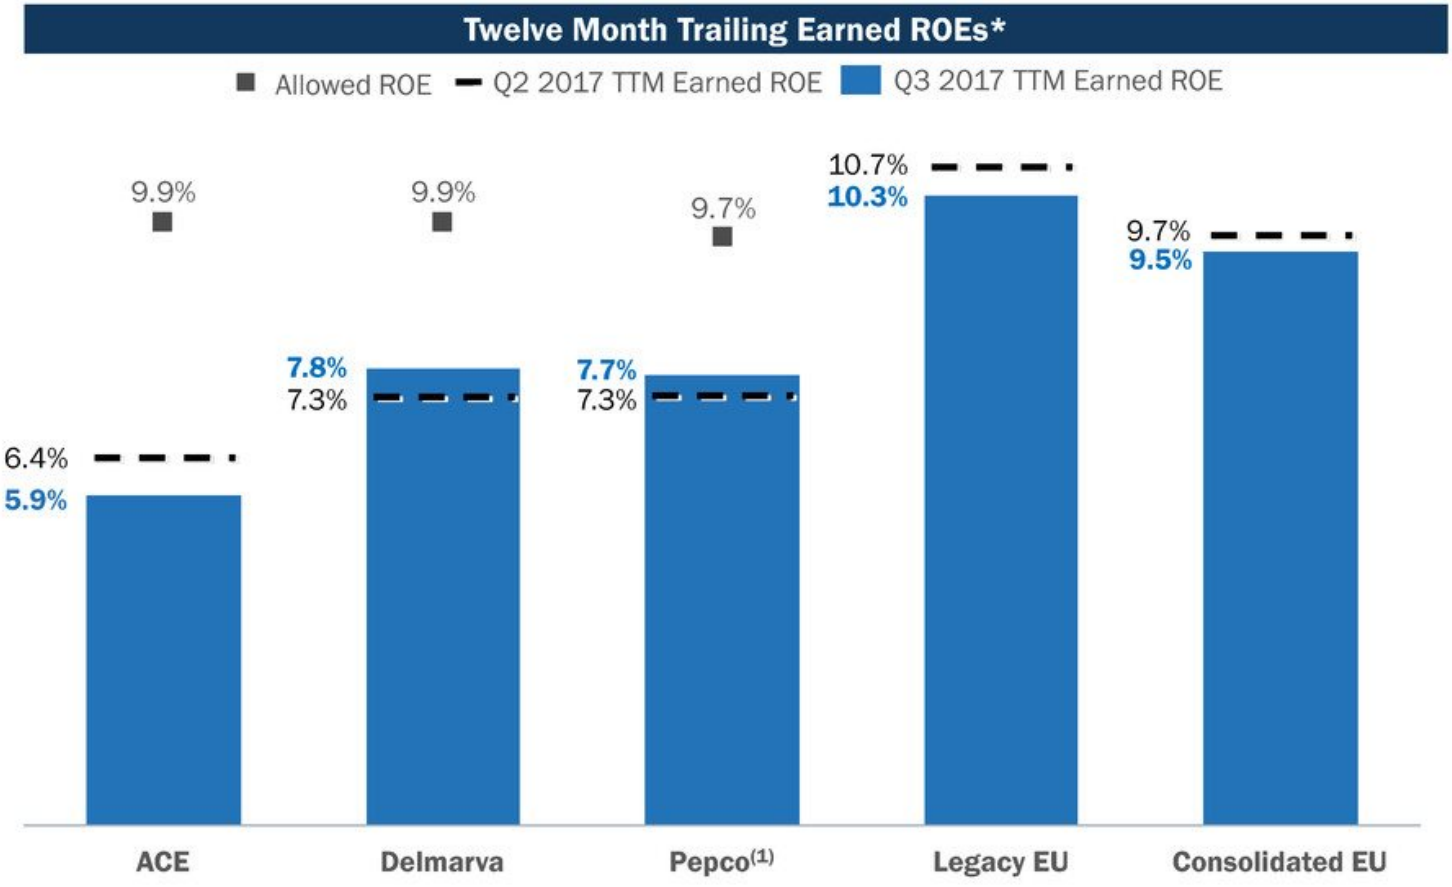


Of the approximately $9.0 billion of rate base growth Exelon Utilities forecasts over the next 4 years, ~75% will be recovered through existing formula and tracker mechanisms

Note: Numbers may not add due to rounding
(1) Assumes PECO transmission formula rate beginning in 2018; base rate base decrease due to reclassification of transmission rate base growth at PECO

Exelon.

Trailing 12 Month ROE vs Allowed ROE



Note: Represents the period from 10/1/2016 to 9/30/2017. ROEs represent weighted average across all lines of business (Electric Distribution, Gas Distribution, and Transmission).

(1) Pepco MD Distribution allowed ROE is based on authorized ROE of 9.55% for the rates that were in effect during the trailing twelve month period. The order issued on 10/20/17 authorized an ROE of 9.50%.

Exelon.

Exelon Utilities' Distribution Rate Case Updates

Pepco DC Order	
Authorized Revenue Requirement Increase[1]	$36.9M
Authorized ROE	9.50%
Common Equity Ratio	49.14%
Order Received	7/25/17

ACE NJ Order	
Authorized Revenue Requirement Increase[1]	$43.0M
Authorized ROE	9.60%
Common Equity Ratio	50.47%
Order Received	9/22/17

Pepco MD Order	
Authorized Revenue Requirement Increase[1]	$32.4M
Authorized ROE	9.50%
Common Equity Ratio	50.15%
Order Received	10/20/17

ComEd Filing	
Requested Revenue Requirement Increase[1]	$95.6M[2]
Requested ROE	8.40%
Requested Common Equity Ratio	45.89%
Order Expected	Q4 2017

Delmarva MD Filing	
Requested Revenue Requirement Increase[1]	$21.6M[4]
Requested ROE	10.10%
Requested Common Equity Ratio	50.68%
Order Expected	2/14/18

Delmarva DE Electric Filing	
Requested Revenue Requirement Increase[1,3]	$31.2M
Requested ROE	10.10%
Requested Common Equity Ratio	50.52%
Order Expected	Q3 2018

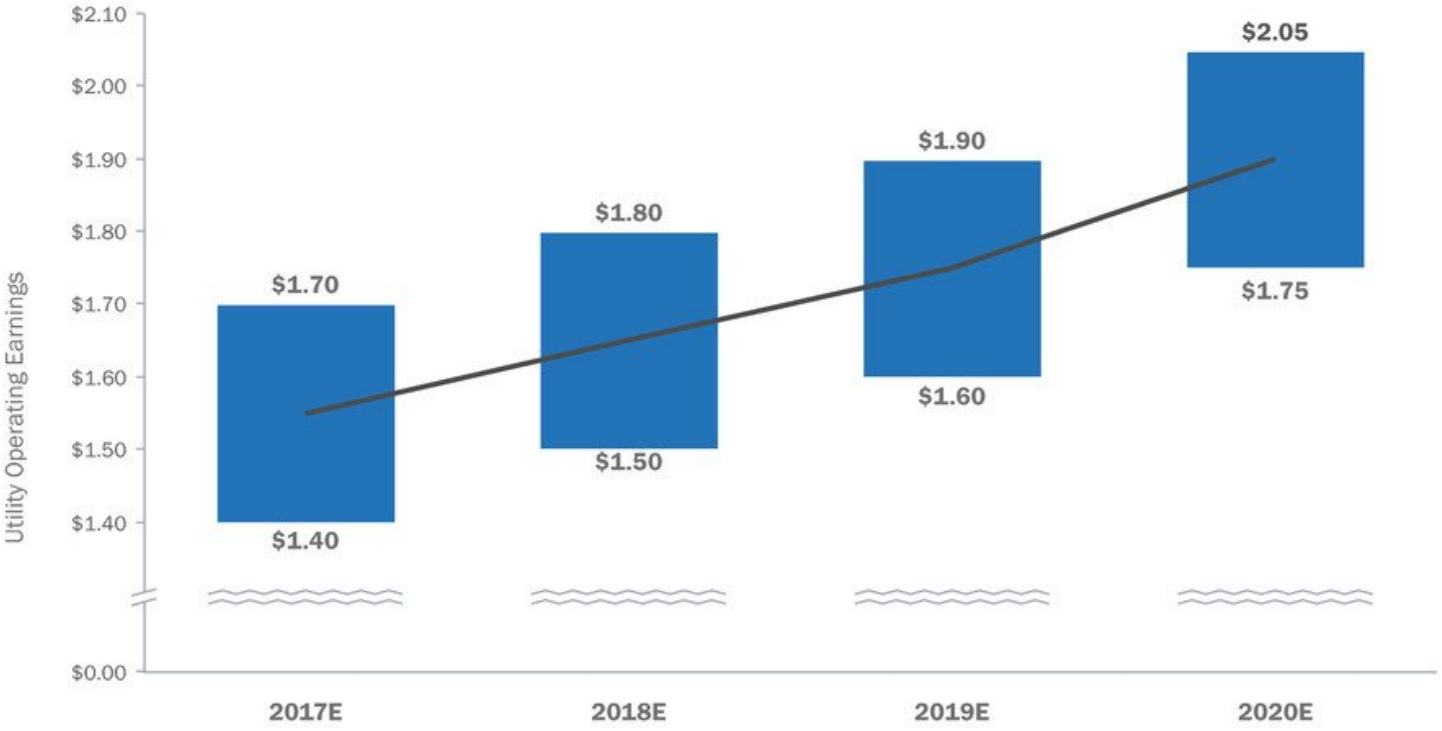
Delmarva DE Gas Filing	
Requested Revenue Requirement Increase[1,3]	$12.9M
Requested ROE	10.10%
Requested Common Equity Ratio	50.52%
Order Expected	Q3 2018

(1) Revenue requirement includes changes in depreciation and amortization expense where applicable, which have no impact on pre-tax earnings
(2) Amount represents ComEd's position filed in Rebuttal testimony on July 21, 2017
(3) As permitted by Delaware law, Delmarva Power will implement interim rate increases of $2.5M in Q3 2017 and will implement full allowable rates on March 17, 2018, subject to refund
(4) Amount represents adjusted requested revenue requirement filed on September 28, 2017

Exelon.

Exelon Utilities EPS Growth of 6-8% to 2020

Exelon Utilities Operating Earnings 2017-2020

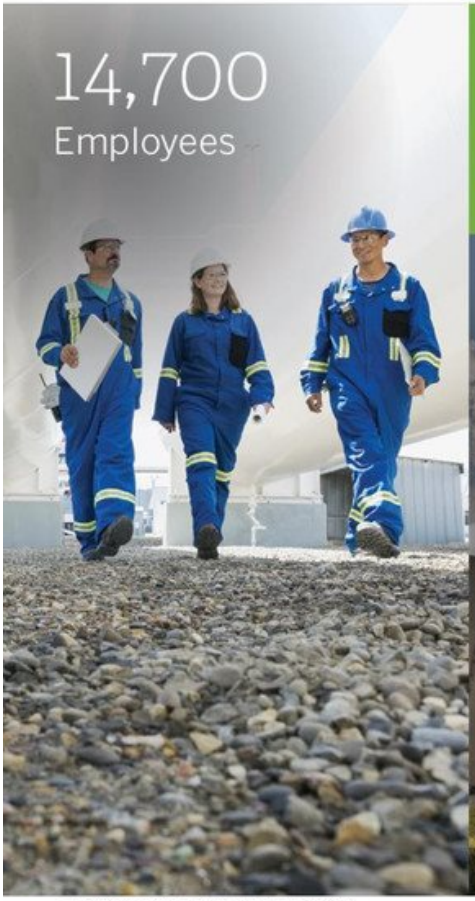


Rate base growth combined with PHI ROE improvement drives EPS growth

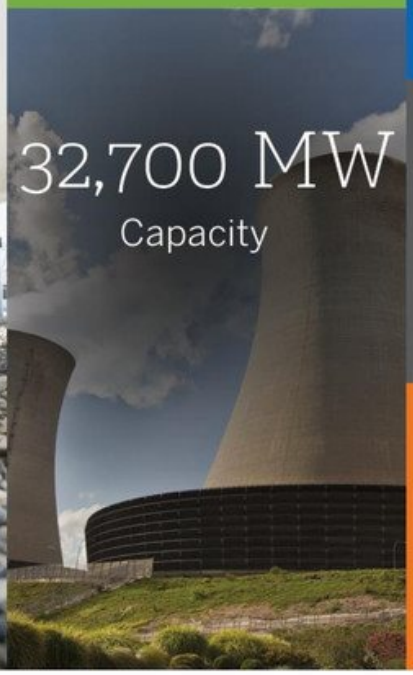
Note: Reflects GAAP operating earnings except for 2017. 2017 GAAP EPS range would be $1.35 to $1.65. 2017 adjusted (non-GAAP) operating earnings include adjustments to exclude $0.05 for merger commitments and integration costs. Includes after-tax interest expense held at Corporate for debt associated with existing utility investment.

Exelon.

Exelon Generation Overview



#1
Lowest carbon intensity among large power generators



#1
Retail electricity provider in the country

205 TWh
Customer Load Served

94.6%
Nuclear Capacity Factor in 2016

97.2%
Gas and Hydro Dispatch Match in 2016

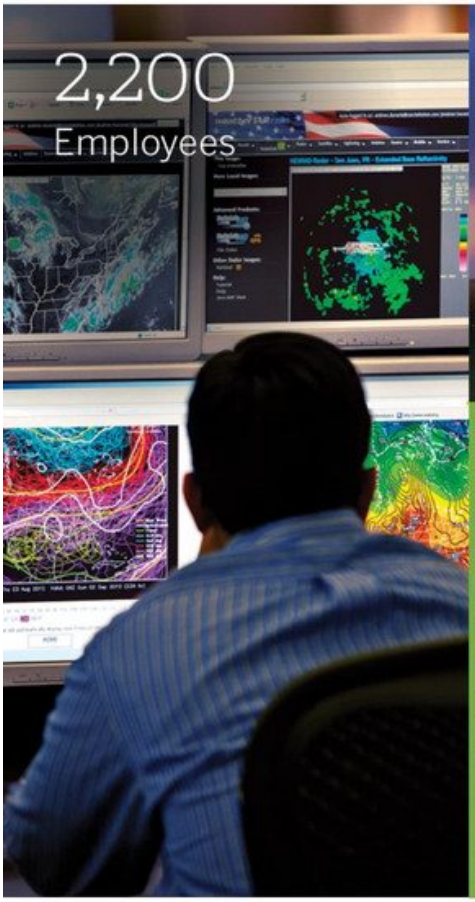
8th
largest gas provider

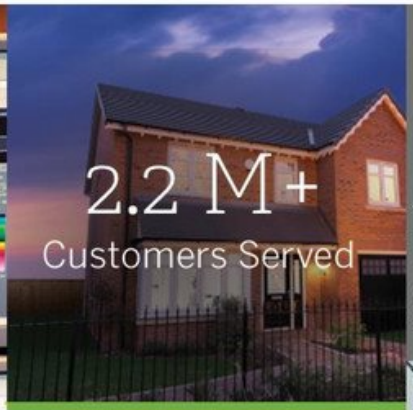
203 TWh
Generation Output

Note: All numbers reflect year-end 2016

Exelon.

Constellation Overview





#1 Retail
Retail Electricity Provider in the U.S
Among the top 10 largest gas providers in the U.S.

1.6 TCF
Gas Delivered

In 2016, procured
2.9 million
RECs for customers, enabling them to avoid approximately
1.51 million[1]
metric tons of GHG emissions and support the development of renewable power generation

48
Operate in 48 States

27,000
Volunteer Hours

Note: All numbers reflect year-end 2016
(1) As calculated based on the national average generation supply mix used in EPA eGRID2014.

Exelon.

Exelon Generation: Gross Margin Update

	September 30, 2017			Change from June 30, 2017		
Gross Margin Category ($M)[1]	**2017**	**2018**	**2019**	**2017**	**2018**	**2019**
Open Gross Margin[2,5] (including South, West, Canada hedged gross margin)	$3,600	$3,900	$3,700	$(150)	$(100)	$(100)
Capacity and ZEC Revenues[2,5,6]	$1,700	$2,300	$2,000	$(150)	$100	$(50)
Mark-to-Market of Hedges[2,3]	$2,150	$650	$450	$250	$100	$50
Power New Business / To Go	$100	$700	$850	$(100)	$(150)	$(100)
Non-Power Margins Executed	$350	$200	$100	$50	$50	-
Non-Power New Business / To Go	$100	$300	$400	$(50)	$(50)	-
Total Gross Margin*[4,5]	**$8,000**	**$8,050**	**$7,500**	**$(150)**	**$(50)**	**$(200)**

Recent Developments

- Delay in recognition of Illinois ZEC revenues lowers the Capacity and ZEC Revenues line in 2017 by $150M and increases the 2018 line by $150M – see slide 19 for details
- Excluding impact of Illinois ZEC timing:
  - In 2017, $50M reduction in Power New Business targets
  - In both 2018 and 2019, $100M reduction due to lower power and capacity prices and $100M reduction to Power New Business Targets
- Behind ratable hedging position reflects the upside we see in power prices
  - ~11-14% behind ratable in 2018 when considering cross commodity hedges

(1) Gross margin categories rounded to nearest $50M
(2) Excludes EDF's equity ownership share of the CENG Joint Venture
(3) Mark-to-Market of Hedges assumes mid-point of hedge percentages
(4) Based on September 30, 2017, market conditions
(5) Reflects TMI and Oyster Creek retirements in September 2019 and December 2019, respectively. EGTP removal impacts partial year 2017 and full year 2018 and 2019.
(6) 2018 includes $150M of IL ZEC revenues associated with 2017 production

Exelon.

ExGen Forward Total Gross Margin* Walk: Q3 2017 vs. Q2 2017

FY 2017 ($M)[1,3,4]

FY 2018 ($M)[1,3,4]

FY 2019 ($M)[1,3,4]

Key Takeaways

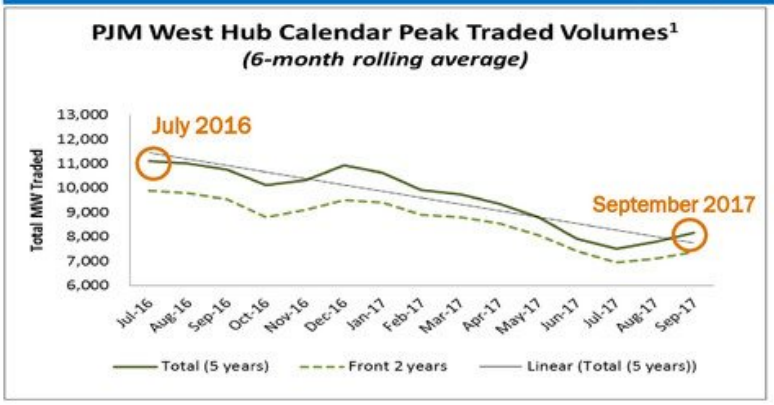
- Change in timing of Illinois ZEC contract finalization results in 2017 reduction of $150M on a rounded basis and 2018 increase of $150M
- Aggressive bidding by market participants in a low volatility period is pressuring Wholesale margins and limiting C&I Retail growth; reduce Power New Business To Go by $100M in 2018 and 2019 to reflect continuation of current, low discipline market bidding behavior
- Lower energy prices reduce Open Gross Margin by $50M in 2018 and 2019; October price recovery offsets 2019 declines
- Lower observed capacity prices in NY and MISO reduce Capacity Revenues by $50M on a rounded basis in 2018 and 2019

(1) Gross margin categories rounded to nearest $50M
(2) Excludes EDF's equity ownership share of the CENG Joint Venture
(3) Based on September 30, 2017, market conditions
(4) Reflects TMI and Oyster Creek retirements in September 2019 and December 2019, respectively
(5) 2018 includes $150M of IL ZEC revenues associated with 2017 production

Exelon.

Forward Market Liquidity

Overall liquidity is declining



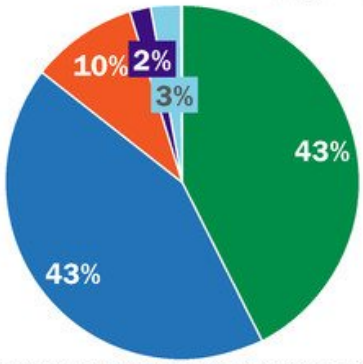
Total calendar peak traded volumes for the rolling 5-year window have been trending lower over the past year

Calendar peak traded volumes beyond prompt year +1 account for less than 10% of total traded volumes

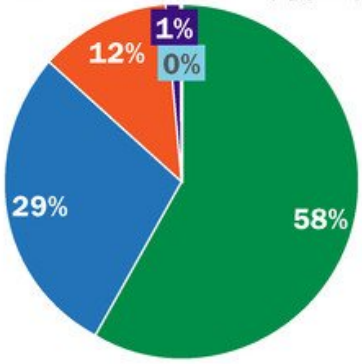
** Please note that hedging strategy utilizes various price points (i.e. NIHUB, ERCOT), channels to market (i.e. Origination, Mid-Marketing, Retail, OTC), products (i.e. calendar, seasonal), and other exchanges*

Limited liquidity in the outer years

September 2016 PJM West Hub Calendar Peak Traded Volumes(1) (by year)



September 2017 PJM West Hub Calendar Peak Traded Volumes(1) (by year)



(1) Total monthly traded volumes for rolling prompt year + 4 years on ICE and NASDAQ Exchanges only

Exelon.

Exelon's Policy Priorities

Resiliency and Energy Market Reform

Price Formation

- PJM has stated that it is prepared to implement its reforms allowing all resources to set LMP by mid-2018
- "FERC should expedite its efforts with states, RTO/ISOs, and other stakeholders to improve energy price formation in centrally-organized wholesale electricity markets." – DOE Staff Report, August 2017
- The Commission should focus "first and foremost on the optimization of price formation in the energy and ancillary service markets." Ill. Commerce Comm'n Comments at 7
- "PJM staff is proposing to reform the existing pricing model in order to ensure that the cost of serving load is reflected in LMP to the fullest extent possible... This follows the principles of sound market design." - William W. Hogan, October 23, 2017

Resiliency

- "Accurately valuing resilience is not a zero-sum game. Compensating base-load generation does not equate to destruction of markets. On the contrary, I think it's a step toward accurately pricing contributions of all market participants." – FERC Chairman Neil Chatterjee, October 13, 2017
- "The unknowns are what we're going to have to deal with: if there was a physical attack, if you had [an explosion like the one on the Spectra pipeline that wasn't] fixed in a timely manner heading into the winter heating season, central Pennsylvania would have had potential issues. . . So now the conversation's gotten broader around these cascading events, and then how do you price resiliency? That conversation needs to take place." FERC Commissioner Rob Powelson, October 27, 2017
- "We used to talk about equipment failure and outages caused by storms. Now, the threat profile has changed, the considerations are broader. There could be intentional attacks – cyber or physical. Those concerns lead us beyond reliability and into resilience." PJM CEO and President Andrew L. Ott, September 20, 2017

Exelon recommends that FERC:

1. Immediately require PJM to submit its energy price formation proposal
2. Require the affected RTOs to submit detailed information on the grid's vulnerabilities to enable the development of a design basis threat analysis that can inform cost-effective market reforms, and
3. State that it will not interfere with state programs that value resilient resources like nuclear plants

Exelon.

ZEC Updates

New York ZEC Legal Challenges

Federal Case:

- Case dismissed on July 25 and judgment entered on July 27
- "The ZEC program does not thwart the goal of an efficient energy market; rather, it encourages through financial incentives the production of clean energy."
- On August 24, the plaintiffs appealed to the US Court of Appeals for the 2nd Circuit
- Briefing schedule:
  - Plaintiff-Appellant Opening Brief filed October 13
  - Reply Briefs due December 1
  - Oral arguments will then follow

State Case:

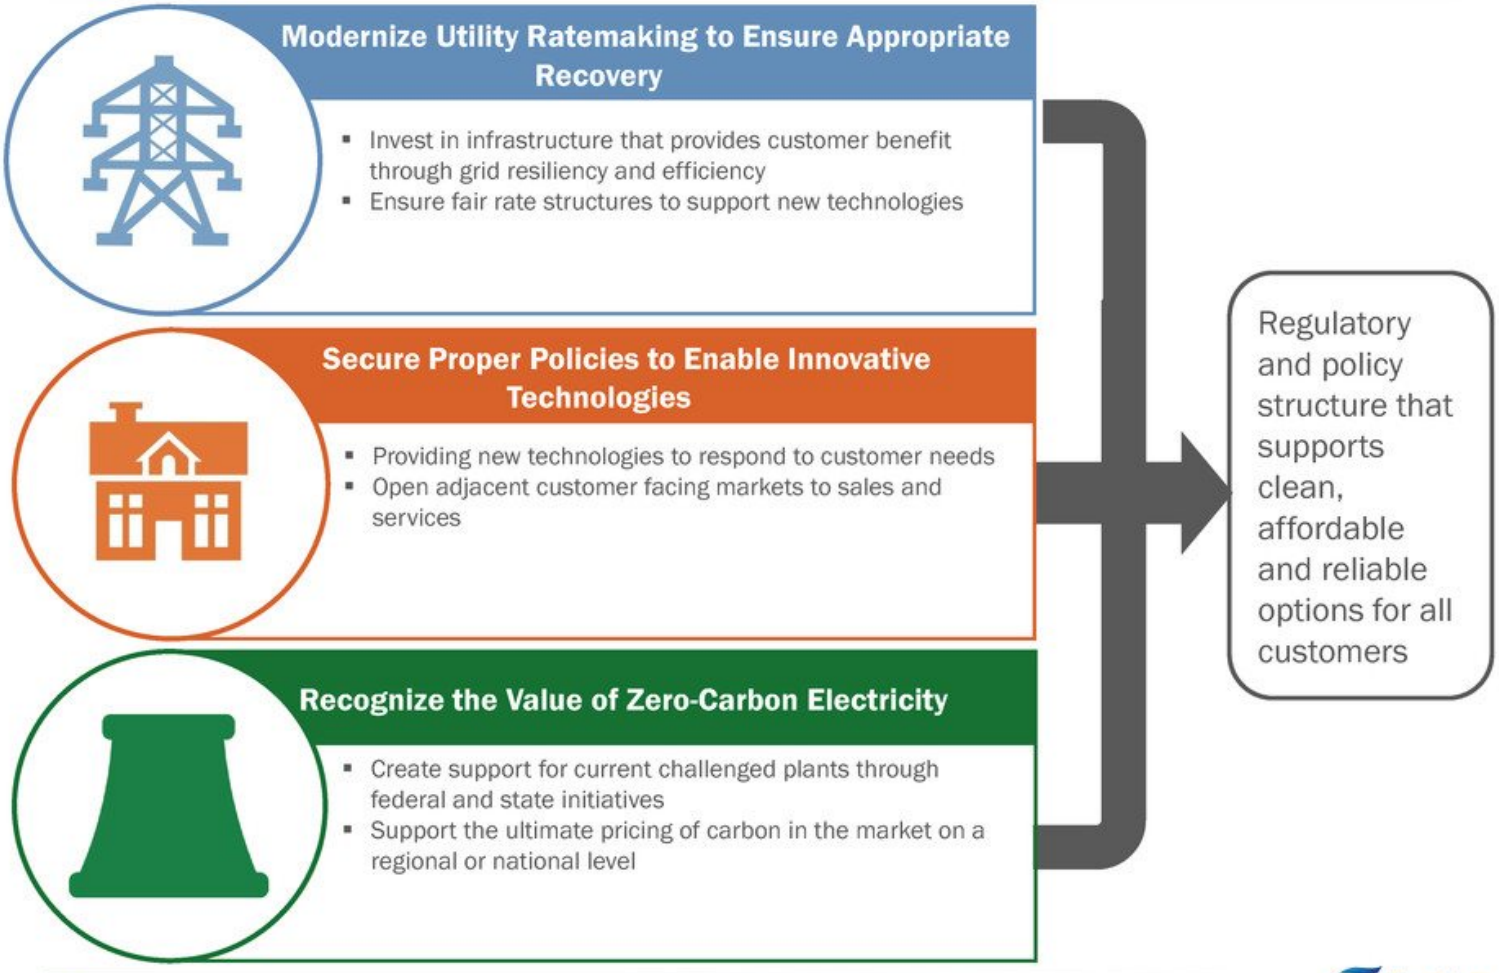
- Motions to dismiss procedural challenges filed in NY State court were briefed in 1Q17
- The court heard oral arguments on June 19
- Currently awaiting decision; next step determined by outcome

IL ZEC Legal Challenges

- Both cases dismissed and judgment entered July 14
- "The ZEC program does not conflict with the Federal Power Act."
- On July 17, both sets of plaintiffs appealed to the US Court of Appeals for the 7th Circuit
- On July 18, the 7th Circuit consolidated the appeals and set a briefing schedule:
  - Plaintiff-Appellant Opening Brief filed August 28
  - Reply Briefs due December 12
  - Oral arguments will then follow

Exelon.

Exelon Policy Priorities



Exelon.

Our Carbon Policy Principles

- **Exelon believes in our nation's ability to transition the generation fleet to a zero-carbon future while maintaining affordable and reliable electric service for consumers**
- For the foreseeable future, the most cost-effective carbon solution for our customers will be the continued operation of our nation's nuclear fleet
- Exelon believes competitive markets produce superior results for consumers and drive innovation. However, those markets do not currently incorporate appropriate pricing for environmental attributes.
- **Exelon is pursuing a two-part strategy for moving toward a more competitive treatment of CO_2 emissions:**
  - **First, we must maintain nuclear units that provide a cost-effective form of CO_2 abatement.** The New York ZEC program demonstrates that as long as the clean energy payment required to maintain operations at existing nuclear units is lower than the social cost of CO_2 emissions and the cost of CO_2 abatement being paid to other zero carbon resources, maintaining nuclear capacity should be selected as the most competitive source of CO_2 abatement.
  - **Second, we must continue to work toward a technology neutral price of CO_2 abatement.** Exelon is pursuing approaches to reflect a uniform price on CO_2 in wholesale markets as an eventual substitute for technology-specific subsidies. As these approaches are phased in, the ZEC programs have been designed to automatically reduce ZEC payments in response to higher energy prices.

Exelon.

Financial Overview

Strong Third Quarter Results

Q3 2017 EPS Results

- GAAP earnings were $0.85/share in Q3 2017 vs. $0.53/share in Q3 2016
- Adjusted operating earnings* were $0.85/share in Q3 2017 vs. $0.91/share in Q3 2016, at the mid-point of our guidance range of $0.80-$0.90/share

Note: Amounts may not sum due to rounding
* Refer to pages 3 and 4 for information regarding non-GAAP financial measures

Exelon.

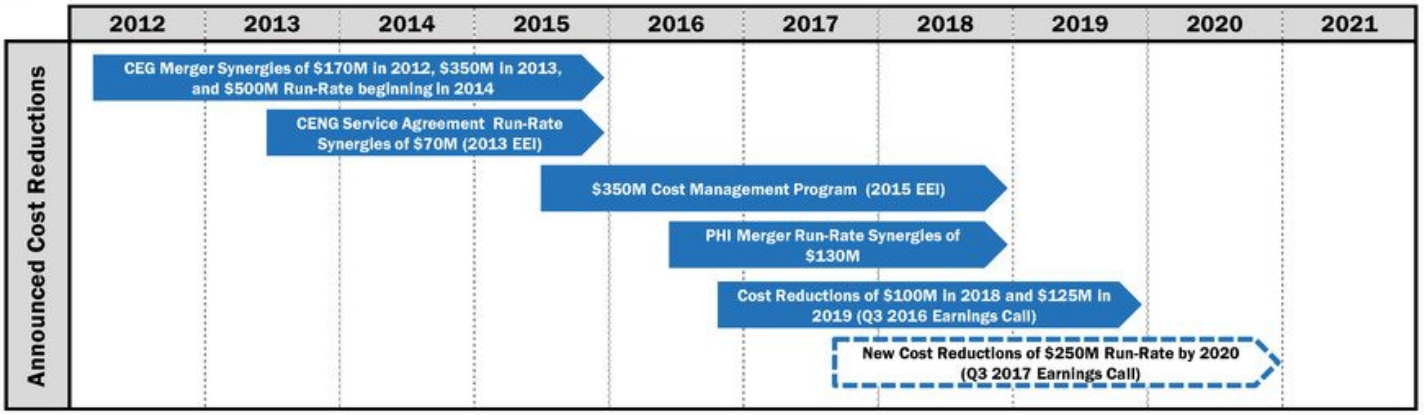
Narrowing 2017 Adjusted Operating Earnings* Guidance Range

(1) 2017 earnings guidance based on expected average outstanding shares of 949M. Earnings guidance for OpCos may not sum up to consolidated EPS guidance.
(2) Revised guidance reflects delay in Illinois ZEC revenue recognition for 2017 until 2018, shifting $0.09 of EPS

Exelon.

Cost Management is Integral to Our Business Strategy

ExGen and BSC Cost Reductions Since Constellation Merger



ExGen Forecast O&M* Q3 2017 ($M)(1)

(1) Adjusted for TMI retirement and removal of EGTP, net of other expenses

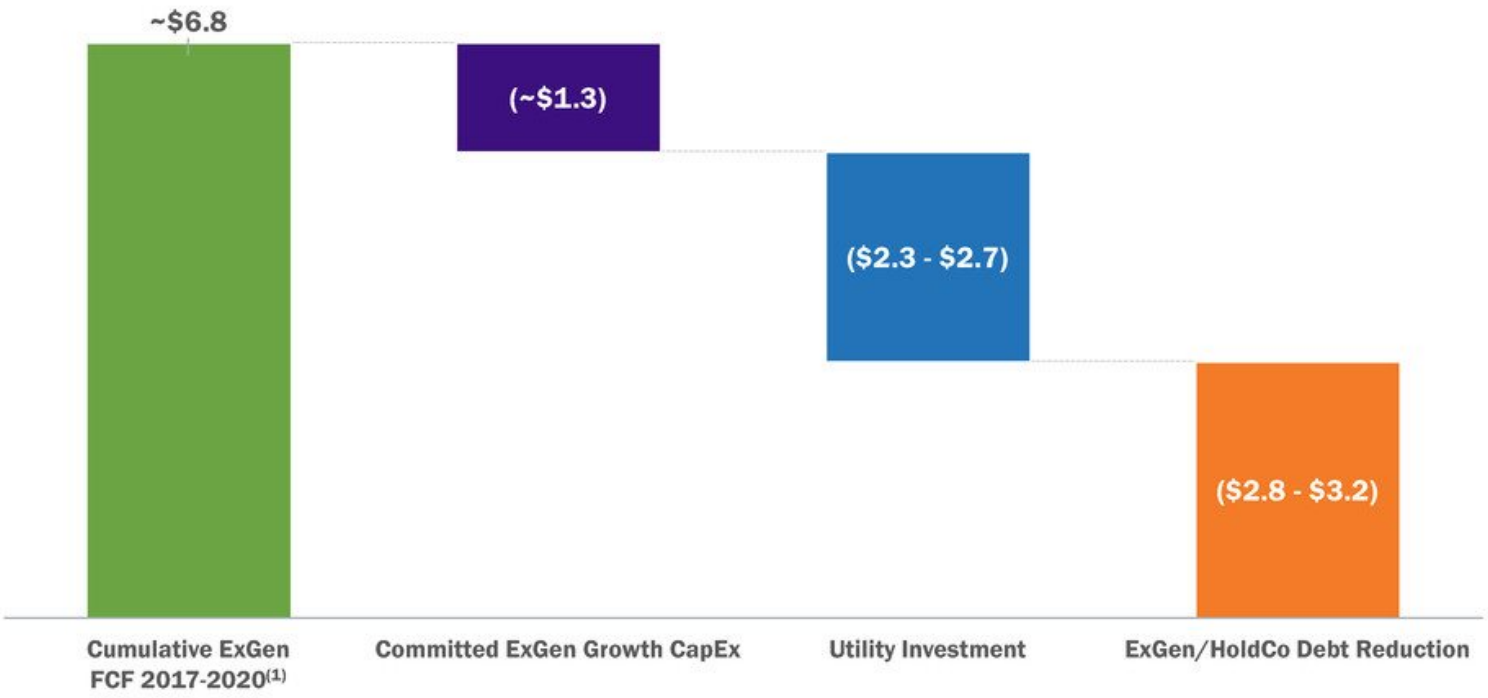
ExGen Forecast O&M*: Q3 2017 vs. Q4 2016(1)

ExGen O&M ($M)	2017	2018	2019	2020	2017-2020 CAGR
Q4 2016 O&M	$4,850	$4,725	$4,725	$4,775	- 0.5%
EGTP & TMI	($0)	($50)	($125)	($225)	-
Q4 '16 O&M, Net of EGTP & TMI	**$4,850**	**$4,675**	**$4,600**	**$4,550**	**-2.1%**
Cost Savings	($0)	($75)	($150)	($250)	-
Q3 2017 O&M	**$4,850**	**$4,600**	**$4,450**	**$4,300**	**-3.9%**

Exelon.

ExGen's Strong Free Cash Flow Supports Utility Growth and Debt Reduction

2017-2020 Exelon Generation Free Cash Flow* and Uses of Cash ($B)



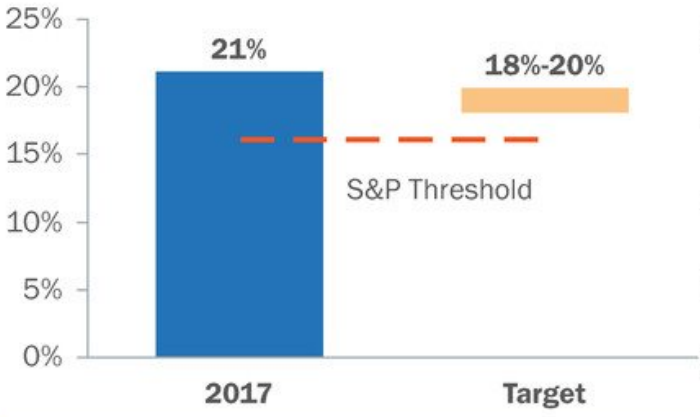
Redeploying Exelon Generation's free cash flow to maximize shareholder value

(1) Sources include change in margin, tax parent benefit, equity investments, and acquisitions and divestitures

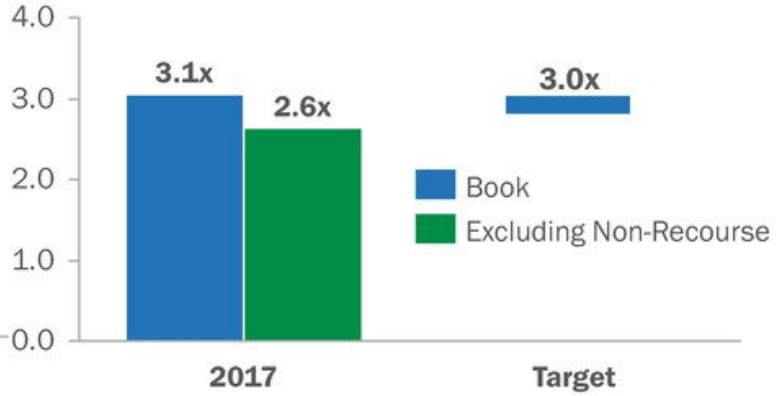
Exelon.

Maintaining Strong Investment Grade Credit Ratings is a Top Financial Priority

Exelon S&P FFO/Debt %*(1,4,6,7)



ExGen Debt/EBITDA Ratio*(5,6,7)



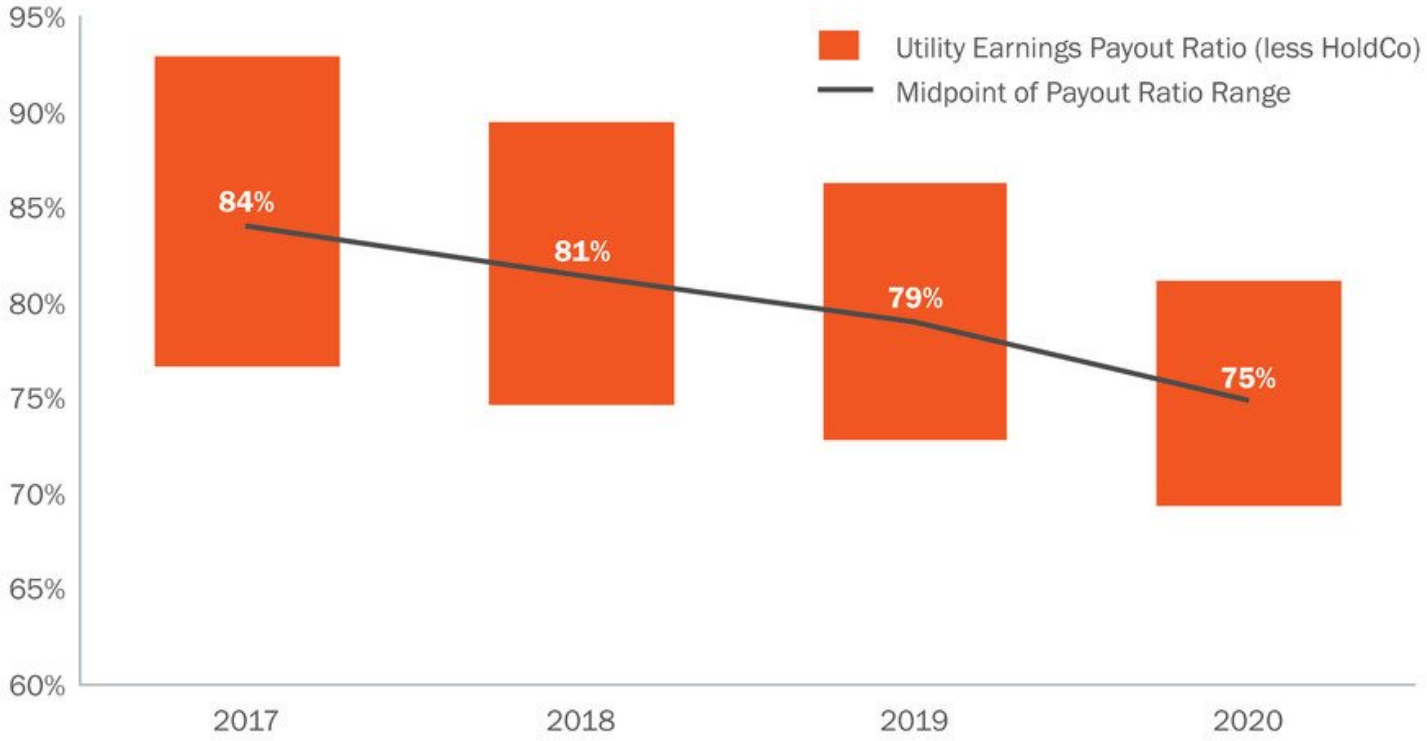
Credit Ratings by Operating Company

Current Ratings(2,3)	ExCorp	ExGen	ComEd	PECO	BGE	ACE	DPL	Pepco
Moody's	Baa2	Baa2	A1	Aa3	A3	A3	A2	A2
S&P	BBB-	BBB	A-	A-	A-	A	A	A
Fitch	BBB	BBB	A	A	A-	A-	A	A-

(1) Due to ring-fencing, S&P deconsolidates BGE from Exelon and analyzes solely as an equity investment
(2) Current senior unsecured ratings as of October 24, 2017, for Exelon, Exelon Generation and BGE and senior secured ratings for ComEd, PECO, ACE, DPL, and Pepco
(3) All ratings have a "Stable" outlook
(4) Exelon Corp downgrade threshold (red dotted line) is based on the S&P Exelon Corp Summary Report; represents minimum level to maintain current Issuer Credit Rating of BBB at Exelon Corp
(5) Reflects net book debt (YE debt less cash on hand) / adjusted operating EBITDA*
(6) Reflects removal of EGTP
(7) Reflects delay in Illinois ZEC revenue recognition from 2017 to 2018

Exelon.

Theoretical Dividend Affordability from Utility less HoldCo[1,2]



Utility less HoldCo payout ratio falling consistently even as dividend grows

(1) Chart is illustrative and shows theoretical payout ratio if utilities supported 100% of the external dividend and interest expense at HoldCo. Currently, the utilities have a payout ratio of 70% which covers the majority of the external dividend and interest expense at HoldCo with ExGen covering the remainder.
(2) Board of directors has approved a policy of 2.5% per year dividend increase through 2018. For illustrative purposes only, the chart assumes the dividend continues to increase 2.5% per year through 2020, although the board has not yet established dividend policy for periods after 2018. Quarterly dividends are subject to declaration by the board of directors.

Exelon.

Recognition for Stewardship and Employee Engagement

Supplier Diversity: Exelon is the only utility and energy company to be inducted into the Billion Dollar Roundtable, which recognizes corporations that have achieved spending of $1 billion with minority and women-owned suppliers; our 2016 spend was nearly $2B

Civic 50: Points of Light named Exelon utility sector leader in its annual ranking of the nation's most community-minded public and private companies

Top 50 Companies for Diversity: National recognition from DiversityInc, first year in Top 50 after being named a DiversityInc "Top Utility" in 2015 and 2016

Best Places to Work in 2017: Ranked No. 18 on Indeed.com survey of Fortune 500 companies based on employee reviews

CEO Action for Diversity & Inclusion™: Joined 150 leading companies in the largest CEO-driven business commitment to advance diversity and inclusion

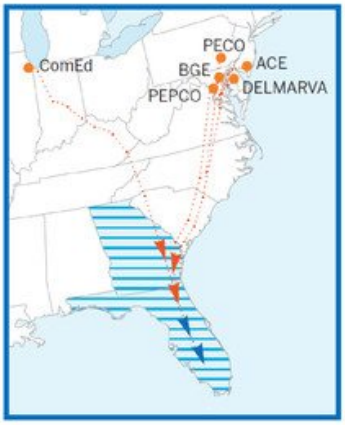
Top 50 Most Energy-Efficient Utilities: American Council for an Energy-Efficient Economy ranks BGE and ComEd in the top 10 with PECO also making the list

Lowest Carbon Emissions: 2017 Air Emissions Benchmarking Report notes Exelon's generation fleet had the lowest carbon dioxide emissions of the top 20 privately held and investor-owned energy producers

HeForShe: In continuing its commitment to gender equality, Exelon joined the United Nations HeForShe campaign, which provides a platform on which men can engage and become change agents for gender equality

Hurricane Support

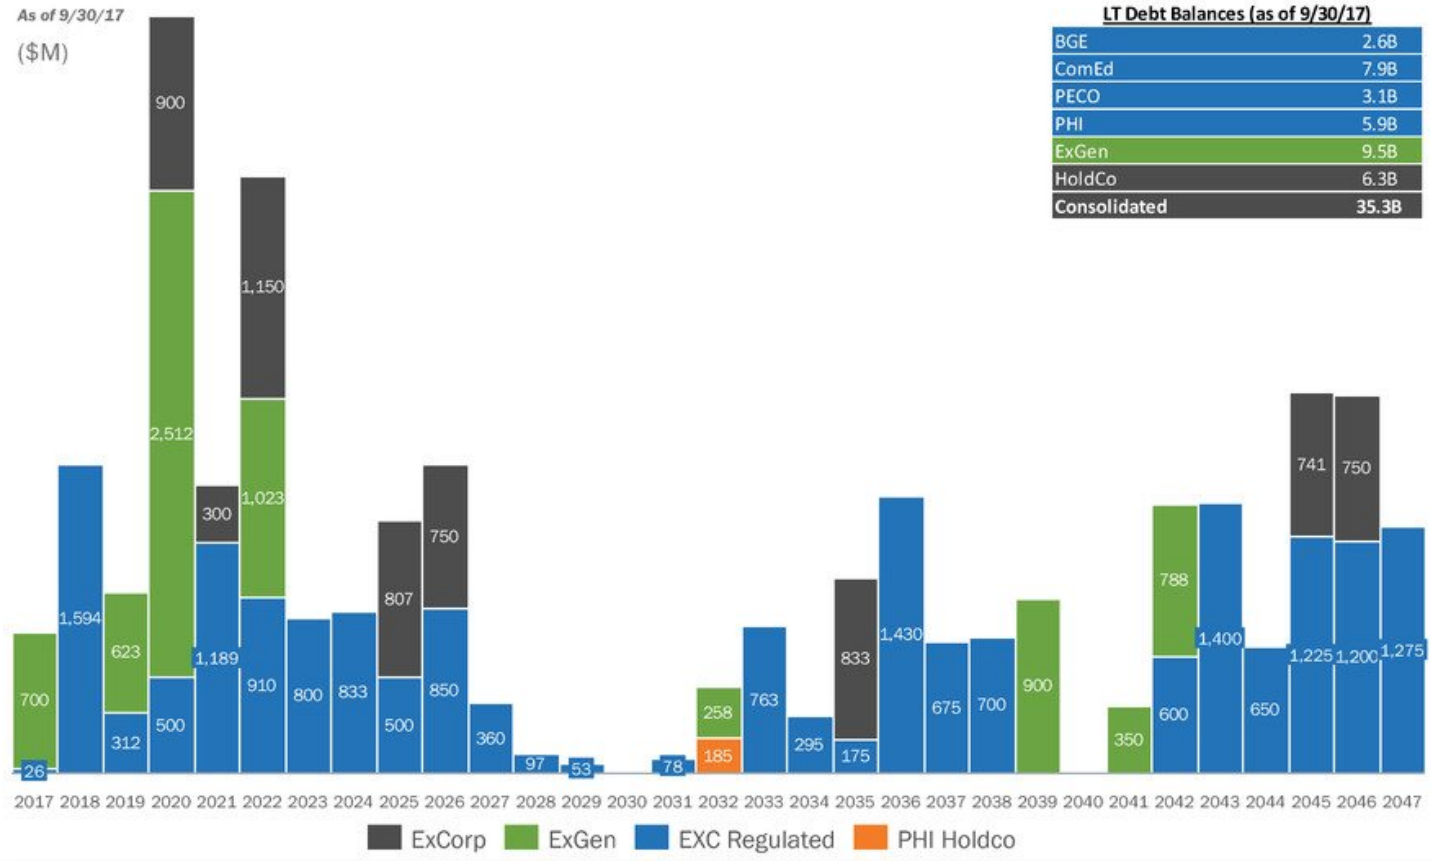
- More than 2,200 employees, contractors and support personnel from Exelon's six utilities mobilized to assist residents in the southeastern U.S. impacted by Hurricane Irma
  - Exelon teams shared our experience with severe weather restoration efforts and industry-leading best practices to lead one of the largest contingents of support nationally
  - Crews deployed for more than two weeks helping to restore power to nearly eight million customers in Florida and Georgia
- Approximately 250 Exelon employee volunteers logged over 1,300 hours for disaster relief activities
- Exelon and its employees contributed approximately $820,000 in disaster relief



Exelon.

Appendix

Exelon Debt Maturity Profile(1)



Exelon's weighted average LTD maturity is approximately 14 years

(1) ExGen debt includes legacy CEG debt; Excludes securitized debt and non-recourse debt

Exelon.

Capacity Market: PJM

PJM Capacity Revenues[1,2,3]

(1) Revenues reflect capacity cleared in Base, CP transitional & incremental auctions and are for calendar years
(2) Revenues reflect owned and contracted generation
(3) Reflects 50.01% ownership at CENG
(4) Volumes at ownership and rounded

Cleared Volumes (MW)[4]	2019/2020 CP	2019/2020 Price	2019/2020 Base	2019/2020 Price	2020/2021 CP	2020/2021 Price

Portfolio Management Strategy

Strategic Policy Alignment

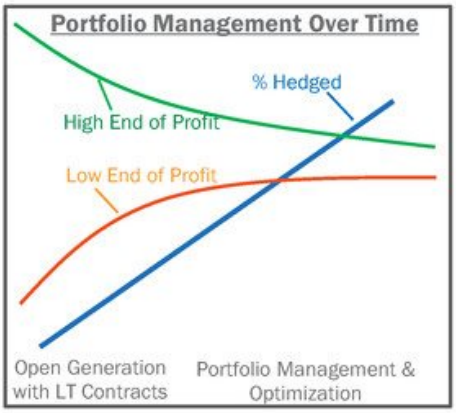
- Aligns hedging program with financial policies and financial outlook
  - Establish minimum hedge targets to meet financial objectives of the company (dividend, credit rating)
  - Hedge enough commodity risk to meet future cash requirements under a stress scenario

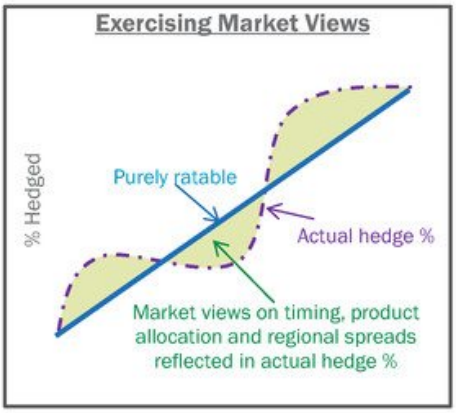
Three-Year Ratable Hedging

- Ensure stability in near-term cash flows and earnings
  - Disciplined approach to hedging
  - Tenor aligns with customer preferences and market liquidity
  - Multiple channels to market that allow us to maximize margins
  - Large open position in outer years to benefit from price upside

Bull / Bear Program

- Ability to exercise fundamental market views to create value within the ratable framework
  - Modified timing of hedges versus purely ratable
  - Cross-commodity hedging (heat rate positions, options, etc.)
  - Delivery locations, regional and zonal spread relationships

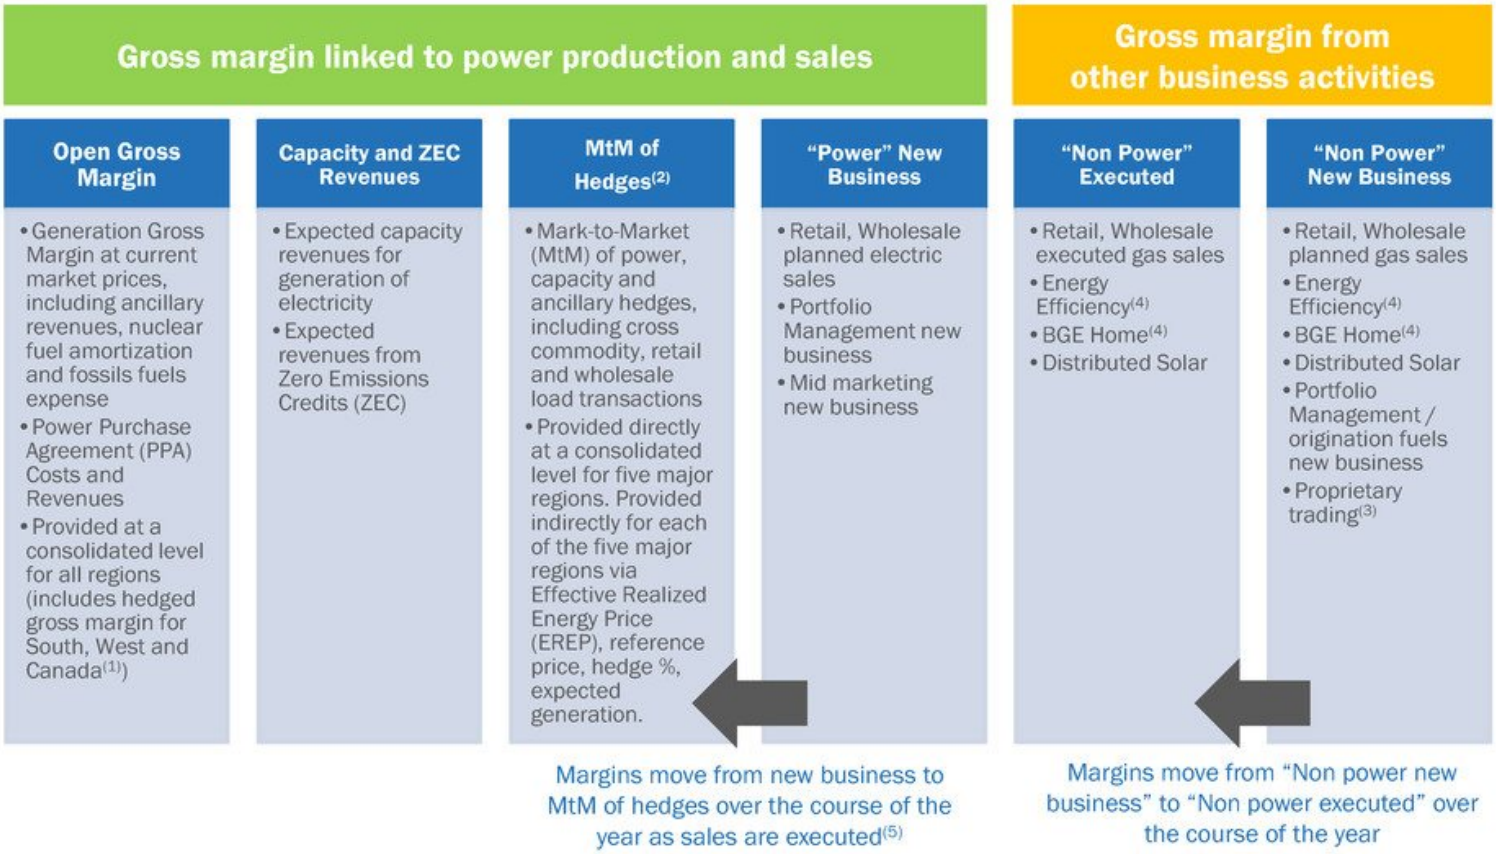




Protect Balance Sheet | **Ensure Earnings Stability** | **Create Value**

Exelon.

Components of Gross Margin Categories



(1) Hedged gross margins for South, West & Canada region will be included with Open Gross Margin; no expected generation, hedge %, EREP or reference prices provided for this region
(2) MtM of hedges provided directly for the five larger regions; MtM of hedges is not provided directly at the regional level but can be easily estimated using EREP, reference price and hedged MWh
(3) Proprietary trading gross margins will generally remain within "Non Power" New Business category and only move to "Non Power" Executed category upon management discretion
(4) Gross margin for these businesses are net of direct "cost of sales"
(5) Margins for South, West & Canada regions and optimization of fuel and PPA activities captured in Open Gross Margin

Exelon.

ExGen Disclosures

Gross Margin Category ($M)[1]	2017	2018	2019
Open Gross Margin (including South, West & Canada hedged GM)[2,5]	$3,600	$3,900	$3,700
Capacity and ZEC Revenues[2,5,6]	$1,700	$2,300	$2,000
Mark-to-Market of Hedges[2,3]	$2,150	$650	$450
Power New Business / To Go	$100	$700	$850
Non-Power Margins Executed	$350	$200	$100
Non-Power New Business / To Go	$100	$300	$400
Total Gross Margin*[4,5]	**$8,000**	**$8,050**	**$7,500**

Reference Prices[4]	2017	2018	2019
Henry Hub Natural Gas ($/MMBtu)	$3.14	$3.05	$2.89
Midwest: NiHub ATC prices ($/MWh)	$26.52	$27.45	$26.36
Mid-Atlantic: PJM-W ATC prices ($/MWh)	$28.81	$30.77	$29.22
ERCOT-N ATC Spark Spread ($/MWh) *HSC Gas, 7.2HR, $2.50 VOM*	($0.78)	$1.22	$2.65
New York: NY Zone A ($/MWh)	$24.38	$27.29	$26.67
New England: Mass Hub ATC Spark Spread ($/MWh) *ALQN Gas, 7.5HR, $0.50 VOM*	$4.36	$3.99	$4.24

(1) Gross margin categories rounded to nearest $50M
(2) Excludes EDF's equity ownership share of the CENG Joint Venture
(3) Mark-to-Market of Hedges assumes mid-point of hedge percentages
(4) Based on September 30, 2017, market conditions
(5) Reflects ownership of FitzPatrick as of April 1, 2017, and TMI and Oyster Creek retirements in September 2019 and December 2019, respectively. EGTP removal impacts partial year 2017 and full year 2018 and 2019.
(6) 2018 includes $150M of IL ZEC revenues associated with 2017 production

ExGen Disclosures

Generation and Hedges	2017	2018	2019
Exp. Gen (GWh)[1]	**200,200**	**199,300**	**202,000**
Midwest	95,900	95,800	97,000
Mid-Atlantic[2,6]	60,700	60,500	59,000
ERCOT	17,800	19,500	20,800
New York[2,6]	14,700	15,500	16,600
New England	11,100	8,000	8,600
% of Expected Generation Hedged[3]	**98%-101%**	**79%-82%**	**45%-48%**
Midwest	97%-100%	74%-77%	41%-44%
Mid-Atlantic[2,6]	98%-101%	90%-93%	51%-54%
ERCOT	97%-100%	77%-80%	44%-47%
New York[2,6]	99%-102%	71%-74%	43%-46%
New England	103%-106%	86%-89%	52%-55%
Effective Realized Energy Price ($/MWh)[4]			
Midwest	$33.00	$29.50	$29.50
Mid-Atlantic[2,6]	$44.00	$37.00	$39.00
ERCOT[5]	$11.00	$3.50	$3.50
New York[2,6]	$41.50	$37.50	$32.00
New England[5]	$20.00	$2.50	$3.00

(1) Expected generation is the volume of energy that best represents our commodity position in energy markets from owned or contracted for capacity based upon a simulated dispatch model that makes assumptions regarding future market conditions, which are calibrated to market quotes for power, fuel, load following products, and options. Expected generation assumes 15 refueling outages in 2017, 15 in 2018, and 11 in 2019 at Exelon-operated nuclear plants and Salem. Expected generation assumes capacity factors of 93.4%, 93.2% and 94.7% in 2017, 2018, and 2019, respectively at Exelon-operated nuclear plants, at ownership. These estimates of expected generation in 2018 and 2019 do not represent guidance or a forecast of future results as Exelon has not completed its planning or optimization processes for those years.

(2) Excludes EDF's equity ownership share of CENG Joint Venture

(3) Percent of expected generation hedged is the amount of equivalent sales divided by expected generation. Includes all hedging products, such as wholesale and retail sales of power, options and swaps.

(4) Effective realized energy price is representative of an all-in hedged price, on a per MWh basis, at which expected generation has been hedged. It is developed by considering the energy revenues and costs associated with our hedges and by considering the fossil fuel that has been purchased to lock in margin. It excludes uranium costs, RPM capacity and ZEC revenues, but includes the mark-to-market value of capacity contracted at prices other than RPM clearing prices including our load obligations. It can be compared with the reference prices used to calculate open gross margin in order to determine the mark-to-market value of Exelon Generation's energy hedges.

(5) Spark spreads shown for ERCOT and New England

(6) Reflects ownership of FitzPatrick as of April 1, 2017, and TMI and Oyster Creek retirements in September 2019 and December 2019, respectively. EGTP removal impacts partial year 2017 and full year 2018 and 2019.

Exelon.

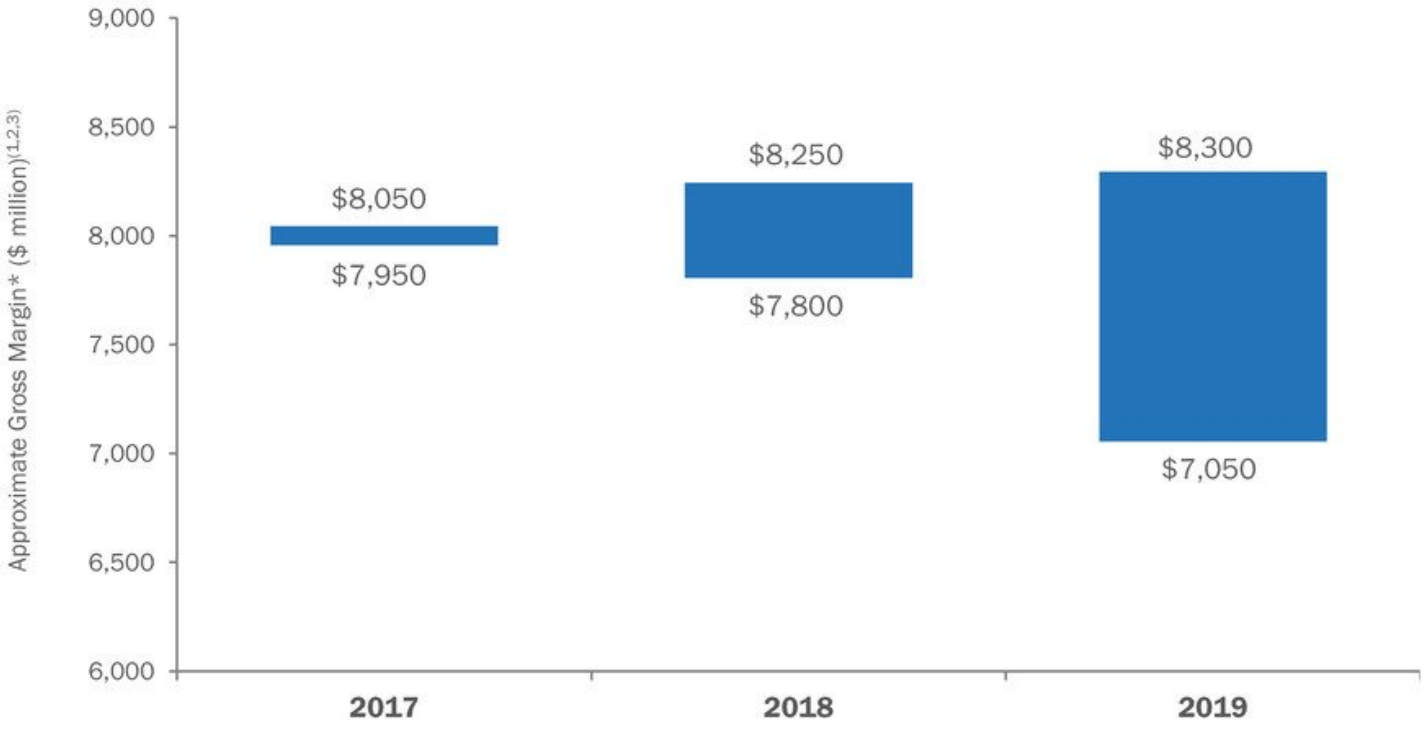
ExGen Hedged Gross Margin* Sensitivities

Gross Margin* Sensitivities (with existing hedges)[1]	2017	2018	2019
Henry Hub Natural Gas ($/MMBtu)			
+ $1/MMBtu	$(20)	$140	$515
- $1/MMBtu	$(10)	$(210)	$(500)
NiHub ATC Energy Price			
+ $5/MWh	-	$120	$265
- $5/MWh	-	$(115)	$(265)
PJM-W ATC Energy Price			
+ $5/MWh	-	$10	$150
- $5/MWh	$5	$(40)	$(145)
NYPP Zone A ATC Energy Price			
+ $5/MWh	-	$25	$40
- $5/MWh	-	$(20)	$(45)
Nuclear Capacity Factor			
+/- 1%	+/- $10	+/- $35	+/- $35

(1) Based on September 30, 2017, market conditions and hedged position; gas price sensitivities are based on an assumed gas-power relationship derived from an internal model that is updated periodically; power price sensitivities are derived by adjusting the power price assumption while keeping all other price inputs constant; due to correlation of the various assumptions, the hedged gross margin impact calculated by aggregating individual sensitivities may not be equal to the hedged gross margin impact calculated when correlations between the various assumptions are also considered; sensitivities based on commodity exposure which includes open generation and all committed transactions; excludes EDF's equity share of CENG Joint Venture

Exelon.

ExGen Hedged Gross Margin* Upside/Risk



(1) Represents an approximate range of expected gross margin, taking into account hedges in place, between the 5th and 95th percent confidence levels assuming all unhedged supply is sold into the spot market; approximate gross margin ranges are based upon an internal simulation model and are subject to change based upon market inputs, future transactions and potential modeling changes; these ranges of approximate gross margin in 2018 and 2019 do not represent earnings guidance or a forecast of future results as Exelon has not completed its planning or optimization processes for those years; the price distributions that generate this range are calibrated to market quotes for power, fuel, load following products, and options as of September 30, 2017

(2) Gross Margin Upside/Risk based on commodity exposure which includes open generation and all committed transactions

(3) Reflects ownership of FitzPatrick as of April 1, 2017, and TMI and Oyster Creek retirements in September 2019 and December 2019, respectively. EGTP removal impacts partial year 2017 and full year 2018 and 2019.

Illustrative Example of Modeling Exelon Generation 2018 Gross Margin*

Row	Item	Midwest	Mid-Atlantic	ERCOT	New York	New England	South, West & Canada
(A)	Start with fleet-wide open gross margin	← $3.9 billion →					
(B)	Capacity and ZEC	← $2.3 billion →					
(C)	Expected Generation (TWh)	95.8	60.5	19.5	15.5	8.0	
(D)	Hedge % (assuming mid-point of range)	75.5%	91.5%	78.5%	72.5%	87.5%	
(E=C*D)	Hedged Volume (TWh)	72.3	55.4	15.3	11.2	7.0	
(F)	Effective Realized Energy Price ($/MWh)	$29.50	$37.00	$3.50	$37.50	$2.50	
(G)	Reference Price ($/MWh)	$27.45	$30.77	$1.22	$27.29	$3.99	
(H=F-G)	Difference ($/MWh)	$2.05	$6.23	$2.28	$10.21	($1.49)	
(I=E*H)	Mark-to-Market value of hedges ($ million)(1)	$150	$345	$35	$115	($10)	
(J=A+B+I)	Hedged Gross Margin ($ million)	$6,850					
(K)	Power New Business / To Go ($ million)	$700					
(L)	Non-Power Margins Executed ($ million)	$200					
(M)	Non-Power New Business / To Go ($ million)	$300					
(N=J+K+L+M)	Total Gross Margin*	$8,050 million					

(1) Mark-to-market rounded to the nearest $5 million

Exelon.

Additional ExGen Modeling Data

Total Gross Margin Reconciliation (in $M)[1]	2017	2018	2019
Revenue Net of Purchased Power and Fuel Expense*[2,3]	**$8,575**	**$8,575**	**$8,025**
Non-cash amortization of intangible assets, net, related to commodity contracts recorded at fair value at merger date	$50	-	-
Other Revenues[4]	$(150)	$(200)	$(200)
Direct cost of sales incurred to generate revenues for certain Constellation and Power businesses	$(475)	$(325)	$(325)
Total Gross Margin* (Non-GAAP)	**$8,000**	**$8,050**	**$7,500**

Key ExGen Modeling Inputs (in $M)[1,5]	2017
Other[6]	$175
Adjusted O&M*	$(4,850)
Taxes Other Than Income (TOTI)[7]	$(400)
Depreciation & Amortization[8]	$(1,075)
Interest Expense[9]	$(400)
Effective Tax Rate	**32.0%**

(1) All amounts rounded to the nearest $25M
(2) ExGen does not forecast the GAAP components of RNF separately, as to do so would be unduly burdensome. RNF also includes the RNF of our proportionate ownership share of CENG.
(3) Excludes the Mark-to-Market impact of economic hedging activities due to the volatility and unpredictability of the future changes to power prices
(4) Other Revenues reflects primarily revenues from Exelon Nuclear Partners, JExel Nuclear JV, variable interest entities, funds collected through revenues for decommissioning the former PECO nuclear plants through regulated rates, and gross receipts tax revenues
(5) ExGen amounts for O&M, TOTI, Depreciation & Amortization; excludes EDF's equity ownership share of the CENG Joint Venture
(6) Other reflects Other Revenues excluding gross receipts tax revenues, nuclear decommissioning trust fund earnings from unregulated sites, and the minority interest in ExGen Renewables JV and Bloom
(7) TOTI excludes gross receipts tax of $125M
(8) Excludes P&L neutral decommissioning depreciation
(9) Interest expense includes impact of reduced capitalized interest due to Texas CCGT plants in service as of May and June of 2017. Capitalized interest will be an additional ~$25M lower in 2018 as well due to this.

Exelon.

GAAP to Operating Adjustments

- **Exelon's 2017 adjusted (non-GAAP) operating earnings excludes the earnings effects of the following:**
  - Mark-to-market adjustments from economic hedging activities
  - Unrealized gains from NDT fund investments to the extent not offset by contractual accounting as described in the notes to the consolidated financial statements
  - Non-cash amortization of intangible assets, net, related to commodity contracts recorded at fair value at the ConEdison Solutions and FitzPatrick acquisition dates
  - Certain merger and integration costs associated with the PHI and FitzPatrick acquisitions
  - Adjustments to reserves for uncertain tax positions related to the deductibility of certain merger commitments associated with the 2012 CEG and 2016 PHI acquisitions
  - Impairments as a result of the ExGen Texas Power, LLC assets held for sale
  - Plant retirements and divestitures at Generation
  - Non-cash impact of the remeasurement of state deferred income taxes, related to changes in statutory tax rates and changes in forecasted apportionment
  - Costs incurred related to a cost management program
  - Certain adjustments related to Exelon's like-kind exchange tax position
  - Non-cash benefit pursuant to the annual update of the Generation nuclear decommissioning obligation related to the non-regulatory units
  - Benefits related to the favorable settlement of certain income tax positions related to PHI's unregulated business interests
  - The excess of the fair value of assets and liabilities acquired over the purchase price for the FitzPatrick acquisition
  - Generation's noncontrolling interest, primarily related to CENG exclusion items

Exelon.

GAAP to Non-GAAP Reconciliations

YE 2017 Exelon FFO Calculation ($M)[1,2,10,11]	
GAAP Operating Income	$3,500
Depreciation & Amortization	$3,350
EBITDA	$6,850
+/- Non-operating activities and nonrecurring items[3]	$450
- Interest Expense	($1,450)
+ Current Income Tax (Expense)/Benefit	$325
+ Nuclear Fuel Amortization	$1,075
+/- Other S&P Adjustments[4]	$350
= FFO (a)	**$7,600**

YE 2017 Exelon Adjusted Debt Calculation ($M)[1,2,10]	
Long-Term Debt (including current maturities)	$32,050
Short-Term Debt	$1,125
+ PPA Imputed Debt[5]	$350
+ Operating Lease Imputed Debt[6]	$875
+ Pension/OPEB Imputed Debt[7]	$4,100
- Off-Credit Treatment of Debt[8]	($1,725)
- Surplus Cash Adjustment[9]	($600)
+/- Other S&P Adjustments[4]	($650)
= Adjusted Debt (b)	**$35,525**

YE 2017 Exelon FFO/Debt[1,2]		
FFO (a) / Adjusted Debt (b)	=	21%

(1) All amounts rounded to the nearest $25M
(2) Calculated using S&P Methodology. Due to ring-fencing, S&P deconsolidates BGE from Exelon and analyzes solely as an equity investment.
(3) Reflects impact of operating adjustments on GAAP EBITDA
(4) Includes other adjustments as prescribed by S&P
(5) Reflects present value of net capacity purchases
(6) Reflects present value of minimum future operating lease payments
(7) Reflects after-tax unfunded pension/OPEB
(8) Includes non-recourse project debt
(9) Applies 75% of excess cash against balance of LTD
(10) Reflects removal of EGTP
(11) Reflects delay in Illinois ZEC revenue recognition from 2017 to 2018

Exelon.

GAAP to Non-GAAP Reconciliations

Adjusted O&M (Non-GAAP)	**$4,850**	**$4,600**	**$4,450**	**$4,300**

2017-2020 ExGen Free Cash Flow Calculation ($M)[1]	
Cash from Operations (GAAP)	$15,150
Other Cash from Investing and Activities	($650)
Baseline Capital Expenditures[4]	($4,025)
Nuclear Fuel Capital Expenditures	($3,625)
Free Cash Flow before Growth CapEx and Dividend	**$6,825**

(1) All amounts rounded to the nearest $25M. Items may not sum due to rounding.
(2) Reflects earnings neutral O&M
(3) Reflects the direct cost of sales of certain businesses, which are included in Total Gross Margin*
(4) Baseline capital expenditures refer to maintenance and required capital expenditures necessary for day-to-day plant operations and includes merger commitments

Exelon.

Tax Rate and Utility Asset Projections at Current Plan

Tax Rate Expectations[1]	2018	2019	2020
ExGen Tax Rate	33%	28%	27%
Consolidated Tax Rate	34%	33%	34%
Consol. Cash Tax Rate	1%	6%	28%

Key Highlights

- ExGen's effective tax rate declines due to its declining pre-tax income relative to the tax credits it generates, which remain relatively constant
- Exelon's consolidated tax rate remains reasonably constant as growing earnings from the Utilities at a higher effective tax rate offset the declining tax rate at ExGen

Exelon Utilities Asset Projections ($B)[2]	2018	2019	2020
Rate Base	36.6	38.6	40.8
Deferred Tax Liabilities	14.4	15.2	15.7

Key Highlights

- Deferred tax liabilities are growing at a slowing rate through 2020 as percentage of new investment impacted by bonus depreciation declines

Note: tax rates and liabilities are based on the current tax code before the effect of any reforms that may be adopted
(1) Rounded to the nearest 1%
(2) All numbers reflect year-end 2016

CURRENT REPORT
Pursuant to Section 13 or 15(d)
of the Securities Exchange Act of 1934

November 7, 2017

Date of Report (Date of earliest event reported)

Commission File Number	Name of Registrant; State of Incorporation; Address of Principal Executive Offices; and Telephone Number	IRS Employer Identification Number
1-16169	**EXELON CORPORATION** **(a Pennsylvania corporation)** 10 South Dearborn Street P.O. Box 805379 Chicago, Illinois 60680-5379 (800) 483-3220	23-2990190
333-85496	**EXELON GENERATION COMPANY, LLC** **(a Pennsylvania limited liability company)** 300 Exelon Way Kennett Square, Pennsylvania 19348-2473 (610) 765-5959	23-3064219

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

☐ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

☐ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

☐ Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Indicate by check mark whether any of the registrants are emerging growth companies as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company ☐

If an emerging growth company, indicate by check mark if any of the registrants have elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Section 8.01 - Other Events

As previously disclosed, Exelon Generation Company, LLC (“Generation”) has been considering its strategic options with respect to its wholly-owned indirect subsidiary, ExGen Texas Power, LLC (“EGTP”). On May 2, 2017, EGTP entered into a Consent, Waiver and Amendment Agreement (“Consent Agreement”) with the lenders of its $675 million non-recourse senior secured loan due September 18, 2021. Among other things, the Consent Agreement permitted EGTP to draw on its revolving credit facility and initiate an orderly sales process to sell the assets of its wholly-owned subsidiaries (collectively with EGTP, the “Debtors”), the proceeds from which will first be used to pay the administrative costs of the sale, the normal and ordinary costs of operating the plants, and repayment of the secured debt of EGTP. As a result, Exelon Corporation ("Exelon") and Generation classified certain of EGTP's assets and liabilities as held for sale at their respective fair values less costs to sell and recorded associated pre-tax impairment charges of $418 million and $40 million in the second and third quarter of 2017, respectively.

In connection with this orderly sales process, on November 7, 2017, the Debtors filed voluntary petitions for relief under Chapter 11 of Title 11 of the United States Code (the “Bankruptcy Code”) in the United States Bankruptcy Court for the District of Delaware (the “Bankruptcy Court”, and the petitions for relief therein, the “Chapter 11 Filings”).

The Debtors are seeking Bankruptcy Court authorization to jointly administer the Chapter 11 cases (the “Chapter 11 Cases”) under the caption “In re ExGen Texas Power LLC, et al.” Case No. 17-12377. The Debtors will continue to manage their assets and operate their businesses as “debtors in possession” under the jurisdiction of the Bankruptcy Court and in accordance with the applicable provisions of the Bankruptcy Code and the orders of the Bankruptcy Court.

As a result of the bankruptcy filing, Exelon and Generation determined that EGTP’s assets and liabilities (including its nonrecourse senior secured term loan, revolving credit facility and various interest rate and commodity swaps), of which the assets were classified as held for sale at September 30, 2017, will be deconsolidated from Exelon’s and Generation’s consolidated financial statements as of November 7, 2017. Exelon and Generation estimate that a pre-tax gain upon deconsolidation ranging from $125 to $200 million will be recognized in the fourth quarter of 2017.

Concurrently with the Chapter 11 Filings, Generation entered into an asset purchase agreement to acquire one of EGTP’s generating plants, the Handley Generating Station, for approximately $60 million, subject to an adjustment for fuel oil and assumption of certain liabilities. In the Chapter 11 Filings, EGTP has requested that the proposed acquisition of the Handley Generating Station be consummated through a court-approved and supervised sales process. The consummation of the acquisition is subject to the approval of the asset purchase agreement by the Bankruptcy Court following a sale process, and the confirmation of a plan of reorganization in the bankruptcy cases.

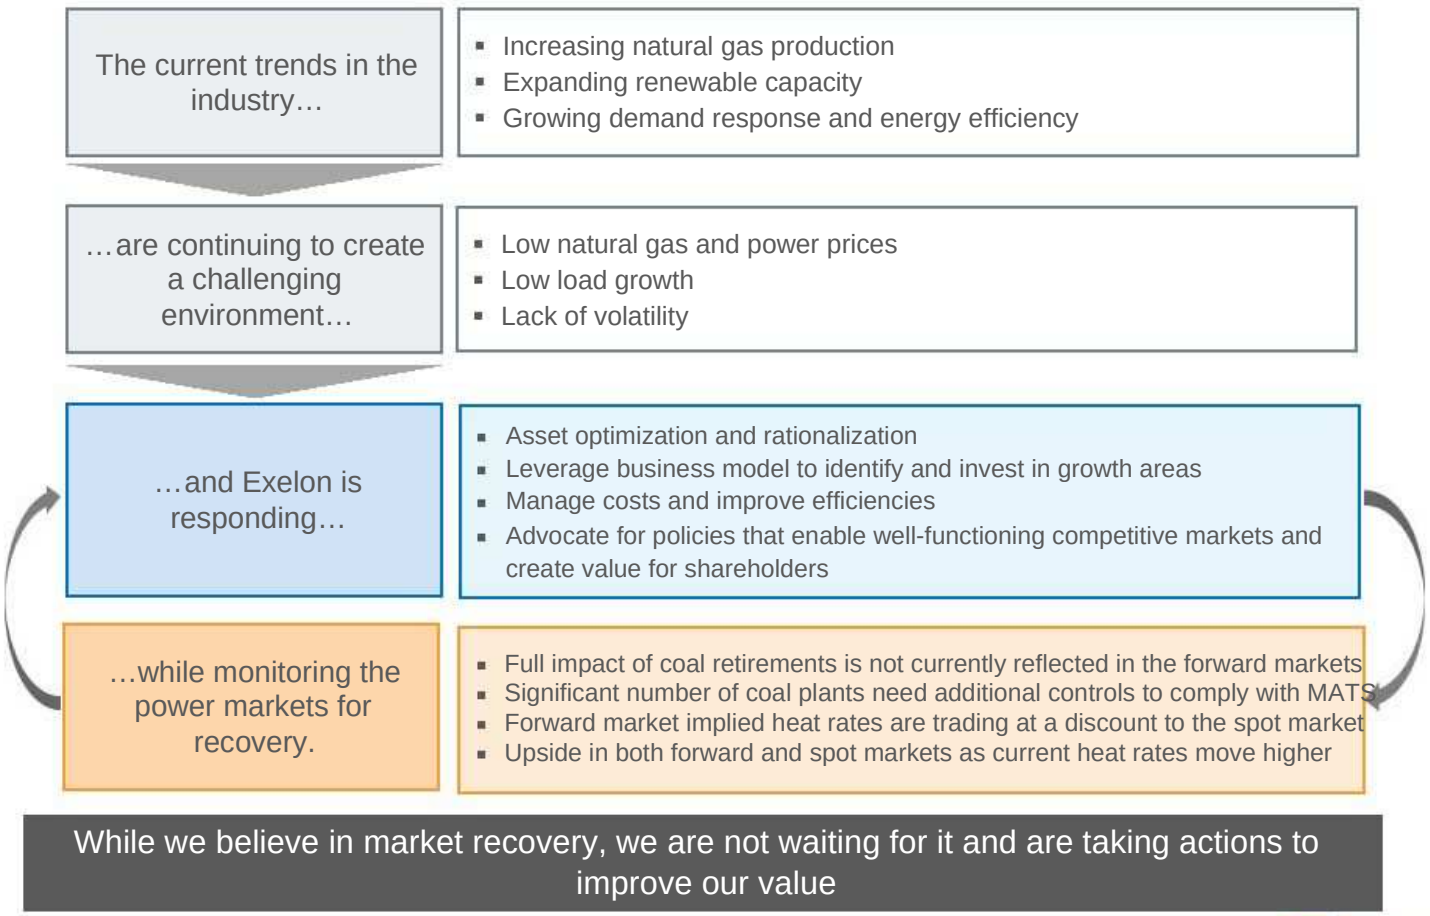
Cautionary Statements Regarding Forward-Looking Information

This presentation contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, that are subject to risks and uncertainties. The factors that could cause actual results to differ materially from the forward-looking statements made by Exelon Corporation, Commonwealth Edison Company, PECO Energy Company, Baltimore Gas and Electric Company and Exelon Generation Company, LLC (Registrants) include those factors discussed herein, as well as the items discussed in (1) Exelon's 2012 Annual Report on Form 10-K in (a) ITEM 1A. Risk Factors, (b) ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) ITEM 8. Financial Statements and Supplementary Data: Note 19; (2) Exelon's Third Quarter 2013 Quarterly Report on Form 10-Q in (a) Part II, Other Information, ITEM 1A. Risk Factors; (b) Part 1, Financial Information, ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) Part I, Financial Information, ITEM 1. Financial Statements: Note 18; and (3) other factors discussed in filings with the SEC by the Registrants. Readers are cautioned not to place undue reliance on these forward-looking statements, which apply only as of the date of this presentation. None of the Registrants undertakes any obligation to publicly release any revision to its forward-looking statements to reflect events or circumstances after the date of this presentation.

Setting the Context



While we believe in market recovery, we are not waiting for it and are taking actions to improve our value

Exelon.

S1-SSA-0009 - 10088

Exelon's Strategic Response to the Current Environment

Asset Optimization

Review Solutions from All Angles

- Infrastructure
- Commercial
- Policy
- Legal

Scenarios for Optimization

- Cost and productivity enhancement
- Operations improvement
- Transmission
- PPAs
- Sale
- Retirement

Growth Investments

Utilities

- Invest $15 billion across the planning period
- Upgrade aging infrastructure
- Invest in infrastructure and new technologies
- Provide stable earnings growth

ExGen

- Invest in renewables and expand footprint in the natural gas business to diversify
- Maintain retail pricing discipline
- Bolster presence in core regions
- Research and invest in emerging technologies

Cost Management

Our Record

- Record of managing costs
- $550 million in merger synergies
- Reduced 2013 ExGen O&M by $150 million
- CENG annual projected synergies of $50-70 million(1)

Continued Focus

- Expand cost management efforts
- Efficiency gains through productivity and technology enhancements
- Share best practices across the utilities

We are biased towards action while we leverage our competencies and strengths to influence our financial future

(1) At 100% ownership, Exelon share is 50%

Exelon.

Advocating for Public Policy to Enhance Customer and Shareholder Value

Regulatory / Policy Actions

Market Policy

PJM:
- Engaged in stakeholder process regarding PJM reliance on planned resources
- Minimum Offer Price Rule (MOPR) Reform
- Demand Response Reforms

ERCOT:
- Resource adequacy

New England:
- Energy and capacity market reforms

RGGI:
- New Model Rule

Federal Policy

Subsidies:
- Leading voice against extension of the Production Tax Credit and other electric generation subsidies

EPA Regulations:
- Mercury and Air Toxics Standards (MATS)
- Greenhouse gases (new and existing sources)
- 316(b)

State Policy

Oppose Subsidized Generation:
- IL: Defeated Taylorsville Energy Project Subsidy legislation
- MA: Opposed Footprint Power Subsidy legislation
- NJ: Won LCAPP Court decision

Infrastructure & Ratemaking Improvements:
- IL: Energy Infrastructure and Modernization Legislation (Senate Bill 9)
- MD/PA: Policies to speed recovery for gas and infrastructure investments

Exelon.

Investing in a Stronger Future

Core Strength	Strategic Focus and Actions
Strong Balance Sheet	Solid financial footing and investment grade credit rating will allow us to grow in challenging times.
Utility Investment	Significant infrastructure and technology enhancements under regulatory structures that allow a fair rate of return.
Operating Excellence	Generating fleet will continue unwavering focus on world class performance.
Asset Optimization	Disciplined fleet evaluation will drive strategic decisions to unlock value, improve cash flow and grow earnings.
Portfolio Management	Enhance the value of our portfolio through implementation of our fundamental view and disciplined retail pricing.
Well-Crafted Public Policies	Advocate for policies that strengthen competitive markets, limit subsidies and enhance the value of clean generation.

Exelon.

Commitment to Investment Grade

Value of Investment Grade

- Maintain key credit metrics above target ranges under both market and stress conditions to maintain investment grade ratings
- Shareholder value of maintaining investment grade:
  - Increases ability to participate in commercial business opportunities
  - Lowers collateral requirements
  - Reliable and cost efficient access to the capital markets
  - Increases business and financial flexibility

Current Ratings & Targets

Current Ratings (1) (2)

	Moody's	S&P	Fitch
Corp	Baa2	BBB-	BBB+
ComEd	A3	A-	BBB+
PECO	A1	A-	A
BGE	Baa1	A-	BBB+
Generation	Baa1	BBB	BBB+

Credit Metric Targets Supportive of Mid-High BBB/Baa Ratings (3)

- FFO/Debt > 30% in base case and 27% in stress case
- RCF/Debt > 20%
- Positive Moody's FCF

(1) Current senior unsecured ratings for Exelon, Exelon Generation and BGE and senior secured ratings for ComEd and PECO as of September 25, 2013.
(2) All ratings at S&P and Moody's have a stable outlook. On August 23rd, BGE was upgraded one notch to A- as part of S&P's annual review. All other entities were affirmed. Additionally, on February 8th, Fitch affirmed all ratings for Exelon and subs and placed ComEd on positive outlook.
(3) Credit metric target ranges are for ExGen and include the debt obligations of Exelon Corp.

Exelon remains committed to maintaining investment grade ratings

Pension and OPEB Forecast

Current Forecast:

- The table below provides the combined company's forecasted 2014 and 2015 pension and OPEB expense and contributions

	2014		2015	
(in $M)	Pre-Tax Expense[1]	Contributions[2]	Pre-Tax Expense[1]	Contributions[2]
Pension[3][4]	$335	$275	$315	$175
OPEB[3][4]	$165	$210	$160	$200
Total	$500	$485	$475	$375

(1) Pension and OPEB expenses assume an ~ 25% capitalization rate.
(2) Contributions shown in the table above are based on the current contribution policy for the plans and include both amounts contributed to trusts and paid from corporate assets.
(3) Expected return on assets for pension is 7.00% and for OPEB is 6.45% (2014 and 2015). Amounts above assume an actual return on assets for pension and OPEB in 2013 of 4.88% and 8.00%, respectively.
(4) Projected 12/31/13 pension and OPEB discount rates are 4.80% and 4.92%, respectively.

Exelon.

2014 Pension and OPEB Sensitivities

- Tables below provide sensitivities for the combined company's 2014 pension and OPEB expense and contributions[1] under various discount rate and S&P 500 asset return scenarios

	2014 Pension Sensitivity[2] (in $M)					
	S&P Returns in Q4 2013[3]					
	10%		0%		-10%	
Discount Rate at 12/31/13	Pre-Tax Expense[1]	Contributions[2]	Pre-Tax Expense[1]	Contributions[2]	Pre-Tax Expense[1]	Contributions[2]

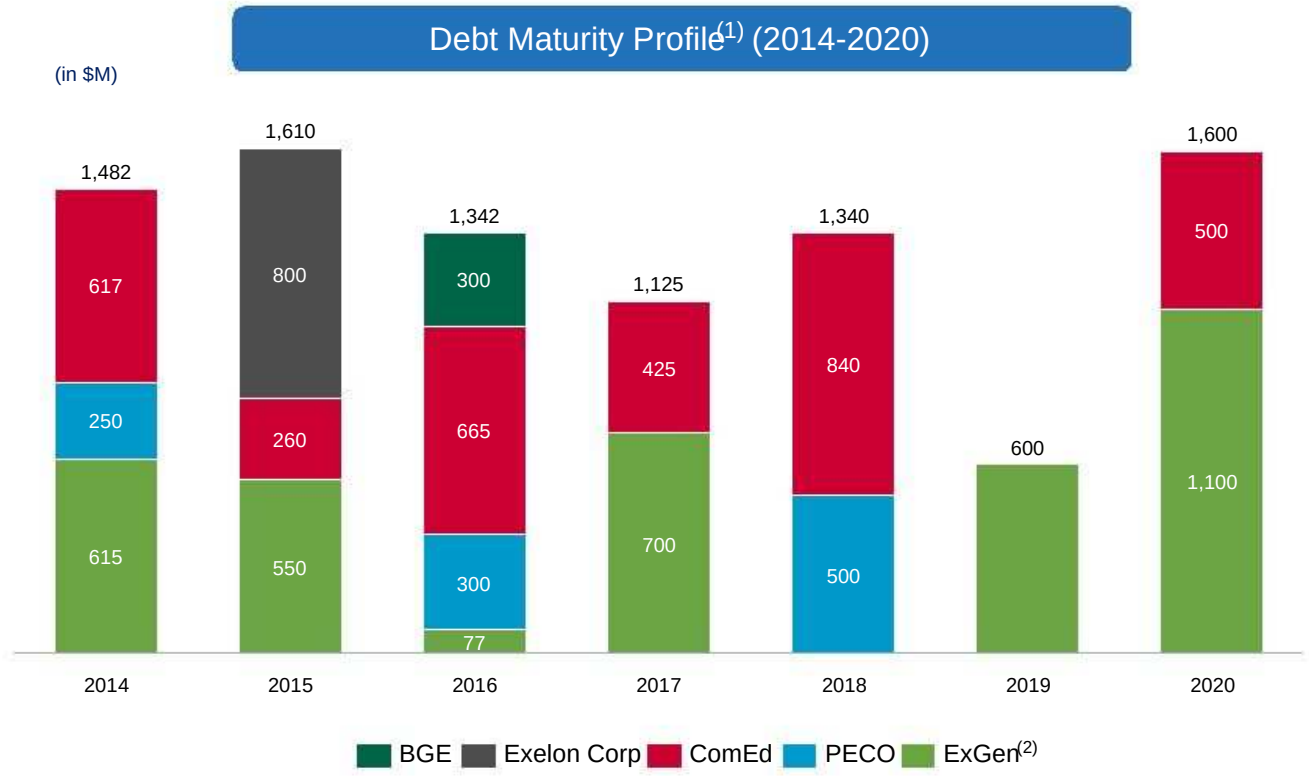
Additional 2013 ExGen and CENG Modeling

P&L Item	2013 Estimate
ExGen Model Inputs[1]	
O&M[2]	$4,275M
Taxes Other Than Income (TOTI)[3]	$300M
Depreciation & Amortization[4]	$825M
Interest Expense	$350M
CENG Model Inputs (at ownership)[5]	
Gross Margin	Included in ExGen Disclosures
O&M/TOTI	$400M - $450M
Depreciation & Amortization/Accretion of Asset Retirement Obligations	$100M - $150M
Capital Expenditures	$75M - $125M
Nuclear Fuel Capital Expenditures	$100M - $150M

(1) ExGen amounts for O&M, TOTI and Depreciation & Amortization exclude the impacts of CENG. CENG impact is reflected in "Equity earnings of unconsolidated affiliates" in the Income Statement.
(2) ExGen O&M excludes P&L neutral decommissioning costs and the impact from O&M related to entities consolidated solely as a result of the application of FIN 46R.
(3) TOTI excludes gross receipts tax for retail.
(4) ExGen Depreciation & Amortization excludes the impact of P&L neutral decommissioning.
(5) The CENG model inputs are intended to support Exelon's guidance range and do not represent CENG's final estimates.

Exelon.

Debt Maturity Schedule



(1) As of 9/30/13
(2) Includes $550M in 2015 and 2020 of inter-company loan agreements between Exelon and Exelon Generation that mirror the terms and amounts of the third party obligations of Exelon.

Exelon.

GAAP to Operating Adjustments

- **Exelon's 2013 adjusted (non-GAAP) operating earnings excludes the earnings effects of the following:**
  - Mark-to-market adjustments from economic hedging activities
  - Unrealized gains and losses from NDT fund investments to the extent not offset by contractual accounting as described in the notes to the consolidated financial statements
  - Financial impacts associated with the sale or retirement of generating stations
  - Financial impacts associated with the increase in certain decommissioning obligations for spent nuclear fuel at retired nuclear units and increased retirement obligations for retired fossil power plants
  - Certain costs incurred associated with the Constellation merger and integration initiatives
  - Non-cash amortization of intangible assets, net, related to commodity contracts recorded at fair value at the merger date
  - Non-cash amortization of certain debt recorded at fair value at the merger date, which was retired in the second quarter of 2013
  - Non-cash charge to earnings resulting from the remeasurement of Exelon's like-kind exchange tax position
  - Non-cash charge to earnings related to the cancellation of previously capitalized nuclear uprate projects and the impairment of certain wind generating assets
  - Other unusual items

ComEd April 2013 Distribution Formula Rate Updated Filing

The 2013 distribution formula rate filing establishes the net revenue requirement used to set the rates that will take effect in January 2014 after the ICC's review. The filing was updated to reflect the impact of Senate Bill 9. There are two components to the annual distribution formula rate filing:

- Filing Year: Based on prior year costs (2012) and current year (2013) projected plant additions.
- Annual Reconciliation: For the prior calendar year (2012), this amount reconciles the revenue requirement reflected in rates during the prior year (2012) in effect to the actual costs for that year. The annual reconciliation impacts cash flow in the following year (2014) but the earnings impact has been recorded in the prior year (2012) as a regulatory asset.

Docket #	13-0318
Filing Year	**2012 Calendar Year Actual Costs and 2013 Projected Net Plant Additions** are used to set the rates for calendar year 2014. Rates currently in effect (docket 13-0386) for calendar year 2013 were based on 2011 actual costs and 2012 projected net plant additions and reflect the impacts of PA 98-0015 (SB9).
Reconciliation Year	**Reconciles Revenue Requirement reflected in rates during 2012 to 2012 Actual Costs Incurred.** Revenue requirement for 2012 is based on dockets 10-0467, 11-0721 May Order and 11-0721 October Re-hearing Order.
Common Equity Ratio	~ **45%** for both the filing and reconciliation year
ROE	**8.72%** for both the filing and reconciliation year (2012 30-yr Treasury Yield of 2.92% + 580 basis point risk premium). For 2013 and 2014, the actual allowed ROE reflected in net income will ultimately be based on the average of the 30-year Treasury Yield during the respective years plus 580 basis point spread.
Requested Rate of Return	~ **7%** for the both the filing and reconciliation year
Rate Base	**$6,702 million**– Filing year (represents projected year-end rate base using 2012 actual plus 2013 projected capital additions). 2013 and 2014 earnings will reflect 2013 and 2014 year-end rate base respectively. **$6,389 million** - Reconciliation year (represents year-end ate base for 2012)
Revenue Requirement Increase [1]	**$353M** ($191M is due to the 2012 reconciliation, $162M relates to the filing year). The 2012 reconciliation impact on net income was recorded in 2012 as a regulatory asset. This increase also reflects the decrease in 2013 rates as a result of Senate Bill 9.
Timeline	• 04/29/13 Filing Date • 240 Day Proceeding • ICC order by year end; rates effective January 2014

Given the retroactive ratemaking provision in the EIMA legislation, ComEd net income during the year will be based on actual costs with a regulatory asset/liability recorded to reflect any under/over recovery reflected in rates. Revenue Requirement in rate filings impacts cash flow.

Exelon.

BGE Rate Case

Rate Case Request	Electric	Gas
Docket #	9326	
Test Year	August 2012 –July 2013	
Common Equity Ratio	51.1%	
Requested Returns	ROE: 10.5%; ROR: 7.87%	ROE: 10.35%; ROR: 7.79%
Rate Base	$2.8B	$1.0B
Revenue Requirement Increase	$82.6M	$24.4M
Proposed Distribution Price Increase as % of overall bill	2%	3%

Timeline

- 5/17/13: BGE filed application with the MDPSC seeking increases in gas & electric distribution base rates
- 8/5/13: Staff/Intervenors file direct testimony
- 8/23/13: Update 8 months actual/4 month estimated test period data with actuals for last 4 months (March -July 2013)
- 9/17/13: BGE and staff/intervenors file rebuttal testimony
- 10/3/13: Staff/Intervenors and BGE file surrebuttal testimony
- 10/18/13 – 10/29/13: Hearings
- 11/12/13: Initial Briefs
- 11/22/13: Reply Briefs
- 12/13/13: Final Order
- New rates are in effect shortly after the final order

ComEd Load

Weather-Normalized Load YoY Growth

Economic Forecast of Drivers that Influence Load

Driver or Indicator	2014 Outlook
Gross Metro Product (GMP)	2.2% growth in GMP reflects overall better economic conditions than the slow growth in 2013 (Manufacturing and Professional Business Services employment accelerate in 2014)
Employment	1.4% increase in total employment is expected for 2014, which is consistent with the past three years
Manufacturing	Manufacturing employment is expected to grow 1.4% in 2014. This is a significant improvement over the 0.7% growth in 2012 and the 0.4% growth in 2013
Households	Household formations are expected to increase 0.4% in 2014. This is a slight improvement over the 0.3% realized in the past couple of years
Energy Efficiency	Continued expansion of EE program expected to reduce usage in 2014 by approximately 1.2%

Moderate growth economy and energy efficiency initiatives will continue to impact load growth

Notes: 2012 data is not adjusted for leap year. Source of 2014 economic outlook data is Global Insight (July 2013).

Exelon.

S1-SSA-0009 - 10105

PECO Load

Weather-Normalized Load YoY Growth

Economic Forecast of Drivers that Influence Load

Driver or Indicator	2014 Outlook
Gross Metro Product (GMP)	GMP projected to grow at 2.1% for 2014, vs. pre-recession average of 2.5%
Resident Employment	Resident Employment outlook is 1.0% in 2014 vs. 0.8% in 2013
Manufacturing Employment	Manufacturing employment is expected to grow at 1.1%. Philadelphia has had negative growth from 2000 to 2013
Households	Household growth is expected to be 0.7%, strongest growth since 2010
Energy Efficiency	Deemed Energy Efficiency impact forecasted to be ~1% reduction in usage in 2014

Moderately strong economic recovery will drive sales in 2014, but this will be partially offset by on-going energy efficiency initiatives

Notes: 2012 data is not adjusted for leap year. Source of 2013 economic outlook data is Global Insight (August 2013)

Exelon

S1-SSA-0009 - 10106

BGE Load

Weather-Normalized Load YoY Growth

Economic Forecast of Drivers that Influence Load

Driver or Indicator	2014 Outlook
Gross Metro Product (GMP)	GMP is projected to grow at 2.4% for 2014.
Employment	1.4% growth projected. BGE's decoupled non-rate case revenue growth is primarily driven by customer growth. The main driver for customer growth is employment.
Manufacturing	Manufacturing employment is expected to be fairly flat to 2013 levels in 2014
Households	Household growth is projected to be 0.9%, the same as 2013.
Energy Efficiency	Continued expansion of EE programs will partially offset growth seen due to improvements in economic conditions.

2014 is expected to be another transition year for the Baltimore economy with continued slow to moderate growth

Notes: 2012 Data is not adjusted for leap year. Source of 2014 economic outlook data is Global Insight (August 2013).

Exelon Utilities: Rate Base(1) and ROE Targets

ComEd

($ in billions)

	2013E	Long-Term Target
Equity Ratio	~45%	~53%(2)
Earned ROE	8 -9%	Based on 30-yr. US Treasury(3)

PECO

	2013E	Long-Term Target
Equity Ratio	~56%	~53%
Earned ROE	11.5 – 12.5%	≥10%

BGE

	2013E	Long-Term Target
Equity Ratio	~49%	~53%(4)
Earned ROE	8.0-8.5%	≥10%

Continued investment in Utilities will provide stable earnings growth

(1) ComEd and PECO rate base represents end-of-year; and BGE rate base represents a trailing 13-month average. Numbers may not add due to rounding.
(2) Equity component for distribution rates will be the actual capital structure adjusted for goodwill.
(3) Earned ROE will reflect the weighted average of 11.5% allowed transmission ROE and distribution ROE resulting from 30-year Treasury plus 580 basis points for each calendar year.
(4) Per MDPSC merger commitment, BGE is precluded from paying dividends through 2014. Per MDPSC orders, BGE cannot pay out a dividend to its parent company if said dividend would cause BGE's equity ratio to fall below 48%.

Exelon

Constellation℠
An Exelon Company

S1-SSA-0009 - 10111

Commercial Business Overview

Scale, Scope and Flexibility Across the Energy Value Chain

Development and exploration of natural gas and liquids properties

12 assets in seven states

~255 BCFe of proved Reserves[1]

Leading merchant power generation portfolio in the U.S.

~35 GW of owned generation capacity[2]

Clean portfolio, well positioned for evolving regulatory requirements

Industry-leading wholesale and retail sales and marketing platform

~150 TWh of load and ~410 BCF of gas delivered[3]

~ 1 million residential and 100,000 business and public sector customers

One of the largest and most experienced Energy Management providers

~2,000 MW of Load Response under contract[4]

Over 4,000 energy savings projects implemented across the U.S.

Benefiting from scale, scope and flexibility across the value chain

(1) Estimated proved reserves as of 12/31/2012. Includes Natural Gas (NG), NGL Liquids (NGL) and Oil. NGL and Oil are converted to BCFe at a ratio of 6:1.
(2) Total owned generation capacity as of 9/30/2013.
(3) Expected for 2013 as of 9/30/2013. Electric load and gas includes fixed price and indexed products.
(4) Load Response estimate as of 9/30/2013.

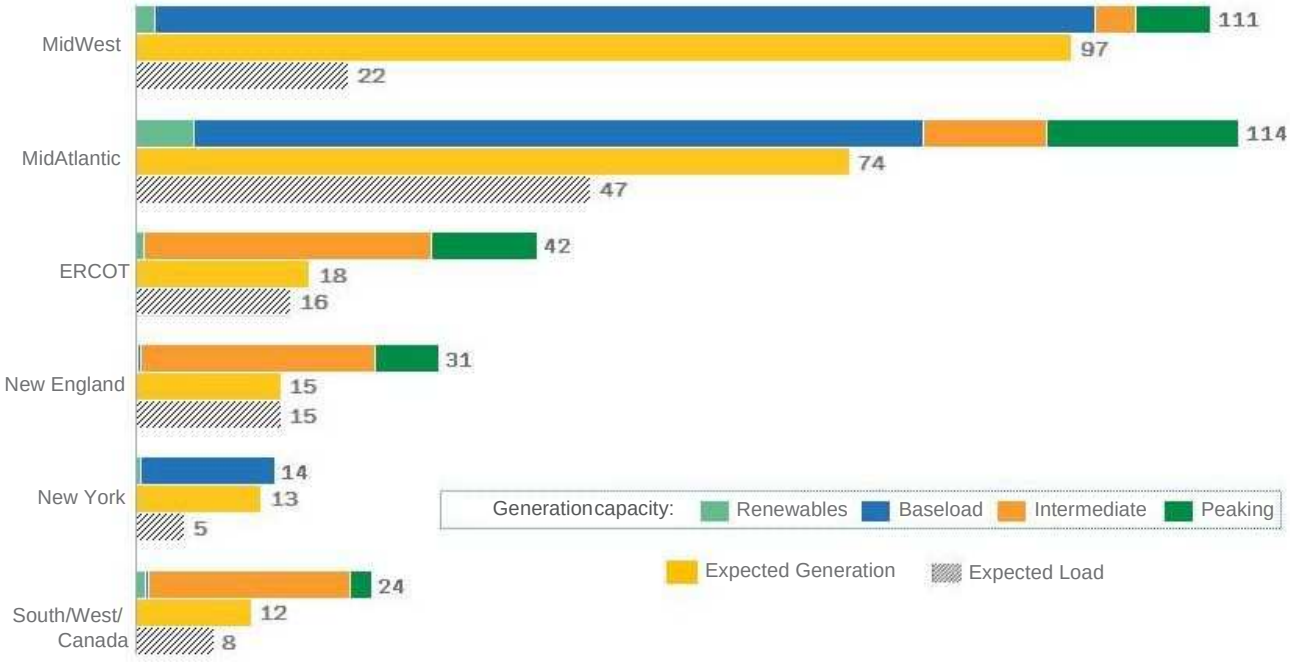
Exelon.

S1-SSA-0009 - 10112

Generation and Load Match

Generation Capacity, Expected Generation and Expected Load

2014 in TWh(1,2)



The combination establishes an industry-leading platform with regional diversification of the generation fleet and customer-facing load business

(1) Owned and contracted generation capacity converted from MW to MWh assuming 100% capacity factor for all technology types, except for renewable capacity which is shown at estimated capacity factor.
(2) Expected generation and load shown in the chart above will not tie out with load volume and ExGen disclosures. Load shown above does not include indexed products and generation reflects a net owned and contracted position. Estimates as of 9/30/2013.

Electric Load Serving Business: Growth Target

Commercial Load[1]

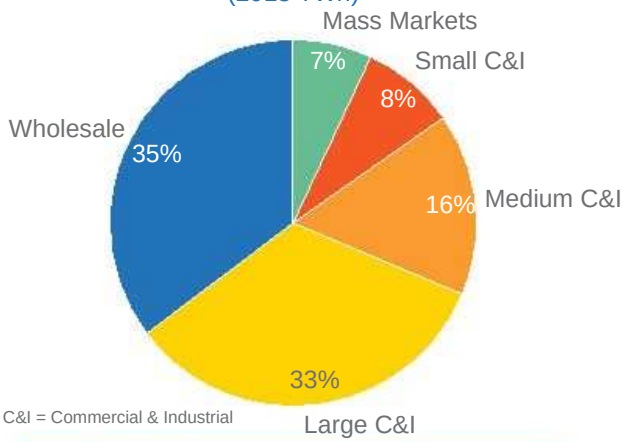
2013 – 2016 TWh

(1) Numbers and percentages are rounded to the nearest 5
(2) Index load expected to be 20% to 30% of total forecasted retail load

Focus on disciplined pricing and maximizing margin potential through all channels to market

Load Split by Customer Class

(2013 TWh)



C&I = Commercial & Industrial

Customer Type	Load Size
Mass Markets	<1,000 MWhs per year
Small C&I	1,001-5,000 MWhs per year
Medium C&I	5,001-25,000 MWhs per year
Large C&I	>25,000 MWhs per year

A diverse set of customers enhances margin opportunities from a sales and portfolio management standpoint

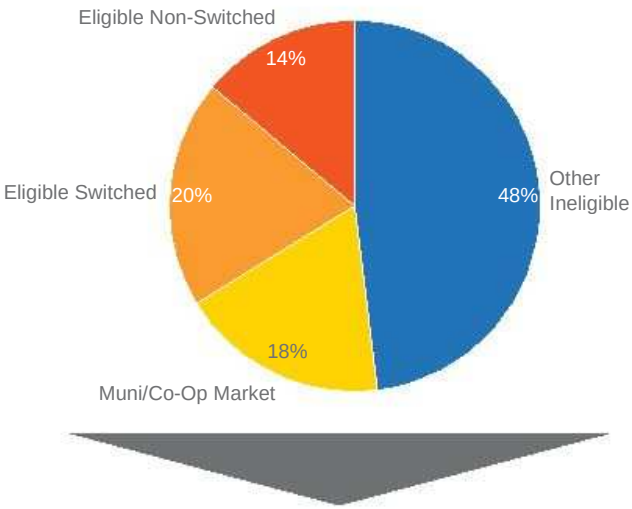
Exelon.

S1-SSA-0009 - 10114

Electric Load Serving Business: Strategy

Total U.S. Power Market in 2013

Estimated Load ~ 3,700 TWh[1)]



Through retail and wholesale channels, Constellation currently serves 150 TWhs, or approximately 4%, of total U.S. power demand

Expected Total Competitive Market Growth

- Underlying load growth
  - Approx. 1% load growth across the U.S.
- Switched market expected to grow by approximately 5% in C&I from 2013-2016
- Switched market expected to grow by approximately 3% in Residential from 2013-2016

Strategy to Grow

- Improve market share in existing markets
- Cross sell suite of products to existing customers
  - Create more value with customers
  - Utilize data and technology to expand product offerings
  - Achieve higher renewal rates
  - Distinguish our brand
- Leverage operational efficiency

Constellation is well positioned in a U.S. market where capacityavailable for competitive supply has room to grow

(1) Source: EIA, KEMA and internal estimates.

S1-SSA-0009 - 10116

Retail and Wholesale Gas

Retail Gas

Portfolio Size:

- 410 Bcf expected to be served in 2013 with moderate growth thereafter
- Month by month renewals, with high retention rates

Market Potential:

- All states are competitive markets with an estimated total market size of 15,000 Bcf, of which 7,500 Bcf is currently switched

Growth Strategy and Objectives:

- Looking to grow Northeast gas markets as well as ONEOK territories

Wholesale Gas

Portfolio Size:

- 8 Bcf wholesale storage
- 450,000 MMBtu's per day of term transport
- Over 1 Bcf/day of plant supply
- ~4Bcf/day of NG flows to meet growing customer business, asset optimization, and plant supply

Growth Strategy and Objectives:

- Continue to expand wholesale presence to complement power assets
- Increase market knowledge of regional and basis transport information to assist power forecasting
- Continue to expand physically based customer business
- Continue to grow NG asset portfolio that complements customer business & plant supply requirements

(1) Estimate as of 9/30/2013.

Upstream E&P Assets

Investment Thesis

- Our Upstream Gas business achieves strong returns (>12% IRR)
- $125m (~62% utilized) Reserve Based Lending (RBL) facility in place
  - Receives off-balance sheet treatment from S&P
- Provides valuable market intelligence in complex natural gas markets

Forecasted Production

	2013	2014	2015	2016
Net Daily Prod (MMcfe / day)	55 - 70	45 - 60	45 - 60	60 - 75

Current Portfolio Of Investments

Mississippi lime (OK)	Floyd shale (AL)
Hunton dewatering (OK)	Ohio shale (OH)
Woodford shale (OK)	Woodbine shale (TX)
Fayetteville shale (AR)	Trenton Black River (MI)
Haynesville shale (LA)	Barnett shale (TX)

Estimated Net Proved Reserves (as of 12/31/12)[3]	Average Net Daily Production (Q2 2013)[4]
255 Bcfe	61.0 MMcfe

(1) Oil/NGL conversion to gas is 6:1.
(2) Constellation does not operate any of its properties.
Note: E&P = Exploration and Production
(3) 12/31/12 Year end reserves excluding Eagle Ford
(4) Net daily production as of Q2 2013 excluding Eagle Ford

Exelon

Energy Price Upside - NIHub

Key Drivers
- Year over year increases in fuel prices
- Current and future coal retirements
- Higher variable unit costs due to MATS
- Modest load growth
- Offset by new generation (gas and renewable)

Other factors (not included)
- Demand Response energy bidding
- Increased variable costs due to RGGI
- Scarcity pricing

- The charts above illustrates NIHub prices from 2011 to 2016 (realized through 2013) and NYMEX natural gas for the same time period
- In 2012 we saw low prices in the natural gas and power markets.
  - Natural gas prices settled $2.75 for the year and NIHub ATC prices settled ~$29.00. The forward market for NIHub continues to trade between $30.50 and $31.00 even though forward natural gas prices are between $1.00 - $1.50 per MMBtu higher than the spot levels we saw in 2012.

We continue to believe there is $4 of upside in NiHub energy prices in 2015/2016 driven by several factors including compliance with environmental regulations

Portfolio Management Strategy

Strategic Policy Alignment

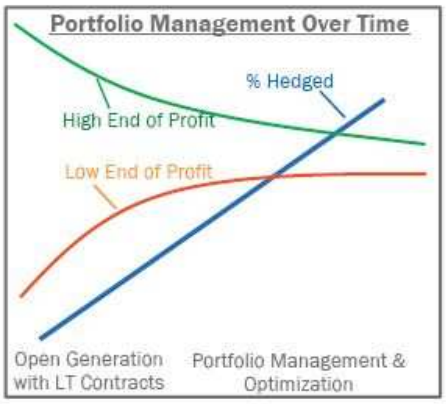
- Aligns hedging program with financial policies and financial outlook
  - Establish minimum hedge targets to meet financial objectives of the company (dividend, investment-grade credit rating)
  - Hedge enough commodity risk to meet future cash requirements under a stress scenario

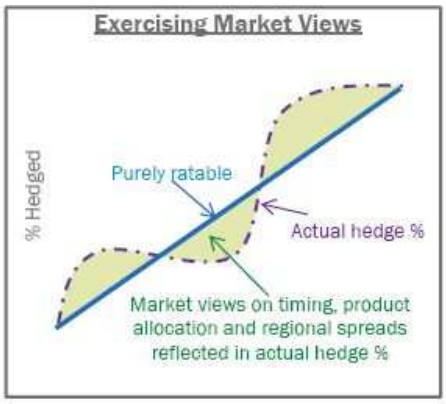
Three-Year Ratable Hedging

- Ensure stability in near-term cash flows and earnings
  - Disciplined approach to hedging
  - Tenor aligns with customer preferences and market liquidity
  - Multiple channels to market that allow us to maximize margins
  - Large open position in outer years to benefit from price upside

Bull / Bear Program

- Ability to exercise fundamental market views to create value within the ratable framework
  - Modified timing of hedges versus purely ratable
  - Cross-commodity hedging (heat rate positions, options, etc.)
  - Delivery locations, regional and zonal spread relationships





Protect Balance Sheet | **Ensure Earnings Stability** | **Create Value**

Effective Realized Energy Price ($/MWH)[4]				
Midwest	$37.00	$33.50	$33.00	$34.00
Mid-Atlantic[2]	$49.00	$45.00	$45.00	$49.00
ERCOT[5]	$24.00	$11.00	$9.50	$6.50
New York[2]	$32.00	$37.00	$42.50	$39.50
New England[5]	$6.00	$3.50	$2.00	$5.50

(1) Expected generation represents the amount of energy estimated to be generated or purchased through owned or contracted for capacity. Expected generation is based upon a simulated dispatch model that makes assumptions regarding future market conditions, which are calibrated to market quotes for power, fuel, load following products, and options. Expected generation assumes 12 refueling outages in 2013, 14 refueling outages in 2014 and 2015 and 12 refueling outages in 2016 at Exelon-operated nuclear plants, Salem and CENG. Expected generation assumes capacity factors of 94.1%, 93.7%, 93.3%, and 94.4% in 2013, 2014, 2015 and 2016 at Exelon-operated nuclear plants excluding Salem and CENG. These estimates of expected generation in 2014, 2015 and 2016 do not represent guidance or a forecast of future results as Exelon has not completed its planning or optimization processes for those years. (2) Includes CENG Joint Venture. (3) Percent of expected generation hedged is the amount of equivalent sales divided by expected generation. Includes all hedging products, such as wholesale and retail sales of power, options and swaps. Uses expected value on options. (4) Effective realized energy price is representative of an all-in hedged price, on a per MWh basis, at which expected generation has been hedged. It is developed by considering the energy revenues and costs associated with our hedges and by considering the fossil fuel that has been purchased to lock in margin. It excludes uranium costs and RPM capacity revenue, but includes the mark-to-market value of capacity contracted at prices other than RPM clearing prices including our load obligations. It can be compared with the reference prices used to calculate open gross margin in order to determine the mark-to-market value of Exelon Generation's energy hedges. (5) Spark spreads shown for ERCOT and New England.

Exelon.

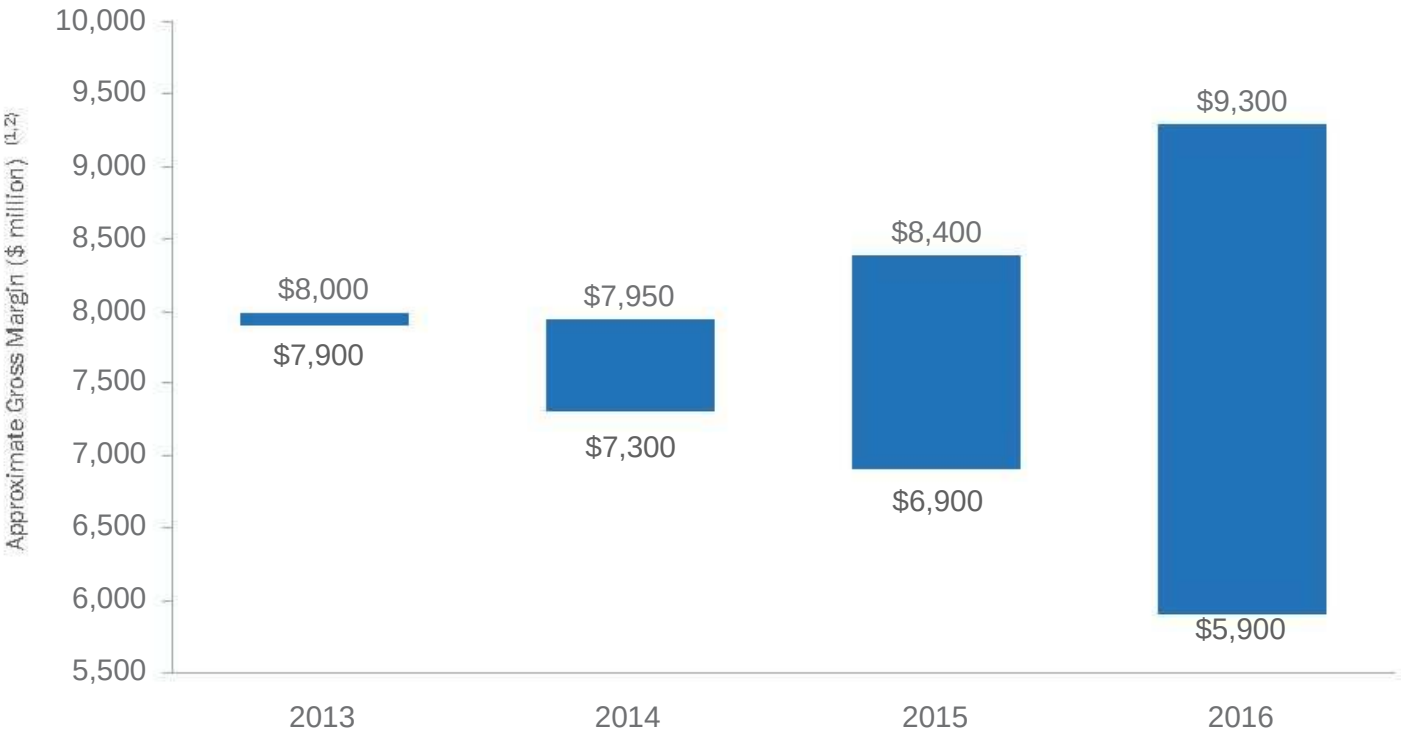
ExGen Hedged Gross Margin Sensitivities

Gross Margin Sensitivities (With Existing Hedges) [1, 2,3]	2013	2014	2015	2016
Henry Hub Natural Gas ($/MMbtu)				
+ $1/MMbtu	$10	$110	$370	$575
-$1/MMbtu	$0	$(45)	$(305)	$(550)
NiHub ATC Energy Price				
+ $5/MWh	$0	$65	$325	$450
-$5/MWh	$0	$(60)	$(325)	$(450)
PJM-W ATC Energy Price				
+ $5/MWh	$0	$35	$175	$290
-$5/MWh	$0	$(35)	$(170)	$(280)
NYPP Zone A ATC Energy Price				
+ $5/MWh	$0	$5	$20	$35
-$5/MWh	$0	$(10)	$(20)	$(35)
Nuclear Capacity Factor				
+/- 1%	+/- $10	+/- $40	+/- $45	+/- $45

(1) Based on September 30, 2013 market conditions and hedged position. Gas price sensitivities are based on an assumed gas-power relationship derived from an internal model that is updated periodically. Power prices sensitivities are derived by adjusting the power price assumption while keeping all other prices inputs constant. Due to correlation of the various assumptions, the hedged gross margin impact calculated by aggregating individual sensitivities may not be equal to the hedged gross margin impact calculated when correlations between the various assumptions are also considered. (2) Sensitivities based on commodity exposure which includes open generation and all committed transactions. (3) Includes CENG Joint Venture.

Exelon.

Exelon Generation Hedged Gross Margin Upside/Risk



(1) Represents an approximate range of expected gross margin, taking into account hedges in place, between the 5th and 95th percent confidence levels assuming all unhedged supply is sold into the spot market. Approximate gross margin ranges are based upon an internal simulation model and are subject to change based upon market inputs, future transactions and potential modeling changes. These ranges of approximate gross margin in 2014, 2015 and 2016 do not represent earnings guidance or a forecast of future results as Exelon has not completed its planning or optimization processes for those years. The price distributions that generate this range are calibrated to market quotes for power, fuel, load following products, and options as of September 30, 2013 (2) Gross Margin Upside/Risk based on commodity exposure which includes open generation and all committed transactions.

Exelon.

Illustrative Example of Modeling Exelon Generation 2014 Gross Margin

Row	Item	Midwest	Mid-Atlantic	ERCOT	New York	New England	South, West & Canada
(A)	Start with fleet-wide open gross margin	← $5.65 billion →					
(B)	Expected Generation (TWh)	96.9	73.6	17.8	12.5	14.7	
(C)	Hedge % (assuming mid-point of range)	86.5%	91.5%	82.5%	88.5%	50.5%	
(D=B*C)	Hedged Volume (TWh)	83.8	67.3	14.7	11.1	7.4	
(E)	Effective Realized Energy Price ($/MWh)	$33.50	$45.00	$11.00	$37.00	$3.50	
(F)	Reference Price ($/MWh)	$30.25	$37.19	$6.30	$35.54	$4.88	
(G=E-F)	Difference ($/MWh)	$3.25	$7.81	$4.70	$1.46	$(1.38)	
(H=D*G)	Mark-to-market value of hedges ($ million)(1)	$275 million	$525 million	$70 million	$15 million	$(10) million	
(I=A+H)	Hedged Gross Margin ($ million)	$6,550 million

Constellation Energy Nuclear Group (CENG) Background

As a result of Exelon's equity interest in CENG, CENG gross margins and earnings are reflected in ExGen disclosures and other financial statements. The following is information related to PPA contracts between CENG and 3rd parties and the PPA between CENG and its equity parents.

	Calvert 1&2	NMP 1	NMP 2 (1)	Ginna(2)	
Ownership Interest					
Total Plant Capacity	1,756 MW	617 MW	1,279 MW	577 MW	
Ownership Split	100% CENG	100% CENG	82% CENG / 18% LIPA	100% CENG	
ExGen Ownership (50.01% of CENG)	878 MW	308 MW	524 MW	288 MW	
PPA structure (% output)					
CENG Legacy PPA with Utilities	-	-	See footnote 1	90% < June 2014	0% > June 2014
CENG PPA with Parents	100%	100%	100%	10% < June 2014	100% > June 2014

CENG PPA with Parents				
5 year contract extendable at end of each year for additional year - Market based pricing and monthly, rolling 3 year hedge profile (100%, 60%, 30%)				
	2012	2013	2014	2015
(% of uncommitted output)				
EDF Trading	15	15	15	N.A.
ExGen	85	85	85	N.A.

(1) Nine Mile Point 2 (NMP) has a revenue sharing agreement (via a call option type contract) on 80% of the output.
(2) Ginna Legacy PPA at $44/MWh; CENG PPA with parents (ExGen, EDF) at close to market prices and designed to maintain a monthly ratable profile for CENG.

Exelon.

Constellation Energy Nuclear Group (CENG) Background

ExGen Disclosures
Forward Estimates

- ExGen forward disclosures reflect the gross position that accrues to ExGen from ownership interest in CENG and PPA with CENG as of a certain date
- **Open Gross Margin:** Reflects proportionate share of CENG revenues and fuel costs, market value of PPA less PPA costs paid by ExGen to CENG
- **MtM of Hedges:** Reflects MtM of any hedges placed by ExGen for managing position arising from ownership interests or PPAs with CENG
- **Expected Generation:** Reflects proportionate ownership in CENG and generation associated with PPA between CENG and ExGen.
- **Hedge Percentage:** Reflects hedges placed by ExGen to hedge exposure arising from CENG position (owned or contracted)
- **Effective Realized Energy Price:** Reflects MtM and hedges from CENG position (owned or contracted)

Financial Statements
(10-Q, 10-K, Earnings Release tables)
Actuals

- ExGen actuals reflect equity method accounting treatment for ownership interest in CENG and regular treatment for PPA between ExGen and CENG.
- **RnF:** Includes net PPA gross margin (revenues less costs) between ExGen and CENG. CENG earnings or gross margin are not included, and are instead shown under "CENG equity earnings" on the income statement.
- **Total Supply:** Includes only the generation corresponding to the PPA between ExGen and CENG.
- **Average Margins ($/MWh):** Includes only margins corresponding to PPA between ExGen and CENG as well as any hedges placed by ExGen

Exelon

S1-SSA-0009 - 10129

Generation

Exelon Generation Fleet

National Scope

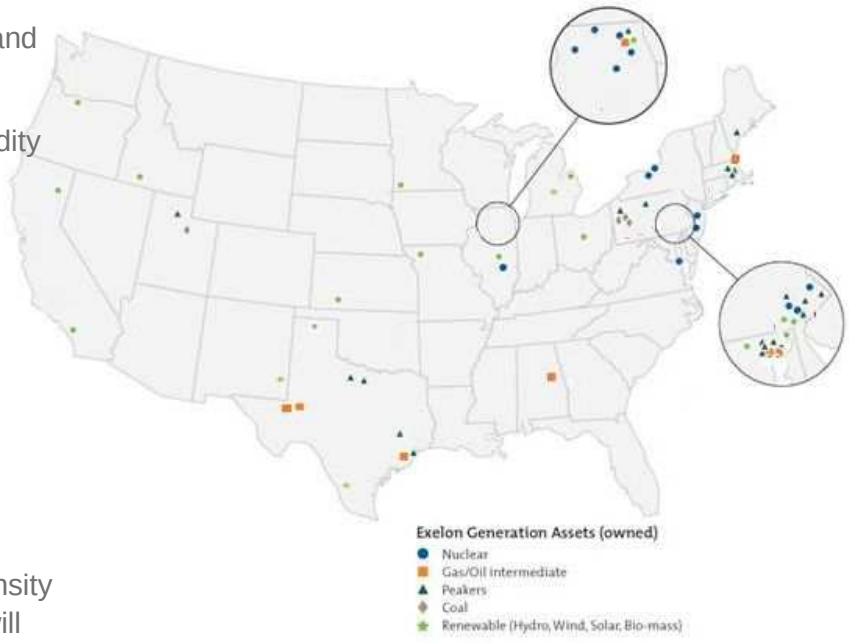
- Power generation assets in 20 states and Canada
- Low-cost generation capacity provides unparalleled leverage to rising commodity prices

Large and Diverse

- 35 GW of diverse generation(1)
  - 19 GW of Nuclear
  - 10 GW of Gas
  - 2 GW of Hydro
  - 2 GW of Oil
  - 1 GW of Coal
  - 1 GW of Wind/Solar/Other

Clean

- One of nation's cleanest fleets as measured by CO2, SO2 and NOx intensity
- Less than 5% of generation capacity will require capital expenditures to comply with Air Toxic rules



A clean and diverse portfolio that is well positioned for environmental upside from EPA regulations

(1) Total owned generation capacity as of 9/30/2013. Nuclear capacity reflects EXC ownership of CENG and Salem.

Exelon

S1-SSA-0009 - 10131

Executing on Generation Development and Growth Projects

Solar

- Antelope Valley Solar Ranch Project One
  - Large scale solar project that will be 230 MW once fully operational
    - 128 MW currently online, additional 54 MW by Fall 2013
    - 48 MW by first half of 2014
  - Initial investment fully recovered by 2015
  - 25-year PPA for entire output with Pacific Gas & Electric
  - Cashflow and EPS accretive in 2013

Wind

- Six projects completed in 2012, added 404 MWs to the wind portfolio
  - All projects done under long-term PPAs with anticipated payback in approximately 10 years
- 45.6 MW wind farm in Michigan to be built in 2014

Nuclear Uprates

- Peach Bottom Extended Power Uprate
  - Adding 130 MW
  - Online dates of 65 MW in Q1 2015 and 65 MW in Q1 2016

Expanding the contracted renewable portfolio of Solar and Wind while adding incremental MWs to our existing nuclear fleet

Exelon.

S1-SSA-0009 - 10132

Exelon Nuclear Fleet Overview (including CENG and Salem)

	Plant Location	Type/ Containment	Water Body	License Extension Status / License Expiration[1]	Ownership	Spent Fuel Storage/ Date to lose full core discharge capacity[2]
Midwest	Braidwood, IL (Units 1 and 2)	PWR Concrete/Steel Lined	Kankakee River	Filed application in May 2013 (decision expected in 2015)/ 2026, 2027	100%	Dry Cask
	Byron, IL (Units 1 and 2)	PWR Concrete/Steel Lined	Rock River	Filed application in May 2013 (decision expected in 2015)/ 2024, 2026	100%	Dry Cask
	Clinton, IL (Unit 1)	BWR Concrete/Steel Lined / Mark III	Clinton Lake	2026	100%	Dry Cask (2016)
	Dresden, IL (Units 2 and 3)	BWR Steel Vessel / Mark I	Kankakee River	Renewed / 2029, 2031	100%	Dry Cask
	LaSalle, IL (Units 1 and 2)	BWR Concrete/Steel Lined / Mark II	Illinois River	2022, 2023	100%	Dry Cask
	Quad Cities, IL (Units 1 and 2)	BWR Steel Vessel / Mark I	Mississippi River	Renewed / 2032	75% Exelon, 25% Mid-American Holdings	Dry Cask
Mid-Atlantic	Calvert Cliffs, MD (Units 1and 2)	PWR Concrete/Steel Lined	Chesapeake Bay	Renewed / 2034, 2036	100% CENG[4]	Dry Cask
	R.E. Ginna, NY (Unit 1)	PWR Concrete/Steel Lined	Lake Ontario	Renewed / 2029	100% CENG[4]	Dry Cask
	Limerick, PA (Units 1 and 2)	BWR Concrete/Steel Lined / Mark II	Schuylkill River	Filed application in June 2011 (decision expected in 2015) / 2024, 2029	100%	Dry Cask
	Nine Mile Point, NY (Units 1 and 2)	BWR Steel Vessel / Mark I Concrete/Steel Vessel/ Mark II	Lake Ontario	Renewed / 2029, 2046	100% CENG[4] / 82% CENG[4], 18% Long Island Power Authority	Dry Cask
	Oyster Creek, NJ (Unit 1)	BWR Steel Vessel / Mark I	Barnegat Bay	Renewed / 2029[3]	100%	Dry Cask
	Peach Bottom, PA (Units 2 and 3)	BWR Steel Vessel / Mark I	Susquehanna River	Renewed / 2033, 2034	50% Exelon, 50% PSEG	Dry Cask
	TMI, PA (Unit 1)	PWR Concrete/Steel Lined	Susquehanna River	Renewed / 2034	100%	2023
	Salem, NJ (Units 1 and 2)	PWR Concrete/Steel Lined	Delaware River	Renewed / 2036, 2040	42.6% Exelon, 57.4% PSEG	Dry Cask

(1) Operating license renewal process takes approximately 4-5 years from commencement until completion of NRC review.
(2) The date for loss of full core reserve identifies when the on-site storage pool will no longer have sufficient space to receive a full complement of fuel from the reactor core. Dry cask storage will be in operation at those sites prior to losing full core discharge capacity in their on-site storage pools.
(3) On December 8, 2010, Exelon announced that it will permanently cease generation operations at Oyster Creek by December 31, 2019. Oyster Creek's current NRC license expires in 2029.
(4) Exelon Generation has a 50.01% ownership interest in CENG (Constellation Energy Nuclear Group, LLC). Electricite de France SA (EDF) has a 49.99% ownership interest in CENG.

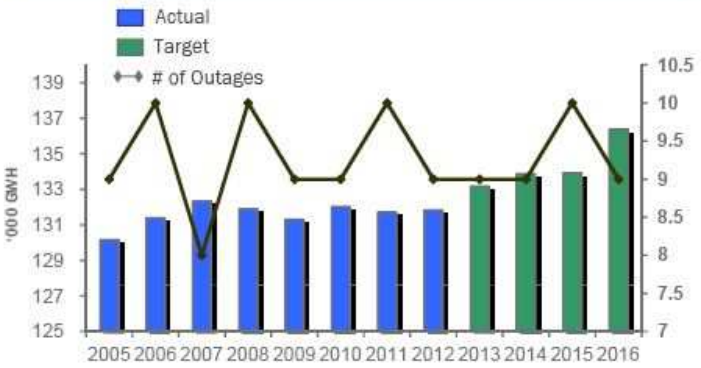
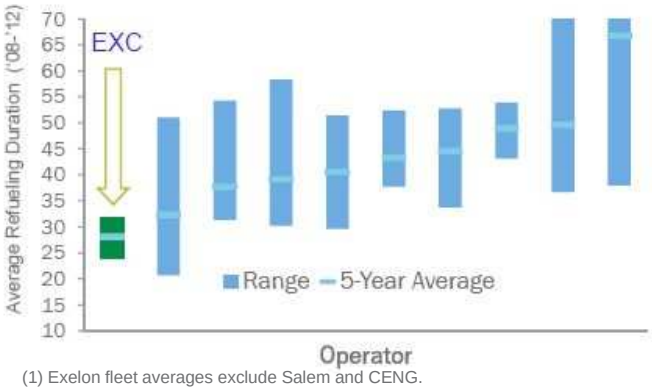
Nuclear Output and Refueling Outages

Nuclear Output (1)



(1) Net nuclear generation data at ownership excluding Salem and CEN G. 2016 includes Clinton Refueling Only outage of shortened duration.

Fleet Average Refueling Outage Duration (Days)(1)



(1) Exelon fleet averages exclude Salem and CENG.

Nuclear Refueling Cycle

- All Exelon owned units on a 24 month cycle except for Braidwood U1/U2, Byron U1/U2 and Salem U1/U2, which are on 18 month cycles
- Starting in 2015 Clinton is on annual cycles

2013 Refueling Outage Impact

- 10 planned refueling outages, including 1 at Salem
- Exelon completed 4 refueling outages in the Spring with an average duration of 24 days
- Salem completed 1 refueling outage in the Spring
- 5 Exelon planned Fall refueling outages (Braidwood 1, Peach Bottom 3, Clinton, Three Mile Island and Dresden 2)

2014 Refueling Outage Impact

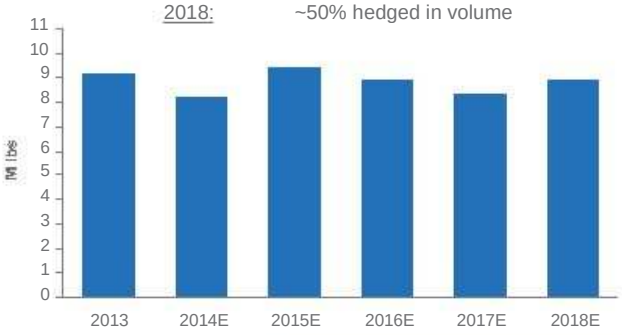
- 11 planned refueling outages, including 2 at Salem
- 5 Exelon planned Spring refueling outages and 4 planned Fall refueling outages
- 1 Salem planned Spring refueling outage and 1 planned Fall refueling outage

Exelon

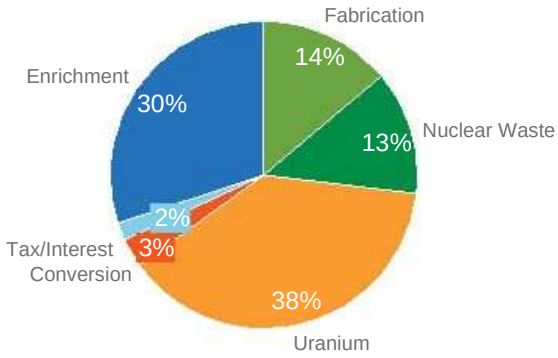
Nuclear Fuel Costs(1)

Projected Exelon (100%) Uranium Demand

2013 – 2016: 100% hedged in volume
2017: ~80% hedged in volume
2018: ~50% hedged in volume



Components of Fuel Expense in 2013



Projected Total Nuclear Fuel Spend(2)

(1) All charts exclude Salem and CENG.
(2) At ownership, excluding Salem and CENG. Excludes costs reimbursed under the settlement agreement with the DOE.

Exelon.

S1-SSA-0009 - 10136

Constellation Energy Nuclear Group (CENG) Operating Services Agreement

- **Agreement signed between Exelon and EDF, with expected close in 2014 (first quarter or early second quarter)**
- **Nuclear Operating services agreement**
  - Integrate CENG and their 3 plants into Exelon Nuclear with transfer of operating licenses
  - Utilize Exelon Nuclear Management Model to improve plant performance
  - Leverage scale and obtain cost efficiencies of running a larger, integrated fleet
    - Expect cost synergies of $50-$70M at 100% ownership
- **Loan to CENG and distributions to EDF/Exelon Generation**
  - Exelon Generation $400M loan to CENG at 5.25% annual interest rate
  - CENG $400M special distribution to EDF
  - Exelon Generation to receive preferred distributions from CENG's available cash flows until loan is fully repaid
  - Exelon Generation also to receive aggregate distributions of $400M plus a return of 8.5% per annum from the date of the special dividend
- **Option provision for EDF to sell its 49.99% interest in CENG to Exelon Generation**
  - Exercisable from January 2016 to June 2022, priced at fair market value
- **Indemnify EDF in the event of a future nuclear incident (as defined in the Price Anderson Act) in connection with the CENG nuclear plants or their operations**
  - Given Exelon's size and past performance, no material impact to premiums

Leverages Exelon's best-in-class operations, scale and low-cost fleet to add value

Cautionary Statements Regarding Forward-Looking Information

This presentation contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, that are subject to risks and uncertainties. The factors that could cause actual results to differ materially from the forward-looking statements made by Exelon Corporation, Commonwealth Edison Company, PECO Energy Company, Baltimore Gas and Electric Company and Exelon Generation Company, LLC (Registrants) include those factors discussed herein, as well as the items discussed in (1) Exelon's 2014 Annual Report on Form 10-K in (a) ITEM 1A. Risk Factors, (b) ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) ITEM 8. Financial Statements and Supplementary Data: Note 22; (2) Exelon's Third Quarter 2015 Quarterly Report on Form 10-Q in (a) Part II, Other Information, ITEM 1A. Risk Factors; (b) Part 1, Financial Information, ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) Part I, Financial Information, ITEM 1. Financial Statements: Note 19; and (3) other factors discussed in filings with the SEC by the Registrants. Readers are cautioned not to place undue reliance on these forward-looking statements, which apply only as of the date of this presentation. None of the Registrants undertakes any obligation to publicly release any revision to its forward-looking statements to reflect events or circumstances after the date of this presentation.

2015: An Exceptional Year of Performance

Our utilities are performing at their best levels, our generation business is world class and our Constellation business maximizes its value. We will deliver earnings between $2.40 - $2.60[1] per share.

- On track to invest $3.7 billion this year to make the grid smarter, more reliable, and more resilient
- Exceeding $ 1 billion in net income this year at Exelon Utilities
- Constructive regulatory environments across our jurisdictions
  - PECO rate case settlement
  - ComEd formula rate
  - Recent BGE unanimous rate case settlement
- Industry leading operational excellence
  - 1st Quartile SAIFI performance
  - 1st Quartile CAIDI performance at ComEd and PECO, 2nd Quartile at BGE
  - 1st Quartile Customer Satisfaction
  - Top Decile Gas Odor Response
- Successful generation to load matching strategy is protecting earnings
- Active role in policy development to deliver Capacity Performance construct
- #1 Provider of retail electricity, serving 34 TWhs more than our nearest competitor
- Top 10 marketer of natural gas
- World Class Operator
  - 2015 Nuclear capacity factor through 3Q: 93.8%
  - 2015 Power dispatch match through 3Q: 98.7%
  - 2015 Renewables energy capture 3Q: 95.6%

(1) Represents adjusted (non-GAAP) operating earnings. Refer to slide 31 for a list of adjustments from GAAP EPS to adjusted (non-GAAP) operating earnings

Exelon.

Looking Ahead

- The Exelon Strategy

- Addressing Key Immediate Issues
  1) Capital Allocation
  2) Pepco Holdings Acquisition
  3) Extending Clinton One Year
  4) Cost Management Initiative

- The Foundation for Exelon's Growth

Exelon.

The Exelon Strategy

S1-SSA-0009 - 10146

Our Key Objectives

Employ our integrated model to deliver stable growth, sustainable earnings and an attractive dividend

- Stable Growth – Grow ourregulated and contracted businesses and optimize our existing generation portfolio
- Sustainable Earnings – Utilities, contracted assets, and balanced generation to load strategy profits are an engine for predictable earnings and our generation business positions us to capture market upside
- Attractive Dividend – Dividend will be covered by the utilities, insulated from the earnings volatility of the generation business

Exelon

How We Will Meet Our Objectives

We will produce stable earnings growth of 3 - 5% per year from 2015 to 2018[1]

- Investing more than $18 billion in Exelon's current utilities through 2020 to modernize the grid and better serve our customers ($11 billion from 2016-2018)

We will sustainearnings growth while also preserving the benefit of market upside through:

- Ensuring operating excellence across every business
- Shifting our earnings mix to be more regulated through investments in Exelon's utilities and the acquisition of Pepco Holdings (Expect earnings to be ~60% regulated in 2018)
- Effectively managing our costs
- Growing the amount of contracted assets in our Exelon Generation portfolio
- Maximizing the value of our generation fleet and customer base through our proven generation to load matching strategy
- Hedging our generation in a manner that preserves upside from our fundamental price view

We will continue to deliver an attractivedividend of $1.24 per share[2]

- Targeting dividend funding entirely from regulated utilities
- Our business mix protects our dividend regardless of changing phases of the commodities cycle

(1) Growth target is a net income compounded annual growth rate (CAGR), assumes September 30, 2015 market prices, and does not include our fundamental market view of prices
(2) Dividends are subject to declaration by the Exelon Board of Directors

Exelon.

We Are Well Down the Path of Delivering on Our Key Objectives

	2011 (Pre-CEG Merger)	2014 (Post-CEG Merger)	2018 (Post-PHI Merger)
Top Performing Utilities	• 5.4M Electric Customers • 0.5M Gas Customers • $791M Net Income(1) • $13B Rate Base • 6,054 Miles of Transmission Lines	• 6.7M Electric Customers • 1.2M Gas Customers • $962M Net Income(1) • $20B Rate Base • 7,435 Miles of Transmission Lines	• 8.6M Electric Customers • 1.3M Gas Customers • $1.5B-1.7B Net Income(1,2) • $38B Rate Base • ~12,000 Miles of Transmission Lines
World Class Generator	• 25,544 MW (Total Capacity) • 67% Nuclear • 151 TWh Generation	• 32,753 MW (Total Capacity) • 59% Nuclear(3) • 205 TWh Generation	• 34,800 MW (Total Capacity) • 56% Nuclear(3) • 206 TWh Generation
Preeminent Competitive Energy Company	• 4 States • ~59 TWh/yr • <1 Bcf of Gas per day	• 48 States, DC & Canada • ~155 TWh/yr • 4-6 Bcf of Gas per day	• 48 States, DC, & Canada • ~210 TWh/yr • 6-8 Bcf of Gas
Transforming the Business Mix	2011 Earnings (1) • 29% Utilities • 71% Generation	2014 Earnings (1) • 47% Utilities • 53% Generation	2018 Earnings (1,4) • ~60% Utilities • ~40% Generation

(1) Represents adjusted (non-GAAP) operating earnings. Refer to slide 31 for a list of adjustments from GAAP EPS to adjusted (non-GAAP) operating earnings.
(2) Includes after-tax interest expense of (~$150M) for debt held at Corporate related to utility investment
(3) Includes CENG at ownership; does not assume put exercised
(4) Based on September 30, 2015 market prices

Exelon.

Addressing Key Immediate Issues

1) Capital Allocation
2) Pepco Holdings Acquisition
3) Extending Clinton One Year
4) Cost Management Initiative

Capital Allocation

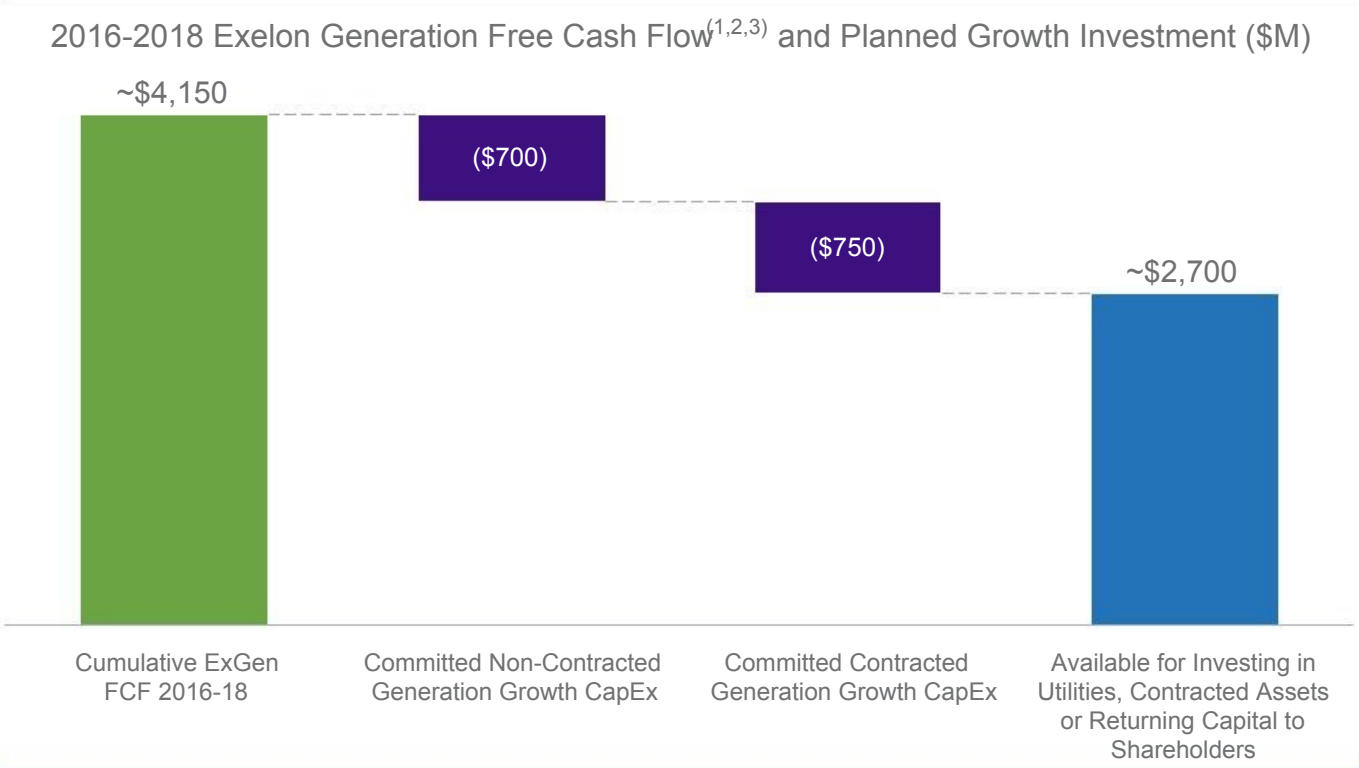
S1-SSA-0009 - 10151

Delivering Value to Shareholders Through a Principled Capital Allocation Policy

- Everycapital decisionis made to maximize value to our customers and shareholders
- We are h arvesting free cash flow from Exelon Generation to:
  - First, invest in utilities where we can earn an appropriate return,
  - Invest in contracted assets where we can meet return thresholds, and/or
  - Return capital to shareholders by retiring debt, repurchasing our shares, or increasing our dividend if required investment returns are not met
- We are committed to maintaining an attractive dividend
- Our strong balance sheet underpins our capital allocation policy

Exelon.

Redeploying Exelon Generation's Free Cash Flow to Maximize Shareholder Value



If investments do not meet our thresholds, we will return capital to shareholders

(1) Free Cash Flow = Adjusted Cash Flow from Operations less Base CapEx and Nuclear Fuel. Free Cash Flow is midpoint of a range based on September 30, 2015 market prices. Adjusted Cash Flow From Operations (non-GAAP) primarily includes net cash flows from operating activities and net cash flows from investing activities excluding capital expenditures. Reconciliation of Free Cash Flow to GAAP can be found on slide 32.
(2) Does not include an extension of bonus depreciation. A two year extension of bonus depreciation would add ~$200 million of Free Cash Flow
(3) Does not include impacts of PHI, which would decrease Free Cash Flow by (~$100M)

Exelon.

Capital Allocation —Disciplined Commitment to Growth

We will prioritize investment in assets that minimize earnings volatility and support stable earnings growth

Exelon Utilities

- Investing in utility infrastructure to benefit our customers by making the grid smarter, more reliable, and more resilient
  - $18 billion from 2016 to 2020 (existing Exelon Utilities)
  - $25 billion from 2016 to 2020 (including PHI)
- Targeting long-term ROE of 10%
- Growing existing rate base from $22 billion in 2015 to $28 billion in 2018
- Earnings CAGR of 7-9% from 2015-2018

Exelon Generation

- Going forward, we will invest in assets with contracted cash flows
  - We are reviewing development opportunities that may result in investment of $2.8 billion from 2016 through 2020
  - Approximately half of any growth investment will be funded through structured financing
- Projects must earn attractive return (> 10% ROE)

No incremental equity issuance needed to fund investment

Note: Including PHI would increase combined rate base by $10 billion in 2018; Exelon Utilities 2016-2018 capital investment is $11 billion for existing Exelon utilities ($15 billion including PHI); Exelon Generation 2016-2018 investment opportunities total $1.6 billion

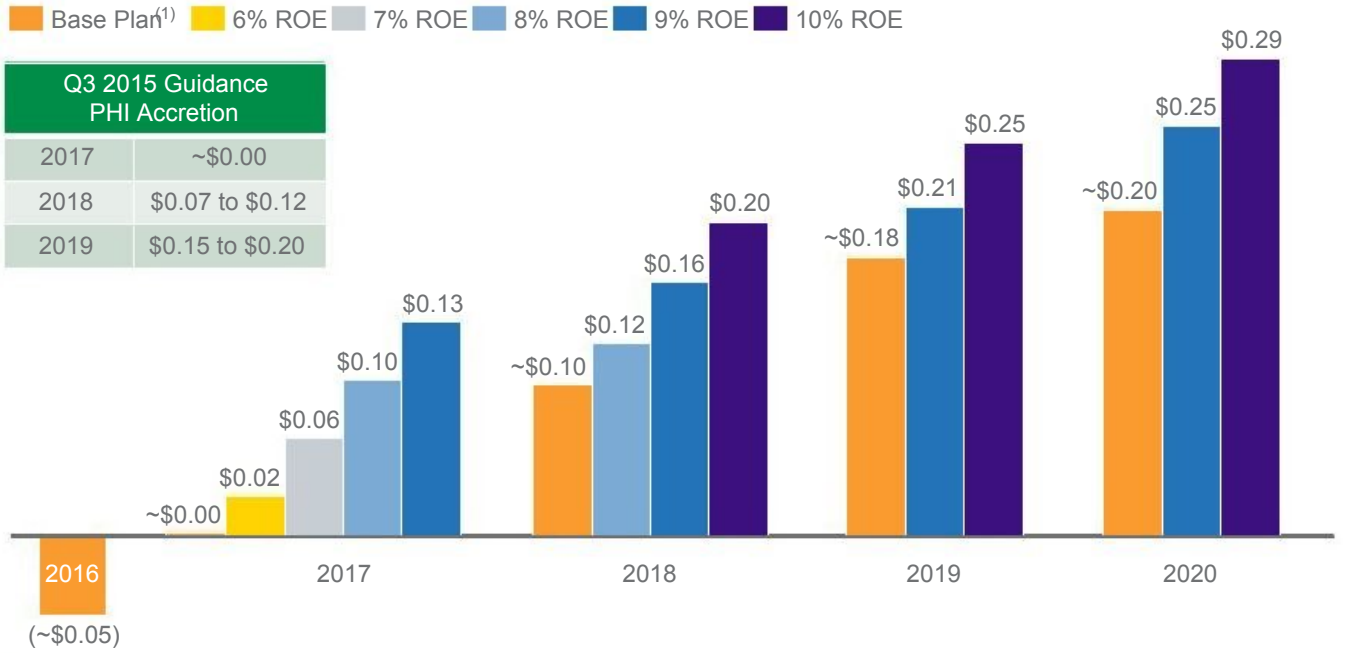
Exelon.

Pepco Holdings Acquisition

S1-SSA-0009 - 10155

PHI Acquisition Increases Sustainability of Earnings Growth

Projected Earnings Accretion at Various Earned ROE Levels(1,2,3)



Operational improvements should drive enhanced regulatoryoutcomes, positively impacting EPS

(1) Base Plan accretion figures represent midpoint of updated guidance range from Q3 2015 earnings call and reflect current PHI business plan
(2) Chart above illustrates accretion at various weighted average distribution earned ROEs for PHI
(3) Accretion is measured against Exelon standalone plan, which excludes the impact of PHI acquisition debt and equity
Note: Represents adjusted (non-GAAP) operating earnings. Refer to slide 31 for a list of adjustments from GAAP EPS to adjusted (non-GAAP) operating earnings

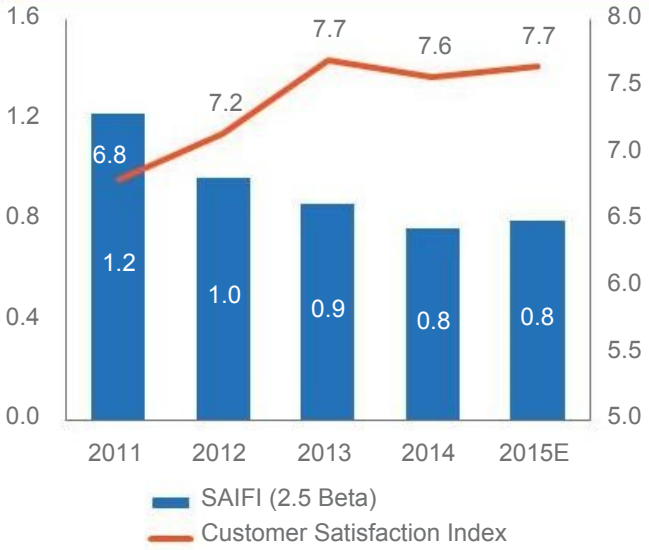
Exelon.

S1-SSA-0009 - 10156

BGE: A Proven Track Record of Enhancing Utility Value

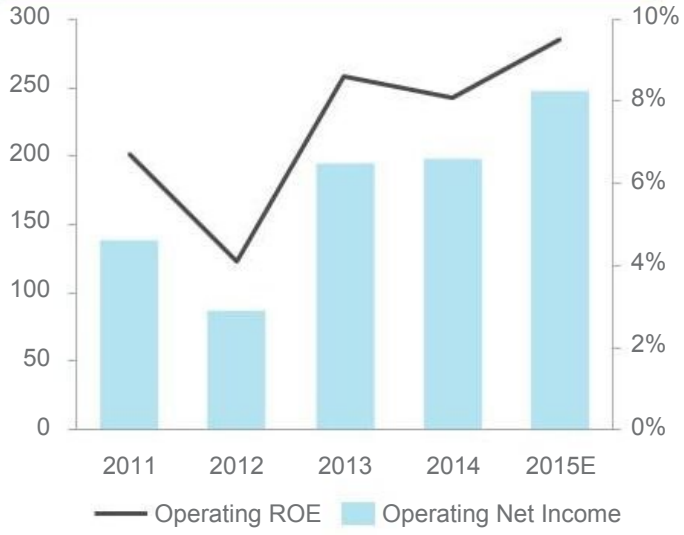
Delivering value to our customers and regulators by improving reliability while providing investors with predictable cost recovery and earnings growth

SAIFI and Customer Satisfaction Index



- Increased reliability by 10% per year and customer satisfaction by 3% per year

Operating ROE (%) and Net Income ($M)



- Increased ROE by more than 250 basis points from 2011 to 2015 and grew net income 15% annually over same period
- Continued system investments in reliability and safety necessitate continued rate cases for capital recovery

Note: 2012 ROE and Net Income normalized by excluding one-time $112M rate credit as part of EXC-CEG merger. Operating net income represents adjusted (non-GAAP) operating earnings. Refer to slide 31 for a list of adjustments from GAAP EPS to adjusted (non-GAAP) operating earnings

Exelon.

S1-SSA-0009 - 10157

Extending Clinton One Year

S1-SSA-0009 - 10158

We Will Continue to Operate Clinton for Another Year

"If we do not see a path to sustain profitability for these units . . . we will be forced to retire them." – – *Chris Crane, July 31, 2014*

What has changed in 2015?

- Recent upward movement in MISO capacity prices -- $150/MWd in MISO 2015 auction and Illinois Power Authority Zone 4 procurement auction
- Fleet capacity revenue uplift due to Capacity Performance of $1.4B, beyond our expectations; MISO will now consider similar market reforms
- EPA's Clean Power Plan finalized. Development of Illinois compliance program in 2016, could facilitate significant upside from implementation
- Legislative engagement on Illinois Low Carbon Portfolio Standard. Resolution of budget crisis should facilitate legislative consideration in 2016
- Improved operating efficiency and agile nuclear fuel procurement strategy
- Over the last 2 years Clinton has deferred approximately $100M of strategic capital, minimizing the cost of maintaining the optionality at Clinton
- Significant potential NiHub upside in the out-years not yet reflected in illiquid forward markets

Exelon.

More Progress Necessary for Clinton to Operate Beyond 2017

1) MISO Reforms:

- MISO iscommitted to evaluate Zone 4 market design
- Illinois Commerce Commission is holding workshops to examine potential fixes to address Zone 4
- Reforms must provide strong revenues like the PJM reforms effectuated

2) Areas of Additional Progress Needed:

- Passage of Low Carbon Portfolio Standard
- Illinois implementation of EPA's Clean Power Plan must fully recognize the value of Clinton

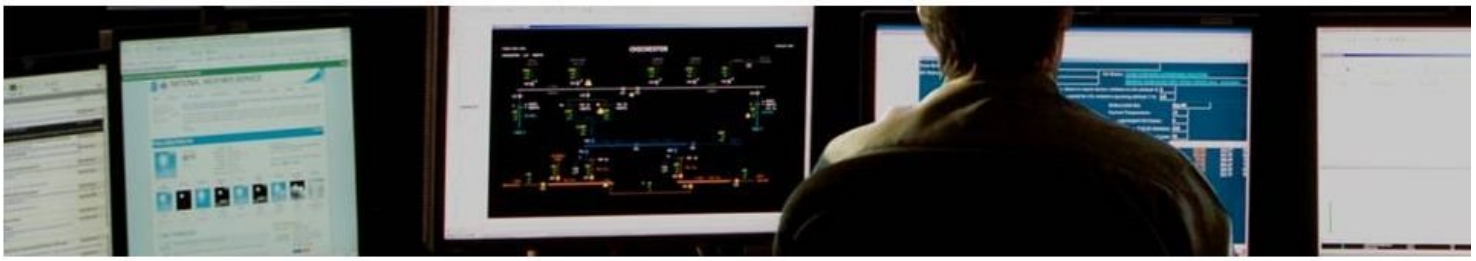
Exelon.

Cost Management Initiative

S1-SSA-0009 - 10161

The Sustainability and Growth of Our Earnings Will be Supported by an Aggressive Cost Management Program

- Exelon has launched a cost management program across to provide sustainable improvement to the Company's earnings trajectory
- The initiative will achieve $300 – $350 million of annual cost savings at Exelon Generation and Corporate
- Estimated EPS benefit of $ 0.13 to $0.18(2)
- An additional $50 million of nuclear fuel savings already reflected in hedge disclosures
- Savings to begin in 2016 and will be fully realized in 2018



(1) Based on projected 2018 share count of 965M shares, which assumes PHI merger closes
(2) Represents adjusted (non-GAAP) operating earnings. Refer to slide 31 for a list of adjustments from GAAP EPS to adjusted (non-GAAP) operating earnings

Exelon.

Financial Data

S1-SSA-0009 - 10163

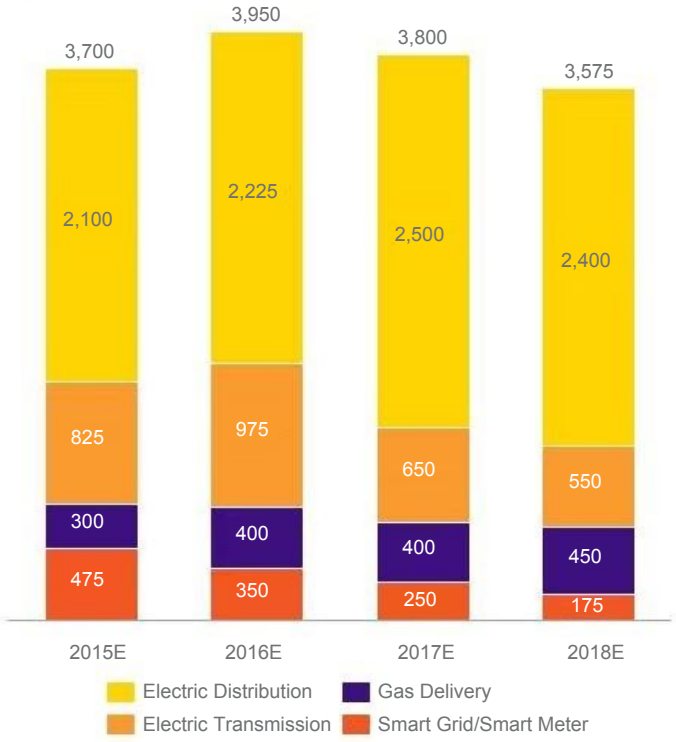
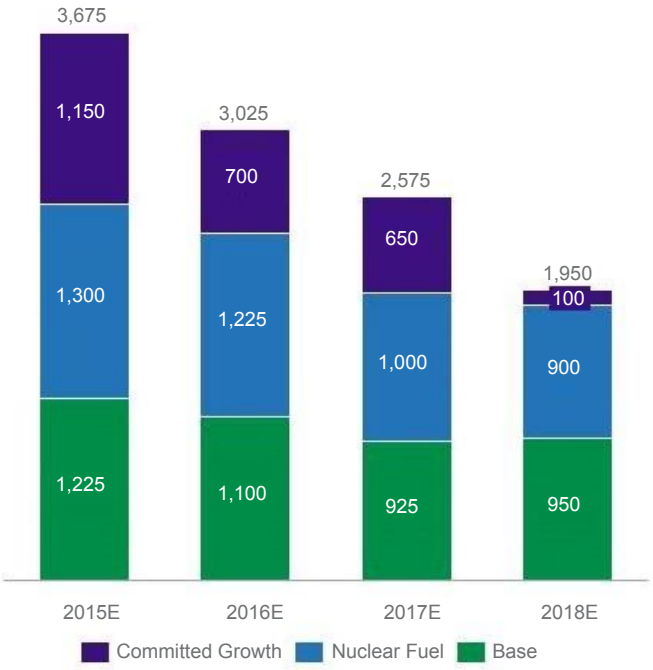
Our Capital Plan Drives Stable Earnings Growth

Exelon Utilities ($M)



Exelon Generation($M)[1)]

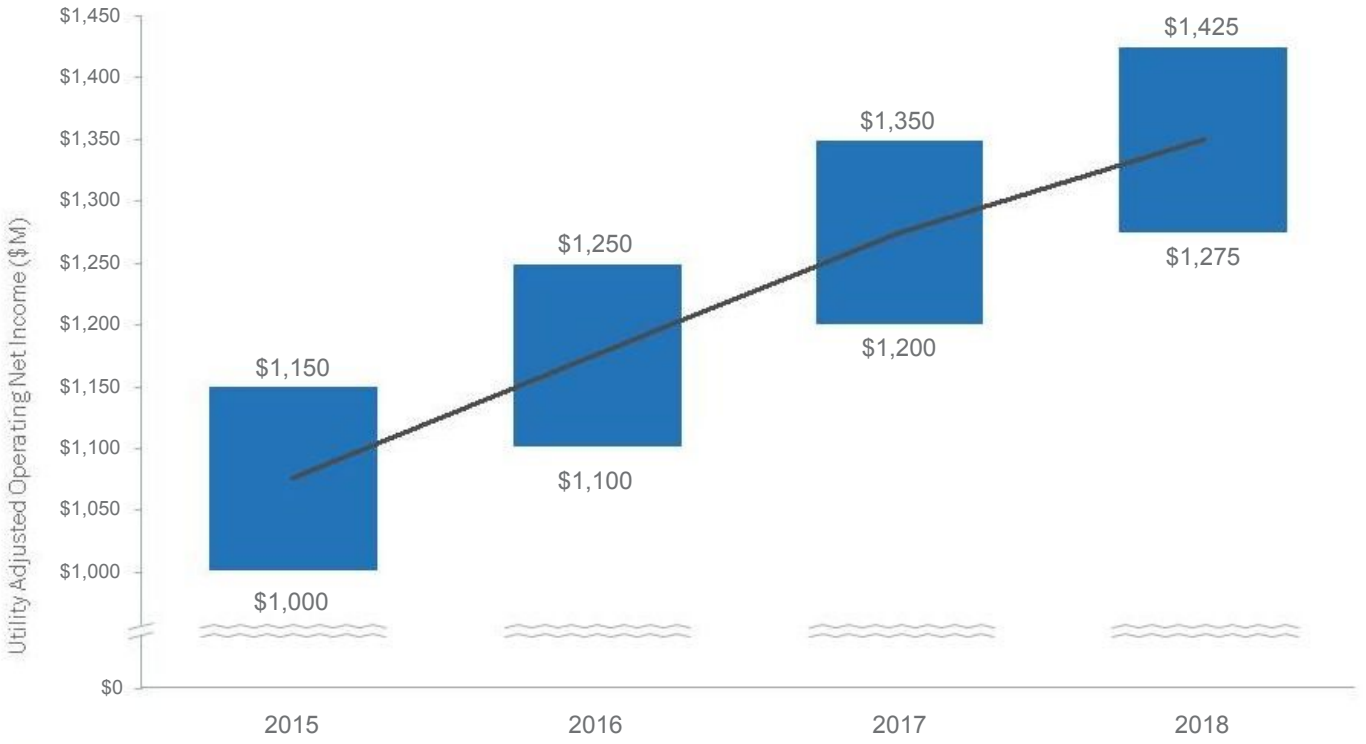


Note: Numbers rounded to nearest $25M
(1) Figures reflect cash CapEx and CENG fleet at 100%; 2014 EEI presentation showed CENG fleet at ownership; Does not include potential pipeline of contracted generation growth mentioned on slides 11 and 12

Exelon.

S1-SSA-0009 - 10166

Exelon's Existing Utilities Drive Stable Earnings Growth



Projected average earnings growth of ~7-9% per year from 2015-2018

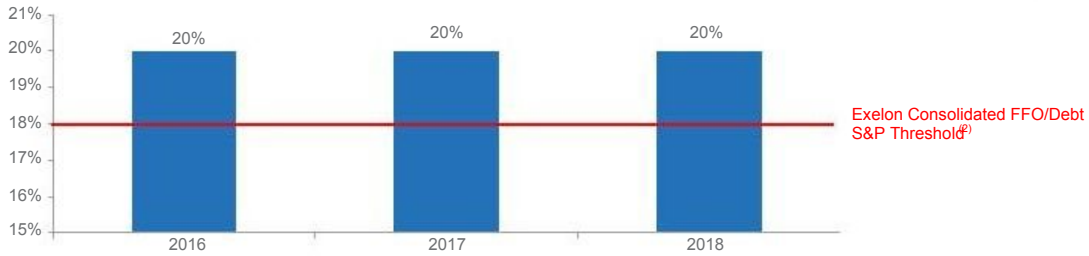
Note: Does not include PHI net income and represents adjusted (non-GAAP) operating earnings. Refer to slide 31 for a list of adjustments from GAAP EPS to adjusted (non-GAAP) operating earnings. Does not include an extension of bonus depreciation. Impact of a 2-year bonus depreciation extension for 2015 and 2016 would be ~($10M) in 2015 and ~($25M) a year in 2016-2018. Excludes after-tax interest expense held at Corporate for debt associated with existing utility investment, which is (~$25M) a year.

Exelon.

Continued Focus on Our Balance Sheet

Our strong balance sheet supports our disciplined commitment to growth

Exelon Consolidated[1] FFO/Debt



Solid investment grade credit ratings are a financial priority

Current Ratings [3,4]	ExCorp	ComEd	PECO	BGE	ExGen	Recent Commentary
Moody's	Baa2	A2	Aa3	A3	Baa2	" Exelon maintains a strong consolidated financial profile…which should produce steady ratios of cash flow to debt in the low 20% range which, when combined with adequate liquidity reserves and a growing focus on regulated investment opportunities, positions Exelon firmly within its current rating category." Moody's Issuer Comment, June 11, 2015
S&P	BBB-	A-	A-	A-	BBB	" ExGergenerates a significant portion of earnings from its retail operations. Through retail and wholesale channels, ExGen now provides nearly 5% of total U.S. power demand, and enjoys regional diversity. The company's generation units are well positioned to grow where capacity available for competitive supply has room to grow. We expect these incremental revenue streams to make the consolidated Exelon somewhat more resilient to commodity prices." S&P Summary Analysis; March 9, 2015
Fitch	BBB+	A-	A	A-	BBB	" The majority of capital investment is allocated to EXC's three utility subsidiaries, which should provide a more stable earnings base." Fitch Full Ratings Report; October 15, 2015 "Exgen's financial position has stabilized in recent years, and remains solidly within the investment-grade category. " Fitch Full Ratings Report; September 11, 2015

(1) Metrics include PHI financing. Because of ring-fencing, S&P deconsolidates BGE's and PHI's financial profile from Exelon and analyzes them solely as equity investments
(2) Exelon Consolidated threshold of 18% is based on the S&P Exelon Corp Summary Report published on August 5, 2015
(3) Current senior unsecured ratings as of 11/3/2015 for Exelon, Exelon Generation and BGE and senior secured ratings for ComEd and PECO
(4) All ratings are "Stable" outlook, except for at Fitch, which has ComEd on "Positive" and Exelon on "Ratings Watch Negative," and Moody's, which has ComEd on "Positive" outlook

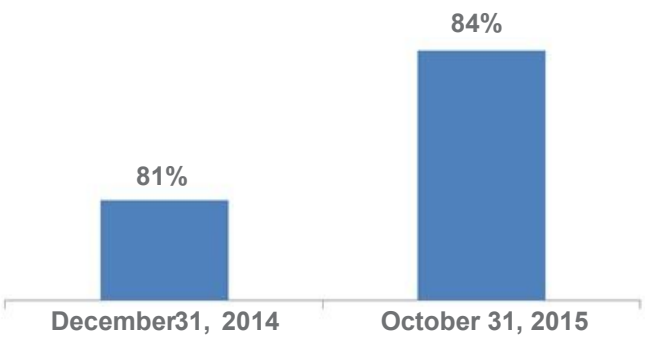
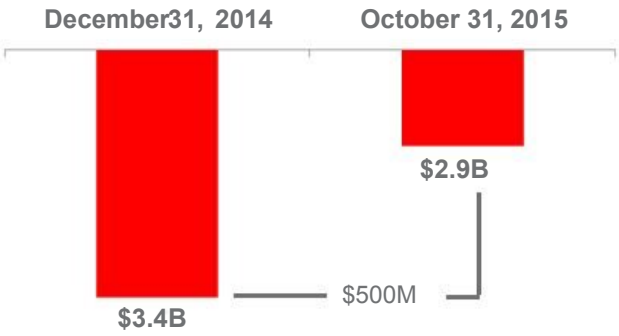
Pension and OPEB Update

Pension Funded Status: % Funded(1)



Pension Unfunded Status ($B)



- Exelon's pension funding and investment strategies have continued to drive improvements in the overall funded status of Exelon's pension plans
- Given the continued improvements in the funded status of the Exelon Corporation Retirement Program (ECRP), traditional defined benefit plan (87% funded at October 31, 2015), and its positive exposure to an improving rate environment; Exelon is evaluating opportunities to optimize our pension contribution strategy going forward
- Exelon's standard Pension/OPEB assumptions and sensitivities will be provided as part of Q4 2015 earnings disclosures

Note: October 2015 numbers are preliminary estimates and are subject to change

(1) Assets as a % of PBO Liability

Exelon.

S1-SSA-0009 - 10172

GAAP to Operating Adjustments

- Exelon's 2015 adjusted (non-GAAP) operating earnings excludes the earnings effects of the following:
  - Mark-to-market adjustments from economic hedging activities
  - Unrealized losses from NDT fund investments to the extent not offset by contractual accounting as described in the notes to the consolidated financial statements
  - Certain costs incurred associated with the Integrys and pending Pepco Holdings, Inc. acquisitions
  - Mark-to-market adjustments from forward-starting interest rate swaps related to anticipated financing for the pending PHI acquisition
  - Non-cash amortization of intangible assets, net, related to commodity contracts recorded at fair value at the date of acquisition of Integrys in 2014
  - Non-cash benefit pursuant to the annual update of the Generation nuclear decommissioning obligation related to the non-regulatory units
  - Impairment of investment in long-term generating leases
  - Favorable settlement of certain income tax positions on Constellation's pre-acquisition tax returns
  - Generation's non-controlling interest related to CENG exclusion items
  - Other unusual items

S1-SSA-0009 - 10173

Free Cash Flow GAAP to Non-GAAP Reconciliation

2016-2018 ExGen Free Cash Flow Calculation ($M)	2016-2018 Estimate
Adjusted Cash from Operations[1]	$10,250
Non-Growth Capital Expenditures	($2,975)
Nuclear Fuel Capital Expenditures	($3,125)
Free Cash Flow before Growth CapEx and Dividend	$4,150

(1) Adjusted Cash Flow From Operations (non-GAAP) primarily includes net cash flows from operating activities and net cash flows from investing activities excluding capital expenditures

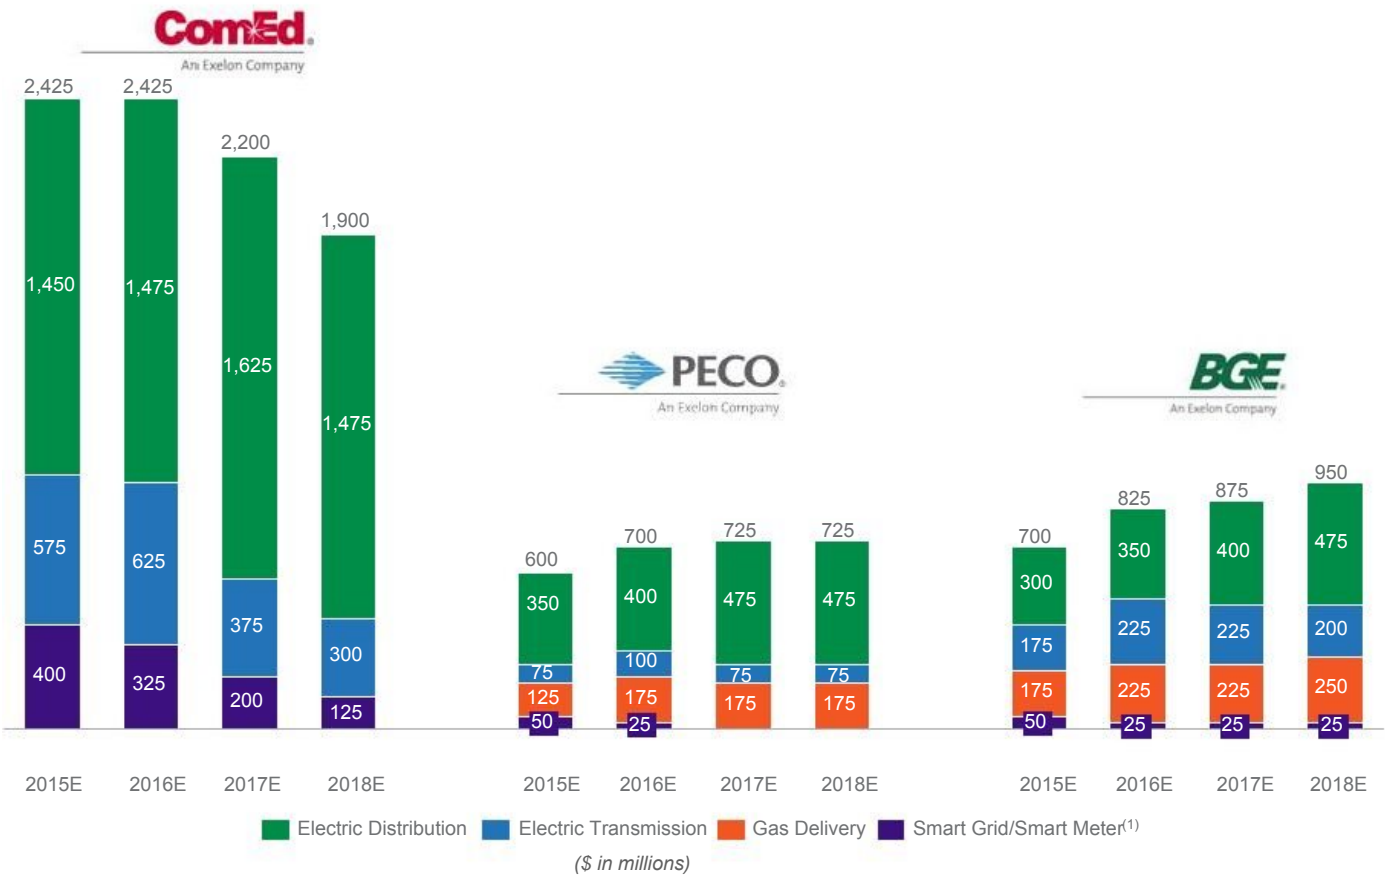
Q3	Q4

Exelon

Exelon Utilities: Capital Plan



(1) Smart Meter/Smart Grid CapEx net of proceeds from U.S. Department of Energy (DOE) grant; For BGE, includes CapEx from Smart Energy Savers program of ~$10M per year

Exelon

S1-SSA-0009 - 10177

Exelon Utilities: Rate Base[1,4] and ROE Targets

	2015E	Long-Term Target
Equity Ratio	~46%	~50-53%(2)
Earned ROE	~8%	Based on 30-yr US Treasury(3)

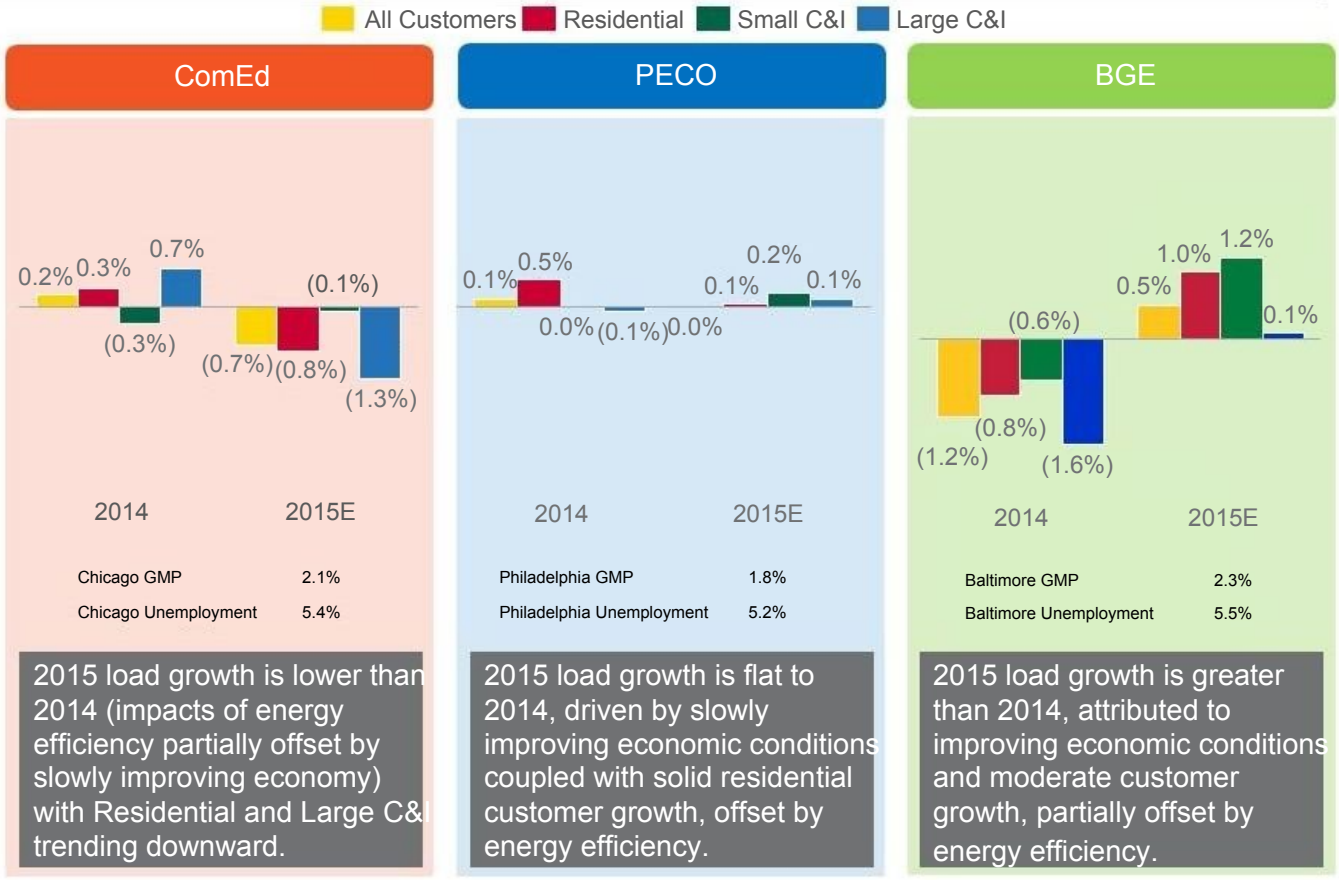
	2015E	Long-Term Target
Equity Ratio	54%	~50-53%
Earned ROE	11-12%	≥ 10%

	2015E	Long-Term Target
Equity Ratio	52%	~50-53%
Earned ROE	9-10%	≥ 10%

(1) ComEd, PECO and BGE rate base represents end-of-year. Numbers may not add due to rounding
(2) Equity component for distribution rates will be the actual capital structure adjusted for goodwill
(3) Earned ROE will reflect the weighted average of 11.5% allowed transmission ROE and distribution ROE resulting from 30-year Treasury plus 580 basis points for each calendar year
(4) Rate base does not include extension of bonus depreciation

Exelon

Exelon Utilities Load



Notes: Data is weather normalized. Source of economic outlook data is IHS (September 2015). Assumes 2015 GDP of 2.5% and U.S. unemployment of 5.1%.
ComEd has the ROE collar as part of the distribution formula rate and BGE is decoupled which mitigates the load risk. QTD and YTD actual data can be found in earnings release tables.
BGE amounts have been adjusted for prior quarter true-ups.

Exelon.

S1-SSA-0009 - 10179

ComEd April 2015 Distribution Formula Rate

The 2015 distribution formula rate filing establishes the net revenue requirement used to set the rates that will take effect in January 2016 after the Illinois Commerce Commission's (ICC's) review. There are two components to the annual distribution formula rate filing:

- Filing Year: Based on prior year costs (2014) and current year (2015) projected plant additions.
- Annual Reconciliation: For the prior calendar year (2014), this amount reconciles the revenue requirement reflected in rates during the prior year (2014) in effect to the actual costs for that year. The annual reconciliation impacts cash flow in the following year (2016) but the earnings impact has been recorded in the prior year (2014) as a regulatory asset.

Docket #	15-0287
Filing Year	2014 Calendar Year Actual Costs and 2015 Projected Net Plant Additions are used to set the rates for calendar year 2016. Rates currently in effect (docket 14-0312) for calendar year 2015 were based on 2013 actual costs and 2014 projected net plant additions
Reconciliation Year	Reconciles Revenue Requirement reflected in rates during 2014 to 2014 Actual Costs Incurred. Revenue requirement for 2014 is based on docket 13-0318 (2012 actual costs and 2013 projected net plant additions) approved in December 2013 and reflects the impacts of PA 98-0015 (SB9)
Common Equity Ratio	~ 46% for both the filing and reconciliation year
ROE	9.14% for the filing year (2014 30-yr Treasury Yield of 3.34% + 580 basis point risk premium) and 9.09% for the reconciliation year (2014 30-yr Treasury Yield of 3.34% + 580 basis point risk premium – 5 basis points performance metrics penalty). For 2015 and 2016, the actual allowed ROE reflected in net income will ultimately be based on the average of the 30-year Treasury Yield during the respective years plus 580 basis point spread, absent any metric penalties
Requested Rate of Return	~ 7% for both the filing and reconciliation years
Rate Base(1)	$8,277 million – Filing year (represents projected year-end rate base using 2014 actual plus 2015 projected capital additions). 2015 and 2016 earnings will reflect 2015 and 2016 year-end rate base respectively. $7,082 million - Reconciliation year (represents year-end rate base for 2014)
Revenue Requirement Decrease(1)	$55M decrease ($145M decrease due to the 2014 reconciliation offset by a $90M increase related to the filing year). The 2014 reconciliation impact on net income was recorded in 2014 as a regulatory asset.
Timeline	• 04/15/15 Filing Date • 240 Day Proceeding • ICC order expected to be issued by December 11, 2015

Given the retroactive ratemaking provision in the Energy Infrastructure Modernization Act legislation, ComEd net income during the year will be based on actual costs with a regulatory asset/liability recorded to reflect any under/over recovery reflected in rates. Revenue Requirement in rate filings impacts cash flow

Note: Disallowance of any items in the 2015 distribution formula rate filing could impact 2015 earnings in the form of a regulatory asset adjustment

(1) Amounts represent ComEd's position filed in surrebuttal testimony on August 20, 2015

Exelon.

S1-SSA-0009 - 10180

PECO Electric Distribution Rate Case & Proposed Settlement

Docket #	R-2015-2468981
Test Year	2016 Calendar Year
Requested Revenue Requirement	$190M
Requested Common Equity Ratio[1]	53.36%
Requested Rate of Return	ROE: 10.95%; ROR: 8.19%
Proposed Rate Base	$4.1B
Proposed Revenue Requirement Settlement Increase	$127M
Authorized Returns[2]	N/A
System Average Increase as % of overall bill	2.9%
Timeline	• 3/27/15 – PECO filed electric distribution rate case with PaPUC • 9/10/15 Settlement filed with all intervening parties • 10/28/15 – ALJ issued Recommended Decision that settlement be approved • December 2015 – PUC Decision • Increased rates effective on January 1, 2016

The proposed Revenue Requirement increase of $127M represents 67% of the Company's original proposal

(1) Reflects PECO's expected capital structure as of 12/31/2016
(2) Due to the "black box" nature of the settlement, Authorized Return was not agreed upon by the parties in determining the ultimate revenue requirement increase

Exelon.

PECO Electric LTIIP System 2020

- PECO filed its Electric Long Term Infrastructure Improvement Plan ("LTIIP") along with its associated recovery mechanism the Distribution System Improvement Charge ("DSIC") on March 27, 2015 (with Electric Distribution Rate Case)
  - LTIIP includes $275 million in incremental capital spending from 2016-2020 focusing on the following areas:
    - Cable Replacement
    - Storm Hardening Programs
    - Substation replacement and upgrades
  - DSIC mechanism will allow recovery of eligible LTIIP spend between rate cases if the electric distribution ROE falls below the DSIC ROE established by PaPUC. The current Electric DSIC ROE is 10.0%.
  - Approved on 10/22/15
- PECO also proposed the concept of constructing one or more pilot microgrid projects as part of a future LTIIP update ($50-$100M). The objective is to evaluate and test emerging microgrid technologies that could enhance reliability and resiliency by replacing obsolete infrastructure as an alternative to traditional solutions.

LTIIP guarantees at least 10% ROE on capital improvements made on behalf of PECO customers

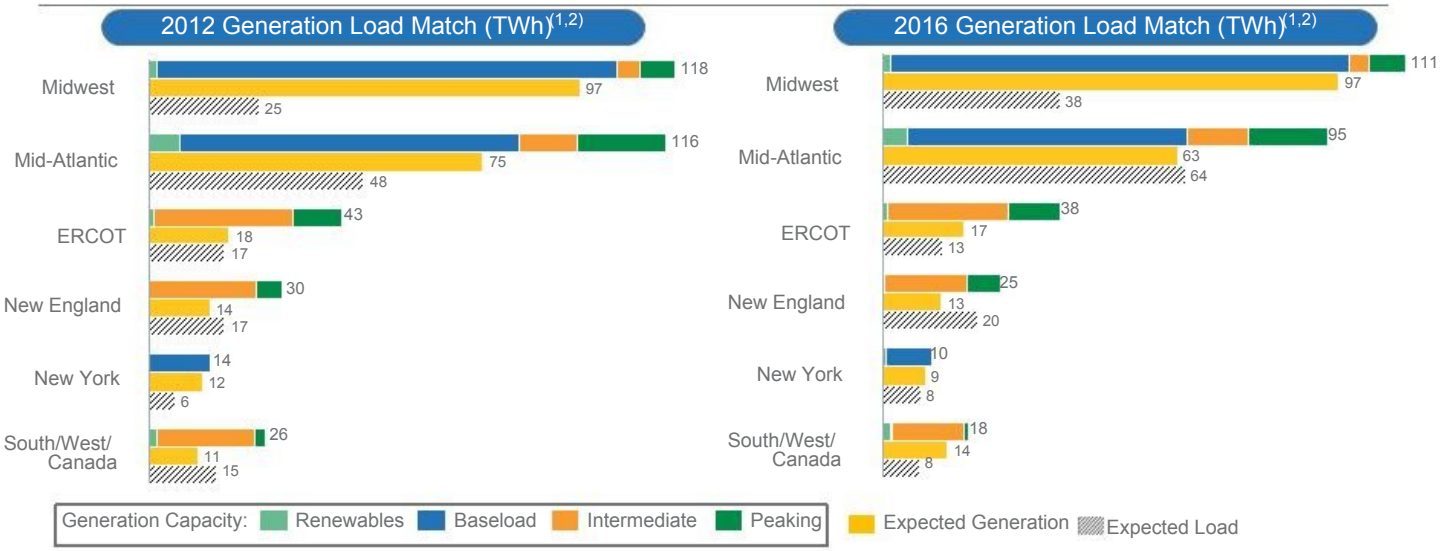
Exelon Generation

S1-SSA-0009 - 10185

Our Generation to Load Strategy Delivers Sustainable Earnings in Volatile Markets



- Since the Constellation merger, we have improved our generation to load match through growing our customer load business, both organically and through disciplined acquisitions like Integrys
- This strategy and hedging with a fundamentals driven approach has meaningfully benefitted earnings over the last two years
- High volatility : We captured higher prices for our generation during periods of extreme weather while managing our load obligations. During periods of high volatility, generation availability is of utmost importance. During the polar vortex of 2014, our 2 GW of peaking capability created significant value in the energy and ancillary markets. During the polar vortex, we made ~$100 million (3)
- Low volatility : During periods of low volatility, we captured higher margins as we realized a lower cost to serve our customers and we optimized the value of our dispatchable fleet through load sales. This year alone, we have made ~$250 million as result of lower cost to serve load
- Generation to Load match also provides us with an important channel to market for our hedging activities which is important in times of low liquidity and in places where there is not an active market

(1) Owned and contracted generation capacity converted from MW to MWh assuming 100% capacity factor (CF) for all technology types, except for renewable capacity which is shown at estimated CF
(2) Expected generation and load shown in the chart above will not tie out with load volume and ExGen disclosures; Load shown above does not include indexed products and generation reflects a net owned and contracted position; Estimates as of 9/30/2015
(3) Excludes the impact of plant outages, primarily at Calvert Cliffs prior to us operating the plant

Exelon Generation –Optimizing the Portfolio and Positioning it for Market Upside

Gross Margin Category ($M)[1]	2015	2016	2017	2018
Open Gross Margin(including South, West, & Canada hedged GM)[3]	$5,150	$5,650	$5,800	$6,100
Mark-to-Market of Hedges[3,4]	$2,200	$1,200	$750	$250
Power New Business / To Go	$50	$500	$800	$1,000
Non-Power Margins Executed	$400	$200	$100	$50
Non-Power New Business / To Go	$50	$250	$350	$450
Total Gross Margin[2]	$7,850	$7,800	$7,800	$7,850

- Capacity Performance added approximately $1B in gross margin over the 2016 to 2018 period
- Timing of hedge decisions creates value
  - Positioning portfolio to reflect our fundamental views– currently carrying a larger open position in 2017 and 2018
  - Intra-year hedging flexibility to take advantage of volatility
- Using cross-commodity spreads in NiHub: 7-10% of the portfolio in 2017 is in cross-commodity hedges and 3 - 6% in 2018

(1) Gross margin categories rounded to nearest $50M

(2) Total Gross Margin (Non-GAAP) is defined as operating revenues less purchased power and fuel expense, excluding revenue related to decommissioning, gross receipts tax, Exelon Nuclear Partners, operating services agreement with Fort Calhoun and variable interest entities. Total Gross Margin is also net of direct cost of sales for certain Constellation businesses

(3) Excludes EDF's equity ownership share of the CENG Joint Venture

(4) Mark-to-Market of Hedges assumes mid-point of hedge percentages

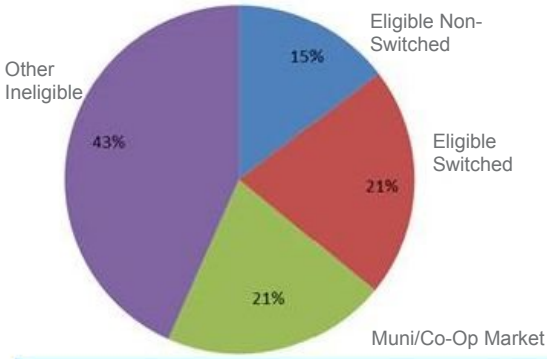
Electric Load Serving Business: Market Landscape

Constellation Active Retail Electric Markets

Total U.S. Power Market 2015 (3,725 TWhload)(1)



Market Landscape(1)

Improved competitive landscape observed across many markets

- Conditions have improved in many markets as impacts of the Polar Vortex have played out
- Some suppliers have taken steps to reduce exposure to weather-sensitive customer loads following the Polar Vortex

Retail transactions and new entrant activity down in 2015

- M&A, exits and divestiture activity down from 2014 levels
- Fewer new entrants have entered the market in 2015

Existing suppliers continue to expand market footprint and product portfolio

- Several existing suppliers have expanded into new states
- Energy efficiency and distributed energy among most popular for cross-selling opportunities

Competitive retail market expected to grow modestly over the next five years (2015-2019)

- C&I switched market to grow by about 8%
- Residential switched market to grow by about 7%

Constellation is the #1 Provider of Retail Electricity in the United States

(1) Sources are EIA, DNV GL, and internal estimates

Exelon.

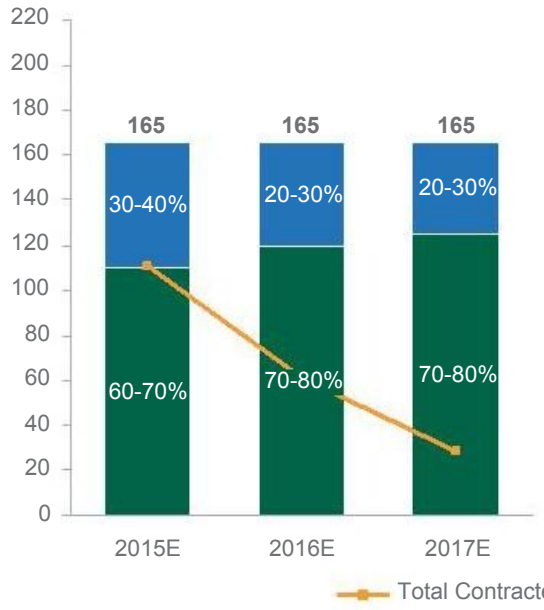
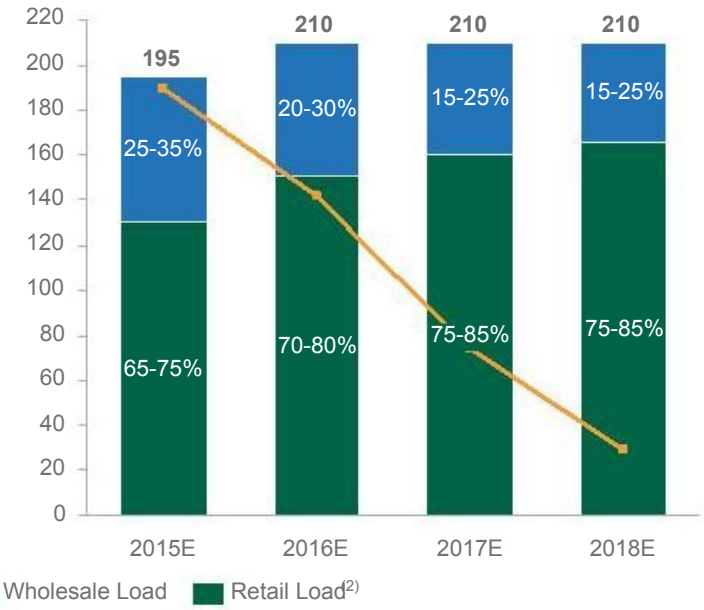
Our Electric Load Serving Business Provides Sustainable Earnings and Stable Earnings Growth

2014 EEI
Commercial Load Projections (1,3)
2015 – 2017 TWh



2015 EEI
Commercial Load Projections(1)
2015 – 2018 TWh



Total Contracted | Wholesale Load | Retail Load(2)

Our growing load business provides a channel to market that reduces the reliance on lower margin over-the-counter products

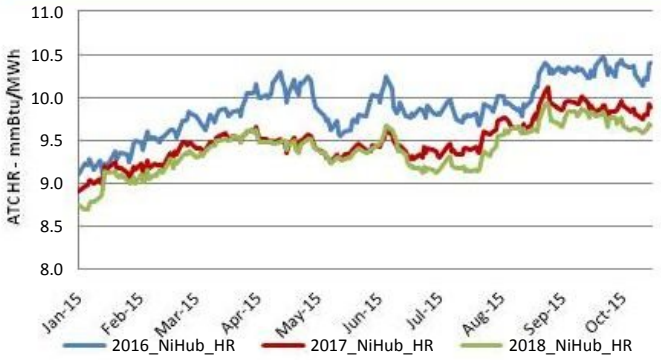
(1) Numbers and percentages are rounded to the nearest 5
(2) Index load expected to be 25% to 35% of total forecasted retail load
(3) Excludes Integrys acquisition completed in November 2014

Exelon.

S1-SSA-0009 - 10189

Our NiHubStrategy Recognizes the Lack of Liquidity and Disconnect Between our Fundamental View of Prices

Forward market heat rates expanded again through 2015



- Our portfolio is positioned to take advantage of expected volatility and power price upside
  - 2017-2018 average upside of $2 - $3/ MWh
- Power exposure in NiHubabove purely ratable:
  - 17-20% behind ratable in 2017
  - 13-15% behind ratable in 2018
- The increased reliance on natural gas as coal plants retire has impacted prices
- Our PJM forecast includes 20+GW of new CCGTs, full compliance with state renewables requirements and essentially flat load growth, in addition to coal retirements

Incremental coal retirements will lead to continued volatility and higher dispatch costs, creating $2-$3/MWh of power price upside in NiHubin 2017-2018

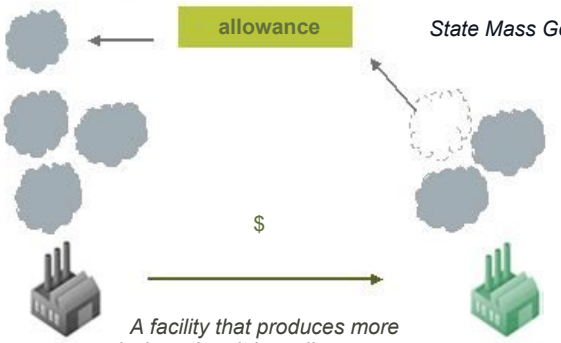
EPA Clean Power Plan: Compliance Pathways

Mass Budget

- States distribute allowances equal to the number of CO2 emissions allowed
- At the end of each compliance period, affected electric generating units (EGUs) must surrender allowances equal to their emissions
- States may allow affected EGUs to buy or sell allowances with other parties

One **allowance** = one ton of CO2 emissions

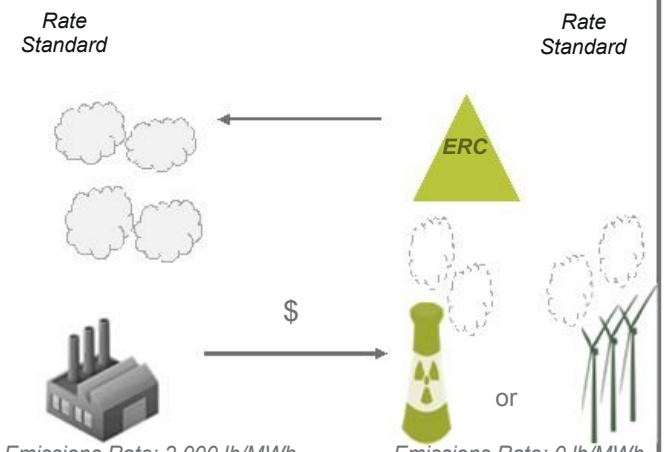


A facility that produces more emissions than it has allowances may purchase allowances from another facility that has extra allowances

Emissions Rate

- Emission rate credits (ERCs) are created when incremental nuclear or incremental renewables generate electricity
- Emitting generators must purchase sufficient ERCs to reduce their emission rate to the target level

State Rate Standard: 1,000 lb/MW h



Exelon recommends that states adopt mass-based plans that include both existing and new units because that is the best way to level the playing field and ensure that clean resources like nuclear receive value for the carbon-free, always-on electricity that Exelon provides. It is also the best way to minimize overall costs to consumers and preserve electric reliability while achieving verifiable carbon reductions

Exelon.

S1-SSA-0009 - 10194

Exelon Nuclear Fleet Overview (including CENG and Salem)

	Plant Location	Type/ Containment	Net Generation Capacity (MW)[5]	License Extension Status / License Expiration[1]	Ownership	Spent Fuel Storage/ Date to lose full core discharge capacity[2]
Midwest	Braidwood, IL (Units 1 and 2)	PWR Concrete/Steel Lined	2,389	Filed application in May 2013 (decision expected in early 2016)/ 2026, 2027	100%	Dry Cask
	Byron, IL (Units 1 and 2)	PWR Concrete/Steel Lined	2,347	Filed application in May 2013 (decision expected in 2015)/ 2024, 2026	100%	Dry Cask

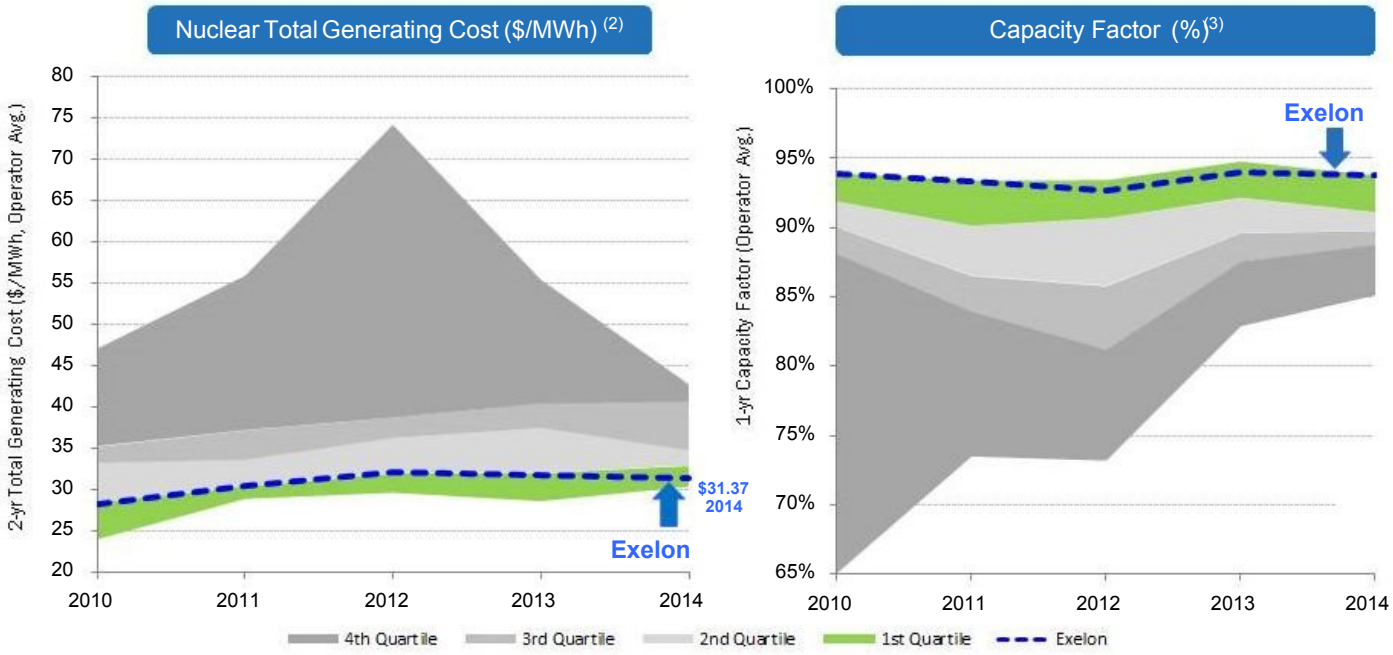
Mid-Atlantic	Limerick, PA (Units 1 and 2)	BWR Concrete/Steel Lined / Mark II	2,317	Renewed / 2044, 2049	100%	Dry Cask
	Oyster Creek, NJ (Unit 1)	BWR Steel Vessel / Mark I	625	Renewed / 2029(3)	100%	Dry Cask
	Peach Bottom, PA (Units 2 and 3)	BWR Steel Vessel / Mark I	1,221	Renewed / 2033, 2034	50% Exelon, 50% PSEG	Dry Cask
	TMI, PA (Unit 1)	PWR Concrete/Steel Lined	837	Renewed / 2034	100%	2023
	Salem, NJ (Units 1 and 2)	PWR Concrete/Steel Lined	1,005	Renewed / 2036, 2040	42.6% Exelon, 57.4% PSEG	Dry Cask
CENG	Calvert Cliffs, MD (Units 1and 2)	PWR Concrete/Steel Lined	878	Renewed / 2034, 2036	100% CENG(4)	Dry Cask
	R.E. Ginna, NY (Unit 1)	PWR Concrete/Steel Lined	288	Renewed / 2029	100% CENG(4)	Dry Cask
	Nine Mile Point, NY (Units 1 and 2)	BWR Steel Vessel / Mark I Concrete/Steel Vessel/ Mark II	838	Renewed / 2029, 2046	100% CENG[4] / 82% CENG[4], 18% Long Island Power Authority	Dry Cask

(1) Operating license renewal process takes approximately 4-5 years from commencement until completion of NRC review
(2) The date for loss of full core reserve identifies when the on-site storage pool will no longer have sufficient space to receive a full complement of fuel from the reactor core; Dry cask storage will be in operation at those sites prior to losing full core discharge capacity in their on-site storage pools
(3) On December 8, 2010, Exelon announced that it will permanently cease generation operations at Oyster Creek by December 31, 2019; Oyster Creek's current NRC license expires in 2029
(4) Exelon Generation has a 50.01% ownership interest in CENG. EDF has a 49.99% ownership interest in CENG.
(5) Net generation capacity is stated at proportionate ownership share. Based on 2015 projected full year

Exelon.

World Class Nuclear Operator(1)



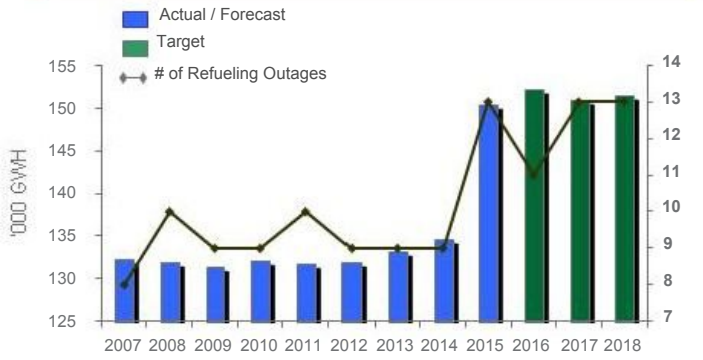
- Exelon is consistently one of the lowest-cost and most efficient producers of electricity in the nation
- Over the next five years, Exelon Nuclear projects a negative cost CAGR, while maintaining strong generation performance

(1) 2010 – 2013 Exelon fleet averages exclude Salem, Ft. Calhoun, and CENG; 2014 Exelon fleet averages exclude Salem and Ft. Calhoun
(2) Total Generating Cost is defined as cost to produce one MWh of energy, including fuel, materials, labor, contracting, capital expenditures, insurance and the majority of overhead expenses including benefit costs associated with labor but excludes property taxes, unit contingent costs and risks, costs due to unknown future regulatory changes, and suspended DOE nuclear waste storage fee (effective May 2014)
(3) Source: Platts Nuclear News, Nuclear Energy Institute and Energy Information Administration (Department of Energy)

Exelon.

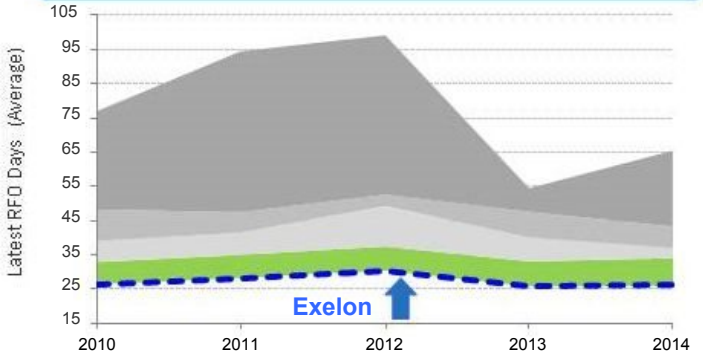
Nuclear Output and Refueling Outages

Nuclear Output



Net nuclear generation data at ownership excluding Salem for all years
CENG excluded in years 2007–2014 but included in 2015 and beyond
2016 and 2018 include Clinton Refueling Only outage of shortened duration

Fleet Average Refueling Outage Duration (Days)



2010-2013 Exelon fleet averages exclude Salem and CENG. 2014 Exelon fleet average excludes Salem

Nuclear Refueling Cycle

- All Exelon-owned units are on a 24 month cycle except for Braidwood U1/U2, Byron U1/U2, Ginna, and Salem U1/U2, which are on 18 month cycles
- Starting in 2015 Clinton is on annual cycles

2015 Refueling Outage Impact

- 14 planned refueling outages, including 1 at Salem
  - 7 spring refueling outages and 6 fall refueling outages
  - 1 Salem fall refueling outage

2016 Refueling Outage Impact

- 12 planned refueling outages, including 1 at Salem
  - 7 spring refueling outages and 4 fall refueling outages
  - 1 Salem spring refueling outage

Exelon.

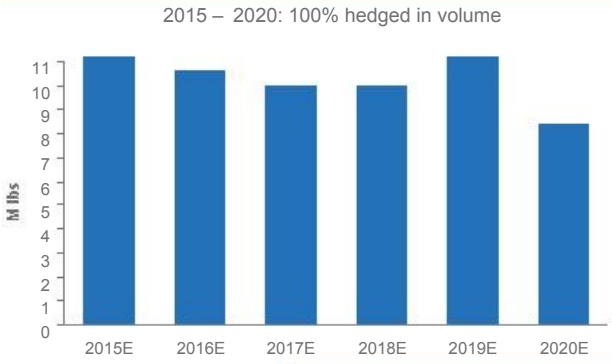
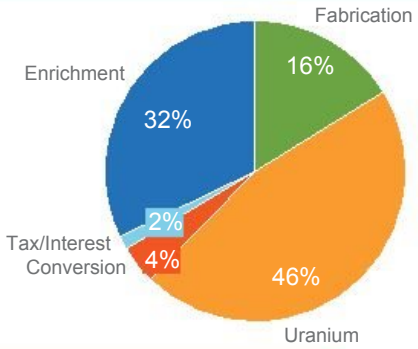
Nuclear Fuel Costs[1]

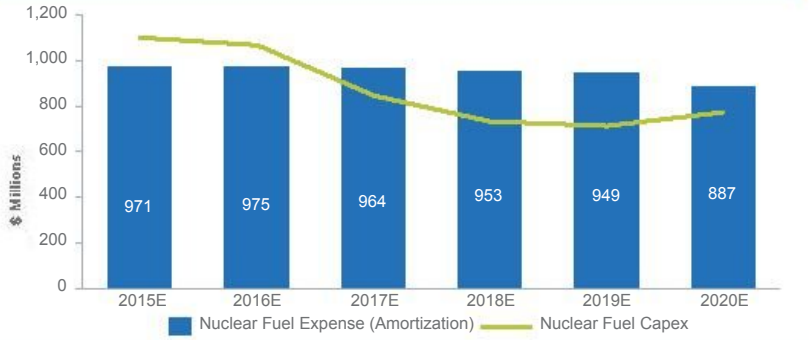
Projected Exelon Uranium Demand[2]



Components of Fuel Expense in 2015



Projected Total Nuclear Fuel Spend [3]



Over the last year, Exelon has reduced capital requirements for nuclear fuel by ~$265M (2015 to 2019)

(1) All charts exclude Salem
(2) Includes 100% of requirements
(3) CENG included at ownership. Including Salem and 100% of CENG total cash capital expenditures are $1.3B, $1.2B, $1.0B, $0.9B, $0.9B, and $0.9B for 2015 - 2020

Exelon.

S1-SSA-0009 - 10198

Constellation Energy Nuclear Group (CENG) Operating Service Agreement Terms

- Nuclear Operating services agreement
  - Integrated CENG and their 3 plants into Exelon Nuclear with transfer of operating licenses
- Loan to CENG and distributions to EDF/Exelon Generation
  - CENG $400M special distribution paid to EDF on April 1, 2014
  - Exelon Generation made $400M loan to CENG at 5.25% annual interest rate to fund special distribution to EDF (As of September 30, 2015, the loan balance, including interest, was $296M)
  - Exelon Generation receives priority payment from CENG's available cash flows until loan is fully repaid
  - Exelon Generation also entitled to receive aggregate preferred distributions of $400M plus a return of 8.5% per annum from April 1, 2014 (No amounts have been paid on this special distribution)
- Option for EDF to sell its 49.99% interest in CENG to Exelon Generation
  - Exercisable from January 2016 to June 2022
  - Process and timeline allows for possible negotiated agreement on price
  - If no negotiated agreement on price, price is determined by arbitration process to determine fair market value
  - Arbitration process could take up to 10 months or longer before binding decision is made on price
  - Price would be adjusted for EDF share of remaining loan balance and special distribution to Exelon Generation
  - Regulatory approvals could take several months but might run concurrently with arbitration process
  - Exelon has limited rights to defer closing up to 6 months

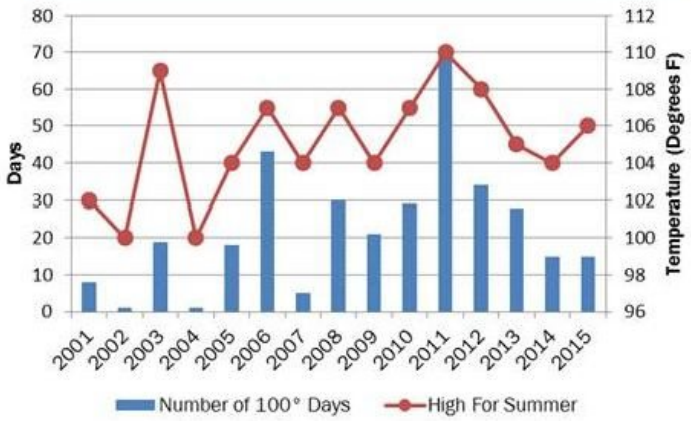
(1) 100%, unless otherwise indicated
(2) Fossil/Hydro Capacity values shown represent summer ratings as of September 2015. Net Generation Capacity (MW) is stated at proportionate ownership share
(3) Includes Perryman 2 (51MW), which will retire on in Q1 2016. Includes Perryman 6 (110MW) that went COD in June 2015
(4) Includes Riverside 4 (74MW), which is scheduled for retirement in May 2016

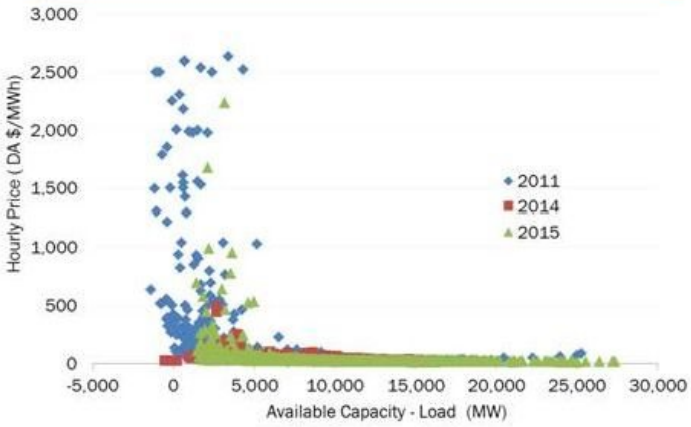
Exelon.

Summer Texas Heat Brings Return of Volatility to ERCOT

ERCOT Weather: July-September



ERCOT Scarcity Indicators: July-September



Demand is Growing

- Summer 2015 was hot; record load pushed summer 2015 spot power prices up and led summer forwards higher
- Average demand in ERCOT has risen 2-3% in 2015 from 2014
- Reserve margins reserve were as much as 10% lower than projected, falling below 4 GW in August

Generation assets will be valuable going forward

- Wind generation is forecasted to grow from 13 GW today to nearly 20 GW by 2020, which will increase volatility of the ERCOT dispatch stack
- New gas generation development has slowed – with 600MW of peakers in 2016 and Exelon CCGTs in 2017 the only visible gas additions through 2018
- The Public Utilities Commission of Texas has requested that ERCOT examine the Operating Reserve Demand Curve

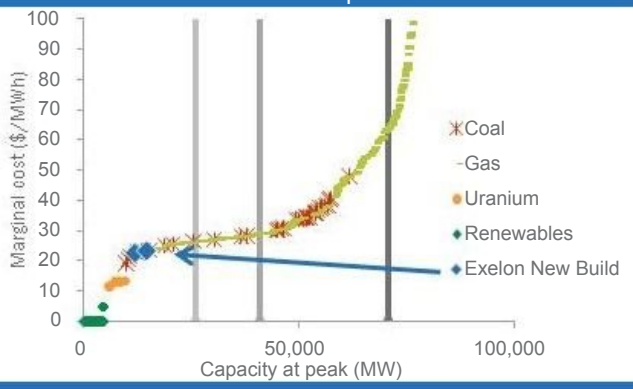
Exelon captured ~$20M of value from this summer's volatility and our new CCGTs wil be well positioned to replicate this success

Exelon.

S1-SSA-0009 - 10201

Texas CCGTs: Unique Opportunity to Grow in ERCOT

ERCOT Dispatch



Key Facts	
Sites	Wharton County and Granbury, TX
Total Capacity	~2,200MW
Construction Cost	$1,475M (~$700/kW); $700M remaining
Heat Rate	~6,500 mmBtu/MWh
EPC / OEMs	Zachry/ GE and Alstom
Cooling System	Air Cooled
Commercial Operation	By Summer 2017
Expected Economics	
ROE	> 12%

Key Messages

Efficient
- Two of the cleanest, most efficient Combined Cycle Gas Turbines (CCGT) in the nation

Cost Effective
- Simplified design provides for easier construction and maintenance, making these units among the most predictable and least costly to operate and maintain in the industry

Environmental
- Plants use air cooling which mitigates water constraint issues

Versatile
- Ramp rate of 100 MW/minute can respond quickly to depressed wind or unexpected outages (market ramp rate ~50 MW/minute)
- Capacity factor will average 75-85%

Constructive Market
- Demand continues to grow at more than 1% per year, which results in the need for roughly 700MW of incremental capacity every year and potential for real-time prices to go to $9,000/MWh
- New units should see sustainably high spark spreads and returns, especially if natural gas prices recover
- Potential for coal units in the state to add costly controls or shutdown could further boost returns as the Mercury & Air Toxics (MATS) and Regional Haze rules take effect

Exelon.

Portfolio Management Strategy

Strategic Policy Alignment

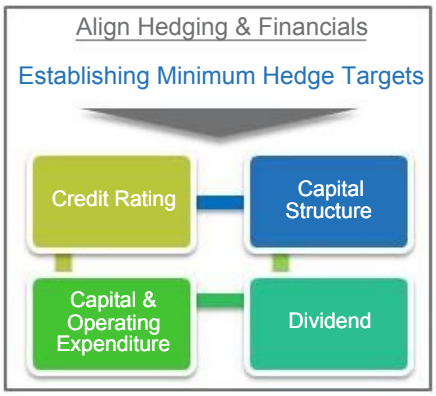
- Aligns hedging program with financial policies and financial outlook
- Establish minimum hedge targets to meet financial objectives of the company (dividend, credit rating)
- Hedge enough commodity risk to meet future cash requirements under a stress scenario

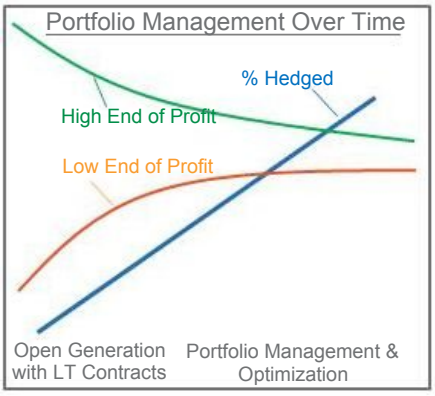
Three-Year Ratable Hedging

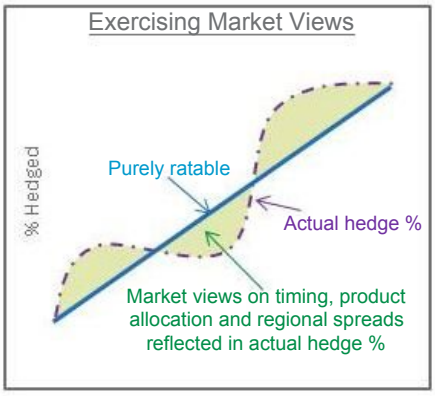
- Ensure stability in near-term cash flows and earnings
  - Disciplined approach to hedging
  - Tenor aligns with customer preferences and market liquidity
  - Multiple channels to market that allow us to maximize margins
  - Large open position in outer years to benefit from price upside

Bull / Bear Program

- Ability to exercise fundamental market views to create value within the ratable framework
  - Modified timing of hedges versus purely ratable
  - Cross-commodity hedging (heat rate positions, options, etc.)
  - Delivery locations, regional and zonal spread relationships







Protect Balance Sheet | **Ensure Earnings Stability** | **Create Value**

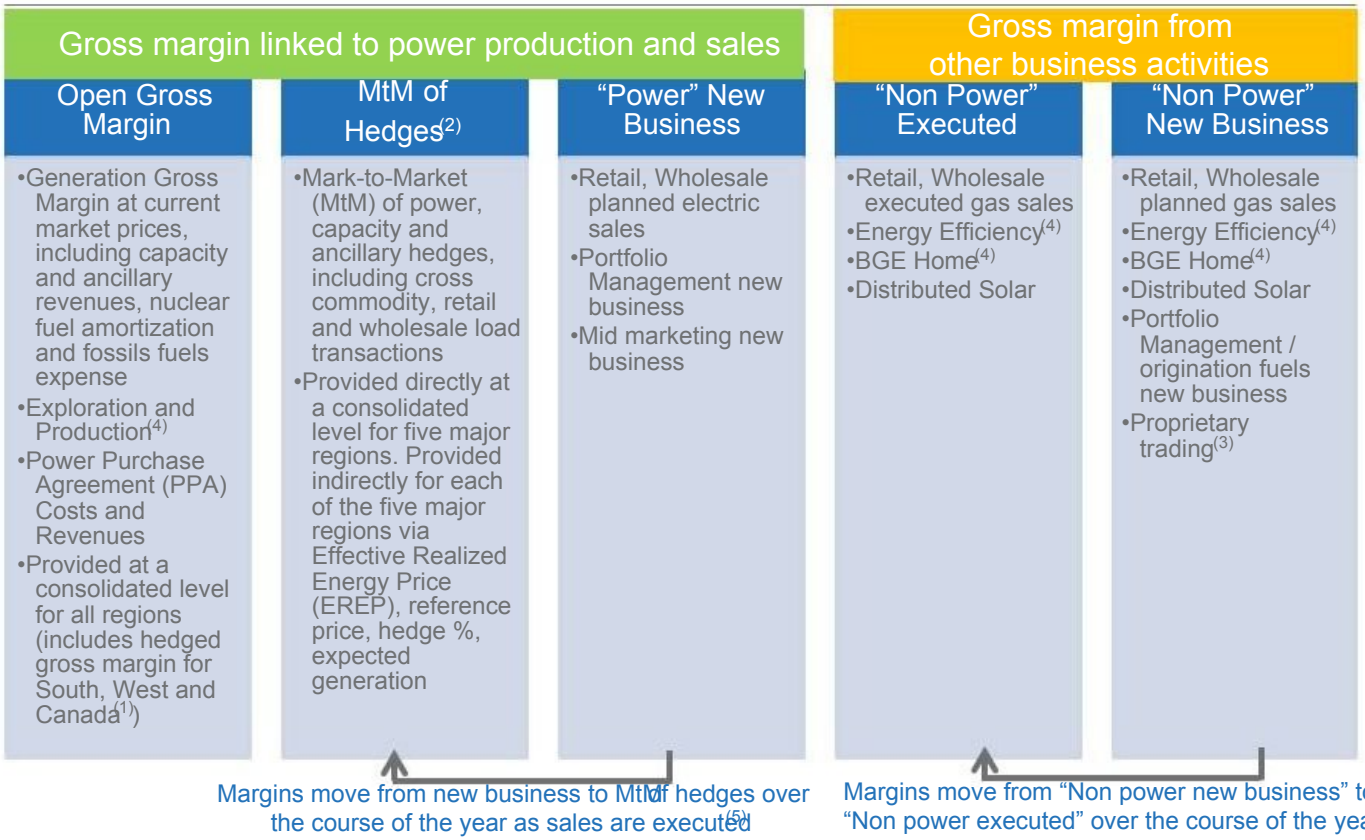
S1-SSA-0009 - 10205

Components of Gross Margin Categories



(1) Hedged gross margins for South, West & Canada region will be included with Open Gross Margin, and no expected generation, hedge %, EREP or reference prices provided for this region
(2) MtM of hedges provided directly for the five larger regions; MtM of hedges is not provided directly at the regional level but can be easily estimated using EREP, reference price and hedged MWh
(3) Proprietary trading gross margins will generally remain within "Non Power" New Business category and only move to "Non Power" Executed category upon management discretion
(4) Gross margin for these businesses are net of direct "cost of sales"
(5) Margins for South, West & Canada regions and optimization of fuel and PPA activities captured in Open Gross Margin

Exelon.

S1-SSA-0009 - 10206

ExGen Disclosures

Gross Margin Category ($M)[1]	2015	2016	2017	2018
Open Gross Margin (including South, West & Canada hedged GM)[3]	$5,150	$5,650	$5,800	$6,100
Mark-to-Market of Hedges[3,4]	$2,200	$1,200	$750	$250
Power New Business / To Go	$50	$500	$800	$1,000
Non-Power Margins Executed	$400	$200	$100	$50
Non-Power New Business / To Go	$50	$250	$350	$450
Total Gross Margin [2]	$7,850	$7,800	$7,800	$7,850

Reference Prices[5]	2015	2016	2017	2018
Henry Hub Natural Gas ($/MMbtu)	$2.75	$2.80	$2.99	$3.05
Midwest: NiHub ATC prices ($/MWh)	$28.80	$29.58	$28.95	$28.57
Mid-Atlantic: PJM-W ATC prices ($/MWh)	$37.05	$36.82	$35.36	$33.99
ERCOT-N ATC Spark Spread ($/MWh) *HSC Gas, 7.2HR, $2.50 VOM*	$3.12	$4.62	$4.47	$3.83
New York: NY Zone A ($/MWh)	$33.55	$33.52	$33.22	$32.70
New England: Mass Hub ATC Spark Spread ($/MWh) *ALQN Gas, 7.5HR, $0.50 VOM*	$5.57	$9.33	$10.73	$11.84

(1) Gross margin categories rounded to nearest $50M
(2) Total Gross Margin (Non-GAAP) is defined as operating revenues less purchased power and fuel expense, excluding revenue related to decommissioning, gross receipts tax, Exelon Nuclear Partners, operating services agreement with Fort Calhoun and variable interest entities. Total Gross Margin is also net of direct cost of sales for certain Constellation businesses.
(3) Excludes EDF's equity ownership share of the CENG Joint Venture
(4) Mark-to-Market of Hedges assumes mid-point of hedge percentages
(5) Based on September 30, 2015 market conditions

New England	115%-118%	81%-84%	37%-40%	11%-14%
Effective Realized Energy Price ($/MWh)[4]				
Midwest	$36.00	$34.50	$34.50	$34.50
Mid-Atlantic[2]	$51.50	$47.00	$45.50	$45.00
ERCOT[5]	$23.50	$11.00	$7.50	$2.50
New York[2]	$47.50	$45.50	$42.00	$35.00
New England[5]	$42.00	$20.00	$18.00	$11.00

(1) Expected generation is the volume of energy that best represents our commodity position in energy markets from owned or contracted for capacity based upon a simulated dispatch model that makes assumptions regarding future market conditions, which are calibrated to market quotes for power, fuel, load following products, and options. Expected generation assumes 12 refueling outages in 2016, 15 in 2017, and 14 in 2018 at Exelon-operated nuclear plants, and Salem. Expected generation assumes capacity factors of 94.1%, 93.3% and 93.7% in 2016, 2017 and 2018 respectively at Exelon-operated nuclear plants, at ownership. These estimates of expected generation in 2016, 2017 and 2018 do not represent guidance or a forecast of future results as Exelon has not completed its planning or optimization processes for those years

(2) Excludes EDF's equity ownership share of CENG Joint Venture

(3) Percent of expected generation hedged is the amount of equivalent sales divided by expected generation. Includes all hedging products, such as wholesale and retail sales of power, options and swaps

(4) Effective realized energy price is representative of an all-in hedged price, on a per MWh basis, at which expected generation has been hedged. It is developed by considering the energy revenues and costs associated with our hedges and by considering the fossil fuel that has been purchased to lock in margin. It excludes uranium costs and RPM capacity revenue, but includes the mark-to-market value of capacity contracted at prices other than RPM clearing prices including our load obligations. It can be compared with the reference prices used to calculate open gross margin in order to determine the mark-to-market value of Exelon Generation's energy hedges

(5) Spark spreads shown for ERCOT and New England

Exelon.

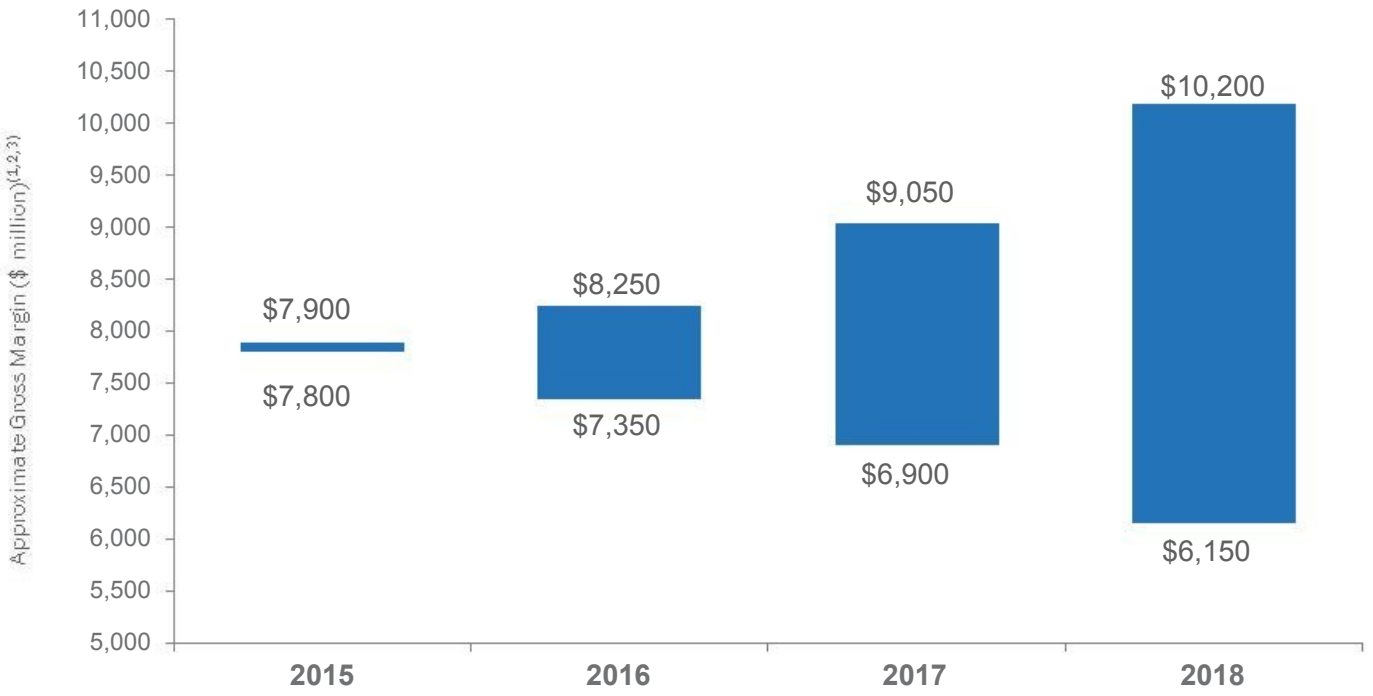
ExGen Hedged Gross Margin Sensitivities

Gross Margin Sensitivities (With Existing Hedges)[1]	2015	2016	2017	2018
Henry Hub Natural Gas ($/Mmbtu)				
+ $1/Mmbtu	-	$110	$445	$690
- $1/Mmbtu	$20	$(115)	$(430)	$(680)
NiHub ATC Energy Price				
+ $5/MWh	-	$100	$275	$410
- $5/MWh	-	$(95)	$(275)	$(410)
PJM-W ATC Energy Price				
+ $5/MWh	-	$45	$130	$235
- $5/MWh	-	$(40)	$(125)	$(230)
NYPP Zone A ATC Energy Price				
+ $5/MWh	-	$10	$25	$30
- $5/MWh	-	$(10)	$(25)	$(30)
Nuclear Capacity Factor				
+/- 1%	+/- $10	+/- $40	+/- $40	+/- $40

(1) Based on September 30, 2015 market conditions and hedged position; Gas price sensitivities are based on an assumed gas-power relationship derived from an internal model that is updated periodically; Power prices sensitivities are derived by adjusting the power price assumption while keeping all other prices inputs constant; Due to correlation of the various assumptions, the hedged gross margin impact calculated by aggregating individual sensitivities may not be equal to the hedged gross margin impact calculated when correlations between the various assumptions are also considered; Sensitivities based on commodity exposure which includes open generation and all committed transactions; Excludes EDF's equity share of CENG Joint Venture

Exelon.

ExGen Hedged Gross Margin Upside/Risk



(1) Represents an approximate range of expected gross margin, taking into account hedges in place, between the 5th and 95th percent confidence levels assuming all unhedged supply is sold into the spot market; Approximate gross margin ranges are based upon an internal simulation model and are subject to change based upon market inputs, future transactions and potential modeling changes; These ranges of approximate gross margin in 2016, 2017 and 2018 do not represent earnings guidance or a forecast of future results as Exelon has not completed its planning or optimization processes for those years; The price distributions that generate this range are calibrated to market quotes for power, fuel, load following products, and options as of September 30, 2015

(2) Gross Margin Upside/Risk based on commodity exposure which includes open generation and all committed transactions

(3) Gross Margin (Non-GAAP) is defined as operating revenues less purchased power and fuel expense, excluding revenue related to decommissioning, gross receipts tax, Exelon Nuclear Partners, operating services agreement with Fort Calhoun and variable interest entities. Total Gross Margin is also net of direct cost of sales for certain Constellation businesses. Excludes EDF's equity ownership share of the CENG Joint Venture

Exelon.

Illustrative Example of Modeling Exelon Generation 2016 Gross Margin

Row	Item	Midwest	Mid-Atlantic	ERCOT	New York	New England	South, West & Canada
(A)	Start with fleet-wide open gross margin	← $5.65 billion →					
(B)	Expected Generation (TWh)	97.3	63.1	17.2	9.3	12.5	
(C)	Hedge % (assuming mid-point of range)	80.5%	85.5%	87.5%	73.5%	82.5%	
(D=B*C)	Hedged Volume (TWh)	78.3	54.0	15.1	6.8	10.3	
(E)	Effective Realized Energy Price ($/MWh)	$34.50	$47.00	$11.00	$45.50	$20.00	
(F)	Reference Price ($/MWh)	$29.58	$36.82	$4.62	$33.52	$9.33	
(G=E-F)	Difference ($/MWh)	$4.92	$10.18	$6.38	$11.98	$10.67	
(H=D*G)	Mark-to-market value of hedges ($ million)[1]	$385	$550	$95	$80	$110	
(I=A+H)	Hedged Gross Margin ($ million)	$6,850					
(J)	Power New Business / To Go ($ million)	$500					
(K)	Non-Power Margins Executed ($ million)	$200					
(L)	Non-Power New Business / To Go ($ million)	$250					
(N=I+J+K+L)	Total Gross Margin[2]	$7,800 million					

(1) Mark-to-market rounded to the nearest $5 million
(2) Total Gross Margin (Non-GAAP) is defined as operating revenues less purchased power and fuel expense, excluding revenue related to decommissioning, gross receipts tax, Exelon Nuclear Partners operating services agreement with Fort Calhoun and variable interest entities. Total Gross Margin is also net of direct cost of sales for certain Constellation businesses

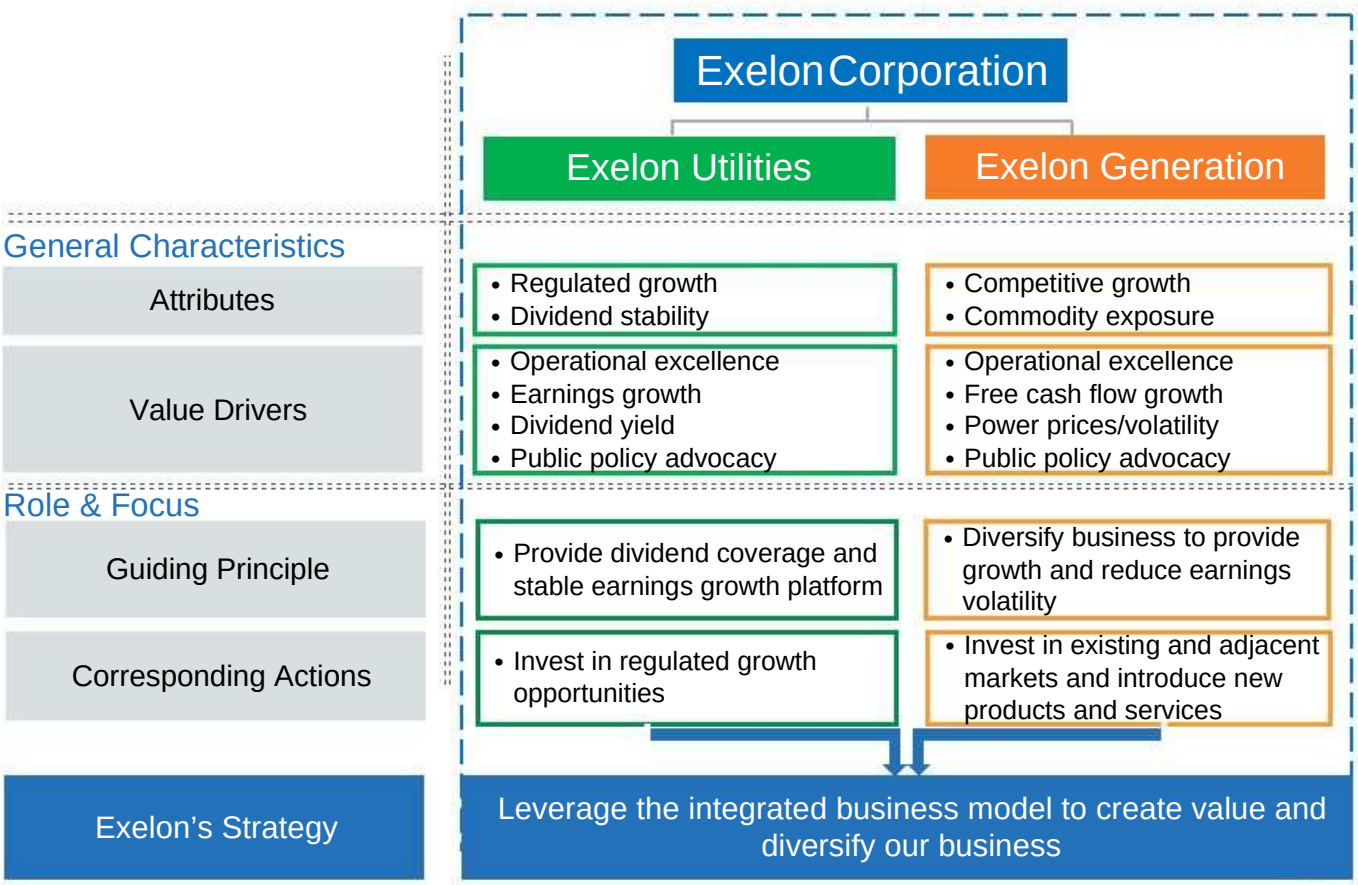
Cautionary Statements Regarding Forward-Looking Information

This presentation contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, that are subject to risks and uncertainties. The factors that could cause actual results to differ materially from the forward-looking statements made by Exelon Corporation, Commonwealth Edison Company, PECO Energy Company, Baltimore Gas and Electric Company and Exelon Generation Company, LLC (Registrants) include those factors discussed herein, as well as the items discussed in (1) Exelon's 2013 Annual Report on Form 10-K in (a) ITEM 1A. Risk Factors, (b) ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) ITEM 8. Financial Statements and Supplementary Data: Note 22; (2) Exelon's Third Quarter 2014 Quarterly Report on Form 10-Q in (a) Part II, Other Information, ITEM 1A. Risk Factors; (b) Part 1, Financial Information, ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) Part I, Financial Information, ITEM 1. Financial Statements: Note 18; and (3) other factors discussed in filings with the SEC by the Registrants. Readers are cautioned not to place undue reliance on these forward-looking statements, which apply only as of the date of this presentation. None of the Registrants undertakes any obligation to publicly release any revision to its forward-looking statements to reflect events or circumstances after the date of this presentation.

Our Strategy

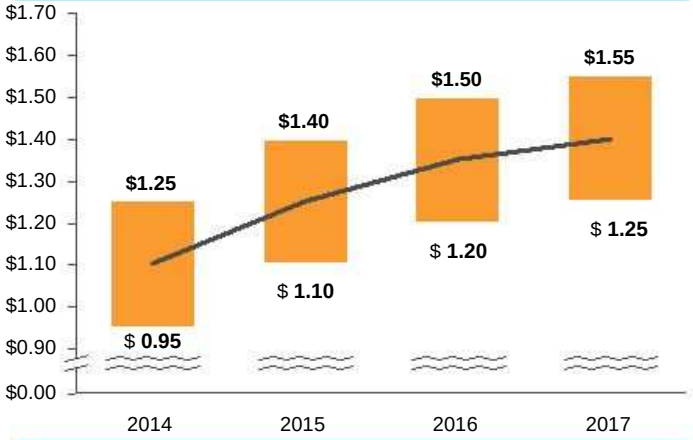


Exelon.

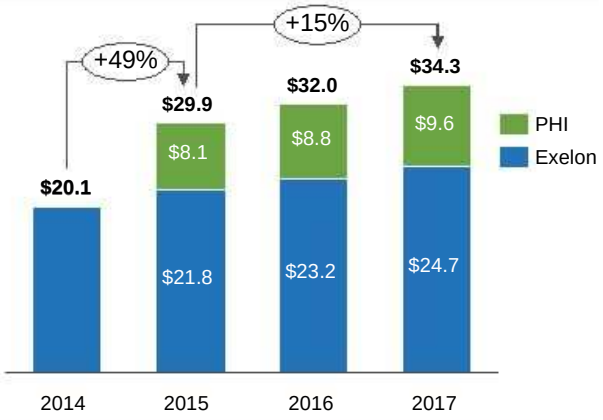
S1-SSA-0009 - 10218

Driving Value at Exelon Utilities

Providing Material EPS Accretion(1)



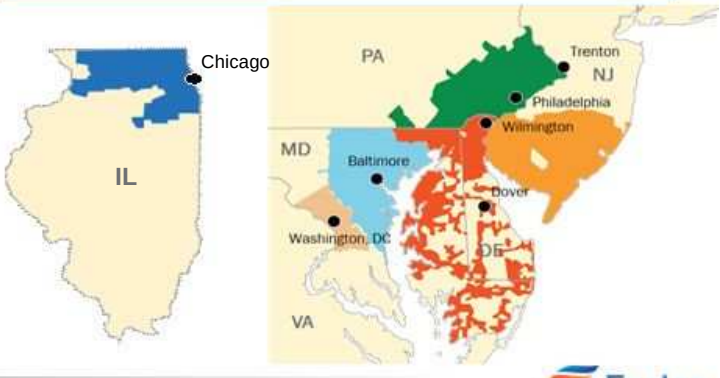
Significant Rate Base Growth(2)



Operational Excellence

- Continue first quartile operating performance in areas such as reliability and customer satisfaction
- Achieve financial performance targets
- Leverage standardization, common platforms and best practices across operating companies
- Improved operational performance at ComEd, PECO and BGE since the merger

Creating the Leading Mid-Atlantic Utility



(1) Earnings guidance is for Exelon Utilities only and does not include PHI utilities
(2) Denotes year end rate base

Exelon.

S1-SSA-0009 - 10219

Driving Value at Exelon Generation

Guiding Principles:

Preserve the value of our core business . . .

- Operate the nuclear fleet safely and reliably
- Provide clean, reliable and affordable energy
- Manage portfolio through hedging and generation to load matching

. . . while strategically growing and diversifying the business

- Leverage competencies for growth
- Identify and capitalize on emerging trends and technologies by being a first mover
- Invest in business diversification to position the company for the future
- Use full arsenal of financing tools

Taking action to create value today while preparing for a different future

Exelon.

S1-SSA-0009 - 10220

IL - Market Based Solution

Possible Market Based Solutions

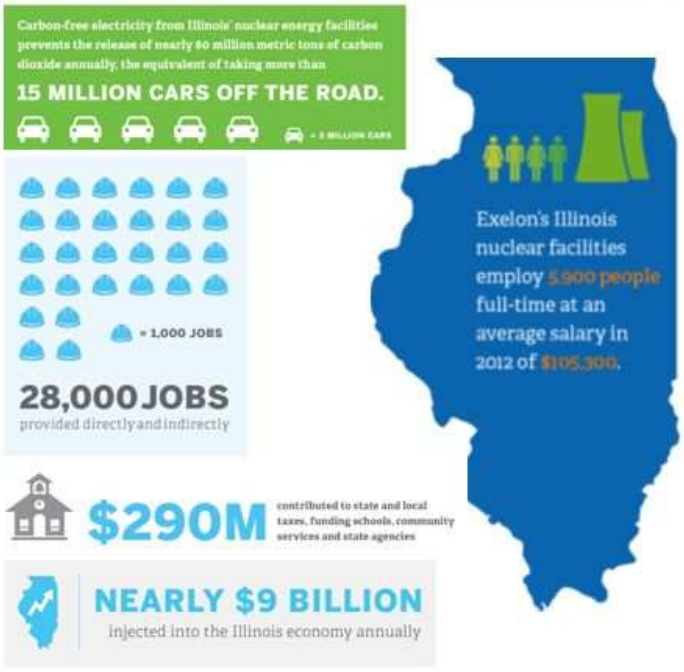
Clean Energy Standard

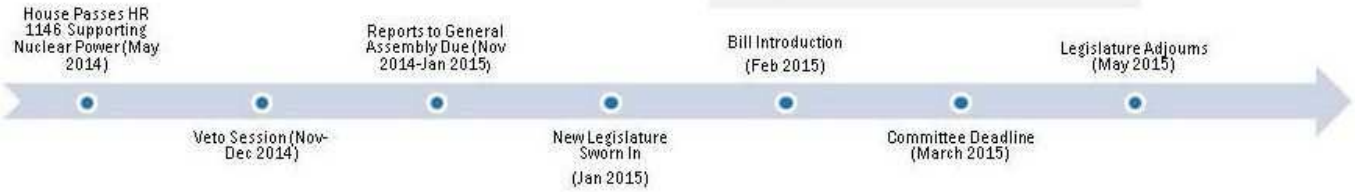
- Illinois could enact legislation to create a Clean Energy Standard (CES)
- A CES is a requirement that all customers purchase a minimum percentage of "clean" generation. The concept is similar to a Renewable Portfolio Standard with the distinction that the set of resources which qualify under the CES include all zero or low CO_2 emission generators
- Clean energy credits would be traded in a similar fashion to how renewable energy credits (RECs) are traded today

Carbon Trading Program

- Illinois could enact legislation to create a carbon trading program or join an existing program like the Regional Greenhouse Gas Initiative (RGGI)
- Carbon trading programs put a cap on carbon emissions and each fossil fuel generator must submit a carbon allowance for each tonne of carbon the plant emits
- These allowances are traditionally auctioned with the proceeds going to the state treasury. Some of the funds may be provided to customers to offset any rate impacts or dedicated to other energy-related programs

Benefits of Exelon's Fleet to Illinois





Note: 2015 Legislative timeline is illustrative

Exelon

S1-SSA-0009 - 10221

Exelon is positioned for a strong future

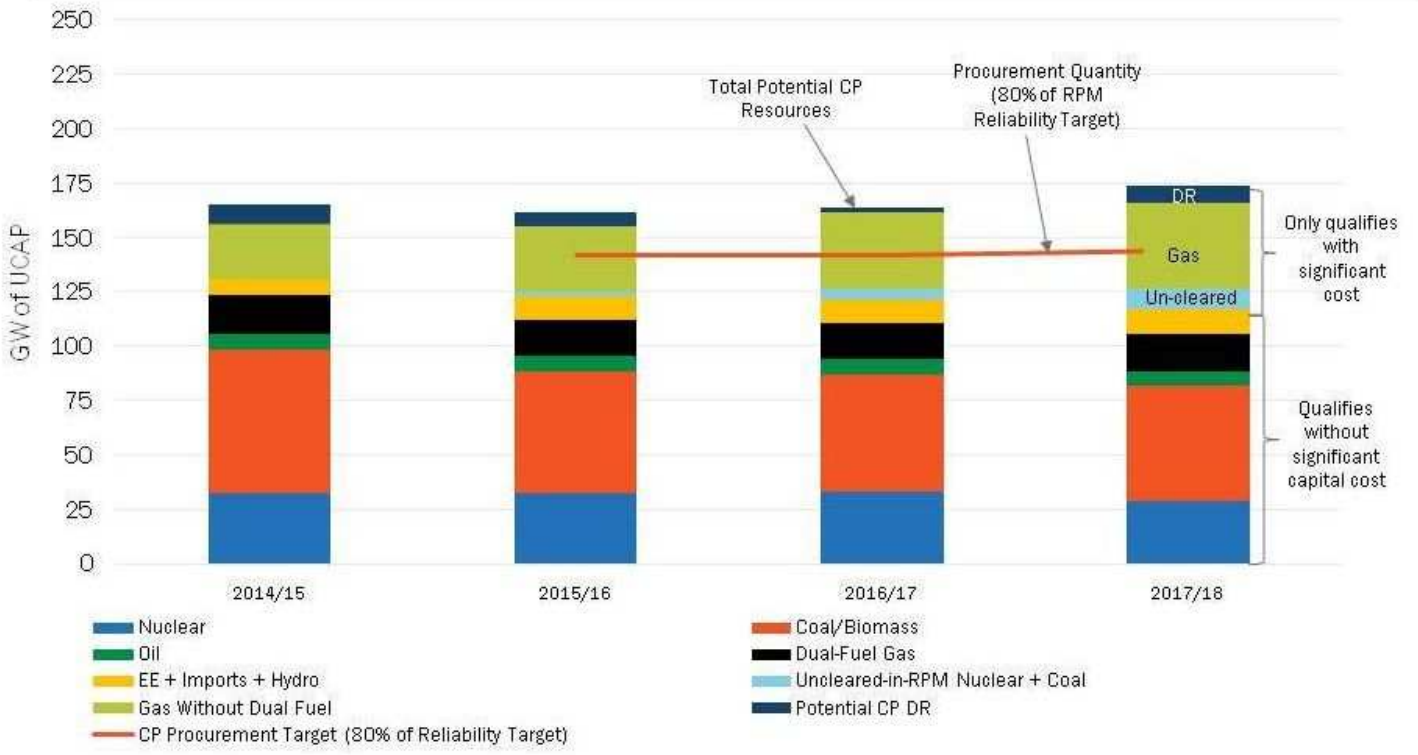
Core Strength	Strategic Actions
Strong Integrated Business Model	We leverage our core competencies to grow our regulated and competitive businesses while expanding to adjacent markets
Operational Excellence	We operate our nuclear fleet at world class levels, and deliver first quartile performance at the utilities
Financial Strength	We maintain a strong balance sheet and the ability to raise and deploy capital for growth
Portfolio Optimization	We manage commodity market volatility and optimize earnings through our hedging strategy
Strategic Diversification	We diversify our business to capitalize on evolving industry trends over the long term
Public Policy Advocacy	We advocate for policies that strengthen competitive markets, value the grid and enhance the value of clean, reliable generation

Exelon

S1-SSA-0009 - 10222

Key Developments

Capacity Performance (CP) Impact on PJM Fleet



Exelon's fleet is well positioned to benefit from Capacity Performance due to significant investments in reliability

Source: NorthBridge Analysis; includes FRR resources/Loads; PJM proposal is to fully procure CP for 2016/17 and 2017/18 but to incrementally procure up to 10 GW of base capacity for 2015/16. Potential 2015/16 all-in CP procurement quantity shown for comparison purposes.

Exelon.

S1-SSA-0009 - 10224

Asset Divestitures --$ 1.4 Billion in Proceeds to Date

To date, Exelon has signed definitive agreements on five non-core assets representing a total of nearly $1.4 billion of after-tax sales proceeds upon closings; This excludes proceeds from Hillabee, which is currently on the market

(1) Represents EXC's portion of the asset
Note: CF: Capacity Factor through September 2014; Safe Harbor capacity factor through July 2014

Exelon.

S1-SSA-0009 - 10225

ExGen Disclosures – Asset Sale Impacts

Gross Margin Category ($M)[1]	2015	2016	2017
Open Gross Margin (including South, West & Canada hedged GM)[3]	6,750	6,500	6,650
Mark to Market of Hedges[3,4]	-	150	150
Power New Business / To Go	400	550	750
Non-Power Margins Executed	100	50	50
Non-Power New Business / To Go	300	350	350
Total Gross Margin[2,5]	7,550	7,600	7,950
Impact of Removing Keystone / Conemaugh	(150)	(100)	(100)
Pro-forma Total Gross Margin excluding Keystone / Conemaugh	7,400	7,500	7,850
Impact of Announced Assets Sales During 2014 [1]	**2015**	**2016**	**2017**
OGM Impact Q2 (Safe Harbor)	(50)	(50)	(50)
OGM Impact Q3 (Fore River, Quail Run, West Valley)	(100)	(100)	(100)
OGM Impact Q4 (Keystone / Conemaugh)	(150)	(100)	(100)
Total Impact to OGM from Announced Asset Sales	(300)	(250)	(250)
O&M	100	100	100
D&A	100	100	100
EBIT	(100)	(50)	(50)
CapEx	(50)	(50)	(100)
EPS Reduction[6]	($0.06-$0.08)	($0.02-$0.04)	($0.02-$0.04)

(1) Rounded to nearest $50M

(2) Total Gross Margin (Non-GAAP) is defined as operating revenues less purchased power and fuel expense, excluding revenue related to decommissioning, gross receipts tax, Exelon Nuclear Partners and variable interest entities. Total Gross Margin is also net of direct cost of sales for certain Constellation businesses

(3) Excludes EDF's equity ownership share of the CENG Joint Venture

(4) Mark to Market of Hedges assumes mid-point of hedge percentages

(5) Reflects the divestiture impact of Fore River, Quail Run and West Valley. Does not include divestiture of Keystone/Conemaugh or the Integrys Acquisition

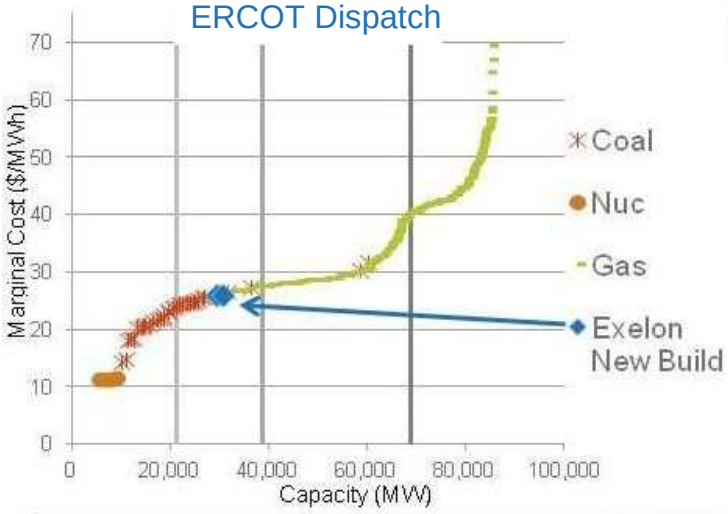
(6) EPS impact does not include impact of investing the proceeds from the sale. As a reminder these sales were included in the accretion calculation for the PHI transaction

Exelon.

S1-SSA-0009 - 10226

State of the Art Combined Cycles in ERCOT

ERCOT Dispatch



Key Facts	
Sites	Wharton County, TX Granbury, TX
Total Capacity	~2,200MW (Wolf Hollow: 1,085MW / Colorado Bend: 1,104MW)
Construction Cost	~$700/kW
Heat Rate	~6,500 mmBtu/MWh
OEMs	GE and Alstom
EPC	Zachry
Cooling System	Air Cooled
Construction Start	2015
Commercial Operation	By Summer 2017

- **Efficient:** Two of the cleanest, most efficient Combined Cycle Gas Turbines (CCGT) in the nation
- **Cost Effective:** Simplified design provides for easier construction and maintenance, making these units among the most predictable and least costly to operate and maintain in the industry
- **Environmental:** Plants use air cooling which mitigates water constraint issues
- **Fast Ramp:** 100 MW/Minute ramp rate (market ramp rate ~50 MW/minute)

Exelon

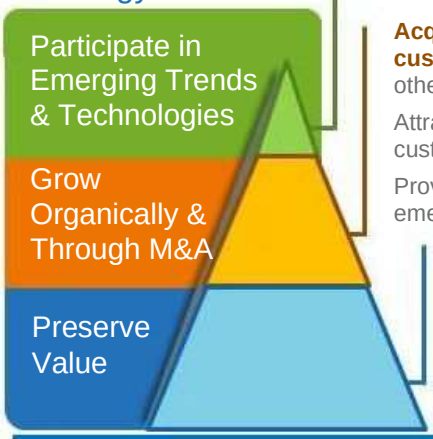
S1-SSA-0009 - 10227

Distributed Energy Platform

Distributed Energy is a Fast Growing Business

- On-site generation, including solar, quadrupled since 2006 *(Wall Street Journal 2013)*
- US C&I customers are spending ~$5-6 billion per year on self-generation and energy efficiency programs *(Bloomberg 2013)*
- Revenues from Distributed Generation are expected to reach $12.7 billion by 2018 *(Pike Research, Navigant, 2012)*

Distributed Energy Supports Exelon's Strategy:



Commercializing emerging and potentially disruptive energy technologies to diversify existing technology base

Acquiring long term retail customers through a PPA or other long-term agreement

Attract and acquire new customers with unique offering

Provides adaptive growth within an emerging market sector

Bolstering existing relationships with customers to help achieve reliability or sustainability objectives

Integrating supply & demand side solutions

Key Attributes of Financial Value

Co-Generation
- Design, build and operate energy assets
- Provides renewable energy value or credits, if applicable
- Long-term O&M agreements

Owned Assets additional attributes:
- Long-term customer PPA (usually @ fixed price)
- Provides tax incentives, if applicable

Solar
- ~ 200 MW of Retail Solar Projects in operation or under construction
- Long-term customer PPA (usually @ fixed price)
- Provides renewable energy value or credits, if applicable
- Provides tax incentives, if applicable

Energy Efficiency
- Over 1,000 energy saving projects implemented
- ~ 50 MW conserved by customers
- More than $1 billion in projects 3rd party customer financed

Fuel Cell
- Provide equity financing for 21 MW of Bloom Energy fuel cell projects at 75 commercial facilities including AT&T
- Provides renewable energy value or credits, if applicable
- Provides tax incentives, if applicable

Backup Generation
- Own and operate energy assets as a service to retail customers
- Bundled service offering with long-term customer agreements through grid power supply & LR programs
- Load Response market -based value creation (e.g., LR Programs)

Battery Storage
- Own and operate energy assets as a service to retail customers
- Bundled service offering with long-term customer agreements through grid power supply & LR programs
- Load Response market based value creation (e.g., ancillary services)

CNG
- Own and operate CNG facilities
- Leverage retail gas supply and risk management expertise
- Long-term customer off-take agreement(s)

Invested more than $1 billion of capital with projects averaging returns of 8% - 12%, and well positioned for growth

Exelon.

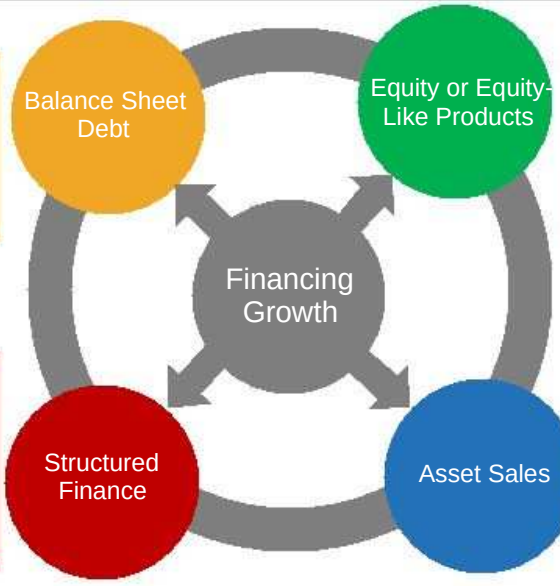
S1-SSA-0009 - 10228

Financial Update

S1-SSA-0009 - 10229

Financing Strategy

On Balance Sheet Debt supports core business and/or strategic assets
- Senior Unsecured Notes
- Utility First Mortgage Bonds



Equity or Equity-Like Products support growth projects (both on-going and strategic M&A)
- Mandatory Convertible Units
- Marketed Follow-On Offerings

Structured Financing supports non-core assets that generate consistent cash flows
- Project Financing
- Asset Based Lending
- Joint Venture/Equity Partner

Proceeds from asset sales support
- Reinvestment of Free Cash Flow
- Strategic Diversification

- Our financing strategy incorporates a broad range of financial products, from the standard corporate-style products (such as corporate debt and equity), to alternative structures such as project financing, partnership structures and other arrangements
- We employ a wide variety of financing tools that will enable us to access capital to grow on both the regulated and unregulated sides of the business

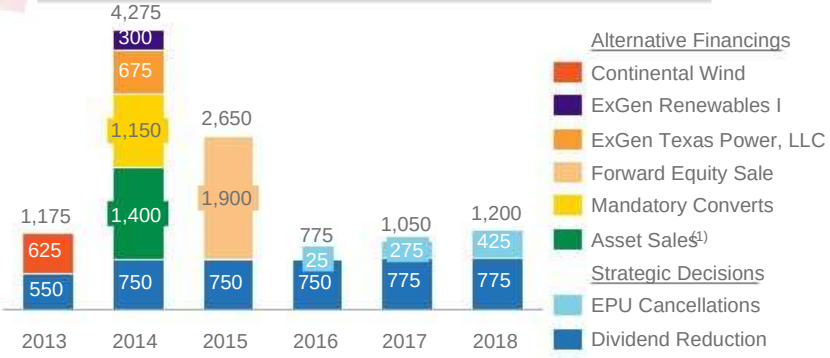
Exelon.

Exelon's Strategic and Financial Decisions Enable Growth Across the Enterprise

A broad spectrum of financing alternatives beyond the core financing options can be used to fund growth

- Monetize assets in the portfolio via project finance (Nearly $3B over past 3 years)
- Sell assets which are worth more to others ($1.0-$1.5B after-tax in 2014-15)
- Other financing structures (joint ventures, minority partners, etc.) could be used based on opportunity

Incremental Sources of Cash



(1) Includes Safe Harbor, Fore River, Quail Run, West Valley and Keystone Conemaugh.
Note: Does not include future Hillabee proceeds

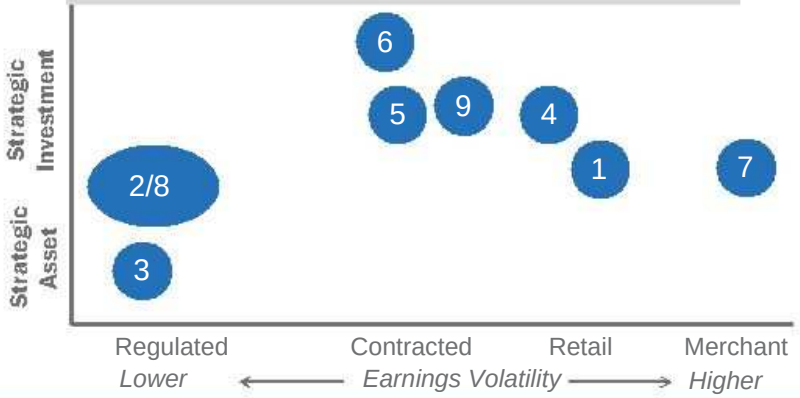
Strategic and Diversified Deployment



Exelon has a proven ability to finance growth

Exelon.

S1-SSA-0009 - 10231

Over the Last Three Years, Exelon Has Raised Nearly $3 Billion through Project Financing

- Exelon uses project financing to:
  - Maintain upside reward of the project while mitigating the downside risk
  - Enhance corporate credit metrics and strengthen the balance sheet via non-recourse financing vehicles
  - Provide different and new sources of liquidity that Exelon would not typically be able to access corporately
  - Maximize Exelon's returns on its strategic investments

Antelope Valley Solar Ranch

- 230 MW photovoltaic solar generating plant in Lancaster, CA
- $646 MM Senior Secured Bond –due January 2037 with a DOE Loan Guaranty

Continental Wind

- 667 MW of wind spread across 13 projects and five wind regimes
- $613MM Senior Secured 144a Project Bond –due February 2033 and $141MM Senior Secured LC and Working Capital Facilities – due February 2021
- Deal of the Year
  - *Project Finance ' s* 2013 North American Portfolio Power Deal of the Year
  - *Project Finance & Risk ' s* 2013 Project Finance Renewable Deal of the Year

ExGen Renewables

- HoldCo financing of Continental's distributions to further maximize our returns on our wind investments
- $300MM Senior Secured Team Loan B –due February 2021

ExGen Texas Power

- 3,476 MW ERCOT conventional power portfolio consisting of CCGTs and Simple Cycles
- $675MM Senior Secured Term Loan B –due September 2021
- One of the largest non-corporate, single-tranche term loan B issuances in the power sector in 2014

(1) Based on September 30, 2014 market conditions and hedged position. Gas price sensitivities are based on an assumed gas-power relationship derived from an internal model that is updated periodically. Power prices sensitivities are derived by adjusting the power price assumption while keeping all other price inputs constant. Due to correlation of the various assumptions, the EPS impact calculated by aggregating individual sensitivities may not be equal to the EPS impact calculated when correlations between the various assumptions are also considered.
(2) Assumes 2017/2018 auction cleared volumes
(3) Does not include shares assumed to be issued via forward equity sale in connection with PHI acquisition

Wind	n/a	n/a	n/a	(75)	(75)	(75)	--
Solar	n/a	n/a	n/a	(200)	(200)	(200)	--
Upstream	n/a	n/a	n/a	(75)	(75)	(50)	(25)
Utility Smart Grid/Smart Meter	(75)	(275)	(150)	n/a	(525)	(525)	--
Net Financing (excluding Dividend):							
Debt Issuances	--	900	300	--	1,200	1,250	(50)
Debt Retirements	--	(625)	(250)	(525)	(1,375)	(1,375)	--
Project Finance/Federal Financing Bank Loan	n/a	n/a	n/a	1,050	1,050	875	175
Other Financing[6]	(75)	175	100	(375)	575	575	--
Ending Cash Balance[2]					**3,600**	**3,250**	**350**

(1) All amounts rounded to the nearest $25M.

(2) Excludes counterparty collateral of $134 million at 12/31/2013. In addition, the 12/31/2014 ending cash balance does not include collateral.

(3) Includes cash flow activity from Holding Company, eliminations, and other corporate entities. CapEx for Exelon is shown net of $325M CPS early lease termination fee, and ($125M) purchase of PHI preferred stock.

(4) Adjusted Cash Flow from Operations (non-GAAP) primarily includes net cash flows from operating activities and net cash flows from investing activities excluding capital expenditures of $5.7B for 2014.

(5) Dividends are subject to declaration by the Board of Directors.

(6) "Other Financing" primarily includes CENG distribution to EDF, expected changes in short-term debt, and proceeds from issuance of mandatory convertible units.

Key Messages[1]

- Cash from Operations is projected to be $7,475M vs. 2Q14E of $6,975M for a $500M variance. This variance is driven by:
  - $625M Net proceeds from divestitures
  - $175M Income taxes and settlements
  - $125M Reclassification of PHI preferred stock purchase
  - ($325M) Integrys acquisition, including working capital
  - ($100M) Working capital at Utilities
- Cash from Investing activities is projected to be ($5,725M) vs. 2Q14E of ($5,450M) for a ($275M) variance. This variance is driven by:
  - ($125M) ExGen development
  - ($125M) Reclassification of PHI preferred stock purchase
  - ($25M) Upstream
- Cash from Financing activities is projected to be $375M vs. 2Q14E of $250M for a $125M variance. This variance is driven by:
  - $175M Incremental project financing at ExGen
  - ($50M) Decreased ComEd long term debt requirements
  - ($25M) Decrease in projected commercial paper financings

Exelon

Pension and OPEB Contributions and Expense

	2015		2016	
(in $M)	Pre-tax Expense[1]	Contributions[2]	Pre-Tax Expense[1]	Contributions[2]
Pension[3][4]	$375	$515	$325	$565
OPEB[3][4]	$5	$30	$5	$35
Total	$380	$545	$330	$600

(1) Pension and OPEB expenses assume a ~27% and ~28% capitalization rate in 2015 and 2016, respectively
(2) Contributions shown in the table above are based on the current contribution policy, which for the pension includes a discretionary component of $250M
(3) Expected return on assets for pension is 7.00% and for OPEB is 6.59%
(4) Projected 12/31/14 pension and OPEB discount rates are 4.28% and 4.26%, respectively, for the majority of plans

Exelon

S1-SSA-0009 - 10237

2015 Pension and OPEB Sensitivities

- Tables below provide sensitivities for the combined company's 2015 pension and OPEB expense and contributions[1] under various discount rate and S&P 500 asset return scenarios

	2015 Pension Sensitivity[2] (in $M)					
	S&P Returns in Q4 2014[3]					
	10%		0%		-10%	
Discount Rate at 12/31/14	Pre-Tax Expense[1]	Contributions[2]	Pre-Tax Expense[1]	Contributions[2]	Pre-Tax Expense[1]	Contributions[2]
Baseline Discount Rate[4]	$365	$505	$375	$515	$390	$520
+50 bps	$345	$265	$345	$520	$355	$525
-50bps	$400	$490	$410	$495	$425	$505

	2015 OPEB Sensitivity[2] (in $M)					
	S&P Returns in Q4 2014[3]					
	10%		0%		-10%	
Discount Rate at 12/31/14	Pre-Tax Expense[1]	Contributions[2]	Pre-Tax Expense[1]	Contributions[2]	Pre-Tax Expense[1]	Contributions[2]
Baseline Discount Rate[4]	$0	$30	$5	$30	$25	$35
+50 bps	($10)	$30	$0	$30	$10	$30
-50bps	$10	$30	$25	$35	$35	$50

(1) Contributions shown in the table above are based on the current contribution policy which for the pension includes a discretionary component of $250M
(2) Pension and OPEB expenses assume an ~ 27% capitalization rate in 2015
(3) Final 2014 asset return for pension and OPEB will depend in part on overall equity market returns for Q4 2014 as proxied by the S&P500 ; The amounts above reflect YTD asset returns through September 30 , 2014
(4) The baseline discount rates reflect projected 12/31/14 pension and OPEB discount rates of 4.28% and 4.26%, respectively, for the majority of plans

GAAP to Operating Adjustments

- Exelon's 2014 adjusted (non-GAAP) operating earnings excludes the earnings effects of the following:
  - Mark-to-market adjustments from economic hedging activities
  - Unrealized gains and losses from NDT fund investments to the extent not offset by contractual accounting as described in the notes to the consolidated financial statements
  - Financial impacts associated with the increase and decrease in certain decommissioning obligations
  - Financial impacts associated with the sale of interests in generating stations
  - Non-cash charge to earnings related to the cancellation of previously capitalized nuclear uprate projects and the impairment of certain wind generating assets and certain assets held for sale
  - Gain recorded upon consolidation of CENG
  - Certain costs incurred associated with the Constellation, CENG merger, and Pepco Holdings, Inc. merger and integration initiatives
  - Non-cash amortization of intangible assets, net, related to commodity contracts recorded at fair value at the merger date for 2014
  - Favorable settlements of certain income tax positions on Constellation's 2009-2012 tax returns
  - CENG interest not owned by Generation, where applicable

Grand Prairie Gateway Transmission Line

Key Facts

- Line : 60 mile, 345 kV transmission line connecting ComEd's Byron and Wayne substations alleviating identified congestion and enhancing reliability
- Cost: $260 million
- Customer Savings: $250 million within the first 15 years of operation – net of all costs
- Recovery Mechanism: FERC-filed transmission rate of 11.5% and construction work in progress and abandonment recovery
- Construction : Scheduled to begin Q2 2015
- In Service Date: Q2 2017
- Environmental Benefits: 735,000 pounds of carbon dioxide (CO2) reduced over the first 15 years

Exelon

S1-SSA-0009 - 10248

ComEd April 2014 Distribution Formula Rate

The 2014 distribution formula rate filing establishes the net revenue requirement used to set the rates that will take effect in January 2015 after the Illinois Commerce Commission's (ICC's) review. There are two components to the annual distribution formula rate filing:

- Filing Year: Based on prior year costs (2013) and current year (2014) projected plant additions.
- Annual Reconciliation: For the prior calendar year (2013), this amount reconciles the revenue requirement reflected in rates during the prior year (2013) in effect to the actual costs for that year. The annual reconciliation impacts cash flow in the following year (2015) but the earnings impact has been recorded in the prior year (2013) as a regulatory asset.

Docket #	**14-0312**
Filing Year	**2013 Calendar Year Actual Costs and 2014 Projected Net Plant Additions** are used to set the rates for calendar year 2015. Rates currently in effect (docket 13-0318) for calendar year 2014 were based on 2012 actual costs and 2013 projected net plant additions
Reconciliation Year	**Reconciles Revenue Requirement reflected in rates during 2013 to 2013 Actual Costs Incurred.** Revenue requirement for 2013 is based on docket 13-0386 filed in June 2013 and reflect the impacts of PA98-0015 (SB9)
Common Equity Ratio	**~ 46%** for both the filing and reconciliation year
ROE	**9.25%** for the filing year (2013 30-yr Treasury Yield of 3.45% + 580 basis point risk premium) and **9.20%** for the reconciliation year (2013 30-yr Treasury Yield of 3.45% + 580 basis point risk premium – 5 basis points performance metrics penalty). For 2014 and 2015, the actual allowed ROE reflected in net income will ultimately be based on the average of the 30-year Treasury Yield during the respective years plus 580 basis point spread, absent any metric penalties
Requested Rate of Return	**~ 7%** for both the filing and reconciliation years
Rate Base(1)	**$7,369 million** – Filing year (represents projected year-end rate base using 2013 actual plus 2014 projected capital additions). 2014 and 2015 earnings will reflect 2014 and 2015 year-end rate base respectively. $6,596 million - Reconciliation year (represents year-end rate base for 2013)
Revenue Requirement Increase(1)	**$269M** ($96M is due to the 2013 reconciliation, $173M relates to the filing year). The 2013 reconciliation impact on net income was recorded in 2013 as a regulatory asset.
Timeline	• 04/16/14 Filing Date • 240 Day Proceeding • ALJ Proposed Order issued on 10/15/14 proposes a $239M revenue requirement increase • ICC order expected by December 12, 2014

Given the retroactive ratemaking provision in the Energy Infrastructure Modernization Act (EIMA) legislation, ComEd net income during the year will be based on actual costs with a regulatory asset/liability recorded to reflect any under/over recovery reflected in rates. Revenue Requirement in rate filings impacts cash flow.

(1) Amounts represent ComEd's position filed in rebuttal testimony on July 23, 2014

Note: Disallowance of any items in the 2014 distribution formula rate filing could impact 2014 earnings in the form of a regulatory asset adjustment

Exelon

BGE Rate Case Settlement

	Electric	Gas
Docket #	9355	
Test Year	September 2013 August 2014	
Common Equity Ratio[2]	52.3%	
Authorized Returns[1][3]	ROE: 9.75%; ROR: 7.46%	ROE: 9.65%; ROR: 7.41%
Requested Rate of Return	7.93%	7.88%
Proposed Rate Base (adjusted)[1][4]	$2.9B	$1.2B
Revenue Requirement Increase	$22.0M	$38.0M
Distribution Increase as % of overall bill	1%	5%
Timeline	• 07/02/14 BGE filed application with the MDPSC seeking increases in electric & gas distribution base rates • 210 Day Proceeding • 7/08/14 – Case delegated to the Public Utility Law Judge Division • 10/17/14 – BGE filed unanimous "black box" settlement with MD PSC • Settlement must be approved by the MD PSC • If approved, new rates are expected to be effective no sooner than the middle of December 2014	

First BGE rate case settlement agreement since 1999

(1) Due to the "black box" nature of the settlement, the Common Equity Ratio, Authorized Returns, and Proposed Rate Base (adjusted) were not agreed upon by the parties in determining the ultimate revenue requirement increase
(2) Reflects BGE's actual capital structure as of 8/31/2014
(3) ROE and ROR stated in the settlement only apply to AFUDC and carrying costs on regulatory assets
(4) BGE's Proposed Adjusted rate base

Exelon

S1-SSA-0009 - 10250

ComEd Load

Weather-Normalized Load Growth

Economic Forecast of Drivers that Influence Load

Driver or Indicator	2015 Outlook
Gross Metro Product (GMP)	2.3% growth in real GMP reflects overall better economic conditions than the slower growth in 2014 (Manufacturing and Professional Business Services employment accelerate in 2015)
Employment	1.3% increase in total employment is expected for 2015, which is consistent with the average growth for the past three years
Manufacturing	Manufacturing employment is expected to grow 1.4% in 2015. This is a significant improvement over the (0.4%) decline in 2013 and the (1.1%) decline in 2014
Households	Household formations are expected to increase 0.7% in 2015 which is slightly higher than the expected increase of 0.6% in 2014
Energy Efficiency	Continued expansion of EE program expected to reduce usage in 2015 by approximately 1.2%

Improving economic conditions and energy efficiency initiatives will continue to impact load growth

Notes: 2013 data is not adjusted for leap year. Source of 2015 economic outlook data is IHS Economics (September 2014). (C&I = Commercial and Industrial)

Exelon.

PECO Load

Weather-Normalized Load Growth

Economic Forecast of Drivers that Influence Load

Driver or Indicator	2015 Outlook
Gross Metro Product (GMP)	GMP projected to grow at 2.5% for 2015, the same as prerecession levels
Resident Employment	Resident employment outlook is 1.7% in 2015 vs. 1.3% in 2014
Manufacturing Employment	Manufacturing employment is expected to grow at 1.7%. Philadelphia has had negative growth from 2000 to 2014
Households	Household growth is expected to be 0.7%, strongest growth since 2008, and at the same level as 2014
Energy Efficiency	Deemed Energy Efficiency impact forecasted to be ~0.9% reduction in usage in 2015

Moderately strong economic recovery will drive sales in 2015, partially offset by on-going energy efficiency initiatives

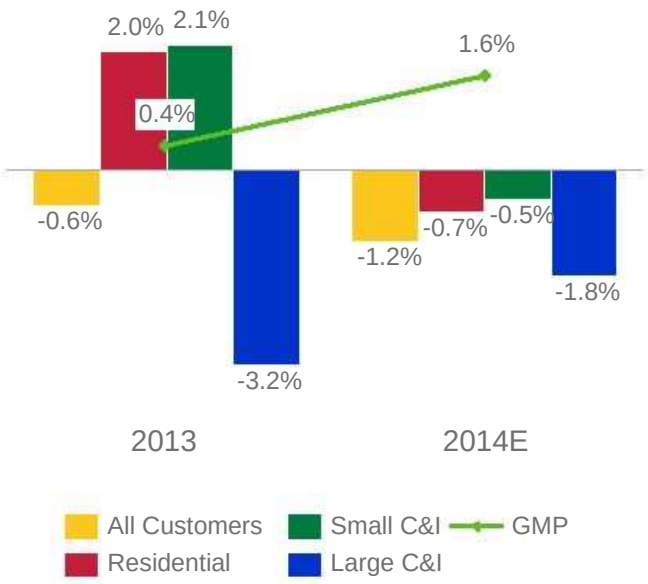
Notes: 2013 data is not adjusted for leap year. Source of 2015 economic outlook data is IHS Economics (September 2014). (C&I = Commercial and Industrial)

Exelon.

S1-SSA-0009 - 10252

BGE Load

Weather-Normalized Load Growth



Economic Forecast of Drivers that Influence Load

Driver or Indicator	2015 Outlook
Gross Metro Product (GMP)	GMP is projected to grow at 2.6% for 2015
Employment	2.1% growth projected. BGE's decoupled non-rate case revenue growth is primarily driven by customer growth. The main driver for customer growth is employment
Manufacturing	Manufacturing employment is expected to be fairly flat to 2014 levels in 2015
Households	Household growth is projected to be 0.8%, almost flat to 2014
Energy Efficiency	Continued expansion of EE programs will partially offset growth seen due to improvements in economic conditions

Moderately strong economic recovery will drive sales in 2015, partially offset by energy efficiency initiatives

Notes: 2013 data is not adjusted for leap year. Source of 2015 economic outlook data is IHS Economics (September 2014). (C&I = Commercial and Industrial)

PHI Acquisition

S1-SSA-0009 - 10254

Delivering Value to PHI's Customers and Communities

Joining a family of large urban utilities with distinguished emergency response capabilities will benefit PHI utilities and their customers during major storms, while helping to reduce costs

Exelon will provide **$100 million** for a Customer Investment Fund to be utilized across the PHI utilities' service territories as each public service commission deems appropriate for customer benefits

Exelon shares PHI's commitment to the local communities it serves. Exelon has committed to provide **$50 million** over 10 years to charitable organizations and programs in the communities the PHI utilities serve – exceeding PHI's 2013 contribution levels

Combined with reliability improvement projects already announced by PHI and underway (including the project to bury distribution lines in Washington, D.C.), the merger commitments are expected to produce approximately 11,000 to 14,000 new indirect jobs in the region and between **$1.0 billion to $1.3 billion** in benefits to the economies of Delaware, Maryland, New Jersey and Washington, D.C.

PHI Acquisition Will Create the Leading Mid-Atlantic Utility

Constellation℠
An Exelon Company

S1-SSA-0009 - 10261

Commercial Business Overview

Scale, Scope and Flexibility Across the Energy Value Chain

Development and exploration of natural gas and liquids properties

9 assets in six states

~165 BCFe of proved Reserves[1]

Leading merchant power generation portfolio in the U.S.

~32 GW of owned generation capacity[2]

Clean portfolio, well positioned for evolving regulatory requirements

Industry-leading wholesale and retail sales and marketing platform

~150 TWh of load and ~500 BCF of retail gas delivered[3]

~ 1 million residential and 100,000 business and public sector customers

One of the largest and most experienced Energy Management providers

Over 4,000 energy savings projects implemented across the U.S.

A growing Distributed Energy platform with over $1B of investment to date

Benefiting from scale, scope and flexibility across the value chain

(1) 12/31/13 year-end reserves based upon assets owned as of 9/30/14 . Includes Natural Gas (NG), NG Liquids (NGL) and Oil. NG and Oil are converted to BCFe at a ratio of 6:1.
(2) Total owned generation capacity as of 9/30/2014, less capacity for announced divestitures of Fore River, Quail Run, West Valley, and Keystone Conemaugh
(3) Expected for 2014 as of 9/30/2014. Electric load and gas includes fixed price and indexed products
Note: Does not include the impact of Integrys acquisition

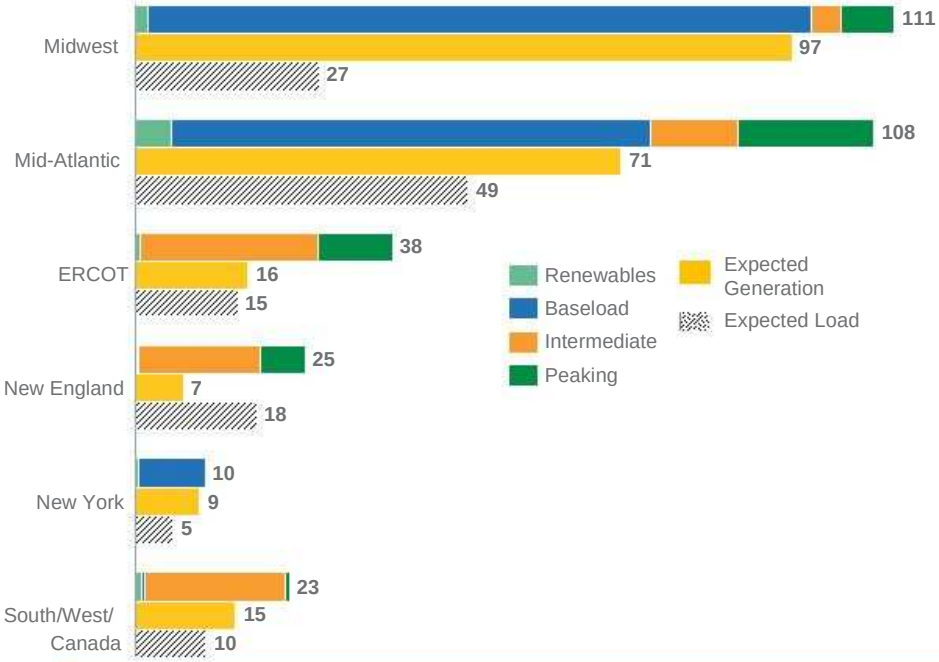
Exelon

S1-SSA-0009 - 10262

Generation to Load Match

Generation Capacity, Expected Generation and Expected Load

2015 in TWH[1,2]



Generation to Load match provides portfolio management benefits in differing volatility and price environments

- During the first quarter, our nuclear baseload generation fleet, in combination with our dispatchable fleet, allowed us to take advantage of the high volatility/price environment while managing load obligations
- During the third quarter, we were able to realize lower costs to serve our load due to the low volatility/price environment

Industry-leading platform with regional diversification of the generation fleet and customer-facing load business

(1) Owned and contracted generation capacity converted from MW to MWh assuming 100% capacity factor (CF) for all technology types, except for renewable capacity which is shown at estimated CF
(2) Expected generation and load shown in the chart above will not tie out with load volume and ExGen disclosures; Load shown above does not include indexed products and generation reflects a net owned and contracted position; Estimates as of 9/30/2014

Note: Includes divestitures for Safe Harbor, Fore River, Quail Run, and West Valley; Does not include impact of Keystone/Conemaugh divestiture or the Integrys acquisition

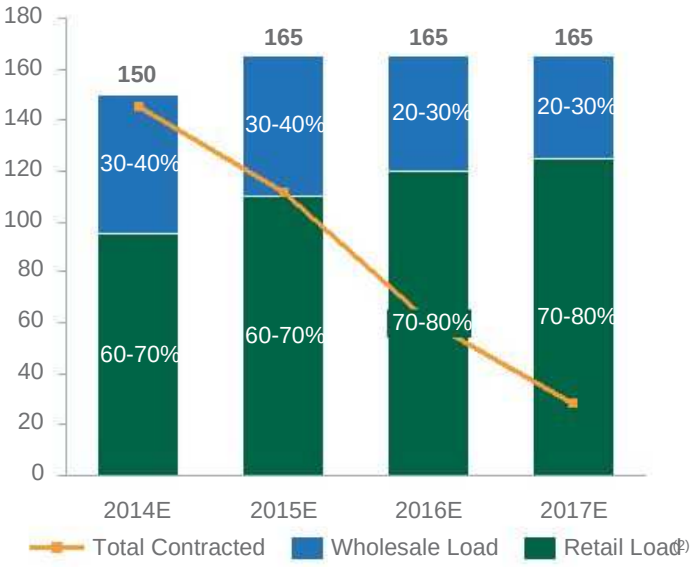
Exelon.

S1-SSA-0009 - 10263

Electric Load Serving Business: Growth Targets(1)

Commercial Load

2014 – 2017 TWh

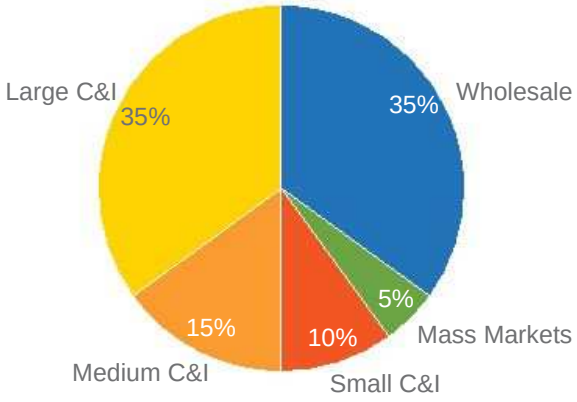


Note: Index load expected to be 20% to 30% of total forecasted retail load

Expected growth in volumes and margins on the back of a sustainable platform

Load Split by Customer Class

(2014 TWh)



C&I = Commercial & Industrial

Customer Type	Load Size
Mass Markets	<1,000 MWhs per year
Small C&I	1,001-5,000 MWhs per year
Medium C&I	5,001-25,000 MWhs per year
Large C&I	>25,000 MWhs per year

A diverse set of customers enhances portfolio management opportunities

(1) Does not include Integrys acquisition

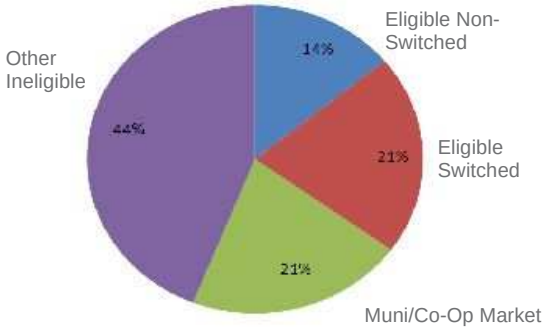
Exelon

S1-SSA-0009 - 10264

Electric Load Serving Business: Market Landscape

Constellation Active Retail Electric Markets (1)

Total U.S. Power Market 2014 (~3,700 TWh load) (2)



Market Landscape (2)

Conditions have improved in many markets as impacts of the Polar Vortex have played out

- During 2014, we have experienced improved margins, contract tenors, and renewal rates

Competitive Retail Market Expected to Grow Faster Than Overall Market 2014-2017

- Underlying 1% load growth across the U.S.
- C&I switched market to grow by about 8%
- Residential switched market to grow by about 7%

Retail Mergers & Acquisitions Activity has Increased

- EXC has been active in evaluating opportunities, and acquired Integrys Energy Services earlier this year
- 34 deals announced 2014 YTD, compared to 27 deals in 2013, and 23 deals in 2012

Existing suppliers continue to expand market footprint and product portfolio

- Existing suppliers entered 23 new markets in 2014 YTD
- Energy efficiency among most popular for cross-selling opportunities

Improving market driving higher margins and better contract terms

(1) Does not include Integrys acquisition (2) Sources are EIA, DNV GL, and internal estimates

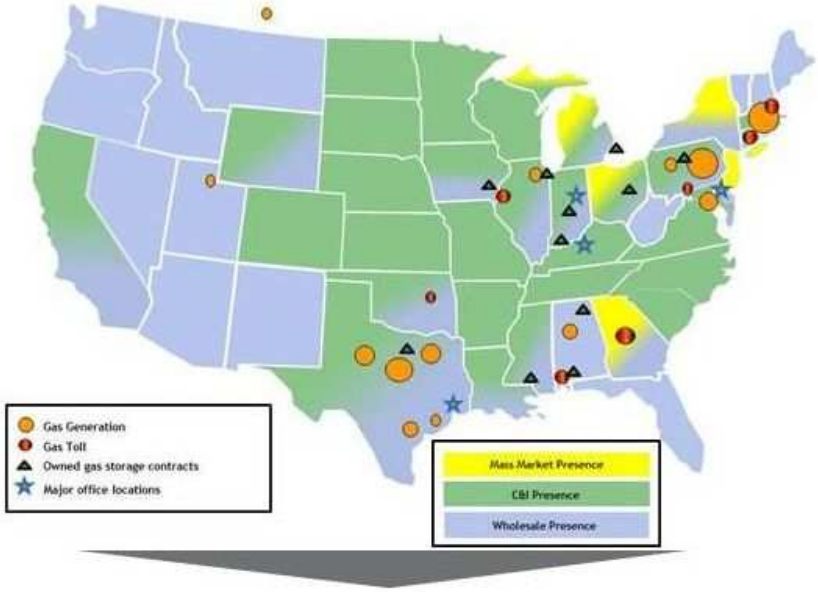
S1-SSA-0009 - 10265

Natural Gas Serving Business: Marketing Platform

Constellation Active Natural Gas Markets



Supply	~4-6 Bcf per day delivered in competitive markets
Transportation	Active shipper on more than 45 interstate pipelines on a daily basis
Trading	Active participant in all major supply basins, markets, and trading points in North America
Volume Management	Schedule, nominate and balance behind more than 100 LDCs

Market Landscape 2014 -2015(1)

The Polar Vortex provided multiple supply opportunities across the US for natural gas

Nature Gas markets continue to grow on both the consumption and supply side

- Lead by the industrial section, gas consumption is expected to increase by 1.6% in 2014
- EXC expanded it's gas marketing presence through the Integyrs and ETC ProLiance acquisitions

Growing domestic production impacting imports

- Continued downward pressure on natural gas imports from Canada
- Mexican exports, specifically from Eagle Ford, are expected to increase due to growing demand in the electric power sector

LNG imports and exports

- Higher prices in Europe and Asia more attractive to sellers than low US prices
- LNG exports are still a very small part of the total picture; however, the United States will remain a net importer of natural gas because of pipeline imports from Canada

Gas Storage and Pipeline Investment

- Gas inventories continue to drop year over year. Currently 373 BCF lower than last year driving storage opportunities
- Investment in new pipelines supporting key production areas continue grow supported by multiple parties (Equity, LDCs)

Top 10 US Gas Marketer with a growing presence

(1) Source: EIA and internal estimates

Exelon.

S1-SSA-0009 - 10266

Integrys Energy Services Acquisition

Increases Gas and Power Scale

- Significantly increases natural gas portfolio by 150 bcf annually
- Increases power load by 15 TWh

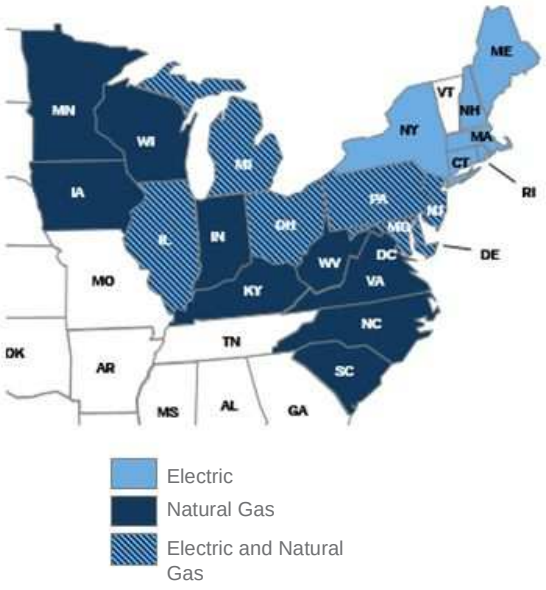
Generation to Load Matching

- Many of the power customers served by Integrys are in regions where Exelon owns significant generation, providing generation to load match benefit
- Mitigates risk of hedging in illiquid markets

Customers

- Adds 1.2 million customers, bringing the total Constellation customer base to approximately 2.5 million homes and businesses

integrys energy services



Exelon.

S1-SSA-0009 - 10267

Upstream E&P Assets

Investment Thesis

- Our Upstream Gas business achieves strong returns (>16% after-tax IRR)
- $110m (~70% utilized) Reserve Based Lending (RBL) facility in place
  - Non-recourse treatment at S&P
- Provides valuable market intelligence in complex natural gas markets

Forecasted Production

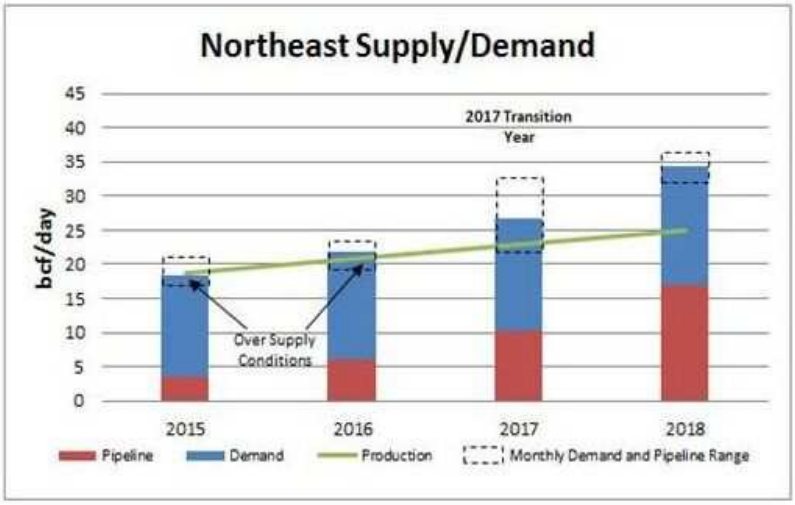
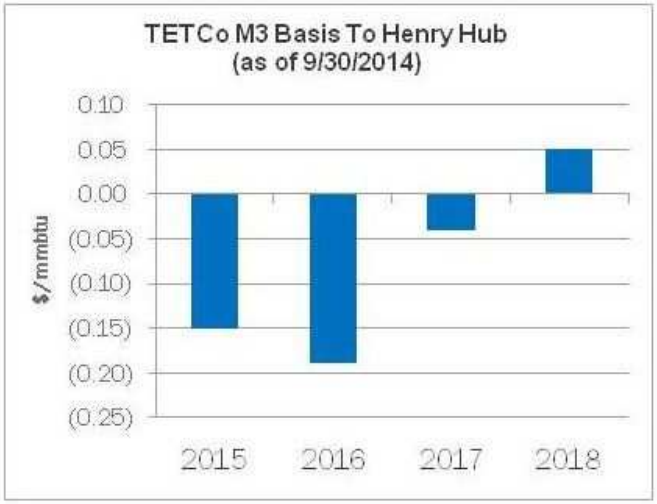
S1-SSA-0009 - 10268

Mid-Atlantic Gas Basis: Improves Starting 2017





- Northeastern U.S. gas production is projected to approach 25 bcf/day by 2018, up from 19 bcf/day in 2015
- Regional demand is projected to reach 18 bcf/day by 2018, up from 15 bcf/day in 2015
- Based upon public announcements, we expect 19 bcf/day of pipeline takeaway capacity by 2018
- Pipeline projects are underway adding takeaway capacity. 2017 is a transition year where timing of pipeline expansions (~9 bcf/day) will play a role in determining local gas prices, but should be more balanced than in prior years. This is consistent with the current forward market which indicates an improving Mid-Atlantic natural gas basis
- Additional pipeline capacity and regional demand will stabilize basis discounts in non winter months and reduce price spikes in the winter

Pipeline capacity expansions and regional demand should balance higher gas production starting in mid-2017, improving Mid-Atlantic gas basis

Notes: Values represent annual averages; Demand includes storage

Exelon

Almost 19 bcf/day of pipeline expansion projects have been announced for completion by the end of 2018

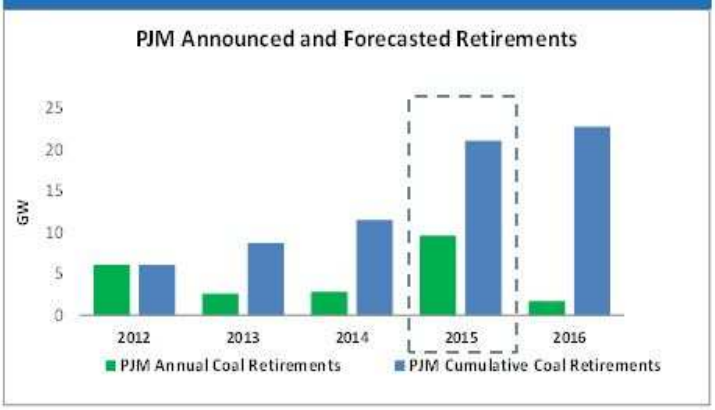
Exelon.

Power Markets - NiHub

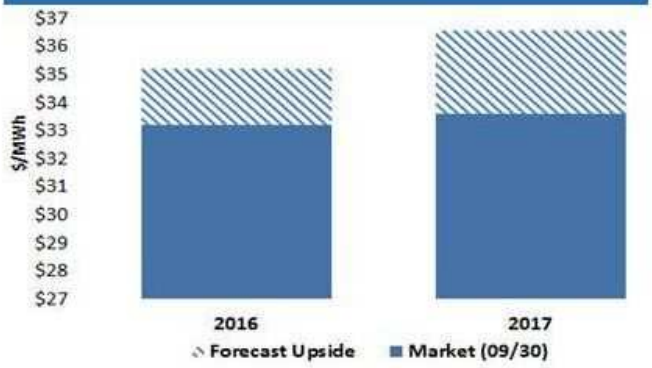
Forward markets continued their upward trend through 2014

- During 2014, strong spot prices have started to reflect the changing nature of the grid in PJM and new reliance on different resources such as NG supply, demand response, and oil peakers
- As a result, we have seen stronger forward power and heat rate curves
- Our portfolio is positioned to take advantage of expected volatility and power price upside
  - 2015 seasonal upside in the second half of the year, especially at NIHUB off peak
  - 2016-2017 average upside of $2-$3/MWh

Expect continued volatility due to incremental coal retirements in the second half of 2015



$2-$3/MWh power price upside in 2016-2017 due to higher dispatch costs and a modest increase in load



Exelon

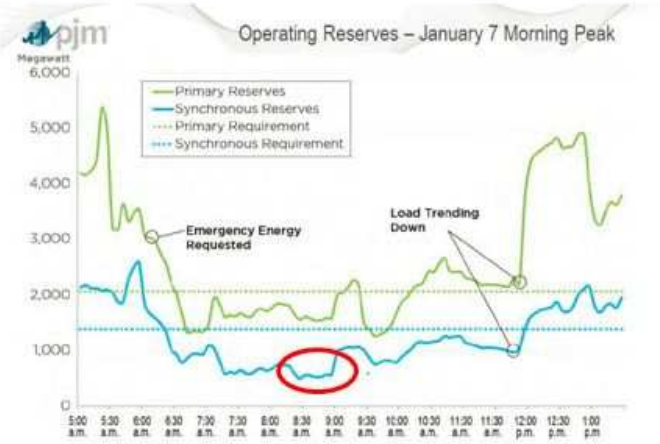
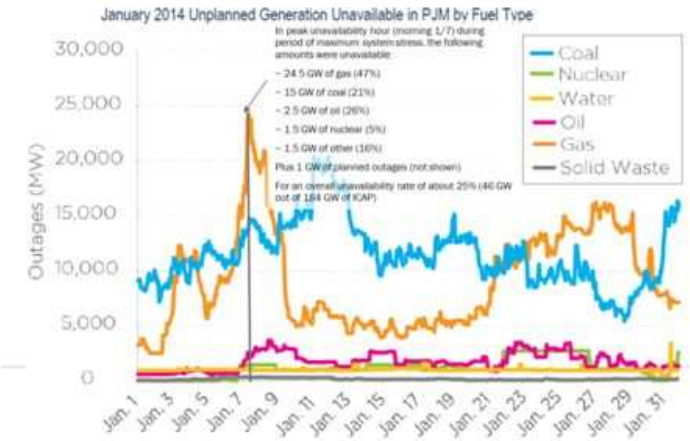
PJM – Working to Address Reliability



Source: PJM Interconnection, "Analysis of Operational Events and Market Impacts During the January 2014 Cold Weather" May 9, 2014, slide 10.



Source: PJM Interconnection, Response to Committee Questions of U.S. House of Representatives Committee on Energy and Commerce, April 18, 2014, Figure 4.

The polar vortex in the winter of 2014 highlighted generator reliability concerns that PJM is now working to address

Source: Northbridge Analysis based on PJM data

Exelon.

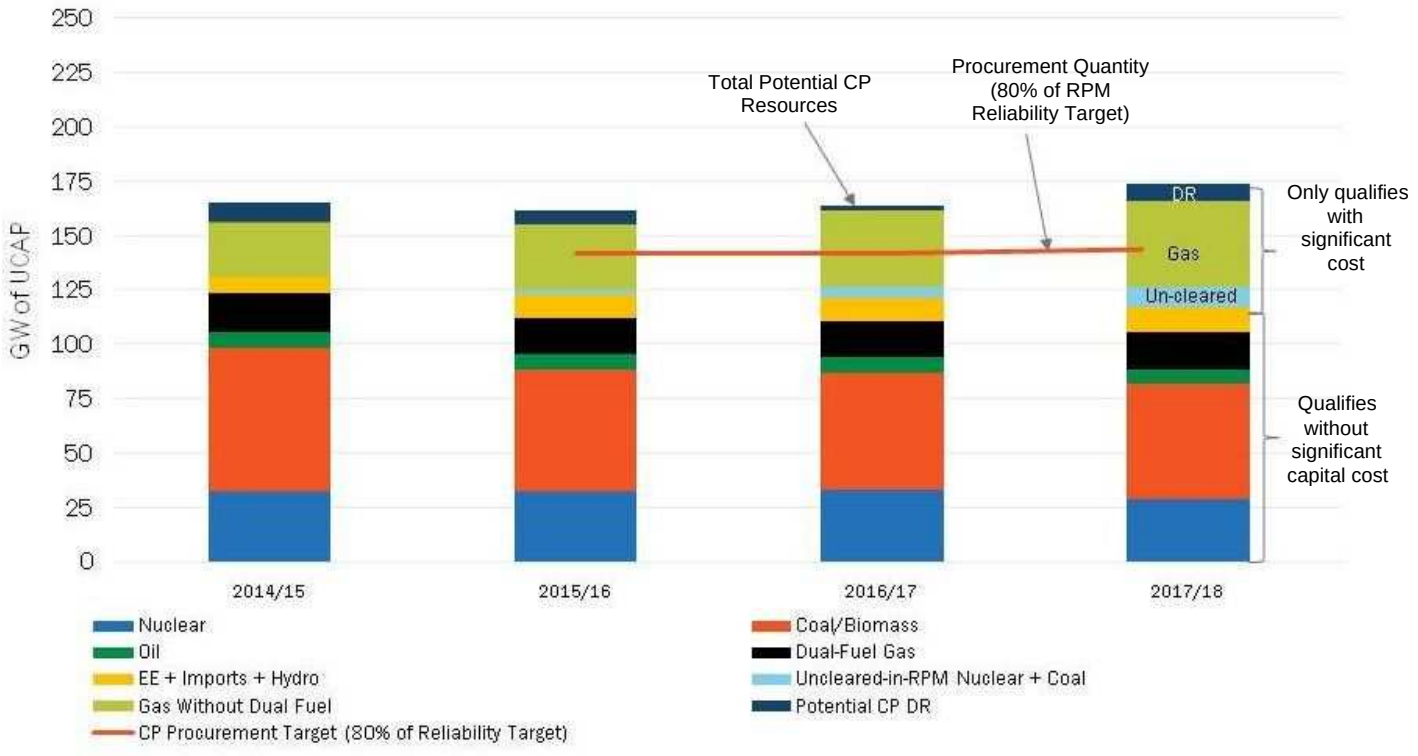
PJM's Proposed Solution - Capacity Performance Proposal

- PJM recognizes that generation resources procured through its existing forward capacity market (RPM) may not be sufficient to meet future load conditions, especially winter peak
  - Additionally, current revenues and penalty structures are insufficient to provide incentives for necessary investment to maintain highly available capacity
- PJM released a revised "Capacity Performance" proposal on October 7, 2014 revamping initial reform concepts suggested in August
  - The Capacity Performance concept reforms are intended to encourage commitment of capacity resources that have secure fuel and other performance characteristics to provide PJM confidence that units will be available when dispatched to meet peak summer and winter load
  - PJM proposes to increase the capacity market offer cap to Net CONE, and to substantially raise penalties for performance failure
  - PJM suggests transition mechanisms for delivery years in which it has already made forward capacity procurements (2015-16, 2016-17, and 2017-18)
  - PJM proposes a method of integrating "wholesale" demand response through PJM Load Serving Entities in a manner that would clear by adjusting the RPM demand curve

Exelon

S1-SSA-0009 - 10274

Capacity Performance Impact on PJM Fleet



Exelon's fleet is well positioned to benefit from Capacity Performance due to significant investment in reliability

Source: NorthBridge Analysis; Includes FRR resources/Loads; PJM proposal is to fully procure CP for 2016/17 and 2017/18 but to incrementally procure up to 10 GW of base capacity for 2015/16; Potential 2015/16 all-in CP procurement quantity shown for comparison purposes

Exelon Generation Disclosures

As of September 30, 2014

Portfolio Management Strategy

Strategic Policy Alignment

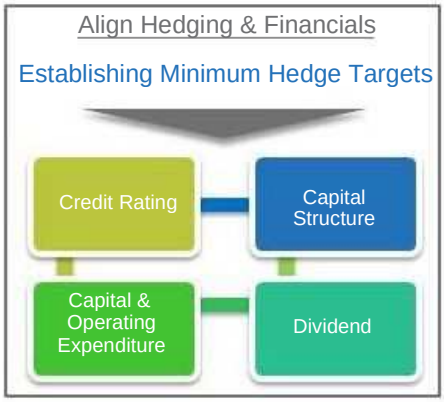
- Aligns hedging program with financial policies and financial outlook
- Establish minimum hedge targets to meet financial objectives of the company (dividend, investment-grade credit rating)
- Hedge enough commodity risk to meet future cash requirements under a stress scenario

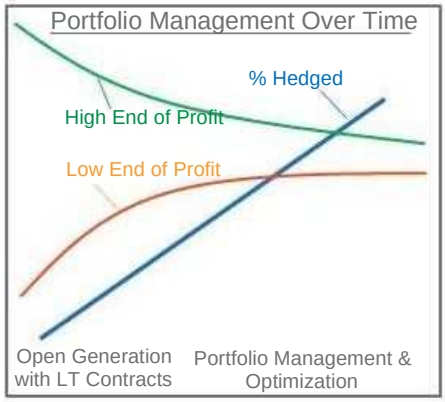
Three-Year Ratable Hedging

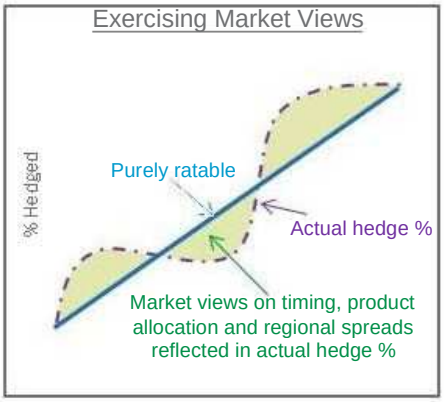
- Ensure stability in near-term cash flows and earnings
- Disciplined approach to hedging
- Tenor aligns with customer preferences and market liquidity
- Multiple channels to market that allow us to maximize margins
- Large open position in outer years to benefit from price upside

Bull / Bear Program

- Ability to exercise fundamental market views to create value within the ratable framework
  - Modified timing of hedges versus purely ratable
  - Cross-commodity hedging (heat rate positions, options, etc.)
  - Delivery locations, regional and zonal spread relationships







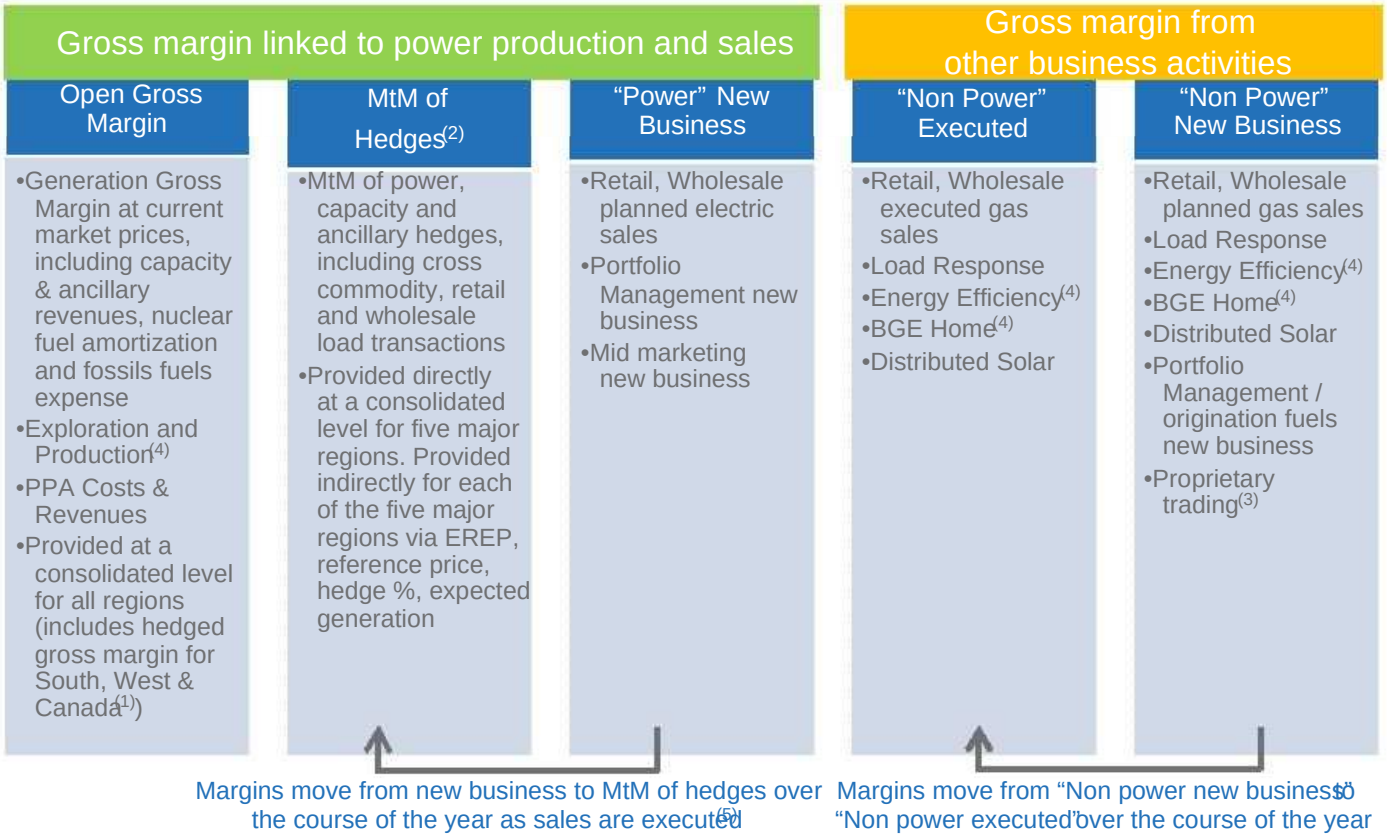
Protect Balance Sheet | **Ensure Earnings Stability** | **Create Value**

Note: Hedge strategy has not changed as a result of recent and pending asset divestitures

Exelon.

S1-SSA-0009 - 10277

Components of Gross Margin Categories



(1) Hedged gross margins for South, West & Canada region will be included with Open Gross Margin and no expected generation, hedge %, EREP or reference prices provided for this region
(2) MtM of hedges provided directly for the five larger regions; MtM of hedges is not provided directly at the regional level but can be easily estimated using EREP, reference price and hedged MWh
(3) Proprietary trading gross margins will generally remain within "Non Power" New Business category and only move to "Non Power" Executed category upon management discretion
(4) Gross margin for these businesses are net of direct "cost of sales"
(5) Margins for South, West & Canada regions and optimization of fuel and PPA activities captured in Open Gross Margin

Exelon.

(1) Expected generation is the volume of energy that best represents our financial exposure through owned or contracted for capacity. Expected generation is based upon a simulated dispatch model that makes assumptions regarding future market conditions, which are calibrated to market quotes for power, fuel, load following products, and options. Expected generation assumes 14 refueling outages in 2014 and 2015, 12 in 2016, and 15 in 2017 at Exelon-operated nuclear plants, and Salem. Expected generation assumes capacity factors of 93.6%, 93.5%, 94.1% and 93.4% in 2014, 2015 , 2016 and 2017 respectively at Exelon-operated nuclear plants, at ownership. These estimates of expected generation in 2015, 2016 and 2017 do not represent guidance or a forecast of future results as Exelon has not completed its planning or optimization processes for those years. (2) Excludes EDF's equity ownership share of CENG Joint Venture. (3) Percent of expected generation hedged is the amount of equivalent sales divided by expected generation. Includes all hedging products, such as wholesale and retail sales of power, options and swaps. (4) Effective realized energy price is representative of an all-in hedged price, on a per MWh basis, at which expected generation has been hedged. It is developed by considering the energy revenues and costs associated with our hedges and by considering the fossil fuel that has been purchased to lock in margin. It excludes uranium costs and RPM capacity revenue, but includes the mark-to-market value of capacity contracted at prices other than RPM clearing prices including our load obligations. It can be compared with the reference prices used to calculate open gross margin in order to determine the mark-to-market value of Exelon Generation's energy hedges. (5) Spark spreads shown for ERCOT and New England. (6) Reflects the divestiture impact of Fore River, Quail Run and West Valley. Does not include divestitures of Keystone/Conemaugh or the Integrys acquisition

Exelon.

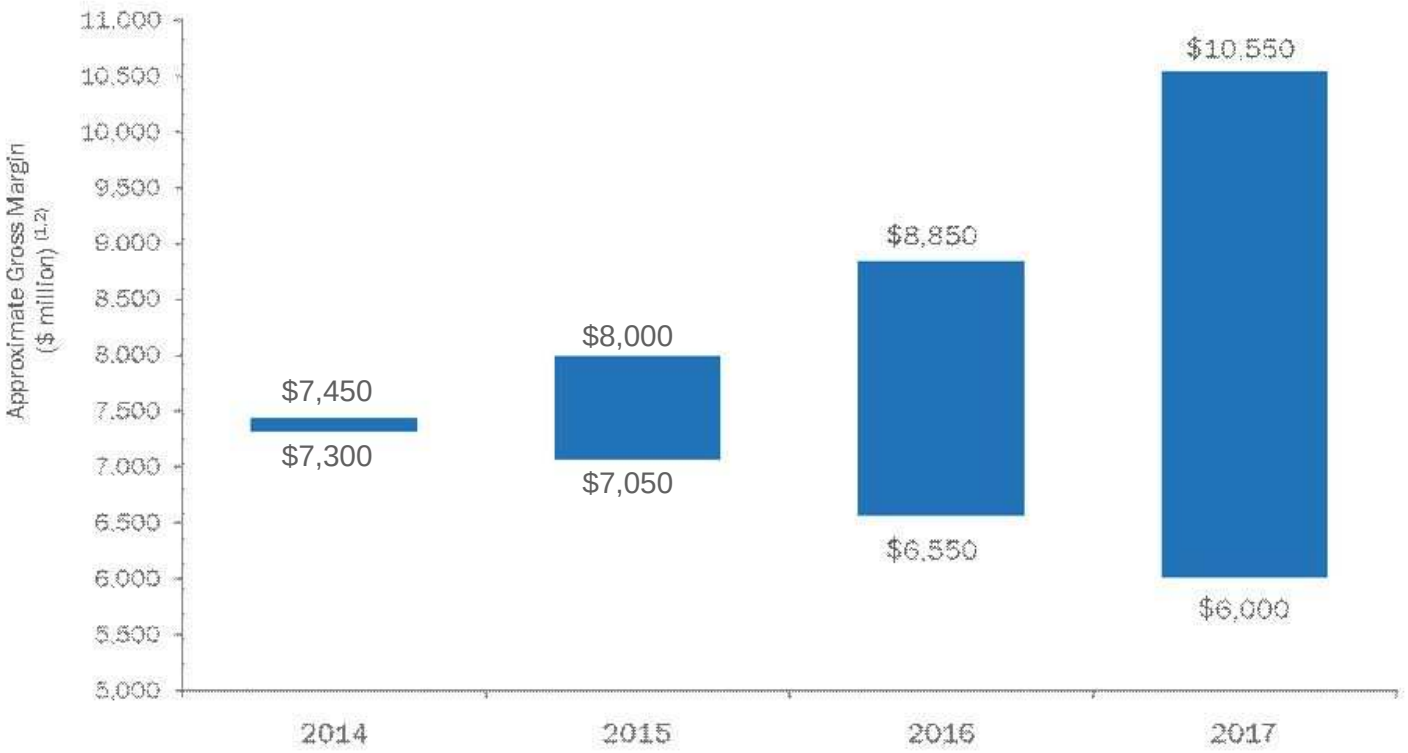
ExGen Hedged Gross Margin Sensitivities

Gross Margin Sensitivities (With Existing Hedges)[1]	2014	2015	2016	2017
Henry Hub Natural Gas ($/MMbtu)				
+ $1/Mmbtu	$15	$120	$440	$830
- $1/Mmbtu	$10	$(60)	$(400)	$(750)
NiHub ATC Energy Price				
+ $5/MWh	$-	$85	$265	$390
- $5/MWh	$-	$(85)	$(260)	$(390)
PJM-W ATC Energy Price				
+ $5/MWh	$(5)	$30	$165	$260
- $5/MWh	$5	$(25)	$(155)	$(255)
NYPP Zone A ATC Energy Price				
+ $5/MWh	$-	$5	$15	$25
- $5/MWh	$-	$(10)	$(20)	$(25)
Nuclear Capacity Factor				
+/- 1%	+/- $15	+/- $50	+/- $45	+/- $45

(1) Based on September 30, 2014 market conditions and hedged position; Gas price sensitivities are based on an assumed gas-power relationship derived from an internal model that is updated periodically; Power prices sensitivities are derived by adjusting the power price assumption while keeping all other prices inputs constant; Due to correlation of the various assumptions, the hedged gross margin impact calculated by aggregating individual sensitivities may not be equal to the hedged gross margin impact calculated when correlations between the various assumptions are also considered; Sensitivities based on commodity exposure which includes open generation and all committed transactions; Excludes EDF's equity share of CENG Joint Venture; Reflects the divestiture impact of Fore River, Quail Run and West Valley; Does not include divestiture of Keystone/Conemaugh or the Integrys acquisition

Exelon

Exelon Generation Hedged Gross Margin Upside/Risk



(1) Represents an approximate range of expected gross margin, taking into account hedges in place, between the 5th and 95th percent confidence levels assuming all unhedged supply is sold into the spot market; Approximate gross margin ranges are based upon an internal simulation model and are subject to change based upon market inputs, future transactions and potential modeling changes; These ranges of approximate gross margin in 2015, 2016 and 2017 do not represent earnings guidance or a forecast of future results as Exelon has not completed its planning or optimization processes for those years; The price distributions that generate this range are calibrated to market quotes for power, fuel, load following products, and options as of September 30, 2014

(2) Gross Margin Upside/Risk based on commodity exposure which includes open generation and all committed transactions

Note: Reflects the divestiture impact of Fore River, Quail Run and West Valley; Does not include divestiture of Keystone/Conemaugh or the Integrys acquisition

Exelon.

Illustrative Example of Modeling Exelon Generation 2015 Gross Margin

Row	Item	Midwest	Mid-Atlantic	ERCOT	New York	New England	South, West & Canada
(A)	Start with fleet-wide open gross margin	← $6.75 billion →					
(B)	Expected Generation (TWh)	97.0	71.3	16.4	9.4	7.1	
(C)	Hedge % (assuming mid-point of range)	84.5%	89.5%	100.5%	88.5%	83.5%	
(D=B*C)	Hedged Volume (TWh)	82.0	63.8	16.4	8.3	5.9	
(E)	Effective Realized Energy Price ($/MWh)	$33.50	$42.50	$8.50	$42.50	$11.50	
(F)	Reference Price ($/MWh)	$33.70	$42.75	$6.47	$42.14	$8.95	
(G=E-F)	Difference ($/MWh)	$(0.20)	$(0.25)	$2.03	$0.36	$2.55	
(H=D*G)	Mark-to-market value of hedges ($ million)(1)	$(15) million	$(15) million	$30 million	$5 million	$15 million	
(I=A+H)	Hedged Gross Margin ($ million)	$6,750 million					
(J)	Power New Business / To Go ($ million)	$400 million					
(K)	Non-Power Margins Executed ($ million)	$100 million					
(L)	Non-Power New Business / To Go ($ million)	$300 million					
(N=I+J+K+L)	Total Gross Margin(2)	$7,550 million					

(1) Mark-to-market rounded to the nearest $5 million
(2) Total Gross Margin (Non-GAAP) is defined as operating revenues less purchased power and fuel expense, excluding revenue related to decommissioning, gross receipts tax, Exelon Nuclear Partners and variable interest entities; Total Gross Margin is also net of direct cost of sales for certain Constellation businesses.
Note: Reflects the divestiture impact of Fore River, Quail Run and West Valley; Does not include divestiture of Keystone/Conemaugh

Exelon.

Generation

Exelon Generation Fleet

National Scope

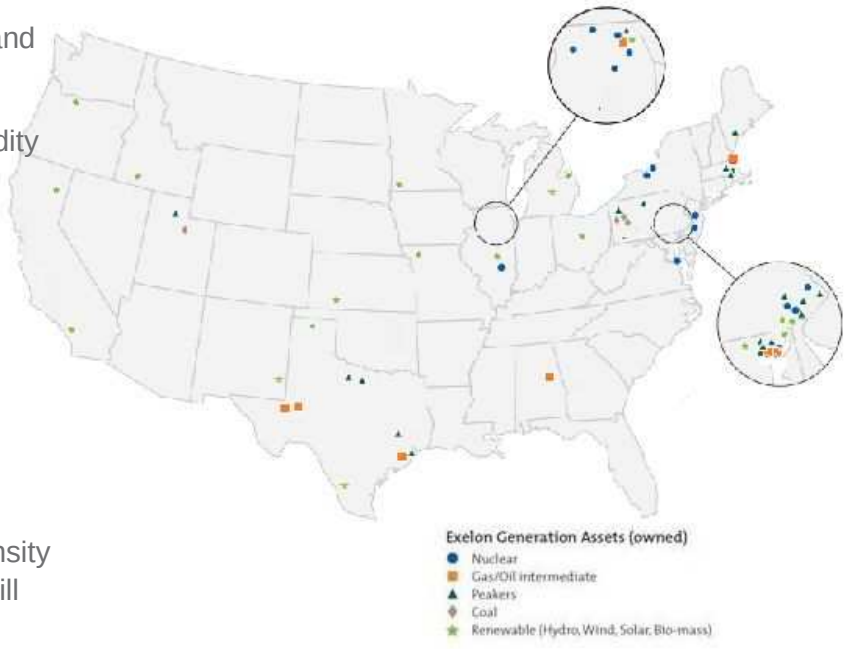
- Power generation assets in 20 states and Canada
- Low-cost generation capacity provides unparalleled leverage to rising commodity prices

Large and Diverse

- 32 GW of diverse generation[1]
  - 19 GW of Nuclear
  - 8 GW of Gas
  - 2 GW of Hydro
  - 2 GW of Oil
  - 1 GW of Wind/Solar/Other

Clean

- One of nation's cleanest fleets as measured by CO_2, SO_2 and NO_x intensity
- Less than 5% of generation capacity will require capital expenditures to comply with Air Toxic rules



A clean and diverse portfolio that is well positioned for environmental upside from EPA regulations

(1) Reflects owned generation less announced divestitures of Fore River, Quail Run and West Valley and Keystone Conemaugh

Exelon

Exelon Nuclear Fleet Overview (including CENG and Salem)

	Plant Location	Type/ Containment	Water Body	License Extension Status / License Expiration (1)	Ownership	Spent Fuel Storage/ Date to lose full core discharge capacity (2)
Midwest	Braidwood, IL (Units 1 and 2)	PWR Concrete/Steel Lined	Kankakee River	Filed application in May 2013 (decision expected in 2015)/ 2026, 2027	100%	Dry Cask
	Byron, IL (Units 1 and 2)	PWR Concrete/Steel Lined	Rock River	Filed application in May 2013 (decision expected in 2015)/ 2024, 2026	100%	Dry Cask
	Clinton, IL (Unit 1)	BWR Concrete/Steel Lined / Mark III	Clinton Lake	2026	100%	Dry Cask (2016)
	Dresden, IL (Units 2 and 3)	BWR Steel Vessel / Mark I	Kankakee River	Renewed / 2029, 2031	100%	Dry Cask
	LaSalle, IL (Units 1 and 2)	BWR Concrete/Steel Lined / Mark II	Illinois River	Application will be filed Dec 2014(decision expected 2017)/2022, 2023	100%	Dry Cask
	Quad Cities, IL (Units 1 and 2)	BWR Steel Vessel / Mark I	Mississippi River	Renewed / 2032	75% Exelon, 25% Mid-American Holdings	Dry Cask
Mid-Atlantic	Limerick, PA (Units 1 and 2)	BWR Concrete/Steel Lined / Mark II	Schuylkill River	Renewed/ 2044, 2049 (5)	100%	Dry Cask
	Oyster Creek, NJ (Unit 1)	BWR Steel Vessel / Mark I	Barnegat Bay	Renewed / 2029(3)	100%	Dry Cask
	Peach Bottom, PA (Units 2 and 3)	BWR Steel Vessel / Mark I	Susquehanna River	Renewed / 2033, 2034	50% Exelon, 50% PSEG	Dry Cask
	TMI, PA (Unit 1)	PWR Concrete/Steel Lined	Susquehanna River	Renewed / 2034	100%	2023
	Salem, NJ (Units 1 and 2)	PWR Concrete/Steel Lined	Delaware River	Renewed / 2036, 2040	42.6% Exelon, 57.4% PSEG	Dry Cask
CENG	Calvert Cliffs, MD (Units 1and 2)	PWR Concrete/Steel Lined	Chesapeake Bay	Renewed / 2034, 2036	100% CENG(4)	Dry Cask
	R.E. Ginna, NY (Unit 1)	PWR Concrete/Steel Lined	Lake Ontario	Renewed / 2029	100% CENG(4)	Dry Cask
	Nine Mile Point, NY (Units 1 and 2)	BWR Steel Vessel / Mark I Concrete/Steel Vessel/ Mark II	Lake Ontario	Renewed / 2029, 2046	100% CENG(4) / 82% CENG(4), 18% Long Island Power Authority	Dry Cask

(1) Operating license renewal process takes approximately 4--5 years from commencement until completion of NRC review
(2) The date for loss of full core reserve identifies when the on-site storage pool will no longer have sufficient space to receive a full complement of fuel from the reactor core; Dry cask storage will be in operation at those sites prior to losing full core discharge capacity in their on-site storage pools
(3) On December 8, 2010, Exelon announced that it will permanently cease generation operations at Oyster Creek by December 31, 2019. Oyster Creek's current NRC license expires in 2029
(4) Exelon Generation has a 50.01% ownership interest in CENG (Constellation Energy Nuclear Group, LLC). Electricite de France SA (EDF) has a 49.99% ownership interest in CENG
(5) Limerick Received a 20 year license renewal in October 2014

Exelon.

Investment in New Generation Technology

Exelon is investing in an innovative, carbon-free, gas-fired technology through an investment in NET Power to support the development of an 11.4MWe demonstration facility to prove the technology

NET Power's system has the potential to transform both the electricity and the oil and gas markets. Using a novel, supercritical CO_2 - power cycle known as the Allam Cycle, the technology is projected to match or lower the current cost of electricity from natural gas generation technologies while also capturing all carbon dioxide emissions. The system produces carbon dioxide as a low-cost, pipeline-quality by-product as opposed to a gas emitted through a stack in conventional power plants. The produced CO_2 is ready for sequestration or use in enhanced oil recovery.

333-85496	**EXELON GENERATION COMPANY, LLC** **(a Pennsylvania limited liability company)** 300 Exelon Way Kennett Square, Pennsylvania 19348-2473 (610) 765-5959	23-3064219

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

☐ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

☐ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

☐ Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Section 1 – Registrant's Business and Operations

Item 1.01 Entry into a Material Definitive Agreement.

On November 18, 2016, two subsidiaries of Constellation Energy Nuclear Group, LLC (CENG) and a subsidiary of Entergy Corporation entered into three separate agreements with the New York State Energy Research & Development Authority (NYSERDA) for the procurement of Zero Emission Credits (ZECs) pursuant to the August 1, 2016, New York Public Service Commission order approving the New York Clean Energy Standard (NYSERDA Agreements). The objective of the program is to preserve the environmental attributes of zero-emissions nuclear-powered generating facilities.

The NYSERDA Agreements extend from April 1, 2017 through March 31, 2029. Under the NYSERDA Agreements, ZECs will be procured in six, two-year tranches. Pricing for each tranche will be administratively determined based on the USIWG Social Cost of Carbon (escalating over the term), less a fixed baseline for carbon pricing already captured through the Regional Greenhouse Gas Initiative ($10.41/short ton). Pricing for Tranche 1 is $17.48/MWh.

The quantity of ZECs to be purchased by NYSERDA each year under all three NYSERDA Agreements is capped at an amount that represents the verifiable historic contribution the facility has made to the clean energy resource mix. Each Load Serving Entity is required to purchase an amount of ZECs equivalent to its load ratio share of the total electric energy load in the New York Control Area. Cost recovery from ratepayers will be incorporated into the commodity charges on customer bills.

The description of the NYSERDA Agreements referred to above is not complete and is qualified in its entirety by reference to the agreements. Copies of the two NYSERDA Agreements with subsidiaries of CENG are attached as exhibits 10.1 and 10.2, respectively, which are incorporated herein by reference.

Cautionary Statements Regarding Forward-Looking Information

This report contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, that are subject to risks and uncertainties. The factors that could cause actual results to differ materially from the forward-looking statements made by Exelon Corporation and Exelon Generation Company, LLC include those factors discussed herein, as well as the items discussed in (1) Exelon's 2015 Annual Report on Form 10-K in (a) ITEM 1A. Risk Factors, (b) ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) ITEM 8. Financial Statements and Supplementary Data: Note 23; (2) Pepco Holdings, Inc.'s 2015 Annual Report on Form 10-K in (a) ITEM 1A. Risk Factors, (b) ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) ITEM 8. Financial Statements and Supplementary Data: Note 16; (3) Exelon's Third Quarter 2016 Quarterly Report on Form 10-Q in (a) Part II, Other Information, ITEM 1A. Risk Factors; (b) Part 1, Financial Information, ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) Part I, Financial Information, ITEM 1. Financial Statements: Note 18 and (4) other factors discussed in filings with the SEC by Exelon and Generation. Readers are cautioned not to place undue reliance on these forward-looking statements, which apply only as of the date of this report. Exelon and Generation do not undertake any obligation to publicly release any revision to its forward-looking statements to reflect events or circumstances after the date of this report.

This Agreement is entered into as of November 18, 2016 (the "Contract Date") by and between the New York State Energy Research and Development Authority ("NYSERDA"), a public benefit corporation, having a principal business address of 17 Columbia Circle, Albany, New York 12203, and Nine Mile Point Nuclear Station, LLC ("Seller"), a Delaware limited liability company, having a principal business address of 1310 Point Street, Baltimore, MD 21231. NYSERDA and Seller are each referred to herein as a "Party" and are collectively referred to herein as the "Parties." All capitalized terms shall have the meanings ascribed to them in this Agreement.

RECITALS

WHEREAS, on August 1, 2016 the New York State Public Service Commission ("PSC" or the "Commission") adopted a Clean Energy Standard ("CES") program that is intended to achieve the State of New York's environmental, public health, climate policy and economic goals, and to preserve carbon-free attributes of certain existing nuclear generation resources as a bridge to the clean energy future (Case 15-E-0302; Proceeding on Motion of the Commission to Implement a Large-Scale Renewable Program and a Clean Energy Standard , "Order Adopting a Clean Energy Standard," issued and effective August 1, 2016) (the "CES Order"); and

WHEREAS, the CES Order established, as part of the CES, a ZEC Program (as defined below), and established a mechanism for the purchase by NYSERDA of the ZECs (as defined below) of eligible nuclear zero-carbon electric generating facilities that elect to participate in the ZEC Program where a public necessity to encourage the continued creation of the attributes is demonstrated; and

WHEREAS, in accordance with criteria set forth in the CES Order, the Commission has found that there is a public necessity to provide ZEC payments to three nuclear facilities, including the Facility (as defined below); and

WHEREAS, Seller has elected for the Facility to participate in the ZEC Program; and

WHEREAS, the CES Order provides a price to be paid by NYSERDA to Seller for each ZEC delivered to NYSERDA during Tranche 1 (as defined below), and a methodology for the calculation and determination of the price in subsequent Tranches; and

WHEREAS, the CES Order imposes an obligation on each Load Serving Entity to invest in the preservation of certain existing at-risk nuclear zero-emissions attributes to serve their retail customers and accordingly directs LSEs to enter into a contractual relationship with NYSERDA for the purchase of ZECs during each ZEC Program year based on initial forecasts of load and a balancing reconciliation at the end of each program year; and

WHEREAS, NYSERDA anticipates that it will enter into backstop agreements (each, a "Backstop Agreement") with each electric distribution company ("EDC"), as proposed in NYSERDA's Petition filed with the Commission on August 25, 2016 and any Commission order related to that Petition, to guarantee that each LSE covers its obligation to buy from NYSERDA the quantity of ZECs required by the CES Order such that NYSERDA is assured that each ZEC purchased from Seller will be sold to LSEs; and

WHEREAS, Seller agrees to sell to NYSERDA, and NYSERDA agrees to purchase from Seller, ZECs associated with the generation of energy by the Facility and pursuant to the ZEC Program, on the terms and subject to the conditions set forth herein; and

WHEREAS, the Parties recognize that the 12-year Contract Term (as defined below) is an essential item of this Agreement and that Seller has made and will make significant investments in the Facility in reliance upon the existence of such Contract Term.

NOW, THEREFORE, for and in consideration of the premises, the mutual promises and agreements set forth herein and other good and valuable consideration, the receipt, sufficiency and adequacy of which are hereby acknowledged, NYSERDA and Seller, each intending to be legally bound, agree as follows:

Article I

Definitions

The terms defined in this Article I, whenever used in this Agreement (including in any Exhibit hereto), shall have the respective meanings indicated below for all purposes of this Agreement (each such meaning to be equally applicable to the singular and the plural forms of the respective terms so defined). All references herein to a Section, Article or Exhibit are to a Section, Article or Exhibit of or to this Agreement, unless otherwise indicated. The words "hereby", "herein", "hereof", "hereunder" and words of similar import refer to this Agreement as a whole (including any Exhibit) and not merely to the specific section, paragraph or clause in which such word appears. The words "include", "includes", and "including" shall be deemed, in every instance, to be followed by the phrase "without limitation." Whenever the context may require, any pronoun shall include the corresponding masculine, feminine and neuter forms. Except as otherwise expressly provided herein, all references to "dollars" and "$" shall be deemed references to the lawful money of the United States of America.

" Agreement " means this ZEC Standard Contract, including Exhibits A (Standard Terms and Conditions For All NYSERDA Agreements); B (NYSERDA Prompt Payment Policy Statement); C (Certification Form); and D (Zero Emissions Credit Pricing), all of which are incorporated herein and made part hereof.

" Annual ZEC Cap Amount " means either (i) 20,603,028 ZECs, if the FitzPatrick Facility is in Commercial Operation but is not included in the Nuclear Group, and the Nuclear Group consists of the Facility and the Ginna Facility, (ii) 18,412,000 ZECs, if a Permanent Cessation of Operations occurs with respect to the FitzPatrick Facility prior to the FitzPatrick Facility becoming included in the Nuclear Group and the Nuclear Group consists of only the Facility and the Ginna Facility, or (iii) 27,618,000 ZECs, if the Nuclear Group consists of the Facility, the Ginna Facility and the FitzPatrick Facility, subject to adjustment pursuant to Section 5.2.

" Annual ZEC Cap Reduction Amount " means 666,666 ZECs, if the Nuclear Group consists of the Facility and the Ginna Facility, and 1,000,000 ZECs, if the Nuclear Group consists of the Facility, the Ginna Facility and the FitzPatrick Facility.

" Applicable Law " means all applicable provisions of all constitutions, treaties, statutes, laws (including the common law), rules, regulations, ordinances, and codes and any order, writ, injunction, decree, judgment, award, decision or determination of any court or any federal, state, municipal or other governmental department, commission, board, bureau, agency, authority or instrumentality, including the NYISO tariff.

" Backstop Agreement " has the meaning set forth in the recitals to this Agreement.

" Business Day " means a day on which Federal Reserve member banks are open for business. A Business Day will begin at 8:00 a.m. and end at 5:00 p.m. Eastern Prevailing Time.

" Certificate " means a certificate as defined in the NYGATS Operating Rules.

" Cessation Tranche Reduction Amount " means 18,412,000 ZECs reduced for a full Tranche which shall be pro-rated for the remaining facilities within a Tranche from the date any facility undergoes a Permanent Cessation of Operations.

" Cessation ZEC Reduction Amount " means 9,206,000 ZECs reduced for a full Contract Year which shall be pro-rated for the remaining facilities within a Contract Year from the date any facility undergoes a Permanent Cessation of Operations.

" Claiming Party " has the meaning set forth in Section 14.2.

" Commercial Operation " means a state of operations under which the Facility is physically generating electric energy, consistent with Good Utility Practice, subject to outages that are consistent with Good Utility Practice, including refueling, planned, and forced outages.

" Common Ownership " means two or more generation facilities being owned, in whole or in part, directly or indirectly, by the same ultimate parent entity or entities.

" Contract Date " has the meaning set forth in the preamble of this Agreement.

" Contract Term " means a term commencing on April 1, 2017 and continuing through March 31, 2029, subject to adjustments pursuant to Article IV (Payment) and Article V (Adjustments).

The Contract Term will be administered in six two-Contract Year Tranches, as follows:

Tranche	1:	April	1,	2017	– March 31,	2019
Tranche	2:	April	1,	2019	– March 31,	2021
Tranche	3:	April	1,	2021	– March 31,	2023
Tranche	4:	April	1,	2023	– March 31,	2025
Tranche	5:	April	1,	2025	– March 31,	2027
Tranche	6:	April	1,	2027	– March 31,	2029

" Contract Year " means a 12-month period commencing on April 1, 2017 and each subsequent 12-month period commencing on an anniversary thereof during the Contract Term.

" EDC " has the meaning set forth in the recitals to this Agreement.

" Effective Date " means the date on which ZEC Standard Contracts have been executed by NYSERDA and each of the owners of the Facility, the FitzPatrick Facility and the Ginna Facility.

" Enjoined " or " Enjoinment " means if any court issues a final, non-appealable order, writ, injunction, decree, judgment, award, decision or determination that invalidates or permanently terminates the ZEC Program or otherwise permanently enjoins, impedes or prevents any Party from participating in the ZEC Program or fulfilling its material obligations under this Agreement, as applicable.

" ESCO " means an "energy service company" making sales of electricity in the State of New York.

" Extended Force Majeure Event " has the meaning set forth in Section 14.3(a).

" Facility " means the Nine Mile Point nuclear facility consisting of the Nine Mile Unit 1 and Unit 2 facilities, located in Oswego, New York (PTID 23575 and 23744, respectively).

" Facility Revenue Meters " means (i) the two meters on the high side of the Unit 1 main generator (Gen PTID: 23575) step-up transformers just prior to the Unit 1 main output breakers R915 and R925 and (ii) the two meters on the high side of the Unit 2 main generator (Gen PTID: 23744) step-up transformers just prior to the Unit 2 main output breakers R230 and R925, which are the meters for the Facility designated by the NYISO for measuring the output of the Facility that is referenced in Article V of the NYGATS Operating Rules as the Facility's "Revenue-Quality Meter."

" Final CES Order " has the meaning set forth in Section 13.3.

" FitzPatrick Facility " means the James A. FitzPatrick nuclear generation facility located in Scriba, New York (PTID 23598).

" Force Majeure Event " has the meaning set forth in Section 14.1.

" Force Majeure Remedy Plan " has the meaning set forth in Section 14.3(a).

" Ginna Facility " means the R.E. Ginna nuclear generation facility located in Ontario, New York (PTID 23603).

" Good Utility Practice " means any of the practices, methods or acts engaged in or approved by a significant portion of the electric utility or the nuclear electric power generation industry in the United States during the relevant time period, or any of the practices, methods or acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was

made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice or method, or act to the exclusion of all others, but rather to delineate acceptable practices, methods, or acts generally accepted in the region.

" Governmental Authority " Any federal, state, local, municipal, judicial or other government or any other governmental, quasi-governmental, regulatory or administrative agency, commission, court or other authority (including for federal purposes the NYISO) lawfully exercising or entitled to exercise any administrative, executive, judicial, legislative, police, policy, regulatory or taxing authority or power.

" Load-Serving Entity " or " LSE " means any entity or individual that sells retail commodity electricity supply to an end-use customer located in New York State, including any ESCO and each electric distribution company regulated by the PSC, serving in their roles as electric commodity supplier of last resort, jurisdictional municipal utilities, community choice aggregators not otherwise served by an ESCO, customers purchasing power directly from the NYISO, and the Long Island Power Authority and the New York Power Authority to the extent the Long Island Power Authority and the New York Power Authority have voluntarily agreed to act as LSEs.

" LSE Agreement " means a contract between NYSERDA and an LSE as contemplated in the CES Order, pursuant to which NYSERDA shall sell, and LSEs shall purchase, ZECs.

" MWh " means a unit for measuring power that is equivalent to 1,000 kilowatts of electricity used continuously for one hour.

" NRC " means the U.S. Nuclear Regulatory Commission and any successor agency thereto.

" Nuclear Group " means a group of nuclear generating facilities in New York State, consisting of the Facility and the Ginna Facility; provided that the "Nuclear Group" shall also include the FitzPatrick Facility if the FitzPatrick Facility comes under Common Ownership with the Facility and the Ginna Facility.

" NYGATS " means the New York Generation Attribute Tracking System, established by NYSERDA pursuant to the Public Authorities Law.

" NYGATS Operating Rules " means the rules, as may be amended from time to time, that govern the operation of the NYGATS by NYSERDA and its designated NYGATS Administrator, and the participation in and use of the NYGATS by users.

" NYISO " means the New York Independent System Operator, Inc.

" NYISO Rules " means the NYISO tariff, and all NYISO manuals, rules, procedures, agreements or other documents governing the participation of market participants in the NYISO markets as in effect from time to time.

" NYSERDA Prompt Payment Policy " has the meaning set forth in Exhibit B.

" NYSERDA ZEC Account " means the account established in NYGATS into which Seller shall deliver (by designation for transfer in accordance with the NYGATS Operating Rules) ZECs under the terms and conditions of this Agreement.

" Non-Claiming Party " has the meaning set forth in Section 14.2.

" Permanent Cessation of Operations " means the date upon which the Facility actually permanently shuts down and ceases operations following the filing of a Notice of Permanent Cessation of Operations with respect to a specific nuclear generation facility with the NRC pursuant to 10 C.F.R. Section 50.82(a)(1)(i).

" Public Authorities Law " means the Public Authority Act codified in the Consolidated Laws of New York at Public Authorities Law Sec. 1000 *et seq.*

" Seller ZEC Account " means the account established in the NYGATS for the deposit with NYGATS of ZECs created under the NYGATS Operating Rules for the Facility from which account Seller shall deliver ZECs(by designation for transfer in accordance with the NYGATS Operating Rules) to the NYSERDA ZEC Account under the terms and conditions of this Agreement.

" Threshold Amount " has the meaning set forth in Section 5.2(a).

" Tranche " means a two-Contract Year period for the sale of the ZECs, as set forth in the definition of "Contract Term" above.

" Tranche Cap Amount " means: (i) 41,206,056 ZECs, if the FitzPatrick Facility is in Commercial Operation and the Nuclear Group consists of the Facility and the Ginna Facility, (ii) 36,824,000 ZECs, if a Permanent Cessation of Operations occurs with respect to the FitzPatrick Facility prior to the FitzPatrick Facility becoming part of the Nuclear Group, and (iii) 55,236,000 ZECs, if the Nuclear Group consists of the Facility, the Ginna Facility and the FitzPatrick Facility.

" Tranche Cap Reduction Amount " means 1,333,333 ZECs, if the Nuclear Group consists of the Facility and the Ginna Facility, and 2,000,000 ZECs, if the Nuclear Group consists of the Facility, the Ginna Facility and the FitzPatrick Facility.

" ZEC Price " means the price that NYSERDA shall pay for each ZEC delivered by Seller (by designation for transfer in accordance with the NYGATS Operating Rules) to the NYSERDA ZEC Account during the Contract Term. The ZEC Price shall be as provided in Exhibit D.

" ZEC Program " means the zero-emissions credit requirement program as established by the PSC through the CES Order and administered by NYSERDA and its designated NYGATS administrator in accordance with the NYGATS Operating Rules.

" ZEC Quantity " means, with respect to any Contract Year, the lesser of (a) the quantity of ZECs produced by the Nuclear Group in such Contract Year and (b) the Annual ZEC Cap Amount that applies to the Nuclear Group for such Contract Year, subject to adjustments pursuant to Article IV (Payment) and Article V (Adjustments).

" Zero Carbon Electric Generating Facility " means an electric generating facility that uses energy released in the course of nuclear fission to generate electricity.

" Zero Emissions Credit " or "ZEC " means a credit for the zero-emissions attributes of one (1) MWh of electric energy production by an eligible Zero Carbon Electric Generating Facility, such as the Facility, represented by a Certificate, which credit is purchased by NYSERDA or a LSE from Seller to reduce carbon consumption by retail electric consumers in New York State, such purchases to be accomplished through NYGATS pursuant to the NYGATS Operating Rules.

Article II

Purchase and Sale of Rights to ZECs

Section 2.1. Eligibility . The Parties' respective obligations under this Agreement are expressly conditioned on the eligibility of Seller's Facility under the ZEC Program, as of the Effective Date.

Section 2.2. ZEC Sales . On the terms and subject to the conditions and provisions of this Agreement, Seller shall sell, assign, transfer, convey, and deliver to NYSERDA, and NYSERDA shall purchase, confirm transfer, and receive from Seller, all right, title and interest in ZECs measured at the Facility Revenue Meters and created in the Seller ZEC Account by NYGATS during the Contract Term at the ZEC Price and in accordance with the NYGATS Operating Rules. With respect to each Contract Year during the Contract Term, NYSERDA shall purchase from Seller such ZECs, up to the ZEC Quantity among the applicable Nuclear Group for such Contract Year, but shall not be obligated to purchase such ZECs over and above such ZEC Quantity. Seller shall, for the duration of the Contract Term, and subject to the terms and conditions of this Agreement, produce zero-emissions attributes, and, upon receipt of ZECs in the Seller ZEC Account, transfer such ZECs to the NYSERDA ZEC Account. For the avoidance of doubt, and except as set forth in Section 2.5, ZECs are the only product Seller is selling and NYSERDA is buying from Seller under this Agreement. Seller is not selling and NYSERDA is not purchasing any electricity or any capacity, energy, or ancillary services or other products or attributes (other than ZECs) associated with the Facility.

Section 2.3. ZEC Rights and Use . Such right, title and interest shall include perpetual and exclusive rights to all ZECs transferred under this Agreement, including the exclusive rights to claim or represent, consistent with New York State Environmental Disclosure rules: (a) that the ZECs are associated with energy that was generated by the Facility; and (b) that New York State and or the ZEC Program is responsible for the environmental benefits including reductions in emissions and/or other pollution or any other environmental benefit resulting from the generation of the energy associated with ZECs purchased hereunder.

Section 2.4. Risk of Loss . Title and risk of loss of ZECs will transfer from Seller to NYSERDA upon completion of (a) delivery by Seller of such ZECs into the NYSERDA ZEC Account (by designation for transfer in accordance with the NYGATS Operating Rules) and (b) receipt by NYSERDA of such ZECs into the NYSERDA ZEC Account (by confirmation of the transfer in accordance with the NYGATS Operating Rules). Each Party is responsible for completing all actions it is required to undertake in NYGATS to establish its respective ZEC

account and to cause the transfer of each ZEC in accordance with the NYGATS Operating Rules. Seller shall deliver all right, title and interest in and to the ZECs (by designation for transfer in accordance with the NYGATS Operating Rules) free and clear of all liens, judgments, encumbrances and restrictions created by or on behalf of Seller or any party claiming through Seller.

Section 2.5. Other Attributes . In the event that the Facility becomes eligible for credits under any emission-trading, emissions recordation or other carbon emissions reduction regime other than the CES, NYSERDA may request that Seller take reasonable actions necessary to apply for and secure such title to such credits, to the maximum extent to which the Facility is entitled. Seller shall provide NYSERDA with evidence of taking such actions. NYSERDA and Seller shall reasonably cooperate to cause title to such credits to be conveyed to NYSERDA after such title is secured by Seller.

Section 2.6. Equivalent Programs . This Agreement may be modified or terminated by the Commission if there is a national, NYISO, or other program instituted that pays for or internalizes the value of the Facility's zero-emissions attributes in a manner that adequately replicates the economics of the ZEC Program such that the Commission in its sole discretion is satisfied that the zero-emissions attributes are no longer at risk and that discontinuing the ZEC Program can be done in a manner that is fair to both the Facility owners and the New York State ratepayers. Nothing herein shall require NYSERDA or Seller to take any action violative of Applicable Law or an order of court of competent jurisdiction.

Section 2.7. NYSERDA Assignment of ZECs . NYSERDA shall be free to sell, assign or transfer to any entity, or otherwise encumber, any of the ZECs NYSERDA has acquired under this Agreement, at any time and from time to time, and on such terms and conditions as NYSERDA may desire; *provided* , *however,* NYSERDA's actions must at all times be in accordance with the CES Order.

Section 2.8. Opinions . Within thirty (30) days after the Seller receives written notice from NYSERDA stating that the Effective Date has been achieved, each Party shall deliver to the other Party an opinion of counsel (which may be an opinion of its in-house counsel) containing the opinions supporting the Seller's and NYSERDA's representations and warranties set forth in Sections 9.1(a), (b) and (c) and Sections 10.1(a), (b), (c) and (d), respectively, subject to customary assumptions, qualifications and exceptions.

Section 2.9. ZEC Sales to LSEs . To the extent permitted by the Commission and the CES Order, Seller may sell ZECs directly to LSEs. The Parties shall undertake good faith efforts to negotiate required amendments to this Agreement to account for such ZEC sales by Seller to LSEs.

Article III

ZEC Qualification; Operating Condition

Section 3.1. ZEC Qualification . The Facility's electric generation production shall be measured by the Facility Revenue Meters. Such measurement shall be used as a basis for

determining pursuant to the ZEC Program the amount of ZECs related to such generation to be created and recorded in NYGATS. NYSERDA shall track (a) ZECs through NYGATS and NYSERDA's program administrator and (b) the contribution of such ZECs toward reducing carbon consumption by retail electric consumers in New York State.

Section 3.2. Obligation to Maintain Good Operating Condition . For the duration of the Contract Term, Seller shall: (a) comply with applicable NRC requirements (including insurance requirements); (b) maintain the Facility in Commercial Operation in good operating condition in accordance with Good Utility Practice; and (c) operate the Facility in compliance with the NYISO Rules.

Article IV

Payment

Section 4.1. Invoices . Seller shall submit invoices to NYSERDA on a quarterly basis throughout the Contract Term for ZECs created in the Seller ZEC Account by NYGATS for the preceding three (3) month period in accordance with the NYGATS Operating Rules and delivered (by designation for transfer in accordance with the NYGATS Operating Rules) to the NYSERDA ZEC Account. Each invoice shall be accompanied by a CERTIFICATION FORM, the form of which is set forth as Exhibit C, setting forth the ZECs to be delivered. Invoices shall not be submitted before the fifteenth (15) day of the month following the close of each quarter; invoices submitted prior to the fifteenth (15) day of the month following the close of each quarter shall not be considered proper invoices for purposes of NYSERDA's Prompt Payment Policy. Invoices shall be submitted electronically to NYSERDA's online invoice system at https://services.nyserda.ny.gov/Invoices/ with a copy to the Office of the General Counsel at general.counsel@nyserda.ny.gov. Such invoices shall make reference to the Agreement number shown on page 1 of this Agreement. Such invoices shall include a statement of the amount due and payable by NYSERDA to Seller, which amount shall be calculated in accordance with Section 4.2.

Section 4.2. Payment . NYSERDA will confirm receipt of ZECs in accordance with the NYGATS Operating Rules and make payment to Seller for ZECs delivered, subject to true-up pursuant to Article V. NYSERDA will not confirm receipt and will not pay, with respect to any Contract Year, for ZECs in excess of the applicable ZEC Quantity. The amounts payable shall be calculated as the multiplicative product of (a) the applicable ZEC Price; and (b) the number of ZECs delivered by Seller up to the applicable ZEC Quantity (by designation for transfer in accordance with the NYGATS Operating Rules) to the NYSERDA ZEC Account prior to the date on invoice.

Section 4.3. Prompt Payment Policy . NYSERDA will make payments to the Seller in accordance with and subject to its Prompt Payment Policy Statement, attached hereto as Exhibit B. Such payments shall be made by wire transfer to an account designated by the Seller.

Section 4.4. Limitation on ZEC Purchase Obligation . Notwithstanding any other provision in this Agreement to the contrary, Seller acknowledges that NYSERDA's ability to make payments hereunder is limited to the amount NYSERDA realizes from ZEC sales transactions to LSEs, which obligations will be guaranteed by agreements NYSERDA anticipates entering into with each EDC, in accordance with the CES Order; provided, however, that if so authorized by the Commission, NYSERDA shall use available funds which NYSERDA has rights to use, in accordance with the Commission's authorization to make payments hereunder if the proceeds from such ZEC sales transactions are not sufficient to cover NYSERDA's payment obligations hereunder. Notwithstanding NYSERDA's obligation pursuant to Section 4.5 to enforce agreements to ensure that it can meet its obligations hereunder, NYSERDA shall not be obligated to purchase ZECs to the extent it does not have sufficient funds (from those referenced in the immediately preceding sentence) to do so, including in the event that NYSERDA, LSEs or EDCs are precluded by a court of competent jurisdiction from fulfilling their respective obligations under the ZEC Program. In the event that NYSERDA suffers a cash shortfall in the manner described in this Section 4.4, NYSERDA shall, subject to Applicable Law, use its sole discretion in purchasing reduced ZECs pro rata across all of the facilities to the extent possible.

Section 4.5. LSE Agreements . NYSERDA shall use commercially reasonable efforts, as authorized by the Commission, to enter into and maintain LSE Agreements in sufficient numbers and with sufficient pricing and on such other terms and conditions as NYSERDA may determine necessary or appropriate to enable NYSERDA to fulfill its payment obligations under this Agreement. Subject to Applicable Law, NYSERDA shall use commercially reasonable efforts to enforce its rights and remedies under each of its LSE Agreements and under any related EDC guarantee commitments.

Article V

Adjustments

Section 5.1. True-Up Adjustments . NYSERDA may adjust, including by means of set-off, payments to subsequent invoices consistent with adjustments by NYGATS based on actual metered electric energy production data from the Facility Revenue Meters, associated ZEC creation data and the number of ZECs delivered and received; provided , however , NYSERDA's right to a specific payment adjustment under this Section 5.1 shall expire three (3) years after the issuance of Seller's invoice to which such payment adjustment relates.

Section 5.2. Other Adjustments . NYSERDA may also make the following adjustments under the following circumstances:

(a) Failure to Produce . If during any Tranche, the Nuclear Group fails to generate in the aggregate an amount of electric energy sufficient to support the creation of ZECs pursuant to the ZEC Program in an amount equal to at least eighty-five percent (85%) of the applicable Tranche Cap Amount (the "Threshold Amount"), then the Annual ZEC Cap Amount and the Tranche Cap Amount applicable to the Nuclear Group in the immediately subsequent Tranche shall decrease by the applicable Annual ZEC Cap Reduction Amount and the applicable Tranche Cap

Reduction Amount, respectively. If, during any subsequent Tranche, the Nuclear Group generates in the aggregate an amount of electric energy sufficient to support the creation of ZECs pursuant to the ZEC Program in an amount at or above the new lower cap and obligation, the Annual ZEC Cap Amount and Tranche Cap Amount will be restored for the Nuclear Group in subsequent Tranches. Subject to Sections 2.2, 3.2 and 12.1(b), but notwithstanding any other provision in this Agreement to the contrary, the cap reductions described in this Section 5.2(a) shall be NYSERDA's sole remedy for Seller's failure to produce the Threshold Amount and transfer ZECs to the NYSERDA ZEC Account, in accordance with the terms of this Agreement, through the Contract Term;

(b) Permanent Cessation of Operations. As of the Contract Date, the Nuclear Group consists of the Facility and the Ginna Facility. If, during the Contract Term, a Permanent Cessation of Operations occurs with respect to (a) the FitzPatrick Facility or (b) the Ginna Facility, then, NYSERDA shall make any payments due to such facility in accordance with obligations hereunder already performed by such facility. If a Permanent Cessation of Operations occurs with respect to the FitzPatrick Facility prior to the FitzPatrick Facility becoming part of the Nuclear Group, then, effective on the date of the facility's Permanent Cessation of Operations, the Annual ZEC Cap Amount and the Tranche Cap Amount shall be modified in accordance with their respective definitions in Article I. If a Permanent Cessation of Operations occurs with respect to (a) the FitzPatrick Facility after the FitzPatrick Facility becomes part of the Nuclear Group or (b) the Ginna Facility, then effective on the date of the facility's Permanent Cessation of Operations, the Annual ZEC Cap Amount and the Tranche Cap Amount shall be reduced by the Cessation ZEC Reduction Amount and Cessation Tranche Reduction Amount, respectively. Solely for the purpose of determining the Cessation ZEC Reduction Amount and Cessation Tranche Reduction Amount, if either Unit 1 or Unit 2 of the Facility has a Permanent Cessation of Operations, it will be treated as if the entire Facility has a Permanent Cessation of Operations. For purposes of clarity, if a Permanent Cessation of Operations occurs at only Unit 1 or Unit 2 of the Facility, this Agreement shall not terminate, and Seller shall continue to sell, and Buyer shall continue to purchase, ZECs hereunder;

(c) Other Programs. This Agreement may be modified or terminated if there is a national, NYISO, or other program instituted that pays for or internalizes the value of the Facility's zero-emissions attributes in a manner that adequately replicates the economics of the ZEC Program such that the Commission in its sole discretion is satisfied that the zero-emissions attributes are no longer at risk and that discontinuing the mechanism can be done in a manner that is fair to both the Facility owners and the New York State ratepayers. Nothing herein shall require NYSERDA or Seller to take any action violative of Applicable Law or an order of court of competent jurisdiction; and

(d) LSE Agreements. If, during the Contract Term, the Seller enters into an agreement with an LSE for the sale of ZECs, the Annual ZEC Cap Amount and the Tranche Cap Amount, as the case may be, shall be reduced by the same

number of ZECs that Seller contracts to sell to the LSE; *provided* that, for the Tranche in which the effective date of such contract occurs, such modifications shall be made on a pro rata basis.

Article VI

Records and Reports

Section 6.1. Additional Documents . Within ten (10) Business Days after Seller receives written notice from NYSERDA stating that the Effective Date has been achieved, Seller shall provide to NYSERDA:

(a) certificates, dated as of the most recent practicable date prior to delivery of the opinion referenced in Section 2.8, issued by the Maryland Secretary of State confirming the corporate good standing of the Seller; and

(b) a certificate of an appropriate officer of the Seller in form and substance reasonably satisfactory to NYSERDA and certifying: (i) the names and signatures of the officers of the Seller authorized to sign any documents to be delivered hereunder; and (ii) the accuracy and completeness of resolutions of the Seller, authorizing and approving all matters in connection with the transactions contemplated thereby.

Seller shall promptly provide NYSERDA with updated and corrected versions of the above-referenced certificates upon any change in the information provided therein.

Section 6.2. Maintenance of Records . The Seller shall keep, maintain, and preserve at its principal office throughout the term of the Agreement and for a period of seven (7) years following the expiration of this Agreement, full and detailed books, accounts, and records pertaining to Seller's performance under the Agreement.

Article VII

Audit; Alternative Pricing Source

Section 7.1. Audit . NYSERDA shall have the right from time to time and at all reasonable times during the Contract Term and such period thereafter, upon reasonable notice to Seller, to inspect and audit any and all books, accounts and records pertaining to Seller's performance under this Agreement, at the office or offices of the Seller where they are then being kept, maintained and preserved. If such books, accounts and records are not kept at an office within the State of New York, within a reasonable time of a request by NYSERDA, Seller shall make such books, accounts and records available to NYSERDA at NYSERDA's offices or at an agreed upon location within the State of New York. Any payment made under this Agreement shall be subject to retroactive adjustment (reduction or increase) regarding amounts included therein which are found by NYSERDA on the basis of any audit of the Seller by an agency of the United States, the State of New York or NYSERDA not to constitute a properly invoiced amount.

Section 7.2. Alternative Pricing Source . If any of the prices utilized in Exhibit D of this Agreement fail to be announced or published by the relevant provider, or are otherwise unavailable on a temporary or permanent basis, promptly upon becoming aware of such circumstances, the Parties shall negotiate in good faith to agree upon a mutually acceptable alternative pricing source, index or calculation method that most closely approximates the discontinued prices, subject to Commission authorization as necessary.

Article VIII

Assignments

Section 8.1. General Restrictions . Except as specifically provided under Section 8.2, the assignment, transfer, conveyance, subcontracting or other disposal of this Agreement or any of the Seller's rights, obligations, interests or responsibilities hereunder, in whole or in part, without the express prior consent (not to be unreasonably withheld, conditioned or delayed) in writing of NYSERDA shall be void and of no effect as to NYSERDA. Seller agrees to compensate NYSERDA for NYSERDA's reasonable costs and expenses incurred by its use of outside attorneys, consultants, accountants and advisors in connection with this Agreement in response to Seller's requests made pursuant to this Section 8.1. NYSERDA shall provide an invoice to Seller for such charges, with appropriate documentation, and Seller shall pay such invoice within thirty (30) Days.

Section 8.2. Permitted Assignments . Notwithstanding the general restriction in Section 8.1:

(a) Seller may, without NYSERDA's prior written consent, grant a security interest in or conditionally assign this Agreement as collateral in connection with financing arrangements; provided that Seller provides prompt notice to NYSERDA of such collateral assignment;

(b) Seller may, without NYSERDA's prior written consent, assign, transfer or convey Seller's rights, obligations, interests or responsibilities hereunder pursuant to an assignment or transfer of Seller's license to operate approved by the NRC; and

(c) any change in ownership or control of Seller or a direct or indirect parent of Seller shall not require the prior written consent of NYSERDA; *provided* that Seller shall provide NYSERDA with any NRC or Commission filings with respect to such change in ownership or control promptly after such filings have been submitted to the NRC or the Commission.

Article IX

Seller's Representations and Warranties

Section 9.1. As a material inducement to NYSERDA to enter into this Agreement, Seller makes the following representations and warranties, as of the Effective Date, all of which shall survive the execution and delivery of this Agreement and any termination:

(a) (1) that Seller is a limited liability company duly organized, validly existing and in good standing under the laws of the jurisdiction of its organization; (2) has all requisite limited liability company power, and has all material governmental permits necessary to own its assets or lease and operate its properties and carry on its business as now being or as proposed to be conducted, to construct, finance, own, maintain and operate the Facility, to execute and deliver this Agreement, and to consummate the transactions contemplated herein; and (3) is qualified to do business and is in good standing in all jurisdictions in which the nature of the business conducted by it makes such qualification necessary;

(b) that the execution, delivery and performance by Seller, the entry into this Agreement by Seller, and the consummation of the transactions contemplated by this Agreement: (1) have been duly authorized by all requisite limited liability company action (including any required action of its members); and (2) will not (i) violate any applicable provision of law, statute, rule, regulation or order of any governmental agency or any provision of the limited liability company agreement or other governing documents of Seller; (ii) violate, conflict with, result in a breach of or constitute (alone or with notice or lapse of time or both) a default or an event of default under any indenture, agreement (including the respective limited liability company agreements of Seller), mortgage, deed of trust, note, lease, contract or other instrument to which Seller is a party or by which it or any of its property is bound; or (iii) result in the creation or imposition of any lien upon any property or assets of the Seller;

(c) that this Agreement has been duly executed and delivered by Seller and constitutes the legal, valid and binding obligation of Seller enforceable against Seller in accordance with the terms thereof; and

(d) that Seller is in compliance with Applicable Law that may in any way affect the performance of this Agreement, except where the failure to so comply would not result in a material adverse effect on Seller's ability to perform its material obligations hereunder.

Article X

NYSERDA's Representations and Warranties

Section 10.1. As a material inducement to Seller to enter into this Agreement, NYSERDA makes the following representations and warranties, as of the Effective Date, all of which shall survive the execution and delivery of this Agreement and any termination:

(a) that NYSERDA is an instrumentality of the State of New York and a public authority and public benefit corporation, created under the New York State Public Authorities Law, validly existing and in good standing under the laws of the State of New York;

(b) that NYSERDA has all necessary power and authority to execute and deliver this Agreement and all other agreements contemplated herein and hereby and to consummate the transactions contemplated hereby and thereby. The execution and delivery by NYSERDA of this Agreement and all other agreements contemplated herein and hereby and the consummation of the transactions contemplated hereby and thereby have been or, if not yet executed and delivered, will be when executed and delivered, and no other actions or proceedings on the part of NYSERDA are necessary to authorize this Agreement or any other agreement contemplated herein and hereby or the consummation of the transactions contemplated hereby and thereby;

(c) that the execution, delivery and performance by NYSERDA of this Agreement will not (1) violate any applicable provision of law, statute, rule, regulation or order of any governmental agency or, any provision of the Public Authorities Law; (2) violate, conflict with, result in a material breach of or constitute (alone or with notice or lapse of time or both) a material default or event of default under any indenture, agreement, mortgage, deed of trust, note, lease, contract or other instrument to which NYSERDA is a party or by which NYSERDA or any of its property is bound; (3) result in the creation or imposition of any lien upon any property or assets of NYSERDA; or (4) require any consent or approval of, registration or filing with, or any other action by, any Governmental Authority, except such as have been obtained or made and are in full force and effect. This Agreement will not conflict with any other agreement or contract to which NYSERDA is a party;

(d) that this Agreement has been duly executed and delivered by NYSERDA and constitutes the legal, valid and binding obligation of NYSERDA enforceable against NYSERDA in accordance with the terms thereof;

(e) that NYSERDA is familiar with and in compliance with Applicable Law, except where the failure to so comply would not result in a material adverse effect on NYSERDA's ability to perform its material obligations hereunder; and

(f) that there is no action, suit or claim at law or in equity, or before or by a Governmental Authority pending or, to the best knowledge of NYSERDA after due inquiry, threatened against NYSERDA or affecting any of its properties or assets which could reasonably be expected to result in a material adverse effect on NYSERDA's ability to perform its obligations.

Article XI

Indemnification

Section 11.1. Indemnification . Seller shall protect, indemnify and hold harmless NYSERDA and their respective officials, trustees, officers, directors, employees, agents, representatives and contractors from and against all liabilities, losses, claims, damages, judgments, penalties, causes of action, costs and expenses (including reasonable attorneys' and/or experts' fees and expenses) imposed upon or incurred by or asserted against NYSERDA resulting from, arising out of or relating to Seller's material breach of this Agreement. The obligations of Seller under this Article shall survive any expiration or Termination of this Agreement, and shall not be limited by any enumeration herein of required insurance coverage.

Article XII

Events of Default

Section 12.1. Event of Default . For the purposes of this Agreement, "Event of Default" shall mean any of the following:

(a) Representations and Warranties . Any representation or warranty made in this Agreement that shall prove to have been false or misleading in any material respect as of the time made or deemed to be made;

(b) Other Obligations . A Party shall default in the performance of any of its obligations under Sections 2.2, 2.4, 3.2, 4.2, 6.2 and 7.1 of this Agreement and such default shall continue unremedied for a period of thirty (30) days after the defaulting Party receives notice thereof;

(c) Voluntary Proceedings . A Party shall (i) apply for or consent to the appointment of, or the taking of possession by, a receiver, custodian, trustee or liquidator of itself or of all or a substantial part of its property; (ii) make a general assignment for the benefit of its creditors; (iii) commence a voluntary case under the United States Bankruptcy Code; (iv) file a petition seeking to take advantage of any other law relating to bankruptcy, insolvency, reorganization, winding-up, or composition or readjustment of debts; (v) fail to convert in a timely and appropriate manner, or acquiesce in writing to, any petition filed against it in an involuntary case under the United States Bankruptcy Code; (vi) cancel this Agreement, or sell ZECs to a third party (whether by a Party or a receiver, custodian, trustee or liquidator) other than NYSERDA or (subject to Section 2.9) an LSE; or (vii) take any corporate action for the purpose of effecting any of the foregoing;

(d) Involuntary Proceedings. A proceeding or case shall be commenced against a Party, without its application or consent, in any court of competent jurisdiction, seeking (i) its liquidation, reorganization, dissolution or winding-up, or the composition or readjustment of its debts; (ii) the appointment of a trustee, receiver, custodian, liquidator or the like of all or any substantial part of its assets; (iii) similar relief under any law relating to bankruptcy, insolvency, reorganization, winding-up, or composition or adjustment of debts, and such proceeding or case shall continue undismissed, or an order, judgment or decree approving or ordering any of the foregoing shall be entered and continue unstayed and in effect, for a period of sixty (60) or more days; or an order for relief against a Party, shall be entered in an involuntary case under the Bankruptcy Code; or (iv) as part of such a proceeding, a Party, receiver, custodian, trustee or liquidator shall cancel this Agreement, or sell ZECs to a third party other than NYSERDA or (subject to the terms of Section 2.9) an LSE;

(e) Unauthorized Transfer. The transfer of any ZEC included in the ZEC Quantity by Seller to any transferee other than NYSERDA or an LSE as permitted by the Commission; or

(f) Abandonment/Cessation of Commercial Operation. Seller's failure to maintain Commercial Operation, Seller's abandonment of the Facility or a Permanent Cessation of Operations with respect to the Facility.

Section 12.2. Effect of an Event of Default. In addition to any other remedy available to it under this Agreement or under Applicable Law, upon any occurrence of an Event of Default, the non-defaulting Party shall be entitled to suspend performance of its obligations under this Agreement until the earlier of such time as (a) such Event of Default has been cured or (b) the non-defaulting Party has elected to terminate this Agreement pursuant to Article XIII below.

Article XIII

Termination

Section 13.1. Termination. This Agreement may be terminated:

(a) at any time by the non-defaulting Party if an Event of Default occurs and continues unremedied following any applicable notice and cure period;

(b) at any time by the mutual written consent of Seller and NYSERDA;

(c) unless otherwise mutually agreed upon by NYSERDA and Seller in writing, on the expiration of the Contract Term (subject to Section 15.3 of this Agreement);

(d) by Seller, in the event that the ZEC Price becomes zero dollars ($0) at any time during the Contract Term; or

(e) by Seller or NYSERDA upon Enjoinment.

Section 13.2. Sale of FitzPatrick Facility . Unless the Commission orders otherwise prior to the commencement of Tranche 2, should Seller fail to reasonably demonstrate to NYSERDA, on or before September 1, 2018, that the FitzPatrick Facility has been purchased and that title to the FitzPatrick Facility has passed to a third party licensee unaffiliated with the current owner of the FitzPatrick Facility, this Agreement may be terminated by NYSERDA by providing written notice thereof to Seller on or at any time after September 2, 2018, but before April 1, 2019, pursuant to which the Parties' respective obligations shall terminate at the end of Tranche 1 with no further payment or performance obligation; provided that NYSERDA shall make any payments due in accordance with obligations hereunder already performed (such termination right defined herein as the "FitzPatrick Condition"). Seller has requested clarification or rehearing from the Commission that the FitzPatrick Condition does not apply to the procurement of ZECs from the Facility.

Section 13.3. Final Order . If one or more proceedings are commenced or pending by or before any Governmental Authority seeking to modify, terminate, amend, alter, avoid or invalidate any of the CES Order related to this Agreement or this Agreement, or any material provision thereof, the Parties shall continue to perform all of their respective obligations hereunder until such time that the Commission's decision on the CES Order and ZEC Program is final and non-appealable ("Final CES Order"). If a Final CES Order by the Commission has the effect of materially changing the original economic benefits of the ZEC Program or this Agreement for a Party (but not Enjoining the ZEC Program), the Parties shall negotiate in good faith to amend this Agreement to conform to the Final CES Order in order to effectuate as closely as reasonably possible the intent of the Parties hereunder on the Effective Date and preserve the original economic benefit to the Parties under this Agreement, subject to Commission approval as necessary. In the event that the Parties are not able to reach a mutually acceptable agreement, either Party, at its reasonable discretion, may terminate this Agreement. In the event the ZEC Program is Enjoined, either Party may terminate this Agreement pursuant to Section 13.1(e) and neither Party shall be required thereafter to perform any of the obligations under this Agreement. Notwithstanding any provision of this Section 13.3 to the contrary, nothing in this Section 13.3 shall affect the authority of the Commission to take any action pursuant to Sections 2.6 and 5.2(c) of this Agreement.

Section 13.4. Change in Law . Except as provided in Section 13.3 of this Agreement, the Parties agree that their respective obligations under this Agreement shall continue unmodified in full force and effect for the Contract Term in the event that a non-judicial Governmental Authority of the State of New York, including the Commission, modifies, terminates, amends, alters, avoids or invalidates the CES Order or the Final CES Order. Further, if any other Applicable Law has the effect of materially changing the original economic benefits of this Agreement for a Party or the economics of owning and operating the Facility, the Parties shall negotiate in good faith to amend this Agreement to conform to such new Applicable Law in order to effectuate as closely as reasonably possible the intent of the Parties hereunder on the Effective Date and preserve the original economic benefit to the Parties under this Agreement, subject to Commission approval as necessary. In the event that the Parties are not able to reach a mutually acceptable agreement, either Party, at its reasonable discretion, may terminate this Agreement. Notwithstanding any provision of this Section 13.4 to the contrary, nothing in this Section 13.4 shall affect the authority of the Commission to take any action pursuant to Sections 2.6 and 5.2(c) of this Agreement.

Section 13.5. Material Adverse Change . Seller shall promptly notify NYSERDA if it becomes aware of any damage to or loss of use of the Facility that could reasonably be expected to materially adversely affect the Facility and its ability to generate electricity and pursuant to the ZEC Program the subsequent creation of ZECs related to such generation. In the event of (a) the unavailability, interruption, breakdown or failure of equipment at the Facility or (b) other similar material adverse change to the operating condition of the Facility that, with respect to either or both of the events or conditions described in the preceding clause (a) or (b), could reasonably be expected to cost more than Forty Million Dollars ($40,000,000), as demonstrated by an independent engineering report provided by Seller, to repair or replace in accordance with Good Utility Practice and Seller's standard operating procedures, Seller may, at its sole option, terminate this Agreement with no further payment or performance obligation; provided that NYSERDA shall make any payments due in accordance with obligations hereunder already performed. For the avoidance of doubt, the Forty Million Dollar ($40,000,000) threshold set forth above must be for costs above Seller's previously forecasted budget and must pertain to capital costs, including costs associated with construction, repair, parts and equipment.

Article XIV

Force Majeure

Section 14.1. Force Majeure . Neither Party hereto shall be liable for any failure or delay in the performance of its respective obligations hereunder (other than payment obligations) if and to the extent that such delay or failure is due to a cause or circumstance beyond the reasonable control of such party, including acts of God or the public enemy, expropriation or confiscation of land or facilities, acts of war, rebellion or sabotage or damage resulting therefrom, fires, floods, storms or weather of unusual severity, unavailability of NYGATS, explosions, accidents, riots, or strikes (a "Force Majeure Event"). Compliance with Applicable Law shall not constitute a Force Majeure Event and shall be addressed in Section 13.4. The suspension of performance due to a Force Majeure Event shall be of no greater scope or amount and of no longer duration than is required by such Force Majeure Event and the Claiming Party shall not be construed to be in default with respect to any obligation hereunder for so long as, but only to the extent that, failure to perform such obligation is due to a Force Majeure Event. No Force Majeure Event shall extend this Agreement beyond the Term.

Section 14.2. Due Diligence . A Party claiming a Force Majeure Event ("Claiming Party") shall: (a) provide oral notice as promptly as practicable followed by written notice to the other Party ("Non-Claiming Party") within two (2) Business Days after such Claiming Party becomes aware of such Force Majeure Event, giving the Non-Claiming Party a detailed written explanation of the event and an estimate of its expected duration and probable effect on the performance of the Claiming Party's obligations hereunder; (b) use commercially reasonable efforts in accordance with Good Utility Practice to remedy the condition that prevents performance and to mitigate the effects of same in order to continue to perform its obligations under this Agreement; and (c) provide the Non-Claiming Party with weekly status reports of all efforts to mitigate and remedy the Force Majeure Event.

Section 14.3. Extended Force Majeure Events .

(a) If the Claiming Party has reason to believe that a Force Majeure Event will prevent it from performing its obligations under this Agreement for one (1) month or longer ("Extended Force Majeure Event"), it shall notify the Non-Claiming Party in writing within fifteen (15) days from the beginning of said Force Majeure Event and shall submit a plan to remedy the impact of such Force Majeure Event(s) (a "Force Majeure Remedy Plan") to the Non-Claiming Party within ten (10) days of such notification.

(b) While the Force Majeure Remedy Plan is in effect, the Claiming Party shall provide (i) weekly status reports notifying the Non-Claiming Party of the steps which have been taken to remedy the Extended Force Majeure Event, and (ii) the expected remaining duration of its inability to perform hereunder.

Section 14.4. Right to Terminate or Discontinue Obligations .

Either Party upon written notice to the other Party may terminate this Agreement if the Claiming Party remains unable to perform its material obligations hereunder due to a Force Majeure Event for twenty-four (24) consecutive months following the date of such Force Majeure Event; provided, that neither Party shall be entitled to terminate this Agreement until twenty four (24) months after the date of such Force Majeure Event provided that the Party affected by the Force Majeure Event (a) has commenced to remedy the Force Majeure Event and (b) is diligently pursuing such remedy; and (c) if such remedy can be reasonably completed within twenty four (24) consecutive Months following the date of such Force Majeure Event.

Section 14.5. Liability Following Termination .

Upon termination of this Agreement as provided in Section 14.4, the Parties shall have no further liability or obligation to each other as a consequence of such termination, except for any obligation accruing prior to the occurrence of such Force Majeure Event.

Article XV

Additional Provisions

Section 15.1. Forward Contract . Each Party represents and warrants to the other, as of the date of each sale and purchase of ZECs (each "transaction") hereunder that it is a "forward contract merchant" within the meaning of the United States Bankruptcy Code, that this Agreement and each transaction is a "forward contract" or a "commodity contract" within the meaning of the United States Bankruptcy Code, and that the remedies identified in this Agreement shall be "contractual rights" as provided for in 11 U.S.C. § 556 as that provision may be amended from time to time. Each Party represents to the other, as of the date of each transaction, that: (a) it is a commercial market participant with respect to ZECs and is entering into the transaction in connection with its commercial business; (b) it intends, as of the date of the transaction, to make or take physical delivery of ZECs, which are nonfinancial commodities; and (c) that the transaction is not a "swap" under the Commodity Exchange Act and the CFTC regulations, interpretations and guidance promulgated thereunder.

Section 15.2. Taxes. Seller shall be responsible for and obligated to pay all present and future taxes, fees and levies that may be assessed by any entity upon the Seller's delivery of ZECs to NYSERDA, or with respect to the creation of the ZECs and/or the energy with which they are associated, and, if any, for the registration of the Facility in the NYGATS and the delivery of the ZEC Certificates.

Section 15.3. Term. Unless earlier terminated pursuant to the terms hereof, this Agreement shall commence on the Effective Date and expire upon the expiration of the Contract Term, provided that payment has been made for all ZECs for which payment is properly due. Upon such date or upon earlier termination of this Agreement under Article XIII, neither Party shall have any further obligation to the other, except that Sections 15.1, 18.1, 18.2, 18.3, 18.4 **,** and NYSERDA's payment obligation under Article IV shall survive.

Section 15.4. Waiver. Either Party to this Agreement may (a) extend the time for the performance of any of the obligations or other acts of the other Party, (b) waive any inaccuracies in the representations and warranties of the other Party contained herein or in any document delivered by the other Party pursuant hereto or (c) waive compliance with any of the agreements or conditions of the other party contained herein. Any such extension or waiver shall be valid only if set forth in an instrument in writing signed by the Party to be bound thereby. Any waiver of any term or condition shall not be construed as a waiver of any subsequent breach or a subsequent waiver of the same term or condition, or a waiver of any other term or condition, of this Agreement. No provision of this Agreement will be deemed to have been waived unless the waiver is in writing, and no delay by either Party in exercising its rights hereunder, including the right to terminate this Agreement, shall be deemed to constitute or evidence any waiver by either Party of any right hereunder. The rights granted in this Agreement are cumulative of every other right or remedy that the enforcing Party may otherwise have at law or in equity or by statute.

Section 15.5. Independent Contractor. The status of the Seller under this Agreement shall be that of an independent contractor and not that of an agent, and in accordance with such status, Seller and its respective officers, agents, employees, representatives and servants shall at all times during the term of this Agreement conduct themselves in a manner consistent with such status and by reason of this Agreement shall neither hold themselves out as, nor claim to be acting in the capacity of, officers, employees, agents, representatives or servants of NYSERDA nor make any claim, demand or application for any right or privilege applicable to NYSERDA, including rights or privileges derived from workers' compensation coverage, unemployment insurance benefits, social security coverage and retirement membership or credit.

Section 15.6. Severability. If any provision of this Agreement shall be declared by any court of competent jurisdiction to be illegal, void or unenforceable, all other provisions of this Agreement shall not be affected and shall remain in full force and effect. If any provision of this Agreement is so broad as to be unenforceable, that provision shall be interpreted to be only so broad as will enable it to be enforced.

Section 15.7. Seller Expense. Seller shall, at its own expense, make all arrangements necessary to register the Facility and transfer ZECs to NYSERDA through NYGATS in accordance with the NYGATS Operating Rules.

Section 15.8. Further Assurances. Each Party shall execute and deliver to the other Party any instrument or other document reasonably requested by the other Party to give effect to the agreement of the Parties reflected herein.

Section 15.9. Waiver of Relief from Contract. Neither Party shall unilaterally seek to obtain from any Governmental Authority any relief changing the ZEC Price, each Party's obligations or any other economic terms and conditions of this Agreement. To the extent that any non-Party shall seek such relief, the Parties further covenant not to support such action.

Section 15.10. Governing Law; Venue. This Agreement shall be governed by, and construed in accordance with the laws of the State of New York applicable to contracts executed and to be performed in New York State without regard to its conflicts of laws principles. The parties irrevocably acknowledge and accept that all actions arising under or relating to this Agreement, and the transactions contemplated hereby and thereby shall be brought exclusively in a United States District Court or New York State Court located in Albany, New York having subject matter jurisdiction over such matters, and each of the Parties hereby consents to and accepts such personal jurisdiction of, and waives any objection as to the laying of venue in, such courts for purposes of such action.

Section 15.11. Laws of the State of New York. Seller shall comply with all of the requirements set forth in Exhibit A hereto.

Section 15.12. No Third Party Beneficiaries. Nothing herein is intended to or should be construed to create any rights of any kind whatsoever in third persons not parties to this Agreement.

Article XVI

Notices, Entire Agreement, Amendment, Counterparts, Good Faith Negotiation

Section 16.1 . Notices.

(a) All notices, requests, consents, approvals and other communications which may or are required to be given by either party to the other under this Agreement shall be in writing and shall be transmitted either:

(1) via certified or registered United States mail, return receipt requested;

(2) by personal delivery;

(3) by expedited delivery service; or

(4) by e-mail, return receipt requested.

Such notices shall be addressed as follows, or to such different addresses as the Parties may from time-to-time designate as set forth in paragraph (c) below:

To Seller:

Nine Mile Point Nuclear Station, LLC
c/o Exelon Generation Company, LLC
1310 Point Street
Baltimore, MD 21231
Attn: General Counsel
E:mail Address: david.dardis@constellation.com

To NYSERDA:	NYSERDA Attn: Office of the General Counsel 17 Columbia Circle Albany, New York 12203-6399 E:mail address: pete.keane@nyserda.ny.gov
With a copy to:	NYSERDA Attn: Peter Keane 17 Columbia Circle Albany, New York 12203-6399

(b) Any such notice shall be deemed to have been given either at the time of personal delivery or, in the case of expedited delivery service or certified or registered United States mail, as of the date of first attempted delivery at the address and in the manner provided herein, or in the case of facsimile transmission or email, upon receipt of an email acknowledgement of receipt.

(c) The Parties may, from time to time, specify any new or different address in the United States as their address for purpose of receiving notice under this Agreement by giving fifteen (15) days' written notice to the other Party sent in accordance herewith. The Parties agree to mutually designate individuals as their respective representatives for the purposes of receiving notices under this Agreement. Additional individuals may be designated in writing by the Parties for purposes of implementation and administration/billing, resolving issues and problems and/or for dispute resolution.

Section 16.2. Entire Agreement; Amendment. This Agreement embodies the entire agreement and understanding between NYSERDA and the Seller and supersedes all prior agreements and understandings relating to the subject matter hereof. Except as otherwise expressly provided for herein, this Agreement may be amended, modified, changed, waived, discharged or terminated only by an instrument in writing, signed by the Party against which enforcement of such amendment, modification, change, waiver, discharge or termination is sought.

Section 16.3. Counterparts. This Agreement may be executed in counterparts each of which shall be deemed an original, but all of which taken together shall constitute one and the same instrument.

Section 16.4. Good Faith Negotiation. Both Parties agree that, should any dispute arise during the term of this Agreement, the Parties will make a good faith though non-binding effort to reconcile any difference or dispute before the filing of an action in any court.

Article XVII

Publicity

Section 17.1. Publicity. On or prior to the Effective Date, the Parties will collaborate with regard to the preparation and issuance of any initial press release or public announcement with respect to the Parties' entry into this Agreement.

Article XVIII

Confidentiality

Section 18.1. Seller will be required to waive confidentiality, as to NYSERDA and the NYGATS, for the direct transfer to NYSERDA of data pertinent to the verification of ZEC creation.

Section 18.2. Freedom of Information Law. Seller acknowledges that NYSERDA is subject to and must comply with the requirements of New York's Freedom of Information Law ("FOIL;" see Public Officers' Law Article 6).

Section 18.3. Claim of Confidentiality. Information of any tangible form including any document that Seller wishes to be protected from disclosure to third parties, must be marked "Confidential" or "Proprietary" at the time such information is provided to NYSERDA.

Section 18.4. Trade Secrets/Commercial Information. The FOIL Law (Public Officers Law § 87(d)(2)) provides an exception to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise. " If NYSERDA receives a request from a third party for information or a document received from Seller and which has been marked "Confidential" or "Proprietary," NYSERDA will process such request under the procedures provided by NYSERDA's FOIL regulations.

IN WITNESS WHEREOF, the Parties hereto have caused this Agreement to be executed and delivered by their duly authorized representatives.

EXHIBIT A

REVISED 5/12

STANDARD TERMS AND CONDITIONS
FOR ALL NYSERDA AGREEMENTS

(Based on Standard Clauses for New York State Contracts and Tax Law Section 5-a)

The parties to the Agreement agree to be bound by the following clauses which are hereby made a part of the Agreement:

1. NON-DISCRIMINATION REQUIREMENTS. To the extent required by Article 15 of the Executive Law (also known as the Human Rights Law) and all other State and Federal statutory and constitutional non-discrimination provisions, the Contractor will not discriminate against any employee or applicant for employment because of race, creed, color, sex, national origin, sexual orientation, age, disability, genetic predisposition or carrier status, or marital status. Furthermore, in accordance with Section 220-e of the Labor Law, if this is an Agreement for the construction, alteration or repair of any public building or public work or for the manufacture, sale or distribution of materials, equipment or supplies, and to the extent that this Agreement shall be performed within the State of New York, Contractor agrees that neither it nor its subcontractors shall, by reason of race, creed, color, disability, sex or national origin: (a) discriminate in hiring against any New York State citizen who is qualified and available to perform the work; or (b) discriminate against or intimidate any employee hired for the performance of work under this Agreement. If this is a building service Agreement as defined in Section 230 of the Labor Law, then, in accordance with Section 239 thereof, Contractor agrees that neither it nor its subcontractors shall, by reason of race, creed, color, national origin, age, sex or disability: (a) discriminate in hiring against any New York State citizen who is qualified and available to perform the work; or (b) discriminate against or intimidate any employee hired for the performance of work under this contract. Contractor is subject to fines of $50.00 per person per day for any violation of Section 220-e or Section 239 as well as possible termination of this Agreement and forfeiture of all moneys due hereunder for a second subsequent violation.

2. WAGE AND HOURS PROVISIONS. If this is a public work Agreement covered by Article 8 of the Labor Law or a building service Agreement covered by Article 9 thereof, neither Contractor's employees nor the employees of its subcontractors may be required or permitted to work more than the number of hours or days stated in said statutes, except as otherwise provided in the Labor Law and as set forth in prevailing wage and supplement schedules issued by the State Labor Department. Furthermore, Contractor and its subcontractors must pay at least the prevailing wage rate and pay or provide the prevailing supplements, including the premium rates for overtime pay, as determined by the State Labor Department in accordance with the Labor Law. Additionally, effective April 28, 2008, if this is a public work contract covered by Article 8 of the Labor Law, the Contractor understands and agrees that the filing of payrolls in a manner consistent with Subdivision 3-a of Section 220 of the Labor Law shall be a condition precedent to payment by NYSERDA of any NYSERDA-approved sums due and owing for work done upon the project.

3. NON-COLLUSIVE BIDDING REQUIREMENT . In accordance with Section 2878 of the Public Authorities Law, if this Agreement was awarded based upon the submission of bids, Contractor warrants, under penalty of perjury, that its bid was arrived at independently and without collusion aimed at restricting competition. Contractor further warrants that, at the time Contractor submitted its bid, an authorized and responsible person executed and delivered to NYSERDA a non-collusive bidding certification on Contractor's behalf.

4. INTERNATIONAL BOYCOTT PROHIBITION . If this Agreement exceeds $5,000, the Contractor agrees, as a material condition of the Agreement, that neither the Contractor nor any substantially owned or affiliated person, firm, partnership or corporation has participated, is participating, or shall participate in an international boycott in violation of the Federal Export Administration Act of 1979 (50 USC App. Sections 2401 et seq.) or regulations thereunder. If such Contractor, or any of the aforesaid affiliates of Contractor, is convicted or is otherwise found to have violated said laws or regulations upon the final determination of the United States Commerce Department or any other appropriate agency of the United States subsequent to the Agreement's execution, such Agreement, amendment or modification thereto shall be rendered forfeit and void. The Contractor shall so notify NYSERDA within five (5) Business Days of such conviction, determination or disposition of appeal. (See and compare Section 220-f of the Labor Law, Section 139-h of the State Finance Law, and 2 NYCRR 105.4).

5. SET-OFF RIGHTS . NYSERDA shall have all of its common law and statutory rights of set-off. These rights shall include, but not be limited to, NYSERDA's option to withhold for the purposes of set-off any moneys due to the Contractor under this Agreement up to any amounts due and owing to NYSERDA with regard to this Agreement, any other Agreement, including any Agreement for a term commencing prior to the term of this Agreement, plus any amounts due and owing to NYSERDA for any other reason including, without limitation, tax delinquencies, fee delinquencies or monetary penalties relative thereto.

6. PROPRIETARY INFORMATION . Notwithstanding any provisions to the contrary in the Agreement, Contractor and NYSERDA acknowledge and agree that all information, in any format, submitted to NYSERDA shall be subject to and treated in accordance with the NYS Freedom of Information Law ("FOIL," Public Officers Law, Article 6). Pursuant to FOIL, NYSERDA is required to make available to the public, upon request, records or portions thereof which it possesses, unless that information is statutorily exempt from disclosure. Therefore, unless the Agreement specifically requires otherwise, Contractor should submit information to NYSERDA in a non-confidential, non-proprietary format. FOIL does provide that NYSERDA may deny access to records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." [See Public Officers Law, § 87(2)(d)]. Accordingly, if the Agreement specifically requires submission of information in a format Contractor considers a proprietary and/or confidential trade secret, Contractor shall fully identify and plainly label the information "confidential" or "proprietary" at the time of disclosure. By so marking such information, Contractor represents that the information has actual or potential specific commercial or competitive value to the competitors of Contractor. Without limitation, information will not be considered confidential or proprietary if it is or has been (i) generally known or available from other sources without obligation concerning its confidentiality; (ii) made available by the owner

to others without obligation concerning its confidentiality; or (iii) already available to NYSERDA without obligation concerning its confidentiality. In the event of a FOIL request, it is NYSERDA's policy to consider records as marked above pursuant to the trade secret exemption procedure set forth in 21 New York Codes Rules & Regulations § 501.6 and any other applicable law or regulation. However, NYSERDA cannot guarantee the confidentiality of any information submitted. More information on FOIL, and the relevant statutory law and regulations, can be found at the website for the Committee on Open Government (http://www.dos.state.ny.us/coog/foil2.html) and NYSERDA's Regulations, Part 501 (http://www.nyserda.ny.gov/About/New-York-State-Regulations.aspx).

7. IDENTIFYING INFORMATION AND PRIVACY NOTIFICATION . (a) FEDERAL EMPLOYER IDENTIFICATION NUMBER and/or FEDERAL SOCIAL SECURITY NUMBER. As a condition to NYSERDA's obligation to pay any invoices submitted by Contractor pursuant to this Agreement, Contractor shall provide to NYSERDA its Federal employer identification number or Federal social security number, or both such numbers when the Contractor has both such numbers. Where the Contractor does not have such number or numbers, the Contractor must give the reason or reasons why the payee does not have such number or numbers.

(b) PRIVACY NOTIFICATION **.** The authority to request the above personal information from a seller of goods or services or a lessor of real or personal property, and the authority to maintain such information, is found in Section 5 of the State Tax Law. Disclosure of this information by Contractor to the State is mandatory. The principal purpose for which the information is collected is to enable the State to identify individuals, businesses and others who have been delinquent in filing tax returns or may have understated their tax liabilities and to generally identify persons affected by the taxes administered by the Commissioner of Taxation and Finance. The information will be used for tax administration purposes and for any other purpose authorized by law.

8. CONFLICTING TERMS . In the event of a conflict between the terms of the Agreement (including any and all attachments thereto and amendments thereof) and the terms of this Exhibit A, the terms of this Exhibit A shall control.

9. GOVERNING LAW . This Agreement shall be governed by the laws of the State of New York except where the Federal supremacy clause requires otherwise.

10. NO ARBITRATION . Disputes involving this Agreement, including the breach or alleged breach thereof, may not be submitted to binding arbitration (except where statutorily required) without the NYSERDA's written consent, but must, instead, be heard in a court of competent jurisdiction of the State of New York.

11. SERVICE OF PROCESS . In addition to the methods of service allowed by the State Civil Practice Law and Rules ("CPLR"), Contractor hereby consents to service of process upon it by registered or certified mail, return receipt requested. Service hereunder shall be complete upon Contractor's actual receipt of process or upon NYSERDA's receipt of the return thereof by the United States Postal Service as refused or undeliverable. Contractor must promptly notify NYSERDA, in writing, of each and every change of address to which service of process can be made. Service by NYSERDA to the last known address shall be sufficient. Contractor will have thirty (30) calendar days after service hereunder is complete in which to respond.

12. CRIMINAL ACTIVITY. If subsequent to the effectiveness of this Agreement, NYSERDA comes to know of any allegation previously unknown to it that the Contractor or any of its principals is under indictment for a felony, or has been, within five (5) years prior to submission of the Contractor's proposal to NYSERDA, convicted of a felony, under the laws of the United States or Territory of the United States, then NYSERDA may exercise its stop work right under this Agreement. If subsequent to the effectiveness of this Agreement, NYSERDA comes to know of the fact, previously unknown to it, that Contractor or any of its principals is under such indictment or has been so convicted, then NYSERDA may exercise its right to terminate this Agreement. If the Contractor knowingly withheld information about such an indictment or conviction, NYSERDA may declare the Agreement null and void and may seek legal remedies against the Contractor and its principals. The Contractor or its principals may also be subject to penalties for any violation of law which may apply in the particular circumstances. For a Contractor which is an association, partnership, corporation, or other organization, the provisions of this paragraph apply to any such indictment or conviction of the organization itself or any of its officers, partners, or directors or members of any similar governing body, as applicable.

13. PERMITS. It is the responsibility of the Contractor to acquire and maintain, at its own cost, any and all permits, licenses, easements, waivers and permissions of every nature necessary to perform the work.

14. PROHIBITION ON PURCHASE OF TROPICAL HARDWOODS. The Contractor certifies and warrants that all wood products to be used under this Agreement will be in accordance with, but not limited to, the specifications and provisions of State Finance Law Section 165 (Use of Tropical Hardwoods), which prohibits purchase and use of tropical hardwoods, unless specifically exempted by NYSERDA.

15. OMNIBUS PROCUREMENT ACT OF 1992. It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority and women-owned business enterprises as bidders, subcontractors and suppliers on its procurement contracts.

Information on the availability of New York State subcontractors and suppliers is available from:

NYS Department of Economic Development
Division for Small Business
625 Broadway
Albany, New York 12207
Telephone: 518-292-5200
Fax: 518-292-5884
http://www.esd.ny.gov
http://www.esd.ny.gov

A directory of certified minority and women-owned business enterprises is available from:

NYS Department of Economic Development
Division of Minority and Women's Business Development
625 Broadway
Albany, New York 12207
Telephone: 518-292-5200
Fax: 518-292-5803
http://www.empire.state.ny.us

The Omnibus Procurement Act of 1992 requires that by signing this Agreement, Contractors certify that whenever the total amount is greater than $1 million:

(a) The Contractor has made reasonable efforts to encourage the participation of New York State Business Enterprises as suppliers and subcontractors, including certified minority and women-owned business enterprises, on this project, and has retained the documentation of these efforts to be provided upon request to the State;

(b) The Contractor has complied with the Federal Equal Opportunity Act of 1972 (P.L. 92-261), as amended;

(c) The Contractor agrees to make reasonable efforts to provide notification to New York State residents of employment opportunities on this project through listing any such positions with the Job Service Division of the New York State Department of Labor, or providing such notification in such manner as is consistent with existing collective bargaining contracts or agreements. The Contractor agrees to document these efforts and to provide said documentation to the State upon request; and

(d) The Contractor acknowledges notice that the State may seek to obtain offset credits from foreign countries as a result of this contract and agrees to cooperate with the State in these efforts.

16. RECIPROCITY AND SANCTIONS PROVISIONS . Bidders are hereby notified that if their principal place of business is located in a country, nation, province, state or political subdivision that penalizes New York State vendors, and if the goods or services they offer will be substantially produced or performed outside New York State, the Omnibus Procurement Act 1994 and 2000 amendments (Chapter 684 and Chapter 383, respectively) require that they be denied contracts which they would otherwise obtain. NOTE: As of May 15, 2002, the list of discriminatory jurisdictions subject to this provision includes the states of South Carolina, Alaska, West Virginia, Wyoming, Louisiana and Hawaii. Contact NYS Department of Economic Development for a current list of jurisdictions subject to this provision.

17. COMPLIANCE WITH NEW YORK STATE INFORMATION SECURITY BREACH AND NOTIFICATION ACT . Contractor shall comply with the provisions of the New York State Information Security Breach and Notification Act (General Business Law Section 899-aa; State Technology Law Section 208).

18. PROCUREMENT LOBBYING. To the extent this Agreement is a "procurement contract" as defined by State Finance Law Sections 139-j and 139-k, by signing this Agreement the Contractor certifies and affirms that all disclosures made in accordance with State Finance Law Sections 139-j and 139-k are complete, true and accurate. In the event such certification is found to be intentionally false or intentionally incomplete, NYSERDA may terminate the agreement by providing written notification to the Contractor in accordance with the terms of the agreement.

19. COMPLIANCE WITH TAX LAW SECTION 5-a. The following provisions apply to Contractors that have entered into agreements in an amount exceeding $100,000 for the purchase of goods and services:

(a) Before such agreement can take effect, the Contractor must have on file with the New York State Department of Taxation and Finance a Contractor Certification form (ST-220-TD).

(b) Prior to entering into such an agreement, the Contractor is required to provide NYSERDA with a completed Contractor Certification to Covered Agency form (Form ST-220-CA).

(c) Prior to any renewal period (if applicable) under the agreement, the Contractor is required to provide NYSERDA with a completed Form ST-220-CA.

Certifications referenced in paragraphs (b) and (c) above will be maintained by NYSERDA and made a part hereof and incorporated herein by reference.

NYSERDA reserves the right to terminate this agreement in the event it is found that the certification filed by the Contractor in accordance with Tax Law Section 5-a was false when made.

20. IRANIAN ENERGY SECTOR DIVESTMENT. In accordance with Section 2879-c of the Public Authorities Law, by signing this contract, each person and each person signing on behalf of any other party certifies, and in the case of a joint bid or partnership each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief that each person is not on the list created pursuant to paragraph (b) of subdivision 3 of section 165-a of the State Finance Law (See www.ogs.ny.gov/about/regs/ida.asp).

EXHIBIT B

NYSERDA PROMPT PAYMENT POLICY STATEMENT

504.1. Purpose and Applicability . (a) The purpose of this Exhibit is to provide a description of Part 504 of NYSERDA's regulations, which consists of NYSERDA's policy for making payment promptly on amounts properly due and owing by NYSERDA under this Agreement. The section numbers used in this document correspond to the section numbers appearing in Part 504 of the regulations. [1]

(b) This Exhibit applies generally to payments due and owing by the NYSERDA to the Contractor pursuant to this Agreement. However, this Exhibit does not apply to Payments due and owing when NYSERDA is exercising a Set-Off against all or part of the Payment, or if a State or Federal law, rule or regulation specifically requires otherwise.

504.2. Definitions . Capitalized terms not otherwise defined in this Exhibit shall have the same meaning as set forth earlier in this Agreement. In addition to said terms, the following terms shall have the following meanings, unless the context shall indicate another or different meaning or intent:

(a) "Date of Payment" means the date on which NYSERDA requisitions a check from its statutory fiscal agent, the Department of Taxation and Finance, to make a Payment.

(b) "Designated Payment Office" means the Office of NYSERDA's Controller, located at 17 Columbia Circle, Albany, New York 12203.

(c) "Payment" means payment properly due and owing to Contractor pursuant to Article IV, Exhibit B of this Agreement.

(d) "Prompt Payment" means a Payment within the time periods applicable pursuant to Sections 504.3 through 504.5 of this Exhibit in order for NYSERDA not to be liable for interest pursuant to Section 504.6.

(e) "Payment Due Date" means the date by which the Date of Payment must occur, in accordance with the provisions of Sections 504.3 through 504.5 of this Exhibit, in order for NYSERDA not to be liable for interest pursuant to Section 504.6.

(f) "Proper Invoice" means a written request for Payment that is submitted by a Contractor setting forth the description, price or cost, and quantity of goods, property or services delivered or rendered, in such form, and supported by such other substantiating documentation, as NYSERDA may reasonably require, including but not limited to any requirements set forth in Exhibits A or B to this Agreement; and addressed to NYSERDA's Controller, marked "Attention: Accounts Payable," at the Designated Payment Office.

(g)(1) "Receipt of an Invoice" means:

[1] This is only a summary; the full text of Part 504 can be accessed at: http://www.nyserda.ny.gov/en/About/~/media/Files/About/Contact/NYSERDARegulations.ashx

(i) if the Payment is one for which an invoice is required, the later of:

(a) the date on which a Proper Invoice is actually received in the Designated Payment Office during normal business hours; or

(b) the date by which, during normal business hours, NYSERDA has actually received all the purchased goods, property or services covered by a Proper Invoice previously received in the Designated Payment Office.

(ii) if the Agreement provides that a Payment will be made on a specific date or at a predetermined interval, without having to submit a written invoice the 30th calendar day, excluding legal holidays, before the date so specified or predetermined.

(2) For purposes of this subdivision, if the Agreement requires a multifaceted, completed or working system, or delivery of no less than a specified quantity of goods, property or services and only a portion of such systems or less than the required goods, property or services are working, completed or delivered, even though the Contractor has invoiced NYSERDA for the portion working, completed or delivered, NYSERDA will not be in Receipt of an Invoice until the specified minimum amount of the systems, goods, property or services are working, completed or delivered.

(h) "Set-off" means the reduction by NYSERDA of a payment due a Contractor by an amount equal to the amount of an unpaid legally enforceable debt owed by the Contractor to NYSERDA.

504.3. Prompt Payment Schedule. Except as otherwise provided by law or regulation or in Sections 504.4 and 504.5 of this Exhibit, the Date of Payment by NYSERDA of an amount properly due and owing under this Agreement shall be no later than thirty (30) calendar days, excluding legal holidays, after Receipt of a Proper Invoice.

504.4. Payment Procedures.

(a) Unless otherwise specified in this Agreement, a Proper Invoice submitted by the Contractor to the Designated Payment Office shall be required to initiate payment for goods, property or services. As soon as any invoice is received in the Designated Payment Office during normal business hours, such invoice shall be date-stamped. The invoice shall then promptly be reviewed by NYSERDA.

(b) NYSERDA shall notify the Contractor within fifteen (15) calendar days after Receipt of an Invoice of:

(1) any defects in the delivered goods, property or services;

(2) any defects in the invoice; or

(3) suspected improprieties of any kind.

(c) The existence of any defects or suspected improprieties shall prevent the commencement of the time period specified in Section 504.3 until any such defects or improprieties are corrected or otherwise resolved.

(d) If NYSERDA fails to notify a Contractor of a defect or impropriety within the fifteen (15) calendar day period specified in subdivision (b) of this section, the sole effect shall be that the number of days allowed for Payment shall be reduced by the number of days between the 15th day and the day that notification was transmitted to the Contractor. If NYSERDA fails to provide reasonable grounds for its contention that a defect or impropriety exists, the sole effect shall be that the Payment Due Date shall be calculated using the original date of Receipt of an Invoice.

(e) In the absence of any defect or suspected impropriety, or upon satisfactory correction or resolution of a defect or suspected impropriety, NYSERDA shall make Payment, consistent with any such correction or resolution and the provisions of this Exhibit.

504.5. Exceptions and Extension of Payment Due Date . NYSERDA has determined that, notwithstanding the provisions of Sections 504.3 and 504.4 of this Exhibit, any of the following facts or circumstances, which may occur concurrently or consecutively, reasonably justify extension of the Payment Due Date:

(a) If this Agreement provides Payment will be made on a specific date or at a predetermined interval, without having to submit a written invoice, if any documentation, supporting data, performance verification, or notice specifically required by this Agreement or other State or Federal mandate has not been submitted to NYSERDA on a timely basis, then the Payment Due Date shall be extended by the number of calendar days from the date by which all such matter was to be submitted to NYSERDA and the date when NYSERDA has actually received such matter.

(b) If an inspection or testing period, performance verification, audit or other review or documentation independent of the Contractor is specifically required by this Agreement or by other State or Federal mandate, whether to be performed by or on behalf of NYSERDA or another entity, or is specifically permitted by this Agreement or by other State or Federal provision and NYSERDA or other entity with the right to do so elects to have such activity or documentation undertaken, then the Payment Due Date shall be extended by the number of calendar days from the date of Receipt of an Invoice to the date when any such activity or documentation has been completed, NYSERDA has actually received the results of such activity or documentation conducted by another entity, and any deficiencies identified or issues raised as a result of such activity or documentation have been corrected or otherwise resolved.

(c) If an invoice must be examined by a State or Federal agency, or by another party contributing to the funding of the Contract, prior to Payment, then the Payment Due Date shall be extended by the number of calendar days from the date of Receipt of an Invoice to the date when the State or Federal agency, or other contributing party to the Contract, has completed the inspection, advised NYSERDA of the results of the inspection, and any deficiencies identified or issues raised as a result of such inspection have been corrected or otherwise resolved.

(d) If appropriated funds from which Payment is to be made have not yet been appropriated or, if appropriated, not yet been made available to NYSERDA, then the Payment Due Date shall be extended by the number of calendar days from the date of Receipt of an Invoice to the date when such funds are made available to NYSERDA.

504.6. Interest Eligibility and Computation. If NYSERDA fails to make Prompt Payment, NYSERDA shall pay interest to the Contractor on the Payment when such interest computed as provided herein is equal to or more than ten dollars ($10.00). Interest shall be computed and accrue at the daily rate in effect on the Date of Payment, as set by the New York State Tax Commission for corporate taxes pursuant to Section 1096(e)(1) of the Tax Law. Interest on such a Payment shall be computed for the period beginning on the day after the Payment Due Date and ending on the Date of Payment.

504.7. Sources of Funds to Pay Interest. Any interest payable by NYSERDA pursuant to Exhibit shall be paid only from the same accounts, funds, or appropriations that are lawfully available to make the related Payment.

504.8. Incorporation of Prompt Payment Policy Statement into Contracts. The provisions of this Exhibit shall apply to all Payments as they become due and owing pursuant to the terms and conditions of this Agreement, notwithstanding that NYSERDA may subsequently amend its Prompt Payment Policy by further rulemaking.

504.9. Notice of Objection. Contractor may object to any action taken by NYSERDA pursuant to this Exhibit that prevents the commencement of the time in which interest will be paid by submitting a written notice of objection to NYSERDA. Such notice shall be signed and dated and concisely and clearly set forth the basis for the objection and be addressed to the Vice President, New York State Energy Research and Development Authority, at the notice address set forth in Exhibit B to this Agreement. The Vice President of NYSERDA, or his or her designee, shall review the objection for purposes of affirming or modifying NYSERDA's action. Within fifteen (15) working days of the receipt of the objection, the Vice President, or his or her designee, shall notify the Contractor either that NYSERDA's action is affirmed or that it is modified or that, due to the complexity of the issue, additional time is needed to conduct the review; provided, however, in no event shall the extended review period exceed thirty (30) working days.

504.10. Judicial Review. Any determination made by NYSERDA pursuant to this Exhibit that prevents the commencement of the time in which interest will be paid is subject to judicial review in a proceeding pursuant to Article 78 of the Civil Practice Law and Rules. Such proceedings shall only be commenced upon completion of the review procedure specified in Section 504.9 of this Exhibit or any other review procedure that may be specified in this Agreement or by other law, rule, or regulation.

504.11. Court Action or Other Legal Processes.

(a) Notwithstanding any other law to the contrary, the liability of NYSERDA to make an interest payment to a Contractor pursuant to this Exhibit shall not extend beyond the date of a notice of intention to file a claim, the date of a notice of a claim, or the date commencing a legal action for the payment of such interest, whichever occurs first.

(b) With respect to the court action or other legal processes referred to in subdivision (a) of this section, any interest obligation incurred by NYSERDA after the date specified therein pursuant to any provision of law other than Public Authorities Law Section 2880 shall be determined as prescribed by such separate provision of law, shall be paid as directed by the court, and shall be paid from any source of funds available for that purpose.

EXHIBIT C

CERTIFICATION FORM

NYSERDA Agreement No. _____

Name of Seller: _____

Name of Facility: _____

Invoice Number: _____

Serial Number(s): _____

Total Number of ZECs: _____

Terms used in this Certificate are used with the meanings given to such terms in the referenced NYSERDA Agreement.

Seller certifies that, to Seller's knowledge, all of the information provided on the attached invoice requesting payment from NYSERDA is true and accurate; that the ZECs delivered by Seller (identified by the serial number(s) above) by designation for transfer to NYSERDA in accordance with the NYGATS Operating Rules are free and clear of all liens, judgments, encumbrances and similar restrictions created by or on behalf of Seller or any party claiming through Seller, and have not otherwise been, nor will be, sold, retired, claimed or represented by or on behalf of Seller or any party claiming through Seller, as part of electricity output or sales, or used by or on behalf of Seller or any party claiming through Seller, to satisfy obligations in any other jurisdiction.

Seller further certifies that all representations and warranties of the Seller set forth in Section 15.1 of the NYSERDA Agreement are true and correct on the date hereof as though made on the date hereof, other than such representations and warranties that are expressly effective as of an earlier date, in which case, such representations and warranties continue to be true and correct as of such date.

Quarterly Invoice Date: _____
By: _____

EXHIBIT D
ZERO EMISSIONS CREDIT PRICING

The ZEC Price will be determined in six, 2-year Tranches, as follows:

Tranche 1: April 1, 2017 – March 31, 2019
Tranche 2: April 1, 2019 – March 31, 2021
Tranche 3: April 1, 2021 – March 31, 2023
Tranche 4: April 1, 2023 – March 31, 2025
Tranche 5: April 1, 2025 – March 31, 2027
Tranche 6: April 1, 2027 – March 31, 2029

For Tranche 1, the ZEC Price shall be $17.48.

For Tranches 2 through 6, the ZEC Price shall be as calculated by NYSERDA in consultation with DPS staff, calculated for the relevant Tranche t using the following formula:

$ZEC\ Price_t = Max(0, Base\ ZEC\ Price_t - Max(0, (Energy\ Forward\ Index_t + Capacity\ Forward\ Index_t - Zone\ A\ Reference\ Price_t)))$; where

- $Base\ ZEC\ Price_t$ shall be determined as follows for each Tranche:
  - For Tranche 2, the Base ZEC Price shall be $19.59
  - For Tranche 3, the Base ZEC Price shall be $21.38
  - For Tranches 4 through 6, the Base ZEC Price shall be determined using the following formula:

    $Base\ ZEC\ Price_t = Net\ CO2\ Externality_t \times (0.53846—(0.00491 \times Max(0, Min(26.704, (Incremental\ Renewable\ Generation_t / 1{,}000{,}000)) - 8.704)))$; where

    Net CO2 Externality shall be equal to 44.26 for Tranche 4, 49.13 for Tranche 5, and 54.13 for Tranche 6

    Incremental Renewable Generation shall be the total amount, denominated in megawatt-hours, of Renewable Energy Credits ("RECs") qualified to serve Tier 1 of the New York Renewable Energy Standard (i.e. new renewable resources of all types beginning commercial operation on or after January 1 st , 2015 that are eligible to satisfy the Renewable Energy Standard) generated in calendar years 2022, 2024, and 2026 as reported by the New York Generation Attribute Tracking System. The Incremental Renewable Generation for calendar year 2022 will be utilized in determining the Base ZEC Price for Tranche 4, the Incremental Renewable Generation for calendar year 2024 will be utilized in determining the Base ZEC Price for Tranche 5, and the Incremental Renewable Generation for calendar year 2026 will be utilized in determining the Base ZEC Price for Tranche 6.

- Energy Forward Index $_t$ shall be the average NYISO Zone A energy price forecast for the period covered by the Tranche, developed using futures prices reported on the Intercontinental Exchange ("ICE") as follows:

  1) for each trading day during the calendar year preceding each Tranche, On-Peak Monthly Forward Energy Prices and Off-Peak Monthly Forward Energy Prices for the 24 months of the Tranche will be separately averaged, yielding separate average on-peak and off-peak Tranche energy prices for each trading day;

  2) each trading day's average Tranche on-peak and off-peak energy prices (developed in step 1) will be time-weight averaged based on the number of on-peak and off peak hours in the Tranche, yielding a single average all-hours energy price for the Tranche for each trading day;

  3) the average Tranche all-hours energy prices for each of the trading days during the calendar year preceding each Tranche (developed in step 2) will be averaged, yielding the NYISO Zone A energy price forecast for the Tranche expressed in dollars per MWh.

- Capacity Forward Index $_t$ shall be the average NYISO Rest of the State capacity price forecast for the period covered by the Tranche, developed using futures prices reported on the New York Mercantile Exchange ("NYMEX") as follows:

  1) for each trading day during the final 6 months of the calendar year preceding each Tranche, NYMEX Rest of the State Capacity Calendar-Month settled futures prices for the first 12 months of the Tranche will be averaged, yielding a separate average annualized capacity price for each trading day

  2) the average annualized capacity prices for each of the trading days during the final six months of the calendar year preceding each Tranche (developed in step 1) will be averaged, yielding a single average annualized capacity price for the Tranche, expressed in dollars per kilowatt-month

  3) the average annualized capacity price developed in step 2 will be multiplied by 1.3699 to yield an average annualized capacity price for the Tranche expressed in dollars per MWh.

- Zone A Reference Price $_t$ shall be determined as follows for each Tranche:
  - For Tranche 2, the Zone A Reference Price shall be $39
  - For Tranche 3, the Zone A Reference Price shall be $39
  - For Tranches 4 through 6, the Zone A Reference Price shall be determined using the following formula:

    Zone A Reference Price $_t$ = $39 + Energy Basis Adjustment; where

    Energy basis adjustment is determined as follows:

    1) the simple average hourly day-ahead energy price over the six-year period covering calendar years 2017 through 2022 will be calculated using historic price data reported by the New York ISO for New York Zone A ("WEST (ZONE A)"), the R.E. Ginna nuclear unit generation bus ("GINNA _____"), the R.A. FitzPatrick nuclear unit generation bus ("FITZPATRICK _____"), the Nine Mile Point 1 nuclear unit generation bus ("NINE_MILE_1"), and the Nine Mile Point 2 nuclear unit generation bus ("NINE_MILE_2")

    2) each of the five six-year historical average nuclear unit generation bus energy prices will be subtracted from the six-year historical average Zone A energy price to calculate five unit-specific historic energy price basis differentials with Zone A

    3) the five unit-specific historic energy price basis differentials calculated in step 2 will be weighted by their actual six-year cumulative energy output over the 2017 through 2022 period to determine a single weighted-average historic energy basis differential, denominated in dollars per MWh.

    4) if the weighted-average historic energy basis differential calculated in step 3 is between $5 per MWh and $7 per MWh, the Energy Basis Adjustment shall be $0 per MWh

    5) If the weighted-average historic energy basis differential calculated in step 3 is less than $5 per MWh, the Energy Basis Adjustment shall be equal to the weighted-average historic energy basis differential minus $5 per MWh

    6) If the weighted-average historic energy basis differential calculated in step 3 is greater than $7 per MWh, the Energy Basis Adjustment shall be equal to the weighted-average historic energy basis differential minus $7 per MWh.

If the foregoing calculation yields a negative number, the ZEC Price shall be deemed to equal zero ($0).

Example Calculations:

Example 1:

Assumptions
Tranche 2
Energy Forward Index = $42
Capacity Forward Index = $7

Resulting ZEC Price
Base ZEC Price = $19.59
ZEC Price = $19.59 – ($42 + $7 – $39) = $9.59

Example 2:

Assumptions
Tranche 4
Energy Forward Index = $42
Capacity Forward Index = $7
Incremental Renewable Generation = 8,000,000
Energy Basis Adjustment = $0

Resulting ZEC Price
Base ZEC Price = 44.26 x (0.53846 – (.00491 x 0)) = $23.83
ZEC Price = $23.83 – ($42 + $7 – $39) = $13.83

Example 3:

Assumptions
Tranche 4
Energy Forward Index = $42
Capacity Forward Index = $7
Incremental Renewable Generation = 13,000,000
Energy Basis Adjustment = $0

Resulting ZEC Price
Base ZEC Price = 44.26 x (0.53846 – (.00491 x (13,000,000 / 1,000,000 – 8.704)) = $22.90
ZEC Price = $22.90 – ($42 + $7 – $39) = $12.90

This Agreement is entered into as of November 18, 2016 (the "Contract Date") by and between the New York State Energy Research and Development Authority ("NYSERDA"), a public benefit corporation, having a principal business address of 17 Columbia Circle, Albany, New York 12203, and R. E. Ginna Nuclear Power Plant, LLC ("Seller"), a Maryland limited liability company, having a principal business address of 1310 Point Street, Baltimore, MD 21231. NYSERDA and Seller are each referred to herein as a "Party" and are collectively referred to herein as the "Parties." All capitalized terms shall have the meanings ascribed to them in this Agreement.

RECITALS

WHEREAS, on August 1, 2016 the New York State Public Service Commission ("PSC" or the "Commission") adopted a Clean Energy Standard ("CES") program that is intended to achieve the State of New York's environmental, public health, climate policy and economic goals, and to preserve carbon-free attributes of certain existing nuclear generation resources as a bridge to the clean energy future (Case 15-E-0302; Proceeding on Motion of the Commission to Implement a Large-Scale Renewable Program and a Clean Energy Standard , "Order Adopting a Clean Energy Standard," issued and effective August 1, 2016) (the "CES Order"); and

WHEREAS, the CES Order established, as part of the CES, a ZEC Program (as defined below), and established a mechanism for the purchase by NYSERDA of the ZECs (as defined below) of eligible nuclear zero-carbon electric generating facilities that elect to participate in the ZEC Program where a public necessity to encourage the continued creation of the attributes is demonstrated; and

WHEREAS, in accordance with criteria set forth in the CES Order, the Commission has found that there is a public necessity to provide ZEC payments to three nuclear facilities, including the Facility (as defined below); and

WHEREAS, Seller has elected for the Facility to participate in the ZEC Program; and

WHEREAS, the CES Order provides a price to be paid by NYSERDA to Seller for each ZEC delivered to NYSERDA during Tranche 1 (as defined below), and a methodology for the calculation and determination of the price in subsequent Tranches; and

WHEREAS, the CES Order imposes an obligation on each Load Serving Entity to invest in the preservation of certain existing at-risk nuclear zero-emissions attributes to serve their retail customers and accordingly directs LSEs to enter into a contractual relationship with NYSERDA for the purchase of ZECs during each ZEC Program year based on initial forecasts of load and a balancing reconciliation at the end of each program year; and

WHEREAS, NYSERDA anticipates that it will enter into backstop agreements (each, a "Backstop Agreement") with each electric distribution company ("EDC"), as proposed in NYSERDA's Petition filed with the Commission on August 25, 2016 and any Commission order related to that Petition, to guarantee that each LSE covers its obligation to buy from NYSERDA the quantity of ZECs required by the CES Order such that NYSERDA is assured that each ZEC purchased from Seller will be sold to LSEs; and

WHEREAS, Seller agrees to sell to NYSERDA, and NYSERDA agrees to purchase from Seller, ZECs associated with the generation of energy by the Facility and pursuant to the ZEC Program, on the terms and subject to the conditions set forth herein; and

WHEREAS, the Parties recognize that the 12-year Contract Term (as defined below) is an essential item of this Agreement and that Seller has made and will make significant investments in the Facility in reliance upon the existence of such Contract Term.

NOW, THEREFORE, for and in consideration of the premises, the mutual promises and agreements set forth herein and other good and valuable consideration, the receipt, sufficiency and adequacy of which are hereby acknowledged, NYSERDA and Seller, each intending to be legally bound, agree as follows:

Article I

Definitions

The terms defined in this Article I, whenever used in this Agreement (including in any Exhibit hereto), shall have the respective meanings indicated below for all purposes of this Agreement (each such meaning to be equally applicable to the singular and the plural forms of the respective terms so defined). All references herein to a Section, Article or Exhibit are to a Section, Article or Exhibit of or to this Agreement, unless otherwise indicated. The words “hereby”, “herein”, “hereof”, “hereunder” and words of similar import refer to this Agreement as a whole (including any Exhibit) and not merely to the specific section, paragraph or clause in which such word appears. The words “include”, “includes”, and “including” shall be deemed, in every instance, to be followed by the phrase “without limitation.” Whenever the context may require, any pronoun shall include the corresponding masculine, feminine and neuter forms. Except as otherwise expressly provided herein, all references to “dollars” and “$” shall be deemed references to the lawful money of the United States of America.

“ Agreement ” means this ZEC Standard Contract, including Exhibits A (Standard Terms and Conditions For All NYSERDA Agreements); B (NYSERDA Prompt Payment Policy Statement); C (Certification Form); and D (Zero Emissions Credit Pricing), all of which are incorporated herein and made part hereof.

“ Annual ZEC Cap Amount ” means either (i) 20,603,028 ZECs, if the FitzPatrick Facility is in Commercial Operation but is not included in the Nuclear Group, and the Nuclear Group consists of the Facility and the Nine Mile Facility, (ii) 18,412,000 ZECs, if a Permanent Cessation of Operations occurs with respect to the FitzPatrick Facility prior to the FitzPatrick Facility becoming included in the Nuclear Group and the Nuclear Group consists of only the Facility and the Nine Mile Facility, or (iii) 27,618,000 ZECs, if the Nuclear Group consists of the Facility, the Nine Mile Facility and the FitzPatrick Facility, subject to adjustment pursuant to Section 5.2.

" Annual ZEC Cap Reduction Amount " means 666,666 ZECs, if the Nuclear Group consists of the Facility and the Nine Mile Facility, and 1,000,000 ZECs, if the Nuclear Group consists of the Facility, the Nine Mile Facility and the FitzPatrick Facility.

" Applicable Law " means all applicable provisions of all constitutions, treaties, statutes, laws (including the common law), rules, regulations, ordinances, and codes and any order, writ, injunction, decree, judgment, award, decision or determination of any court or any federal, state, municipal or other governmental department, commission, board, bureau, agency, authority or instrumentality, including the NYISO tariff.

" Backstop Agreement " has the meaning set forth in the recitals to this Agreement.

" Business Day " means a day on which Federal Reserve member banks are open for business. A Business Day will begin at 8:00 a.m. and end at 5:00 p.m. Eastern Prevailing Time.

" Certificate " means a certificate as defined in the NYGATS Operating Rules.

" Cessation Tranche Reduction Amount " means 18,412,000 ZECs reduced for a full Tranche which shall be pro-rated for the remaining facilities within a Tranche from the date any facility undergoes a Permanent Cessation of Operations.

" Cessation ZEC Reduction Amount " means 9,206,000 ZECs reduced for a full Contract Year which shall be pro-rated for the remaining facilities within a Contract Year from the date any facility undergoes a Permanent Cessation of Operations.

" Claiming Party " has the meaning set forth in Section 14.2.

" Commercial Operation " means a state of operations under which the Facility is physically generating electric energy, consistent with Good Utility Practice, subject to outages that are consistent with Good Utility Practice, including refueling, planned, and forced outages.

" Common Ownership " means two or more generation facilities being owned, in whole or in part, directly or indirectly, by the same ultimate parent entity or entities.

" Contract Date " has the meaning set forth in the preamble of this Agreement.

" Contract Term " means a term commencing on April 1, 2017 and continuing through March 31, 2029, subject to adjustments pursuant to Article IV (Payment) and Article V (Adjustments).

The Contract Term will be administered in six two-Contract Year Tranches, as follows:

Tranche	1:	April	1,	2017	– March	31,	2019
Tranche	2:	April	1,	2019	– March	31,	2021
Tranche	3:	April	1,	2021	– March	31,	2023
Tranche	4:	April	1,	2023	– March	31,	2025
Tranche	5:	April	1,	2025	– March	31,	2027
Tranche	6:	April	1,	2027	– March	31,	2029

" Contract Year " means a 12-month period commencing on April 1, 2017 and each subsequent 12-month period commencing on an anniversary thereof during the Contract Term.

" EDC " has the meaning set forth in the recitals to this Agreement.

" Effective Date " means the date on which ZEC Standard Contracts have been executed by NYSERDA and each of the owners of the Facility, the FitzPatrick Facility and the Nine Mile Facility.

" Enjoined " or " Enjoinment " means if any court issues a final, non-appealable order, writ, injunction, decree, judgment, award, decision or determination that invalidates or permanently terminates the ZEC Program or otherwise permanently enjoins, impedes or prevents any Party from participating in the ZEC Program or fulfilling its material obligations under this Agreement, as applicable.

" ESCO " means an "energy service company" making sales of electricity in the State of New York.

" Extended Force Majeure Event " has the meaning set forth in Section 14.3(a).

" Facility " means the R.E. Ginna nuclear facility located in Ontario, New York (PTID 23603).

" Facility Revenue Meter " means the meter on the high side of the main generator step-up transformer of the busbar of the Facility (Gen PTID: 23603), which is the meter for the Facility designated by the NYISO for measuring the output of the Facility that is referenced in Article V of the NYGATS Operating Rules as the Facility's "Revenue-Quality Meter."

" Final CES Order " has the meaning set forth in Section 13.3.

" FitzPatrick Facility " means the James A. FitzPatrick nuclear generation facility located in Scriba, New York (PTID 23598).

" Force Majeure Event " has the meaning set forth in Section 14.1.

" Force Majeure Remedy Plan " has the meaning set forth in Section 14.3(a).

" Good Utility Practice " means any of the practices, methods or acts engaged in or approved by a significant portion of the electric utility or the nuclear electric power generation industry in the United States during the relevant time period, or any of the practices, methods or acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice or method, or act to the exclusion of all others, but rather to delineate acceptable practices, methods, or acts generally accepted in the region.

" Governmental Authority " Any federal, state, local, municipal, judicial or other government or any other governmental, quasi-governmental, regulatory or administrative agency, commission, court or other authority (including for federal purposes the NYISO) lawfully exercising or entitled to exercise any administrative, executive, judicial, legislative, police, policy, regulatory or taxing authority or power.

" Load-Serving Entity " or " LSE " means any entity or individual that sells retail commodity electricity supply to an end-use customer located in New York State, including any ESCO and each electric distribution company regulated by the PSC, serving in their roles as electric commodity supplier of last resort, jurisdictional municipal utilities, community choice aggregators not otherwise served by an ESCO, customers purchasing power directly from the NYISO, and the Long Island Power Authority and the New York Power Authority to the extent the Long Island Power Authority and the New York Power Authority have voluntarily agreed to act as LSEs.

" LSE Agreement " means a contract between NYSERDA and an LSE as contemplated in the CES Order, pursuant to which NYSERDA shall sell, and LSEs shall purchase, ZECs.

" MWh " means a unit for measuring power that is equivalent to 1,000 kilowatts of electricity used continuously for one hour.

" Nine Mile Facility " means the Nine Mile Point nuclear generation facility, consisting of the Nine Mile Unit 1 and Unit 2 facilities, located in Oswego, New York (PTID 23575 and 23744, respectively).

" NRC " means the U.S. Nuclear Regulatory Commission and any successor agency thereto.

" Nuclear Group " means a group of nuclear generating facilities in New York State, consisting of the Facility and the Nine Mile Facility; provided that the "Nuclear Group" shall also include the FitzPatrick Facility if the FitzPatrick Facility comes under Common Ownership with the Facility and the Nine Mile Facility.

" NYGATS " means the New York Generation Attribute Tracking System, established by NYSERDA pursuant to the Public Authorities Law.

" NYGATS Operating Rules " means the rules, as may be amended from time to time, that govern the operation of the NYGATS by NYSERDA and its designated NYGATS Administrator, and the participation in and use of the NYGATS by users.

" NYISO " means the New York Independent System Operator, Inc.

" NYISO Rules " means the NYISO tariff, and all NYISO manuals, rules, procedures, agreements or other documents governing the participation of market participants in the NYISO markets as in effect from time to time.

" NYSERDA Prompt Payment Policy " has the meaning set forth in Exhibit B.

" NYSERDA ZEC Account " means the account established in NYGATS into which Seller shall deliver (by designation for transfer in accordance with the NYGATS Operating Rules) ZECs under the terms and conditions of this Agreement.

" Non-Claiming Party " has the meaning set forth in Section 14.2.

" Permanent Cessation of Operations " means the date upon which the Facility actually permanently shuts down and ceases operations following the filing of a Notice of Permanent Cessation of Operations with respect to a specific nuclear generation facility with the NRC pursuant to 10 C.F.R. Section 50.82(a)(1)(i).

" Public Authorities Law " means the Public Authority Act codified in the Consolidated Laws of New York at Public Authorities Law Sec. 1000 *et seq.*

" Seller ZEC Account " means the account established in the NYGATS for the deposit with NYGATS of ZECs created under the NYGATS Operating Rules for the Facility from which account Seller shall deliver ZECs(by designation for transfer in accordance with the NYGATS Operating Rules) to the NYSERDA ZEC Account under the terms and conditions of this Agreement.

" Threshold Amount " has the meaning set forth in Section 5.2(a).

" Tranche " means a two-Contract Year period for the sale of the ZECs, as set forth in the definition of "Contract Term" above.

" Tranche Cap Amount " means: (i) 41,206,056 ZECs, if the FitzPatrick Facility is in Commercial Operation and the Nuclear Group consists of the Facility and the Nine Mile Facility, (ii) 36,824,000 ZECs, if a Permanent Cessation of Operations occurs with respect to the FitzPatrick Facility prior to the FitzPatrick Facility becoming part of the Nuclear Group, and (iii) 55,236,000 ZECs, if the Nuclear Group consists of the Facility, the Nine Mile Facility and the FitzPatrick Facility.

" Tranche Cap Reduction Amount " means 1,333,333 ZECs, if the Nuclear Group consists of the Facility and the Nine Mile Facility, and 2,000,000 ZECs, if the Nuclear Group consists of the Facility, the Nine Mile Facility and the FitzPatrick Facility.

" ZEC Price " means the price that NYSERDA shall pay for each ZEC delivered by Seller (by designation for transfer in accordance with the NYGATS Operating Rules) to the NYSERDA ZEC Account during the Contract Term. The ZEC Price shall be as provided in Exhibit D.

" ZEC Program " means the zero-emissions credit requirement program as established by the PSC through the CES Order and administered by NYSERDA and its designated NYGATS administrator in accordance with the NYGATS Operating Rules.

" ZEC Quantity " means, with respect to any Contract Year, the lesser of (a) the quantity of ZECs produced by the Nuclear Group in such Contract Year and (b) the Annual ZEC Cap Amount that applies to the Nuclear Group for such Contract Year, subject to adjustments pursuant to Article IV (Payment) and Article V (Adjustments).

" Zero Carbon Electric Generating Facility " means an electric generating facility that uses energy released in the course of nuclear fission to generate electricity.

" Zero Emissions Credit " or " ZEC " means a credit for the zero-emissions attributes of one (1) MWh of electric energy production by an eligible Zero Carbon Electric Generating Facility, such as the Facility, represented by a Certificate, which credit is purchased by NYSERDA or a LSE from Seller to reduce carbon consumption by retail electric consumers in New York State, such purchases to be accomplished through NYGATS pursuant to the NYGATS Operating Rules.

Article II

Purchase and Sale of Rights to ZECs

Section 2.1. Eligibility . The Parties' respective obligations under this Agreement are expressly conditioned on the eligibility of Seller's Facility under the ZEC Program, as of the Effective Date.

Section 2.2. ZEC Sales . On the terms and subject to the conditions and provisions of this Agreement, Seller shall sell, assign, transfer, convey, and deliver to NYSERDA, and NYSERDA shall purchase, confirm transfer, and receive from Seller, all right, title and interest in ZECs measured at the Facility Revenue Meter and created in the Seller ZEC Account by NYGATS during the Contract Term at the ZEC Price and in accordance with the NYGATS Operating Rules. With respect to each Contract Year during the Contract Term, NYSERDA shall purchase from Seller such ZECs, up to the ZEC Quantity among the applicable Nuclear Group for such Contract Year, but shall not be obligated to purchase such ZECs over and above such ZEC Quantity. Seller shall, for the duration of the Contract Term, and subject to the terms and conditions of this Agreement, produce zero-emissions attributes, and, upon receipt of ZECs in the Seller ZEC Account, transfer such ZECs to the NYSERDA ZEC Account. For the avoidance of doubt, and except as set forth in Section 2.5, ZECs are the only product Seller is selling and NYSERDA is buying from Seller under this Agreement. Seller is not selling and NYSERDA is not purchasing any electricity or any capacity, energy, or ancillary services or other products or attributes (other than ZECs) associated with the Facility.

Section 2.3. ZEC Rights and Use . Such right, title and interest shall include perpetual and exclusive rights to all ZECs transferred under this Agreement, including the exclusive rights to claim or represent, consistent with New York State Environmental Disclosure rules: (a) that the ZECs are associated with energy that was generated by the Facility; and (b) that New York State and or the ZEC Program is responsible for the environmental benefits including reductions in emissions and/or other pollution or any other environmental benefit resulting from the generation of the energy associated with ZECs purchased hereunder.

Section 2.4. Risk of Loss . Title and risk of loss of ZECs will transfer from Seller to NYSERDA upon completion of (a) delivery by Seller of such ZECs into the NYSERDA ZEC Account (by designation for transfer in accordance with the NYGATS Operating Rules) and (b) receipt by NYSERDA of such ZECs into the NYSERDA ZEC Account (by confirmation of the transfer in accordance with the NYGATS Operating Rules). Each Party is responsible for completing all actions it is required to undertake in NYGATS to establish its respective ZEC

account and to cause the transfer of each ZEC in accordance with the NYGATS Operating Rules. Seller shall deliver all right, title and interest in and to the ZECs (by designation for transfer in accordance with the NYGATS Operating Rules) free and clear of all liens, judgments, encumbrances and restrictions created by or on behalf of Seller or any party claiming through Seller.

Section 2.5 . Other Attributes . In the event that the Facility becomes eligible for credits under any emission-trading, emissions recordation or other carbon emissions reduction regime other than the CES, NYSERDA may request that Seller take reasonable actions necessary to apply for and secure such title to such credits, to the maximum extent to which the Facility is entitled. Seller shall provide NYSERDA with evidence of taking such actions. NYSERDA and Seller shall reasonably cooperate to cause title to such credits to be conveyed to NYSERDA after such title is secured by Seller.

Section 2.6 . Equivalent Programs . This Agreement may be modified or terminated by the Commission if there is a national, NYISO, or other program instituted that pays for or internalizes the value of the Facility's zero-emissions attributes in a manner that adequately replicates the economics of the ZEC Program such that the Commission in its sole discretion is satisfied that the zero-emissions attributes are no longer at risk and that discontinuing the ZEC Program can be done in a manner that is fair to both the Facility owners and the New York State ratepayers. Nothing herein shall require NYSERDA or Seller to take any action violative of Applicable Law or an order of court of competent jurisdiction.

Section 2.7 . NYSERDA Assignment of ZECs . NYSERDA shall be free to sell, assign or transfer to any entity, or otherwise encumber, any of the ZECs NYSERDA has acquired under this Agreement, at any time and from time to time, and on such terms and conditions as NYSERDA may desire; *provided* , *however,* NYSERDA's actions must at all times be in accordance with the CES Order.

Section 2.8 . Opinions . Within thirty (30) days after the Seller receives written notice from NYSERDA stating that the Effective Date has been achieved, each Party shall deliver to the other Party an opinion of counsel (which may be an opinion of its in-house counsel) containing the opinions supporting the Seller's and NYSERDA's representations and warranties set forth in Sections 9.1(a), (b) and (c) and Sections 10.1(a), (b), (c) and (d), respectively, subject to customary assumptions, qualifications and exceptions.

Section 2.9 . ZEC Sales to LSEs . To the extent permitted by the Commission and the CES Order, Seller may sell ZECs directly to LSEs. The Parties shall undertake good faith efforts to negotiate required amendments to this Agreement to account for such ZEC sales by Seller to LSEs.

Article III

ZEC Qualification; Operating Condition

Section 3.1 . ZEC Qualification . The Facility's electric generation production shall be measured by the Facility Revenue Meter. Such measurement shall be used as a basis for

determining pursuant to the ZEC Program the amount of ZECs related to such generation to be created and recorded in NYGATS. NYSERDA shall track (a) ZECs through NYGATS and NYSERDA's program administrator and (b) the contribution of such ZECs toward reducing carbon consumption by retail electric consumers in New York State.

Section 3.2 . Obligation to Maintain Good Operating Condition . For the duration of the Contract Term, Seller shall: (a) comply with applicable NRC requirements (including insurance requirements); (b) maintain the Facility in Commercial Operation in good operating condition in accordance with Good Utility Practice; and (c) operate the Facility in compliance with the NYISO Rules.

Article IV

Payment

Section 4.1 . Invoices . Seller shall submit invoices to NYSERDA on a quarterly basis throughout the Contract Term for ZECs created in the Seller ZEC Account by NYGATS for the preceding three (3) month period in accordance with the NYGATS Operating Rules and delivered (by designation for transfer in accordance with the NYGATS Operating Rules) to the NYSERDA ZEC Account. Each invoice shall be accompanied by a CERTIFICATION FORM, the form of which is set forth as Exhibit C, setting forth the ZECs to be delivered. Invoices shall not be submitted before the fifteenth (15) day of the month following the close of each quarter; invoices submitted prior to the fifteenth (15) day of the month following the close of each quarter shall not be considered proper invoices for purposes of NYSERDA's Prompt Payment Policy. Invoices shall be submitted electronically to NYSERDA's online invoice system at https://services.nyserda.ny.gov/Invoices/ with a copy to the Office of the General Counsel at general.counsel@nyserda.ny.gov. Such invoices shall make reference to the Agreement number shown on page 1 of this Agreement. Such invoices shall include a statement of the amount due and payable by NYSERDA to Seller, which amount shall be calculated in accordance with Section 4.2.

Section 4.2 . Payment . NYSERDA will confirm receipt of ZECs in accordance with the NYGATS Operating Rules and make payment to Seller for ZECs delivered, subject to true-up pursuant to Article V. NYSERDA will not confirm receipt and will not pay, with respect to any Contract Year, for ZECs in excess of the applicable ZEC Quantity. The amounts payable shall be calculated as the multiplicative product of (a) the applicable ZEC Price; and (b) the number of ZECs delivered by Seller up to the applicable ZEC Quantity (by designation for transfer in accordance with the NYGATS Operating Rules) to the NYSERDA ZEC Account prior to the date on invoice.

Section 4.3 . Prompt Payment Policy . NYSERDA will make payments to the Seller in accordance with and subject to its Prompt Payment Policy Statement, attached hereto as Exhibit B. Such payments shall be made by wire transfer to an account designated by the Seller.

Section 4.4 . Limitation on ZEC Purchase Obligation . Notwithstanding any other provision in this Agreement to the contrary, Seller acknowledges that NYSERDA's ability to make payments hereunder is limited to the amount NYSERDA realizes from ZEC sales transactions to LSEs, which obligations will be guaranteed by agreements NYSERDA anticipates entering into with each EDC, in accordance with the CES Order; provided, however, that if so authorized by the Commission, NYSERDA shall use available funds which NYSERDA has rights to use, in accordance with the Commission's authorization to make payments hereunder if the proceeds from such ZEC sales transactions are not sufficient to cover NYSERDA's payment obligations hereunder. Notwithstanding NYSERDA's obligation pursuant to Section 4.5 to enforce agreements to ensure that it can meet its obligations hereunder, NYSERDA shall not be obligated to purchase ZECs to the extent it does not have sufficient funds (from those referenced in the immediately preceding sentence) to do so, including in the event that NYSERDA, LSEs or EDCs are precluded by a court of competent jurisdiction from fulfilling their respective obligations under the ZEC Program. In the event that NYSERDA suffers a cash shortfall in the manner described in this Section 4.4, NYSERDA shall, subject to Applicable Law, use its sole discretion in purchasing reduced ZECs pro rata across all of the facilities to the extent possible.

Section 4.5 . LSE Agreements . NYSERDA shall use commercially reasonable efforts, as authorized by the Commission, to enter into and maintain LSE Agreements in sufficient numbers and with sufficient pricing and on such other terms and conditions as NYSERDA may determine necessary or appropriate to enable NYSERDA to fulfill its payment obligations under this Agreement. Subject to Applicable Law, NYSERDA shall use commercially reasonable efforts to enforce its rights and remedies under each of its LSE Agreements and under any related EDC guarantee commitments.

Article V

Adjustments

Section 5.1. True-Up Adjustments . NYSERDA may adjust, including by means of set-off, payments to subsequent invoices consistent with adjustments by NYGATS based on actual metered electric energy production data from the Facility Revenue Meter, associated ZEC creation data and the number of ZECs delivered and received; provided, however, NYSERDA's right to a specific payment adjustment under this Section 5.1 shall expire three (3) years after the issuance of Seller's invoice to which such payment adjustment relates.

Section 5.2. Other Adjustments . NYSERDA may also make the following adjustments under the following circumstances:

(a) Failure to Produce . If during any Tranche, the Nuclear Group fails to generate in the aggregate an amount of electric energy sufficient to support the creation of ZECs pursuant to the ZEC Program in an amount equal to at least eighty-five percent (85%) of the applicable Tranche Cap Amount (the "Threshold Amount"), then the Annual ZEC Cap Amount and the Tranche Cap Amount applicable to the Nuclear Group in the immediately subsequent Tranche shall decrease by the applicable Annual ZEC Cap Reduction Amount and the applicable Tranche Cap

Reduction Amount, respectively. If, during any subsequent Tranche, the Nuclear Group generates in the aggregate an amount of electric energy sufficient to support the creation of ZECs pursuant to the ZEC Program in an amount at or above the new lower cap and obligation, the Annual ZEC Cap Amount and Tranche Cap Amount will be restored for the Nuclear Group in subsequent Tranches. Subject to Sections 2.2, 3.2 and 12.1(b), but notwithstanding any other provision in this Agreement to the contrary, the cap reductions described in this Section 5.2(a) shall be NYSERDA's sole remedy for Seller's failure to produce the Threshold Amount and transfer ZECs to the NYSERDA ZEC Account, in accordance with the terms of this Agreement, through the Contract Term;

(b) Permanent Cessation of Operations. As of the Contract Date, the Nuclear Group consists of the Facility and the Nine Mile Facility. If, during the Contract Term, a Permanent Cessation of Operations occurs with respect to (a) the FitzPatrick Facility or (b) the Nine Mile Facility, then, NYSERDA shall make any payments due to such facility in accordance with obligations hereunder already performed by such facility. If a Permanent Cessation of Operations occurs with respect to the FitzPatrick Facility prior to the FitzPatrick Facility becoming part of the Nuclear Group, then, effective on the date of the facility's Permanent Cessation of Operations, the Annual ZEC Cap Amount and the Tranche Cap Amount shall be modified in accordance with their respective definitions in Article I. If a Permanent Cessation of Operations occurs with respect to (a) the FitzPatrick Facility after the FitzPatrick Facility becomes part of the Nuclear Group or (b) the Nine Mile Facility, then effective on the date of the facility's Permanent Cessation of Operations, the Annual ZEC Cap Amount and the Tranche Cap Amount shall be reduced by the Cessation ZEC Reduction Amount and Cessation Tranche Reduction Amount, respectively. For the purposes of this Section 5.2(b), the Permanent Cessation of Operations of either Unit 1 or Unit 2 of the Nine Mile Facility shall constitute the Permanent Cessation of Operations of the entire Nine Mile Facility;

(c) Other Programs. This Agreement may be modified or terminated if there is a national, NYISO, or other program instituted that pays for or internalizes the value of the Facility's zero-emissions attributes in a manner that adequately replicates the economics of the ZEC Program such that the Commission in its sole discretion is satisfied that the zero-emissions attributes are no longer at risk and that discontinuing the mechanism can be done in a manner that is fair to both the Facility owners and the New York State ratepayers. Nothing herein shall require NYSERDA or Seller to take any action violative of Applicable Law or an order of court of competent jurisdiction; and

(d) LSE Agreements. If, during the Contract Term, the Seller enters into an agreement with an LSE for the sale of ZECs, the Annual ZEC Cap Amount and the Tranche Cap Amount, as the case may be, shall be reduced by the same number of ZECs that Seller contracts to sell to the LSE; *provided* that, for the Tranche in which the effective date of such contract occurs, such modifications shall be made on a pro rata basis.

Article VI

Records and Reports

Section 6.1. Additional Documents . Within ten (10) Business Days after Seller receives written notice from NYSERDA stating that the Effective Date has been achieved, Seller shall provide to NYSERDA:

(a) certificates, dated as of the most recent practicable date prior to delivery of the opinion referenced in Section 2.8, issued by the Maryland Secretary of State confirming the corporate good standing of the Seller; and

(b) a certificate of an appropriate officer of the Seller in form and substance reasonably satisfactory to NYSERDA and certifying: (i) the names and signatures of the officers of the Seller authorized to sign any documents to be delivered hereunder; and (ii) the accuracy and completeness of resolutions of the Seller, authorizing and approving all matters in connection with the transactions contemplated thereby.

Seller shall promptly provide NYSERDA with updated and corrected versions of the above-referenced certificates upon any change in the information provided therein.

Section 6.2. Maintenance of Records . The Seller shall keep, maintain, and preserve at its principal office throughout the term of the Agreement and for a period of seven (7) years following the expiration of this Agreement, full and detailed books, accounts, and records pertaining to Seller's performance under the Agreement.

Article VII

Audit; Alternative Pricing Source

Section 7.1. Audit . NYSERDA shall have the right from time to time and at all reasonable times during the Contract Term and such period thereafter, upon reasonable notice to Seller, to inspect and audit any and all books, accounts and records pertaining to Seller's performance under this Agreement, at the office or offices of the Seller where they are then being kept, maintained and preserved. If such books, accounts and records are not kept at an office within the State of New York, within a reasonable time of a request by NYSERDA, Seller shall make such books, accounts and records available to NYSERDA at NYSERDA's offices or at an agreed upon location within the State of New York. Any payment made under this Agreement shall be subject to retroactive adjustment (reduction or increase) regarding amounts included therein which are found by NYSERDA on the basis of any audit of the Seller by an agency of the United States, the State of New York or NYSERDA not to constitute a properly invoiced amount.

Section 7.2. Alternative Pricing Source . If any of the prices utilized in Exhibit D of this Agreement fail to be announced or published by the relevant provider, or are otherwise

unavailable on a temporary or permanent basis, promptly upon becoming aware of such circumstances, the Parties shall negotiate in good faith to agree upon a mutually acceptable alternative pricing source, index or calculation method that most closely approximates the discontinued prices, subject to Commission authorization as necessary.

Article VIII

Assignments

Section 8.1. General Restrictions . Except as specifically provided under Section 8.2, the assignment, transfer, conveyance, subcontracting or other disposal of this Agreement or any of the Seller's rights, obligations, interests or responsibilities hereunder, in whole or in part, without the express prior consent (not to be unreasonably withheld, conditioned or delayed) in writing of NYSERDA shall be void and of no effect as to NYSERDA. Seller agrees to compensate NYSERDA for NYSERDA's reasonable costs and expenses incurred by its use of outside attorneys, consultants, accountants and advisors in connection with this Agreement in response to Seller's requests made pursuant to this Section 8.1. NYSERDA shall provide an invoice to Seller for such charges, with appropriate documentation, and Seller shall pay such invoice within thirty (30) Days.

Section 8.2. Permitted Assignments . Notwithstanding the general restriction in Section 8.1:

(a) Seller may, without NYSERDA's prior written consent, grant a security interest in or conditionally assign this Agreement as collateral in connection with financing arrangements; provided that Seller provides prompt notice to NYSERDA of such collateral assignment;

(b) Seller may, without NYSERDA's prior written consent, assign, transfer or convey Seller's rights, obligations, interests or responsibilities hereunder pursuant to an assignment or transfer of Seller's license to operate approved by the NRC; and

(c) any change in ownership or control of Seller or a direct or indirect parent of Seller shall not require the prior written consent of NYSERDA; provided that Seller shall provide NYSERDA with any NRC or Commission filings with respect to such change in ownership or control promptly after such filings have been submitted to the NRC or the Commission.

Article IX

Seller's Representations and Warranties

Section 9.1. As a material inducement to NYSERDA to enter into this Agreement, Seller makes the following representations and warranties, as of the Effective Date, all of which shall survive the execution and delivery of this Agreement and any termination:

(a) (1) that Seller is a limited liability company duly organized, validly existing and in good standing under the laws of the jurisdiction of its organization; (2) has all requisite limited liability company power, and has all material governmental permits necessary to own its assets or lease and operate its properties and carry on

its business as now being or as proposed to be conducted, to construct, finance, own, maintain and operate the Facility, to execute and deliver this Agreement, and to consummate the transactions contemplated herein; and (3) is qualified to do business and is in good standing in all jurisdictions in which the nature of the business conducted by it makes such qualification necessary;

(b) that the execution, delivery and performance by Seller, the entry into this Agreement by Seller, and the consummation of the transactions contemplated by this Agreement: (1) have been duly authorized by all requisite limited liability company action (including any required action of its members); and (2) will not (i) violate any applicable provision of law, statute, rule, regulation or order of any governmental agency or any provision of the limited liability company agreement or other governing documents of Seller; (ii) violate, conflict with, result in a breach of or constitute (alone or with notice or lapse of time or both) a default or an event of default under any indenture, agreement (including the respective limited liability company agreements of Seller), mortgage, deed of trust, note, lease, contract or other instrument to which Seller is a party or by which it or any of its property is bound; or (iii) result in the creation or imposition of any lien upon any property or assets of the Seller;

(c) that this Agreement has been duly executed and delivered by Seller and constitutes the legal, valid and binding obligation of Seller enforceable against Seller in accordance with the terms thereof; and

(d) that Seller is in compliance with Applicable Law that may in any way affect the performance of this Agreement, except where the failure to so comply would not result in a material adverse effect on Seller's ability to perform its material obligations hereunder.

Article X

NYSERDA's Representations and Warranties

Section 10.1. As a material inducement to Seller to enter into this Agreement, NYSERDA makes the following representations and warranties, as of the Effective Date, all of which shall survive the execution and delivery of this Agreement and any termination:

(a) that NYSERDA is an instrumentality of the State of New York and a public authority and public benefit corporation, created under the New York State Public Authorities Law, validly existing and in good standing under the laws of the State of New York;

(b) that NYSERDA has all necessary power and authority to execute and deliver this Agreement and all other agreements contemplated herein and hereby and to consummate the transactions contemplated hereby and thereby. The execution and delivery by NYSERDA of this Agreement and all other agreements contemplated herein and hereby and the consummation of the transactions

contemplated hereby and thereby have been or, if not yet executed and delivered, will be when executed and delivered, and no other actions or proceedings on the part of NYSERDA are necessary to authorize this Agreement or any other agreement contemplated herein and hereby or the consummation of the transactions contemplated hereby and thereby;

(c) that the execution, delivery and performance by NYSERDA of this Agreement will not (1) violate any applicable provision of law, statute, rule, regulation or order of any governmental agency or, any provision of the Public Authorities Law; (2) violate, conflict with, result in a material breach of or constitute (alone or with notice or lapse of time or both) a material default or event of default under any indenture, agreement, mortgage, deed of trust, note, lease, contract or other instrument to which NYSERDA is a party or by which NYSERDA or any of its property is bound; (3) result in the creation or imposition of any lien upon any property or assets of NYSERDA; or (4) require any consent or approval of, registration or filing with, or any other action by, any Governmental Authority, except such as have been obtained or made and are in full force and effect. This Agreement will not conflict with any other agreement or contract to which NYSERDA is a party;

(d) that this Agreement has been duly executed and delivered by NYSERDA and constitutes the legal, valid and binding obligation of NYSERDA enforceable against NYSERDA in accordance with the terms thereof;

(e) that NYSERDA is familiar with and in compliance with Applicable Law, except where the failure to so comply would not result in a material adverse effect on NYSERDA's ability to perform its material obligations hereunder; and

(f) that there is no action, suit or claim at law or in equity, or before or by a Governmental Authority pending or, to the best knowledge of NYSERDA after due inquiry, threatened against NYSERDA or affecting any of its properties or assets which could reasonably be expected to result in a material adverse effect on NYSERDA's ability to perform its obligations.

Article XI

Indemnification

Section 11.1. Indemnification . Seller shall protect, indemnify and hold harmless NYSERDA and their respective officials, trustees, officers, directors, employees, agents, representatives and contractors from and against all liabilities, losses, claims, damages, judgments, penalties, causes of action, costs and expenses (including reasonable attorneys' and/or experts' fees and expenses) imposed upon or incurred by or asserted against NYSERDA resulting from, arising out of or relating to Seller's material breach of this Agreement. The obligations of Seller under this Article shall survive any expiration or Termination of this Agreement, and shall not be limited by any enumeration herein of required insurance coverage.

Article XII

Events of Default

Section 12.1. Event of Default . For the purposes of this Agreement, "Event of Default" shall mean any of the following:

(a) Representations and Warranties . Any representation or warranty made in this Agreement that shall prove to have been false or misleading in any material respect as of the time made or deemed to be made;

(b) Other Obligations . A Party shall default in the performance of any of its obligations under Sections 2.2, 2.4, 3.2, 4.2, 6.2 and 7.1 of this Agreement and such default shall continue unremedied for a period of thirty (30) days after the defaulting Party receives notice thereof;

(c) Voluntary Proceedings . A Party shall (i) apply for or consent to the appointment of, or the taking of possession by, a receiver, custodian, trustee or liquidator of itself or of all or a substantial part of its property; (ii) make a general assignment for the benefit of its creditors; (iii) commence a voluntary case under the United States Bankruptcy Code; (iv) file a petition seeking to take advantage of any other law relating to bankruptcy, insolvency, reorganization, winding-up, or composition or readjustment of debts; (v) fail to convert in a timely and appropriate manner, or acquiesce in writing to, any petition filed against it in an involuntary case under the United States Bankruptcy Code; (vi) cancel this Agreement, or sell ZECs to a third party (whether by a Party or a receiver, custodian, trustee or liquidator) other than NYSERDA or (subject to Section 2.9) an LSE; or (vii) take any corporate action for the purpose of effecting any of the foregoing;

(d) Involuntary Proceedings . A proceeding or case shall be commenced against a Party, without its application or consent, in any court of competent jurisdiction, seeking (i) its liquidation, reorganization, dissolution or winding-up, or the composition or readjustment of its debts; (ii) the appointment of a trustee, receiver, custodian, liquidator or the like of all or any substantial part of its assets; (iii) similar relief under any law relating to bankruptcy, insolvency, reorganization, winding-up, or composition or adjustment of debts, and such proceeding or case shall continue undismissed, or an order, judgment or decree approving or ordering any of the foregoing shall be entered and continue unstayed and in effect, for a period of sixty (60) or more days; or an order for relief against a Party, shall be entered in an involuntary case under the Bankruptcy Code; or (iv) as part of such a proceeding, a Party, receiver, custodian, trustee or liquidator shall cancel this Agreement, or sell ZECs to a third party other than NYSERDA or (subject to the terms of Section 2.9) an LSE;

(e) Unauthorized Transfer. The transfer of any ZEC included in the ZEC Quantity by Seller to any transferee other than NYSERDA or an LSE as permitted by the Commission; or

(f) Abandonment/Cessation of Commercial Operation. Seller's failure to maintain Commercial Operation, Seller's abandonment of the Facility or a Permanent Cessation of Operations with respect to the Facility.

Section 12.2. Effect of an Event of Default. In addition to any other remedy available to it under this Agreement or under Applicable Law, upon any occurrence of an Event of Default, the non-defaulting Party shall be entitled to suspend performance of its obligations under this Agreement until the earlier of such time as (a) such Event of Default has been cured or (b) the non-defaulting Party has elected to terminate this Agreement pursuant to Article XIII below.

Article XIII

Termination

Section 13.1. Termination. This Agreement may be terminated:

(a) at any time by the non-defaulting Party if an Event of Default occurs and continues unremedied following any applicable notice and cure period;

(b) at any time by the mutual written consent of Seller and NYSERDA;

(c) unless otherwise mutually agreed upon by NYSERDA and Seller in writing, on the expiration of the Contract Term (subject to Section 15.3 of this Agreement);

(d) by Seller, in the event that the ZEC Price becomes zero dollars ($0) at any time during the Contract Term; or

(e) by Seller or NYSERDA upon Enjoinment.

Section 13.2. Sale of FitzPatrick Facility. Unless the Commission orders otherwise prior to the commencement of Tranche 2, should Seller fail to reasonably demonstrate to NYSERDA, on or before September 1, 2018, that the FitzPatrick Facility has been purchased and that title to the FitzPatrick Facility has passed to a third party licensee unaffiliated with the current owner of the FitzPatrick Facility, this Agreement may be terminated by NYSERDA by providing written notice thereof to Seller on or at any time after September 2, 2018, but before April 1, 2019, pursuant to which the Parties' respective obligations shall terminate at the end of Tranche 1 with no further payment or performance obligation; provided that NYSERDA shall make any payments due in accordance with obligations hereunder already performed (such termination right defined herein as the "FitzPatrick Condition"). Seller has requested clarification or rehearing from the Commission that the FitzPatrick Condition does not apply to the procurement of ZECs from the Facility.

Section 13.3. Final Order. If one or more proceedings are commenced or pending by or before any Governmental Authority seeking to modify, terminate, amend, alter, avoid or

invalidate any of the CES Order related to this Agreement or this Agreement, or any material provision thereof, the Parties shall continue to perform all of their respective obligations hereunder until such time that the Commission's decision on the CES Order and ZEC Program is final and non-appealable ("Final CES Order"). If a Final CES Order by the Commission has the effect of materially changing the original economic benefits of the ZEC Program or this Agreement for a Party (but not Enjoining the ZEC Program), the Parties shall negotiate in good faith to amend this Agreement to conform to the Final CES Order in order to effectuate as closely as reasonably possible the intent of the Parties hereunder on the Effective Date and preserve the original economic benefit to the Parties under this Agreement, subject to Commission approval as necessary. In the event that the Parties are not able to reach a mutually acceptable agreement, either Party, at its reasonable discretion, may terminate this Agreement. In the event the ZEC Program is Enjoined, either Party may terminate this Agreement pursuant to Section 13.1(e) and neither Party shall be required thereafter to perform any of the obligations under this Agreement. Notwithstanding any provision of this Section 13.3 to the contrary, nothing in this Section 13.3 shall affect the authority of the Commission to take any action pursuant to Sections 2.6 and 5.2(c) of this Agreement.

Section 13.4. Change in Law . Except as provided in Section 13.3 of this Agreement, the Parties agree that their respective obligations under this Agreement shall continue unmodified in full force and effect for the Contract Term in the event that a non-judicial Governmental Authority of the State of New York, including the Commission, modifies, terminates, amends, alters, avoids or invalidates the CES Order or the Final CES Order. Further, if any other Applicable Law has the effect of materially changing the original economic benefits of this Agreement for a Party or the economics of owning and operating the Facility, the Parties shall negotiate in good faith to amend this Agreement to conform to such new Applicable Law in order to effectuate as closely as reasonably possible the intent of the Parties hereunder on the Effective Date and preserve the original economic benefit to the Parties under this Agreement, subject to Commission approval as necessary. In the event that the Parties are not able to reach a mutually acceptable agreement, either Party, at its reasonable discretion, may terminate this Agreement. Notwithstanding any provision of this Section 13.4 to the contrary, nothing in this Section 13.4 shall affect the authority of the Commission to take any action pursuant to Sections 2.6 and 5.2(c) of this Agreement.

Section 13.5. Material Adverse Change . Seller shall promptly notify NYSERDA if it becomes aware of any damage to or loss of use of the Facility that could reasonably be expected to materially adversely affect the Facility and its ability to generate electricity and pursuant to the ZEC Program the subsequent creation of ZECs related to such generation. In the event of (a) the unavailability, interruption, breakdown or failure of equipment at the Facility or (b) other similar material adverse change to the operating condition of the Facility that, with respect to either or both of the events or conditions described in the preceding clause (a) or (b), could reasonably be expected to cost more than Forty Million Dollars ($40,000,000), as demonstrated by an independent engineering report provided by Seller, to repair or replace in accordance with Good Utility Practice and Seller's standard operating procedures, Seller may, at its sole option, terminate this Agreement with no further payment or performance obligation; provided that NYSERDA shall make any payments due in accordance with obligations hereunder already performed. For the avoidance of doubt, the Forty Million Dollar ($40,000,000) threshold set forth above must be for costs above Seller's previously forecasted budget and must pertain to capital costs, including costs associated with construction, repair, parts and equipment.

Article XIV

Force Majeure

Section 14.1. Force Majeure . Neither Party hereto shall be liable for any failure or delay in the performance of its respective obligations hereunder (other than payment obligations) if and to the extent that such delay or failure is due to a cause or circumstance beyond the reasonable control of such party, including acts of God or the public enemy, expropriation or confiscation of land or facilities, acts of war, rebellion or sabotage or damage resulting therefrom, fires, floods, storms or weather of unusual severity, unavailability of NYGATS, explosions, accidents, riots, or strikes (a "Force Majeure Event"). Compliance with Applicable Law shall not constitute a Force Majeure Event and shall be addressed in Section 13.4. The suspension of performance due to a Force Majeure Event shall be of no greater scope or amount and of no longer duration than is required by such Force Majeure Event and the Claiming Party shall not be construed to be in default with respect to any obligation hereunder for so long as, but only to the extent that, failure to perform such obligation is due to a Force Majeure Event. No Force Majeure Event shall extend this Agreement beyond the Term.

Section 14.2. Due Diligence . A Party claiming a Force Majeure Event ("Claiming Party") shall: (a) provide oral notice as promptly as practicable followed by written notice to the other Party ("Non-Claiming Party") within two (2) Business Days after such Claiming Party becomes aware of such Force Majeure Event, giving the Non-Claiming Party a detailed written explanation of the event and an estimate of its expected duration and probable effect on the performance of the Claiming Party's obligations hereunder; (b) use commercially reasonable efforts in accordance with Good Utility Practice to remedy the condition that prevents performance and to mitigate the effects of same in order to continue to perform its obligations under this Agreement; and (c) provide the Non-Claiming Party with weekly status reports of all efforts to mitigate and remedy the Force Majeure Event.

Section 14.3. Extended Force Majeure Events .

(a) If the Claiming Party has reason to believe that a Force Majeure Event will prevent it from performing its obligations under this Agreement for one (1) month or longer ("Extended Force Majeure Event"), it shall notify the Non-Claiming Party in writing within fifteen (15) days from the beginning of said Force Majeure Event and shall submit a plan to remedy the impact of such Force Majeure Event(s) (a "Force Majeure Remedy Plan") to the Non-Claiming Party within ten (10) days of such notification.

(b) While the Force Majeure Remedy Plan is in effect, the Claiming Party shall provide (i) weekly status reports notifying the Non-Claiming Party of the steps which have been taken to remedy the Extended Force Majeure Event, and (ii) the expected remaining duration of its inability to perform hereunder.

Section 14.4. Right to Terminate or Discontinue Obligations .

Either Party upon written notice to the other Party may terminate this Agreement if the Claiming Party remains unable to perform its material obligations hereunder due to a Force Majeure Event for twenty-four (24) consecutive months following the date of such Force Majeure Event; provided, that neither Party shall be entitled to terminate this Agreement until twenty four (24) months after the date of such Force Majeure Event provided that the Party affected by the Force Majeure Event (a) has commenced to remedy the Force Majeure Event and (b) is diligently pursuing such remedy; and (c) if such remedy can be reasonably completed within twenty four (24) consecutive Months following the date of such Force Majeure Event.

Section 14.5. Liability Following Termination .

Upon termination of this Agreement as provided in Section 14.4, the Parties shall have no further liability or obligation to each other as a consequence of such termination, except for any obligation accruing prior to the occurrence of such Force Majeure Event.

Article XV

Additional Provisions

Section 15.1. Forward Contract . Each Party represents and warrants to the other, as of the date of each sale and purchase of ZECs (each "transaction") hereunder that it is a "forward contract merchant" within the meaning of the United States Bankruptcy Code, that this Agreement and each transaction is a "forward contract" or a "commodity contract" within the meaning of the United States Bankruptcy Code, and that the remedies identified in this Agreement shall be "contractual rights" as provided for in 11 U.S.C. § 556 as that provision may be amended from time to time. Each Party represents to the other, as of the date of each transaction, that: (a) it is a commercial market participant with respect to ZECs and is entering into the transaction in connection with its commercial business; (b) it intends, as of the date of the transaction, to make or take physical delivery of ZECs, which are nonfinancial commodities; and (c) that the transaction is not a "swap" under the Commodity Exchange Act and the CFTC regulations, interpretations and guidance promulgated thereunder.

Section 15.2. Taxes . Seller shall be responsible for and obligated to pay all present and future taxes, fees and levies that may be assessed by any entity upon the Seller's delivery of ZECs to NYSERDA, or with respect to the creation of the ZECs and/or the energy with which they are associated, and, if any, for the registration of the Facility in the NYGATS and the delivery of the ZEC Certificates.

Section 15.3. Term . Unless earlier terminated pursuant to the terms hereof, this Agreement shall commence on the Effective Date and expire upon the expiration of the Contract Term, provided that payment has been made for all ZECs for which payment is properly due. Upon such date or upon earlier termination of this Agreement under Article XIII, neither Party shall have any further obligation to the other, except that Sections 15.1, 18.1, 18.2, 18.3, 18.4, and NYSERDA's payment obligation under Article IV shall survive.

Section 15.4. Waiver . Either Party to this Agreement may (a) extend the time for the performance of any of the obligations or other acts of the other Party, (b) waive any inaccuracies in the representations and warranties of the other Party contained herein or in any document delivered by the other Party pursuant hereto or (c) waive compliance with any of the agreements or conditions of the other party contained herein. Any such extension or waiver shall be valid only if set forth in an instrument in writing signed by the Party to be bound thereby. Any waiver of any term or condition shall not be construed as a waiver of any subsequent breach or a subsequent waiver of the same term or condition, or a waiver of any other term or condition, of this Agreement. No provision of this Agreement will be deemed to have been waived unless the waiver is in writing, and no delay by either Party in exercising its rights hereunder, including the right to terminate this Agreement, shall be deemed to constitute or evidence any waiver by either Party of any right hereunder. The rights granted in this Agreement are cumulative of every other right or remedy that the enforcing Party may otherwise have at law or in equity or by statute.

Section 15.5. Independent Contractor . The status of the Seller under this Agreement shall be that of an independent contractor and not that of an agent, and in accordance with such status, Seller and its respective officers, agents, employees, representatives and servants shall at all times during the term of this Agreement conduct themselves in a manner consistent with such status and by reason of this Agreement shall neither hold themselves out as, nor claim to be acting in the capacity of, officers, employees, agents, representatives or servants of NYSERDA nor make any claim, demand or application for any right or privilege applicable to NYSERDA, including rights or privileges derived from workers' compensation coverage, unemployment insurance benefits, social security coverage and retirement membership or credit.

Section 15.6. Severability . If any provision of this Agreement shall be declared by any court of competent jurisdiction to be illegal, void or unenforceable, all other provisions of this Agreement shall not be affected and shall remain in full force and effect. If any provision of this Agreement is so broad as to be unenforceable, that provision shall be interpreted to be only so broad as will enable it to be enforced.

Section 15.7. Seller Expense . Seller shall, at its own expense, make all arrangements necessary to register the Facility and transfer ZECs to NYSERDA through NYGATS in accordance with the NYGATS Operating Rules.

Section 15.8. Further Assurances . Each Party shall execute and deliver to the other Party any instrument or other document reasonably requested by the other Party to give effect to the agreement of the Parties reflected herein.

Section 15.9. Waiver of Relief from Contract . Neither Party shall unilaterally seek to obtain from any Governmental Authority any relief changing the ZEC Price, each Party's obligations or any other economic terms and conditions of this Agreement. To the extent that any non-Party shall seek such relief, the Parties further covenant not to support such action.

Section 15.10. Governing Law; Venue . This Agreement shall be governed by, and construed in accordance with the laws of the State of New York applicable to contracts executed and to be performed in New York State without regard to its conflicts of laws principles. The parties irrevocably acknowledge and accept that all actions arising under or relating to this

Agreement, and the transactions contemplated hereby and thereby shall be brought exclusively in a United States District Court or New York State Court located in Albany, New York having subject matter jurisdiction over such matters, and each of the Parties hereby consents to and accepts such personal jurisdiction of, and waives any objection as to the laying of venue in, such courts for purposes of such action.

Section 15.11. Laws of the State of New York . Seller shall comply with all of the requirements set forth in Exhibit A hereto.

Section 15.12. No Third Party Beneficiaries . Nothing herein is intended to or should be construed to create any rights of any kind whatsoever in third persons not parties to this Agreement.

Article XVI

Notices, Entire Agreement, Amendment, Counterparts, Good Faith Negotiation

Section 16.1. Notices.

(a) All notices, requests, consents, approvals and other communications which may or are required to be given by either party to the other under this Agreement shall be in writing and shall be transmitted either:

(1) via certified or registered United States mail, return receipt requested;

(2) by personal delivery;

(3) by expedited delivery service; or

(4) by e-mail, return receipt requested.

Such notices shall be addressed as follows, or to such different addresses as the Parties may from time-to-time designate as set forth in paragraph (c) below:

To Seller:	R. E. Ginna Nuclear Power Plant, LLC c/o Exelon Generation Company, LLC 1310 Point Street Baltimore, MD 21231 Attn: General Counsel E:mail Address: david.dardis@constellation.com
To NYSERDA:	NYSERDA Attn: Office of the General Counsel 17 Columbia Circle Albany, New York 12203-6399 E:mail address: pete.keane@nyserda.ny.gov
With a copy to:	NYSERDA Attn: Peter Keane 17 Columbia Circle Albany, New York 12203-6399

(b) Any such notice shall be deemed to have been given either at the time of personal delivery or, in the case of expedited delivery service or certified or registered United States mail, as of the date of first attempted delivery at the address and in the manner provided herein, or in the case of facsimile transmission or email, upon receipt of an email acknowledgement of receipt.

(c) The Parties may, from time to time, specify any new or different address in the United States as their address for purpose of receiving notice under this Agreement by giving fifteen (15) days' written notice to the other Party sent in accordance herewith. The Parties agree to mutually designate individuals as their respective representatives for the purposes of receiving notices under this Agreement. Additional individuals may be designated in writing by the Parties for purposes of implementation and administration/billing, resolving issues and problems and/or for dispute resolution.

Section 16.2. Entire Agreement; Amendment . This Agreement embodies the entire agreement and understanding between NYSERDA and the Seller and supersedes all prior agreements and understandings relating to the subject matter hereof. Except as otherwise expressly provided for herein, this Agreement may be amended, modified, changed, waived, discharged or terminated only by an instrument in writing, signed by the Party against which enforcement of such amendment, modification, change, waiver, discharge or termination is sought.

Section 16.3. Counterparts . This Agreement may be executed in counterparts each of which shall be deemed an original, but all of which taken together shall constitute one and the same instrument.

Section 16.4. Good Faith Negotiation . Both Parties agree that, should any dispute arise during the term of this Agreement, the Parties will make a good faith though non-binding effort to reconcile any difference or dispute before the filing of an action in any court.

Article XVII

Publicity

Section 17.1. Publicity . On or prior to the Effective Date, the Parties will collaborate with regard to the preparation and issuance of any initial press release or public announcement with respect to the Parties' entry into this Agreement.

Article XVIII

Confidentiality

Section 18.1. Seller will be required to waive confidentiality, as to NYSERDA and the NYGATS, for the direct transfer to NYSERDA of data pertinent to the verification of ZEC creation.

Section 18.2. Freedom of Information Law . Seller acknowledges that NYSERDA is subject to and must comply with the requirements of New York's Freedom of Information Law ("FOIL;" see Public Officers' Law Article 6).

Section 18.3. Claim of Confidentiality . Information of any tangible form including any document that Seller wishes to be protected from disclosure to third parties, must be marked "Confidential" or "Proprietary" at the time such information is provided to NYSERDA.

Section 18.4. Trade Secrets/Commercial Information . The FOIL Law (Public Officers Law § 87(d)(2)) provides an exception to disclosure for records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise ." If NYSERDA receives a request from a third party for information or a document received from Seller and which has been marked "Confidential" or "Proprietary," NYSERDA will process such request under the procedures provided by NYSERDA's FOIL regulations.

EXHIBIT A

REVISED 5/12

STANDARD TERMS AND CONDITIONS
FOR ALL NYSERDA AGREEMENTS

(Based on Standard Clauses for New York State Contracts and Tax Law Section 5-a)

The parties to the Agreement agree to be bound by the following clauses which are hereby made a part of the Agreement:

1. NON-DISCRIMINATION REQUIREMENTS. To the extent required by Article 15 of the Executive Law (also known as the Human Rights Law) and all other State and Federal statutory and constitutional non-discrimination provisions, the Contractor will not discriminate against any employee or applicant for employment because of race, creed, color, sex, national origin, sexual orientation, age, disability, genetic predisposition or carrier status, or marital status. Furthermore, in accordance with Section 220-e of the Labor Law, if this is an Agreement for the construction, alteration or repair of any public building or public work or for the manufacture, sale or distribution of materials, equipment or supplies, and to the extent that this Agreement shall be performed within the State of New York, Contractor agrees that neither it nor its subcontractors shall, by reason of race, creed, color, disability, sex or national origin: (a) discriminate in hiring against any New York State citizen who is qualified and available to perform the work; or (b) discriminate against or intimidate any employee hired for the performance of work under this Agreement. If this is a building service Agreement as defined in Section 230 of the Labor Law, then, in accordance with Section 239 thereof, Contractor agrees that neither it nor its subcontractors shall, by reason of race, creed, color, national origin, age, sex or disability: (a) discriminate in hiring against any New York State citizen who is qualified and available to perform the work; or (b) discriminate against or intimidate any employee hired for the performance of work under this contract. Contractor is subject to fines of $50.00 per person per day for any violation of Section 220-e or Section 239 as well as possible termination of this Agreement and forfeiture of all moneys due hereunder for a second subsequent violation.

2. WAGE AND HOURS PROVISIONS. If this is a public work Agreement covered by Article 8 of the Labor Law or a building service Agreement covered by Article 9 thereof, neither Contractor's employees nor the employees of its subcontractors may be required or permitted to work more than the number of hours or days stated in said statutes, except as otherwise provided in the Labor Law and as set forth in prevailing wage and supplement schedules issued by the State Labor Department. Furthermore, Contractor and its subcontractors must pay at least the prevailing wage rate and pay or provide the prevailing supplements, including the premium rates for overtime pay, as determined by the State Labor Department in accordance with the Labor Law. Additionally, effective April 28, 2008, if this is a public work contract covered by Article 8 of the Labor Law, the Contractor understands and agrees that the filing of payrolls in a manner consistent with Subdivision 3-a of Section 220 of the Labor Law shall be a condition precedent to payment by NYSERDA of any NYSERDA-approved sums due and owing for work done upon the project.

3. NON-COLLUSIVE BIDDING REQUIREMENT . In accordance with Section 2878 of the Public Authorities Law, if this Agreement was awarded based upon the submission of bids, Contractor warrants, under penalty of perjury, that its bid was arrived at independently and without collusion aimed at restricting competition. Contractor further warrants that, at the time Contractor submitted its bid, an authorized and responsible person executed and delivered to NYSERDA a non-collusive bidding certification on Contractor's behalf.

4. INTERNATIONAL BOYCOTT PROHIBITION . If this Agreement exceeds $5,000, the Contractor agrees, as a material condition of the Agreement, that neither the Contractor nor any substantially owned or affiliated person, firm, partnership or corporation has participated, is participating, or shall participate in an international boycott in violation of the Federal Export Administration Act of 1979 (50 USC App. Sections 2401 et seq.) or regulations thereunder. If such Contractor, or any of the aforesaid affiliates of Contractor, is convicted or is otherwise found to have violated said laws or regulations upon the final determination of the United States Commerce Department or any other appropriate agency of the United States subsequent to the Agreement's execution, such Agreement, amendment or modification thereto shall be rendered forfeit and void. The Contractor shall so notify NYSERDA within five (5) Business Days of such conviction, determination or disposition of appeal. (See and compare Section 220-f of the Labor Law, Section 139-h of the State Finance Law, and 2 NYCRR 105.4).

5. SET-OFF RIGHTS . NYSERDA shall have all of its common law and statutory rights of set-off. These rights shall include, but not be limited to, NYSERDA's option to withhold for the purposes of set-off any moneys due to the Contractor under this Agreement up to any amounts due and owing to NYSERDA with regard to this Agreement, any other Agreement, including any Agreement for a term commencing prior to the term of this Agreement, plus any amounts due and owing to NYSERDA for any other reason including, without limitation, tax delinquencies, fee delinquencies or monetary penalties relative thereto.

6. PROPRIETARY INFORMATION . Notwithstanding any provisions to the contrary in the Agreement, Contractor and NYSERDA acknowledge and agree that all information, in any format, submitted to NYSERDA shall be subject to and treated in accordance with the NYS Freedom of Information Law ("FOIL," Public Officers Law, Article 6). Pursuant to FOIL, NYSERDA is required to make available to the public, upon request, records or portions thereof which it possesses, unless that information is statutorily exempt from disclosure. Therefore, unless the Agreement specifically requires otherwise, Contractor should submit information to NYSERDA in a non-confidential, non-proprietary format. FOIL does provide that NYSERDA may deny access to records or portions thereof that "are trade secrets or are submitted to an agency by a commercial enterprise or derived from information obtained from a commercial enterprise and which if disclosed would cause substantial injury to the competitive position of the subject enterprise." [See Public Officers Law, § 87(2)(d)]. Accordingly, if the Agreement specifically requires submission of information in a format Contractor considers a proprietary and/or confidential trade secret, Contractor shall fully identify and plainly label the information "confidential" or "proprietary" at the time of disclosure. By so marking such information, Contractor represents that the information has actual or potential specific commercial or competitive value to the competitors of Contractor. Without limitation, information will not be considered confidential or proprietary if it is or has been (i) generally known or available from other sources without obligation concerning its confidentiality; (ii) made available by the owner

to others without obligation concerning its confidentiality; or (iii) already available to NYSERDA without obligation concerning its confidentiality. In the event of a FOIL request, it is NYSERDA's policy to consider records as marked above pursuant to the trade secret exemption procedure set forth in 21 New York Codes Rules & Regulations § 501.6 and any other applicable law or regulation. However, NYSERDA cannot guarantee the confidentiality of any information submitted. More information on FOIL, and the relevant statutory law and regulations, can be found at the website for the Committee on Open Government (http://www.dos.state.ny.us/coog/foil2.html) and NYSERDA's Regulations, Part 501 (http://www.nyserda.ny.gov/About/New-York-State-Regulations.aspx).

7. IDENTIFYING INFORMATION AND PRIVACY NOTIFICATION . (a) FEDERAL EMPLOYER IDENTIFICATION NUMBER and/or FEDERAL SOCIAL SECURITY NUMBER. As a condition to NYSERDA's obligation to pay any invoices submitted by Contractor pursuant to this Agreement, Contractor shall provide to NYSERDA its Federal employer identification number or Federal social security number, or both such numbers when the Contractor has both such numbers. Where the Contractor does not have such number or numbers, the Contractor must give the reason or reasons why the payee does not have such number or numbers.

(b) PRIVACY NOTIFICATION. The authority to request the above personal information from a seller of goods or services or a lessor of real or personal property, and the authority to maintain such information, is found in Section 5 of the State Tax Law. Disclosure of this information by Contractor to the State is mandatory. The principal purpose for which the information is collected is to enable the State to identify individuals, businesses and others who have been delinquent in filing tax returns or may have understated their tax liabilities and to generally identify persons affected by the taxes administered by the Commissioner of Taxation and Finance. The information will be used for tax administration purposes and for any other purpose authorized by law.

8. CONFLICTING TERMS . In the event of a conflict between the terms of the Agreement (including any and all attachments thereto and amendments thereof) and the terms of this Exhibit A, the terms of this Exhibit A shall control.

9. GOVERNING LAW . This Agreement shall be governed by the laws of the State of New York except where the Federal supremacy clause requires otherwise.

10. NO ARBITRATION . Disputes involving this Agreement, including the breach or alleged breach thereof, may not be submitted to binding arbitration (except where statutorily required) without the NYSERDA's written consent, but must, instead, be heard in a court of competent jurisdiction of the State of New York.

11. SERVICE OF PROCESS . In addition to the methods of service allowed by the State Civil Practice Law and Rules ("CPLR"), Contractor hereby consents to service of process upon it by registered or certified mail, return receipt requested. Service hereunder shall be complete upon Contractor's actual receipt of process or upon NYSERDA's receipt of the return thereof by the United States Postal Service as refused or undeliverable. Contractor must promptly notify NYSERDA, in writing, of each and every change of address to which service of

process can be made. Service by NYSERDA to the last known address shall be sufficient. Contractor will have thirty (30) calendar days after service hereunder is complete in which to respond.

12. CRIMINAL ACTIVITY. If subsequent to the effectiveness of this Agreement, NYSERDA comes to know of any allegation previously unknown to it that the Contractor or any of its principals is under indictment for a felony, or has been, within five (5) years prior to submission of the Contractor's proposal to NYSERDA, convicted of a felony, under the laws of the United States or Territory of the United States, then NYSERDA may exercise its stop work right under this Agreement. If subsequent to the effectiveness of this Agreement, NYSERDA comes to know of the fact, previously unknown to it, that Contractor or any of its principals is under such indictment or has been so convicted, then NYSERDA may exercise its right to terminate this Agreement. If the Contractor knowingly withheld information about such an indictment or conviction, NYSERDA may declare the Agreement null and void and may seek legal remedies against the Contractor and its principals. The Contractor or its principals may also be subject to penalties for any violation of law which may apply in the particular circumstances. For a Contractor which is an association, partnership, corporation, or other organization, the provisions of this paragraph apply to any such indictment or conviction of the organization itself or any of its officers, partners, or directors or members of any similar governing body, as applicable.

13. PERMITS. It is the responsibility of the Contractor to acquire and maintain, at its own cost, any and all permits, licenses, easements, waivers and permissions of every nature necessary to perform the work.

14. PROHIBITION ON PURCHASE OF TROPICAL HARDWOODS. The Contractor certifies and warrants that all wood products to be used under this Agreement will be in accordance with, but not limited to, the specifications and provisions of State Finance Law Section 165 (Use of Tropical Hardwoods), which prohibits purchase and use of tropical hardwoods, unless specifically exempted by NYSERDA.

15. OMNIBUS PROCUREMENT ACT OF 1992. It is the policy of New York State to maximize opportunities for the participation of New York State business enterprises, including minority and women-owned business enterprises as bidders, subcontractors and suppliers on its procurement contracts.

Information on the availability of New York State subcontractors and suppliers is available from:

NYS Department of Economic Development
Division for Small Business
625 Broadway
Albany, New York 12207
Telephone: 518-292-5200
Fax: 518-292-5884
http://www.esd.ny.gov
http://www.esd.ny.gov

A directory of certified minority and women-owned business enterprises is available from:

NYS Department of Economic Development
Division of Minority and Women's Business Development
625 Broadway
Albany, New York 12207
Telephone: 518-292-5200
Fax: 518-292-5803
http://www.empire.state.ny.us

The Omnibus Procurement Act of 1992 requires that by signing this Agreement, Contractors certify that whenever the total amount is greater than $1 million:

(a) The Contractor has made reasonable efforts to encourage the participation of New York State Business Enterprises as suppliers and subcontractors, including certified minority and women-owned business enterprises, on this project, and has retained the documentation of these efforts to be provided upon request to the State;

(b) The Contractor has complied with the Federal Equal Opportunity Act of 1972 (P.L. 92-261), as amended;

(c) The Contractor agrees to make reasonable efforts to provide notification to New York State residents of employment opportunities on this project through listing any such positions with the Job Service Division of the New York State Department of Labor, or providing such notification in such manner as is consistent with existing collective bargaining contracts or agreements. The Contractor agrees to document these efforts and to provide said documentation to the State upon request; and

(d) The Contractor acknowledges notice that the State may seek to obtain offset credits from foreign countries as a result of this contract and agrees to cooperate with the State in these efforts.

16. RECIPROCITY AND SANCTIONS PROVISIONS . Bidders are hereby notified that if their principal place of business is located in a country, nation, province, state or political subdivision that penalizes New York State vendors, and if the goods or services they offer will be substantially produced or performed outside New York State, the Omnibus Procurement Act 1994 and 2000 amendments (Chapter 684 and Chapter 383, respectively) require that they be denied contracts which they would otherwise obtain. NOTE: As of May 15, 2002, the list of discriminatory jurisdictions subject to this provision includes the states of South Carolina, Alaska, West Virginia, Wyoming, Louisiana and Hawaii. Contact NYS Department of Economic Development for a current list of jurisdictions subject to this provision.

17. COMPLIANCE WITH NEW YORK STATE INFORMATION SECURITY BREACH AND NOTIFICATION ACT . Contractor shall comply with the provisions of the New York State Information Security Breach and Notification Act (General Business Law Section 899-aa; State Technology Law Section 208).

18. PROCUREMENT LOBBYING. To the extent this Agreement is a "procurement contract" as defined by State Finance Law Sections 139-j and 139-k, by signing this Agreement the Contractor certifies and affirms that all disclosures made in accordance with State Finance Law Sections 139-j and 139-k are complete, true and accurate. In the event such certification is found to be intentionally false or intentionally incomplete, NYSERDA may terminate the agreement by providing written notification to the Contractor in accordance with the terms of the agreement.

19. COMPLIANCE WITH TAX LAW SECTION 5-a. The following provisions apply to Contractors that have entered into agreements in an amount exceeding $100,000 for the purchase of goods and services:

(a) Before such agreement can take effect, the Contractor must have on file with the New York State Department of Taxation and Finance a Contractor Certification form (ST-220-TD).

(b) Prior to entering into such an agreement, the Contractor is required to provide NYSERDA with a completed Contractor Certification to Covered Agency form (Form ST-220-CA).

(c) Prior to any renewal period (if applicable) under the agreement, the Contractor is required to provide NYSERDA with a completed Form ST-220-CA.

Certifications referenced in paragraphs (b) and (c) above will be maintained by NYSERDA and made a part hereof and incorporated herein by reference.

NYSERDA reserves the right to terminate this agreement in the event it is found that the certification filed by the Contractor in accordance with Tax Law Section 5-a was false when made.

20. IRANIAN ENERGY SECTOR DIVESTMENT. In accordance with Section 2879-c of the Public Authorities Law, by signing this contract, each person and each person signing on behalf of any other party certifies, and in the case of a joint bid or partnership each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief that each person is not on the list created pursuant to paragraph (b) of subdivision 3 of section 165-a of the State Finance Law (See www.ogs.ny.gov/about/regs/ida.asp).

EXHIBIT B

NYSERDA PROMPT PAYMENT POLICY STATEMENT

504.1. Purpose and Applicability . (a) The purpose of this Exhibit is to provide a description of Part 504 of NYSERDA's regulations, which consists of NYSERDA's policy for making payment promptly on amounts properly due and owing by NYSERDA under this Agreement. The section numbers used in this document correspond to the section numbers appearing in Part 504 of the regulations. [1]

(b) This Exhibit applies generally to payments due and owing by the NYSERDA to the Contractor pursuant to this Agreement. However, this Exhibit does not apply to Payments due and owing when NYSERDA is exercising a Set-Off against all or part of the Payment, or if a State or Federal law, rule or regulation specifically requires otherwise.

504.2. Definitions . Capitalized terms not otherwise defined in this Exhibit shall have the same meaning as set forth earlier in this Agreement. In addition to said terms, the following terms shall have the following meanings, unless the context shall indicate another or different meaning or intent:

(a) "Date of Payment" means the date on which NYSERDA requisitions a check from its statutory fiscal agent, the Department of Taxation and Finance, to make a Payment.

(b) "Designated Payment Office" means the Office of NYSERDA's Controller, located at 17 Columbia Circle, Albany, New York 12203.

(c) "Payment" means payment properly due and owing to Contractor pursuant to Article IV, Exhibit B of this Agreement.

(d) "Prompt Payment" means a Payment within the time periods applicable pursuant to Sections 504.3 through 504.5 of this Exhibit in order for NYSERDA not to be liable for interest pursuant to Section 504.6.

(e) "Payment Due Date" means the date by which the Date of Payment must occur, in accordance with the provisions of Sections 504.3 through 504.5 of this Exhibit, in order for NYSERDA not to be liable for interest pursuant to Section 504.6.

(f) "Proper Invoice" means a written request for Payment that is submitted by a Contractor setting forth the description, price or cost, and quantity of goods, property or services delivered or rendered, in such form, and supported by such other substantiating documentation, as NYSERDA may reasonably require, including but not limited to any requirements set forth in Exhibits A or B to this Agreement; and addressed to NYSERDA's Controller, marked "Attention: Accounts Payable," at the Designated Payment Office.

(g)(1) "Receipt of an Invoice" means:

[1] This is only a summary; the full text of Part 504 can be accessed at: http://www.nyserda.ny.gov/en/About/~/media/Files/About/Contact/NYSERDARegulations.ashx

(i) if the Payment is one for which an invoice is required, the later of:

(a) the date on which a Proper Invoice is actually received in the Designated Payment Office during normal business hours; or

(b) the date by which, during normal business hours, NYSERDA has actually received all the purchased goods, property or services covered by a Proper Invoice previously received in the Designated Payment Office.

(ii) if the Agreement provides that a Payment will be made on a specific date or at a predetermined interval, without having to submit a written invoice the 30th calendar day, excluding legal holidays, before the date so specified or predetermined.

(2) For purposes of this subdivision, if the Agreement requires a multifaceted, completed or working system, or delivery of no less than a specified quantity of goods, property or services and only a portion of such systems or less than the required goods, property or services are working, completed or delivered, even though the Contractor has invoiced NYSERDA for the portion working, completed or delivered, NYSERDA will not be in Receipt of an Invoice until the specified minimum amount of the systems, goods, property or services are working, completed or delivered.

(h) "Set-off" means the reduction by NYSERDA of a payment due a Contractor by an amount equal to the amount of an unpaid legally enforceable debt owed by the Contractor to NYSERDA.

504.3. Prompt Payment Schedule. Except as otherwise provided by law or regulation or in Sections 504.4 and 504.5 of this Exhibit, the Date of Payment by NYSERDA of an amount properly due and owing under this Agreement shall be no later than thirty (30) calendar days, excluding legal holidays, after Receipt of a Proper Invoice.

504.4. Payment Procedures.

(a) Unless otherwise specified in this Agreement, a Proper Invoice submitted by the Contractor to the Designated Payment Office shall be required to initiate payment for goods, property or services. As soon as any invoice is received in the Designated Payment Office during normal business hours, such invoice shall be date-stamped. The invoice shall then promptly be reviewed by NYSERDA.

(b) NYSERDA shall notify the Contractor within fifteen (15) calendar days after Receipt of an Invoice of:

(1) any defects in the delivered goods, property or services;

(2) any defects in the invoice; or

(3) suspected improprieties of any kind.

(c) The existence of any defects or suspected improprieties shall prevent the commencement of the time period specified in Section 504.3 until any such defects or improprieties are corrected or otherwise resolved.

(d) If NYSERDA fails to notify a Contractor of a defect or impropriety within the fifteen (15) calendar day period specified in subdivision (b) of this section, the sole effect shall be that the number of days allowed for Payment shall be reduced by the number of days between the 15th day and the day that notification was transmitted to the Contractor. If NYSERDA fails to provide reasonable grounds for its contention that a defect or impropriety exists, the sole effect shall be that the Payment Due Date shall be calculated using the original date of Receipt of an Invoice.

(e) In the absence of any defect or suspected impropriety, or upon satisfactory correction or resolution of a defect or suspected impropriety, NYSERDA shall make Payment, consistent with any such correction or resolution and the provisions of this Exhibit.

504.5. Exceptions and Extension of Payment Due Date . NYSERDA has determined that, notwithstanding the provisions of Sections 504.3 and 504.4 of this Exhibit, any of the following facts or circumstances, which may occur concurrently or consecutively, reasonably justify extension of the Payment Due Date:

(a) If this Agreement provides Payment will be made on a specific date or at a predetermined interval, without having to submit a written invoice, if any documentation, supporting data, performance verification, or notice specifically required by this Agreement or other State or Federal mandate has not been submitted to NYSERDA on a timely basis, then the Payment Due Date shall be extended by the number of calendar days from the date by which all such matter was to be submitted to NYSERDA and the date when NYSERDA has actually received such matter.

(b) If an inspection or testing period, performance verification, audit or other review or documentation independent of the Contractor is specifically required by this Agreement or by other State or Federal mandate, whether to be performed by or on behalf of NYSERDA or another entity, or is specifically permitted by this Agreement or by other State or Federal provision and NYSERDA or other entity with the right to do so elects to have such activity or documentation undertaken, then the Payment Due Date shall be extended by the number of calendar days from the date of Receipt of an Invoice to the date when any such activity or documentation has been completed, NYSERDA has actually received the results of such activity or documentation conducted by another entity, and any deficiencies identified or issues raised as a result of such activity or documentation have been corrected or otherwise resolved.

(c) If an invoice must be examined by a State or Federal agency, or by another party contributing to the funding of the Contract, prior to Payment, then the Payment Due Date shall be extended by the number of calendar days from the date of Receipt of an Invoice to the date when the State or Federal agency, or other contributing party to the Contract, has completed the inspection, advised NYSERDA of the results of the inspection, and any deficiencies identified or issues raised as a result of such inspection have been corrected or otherwise resolved.

(d) If appropriated funds from which Payment is to be made have not yet been appropriated or, if appropriated, not yet been made available to NYSERDA, then the Payment Due Date shall be extended by the number of calendar days from the date of Receipt of an Invoice to the date when such funds are made available to NYSERDA.

504.6. Interest Eligibility and Computation. If NYSERDA fails to make Prompt Payment, NYSERDA shall pay interest to the Contractor on the Payment when such interest computed as provided herein is equal to or more than ten dollars ($10.00). Interest shall be computed and accrue at the daily rate in effect on the Date of Payment, as set by the New York State Tax Commission for corporate taxes pursuant to Section 1096(e)(1) of the Tax Law. Interest on such a Payment shall be computed for the period beginning on the day after the Payment Due Date and ending on the Date of Payment.

504.7. Sources of Funds to Pay Interest. Any interest payable by NYSERDA pursuant to Exhibit shall be paid only from the same accounts, funds, or appropriations that are lawfully available to make the related Payment.

504.8. Incorporation of Prompt Payment Policy Statement into Contracts. The provisions of this Exhibit shall apply to all Payments as they become due and owing pursuant to the terms and conditions of this Agreement, notwithstanding that NYSERDA may subsequently amend its Prompt Payment Policy by further rulemaking.

504.9. Notice of Objection. Contractor may object to any action taken by NYSERDA pursuant to this Exhibit that prevents the commencement of the time in which interest will be paid by submitting a written notice of objection to NYSERDA. Such notice shall be signed and dated and concisely and clearly set forth the basis for the objection and be addressed to the Vice President, New York State Energy Research and Development Authority, at the notice address set forth in Exhibit B to this Agreement. The Vice President of NYSERDA, or his or her designee, shall review the objection for purposes of affirming or modifying NYSERDA's action. Within fifteen (15) working days of the receipt of the objection, the Vice President, or his or her designee, shall notify the Contractor either that NYSERDA's action is affirmed or that it is modified or that, due to the complexity of the issue, additional time is needed to conduct the review; provided, however, in no event shall the extended review period exceed thirty (30) working days.

504.10. Judicial Review. Any determination made by NYSERDA pursuant to this Exhibit that prevents the commencement of the time in which interest will be paid is subject to judicial review in a proceeding pursuant to Article 78 of the Civil Practice Law and Rules. Such proceedings shall only be commenced upon completion of the review procedure specified in Section 504.9 of this Exhibit or any other review procedure that may be specified in this Agreement or by other law, rule, or regulation.

504.11. Court Action or Other Legal Processes.

(a) Notwithstanding any other law to the contrary, the liability of NYSERDA to make an interest payment to a Contractor pursuant to this Exhibit shall not extend beyond the date of a notice of intention to file a claim, the date of a notice of a claim, or the date commencing a legal action for the payment of such interest, whichever occurs first.

(b) With respect to the court action or other legal processes referred to in subdivision (a) of this section, any interest obligation incurred by NYSERDA after the date specified therein pursuant to any provision of law other than Public Authorities Law Section 2880 shall be determined as prescribed by such separate provision of law, shall be paid as directed by the court, and shall be paid from any source of funds available for that purpose.

EXHIBIT C

CERTIFICATION FORM

NYSERDA Agreement No. _____

Name of Seller: _____

Name of Facility: _____

Invoice Number: _____

Serial Number(s): _____

Total Number of ZECs: _____

Terms used in this Certificate are used with the meanings given to such terms in the referenced NYSERDA Agreement.

Seller certifies that, to Seller's knowledge, all of the information provided on the attached invoice requesting payment from NYSERDA is true and accurate; that the ZECs delivered by Seller (identified by the serial number(s) above) by designation for transfer to NYSERDA in accordance with the NYGATS Operating Rules are free and clear of all liens, judgments, encumbrances and similar restrictions created by or on behalf of Seller or any party claiming through Seller, and have not otherwise been, nor will be, sold, retired, claimed or represented by or on behalf of Seller or any party claiming through Seller, as part of electricity output or sales, or used by or on behalf of Seller or any party claiming through Seller, to satisfy obligations in any other jurisdiction.

Seller further certifies that all representations and warranties of the Seller set forth in Section 15.1 of the NYSERDA Agreement are true and correct on the date hereof as though made on the date hereof, other than such representations and warranties that are expressly effective as of an earlier date, in which case, such representations and warranties continue to be true and correct as of such date.

Quarterly Invoice Date: _____

By: _____

EXHIBIT D
ZERO EMISSIONS CREDIT PRICING

The ZEC Price will be determined in six, 2-year Tranches, as follows:

Tranche 1: April 1, 2017 – March 31, 2019
Tranche 2: April 1, 2019 – March 31, 2021
Tranche 3: April 1, 2021 – March 31, 2023
Tranche 4: April 1, 2023 – March 31, 2025
Tranche 5: April 1, 2025 – March 31, 2027
Tranche 6: April 1, 2027 – March 31, 2029

For Tranche 1, the ZEC Price shall be $17.48.

For Tranches 2 through 6, the ZEC Price shall be as calculated by NYSERDA in consultation with DPS staff, calculated for the relevant Tranche t using the following formula:

$ZEC\ Price_t = Max(0, Base\ ZEC\ Price_t - Max(0, (Energy\ Forward\ Index_t + Capacity\ Forward\ Index_t - Zone\ A\ Reference\ Price_t)))$; where

- $Base\ ZEC\ Price_t$ shall be determined as follows for each Tranche:
  - For Tranche 2, the Base ZEC Price shall be $19.59
  - For Tranche 3, the Base ZEC Price shall be $21.38
  - For Tranches 4 through 6, the Base ZEC Price shall be determined using the following formula:

    $Base\ ZEC\ Price_t = Net\ CO2\ Externality_t \times (0.53846 - (0.00491 \times Max(0, Min(26.704, (Incremental\ Renewable\ Generation_t / 1{,}000{,}000)) - 8.704)))$; where

    Net CO2 Externality shall be equal to 44.26 for Tranche 4, 49.13 for Tranche 5, and 54.13 for Tranche 6

    Incremental Renewable Generation shall be the total amount, denominated in megawatt-hours, of Renewable Energy Credits ("RECs") qualified to serve Tier 1 of the New York Renewable Energy Standard (i.e. new renewable resources of all types beginning commercial operation on or after January 1 st , 2015 that are eligible to satisfy the Renewable Energy Standard) generated in calendar years 2022, 2024, and 2026 as reported by the New York Generation Attribute Tracking System. The Incremental Renewable Generation for calendar year 2022 will be utilized in determining the Base ZEC Price for Tranche 4, the Incremental Renewable Generation for calendar year 2024 will be utilized in determining the Base ZEC Price for Tranche 5, and the Incremental Renewable Generation for calendar year 2026 will be utilized in determining the Base ZEC Price for Tranche 6.

- Energy Forward Index $_t$ shall be the average NYISO Zone A energy price forecast for the period covered by the Tranche, developed using futures prices reported on the Intercontinental Exchange ("ICE") as follows:

  1) for each trading day during the calendar year preceding each Tranche, On-Peak Monthly Forward Energy Prices and Off-Peak Monthly Forward Energy Prices for the 24 months of the Tranche will be separately averaged, yielding separate average on-peak and off-peak Tranche energy prices for each trading day;

  2) each trading day's average Tranche on-peak and off-peak energy prices (developed in step 1) will be time-weight averaged based on the number of on-peak and off peak hours in the Tranche, yielding a single average all-hours energy price for the Tranche for each trading day;

  3) the average Tranche all-hours energy prices for each of the trading days during the calendar year preceding each Tranche (developed in step 2) will be averaged, yielding the NYISO Zone A energy price forecast for the Tranche expressed in dollars per MWh.

- Capacity Forward Index $_t$ shall be the average NYISO Rest of the State capacity price forecast for the period covered by the Tranche, developed using futures prices reported on the New York Mercantile Exchange ("NYMEX") as follows:

  1) for each trading day during the final 6 months of the calendar year preceding each Tranche, NYMEX Rest of the State Capacity Calendar-Month settled futures prices for the first 12 months of the Tranche will be averaged, yielding a separate average annualized capacity price for each trading day

  2) the average annualized capacity prices for each of the trading days during the final six months of the calendar year preceding each Tranche (developed in step 1) will be averaged, yielding a single average annualized capacity price for the Tranche, expressed in dollars per kilowatt-month

  3) the average annualized capacity price developed in step 2 will be multiplied by 1.3699 to yield an average annualized capacity price for the Tranche expressed in dollars per MWh.

- Zone A Reference Price $_t$ shall be determined as follows for each Tranche:
  - For Tranche 2, the Zone A Reference Price shall be $39
  - For Tranche 3, the Zone A Reference Price shall be $39
  - For Tranches 4 through 6, the Zone A Reference Price shall be determined using the following formula:

    Zone A Reference Price $_t$ = $39 + Energy Basis Adjustment; where

    Energy basis adjustment is determined as follows:

    1) the simple average hourly day-ahead energy price over the six-year period covering calendar years 2017 through 2022 will be calculated using historic price data reported by the New York ISO for New York Zone A ("WEST (ZONE A)"), the R.E. Ginna nuclear unit generation bus ("GINNA _____"), the R.A. FitzPatrick nuclear unit generation bus ("FITZPATRICK _____"), the Nine Mile Point 1 nuclear unit generation bus ("NINE_MILE_1"), and the Nine Mile Point 2 nuclear unit generation bus ("NINE_MILE_2")

    2) each of the five six-year historical average nuclear unit generation bus energy prices will be subtracted from the six-year historical average Zone A energy price to calculate five unit-specific historic energy price basis differentials with Zone A

    3) the five unit-specific historic energy price basis differentials calculated in step 2 will be weighted by their actual six-year cumulative energy output over the 2017 through 2022 period to determine a single weighted-average historic energy basis differential, denominated in dollars per MWh.

    4) if the weighted-average historic energy basis differential calculated in step 3 is between $5 per MWh and $7 per MWh, the Energy Basis Adjustment shall be $0 per MWh

    5) If the weighted-average historic energy basis differential calculated in step 3 is less than $5 per MWh, the Energy Basis Adjustment shall be equal to the weighted-average historic energy basis differential minus $5 per MWh

    6) If the weighted-average historic energy basis differential calculated in step 3 is greater than $7 per MWh, the Energy Basis Adjustment shall be equal to the weighted-average historic energy basis differential minus $7 per MWh.

If the foregoing calculation yields a negative number, the ZEC Price shall be deemed to equal zero ($0).

Example Calculations:

Example 1:

Assumptions
Tranche 2
Energy Forward Index = $42
Capacity Forward Index = $7

Resulting ZEC Price
Base ZEC Price = $19.59
ZEC Price = $19.59 – ($42 + $7 – $39) = $9.59

Example 2:

Assumptions
Tranche 4
Energy Forward Index = $42
Capacity Forward Index = $7
Incremental Renewable Generation = 8,000,000
Energy Basis Adjustment = $0

Resulting ZEC Price
Base ZEC Price = 44.26 x (0.53846 – (.00491 x 0)) = $23.83
ZEC Price = $23.83 – ($42 + $7 – $39) = $13.83

Example 3:

Assumptions
Tranche 4
Energy Forward Index = $42
Capacity Forward Index = $7
Incremental Renewable Generation = 13,000,000
Energy Basis Adjustment = $0

Resulting ZEC Price
Base ZEC Price = 44.26 x (0.53846 – (.00491 x (13,000,000 / 1,000,000 – 8.704)) = $22.90
ZEC Price = $22.90 – ($42 + $7 – $39) = $12.90

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 8-K

CURRENT REPORT
Pursuant to Section 13 or 15(d)
of the Securities Exchange Act of 1934

November 28, 2017

Date of Report (Date of earliest event reported)

Commission File Number	Exact Name of Registrant as Specified in Its Charter; State of Incorporation; Address of Principal Executive Offices; and Telephone Number	IRS Employer Identification Number
1-16169	**EXELON CORPORATION** **(a Pennsylvania corporation)** 10 South Dearborn Street P.O. Box 805379 Chicago, Illinois 60680-5379 (800) 483-3220	23-2990190
333-85496	**EXELON GENERATION COMPANY, LLC** **(a Pennsylvania limited liability company)** 300 Exelon Way Kennett Square, Pennsylvania 19348-2473 (610) 765-5959	23-3064219

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

☐ Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

☐ Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

☐ Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Indicate by check mark whether any of the registrants are emerging growth companies as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company ☐

If an emerging growth company, indicate by check mark if any of the registrants have elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Item 1.01. Entry into a Material Definitive Agreement

On November 28, 2017, ExGen Renewables IV, LLC (the " ***Borrower*** ") (an indirect subsidiary of Exelon Corporation and Exelon Generation Company, LLC (the " ***Sponsor*** ")) successfully completed the closing of a $850 million senior secured term loan credit facility established pursuant to a Credit Agreement, dated as of November 28, 2017 (the " ***Credit Agreement*** "), among the Borrower, ExGen Renewables IV Holding, LLC (" ***Holdings*** "), the lenders party, Morgan Stanley Senior Funding, Inc., as administrative agent, and Wilmington Trust, National Association, as the depositary bank and collateral agent, and the other agents party thereto.

The Borrower's obligations under the Credit Agreement are fully and unconditionally guaranteed by Holdings (the Borrower's direct parent) and ExGen Renewables Holdings, LLC (" ***ExGen Holdings*** "; and together with the Borrower and Holdings, the " ***Loan Parties*** "), a direct subsidiary of the Borrower. Holdings and ExGen Holdings guarantee the obligations of the Borrower with respect to the Credit Agreement and the other Loan Documents (as defined in the Credit Agreement, the " ***Loan Documents*** "). The obligations of the Loan Parties under the Credit Agreement and the other Loan Documents are secured by collateral (as defined in the Credit Agreement) owned or held by the Loan Parties as and to the extent provided for in the Credit Agreement and the other Loan Documents.

The term loans (the " ***Term Facility*** ") were made pursuant to the Credit Agreement in a single borrowing of $850 million on November 28, 2017. The Borrower received net proceeds of approximately $785 million from the Term Facility, after deducting original discount and estimated costs, fees and expenses incurred in connection with the execution and delivery of the Credit Agreement and the transactions contemplated thereby. It is expected that the Borrower will distribute the net proceeds from the offering to the Sponsor for its general corporate purposes.

The interest rate on the Term Facility will accrue interest at a rate equal to the LIBOR Rate (as defined in the Credit Agreement) *plus* 3.00% or Base Rate (as defined in the Credit Agreement) *plus* 2.00%.

The interest rate on the Term Facility is payable quarterly in arrears on each Quarterly Payment Date and on the Maturity Date (each, as defined in the Credit Agreement), commencing on February 28, 2018. The Term Facility is scheduled to mature, and the principal of the Term Facility is due and payable, on November 28, 2024, seven (7) years after the Closing Date (as defined in the Credit Agreement).

The Credit Agreement contains provisions for acceleration of the maturity and mandatory prepayment of the Term Facility and other obligations thereunder upon the occurrence of certain stated events and also for optional prepayments on account of principal of the Term Facility prior to the maturity thereof upon the terms and conditions specified therein. In addition, the Credit Agreement and the other Loan Documents contain customary covenants by the Borrower and Holdings (on their own behalf and, in certain circumstances, on behalf of their subsidiaries) and default provisions for the benefit of the lenders.

Item 2.03. Creation of a Direct Financial Obligation or an Obligation under an Off-Balance Sheet Arrangement of a Registrant.

On November 28, 2017, the Borrower successfully completed the closing of an $850.0 million senior secured term loan credit facility established pursuant to the Credit Agreement. See Item 1.01 for information regarding the Credit Agreement.

Section 7 – Regulation FD

Item 7.01. Regulation FD Disclosure.

Exelon Corporation (Exelon) and Exelon Generation Company, LLC (Exelon Generation) are revising the non-GAAP presentation definitions previously used in earnings release and investor conference presentations for Exelon Generation Gross Margin, Operating and Maintenance (O&M) and Depreciation & Amortization (D&A). Direct costs incurred to generate revenues (Cost of Sales) of certain Constellation businesses including Energy Efficiency, BGE Home and Exploration and Production were previously included in O&M or D&A. To better reflect the scale of these businesses and reduce the volatility in the Gross Margin disclosures resulting from only capturing changes in revenue, Exelon will include Cost of Sales for those businesses in Gross Margin and remove those costs from O&M or D&A. While these changes are material to the individual categories being disclosed, there is no impact to the overall results for Exelon or Exelon Generation. Attached as Exhibit 99.1 to this Current Report on Form 8-K are the presentation slides for the disclosure format change including the amounts being adjusted and a comparison of presentation methodologies for the September 30, 2013 amounts.

EXHIBIT INDEX

Exhibit No.	Description
99.1	Presentation supporting disclosure changes

Change to Format of Exelon Generation Disclosures

All numbers as of September 30, 2013

Change to Format of Exelon Generation Disclosures – Gross Margin, O&M and Depreciation & Amortization Definitions

- Direct costs incurred to generate revenues ("Cost of Sales") for certain Constellation businesses (Energy Efficiency, BGE Home and Upstream) have been included in O&M or Depreciation & Amortization ("D&A") in previous Exelon Generation disclosures
  - Cost of Sales previously included in O&M and D&A is approximately $250M - $300M/year

- Including the Cost of Sales in Gross Margin better reflects the scale of these Constellation businesses while reducing volatility in disclosures resulting from only capturing changes in revenue

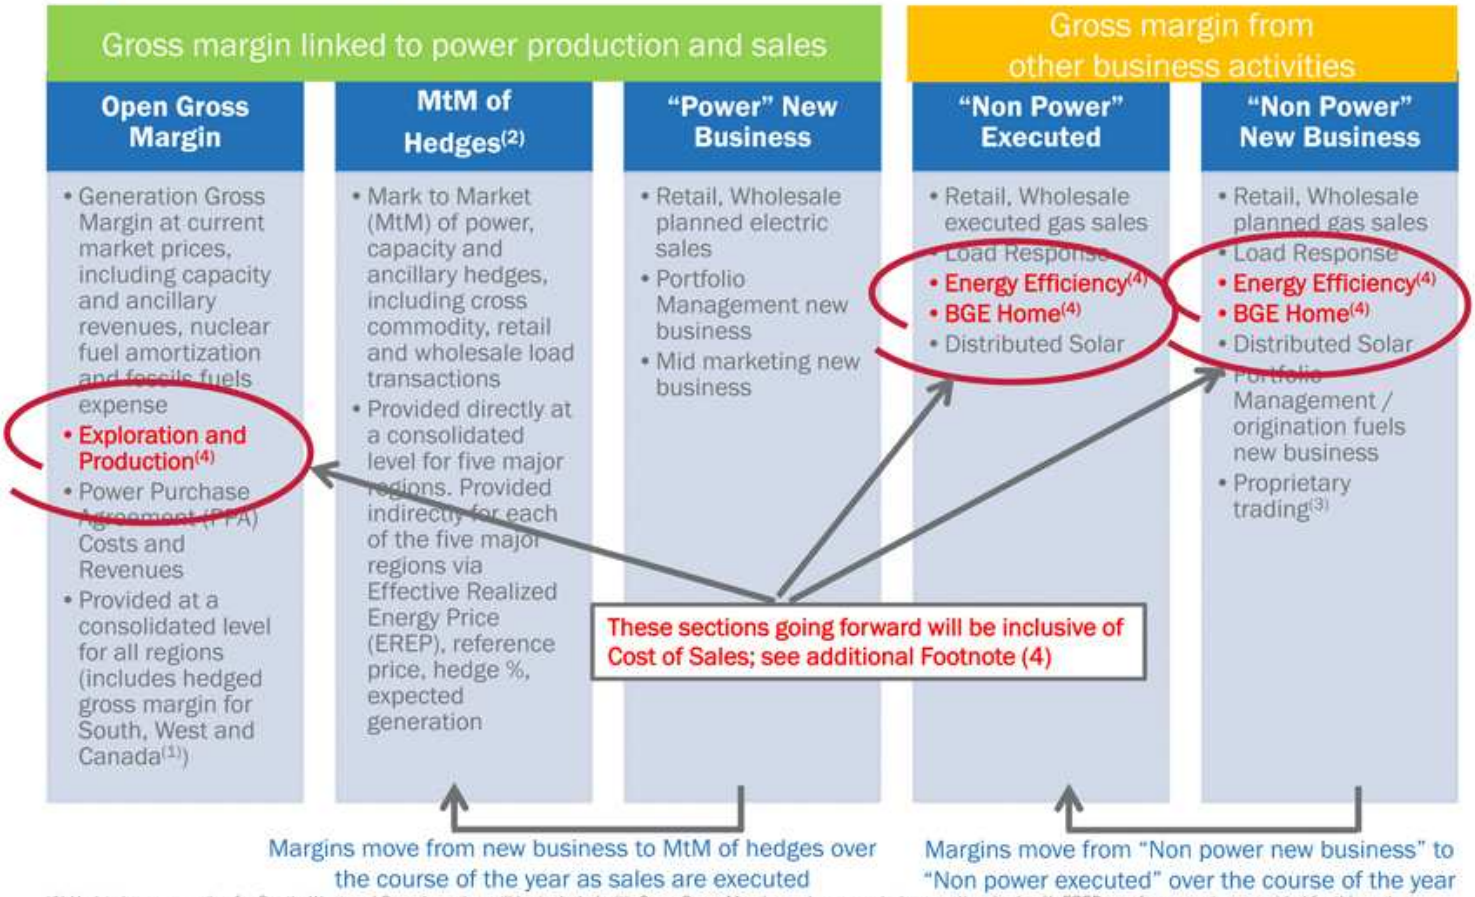
- Beginning with Q4 2013 Exelon Generation disclosure, Exelon is revising Gross Margin to include "Cost of Sales" for certain Constellation businesses; while simultaneously reducing O&M and D&A by an equal amount

- Effect of revised format:

Gross Margin	lowered by	$250M - $300M
O&M/D&A	lowered by	$250M - $300M
Net Change to EBIT		$0

Exelon.

Impacted Components of Gross Margin Categories



(1) Hedged gross margins for South, West and Canada region will be included with Open Gross Margin, and no expected generation, hedge %, EREP or reference prices provided for this region.
(2) MtM of hedges provided directly for the five larger regions. MtM of hedges is not provided directly at the regional level but can be easily estimated using EREP, reference price and hedged MWh.
(3) Proprietary trading gross margins will remain within "Non Power" New Business category and not move to "Non Power" Executed category.
(4) Gross margin for these businesses are net of direct "Cost of Sales".

Exelon.

ExGen Disclosures – Previous and Revised Presentations

Gross Margin Category ($M) [1,2] (as presented in EEI presentation slide 37)	2013	2014	2015	2016
Open Gross Margin (including South, West & Canada hedged GM) [3]	$5,600	$5,650	$5,800	$5,800
Mark to Market of Hedges [3,4]	$1,700	$900	$450	$250
Power New Business / To Go	$50	$500	$750	$750
Non-Power Margins Executed [5]	$400	$200	$100	$100
Non-Power New Business / To Go [5]	$200	$400	$500	$500
Total Gross Margin	$7,950	$7,650	$7,600	$7,400

	Sept 30, 2013 – Revised presentation				Change from previous presentation			
Gross Margin Category ($M)	2013	2014	2015	2016	2013	2014	2015	2016
Open Gross Margin (including South, West, Canada hedged gross margin)	$5,550	$5,600	$5,750	$5,700	($50)	($50)	($50)	($100)
Mark-to-Market of Hedges	$1,700	$900	$450	$250	0	0	0	0
Power New Business / To Go	$50	$500	$750	$750	0	0	0	0
Non-Power Margins Executed	$300	$100	$50	$50	($100)	($100)	($50)	($50)
Non-Power New Business / To Go	$100	$300	$350	$350	($100)	($100)	($150)	($150)
Total Gross Margin	$7,700	$7,400	$7,350	$7,100	($250)	($250)	($250)	($300)

(1) Gross margin (net of direct "cost of sales") rounded to nearest $50M.

(2) Gross margin does not include revenue related to decommissioning, gross receipts tax, Exelon Nuclear Partners and entities consolidated solely as a result of the application of FIN 46R.

(3) Includes CENG Join

(4) Mark to Market of Hedges assumes mid-point of hedge percentages.

(5) Any changes to new business estimates for our non-power business are presented as revenue less costs of sales.

(6) Based on September 30, 2013 market conditions.

These reductions shown in gross margin, are offset by commensurate reductions in O&M and D&A; There is no impact on net income

Exelon.

Additional 2013 ExGen and CENG Modeling – Previous and Revised Presentations

P&L Item	2013 Estimate	
ExGen Model Inputs[1]	EEI Slide 13 presentation	Revised presentation
O&M[2]	$4,275M	$4,075M
Taxes Other Than Income (TOTI)[3]	$300M	No change
Depreciation & Amortization[4]	$825M	$775M
Interest Expense	$350M	No change
CENG Model Inputs (at ownership)[5]		
Gross Margin	n ExGen Disclosures	No change
O&M/TOTI	400M - $450M	No change
Depreciation & Ar Asset Retirement	100M - $150M	No change
Capital Expenditures	$75M - $125M	No change
Nuclear Fuel Capital Expenditure	$100M - $150M	No change

Reduced O&M ~$200M and D&A ~$50M. Footnotes (2) and (4) have been updated to reflect new definition

(1) ExGen amounts for O&M, TOTI and Depreciation & Amortization exclude the impacts of CENG. CENG impact is reflected in "Equity earnings of unconsolidated affiliates" in the Income Statement.
(2) ExGen O&M excludes costs of sales for certain Constellation businesses, P&L neutral decommissioning costs and the impact from O&M related to entities consolidated solely as a result of the application of FIN 46R.
(3) TOTI excludes gross receipts tax for retail.
(4) ExGen Depreciation & Amortization excludes costs of sales for certain Constellation businesses and the impact of P&L neutral decommissioning.
(5) The CENG model inputs are intended to support Exelon's guidance range and do not represent CENG's final estimates.

Section 2 – Financial Information

Item 2.05 Costs Associated with Exit or Disposal Activities

Item 8.01 Other Information

As previously disclosed, on June 2, 2016, Exelon Corporation (Exelon) announced that Exelon Generation Company, LLC (Generation) would permanently cease generation operations at Clinton Nuclear Generating Station (Clinton) on June 1, 2017 and at Quad Cities Nuclear Power Station (Quad Cities) on June 1, 2018.

On December 7, 2016, the Future Energy Jobs Bill (Bill) was signed into law by the Governor of Illinois. The Bill includes a Zero Emission Standard (ZES) providing compensation in the form of a Zero Emission Credit (ZEC) targeted at preserving the environmental attributes of zero-emissions nuclear-powered generating facilities that meet specific eligibility criteria. Exelon and Generation now expect the Clinton and Quad Cities plants, if selected in the Illinois Power Authority process, to continue operation for at least another 10 years as a result of this legislation.

The ZES will have a 10-year duration commencing on June 1, 2017 and Generation will directly contract with Illinois utilities for the procurement of the ZECs based upon the number of MWh produced by eligible facilities, subject to specified caps. The ZEC price will be based upon the current social cost of carbon as determined by the federal government and is initially established at $16.50 per MWh of production, subject to future adjustments based on specified escalation and pricing adjustment mechanisms designed to lower the ZEC price based on increases in underlying energy and capacity prices.

Pursuant to this development, in December 2016 Exelon and Generation will reverse approximately $120 million of certain one-time charges initially recorded in June 2016 associated with early retirement primarily for employee-related costs and a materials and supplies inventory reserve adjustment, among other items.

In addition to these one-time charges, there will be ongoing annual financial impacts stemming from extending the previously shortened expected economic useful life of Clinton and Quad Cities on a prospective basis starting on December 7, 2016 primarily related to depreciation of plant assets (including any asset retirement costs (ARC)), amortization of nuclear fuel, and changes to asset retirement obligation (ARO) accretion expense. Exelon and Generation continue to assess the impacts on the ARO and ARC associated with the changes in decommissioning timing and cost assumptions to reflect a later retirement date. While these impacts have not yet been quantified, Exelon and Generation expect lower ARC depreciation and ARO accretion prospectively. In addition, the following table summarizes the estimated amount and timing of expected future decreases to the other non-cash expense items most recently disclosed within Management’s Discussion and Analysis of our third quarter Form 10-Q.

(in millions)

	2016 [a]	2017 [b]	2018 [c]
Income statement expenses (pre-tax):			
Depreciation and Amortization			
Accelerated non-ARC depreciation [d]	($ 45)	($470)	($140)
Accelerated nuclear fuel amortization	($ 10)	($ 85)	($ 20)

(a) From December 7, 2016 to December 31, 2016.
(b) From January 1, 2017 to May 31, 2017 for Clinton and full year for Quad Cities.
(c) From January 1, 2018 to May 31, 2018 for Quad Cities.
(d) Includes the accelerated depreciation of plant assets excluding any ARC and assumes an estimated useful life commensurate with the end of the ZES for Clinton and consistent with the current operating license expiration for Quad Cities.

Exelon and Generation are continuing to assess the impact on Nuclear Regulatory Commission (NRC) minimum funding requirements for Clinton and Quad Cities. While these impacts have not yet been quantified, Exelon and Generation expect that given the later commencement of decommissioning activities and a longer time period over which the nuclear decommissioning trust fund (NDTF) investments can appreciate in value, it is more likely than not that both Clinton and Quad Cities will either meet the NRC minimum funding requirements or, if not, not meet the NRC minimum funding requirements by only a small margin. A shortfall could require Exelon to post parental guarantees for Generation's obligations. However, the amount of required guarantees, if any, will ultimately be dependent on the decommissioning approach adopted at each site, the associated level of costs, and the decommissioning trust fund investment performance going forward. Generation is financially responsible for the decommissioning obligations related to Clinton and Quad Cities and cannot collect funds from Illinois customers related to decommissioning costs for either plant.

Exelon and Generation will continue to assess the financial implications of the adjustments to the ARC and ARO as well as the NRC minimum funding requirements and will disclose those impacts in its upcoming Form 10-K.

In addition to the ZES providing compensation in the form of zero emission credits to eligible nuclear facilities, the Bill, which is effective June 1, 2017, also includes (1) an expansion of the Renewable Portfolio Standard requiring Commonwealth Edison Company (ComEd) procurement of renewable energy credits for all customers by June 2019, (2) incentives for low-income solar distributed generation and community solar programs, which will be funded by an existing Renewable Energy Resources Fund and ongoing Renewable Portfolio Standards collections (3) new cumulative annual energy efficiency megawatt-hours (MWhs) savings goals for ComEd, which are designed to achieve 21.5% of cumulative annual savings by 2030, as compared to an estimated cumulative annual savings of 6.5% at the end of 2017, with the option to defer energy efficiency costs as a regulatory asset and earn a return equal to ComEd's weighted average cost of capital, subject to certain return on equity adjustments, (4) non-recoverable contributions by ComEd to low income energy assistance programs of $10 million per year for 5 years, (5) rebates to commercial

customers who own or operate distributed generation and for community solar projects, (6) revisions to the existing net metering statute to transition to energy only netting once the 5% net metering cap is reached, mandate net metering for community generation projects, and establish billing procedures for subscribers to those projects, (7) increased funding and scope of on-bill financing programs, and (8) rate caps for residential and commercial and industrial customers that limit potential increases due to the Bill. The Bill also extends the sunset date for the Illinois Energy Infrastructure Modernization Act, which established ComEd's performance-based distribution formula, from 2019 to 2022, allows ComEd to revise its distribution formula to eliminate the ROE collar beginning with the reconciliation performed for the 2017 calendar year and allows ComEd to implement a revenue balancing adjustment tariff if its distribution formula rate were to terminate.

Eliminating the ROE collar in ComEd's distribution formula or implementing a revenue balancing adjustment tariff will eliminate any unfavorable or favorable impacts of weather or load from ComEd's electric distribution revenues beginning with the reconciliation performed for the 2017 calendar year. With the exception of the $50 million of contributions to low income energy assistance programs discussed above, ComEd will recover from customers the costs it incurs pursuant to the Bill either through its distribution formula or other separate recovery mechanisms. ComEd may defer energy efficiency costs as a separate regulatory asset that will be recovered and amortized over the weighted average life of the related energy efficiency measures as filed with and approved by the Illinois Commerce Commission. ComEd will earn a return on the energy efficiency regulatory asset at a rate equal to its weighted average cost of capital, which is based on a year-end capital structure and calculated using the same methodology applicable to ComEd's distribution formula rate. Through December 31, 2030, the return on equity that ComEd earns on its energy efficiency regulatory asset is subject to a maximum downward or upward adjustment of 200 basis points if ComEd falls short of or exceeds its cumulative annual savings goal. ComEd does not expect the Bill to have financial statement impacts until 2017.

The information contained in Item 7.01 Regulation FD Disclosure in this combined Form 8-K is separately furnished, as noted, by Public Service Enterprise Group Incorporated (PSEG), Public Service Electric and Gas Company (PSE&G) and PSEG Power LLC (Power). Information contained herein relating to any individual company is provided by such company on its own behalf and in connection with its respective Form 8-K. PSE&G and Power each makes representations only as to itself and makes no other representations whatsoever as to any other company. The materials furnished as Exhibits 99 and 99.1 are available on the pseg.com website under the investor tab, or at http://investor.pseg.com.

Item 7.01 Regulation FD Disclosure

PSEG, PSE&G and Power

On March 11, 2015, PSEG is presenting at the Barclays Select Series Conference in Zurich, Switzerland as well as participating on March 12-13, 2015 in a series of investor meetings sponsored by Barclays Capital in Copenhagen, Denmark and Stockholm, Sweden. The attachment, which is furnished as Exhibit 99 to this Form 8-K, represents those discussion materials being used in which we are reaffirming earnings guidance previously furnished on Form 8-K. The complete meeting materials will be available on our website www.pseg.com.

Item 9.01 Financial Statements and Exhibits

Exhibit 99. Discussion Materials for March 11-13, 2015 investor meetings.

Forward-Looking Statement

Certain of the matters discussed in this report about our and our subsidiaries' future performance, including, without limitation, future revenues, earnings, strategies, prospects, consequences and all other statements that are not purely historical constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in filings we make with the United States Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K and available on our website: http://www.pseg.com. These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and transmission planning,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations and enforcement that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to manage our energy obligations, available supply and risks,
- adverse outcomes of any legal, regulatory or other proceeding, settlement, investigation or claim applicable to us and/or the energy industry,
- any deterioration in our credit quality or the credit quality of our counterparties,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers, and any inability to obtain sufficient insurance coverage or recover proceeds of insurance with respect to such events,
- acts of terrorism, cybersecurity attacks or intrusions that could adversely impact our businesses,
- increases in competition in energy supply markets as well as for transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements,
- changes in technology, such as distributed generation and micro grids, and greater reliance on these technologies, and
- changes in customer behaviors, including increases in energy efficiency, net-metering and demand response.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

GAAP Disclaimer

PSEG presents Operating Earnings in addition to its Net Income reported in accordance with accounting principles generally accepted in the United States (GAAP). Operating Earnings is a non-GAAP financial measure that differs from Net Income because it excludes gains or losses associated with Nuclear Decommissioning Trust (NDT), Mark-to-Market (MTM) accounting, and other material one-time items. PSEG presents Operating Earnings because management believes that it is appropriate for investors to consider results excluding these items in addition to the results reported in accordance with GAAP. PSEG believes that the non-GAAP financial measure of Operating Earnings provides a consistent and comparable measure of performance of its businesses to help shareholders understand performance trends. This information is not intended to be viewed as an alternative to GAAP information. The last slide in this presentation includes a list of items excluded from Net Income to reconcile to Operating Earnings, with a reference to those slides included on each of the slides where the non-GAAP information appears.

These materials and other financial releases can be found on the pseg.com website under the investor tab, or at http://investor.pseg.com/

PSEG Summary

- Our 2014 earnings of $2.76 exceeded our revised operating earnings guidance of $2.60 - $2.75 per share
- Continued third year of anticipated positive earnings trend in 2015 with operating earnings guidance of $2.75 to $2.95 per share
- Continued 5th straight year of expected double digit, 5 year growth in rate base
- Anticipated high single digit earnings growth at PSE&G on three-year basis from 2014 to 2017, driven by transmission investments and planned programs
- Power's continued focus on operational excellence, market expertise and financial strength delivers value in current price environment
- Strong Balance Sheet and Cash Flow support full capital program and new potential opportunities without the need for equity
- Our $0.08 per share dividend increase is consistent with our long history of returning cash to the shareholder through the common dividend, with potential for consistent and sustainable growth

Lon Bouknight, PSEG General Counsel, To Retire

Tamara Linde to Be Named General Counsel

Courtney McCormick Promoted to VP and Deputy General Counsel

(Newark – April 1, 2014) — PSEG announced today that Lon Bouknight, Jr. executive vice president and general counsel, will be retiring in the third quarter of 2014. Tamara Linde, currently vice president - regulatory, will be promoted to executive vice president and general counsel upon Bouknight's retirement.

"Lon brought a wealth of experience as a general counsel to PSEG when he joined us four years ago. He effectively led our legal team at a critical time in our company's history and diligently mentored his successor," said Ralph Izzo - president, chairman and CEO of PSEG. "He gave sage counsel to the PSEG Board of Directors and our executive team. I want to thank him personally and on behalf of the entire company. We wish him well in retirement." Bouknight had been a partner at Steptoe and Johnson before joining PSEG and prior to that had been executive vice president and general counsel at Edison International.

Linde joined the PSEG legal department in 1990. She was appointed vice president - regulatory in 2006 and has led the company's federal and state regulatory functions, as well as managed corporate, environmental and labor/employment practices within the company. She has served as regulatory counsel on many of the company's most important initiatives in recent years.

"Tammy is a strong leader and excellent lawyer who thoroughly understands our business and the environment in which we operate. I am pleased to announce her promotion and know that she can continue to build on Lon's successes in leading our outstanding internal legal team," said Izzo. Bouknight will support Linde and her team through the transition.

PSEG also announced that Courtney McCormick has been named vice president, deputy general counsel and corporate secretary. Since joining PSEG in 2008, McCormick has held several roles, most recently as corporate secretary and general corporate counsel. She also oversees shareholder services, corporate records management and legal administration functions. McCormick had worked at the law firms of King & Spalding LLP as well as Pillsbury Winthrop LLP before joining PSEG. She will report to Linde.

Public Service Enterprise Group (NYSE:PEG) is a publicly traded diversified energy company with annual revenues of $10 billion. Its operating subsidiaries are: PSEG Power, Public Service Electric and Gas Company (PSE&G) and PSEG Long Island. # # #

Item 5.07 Submission of Matters to a Vote of Security Holders

Our Annual Meeting of Stockholders was held on April 15, 2014. Proxies for the meeting were solicited by us pursuant to Regulation 14A under the Securities Act of 1934. There was no solicitation of proxies in opposition to management's nominees as listed in the proxy statement.

All of management's nominees were elected to the Board of Directors.

The advisory vote on executive compensation was approved.

The amendments to our Certificate of Incorporation and/or By-Laws to eliminate

- supermajority voting requirements for certain business combinations,
- supermajority voting requirements to remove a director without cause, and
- supermajority voting requirement to make certain amendments to our By-Laws

failed to receive the required affirmative vote of 80% of the number of shares outstanding and eligible to vote and were not approved.

The appointment of Deloitte & Touche LLP as Independent Auditor was ratified.

Final results of the voting are provided below:

Proposal 1:	Votes For	Votes Against	Abstentions	Broker Non-Votes
Election of Directors				
Terms expiring in 2015

Item 5.07 Submission of Matters to a Vote of Security Holders

Our Annual Meeting of Stockholders was held on April 16, 2013. Proxies for the meeting were solicited by us pursuant to Regulation 14A under the Securities Act of 1934. There was no solicitation of proxies in opposition to management's nominees as listed in the proxy statement.

All of management's nominees were elected to the Board of Directors.

The advisory vote on executive compensation was approved.

The amendment and restatement of the 2004 Long-Term Incentive Plan was approved.

The amendment and restatement of the Employee Stock Purchase Plan was approved.

The appointment of Deloitte & Touche LLP as Independent Auditor was ratified.

The stockholder proposal on the simple majority vote requirement was approved. The stockholder proposal received the support of more than a majority of the votes cast. In the coming months our Board of Directors will take into careful consideration the results of this vote in determining how best to address the concerns raised in the proposal, including any recommendations the Board may make regarding amendments to our Certificate of Incorporation and By-Laws.

Final results of the voting are provided below:

Item 5.07 Submission of Matters to a Vote of Security Holders

The Annual Meeting of Stockholders of Public Service Enterprise Group Incorporated (PSEG) was held on April 18, 2017. Proxies for the meeting were solicited by PSEG pursuant to Regulation 14A under the Securities Act of 1934. There was no solicitation of proxies in opposition to management's nominees as listed in the proxy statement.

All of management's nominees were elected to the Board of Directors.

The advisory vote on executive compensation was approved.

The stockholders have recommended in the advisory vote on the frequency of future advisory votes on executive compensation that such votes be held every year. Based on that result and consistent with its own recommendation, the Board of Directors has determined that PSEG's stockholders will continue to be presented with the opportunity to cast an advisory vote on executive compensation at the Annual Meeting of Stockholders to be held in each year beginning in 2018 and continuing through the earlier of 2023 or the next Annual Meeting at which an advisory vote on the frequency of the advisory vote on executive compensation is presented to stockholders.

The appointment of Deloitte & Touche LLP as PSEG's independent auditor was ratified.

Final results of the voting are provided below:

Proposal 1:
Election of Directors

Terms expiring in 2018	**Votes For**	**Votes Against**	**Abstentions**	**Broker Non-Votes**

Item 5.07 Submission of Matters to a Vote of Security Holders

Our Annual Meeting of Stockholders was held on April 21, 2015. Proxies for the meeting were solicited by us pursuant to Regulation 14A under the Securities Act of 1934. There was no solicitation of proxies in opposition to management's nominees as listed in the proxy statement.

All of management's nominees were elected to the Board of Directors.

The advisory vote on executive compensation was approved.

The appointment of Deloitte & Touche LLP as Independent Auditor was ratified.

Final results of the voting are provided below:

Proposal 1:	Votes For	Votes Against	Abstentions	Broker Non-Votes
Election of Directors				
Terms expiring in 2016				
Albert R. Gamper, Jr.	369,494,100	6,496,968	3,316,961	69,204,024
William V. Hickey	370,521,445	6,253,541	2,533,043	69,204,024

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 8-K, May 10, 2017 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The information contained in Item 8.01. Other Events in this Form 8-K is separately filed, as noted, by Public Service Enterprise Group Incorporated (PSEG) and Public Service Electric and Gas Company (PSE&G). Information contained herein relating to any individual company is provided by such company on its own behalf and in connection with its respective Form 8-K. PSE&G makes representations only as to itself and makes no other representations whatsoever as to any other company.

Item 8.01. Other Events

On May 9, 2017, the New Jersey Boroughs of Milltown, Park Ridge and South River submitted a joint complaint to the Federal Energy Regulatory Commission (FERC) against PSE&G alleging that the current base return on equity (ROE) of 11.18% used in PSE&G's transmission formula rates is unjust and unreasonable and should be reduced to 8.3%. As an alternative request, the complaint asks FERC to set the matter for hearing and settlement procedures. Finally, the complaint requests that FERC establish May 9, 2017 as the refund effective date for the relief sought.

Since the complaint was filed under section 206 of the Federal Power Act, there is no prescribed timeframe in which FERC must act. We cannot predict the timing or final outcome of this matter, but the ultimate resolution of this matter could be material to the results of operations and financial condition of PSEG and PSE&G.

Forward-Looking Statements

The statements contained in this Current Report on Form 8-K that are not purely historical, are "forward-looking statements" within the meaning of The Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in our Annual Report on Form 10-K and subsequent reports on Form 10-Q and Form 8-K filed with the Securities and Exchange Commission (SEC), and available on our website: http://investor.pseg.com/sec-filings. All of the forward-looking statements made in this Current Report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or even if realized, will have the expected consequences to, or effects on, us or our business, prospects, financial condition, results of operations or cash flows. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this Current Report apply only as of the date hereof. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even in light of new information or future events, unless otherwise required by applicable securities laws.

Item 5.02 Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers.

On June 23, 2017, Public Service Enterprise Group Incorporated ("PSEG") announced that Ralph LaRossa has been elected as President and Chief Operating Officer of PSEG Power LLC ("Power"), effective October 2, 2017. As previously announced, William Levis will retire from his position as President and Chief Operating Officer of Power, which retirement will become effective at the end of October 1, 2017.

Mr. LaRossa, 54, has served as President and Chief Operating Officer of Public Service Electric and Gas Company ("PSE&G") since 2006. He is the Chairman of the Board of PSEG Long Island LLC ("PSEG LI"). Mr. LaRossa joined PSE&G in 1985 as an associate engineer and advanced through a variety of management positions in the utility's gas and electric operations. In connection with Mr. LaRossa's election as President and Chief Operating Officer of Power, Mr. LaRossa was awarded a retention grant under PSEG's Long-Term Incentive Plan ("LTIP") of $3,000,000, payable in February 2018, concurrent with PSEG's annual grant of awards under the LTIP, in equal amounts of restricted stock units ("RSUs") and performance share units ("PSUs"). The award is subject to Mr. LaRossa's active employment at the time of the grant. The RSUs and PSUs will vest in January 2021 and December 2020, respectively, and are not subject to acceleration of vesting for retirement eligibility, retirement, or voluntary termination. There were no changes to Mr. LaRossa's base salary, annual incentive target or long-term incentive target.

Item 8.01 Other Events.

Also on June 23, 2017, PSEG announced the election of David M. Daly to succeed Mr. LaRossa as President and Chief Operating Officer of PSE&G and Chairman of the Board of PSEG LI, effective October 2, 2017. Daly, 55, was named President and Chief Operating Officer of PSEG LI in October 2013 and has overseen the transition to PSEG management of PSEG LI. Prior to his appointment, Daly served as Vice President-Asset Management and Centralized Services at PSE&G. Initially hired at PSE&G in 1983, Daly has held a variety of positions in utility operations and support services.

Item 9.01 Financial Statements and Exhibits.

RALPH LAROSSA ELECTED PRESIDENT AND COO OF PSEG POWER

Takes over from retiring PSEG Power President & COO William Levis

DAVID M. DALY ELECTED PRESIDENT AND COO OF PSE&G

(Newark – June 23, 2017) Public Service Enterprise Group (NYSE:PEG) announced today the election of Ralph LaRossa as President and Chief Operating Officer (COO) of PSEG's merchant generation business, PSEG Power effective October 2, 2017. LaRossa is currently President and COO of PSEG's utility business, Public Service Electric and Gas Company (PSE&G). In his new role, LaRossa succeeds Bill Levis who in December 2016 had announced his plans to retire.

PSEG also announced David M. Daly has been elected to succeed Ralph LaRossa as President and COO of PSE&G effective October 2, 2017. Daly will also assume the role of Chairman of the Board of PSEG Long Island currently held by Ralph LaRossa. Daly is currently President and COO of PSEG Long Island.

LaRossa, 54, was elected President and COO of PSE&G in October 2006. Since then, he has successfully led the utility through significant growth in its transmission and distribution businesses which now account for more than two-thirds of PSEG's consolidated annual revenues, with a culture focused on safety and compliance. LaRossa also led PSEG's efforts to garner a 12-year contract to manage the LIPA transmission and distribution system, which is now in its fourth year.

Ralph Izzo, Chairman, President and Chief Executive Officer of PSEG, said "In his career at PSE&G, Ralph has demonstrated the right skills to step into this key leadership role. For the past decade, Ralph has successfully led PSE&G through the largest capital program in its history. During this period he led the recovery from Superstorm Sandy and maintained a focus on operational reliability and the needs of our customers. Ralph has demonstrated strong leadership and is respected across PSEG and the industry as he assumes this role at PSEG Power." Izzo said the timing of the appointments in advance of the effective date allows ample opportunity for a smooth transition in executive leadership at PSEG Power and PSE&G. Izzo added, "Moreover, the broadening of Ralph's background is consistent with our long-term succession planning efforts."

Izzo also noted, "Dave has demonstrated strong leadership capabilities at PSEG Long Island, and has been instrumental in achieving improvements in utility operations and customer satisfaction. I am confident that under Dave, the PSE&G team will continue to meet customer expectations by maintaining a focus on service quality through programs that modernize and upgrade the system".

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Reacting to his new responsibilities, LaRossa said "I thoroughly appreciate the trust that Ralph Izzo and the Board have placed in me. I look forward to this new role working with the dedicated men and women of PSEG Power. I will do this with a close eye on operating safely and efficiently as we complete construction of PSEG Power's three new gas-fired combined cycle generators."

Daly, in reacting to his appointment, said "This is an extraordinary honor. I look forward to working with the great men and women of PSE&G, and plan to maintain our commitment to shareholder value, safe and reliable service and the highest levels of community involvement."

Mr. LaRossa joined PSE&G in 1985 as an associate engineer and advanced through a variety of management positions in the utility's gas and electric operations. In addition to his role at PSE&G, on January 1, 2014, Mr. LaRossa was appointed Chairman of the Board of PSEG Long Island, a subsidiary of PSEG. He is a graduate of Stevens Institute of Technology and has completed the Harvard Business School's Program for Management Development.

Daly, 55, was named President and COO of PSEG Long Island in October 2013, and has overseen the transition to PSEG management of PSEG Long Island. Prior to his appointment, Daly served as vice president-asset management and centralized services at PSE&G. Initially hired at PSE&G in 1983, Daly has held a variety of positions in utility operations and support services. He has an electrical engineering degree from the State University of New York Maritime College, and a Master of Business Administration from Rutgers University.

"Bill Levis's leadership at PSEG Power occurred during a time when the industry faced tremendous challenges. I greatly value his contribution to our success during these past 10 years," said Izzo. "I, along with the rest of the company, thank him and wish him well in his retirement."

###

Public Service Enterprise Group (NYSE: PEG) is a publicly traded diversified energy company with annual revenues of $9.1 billion. Its operating subsidiaries are: Public Service Electric and Gas Company (PSE&G), PSEG Power, and PSEG Long Island. www.pseg.com.

Public Service Electric and Gas Company (PSE&G) is New Jersey's oldest and largest regulated gas and electric delivery utility, serving nearly three-quarters of the state's population. PSE&G is the winner of the ReliabilityOne Award for superior electric system reliability.

PSEG Power LLC is an independent power producer that generates and sells electricity in the PJM, New York and New England wholesale power markets.

The information contained in Item 7.01 Regulation FD Disclosure in this combined Form 8-K is separately furnished, as noted, by Public Service Enterprise Group Incorporated and Public Service Electric and Gas Company ("PSE&G"). Information contained herein relating to any individual company is provided by such company on its own behalf and in connection with its respective Form 8-K. PSE&G makes representations only as to itself and makes no other representations whatsoever as to any other company.

Item 7.01 Regulation FD Disclosure

Following discussions with Rate Counsel and the staff of the New Jersey Board of Public Utilities (the "BPU"), and as approved by the BPU at its October 20, 2017 meeting, the deadline for filing PSE&G's distribution rate case was deferred from November 1, 2017 to December 1, 2017. The filing will now be based upon three months of actual data and nine months of forecasted data. PSE&G is required to file a distribution base rate case as a result of its Energy Strong Order from the BPU.

Item 8.01. Other Events

On November 6, 2017, Public Service Enterprise Group Incorporated ("PSEG") completed a public offering of $700.0 million aggregate principal amount of its 2.650% Senior Notes due 2022 (the "Notes"). The Notes were offered and sold by PSEG pursuant to a registration statement on Form S-3 (File No. 333-200352) (the "Registration Statement") and the related Prospectus dated November 18, 2014 and Prospectus Supplement dated November 2, 2017. The Notes were issued pursuant to an underwriting agreement (the "Underwriting Agreement"), dated November 2, 2017, between PSEG and Barclays Capital Inc., J.P. Morgan Securities LLC and Morgan Stanley & Co. LLC, as representatives of the several underwriters named therein (the "Underwriters"). Pursuant to the Underwriting Agreement and subject to the terms and conditions expressed therein, PSEG agreed to sell the Notes to the Underwriters, and the Underwriters agreed to purchase the Notes for resale to the public. The Underwriting Agreement is filed as Exhibit 1 hereto. The Notes are governed by an indenture, dated as of November 1, 1998 (the "Indenture"), between PSEG and U.S. Bank National Association, as successor trustee. The Indenture and the form of Note are filed as Exhibits 4-1 and 4-2 hereto, respectively. The Underwriting Agreement, Indenture and the form of Note are incorporated by reference into the Registration Statement.

In connection with the offering of the Notes, PSEG is filing herewith as Exhibit 5 an opinion of Shawn P. Leyden, Vice President and Deputy General Counsel of PSEG Services Corporation, addressing the legality of the Notes. Such opinion is incorporated by reference into the Registration Statement.

Item 9.01. Financial Statements and Exhibits

Exhibit 1	Underwriting Agreement, dated November 2, 2017, between PSEG and Barclays Capital Inc., J.P. Morgan Securities LLC and Morgan Stanley & Co. LLC, as representatives of the several underwriters named therein.
Exhibit 4-1	Indenture dated as of November 1, 1998 between PSEG and U.S. Bank National Association (as successor to First Union National Bank), as Trustee (incorporated by reference to Exhibit 4(f) to the Annual Report on Form 10-K for the year ended December 31, 1998, File No. 001-09120).
Exhibit 4-2	Form of Note.
Exhibit 5	Opinion of Shawn P. Leyden, Vice President and Deputy General Counsel of PSEG Services Corporation, addressing the legality of the Notes.
Exhibit 23	Consent of Shawn P. Leyden, Vice President and Deputy General Counsel of PSEG Services Corporation (included in Exhibit 5).

Exhibit 1

EXECUTION VERSION

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED
(a New Jersey corporation)

$700,000,000 2.650% Senior Notes due 2022

UNDERWRITING AGREEMENT

November 2, 2017

BARCLAYS CAPITAL INC.
J.P. MORGAN SECURITIES LLC
MORGAN STANLEY & CO. LLC

c/o Barclays Capital Inc.
745 Seventh Avenue
New York, New York 10019

As Representatives of the several Underwriters

Ladies and Gentlemen:

Public Service Enterprise Group Incorporated, a New Jersey corporation (the "**Company**"), proposes to issue and sell to the several underwriters named in Schedule 1 hereto (the "**Underwriters,**" which term shall include any underwriter substituted as hereinafter provided in Section 10), acting severally and not jointly, the respective principal amounts set forth in such Schedule 1 of $700,000,000 aggregate principal amount of the Company's 2.650% Senior Notes due 2022 (the "**Securities**"). Barclays Capital Inc., J.P. Morgan Securities LLC and Morgan Stanley & Co. LLC have agreed to act as representatives of the several Underwriters (in such capacity, the "**Representatives**") in connection with the offering and sale of the Securities.

The Securities will be issued pursuant to the provisions of an Indenture dated as of November 1, 1998, as amended and supplemented by the First Supplemental Indenture, dated as of September 10, 2002, and the Second Supplemental Indenture, dated as of July 27, 2005 (collectively, the **"Indenture"**), between the Company and U.S. Bank National Association (as successor trustee to First Union National Bank), as trustee (the **"Trustee"**).

The Company has filed with the Securities and Exchange Commission (the "**Commission**") a registration statement on Form S-3 (No. 333-200352), which contains a base prospectus (the "**Base Prospectus**"), to be used in connection with the public offering and sale of certain securities by the Company, including the Securities, under the Securities Act of 1933, as amended (the "**1933 Act**"), and the offering thereof from time to time in accordance with Rule 415 of the rules and regulations of the Commission under the 1933 Act (the "**1933 Act Regulations**"). Such registration statement, including the financial statements, exhibits and schedules thereto, in the form in which it became effective under the 1933 Act, including any required information deemed to be a part thereof at the time of effectiveness pursuant to

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Rule 430B of the 1933 Act Regulations ("**Rule 430B**"), is called the "**Registration Statement**." The term "**Prospectus**" shall mean the final prospectus supplement relating to the Securities, together with the Base Prospectus, that is first filed pursuant to Rule 424(b) of the 1933 Act Regulations ("**Rule 424(b)**") after the date and time that this Agreement is executed (the "**Execution Time**") by the parties hereto. The term "**preliminary prospectus**" shall mean any preliminary prospectus supplement relating to the Securities, together with the Base Prospectus, that is first filed with the Commission pursuant to Rule 424(b). Any reference herein to the Registration Statement, any preliminary prospectus or the Prospectus shall be deemed to refer to and include the documents that are or are deemed to be incorporated by reference therein pursuant to Item 12 of Form S-3 under the 1933 Act prior to the Applicable Time (as defined below). For purposes of this Agreement, all references to the Registration Statement, any preliminary prospectus or the Prospectus or to any amendment or supplement to any of the foregoing shall be deemed to include any copy filed with the Commission pursuant to its Electronic Data Gathering, Analysis and Retrieval system ("**EDGAR**").

All references in this Agreement to financial statements and schedules and other information which is "contained," "included" or "stated" (or other references of like import) in the Registration Statement, any preliminary prospectus or the Prospectus or any amendment or supplement thereto shall be deemed to mean and include all such financial statements and schedules and other information which is or is deemed to be incorporated by reference in or otherwise deemed by the 1933 Act Regulations to be a part of or included in the Registration Statement, any preliminary prospectus or the Prospectus or any amendment or supplement thereto, as the case may be, on or before the effective date of the Registration Statement or the date of such preliminary prospectus or the Prospectus or such amendment or supplement, as the case may be; and all references in this Agreement to amendments or supplements to the Registration Statement, any preliminary prospectus or the Prospectus shall be deemed to mean and include the filing of any document under the Securities Exchange Act of 1934, as amended (the "**1934 Act**"), which is or is deemed to be incorporated by reference in or otherwise deemed by the 1933 Act Regulations to be a part of or included in the Registration Statement, such preliminary prospectus or the Prospectus, as the case may be, at the time of such amendment or supplement.

SECTION 1. Representations and Warranties.

(a) Representations and Warranties. The Company represents and warrants to each Underwriter, as of the date hereof, as of the Applicable Time and as of the Closing Time (as defined below) (in each case, a "**Representation Date**"), as follows:

(1) Compliance with Registration Requirements. The Company meets the requirements for use of Form S-3 under the 1933 Act. The Registration Statement became effective upon filing with the Commission under Rule 462(e) of the 1933 Act Regulations ("**Rule 462(e)**") on November 18, 2014 and any post-effective amendment thereto also became effective upon filing under Rule 462(e). No stop order suspending the effectiveness of the Registration Statement or preventing or suspending the use of any prospectus has been issued under the 1933 Act and no proceedings for that purpose or pursuant to Section 8A of the 1933 Act against the Company or related to the offering of the Securities have been instituted or are pending or, to the knowledge of the Company,

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

are contemplated by the Commission, any request on the part of the Commission for additional information has been complied with, and no notice of objection of the Commission to the use of the Registration Statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) of the 1933 Act Regulations has been received by the Company. In addition, the Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended (the "**1939 Act**").

At the respective times the Registration Statement and any post-effective amendments thereto became effective and as of each Representation Date, the Registration Statement and any amendments thereto complied, complies and will comply in all material respects with the requirements of the 1933 Act and the 1933 Act Regulations and the 1939 Act and the rules and regulations of the Commission under the 1939 Act (the "**1939 Act Regulations**"), and did not, does not and will not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading; provided, that the Company makes no representation or warranty with respect to the Underwriter Information (as defined below).

The Prospectus and each amendment or supplement thereto, if any, at the time the Prospectus or any such amendment or supplement is issued and at the Closing Time, complied, complies and will comply in all material respects with the requirements of the 1933 Act and the 1933 Act Regulations, and neither the Prospectus nor any amendment or supplement thereto included, includes or will include an untrue statement of a material fact or omitted, omits or will omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, that the Company makes no representation or warranty with respect to the Underwriter Information.

Each preliminary prospectus and any amendment thereto complied when so filed in all material respects with the 1933 Act and the 1933 Act Regulations and each preliminary prospectus and the Prospectus delivered or made available to the Underwriters for use in connection with the offering of the Securities was and will be, at the time of such delivery, identical to the electronically transmitted copies thereof filed with the Commission pursuant to EDGAR, except to the extent permitted by Regulation S-T.

As of the Applicable Time, neither (x) the General Disclosure Package (as defined below) nor (y) any individual Issuer Limited Use Free Writing Prospectus (as defined below), when considered together with the General Disclosure Package, included any untrue statement of a material fact or omitted to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided that the Company makes no representation or warranty with respect to the Underwriter Information.

As used in this subsection and elsewhere in this Agreement:

Source: PUBLIC SERVICE ENTERPRISE GROUP INC, 8-K, November 06, 2017 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

"**Applicable Time**" means 3:15 P.M. (New York City time) on November 2, 2017 or such other time as agreed by the Company and the Representatives.

"**General Disclosure Package**" means (i) the Issuer General Use Free Writing Prospectus(es) (as defined below) relating to the Securities issued at or prior to the Applicable Time, including the Final Term Sheet (as defined below) attached as Schedule 3 hereto, and (ii) the most recent preliminary prospectus (including any documents incorporated therein by reference) that is distributed to investors prior to the Applicable Time, all considered together.

"**Issuer Free Writing Prospectus**" means any "issuer free writing prospectus," as defined in Rule 433 of the 1933 Act Regulations ("**Rule 433**"), relating to the Securities that (i) is required to be filed with the Commission, (ii) is a "road show that is a written communication" within the meaning of Rule 433(d)(8)(i), whether or not required to be filed with the Commission or (iii) is exempt from filing pursuant to Rule 433(d)(5)(i) because it contains a description of the Securities or of the offering thereof that does not reflect the final terms, in each case in the form filed or required to be filed with the Commission or, if not required to be filed, in the form retained in the Company's records pursuant to Rule 433(g).

"**Issuer General Use Free Writing Prospectus**" means any Issuer Free Writing Prospectus that is intended for general distribution to prospective investors, as evidenced by its being specified in Schedule 2-A hereto.

"**Issuer Limited Use Free Writing Prospectus**" means any Issuer Free Writing Prospectus that is not an Issuer General Use Free Writing Prospectus and that is specified in Schedule 2-B hereto.

Each Issuer Free Writing Prospectus, as of its issue date and at all subsequent times through the completion of the offering and sale of the Securities under this Agreement or until any earlier date that the Company notified or notifies you as described in Section 3(e), did not, does not and will not include any information that conflicted, conflicts or will conflict with the information contained in the Registration Statement or the Prospectus. The Company has complied with the requirements of Rule 164 and Rule 433 of the 1933 Act Regulations with respect to each Issuer Free Writing Prospectus.

(2) Status as a Well-Known Seasoned Issuer. Since the time of initial filing of the Registration Statement, the Company has been, and continues to be, a "well known seasoned issuer" as defined in Rule 405 of the 1933 Act Regulations ("**Rule 405**").

(3) Status as Non-Ineligible Issuer. At the earliest time that the Company or another offering participant made a *bona fide* offer (within the meaning of Rule 164(h)(2) of the 1933 Act Regulations) of the Securities and at each Representation Date, the Company was not and is not an "ineligible issuer," as defined in Rule 405.

(4) Incorporated Documents. The documents incorporated or deemed to be incorporated by reference in the Registration Statement, the General Disclosure Package or the Prospectus, at the time they were or hereafter are filed with the Commission,

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

complied and will comply in all material respects with the requirements of the 1934 Act and the rules and regulations of the Commission thereunder (the "**1934 Act Regulations**") and, when read together with the other information in the Registration Statement, the General Disclosure Package or the Prospectus, as the case may be, (a) at the time the Registration Statement originally became effective and (b) at each Representation Date, did not, does not and will not include an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

(5) Independent Accountants. The accountants who certified the financial statements and any supporting schedules thereto included in the Registration Statement, the General Disclosure Package or the Prospectus are independent public accountants as required by the 1933 Act and the 1933 Act Regulations and the Public Company Accounting Oversight Board (United States).

(6) Financial Statements. The financial statements of the Company included or incorporated by reference in the Registration Statement, the General Disclosure Package or the Prospectus, together with the related schedules and notes, as well as those financial statements, schedules and notes of any other entity included or incorporated by reference therein, present fairly the financial position of the Company and its consolidated subsidiaries, or such other entity, as the case may be, at the dates indicated and the statement of operations, member's equity and cash flows of the Company and its consolidated subsidiaries, or such other entity, as the case may be, for the periods specified. Such financial statements have been prepared in conformity with U.S. generally accepted accounting principles ("**GAAP**") applied on a consistent basis throughout the periods involved. Except as otherwise included or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus, neither pro forma financial statements of the Company nor the financial statements of any entity other than the Company are required to be included in the Registration Statement, the General Disclosure Package or the Prospectus under the 1933 Act, the 1933 Act Regulations, the 1934 Act or the 1934 Act Regulations. The supporting schedules, if any, included or incorporated by reference in the Registration Statement, the General Disclosure Package or the Prospectus present fairly in accordance with GAAP the information required to be stated therein. The Company's ratios of earnings to fixed charges included or incorporated by reference in the Registration Statement (including Exhibit 12), the General Disclosure Package or the Prospectus have been calculated in compliance with Item 503(d) of Regulation S-K of the 1933 Act Regulations. The selected financial data and the summary financial information included or incorporated by reference in the Registration Statement, the General Disclosure Package or the Prospectus present fairly the information shown therein and have been compiled on a basis consistent with that of the audited financial statements included or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus. All disclosures contained in the Registration Statement, the General Disclosure Package or the Prospectus, if any, regarding "non-GAAP financial measures" (as such term is defined by the rules and regulations of the Commission) comply with Regulation G under the 1934 Act and Item 10 of Regulation S-K of the 1933 Act

Regulations, to the extent applicable. The interactive data in eXtensible Business Reporting Language included or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus fairly presents the information called for in all material respects and has been prepared in accordance with the Commission's rules and guidelines applicable thereto.

(7) No Material Adverse Change in Business. The Company has not sustained since the date of the latest audited financial statements included or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus any material loss from fire, explosion, flood, accident or other calamity not fully covered by insurance, otherwise than as set forth or contemplated in the Registration Statement, the General Disclosure Package and the Prospectus. Since the respective dates as of which information is given in the Registration Statement, the General Disclosure Package or the Prospectus, except as otherwise stated therein, (A) there has been no material adverse change, or any development involving a prospective material adverse change, in the general affairs, financial condition, earnings or business affairs of the Company and its subsidiaries (each such subsidiary, a "**Subsidiary**" and, collectively, the "**Subsidiaries**"), considered as one enterprise, whether or not arising in the ordinary course of business (a "**Material Adverse Change**"); (B) there have been no transactions entered into by the Company or any of its Subsidiaries, other than those arising in the ordinary course of business, which are material with respect to the Company and its Subsidiaries considered as one enterprise; (C) other than, in the case of the Company, regular dividends on the Company's common stock or preferred stock, in amounts per share that are consistent with past practice or the applicable charter document or supplement thereto, respectively, or, in the case of any of the Company's Subsidiaries, to the Company, there has been no dividend or distribution of any kind declared, paid or made by the Company or any of its Subsidiaries on any class of its capital stock; and (D) there has not been any material change in the capital stock (other than upon exercise of outstanding stock options, upon conversion of convertible securities outstanding as of the date of the most recent balance sheet incorporated by reference into the Registration Statement, the General Disclosure Package and the Prospectus or pursuant to the Company's employee or director compensation and benefit plans or the Company's dividend reinvestment and stock purchase plan) or long-term debt of the Company and its Subsidiaries considered as one enterprise.

(8) Good Standing of the Company. The Company has been duly incorporated, is validly existing as a corporation in good standing under the laws of the jurisdiction of its incorporation, has the requisite power and authority to own its property and to conduct its business as described in the Registration Statement, the General Disclosure Package and the Prospectus and is duly qualified to transact business and is in good standing in each jurisdiction in which the conduct of its business or its ownership or leasing of property requires such qualification, except to the extent that the failure to be so qualified or be in good standing would not result in a Material Adverse Change.

(9) Good Standing of Significant Subsidiaries. Each Subsidiary of the Company which is a significant subsidiary, as defined in Rule 405 (each, a "**Significant Subsidiary**"), has been duly incorporated or organized, is validly existing as a

corporation or limited liability company in good standing under the laws of the jurisdiction of its incorporation or organization, has the requisite power and authority to own its property and to conduct its business as described in the Registration Statement, the General Disclosure Package and the Prospectus and is duly qualified to transact business and is in good standing in each jurisdiction in which the conduct of its business or its ownership or leasing of property requires such qualification, except to the extent that the failure to be so qualified or be in good standing would not result in a Material Adverse Change. All of the issued shares of capital stock or other equity interests of each Significant Subsidiary have been duly and validly authorized and issued, are fully paid and non-assessable and are owned directly by the Company or a direct wholly-owned Subsidiary of the Company, as the case may be, free and clear of all liens, encumbrances, equities or claims. None of the outstanding shares of capital stock or other equity interests of any Significant Subsidiary were issued in violation of preemptive or other similar rights of any security holder of such Significant Subsidiary.

(10) Capitalization. The authorized, issued and outstanding shares of capital stock of the Company are as set forth in the Company's most recent Annual Report on Form 10-K or, if applicable, subsequent Quarterly Report on Form 10-Q (except for subsequent issuances thereof, if any, pursuant to reservations, agreements or employee benefit plans or pursuant to the exercise of convertible securities or options, in each case which are referred to in the Registration Statement, the General Disclosure Package and the Prospectus). Such shares of capital stock have been duly authorized and validly issued by the Company and are fully paid and non-assessable and none of such shares of capital stock of the Company were issued in violation of preemptive or other similar rights of any security holder of the Company.

(11) Authorization of this Agreement. This Agreement has been duly authorized, executed and delivered by the Company.

(12) Authorization of Securities. The Securities have been duly authorized by the Company for issuance and sale pursuant to this Agreement. At the Closing Time, the Securities will have been duly executed by the Company and, when authenticated in the manner provided for in the Indenture and delivered against payment of the requisite consideration therefor, will constitute valid and legally binding obligations of the Company, enforceable against the Company in accordance with their terms, except as the enforcement thereof may be limited by bankruptcy, insolvency (including, without limitation, all laws relating to fraudulent transfers), reorganization, moratorium or other similar laws affecting the enforcement of creditors' rights generally or by general equitable principles (regardless of whether enforcement is considered in a proceeding in equity or at law), and except further as enforcement thereof may be limited by requirements that a claim with respect to any debt securities payable in a foreign or composite currency (or a foreign or composite currency judgment in respect of such claim) be converted into U.S. dollars at a rate of exchange prevailing on a date determined pursuant to applicable law or by governmental authority to limit, delay or prohibit the making of payments outside the United States. The Securities will be in the form contemplated by, and each registered holder thereof will be entitled to the benefits of, the Indenture.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(13) Authorization of the Indenture. The Indenture has been duly authorized, executed and delivered by the Company and constitutes a valid and legally binding agreement of the Company, enforceable against the Company in accordance with its terms, except as the enforcement thereof may be limited by bankruptcy, insolvency (including, without limitation, all laws relating to fraudulent transfers), reorganization, moratorium or other similar laws affecting the enforcement of creditors' rights generally or by general equitable principles (regardless of whether enforcement is considered in a proceeding in equity or at law), and except further as enforcement thereof may be limited by requirements that a claim with respect to any debt securities issued or issuable under the Indenture that are payable in a foreign or composite currency (or a foreign or composite currency judgment in respect of such claim) be converted into U.S. dollars at a rate of exchange prevailing on a date determined pursuant to applicable law or by governmental authority to limit, delay or prohibit the making of payments outside the United States.

(14) Descriptions of the Securities and the Indenture. The Indenture conforms, and, upon issuance, the Securities will conform, in all material respects to the statements relating thereto contained in the Registration Statement, the General Disclosure Package and the Prospectus and will be substantially in the forms filed or incorporated by reference, as the case may be, as an exhibit to the Registration Statement.

(15) Absence of Defaults and Conflicts. Neither the Company nor any of its Subsidiaries is in violation of its certificate of incorporation or by-laws or other organizational documents or in default in the performance or observance of any obligation, agreement, covenant or condition contained in any contract, indenture, mortgage, deed of trust, loan or credit agreement, note, lease or other agreement or instrument to which the Company or any of its Subsidiaries is a party or by which it or any of them may be bound, or to which any of the assets, properties or operations of the Company or any of its Subsidiaries is subject (collectively, "**Agreements and Instruments**"), except for such defaults that would not result in a Material Adverse Change. The execution, delivery and performance of this Agreement, the Indenture, the Securities and any other agreement or instrument entered into or issued or to be entered into or issued by the Company in connection with the transactions contemplated hereby or thereby or in the Registration Statement, the General Disclosure Package and the Prospectus and the consummation of the transactions contemplated herein and in the Registration Statement, the General Disclosure Package and the Prospectus (including the issuance and sale of the Securities and the use of the proceeds from the sale of the Securities as described therein) and compliance by the Company with its obligations hereunder and thereunder have been duly authorized by all necessary corporate action and do not and will not, whether with or without the giving of notice or passage of time or both, conflict with or constitute a breach of, or default or Repayment Event (as defined below) under, or result in the creation or imposition of any lien, charge or encumbrance upon any assets, properties or operations of the Company or any of its Subsidiaries pursuant to, any Agreements and Instruments, nor will such action result in any violation of the provisions of the certificate of incorporation or by-laws or other organizational documents of the Company or any of its Subsidiaries or any applicable law, statute, rule, regulation, judgment, order, writ or decree of any government, government

Past financial performance is no guarantee of future results.

instrumentality or court, domestic or foreign, having jurisdiction over the Company or any of its Subsidiaries or any of their assets, properties or operations. As used herein, a "**Repayment Event**" means any event or condition which gives the holder of any note, debenture or other evidence of indebtedness (or any person acting on such holder's behalf) the right to require the repurchase, redemption or repayment of all or a portion of such indebtedness by the Company or any of its Subsidiaries.

(16) Absence of Labor Dispute. Other than as set forth in or contemplated by the Registration Statement, the General Disclosure Package and the Prospectus, no labor dispute with the employees of the Company or any of its Subsidiaries exists or, to the knowledge of the Company, is imminent, and the Company does not have actual knowledge of any existing or imminent labor disturbance by the employees of any of its or any Subsidiary's principal suppliers, manufacturers, customers or contractors, which, in either case, may reasonably be expected to result in a Material Adverse Change.

(17) Absence of Proceedings. Other than as set forth in or contemplated by the Registration Statement, the General Disclosure Package and the Prospectus, there is no action, suit, proceeding, inquiry or investigation before or brought by any court or governmental agency or body, domestic or foreign, now pending, or, to the knowledge of the Company, threatened, against or affecting the Company or any of its Subsidiaries which is required to be disclosed in the Registration Statement, the General Disclosure Package and the Prospectus (other than as stated in the Registration Statement, the General Disclosure Package and the Prospectus), or which might reasonably be expected to result in a Material Adverse Change, or which might reasonably be expected to materially and adversely affect the consolidated assets, properties or operations thereof or the consummation of the transactions contemplated under the Registration Statement, the General Disclosure Package and the Prospectus, this Agreement, the Securities or the Indenture, or the performance by the Company of its obligations hereunder and thereunder. The aggregate of all pending legal or governmental proceedings to which the Company or any of its Subsidiaries is a party or of which any of their respective assets, properties or operations is the subject which are not described in the Registration Statement, the General Disclosure Package and the Prospectus, including ordinary routine litigation incidental to the business, could not reasonably be expected to result in a Material Adverse Change.

(18) Accuracy of Exhibits. There are no contracts or documents which are required under the 1933 Act, the 1933 Act Regulations, the 1934 Act or the 1934 Act Regulations to be described in the Registration Statement, the General Disclosure Package, the Prospectus or the documents incorporated by reference therein or to be filed as exhibits thereto which have not been so described or filed as required.

(19) Absence of Further Requirements. No filing with, or authorization, approval, consent, license, order, registration, qualification or decree of, any court or governmental authority or agency, domestic or foreign, is necessary or required for the due authorization, execution and delivery by the Company of this Agreement, the Indenture, the Securities or for the performance by the Company of the transactions contemplated under the Registration Statement, the General Disclosure Package, the

Prospectus, this Agreement, the Securities or the Indenture, except the registration of the Securities under the 1933 Act, the qualification of the Indenture under the 1939 Act and such consents, approvals, registrations or qualifications as may be required under state securities or Blue Sky laws in connection with the issuance and sale of the Securities and except such as have been already made, obtained or rendered, as applicable.

(20) Possession of Licenses and Permits. The Company and its Subsidiaries possess such permits, licenses, approvals, consents and other authorizations (collectively, "**Governmental Licenses**") issued by the appropriate federal, state, local or foreign regulatory agencies or bodies necessary to conduct the business now operated by them, except where the failure so to possess such Governmental Licenses would not, singly or in the aggregate, result in a Material Adverse Change. The Company and its Subsidiaries are in compliance with the terms and conditions of all such Governmental Licenses, except where the failure so to comply would not, singly or in the aggregate, result in a Material Adverse Change. All of the Governmental Licenses are valid and in full force and effect, except where the invalidity of such Governmental Licenses or the failure of such Governmental Licenses to be in full force and effect would not result in a Material Adverse Change. Neither the Company nor any of its Subsidiaries has received any notice of proceedings relating to the revocation or modification of any such Governmental Licenses which, singly or in the aggregate, if the subject of an unfavorable decision, ruling or finding, would result in a Material Adverse Change.

(21) Title to Property. The Company and its Subsidiaries have good and marketable title to all real property owned by the Company and its Subsidiaries and good title to all other properties owned by them, in each case, free and clear of all mortgages, pledges, liens, security interests, claims, restrictions or encumbrances of any kind, except (A) as otherwise stated in the Registration Statement, the General Disclosure Package and the Prospectus or (B) those which do not, singly or in the aggregate, materially affect the value of the properties owned by the Company and its Subsidiaries considered as one enterprise and do not interfere in any material respect with the use made and proposed to be made of such properties. All of the leases and subleases material to the business of the Company and its Subsidiaries considered as one enterprise, and under which the Company or any of its Subsidiaries holds properties, are in full force and effect, and neither the Company nor any of its Subsidiaries has received any notice of any material claim of any sort that has been asserted by anyone adverse to the rights of the Company or any of its Subsidiaries under any of the leases or subleases mentioned above, or affecting or questioning the rights of the Company or such Subsidiary of the continued possession of the leased or subleased premises under any such lease or sublease.

(22) Insurance. The Company and its Subsidiaries have in full force and effect insurance with insurers believed to be reputable by the Company, covering their assets, properties, operations, personnel and business against such losses, damage, risks and hazards as are adequate in accordance with customary industry practice to protect the Company and its Subsidiaries considered as one enterprise.

(23) Commodity Exchange Act. The Securities will be excluded or exempted under, or beyond the purview of, the Commodity Exchange Act, as amended (the

"**Commodity Exchange Act**"), and the rules and regulations of the Commodity Futures Trading Commission under the Commodity Exchange Act (the "**Commodity Exchange Act Regulations**").

(24) Investment Company Act. The Company is not, or upon the issuance and sale of the Securities as herein contemplated and the application of the net proceeds therefrom as described in the Registration Statement, the General Disclosure Package and the Prospectus will not be, an "investment company" within the meaning of the Investment Company Act of 1940, as amended (the "**1940 Act**").

(25) Environmental Laws. Except as otherwise stated in the Registration Statement, the General Disclosure Package and the Prospectus or except as would not, singly or in the aggregate, result in a Material Adverse Change, (A) neither the Company nor any of its Subsidiaries is in violation of any federal, state, local or foreign statute, law, rule, regulation, ordinance, code, policy or rule of common law or any judicial or administrative interpretation thereof, including any judicial or administrative order, consent, decree or judgment, relating to pollution or protection of human health, the environment (including, without limitation, ambient air, surface water, groundwater, land surface or subsurface strata) or wildlife, including, without limitation, laws and regulations relating to the release or threatened release of chemicals, pollutants, contaminants, wastes, toxic substances, hazardous substances, petroleum or petroleum products (collectively, "**Hazardous Materials**") or to the manufacture, processing, distribution, use, treatment, storage, disposal, transport or handling of Hazardous Materials (collectively, "**Environmental Laws**"), (B) the Company and its Subsidiaries have all permits, authorizations and approvals required under any applicable Environmental Laws and are each in compliance with their requirements, (C) there are no pending or threatened administrative, regulatory or judicial actions, suits, demands, demand letters, claims, liens, notices of noncompliance or violation, investigation or proceedings relating to any Environmental Law against the Company or any of its Subsidiaries and (D) there are no events or circumstances known to the Company that might reasonably be expected to form the basis of an order for clean-up or remediation, or an action, suit or proceeding by any private party or governmental body or agency, against or affecting the Company or any of its Subsidiaries relating to Hazardous Materials or any Environmental Laws.

(26) Patriot Act. The Company will apply the net proceeds received from the offering and sale of the Securities as described in the Registration Statement, the General Disclosure Package and the Prospectus and, to the knowledge of the Company, none of such net proceeds will be used to further any action in violation or contravention of the U.S.A. Patriot Act or otherwise violate or contravene the rules, regulations or policies of the U.S. Office of Foreign Assets Control.

(27) Internal Control Over Financial Reporting. The Company and each of its Subsidiaries maintains a system of internal accounting controls sufficient to provide reasonable assurances that (i) transactions are executed in accordance with management's general or specific authorization; (ii) transactions are recorded as necessary to permit preparation of financial statements in conformity with GAAP and to maintain

accountability for assets; (iii) access to assets is permitted only in accordance with management's general or specific authorization; (iv) the recorded accountability for assets is compared with the existing assets at reasonable intervals and appropriate action is taken with respect to any differences; and (v) the interactive data in eXtensible Business Reporting Language included or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus fairly presents the information called for in all material respects and is prepared in accordance with the Commission's rules and guidelines applicable thereto. Except as described in the Registration Statement, the General Disclosure Package and the Prospectus, since the end of the Company's most recent audited fiscal year, there has been (A) no material weakness in any such party's internal control over financial reporting (whether or not remediated) and (B) no change in any such party's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, such internal control over financial reporting.

(28) Disclosure Controls and Procedures. The Company employs disclosure controls and procedures that are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the 1934 Act is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms and is accumulated and communicated to the Company's management, including its principal executive officer or officers and principal financial officer or officers, as appropriate, to allow timely decisions regarding disclosure.

(29) Compliance with the Sarbanes-Oxley Act. There is and has been no failure on the part of the Company or any of the Company's directors or officers, in their capacities as such, to comply in all material respects with any provision of the Sarbanes-Oxley Act of 2002 and the rules and regulations promulgated in connection therewith, including Section 402 related to loans and Sections 302 and 906 related to certifications.

(30) Pending Proceedings and Examinations. The Registration Statement is not the subject of a pending proceeding or examination under Section 8(d) or 8(e) of the 1933 Act, and the Company is not the subject of a pending proceeding under Section 8A of the 1933 Act in connection with the offering and sale of the Securities.

(31) No Unlawful Contributions or Other Payments. Neither the Company nor any of its Subsidiaries nor, to the knowledge of the Company, any director, officer, agent, employee or affiliate of the Company or any of its Subsidiaries is aware of or has taken any action, directly or indirectly, that would result in a violation by such persons of the Foreign Corrupt Practices Act of 1977, as amended, and the rules and regulations thereunder (the "**FCPA**"), including, without limitation, making use of the mails or any means or instrumentality of interstate commerce corruptly in furtherance of an offer, payment, promise to pay or authorization of the payment of any money, or other property, gift, promise to give, or authorization of the giving of anything of value to any "foreign official" (as such term is defined in the FCPA) or any foreign political party or official thereof or any candidate for foreign political office, in contravention of the FCPA, and the Company, its Subsidiaries and, to the knowledge of the Company, its affiliates have conducted their businesses in compliance with the FCPA and have

instituted and maintain policies and procedures designed to ensure, and which are reasonably expected to continue to ensure, continued compliance therewith.

(32) No Conflict with Money Laundering Laws. The operations of the Company and its Subsidiaries are and have been conducted at all times in compliance with applicable financial recordkeeping and reporting requirements of the Currency and Foreign Transactions Reporting Act of 1970, as amended, the money laundering statutes of all applicable jurisdictions, the rules and regulations thereunder and any related or similar rules, regulations or guidelines issued, administered or enforced by any governmental agency (collectively, the "**Money Laundering Laws**") and no action, suit or proceeding by or before any court or governmental agency, authority or body or any arbitrator involving the Company or any of its Subsidiaries with respect to the Money Laundering Laws is pending or, to the knowledge of the Company, threatened.

(33) OFAC. Neither the Company nor any of its Subsidiaries, nor, to the knowledge of the Company, any director, officer, agent or employee of the Company or any of its Subsidiaries is currently the subject of any sanctions administered or enforced by the Office of Foreign Assets Control of the U.S. Department of the Treasury or the U.S. Department of State.

(b) Officers' Certificates. Any certificate signed by any officer of the Company or any of its Subsidiaries and delivered to any Underwriter or to counsel for the Underwriters in connection with the offering of the Securities shall be deemed a representation and warranty by the Company to each Underwriter as to the matters covered thereby on the date of such certificate.

SECTION 2. Sale and Delivery to Underwriters; Closing.

(a) The Securities. On the basis of the representations, warranties and agreements herein contained, and upon the terms but subject to the conditions herein set forth, the Company agrees to sell to each Underwriter, severally and not jointly, and each Underwriter agrees, severally and not jointly, to purchase from the Company the aggregate principal amount of the Securities set forth opposite the names of the Underwriters on Schedule 1 at a purchase price of 99.273% of the aggregate principal amount of the Securities, plus accrued interest thereon, if any, from November 6, 2017 to the Closing Time. The Securities and the offering thereof will have the terms specified in the Final Term Sheet referred to in Section 3(b).

(b) Payment. The Company will deliver against payment of the purchase price set forth in Section 2(a) the Securities in the form of permanent global securities (the "**Global Securities**") deposited with the Trustee as custodian for The Depository Trust Company ("**DTC**") and registered in the name of Cede & Co., as nominee for DTC. Interests in any permanent Global Securities will be held only in book-entry form through DTC, except in the limited circumstances described in the General Disclosure Package. Payment for the Securities shall be made by the Underwriters in immediately available funds by wire transfer to an account specified by the Company drawn to the order of the Company at the office of the Company, 80 Park Plaza, Newark, New Jersey 07102, or at such other place as shall be agreed upon by the Representatives and the Company, at 9:00 A.M. (New York City time) on November 6, 2017, or

Past financial performance is no guarantee of future results.

such other time and date as the Representatives and the Company shall mutually agree (the time and date of such closing are called (unless postponed in accordance with the provisions of Section 10 hereof) the "**Closing Time**"), against delivery to the Trustee as custodian for DTC of the Global Securities representing all of the Securities.

It is understood that each Underwriter has authorized the Representatives, for their accounts, to accept delivery of, receipt for, and make payment of the purchase price for, the Securities which it has severally agreed to purchase. Each Representative, individually and not as representative of the Underwriters, may (but shall not be obligated to) make payment of the purchase price for the Securities to be purchased by any Underwriter whose funds have not been received by the Closing Time, but such payment shall not relieve such Underwriter from its obligations hereunder.

(c) Denominations; Registration. The Securities shall be in such denominations and registered in such names as the Representatives may request in writing at least one full business day prior to the Closing Time. The Securities will be made available for examination by the Representatives in The City of New York not later than 9:00 A.M. (New York City time) on the business day prior to the Closing Time.

SECTION 3. Covenants of the Company. The Company covenants with each Underwriter as follows:

(a) Compliance with Securities Regulations and Commission Requests. The Company, subject to Section 3(b), will comply with the requirements of Rule 430B and, during the Prospectus Delivery Period (as defined below), will notify the Representatives promptly, and confirm the notice in writing, (i) of the effectiveness of any post-effective amendment to the Registration Statement or of a new registration statement relating to the Securities or the filing of any supplement or amendment to the Prospectus or any preliminary prospectus, (ii) of the receipt of any comments from the Commission, (iii) of any request by the Commission for any amendment to the Registration Statement or the filing of a new registration statement or any amendment or supplement to the Prospectus or any preliminary prospectus or any document incorporated by reference therein or otherwise deemed to be a part thereof or for additional information, (iv) of the issuance by the Commission of any stop order suspending the effectiveness of the Registration Statement or such new registration statement, or notice objecting to its use pursuant to Rule 401(g)(2) of the 1933 Act Regulations, or of any order preventing or suspending the use of any preliminary prospectus or the Prospectus, or of the suspension of the qualification of the Securities for offering or sale in any jurisdiction, or of the initiation or threatening of any proceedings for any of such purposes or of any examination pursuant to Section 8(e) of the 1933 Act concerning the Registration Statement and (v) if the Company becomes the subject of a proceeding under Section 8A of the 1933 Act in connection with the offering of the Securities. The Company will promptly effect the filings necessary pursuant to Rule 424(b), in the manner and within the time period required by Rule 424(b) (without reliance on Rule 424(b)(8)), and will take such steps as it deems necessary to ascertain promptly whether the Prospectus transmitted for filing under Rule 424(b) was received for filing by the Commission and, in the event that it was not, the Company will promptly file the Prospectus. The Company will make every reasonable effort to prevent the issuance of any stop order and, if any stop order is issued, promptly to use its best efforts to obtain its withdrawal.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The Company agrees to pay the required Commission filing fees relating to the offering of the Securities within the time required by and in accordance with Rule 456(b)(1) and 457(r) of the 1933 Act Regulations.

(b) Filing of Amendments and 1934 Act Documents; Preparation of Final Term Sheet. During such period beginning on the date of this Agreement and ending on the later of the Closing Time or such date as, in the opinion of counsel for the Underwriters, the Prospectus is no longer required by law to be delivered in connection with sales of the Securities by an Underwriter or dealer, including in circumstances where such requirement may be satisfied pursuant to Rule 172 of the 1933 Act Regulations (the "**Prospectus Delivery Period**"), the Company will give the Representatives notice of its intention to file or prepare any amendment to the Registration Statement or a new registration statement relating to the Securities or any amendment, supplement or revision to any preliminary prospectus or to the Prospectus, whether pursuant to the 1933 Act, the 1934 Act or otherwise, will furnish the Representatives with copies of any such documents a reasonable amount of time prior to such proposed filing or use, as the case may be, and will not file or use any such document of which the Representatives or counsel for the Underwriters shall reasonably disapprove. The Company has given the Representatives notice of any filings made pursuant to the 1934 Act or the 1934 Act Regulations within 48 hours prior to the Applicable Time; the Company will give the Representatives notice of its intention to make any such filing from the Applicable Time to the Closing Time and will furnish the Representatives with copies of any such documents a reasonable amount of time prior to such proposed filing and will not file or use any such document to which the Representatives or counsel for the Underwriters shall object. The Company will prepare a final term sheet (the "**Final Term Sheet**") reflecting the final terms of the Securities, in form and substance satisfactory to the Underwriters and attached as Schedule 3 hereto, and will file such Final Term Sheet pursuant to Rule 433(d) within the time required by such rule. The Final Term Sheet is an Issuer Free Writing Prospectus for purposes of this Agreement.

(c) Delivery of Registration Statement. The Company has furnished or will deliver to the Representatives and counsel for the Underwriters, in such quantities as the Representatives may reasonably request, without charge, signed copies of the Registration Statement as originally filed and any amendment thereto (including exhibits filed therewith or incorporated by reference therein and documents incorporated or deemed to be incorporated by reference therein or otherwise deemed to be a part thereof) and signed copies of all consents and certificates of experts, and will also deliver to the Representatives, without charge, a conformed copy of the Registration Statement as originally filed and any amendment thereto (without exhibits) for each of the Underwriters. The Registration Statement and any amendment thereto furnished to the Underwriters will be identical to any electronically transmitted copies thereof filed with the Commission pursuant to EDGAR, except to the extent permitted by Regulation S-T.

(d) Delivery of Prospectuses. The Company will deliver to each Underwriter, without charge, as many copies of each preliminary prospectus and any amendment or supplement thereto as such Underwriter may reasonably request, and the Company hereby consents to the use of such copies for purposes permitted by the 1933 Act. The Company will furnish to each Underwriter, without charge, during the Prospectus Delivery Period, such number of copies of the Prospectus (as amended or supplemented) as such Underwriter may reasonably request. Each preliminary prospectus and the Prospectus and any amendments or supplements thereto

furnished to the Underwriters will be identical to any electronically transmitted copies thereof filed with the Commission pursuant to EDGAR, except to the extent permitted by Regulation S-T.

(e) Continued Compliance with Securities Laws. The Company will comply with the 1933 Act and the 1933 Act Regulations, the 1934 Act and the 1934 Act Regulations and the 1939 Act and the rules and regulations of the Commission under the 1939 Act so as to permit the completion of the distribution of the Securities as contemplated in this Agreement and in the Registration Statement, the General Disclosure Package and the Prospectus. If at any time during the Prospectus Delivery Period, any event shall occur or condition shall exist as a result of which it is necessary, in the opinion of counsel for the Underwriters or for the Company, to amend the Registration Statement in order that the Registration Statement will not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading or to amend or supplement the General Disclosure Package or the Prospectus in order that such General Disclosure Package or the Prospectus, as the case may be, will not include an untrue statement of a material fact or omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances existing at the Applicable Time or at the time it is delivered or conveyed to a purchaser, not misleading, or if it shall be necessary, in the opinion of such counsel, at any such time to amend the Registration Statement, to file a new registration statement or to amend or supplement the General Disclosure Package or the Prospectus in order to comply with the requirements of the 1933 Act or the 1933 Act Regulations, the Company will: (i) promptly prepare and file with the Commission, subject to Sections 3(b) and 3(k), such amendment or supplement or new registration statement as may be necessary to correct such statement or omission or to make the Registration Statement, the General Disclosure Package or the Prospectus comply with such requirements; (ii) use their best efforts to have such amendment or new registration statement (if it is not an automatic shelf registration statement) declared effective as soon as practicable; and (iii) furnish to the Underwriters, without charge, such number of copies of such amendment or supplement or new registration statement as the Underwriters may reasonably request. If, prior to the completion of the public offer and sale of the Securities, at any time following the issuance of an Issuer Free Writing Prospectus there occurred or occurs an event or development as a result of which such Issuer Free Writing Prospectus conflicted or would conflict with the information then contained in the Registration Statement, any preliminary prospectus or the Prospectus or included or would include an untrue statement of a material fact or omitted or would omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances prevailing at that subsequent time, not misleading, the Company will promptly (i) notify the Representatives and (ii) either (1) amend or supplement such Issuer Free Writing Prospectus to eliminate or correct such conflict, untrue statement or omission or (2) file a report with the Commission under the 1934 Act that corrects such untrue statement or omission and notify the Representatives in writing that such Issuer Free Writing Prospectus shall no longer be used.

(f) Blue Sky Qualifications. The Company will use its best efforts, in cooperation with the Underwriters, to qualify the Securities for offering and sale under the applicable securities laws of such states and other jurisdictions (domestic or foreign) as the Representatives may designate and to maintain such qualifications in effect for a period of not less than one year from the date of this Agreement; provided, however, that the Company shall not be obligated to file

any general consent to service of process or to qualify as a foreign corporation or as a dealer in securities in any jurisdiction in which it is not so qualified or to subject itself to taxation in respect of doing business in any jurisdiction in which it is not otherwise so subject. In each jurisdiction in which the Securities have been so qualified, the Company will file such statements and reports as may be required by the laws of such jurisdiction to continue such qualification in effect for a period of not less than one year from the date of this Agreement.

(g) Earnings Statement. The Company will timely file such reports pursuant to the 1934 Act as are necessary in order to make generally available to its security holders as soon as practicable an earnings statement for the purposes of, and to provide the benefits contemplated by, the last paragraph of Section 11(a) of the 1933 Act; provided, that the Company will be deemed to have furnished such statement to its security holders to the extent it is filed on EDGAR.

(h) Use of Proceeds. The Company will use the net proceeds received by it from the sale of the Securities in the manner specified in the Registration Statement, the General Disclosure Package and the Prospectus under "Use of Proceeds."

(i) Restriction on Sale of Securities. Between the date of this Agreement and the Closing Time, the Company will not, without the prior written consent of the Representatives, directly or indirectly, issue, sell, offer or contract to sell, grant any option for the sale of, or otherwise dispose of, the Securities.

(j) Reporting Requirements. The Company, during the Prospectus Delivery Period, will file all documents required to be filed with the Commission pursuant to the 1934 Act within the time periods required by the 1934 Act and the 1934 Act Regulations.

(k) Permitted Free Writing Prospectuses. The Company represents and agrees that, unless it obtains the prior consent of the Representatives, and each Underwriter represents and agrees that, unless it obtains the prior consent of the Representatives and the prior consent of the Company, it has not made and will not make any offer relating to the Securities that would constitute an "issuer free writing prospectus," as defined in Rule 433, or that would otherwise constitute a "free writing prospectus," as defined in Rule 405, required to be filed with the Commission; provided, however, that the Underwriters are authorized to use any free writing prospectus that contains substantially only information specified in the Final Term Sheet. Any such free writing prospectus consented to by the Company and the Representatives is hereinafter referred to as a "**Permitted Free Writing Prospectus**." The Company represents that it has treated or agrees that it will treat each Permitted Free Writing Prospectus as an "issuer free writing prospectus," as defined in Rule 433, and has complied and will comply with the requirements of Rule 433 applicable to each and every Permitted Free Writing Prospectus, including timely filing with the Commission where required, legending and record keeping.

(l) Renewal of Registration Statement. If, immediately prior to the third anniversary of the initial effective date of the Registration Statement (the "**Renewal Date**"), any of the Securities remain unsold by the Underwriters, the Company will, prior to the Renewal Date and subject to Section 3(b), file, if it has not already done so and is eligible to do so, a new automatic shelf registration statement relating to the Securities. If no longer eligible to file an automatic

shelf registration statement, the Company will, prior to the Renewal Date and subject to Section 3(b), if it has not already done so, file a new shelf registration statement relating to the Securities and will use its reasonable best efforts to cause such registration statement to be declared effective within 180 days after the Renewal Date, and will take all other reasonable actions necessary or appropriate to permit the public offering and sale of the Securities to continue as contemplated in the expired registration statement relating to the Securities. References herein to the "**Registration Statement**" shall include such new automatic shelf registration statement or shelf registration statement, as the case may be.

(m) Notice of Inability to Use Automatic Shelf Registration Statement Form. If, at any time during the Prospectus Delivery Period, the Company receives from the Commission a notice pursuant to Rule 401(g)(2) of the 1933 Act Regulations or otherwise ceases to be eligible to use the automatic shelf registration statement form, the Company will (i) promptly notify the Representatives, (ii) promptly file a new registration statement or post-effective amendment on the proper form relating to the Securities, in a form satisfactory to the Representatives, (iii) use its reasonable best efforts to cause such registration statement or post-effective amendment to be declared effective and (iv) promptly notify the Representatives of such effectiveness. The Company will take all other action necessary or appropriate to permit the public offering and sale of the Securities to continue as contemplated in the registration statement that was the subject of the Rule 401(g)(2) notice or for which the Company has otherwise become ineligible. References herein to the Registration Statement shall include such new registration statement or post-effective amendment, as the case may be.

SECTION 4. Payment of Expenses. *(a) Expenses*. The Company will pay all expenses incident to the performance of its obligations under this Agreement, including (i) the preparation, printing and filing of the Registration Statement (including financial statements and exhibits) and any amendment thereto, (ii) the preparation, printing and delivery to the Underwriters of this Agreement, the Indenture and such other documents as may be required in connection with the offering, purchase, sale, issuance or delivery of the Securities, (iii) the preparation, issuance and delivery of the Securities to the Underwriters, including any transfer taxes and any stamp or other duties payable upon the sale, issuance or delivery of the Securities to the Underwriters, (iv) the fees and disbursements of counsel to the Company, accountants and other advisors or agents (including transfer agents and registrars), as well as the fees and disbursements of the Trustee and its counsel, (v) the qualification of the Securities under state securities laws in accordance with the provisions of Section 3(f) hereof, including filing fees and the reasonable fees and disbursements of counsel for the Underwriters in connection therewith and in connection with the preparation, printing and delivery of the Blue Sky Survey, and any amendment thereto, (vi) the printing and delivery to the Underwriters of copies of the Registration Statement, each preliminary prospectus, any Issuer Free Writing Prospectus and the Prospectus and any amendments or supplements thereto, (vii) the fees charged by nationally recognized statistical rating organizations for the rating of the Securities, (viii) the filing fees incident to, and the reasonable fees and disbursements of counsel to the Underwriters in connection with, the review, if any, by the Financial Industry Regulatory Authority ("**FINRA**") of the terms of the sale of the Securities, (ix) all fees and expenses in connection with making the Securities eligible for clearance, settlement and trading through the facilities of DTC, and (x) all other costs and expenses incident to the performance of the obligations of the Company hereunder for which provision is not otherwise made in this Section. It is understood, however, that except as

provided in this Section, Section 5(j), Section 6, Section 7 and Section 9(b), the Underwriters will pay all of their costs and expenses, including fees and disbursements of their counsel, transfer taxes payable on resale of any of the Securities by them and any advertising expenses connected with any offers they may make.

(b) Termination of Agreement. If this Agreement is terminated by the Representatives in accordance with the provisions of Section 5 hereof, the Company shall reimburse the Underwriters for all of their out of pocket expenses, including the reasonable fees and disbursements of counsel for the Underwriters.

SECTION 5. Conditions of Underwriters' Obligations. The obligations of the Underwriters to purchase and pay for the Securities pursuant to this Agreement are subject to the accuracy of the representations and warranties of the Company contained in Section 1 hereof or in certificates of any officer of the Company or any of its Subsidiaries delivered pursuant to the provisions hereof, to the performance by the Company of its covenants and other obligations hereunder, and to the following further conditions:

(a) Effectiveness of Registration Statement. At Closing Time, (i) the Registration Statement shall have been filed by the Company with the Commission not earlier than three years prior to the date hereof and shall have become effective upon filing in accordance with Rule 462(e), and no stop order suspending the effectiveness of the Registration Statement shall have been issued under the 1933 Act and no proceedings for that purpose or pursuant to Section 8A of the 1933 Act against the Company or related to the offering of the Securities shall have been instituted or be pending or threatened by the Commission, any request on the part of the Commission for additional information shall have been complied with to the reasonable satisfaction of counsel for the Underwriters, and no notice of objection of the Commission to the use of such form of registration statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) of the 1933 Act Regulations shall have been received by the Company, (ii) each preliminary prospectus and the Prospectus shall have been filed with the Commission in the manner and within the time period required by Rule 424(b) without reliance on Rule 424(b)(8) (or a post-effective amendment providing such information shall have been filed and become effective in accordance with the requirements of Rule 430B) and (iii) the Final Term Sheet and any other material required to be filed by the Company pursuant to Rule 433(d) shall have been filed with the Commission within the applicable time periods prescribed for such filings under such Rule 433.

(b) Opinion of Counsel for Company. At Closing Time, the Representatives shall have received the favorable opinion, dated as of Closing Time, of either Tamara L. Linde, Esquire, Executive Vice President and General Counsel of the Company, or Shawn P. Leyden, Esquire, Vice President and Deputy General Counsel of PSEG Services Corporation, in form and substance satisfactory to counsel for the Underwriters, together with signed or reproduced copies of such letter for each of the other Underwriters, to the effect set forth in Exhibit A hereto and to such further effect as counsel to the Underwriters may reasonably request.

(c) Opinion of Counsel for Underwriters. At Closing Time, the Representatives shall have received the favorable opinion, dated as of Closing Time, of Sidley Austin llp, counsel for the Underwriters, together with signed or reproduced copies of such letter for each of the other

Underwriters, in form and substance satisfactory to the Representatives. In giving such opinion, such counsel may rely, as to all matters governed by the laws of the State of New Jersey, upon the opinion, dated as of Closing Time, of either Tamara L. Linde, Esquire, Executive Vice President and General Counsel of the Company, or Shawn P. Leyden, Esquire, Vice President and Deputy General Counsel of the Company, and as to all matters governed by the laws of other jurisdictions other than the law of the State of New York and the federal law of the United States, upon the opinions of counsel satisfactory to the Representatives. Such counsel may also state that, insofar as such opinion involves factual matters, they have relied, to the extent they deem proper, upon certificates of officers of the Company and its Subsidiaries and certificates of public officials.

(d) Officer's Certificate. At Closing Time, there shall not have been, since the date of this Agreement or since the respective dates as of which information is given in the Registration Statement, the General Disclosure Package or the Prospectus, any Material Adverse Change, and the Representatives shall have received a certificate of the Chairman, the President or any Vice President of the Company, dated as of Closing Time, to the effect that (i) there has been no such Material Adverse Change, (ii) the representations and warranties in Section 1(a) are true and correct with the same force and effect as though expressly made at and as of the Closing Time, (iii) the Company has complied with all agreements contained in this Agreement and satisfied all conditions on its part to be performed or satisfied at or prior to the Closing Time, and (iv) no stop order suspending the effectiveness of the Registration Statement has been issued and no proceedings for that purpose or pursuant to Section 8A of the 1933 Act against the Company or relating to the offering have been instituted, are pending or, to the best of such officer's knowledge, are threatened by the Commission.

(e) Accountant's Comfort Letter. At the Execution Time, the Representatives shall have received from Deloitte & Touche LLP, independent registered public accountants for the Company, a letter, dated as of the date hereof addressed to the Underwriters, in form and substance satisfactory to the Representatives, together with signed or reproduced copies of such letter for each of the other Underwriters, with respect to the audited and unaudited financial statements and certain financial information contained or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus.

(f) Bring-down Comfort Letter. At Closing Time, the Representatives shall have received from Deloitte & Touche LLP, independent registered public accountants for the Company, a letter, dated as of Closing Time addressed to the Underwriters, in form and substance satisfactory to the Representatives, together with signed or reproduced copies of such letter for each of the other Underwriters to the effect that they reaffirm the statements made in the letter furnished pursuant to subsection (e) of this Section 5, except that the specified date referred to shall be a date not more than three business days prior to the Closing Time.

(g) Ratings. At Closing Time, the Securities shall have the ratings accorded by any "nationally recognized statistical rating organization," as defined in Section 3(a)(62) of the 1934 Act, as specified in the Final Term Sheet, and the Company shall have delivered to the Representatives a letter, dated as of such date, from each such rating organization, or other evidence satisfactory to the Representatives, confirming that the Securities have such ratings. Since the Execution Time, there shall not have occurred a downgrading in, or withdrawal of, the

rating assigned to the Securities or any of the Company's other securities by any such rating organization, and no such rating organization shall have publicly announced or given notice of any intended or potential decrease in or withdrawal of any such rating or of a possible change in any such rating that does not indicate the direction of the possible change.

(h) No Objection. If the Registration Statement or the offering of the Securities has been filed with FINRA for review, FINRA shall not have raised any objection with respect to the fairness and reasonableness of the underwriting terms and arrangements.

(i) Additional Documents. At Closing Time, counsel for the Underwriters shall have been furnished with such documents and opinions as they may require for the purpose of enabling them to pass upon the issuance and sale of the Securities as herein contemplated, or in order to evidence the accuracy of any of the representations or warranties, or the fulfillment of any of the conditions, herein contained; and all proceedings taken by the Company in connection with the issuance and sale of the Securities as herein contemplated shall be satisfactory in form and substance to the Representatives and counsel for the Underwriters.

(j) Termination. If any condition specified in this Section 5 shall not have been fulfilled when and as required to be fulfilled, this Agreement may be terminated by the Representatives by notice to the Company at any time at or prior to the Closing Time, and such termination shall be without liability of any party to any other party except as provided in Section 4 and except that Sections 1, 6, 7, 8 and 14 shall survive any such termination and remain in full force and effect.

SECTION 6. Indemnification.

(a) Indemnification of Underwriters. The Company agrees to indemnify and hold harmless each Underwriter and their respective partners, directors and officers and each person, if any, who controls any Underwriter (collectively, "**Underwriter Indemnified Parties**") within the meaning of Section 15 of the 1933 Act or Section 20 of the 1934 Act as follows:

(i) against any and all loss, liability, claim, damage and expense whatsoever, as incurred, arising out of any untrue statement or alleged untrue statement of a material fact contained in the Registration Statement (or any amendment thereto) or the omission or alleged omission therefrom of a material fact required to be stated therein or necessary to make the statements therein not misleading or arising out of any untrue statement or alleged untrue statement of a material fact contained in any preliminary prospectus, any Issuer Free Writing Prospectus or the Prospectus (or any amendment or supplement thereto) or in any "issuer information" (as defined in Rule 433) of the Company that is filed or required to be filed under Rule 433(d) or the omission or alleged omission therefrom of a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading;

(ii) against any and all loss, liability, claim, damage and expense whatsoever, as incurred, to the extent of the aggregate amount paid in settlement of any litigation, or any investigation or proceeding by any governmental agency or body, commenced or threatened, or of any claim whatsoever based upon any such untrue statement or omission

Past financial performance is no guarantee of future results.

referred to in subsection (i) above or any alleged untrue statement or omission, if such settlement is effected with the written consent of the Company; and

(iii) against any and all expense whatsoever, as incurred, reasonably incurred in investigating, preparing or defending against any litigation, or any investigation or proceeding by any governmental agency or body, commenced or threatened, or any claim whatsoever based upon any such untrue statement or omission, or any such alleged untrue statement or omission, to the extent that any such expense is not paid under (i) or (ii) above;

provided, however, that this indemnity agreement shall not apply to any loss, liability, claim, damage or expense to the extent arising out of any untrue statement or omission or alleged untrue statement or omission made in reliance upon and in conformity with written information furnished to the Company by any Underwriter through the Representatives expressly for use in the Registration Statement (or any amendment thereto) or any preliminary prospectus, any Issuer Free Writing Prospectus or the Prospectus (or any amendment or supplement thereto) or made in reliance upon the Trustee's Statement of Eligibility filed as an exhibit to the Registration Statement. The Company and the Underwriters hereby acknowledge and agree that the only written information furnished to the Company by any Underwriter through the Representatives expressly for use in the Registration Statement (or any amendment thereto) or any preliminary prospectus, any Issuer Free Writing Prospectus or the Prospectus (or any amendment or supplement thereto) are the statements set forth in the (x) first, second and third sentences of the third paragraph, (y) second sentence of the fifth paragraph and (z) first, second, third, fourth and sixth sentences of the sixth paragraph, in each case under the caption "Underwriting" in the Prospectus (collectively, the "**Underwriter Information**").

(b) In no case shall the Company be liable under the indemnity agreement set forth in Section 6(a) hereof with respect to any claim made against any Underwriter Indemnified Party unless such party shall be notified in writing of the nature of the claim promptly after the assertion thereof, but failure to so notify such party shall not relieve it from any liability which it may have otherwise than on account of said indemnity agreement. The Company shall be entitled to participate at its own expense in the defense, or, if the Company so elects, within a reasonable time after receipt of such notice, to assume the defense of any suit brought to enforce any such claim, but if they so elect to assume the defense, such defense shall be conducted by counsel chosen by the Company and approved by the Underwriter Indemnified Parties who are party to such suit, which approval shall not be unreasonably withheld. In the event that the Company elects to assume the defense of any such suit and retain such counsel, the Underwriter Indemnified Parties who are party to such suit shall bear the fees and expenses of any additional counsel thereafter retained by them. In the event that the parties to any such action (including impleaded parties) include the Company and one or more Underwriters and any such Underwriter shall have been advised by counsel chosen by it and satisfactory to the Company, as the case may be, that there may be one or more legal defenses available to it which are different from or additional to those available to the Company, the Company shall not have the right to assume the defense of such action on behalf of such Underwriter and the Company will reimburse, without duplication, such Underwriter Indemnified Parties as aforesaid for the reasonable fees and expenses of any counsel retained by them, it being understood that the Company shall not, in connection with any one action or separate but similar or related actions in

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

the same jurisdiction arising out of the same general allegations or circumstances, be liable for the reasonable fees and expenses of more than one separate firm of attorneys for all such Underwriter Indemnified Parties, which firm shall be designated by the Representatives in writing. The Company agrees to notify the Representatives promptly after the assertion of any claim against it, any of its directors, any of its officers who signed the Registration Statement, or any person who controls the Company within the meaning of Section 15 of the 1933 Act or Section 20 of the 1934 Act, in connection with the offering and sale of the Securities.

(c) Indemnification of the Company, Directors and Officers. The Underwriters, severally and not jointly, agree to indemnify and hold harmless the Company, its directors, each of its officers who signed the Registration Statement, and each person, if any, who controls the Company within the meaning of Section 15 of the 1933 Act or Section 20 of the 1934 Act against any and all loss, liability, claim, damage and expense described in the indemnity contained in subsection (a) of this Section, as incurred, but only with respect to untrue statements or omissions, or alleged untrue statements or omissions, made in the Registration Statement (or any amendment thereto) or any preliminary prospectus, any Issuer Free Writing Prospectus or the Prospectus (or any amendment or supplement thereto) in reliance upon and in conformity with the Underwriter Information. In case any action shall be brought against the Company or any person so indemnified based on the Registration Statement (or any amendment thereto) or such preliminary prospectus, such Issuer Free Writing Prospectus or the Prospectus (or any amendment or supplement thereto) and in respect of which indemnity may be sought against any Underwriter, such Underwriter shall have the rights and duties given to the Company, and the Company and each person so indemnified shall have the rights and duties given to the Underwriters by the provisions of Section 6(b) hereof.

(d) The indemnity agreements contained in this Section 6 shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of the Company or any Underwriter Indemnified Parties, and shall survive the delivery of the Securities to the Underwriters.

(e) Settlement. No indemnifying party shall, without the prior written consent of the indemnified parties, settle or compromise or consent to the entry of any judgment with respect to any litigation, or any investigation or proceeding by any governmental agency or body, commenced or threatened, or any claim whatsoever in respect of which indemnification or contribution could be sought under this Section 6 or Section 7 hereof (whether or not the indemnified parties are actual or potential parties thereto), unless such settlement, compromise or consent (i) includes an unconditional release of each indemnified party from all liability arising out of such litigation, investigation, proceeding or claim and (ii) does not include a statement as to or an admission of fault, culpability or a failure to act by or on behalf of any indemnified party.

SECTION 7. Contribution. In order to provide for just and equitable contribution in circumstances in which the indemnity agreement provided for in Section 6 is for any reason held to be unenforceable by the indemnified parties although applicable in accordance with its terms, the Company and the Underwriters shall contribute to the aggregate losses, liabilities, claims, damages and expenses of the nature contemplated by said indemnity agreements incurred by the Company and the Underwriters, in such proportions that the Underwriters are responsible for that

portion represented by the percentage that the total underwriting discount appearing on the cover page of the Prospectus relating to the Securities bears to the aggregate initial public offering price appearing thereon and the Company is responsible for the balance; provided, however, that (i) no Underwriter shall be required to contribute any amount in excess of the amount by which the total discount or commission received by such Underwriter in connection with the offering of the Securities exceeds the amount of any damages which such Underwriter has otherwise been required to pay by reason of any applicable untrue or alleged untrue statement or omission or alleged omission and (ii) no person guilty of fraudulent misrepresentation (within the meaning of Section 11(f) of the 1933 Act) shall be entitled to contribution from any person who was not guilty of such fraudulent misrepresentation. For purposes of this Section, each Underwriter Indemnified Party shall have the same rights to contribution as the Underwriters, and each director of the Company, each officer of the Company who signed the Registration Statement, and each person, if any, who controls the Company within the meaning of Section 15 of the 1933 Act or Section 20 of the 1934 Act shall have the same rights to contribution as the Company. The Underwriters' respective obligations to contribute pursuant to this Section 7 are several in proportion to their respective underwriting obligations, and not joint.

SECTION 8. Representations, Warranties and Agreements to Survive Delivery. All representations, warranties and agreements contained in this Agreement or in certificates of officers of the Company or any of its Subsidiaries submitted pursuant hereto or thereto shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of any Underwriter or controlling person, or by or on behalf of the Company, and shall survive delivery of and payment for the Securities.

In all dealings hereunder, the Representatives shall act on behalf of each of the Underwriters, and the parties hereto shall be entitled to act and rely upon any statement, request, notice or agreement on behalf of any Underwriter made or given by the Representatives or by the Representatives on behalf of the Underwriters.

SECTION 9. Termination.

(a) The Representatives may terminate this Agreement, by notice to the Company, at any time at or prior to the Closing Time, (i) if there has been, since the time of execution of this Agreement or since the respective dates as of which information is given in the Registration Statement, the General Disclosure Package or the Prospectus, any Material Adverse Change, or (ii) if there has occurred any material adverse change in the financial markets in the United States, any outbreak of hostilities or escalation thereof or other calamity or crisis or any change or development involving a prospective change in national or international political, financial or economic conditions, in each case the effect of which is such as to make it, in the judgment of the Underwriters, impracticable or inadvisable to market the Securities or to enforce contracts for the sale of the Securities, or (iii) if trading in any securities of the Company has been suspended or materially limited by the Commission or the New York Stock Exchange, or if trading generally on the NYSE MKT or the New York Stock Exchange or in the Nasdaq Stock Market has been suspended or materially limited, or minimum or maximum prices for trading have been fixed, or maximum ranges for prices have been required, by any of said exchanges or by such system or by order of the Commission, FINRA or any other governmental authority, or a material disruption has occurred in commercial banking or settlement or clearance services in the

United States, or (iv) if a banking moratorium has been declared by either federal or New York authorities or (v) if the rating accorded the Securities or any debt securities or other security of the Company by any nationally recognized statistical rating organization shall have been decreased or withdrawn or any such rating organization has publicly announced or given notice of any intended or potential decrease in or withdrawal of any such rating or of a possible change in any such rating that does not indicate the direction of the possible change.

(b) Liabilities. If this Agreement is terminated pursuant to this Section 9, such termination shall be without liability of any party to any other party except as provided in Section 4 hereof, and provided further that Sections 1, 6, 7, 8 and 14 shall survive such termination and remain in full force and effect.

SECTION 10. Default by One or More of the Underwriters. If one or more of the Underwriters shall fail at the Closing Time to purchase the Securities which it or they are obligated to purchase hereunder (the unpurchased securities, the "**Defaulted Securities**"), then the Representatives shall have the right, within 36 hours thereafter, to make arrangements for one or more of the non-defaulting Underwriters, or any other underwriters, to purchase all, but not less than all, of the Defaulted Securities in such amounts as may be agreed upon and upon the terms herein set forth; if, however, the Representatives shall not have completed such arrangements within such 36-hour period, then:

(a) if the aggregate principal amount of Defaulted Securities does not exceed 10% of the aggregate principal amount of Securities to be purchased on such date, the non-defaulting Underwriters shall be obligated, severally and not jointly, to purchase the full amount thereof in the proportions that their respective underwriting obligations under this Agreement bear to the underwriting obligations of all non-defaulting Underwriters; or

(b) if the aggregate principal amount of Defaulted Securities exceeds 10% of the aggregate principal amount of Securities to be purchased on such date, this Agreement shall terminate with respect to the Securities without liability on the part of any non-defaulting Underwriter.

No action taken pursuant to this Section 10 shall relieve any defaulting Underwriter from liability in respect of its default.

In the event of any such default which does not result in a termination of this Agreement, either the Representatives, on the one hand, or the Company, on the other, shall have the right to postpone the Closing Time for a period not exceeding seven days in order to effect any required changes in the Registration Statement, the General Disclosure Package or the Prospectus or in any other documents or arrangements.

SECTION 11. No Advisory or Fiduciary Relationship. The Company acknowledges and agrees that (a) the purchase and sale of the Securities pursuant to this Agreement, including the determination of the public offering price of the Securities and any related discounts and commissions, is an arm's-length commercial transaction among the Company, on the one hand, and the Underwriters, on the other hand, (b) in connection with the offering contemplated by this

Box 1171, Newark, New Jersey 07101, attention of Tamara L. Linde, Esq.

SECTION 13. Parties. This Agreement shall inure to the benefit of and be binding upon the Company and the Underwriters and their respective successors. Nothing expressed or mentioned in this Agreement is intended or shall be construed to give any person, firm or corporation, other than the Underwriters, the Company and their respective successors and the controlling persons and officers and directors referred to in Sections 6 and 7 and their heirs and legal representatives, any legal or equitable right, remedy or claim under or in respect of this Agreement or any provision herein or therein contained. This Agreement and all conditions and provisions hereof and thereof are intended to be for the sole and exclusive benefit of the parties hereto and thereto and their respective successors, and said controlling persons and officers and directors and their heirs and legal representatives, and for the benefit of no other person, firm or corporation. No purchaser of Securities from any Underwriter shall be deemed to be a successor by reason merely of such purchase.

SECTION 14. GOVERNING LAW AND TIME. THIS AGREEMENT SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF NEW YORK. SPECIFIED TIMES OF DAY REFER TO NEW YORK CITY TIME.

SECTION 15. Patriot Act. In accordance with the requirements of the USA Patriot Act (Title III of Pub. L. 107-56 (signed into law October 26, 2001)), the Underwriters are required to obtain, verify and record information that identifies their respective clients, including the Company, which information may include the name and address of their respective clients, as

EXHIBIT A

FORM OF OPINION OF COUNSEL FOR THE COMPANY
TO BE DELIVERED PURSUANT TO
SECTION 5(b)

On the basis of the foregoing and of my examination and consideration of such other legal and factual matters as I have deemed appropriate, I am of the opinion that:

(i) The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of New Jersey and has the requisite power and authority to own, lease and operate its properties, to conduct its business as described in the Registration Statement, the General Disclosure Package (as defined in Annex A hereto), and the Prospectus and to enter into and perform its obligations under, or as contemplated under, the Underwriting Agreement.

(ii) Each Significant Subsidiary has been duly incorporated or organized and is validly existing as a corporation or limited liability company in good standing under the laws of the jurisdiction of its incorporation or organization, has the requisite power and authority to own, lease and operate its properties and to conduct its business as described in the Registration Statement, the General Disclosure Package and the Prospectus.

(iii) To the best of my knowledge, the Company and each Significant Subsidiary is duly qualified as a foreign corporation or limited liability company to transact business and is in good standing in each jurisdiction in which such qualification is required, whether by reason of the ownership or leasing of property or the conduct of business, except where the failure to so qualify and be in good standing would not have a material adverse effect on the financial condition, business or properties of the Company and its Subsidiaries considered as one enterprise.

(iv) The authorized, issued and outstanding shares of capital stock of the Company is as set forth in the Company's Annual Report on Form 10-K for the year ended December 31, 2016 and subsequent Quarterly Report on Form 10-Q for the quarter ended September 30, 2017 (except for subsequent issuances thereof, if any, pursuant to reservations, agreements or employee benefit plans referred to in the Registration Statement, the General Disclosure Package and the Prospectus or pursuant to the exercise of convertible securities or options referred to in the Registration Statement, the General Disclosure Package and the Prospectus). Such shares of capital stock have been duly authorized and validly issued by the Company and are fully paid and non-assessable, and none of such shares of capital stock were issued in violation of preemptive or other similar rights of any security holder of the Company.

(v) All of the shares of capital stock or other equity interests of each Significant Subsidiary have been duly and validly authorized and issued, are fully paid and non-assessable (except in the case of a limited liability company), and are owned directly by the Company or another Subsidiary, as the case may be, free and clear

Past financial performance is no guarantee of future results.

of all liens, encumbrances, equities or claims. None of the outstanding shares of capital stock or other equity interests of any Significant Subsidiary were issued in violation of preemptive or other similar rights of any security holder of such Significant Subsidiary.

(vi) The Underwriting Agreement has been duly authorized, executed and delivered by the Company.

(vii) The Indenture has been duly authorized, executed and delivered by the Company and (assuming the Indenture has been duly authorized, executed and delivered by the Trustee) constitutes a valid and legally binding agreement of the Company, enforceable against each of them in accordance with its terms, subject to applicable bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and similar laws affecting creditors' rights and remedies generally, and subject, as to enforceability, to general principles of equity, including principles of commercial reasonableness, good faith and fair dealing (regardless of whether enforcement is sought in a proceeding at law or in equity).

(viii) The Securities have been duly authorized and executed by the Company pursuant to the Underwriting Agreement and, when delivered pursuant to the provisions of the Underwriting Agreement and the Indenture against the requisite payment therefor (assuming the due authentication thereof by the Trustee), will constitute valid and legally binding obligations of the Company enforceable against the Company in accordance with their terms, subject to applicable bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and similar laws affecting creditors' rights and remedies generally, and subject, as to enforceability, to general principles of equity, including principles of commercial reasonableness, good faith and fair dealing (regardless of whether enforcement is sought in a proceeding at law or in equity). The registered holders of the Securities will be entitled to the benefit of the Indenture.

(ix) The statements in (i) the Registration Statement, the General Disclosure Package and the Prospectus under the captions "Description of the Senior Notes" and "Description of the Senior and Subordinated Debt Securities," (ii) the Company's Annual Report on Form 10-K for the year ended December 31, 2016, under the captions (A) Part I, Item 1. Business – Regulatory Issues, (B) Part I, Item 1. Business – Environmental Matters, and (C) Part I, Item 3. Legal Proceedings and (iii) the Company's Quarterly Report on Form 10-Q for the quarter ended September 30, 2017 under the caption Part II, Item 1. Legal Proceedings and Part II, Item 5. Other Information, in each case including the information incorporated by reference in such section and insofar as such statements constitute summaries of the legal matters, documents or proceedings referred to therein, fairly summarize the matters referred to therein in all material respects.

(x) The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended, and the regulations thereunder (the "1939 Act").

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(xi) The Registration Statement is effective under the 1933 Act and, to the best of my knowledge, no stop order suspending the effectiveness of the Registration Statement or the use of any prospectus relating to the Securities has been issued under the 1933 Act or proceedings therefor initiated or threatened by the SEC or any other governmental agency or authority.

(xii) The Registration Statement (except for the financial statements and the related notes thereto, the financial statement schedules or the financial or accounting data incorporated by reference therein or Exhibits 25-1 and 25-2 thereto, as to which I express no opinion), as of its most recent effective date pursuant to Rule 430B(f)(2), and the Prospectus (except for the financial statements and the related notes thereto, the financial statement schedules or the financial or accounting data incorporated by reference therein, as to which I express no opinion), as of November 2, 2017, appeared on their face to be appropriately responsive, in all material respects relevant to the offering of the Securities, to the applicable requirements of the 1933 Act;

(xiii) Each document filed pursuant to the Securities Exchange Act of 1934 and the regulations thereunder (the "1934 Act") and incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus appeared on its face, at the time it was filed, to be appropriately responsive in all material respects with the applicable requirements of the 1934 Act.

(xiv) To the best of my knowledge, none of the Company nor any Significant Subsidiary is in violation of its certificate of incorporation or by-laws or other organizational documents, or in default in the performance or observance of any obligation, agreement, covenant or condition contained in any material contract, indenture, mortgage, loan agreement, note or lease to which it is a party or by which it or any its properties may be bound.

(xv) The execution and delivery of the Underwriting Agreement, the Indenture and the Securities, and the consummation by the Company of the transactions contemplated thereby, will not conflict with, violate or constitute a breach of, or default under, or, except as contemplated thereby, result in the creation or imposition of: (A) any lien, charge or encumbrance upon any property or assets of the Company or any Significant Subsidiary pursuant to, any contract, indenture, mortgage, loan agreement, note, lease or other instrument known to me and to which the Company or any Significant Subsidiary is a party or by which it may be bound or to which any of the property or assets of the Company or any Significant Subsidiary is subject; (B) any law, administrative regulation or administrative or court decree known to me to be applicable to the Company or any Significant Subsidiary of any court or governmental agency, authority or body or any arbitrator having jurisdiction over the Company or any Significant Subsidiary (other than federal and state securities or blue sky laws, as to which I express no opinion in this paragraph), or (C) the

certificate of incorporation or by-laws or other organizational documents of the Company or any Significant Subsidiary.

(xvi) No consent, approval, waiver, license or authorization or other action by or filing with any New York, New Jersey or federal governmental authority is required in connection with the execution and delivery by the Company of the Underwriting Agreement, the Indenture and the Securities, the consummation by the Company of the transactions contemplated thereby or the performance by the Company of its obligations thereunder, except for filings and other actions required pursuant to the 1933 Act and/or the 1934 Act and the rules and regulations thereunder and federal and state securities or blue sky laws, as to which I express no opinion in this paragraph.

(xvii) To the best of my knowledge, except as disclosed in the Registration Statement, the General Disclosure Package and the Prospectus, there is not pending or threatened any action, suit, proceeding, inquiry or investigation to which the Company or any Subsidiary is a party or to which the assets, properties or operations of the Company or any Subsidiary is subject, before or by any court or governmental agency or body, domestic or foreign, which might reasonably be expected to result in a Material Adverse Change or which might reasonably be expected to materially and adversely affect the assets, properties or operations thereof or the consummation of the transactions contemplated under the Underwriting Agreement, the Securities or the Indenture or the performance by the Company of its obligations thereunder.

(xviii) The Company is not, and immediately after giving effect to the sale of the Securities and the application of the proceeds thereof as described in the Prospectus will not be, an "investment company" under the Investment Company Act of 1940, as amended.

(xix) The Securities, upon issuance, will be excluded or exempted under, or beyond the purview of, the Commodity Exchange Act and the Commodity Exchange Act Regulations.

I have generally reviewed the Registration Statement, the General Disclosure Package and the Prospectus and discussed the information therein with certain officers and employees of the Company, but without independent check or verification except as indicated above, and no facts have come to my attention that would lead me to believe that:

(1) the Registration Statement, at the time it originally became effective under the 1933 Act or as of each "new effective date" with respect to the Securities and the Underwriters pursuant to, and within the meaning of, Rule 430B(f)(2) under the 1933 Act, contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary to make the statements therein not misleading;

(2) the General Disclosure Package, as of 3:15 p.m. (Eastern Time) on November 2,

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED
2.650% Senior Note due 2022

GLOBAL NOTE

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED, a New Jersey corporation (herein referred to as the "Company," which term includes any successor corporation under the Indenture hereinafter referred to), for value received, hereby promises to pay to Cede & Co., or registered assigns, the principal sum of $ on November 15, 2022 (the "Stated Maturity Date"), unless redeemed in accordance with the provisions of this Global Note, and to pay interest on the outstanding principal amount of this Global Note from November 6, 2017, semi-annually in arrears on May 15 and November 15 of each year, beginning on May 15, 2018 (each, an "Interest Payment Date") at 2.650% per annum until the principal hereof is paid or duly provided for. Interest payable on each Interest Payment Date will include interest accrued from and including November 6, 2017 or from and including the most recent Interest Payment Date to which interest has been paid or duly provided for, as the case may be, to, but excluding, such Interest Payment Date. Interest will be computed based on a 360-day year consisting of twelve 30-day months.

The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date will, except as provided below, be paid to the person (the "Holder") in whose name this Global Note (or one or more Predecessor Securities) is registered at the close of business on the fifteenth day (whether or not a Business Day (as defined below)) immediately preceding the applicable Interest Payment Date (a "Regular Record Date"). Any such interest not so punctually paid or duly provided for ("Defaulted Interest") will forthwith cease to be payable to the Holder on such Regular Record Date and may either be paid to the person in whose name this Global Note (or one or more Predecessor Securities) is registered at the close of business on a special record date (the "Special Record Date") for the payment of such Defaulted Interest to be fixed by the Trustee hereinafter referred to, notice whereof shall be

given to the Holder of this Global Note not less than ten days prior to such Special Record Date, or may be paid at any time in any other lawful manner, all as more fully provided in the Indenture.

For purposes of this Global Note, "Business Day" means each Monday, Tuesday, Wednesday, Thursday and Friday which is not a day on which banking institutions in Newark, New Jersey and The City of New York are authorized or obligated by law or executive order to close.

Payments of principal, premium, if any, and interest with respect to this Global Note will be made in such coin or currency of the United States of America as at the time of payment is legal tender for the payment of public and private debts. Payment of the principal of and any premium on this Global Note on the Stated Maturity Date or date of earlier redemption will be made in immediately available funds against presentation of this Global Note at the office or agency of the Company maintained for that purpose in the Borough of Manhattan, The City of New York. Payments of interest on an Interest Payment Date will be made, at the option of the Company, by check mailed to the Holder entitled thereto at the applicable address appearing in the Security Register or by transfer of immediately available funds to an account maintained by the payee with a bank located in the United States of America; provided, however, that so long as Cede & Co. is the Holder of this Global Note, payments of interest on an Interest Payment Date will be made in immediately available funds.

Any payment of principal, premium or interest required to be made with respect to this Global Note on a day that is not a Business Day need not be made on such day, but may be made on the next succeeding Business Day with the same force and effect as if made on such day and no additional interest shall be payable on the next succeeding Business Day as a result of such delayed payment.

General. This Global Note is one of the duly authorized series of securities of the Company (the "Securities"), issued or to be issued under the Indenture, dated as of November 1, 1998 (together with all amendments and supplements thereto, the "Indenture"), between the Company and U.S. Bank National Association, as successor trustee (the "Trustee"), to which Indenture reference is hereby made for a statement of the respective rights, limitations of rights, duties and immunities thereunder of the Company, the Trustee and each of the Holders of the Securities and of the terms upon which the Securities are, and are to be, authenticated and delivered and transferred. This Global Note is one of the duly authorized series of Securities designated as the “2.650% Senior Notes due 2022” (collectively, the “Notes”). The Notes will be limited to $700,000,000 aggregate principal amount, except as permitted in the Indenture, and will be subject, without the consent of the Holders of any series of Securities under the Indenture, to the issuance of additional Notes in the future having the same terms, other than the date of original issuance and the date on which interest begins to accrue, so as to form one series with the Notes. All terms used in this Global Note, which are not defined herein shall have the meanings given to them in the Indenture.

Events of Default. If an Event of Default with respect to the Notes shall have occurred and be continuing, the principal of the Notes may be declared due and payable in the manner and with the effect provided in the Indenture.

As used in this Global Note and the Indenture, the term “Event of Default” wherever used with respect to the Notes means any one of the events described under Article Five, Section 501 of the Indenture or the following event:

an event of default shall have occurred and be continuing with respect to indebtedness for borrowed money of the Company in excess of $75,000,000 and such event of default shall have been accelerated, and such acceleration shall not be rescinded or annulled within ten days after written notice thereof shall have been given to the Company by the Trustee or to the Company and the Trustee by the Holders of at least 25% in aggregate principal amount of the Notes then Outstanding; *provided*, *however*, that if such event of default with respect to such other indebtedness shall be remedied or cured by the Company, or waived by the holders of such other indebtedness, then the Event of Default hereunder by reason thereof shall be deemed likewise to have been thereupon remedied, cured or waived without further action upon the part of either the Trustee or any of the Holders of the Notes; and *provided, further*, that, subject to the provisions of Section 601 of the Indenture, the Trustee shall not be charged with knowledge of any such event of default or any remedy, cure or waiver thereof or any such acceleration unless written notice thereof shall have been given to the Trustee by the Company, by a holder or an agent of such other indebtedness or by the Trustee then acting under this Indenture with respect to such other series of Securities or under any other indenture or instrument, as the case may be, under which such event of default shall have occurred, or by the Holders of at least twenty-five percent in aggregate principal amount of the Notes at the time Outstanding;

in each case whatever the reason for such Event of Default and whether or not it shall be voluntary or involuntary or be effected by operation of law or pursuant to any judgment, decree or order of any court or any order, rule or regulation of any administrative or governmental body.

Sinking Fund. This Global Note will not be entitled to the benefit of, or be subject to, any sinking fund.

Optional Redemption. This Global Note (or portion hereof) will be redeemable at the option of the Company, in whole or in part at any time prior to October 15, 2022, on at least 10 days but not more than 60 days prior written notice mailed to the Holder hereof, at a price (the "Make-Whole Redemption Price") equal to the greater of (i) 100% of the principal amount of this Global Note (or portion hereof) to be redeemed, and (ii) the sum of the present values of the remaining scheduled payments of principal of and interest on this Global Note (or portion hereof) to be redeemed that would be due if this Global Note matured on October 15, 2022, exclusive of accrued interest to the date of redemption (each, a “Make-Whole Redemption Date”), discounted to such Make-Whole Redemption Date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate (as defined below) plus 12.5 basis points, plus, in either case, any accrued and unpaid interest thereon to, but excluding, such Make-Whole Redemption Date.

This Global Note (or a portion thereof) will be redeemable at the option of the Company, in whole or in part, at any time on or after October 15, 2022, on at least 10 days but not more than 60 days prior written notice mailed to the Holder hereof, at a price (the “Par Redemption Price”) equal to 100% of the principal amount of this Global Note (or portion hereof) to be redeemed, plus any accrued and unpaid interest thereon to, but excluding, the date of redemption (each, a “Par Redemption Date”).

If money sufficient to pay the Make-Whole Redemption Price of this Global Note (or portion hereof) to be redeemed on a Make-Whole Redemption Date is deposited with the Trustee or a Paying Agent on or before such Make-Whole Redemption Date and certain other

Past financial performance is no guarantee of future results.

conditions are satisfied, then on and after such Make-Whole Redemption Date, interest will cease to accrue on this Global Note (or such portion hereof) called for redemption.

If money sufficient to pay the Par Redemption Price of this Global Note (or portion hereof) to be redeemed on a Par Redemption Date is deposited with the Trustee or a Paying Agent on or before such Par Redemption Date and certain other conditions are satisfied, then on and after such Par Redemption Date, interest will cease to accrue on this Global Note (or such portion hereof) called for redemption.

For purposes of the foregoing, the following definitions apply:

"Comparable Treasury Issue" means, with respect to any Make-Whole Redemption Date for this Global Note (or portion hereof) to be redeemed, the United States Treasury security selected by the Independent Investment Banker (as defined below) as having the maturity comparable to the remaining term of this Global Note (or portion hereof) to be redeemed (assuming that this Global Note matured on October 15, 2022) that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of this Global Note (or portion hereof) to be redeemed.

"Comparable Treasury Price" means, with respect to any Make-Whole Redemption Date for this Global Note (or portion hereof) to be redeemed, (a) the average of three Reference Treasury Dealer Quotations (as defined below) for the Make-Whole Redemption Date for this Global Note (or portion hereof) to be redeemed, after excluding the highest and lowest of five Reference Treasury Dealer Quotations, or, (b) if the Independent Investment Banker obtains fewer than five Reference Treasury Dealer Quotations, the average of all Reference Treasury Dealer Quotations obtained.

"Independent Investment Banker" means one of the Reference Treasury Dealers appointed by the Company after consultation with the Trustee.

"Reference Treasury Dealer" means each of Barclays Capital Inc., J.P. Morgan Securities LLC, Morgan Stanley & Co. LLC, RBC Capital Markets, LLC and TD Securities (USA) LLC, and their respective affiliates or successors, *provided* that if any of the foregoing shall cease to be a primary U.S. government securities dealer in the United States (a “Primary Treasury Dealer”), the Company will substitute therefor another Primary Treasury Dealer.

"Reference Treasury Dealer Quotations" means, with respect to each Reference Treasury Dealer and any Make-Whole Redemption Date, the average, as determined by the Independent Investment Banker, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Independent Investment Banker by such Reference Treasury Dealer at 5:00 p.m., New York City time, on the third Business Day preceding such Make-Whole Redemption Date.

"Treasury Rate" means, with respect to any Make-Whole Redemption Date, the rate per annum equal to the semi-annual equivalent yield to maturity of the Comparable Treasury Issue, assuming a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such Make-Whole Redemption Date. The Treasury Rate will be calculated by the Company on the third Business Day preceding the Make-Whole Redemption Date. The Trustee shall not be responsible for any such calculation.

Reports. So long as this Global Note remains Outstanding, the Company will file with the Trustee, within 30 days of filing them with the Securities and Exchange Commission (the "SEC"), copies of the current, quarterly and annual reports and of the information, documents and other reports (or copies of such portions of any of the foregoing as the SEC may by rules and regulations prescribe) that the Company is required to file with the SEC pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act"). If the Company is not subject to the requirements of Section 13 or Section 15(d) of the Exchange Act and this Global Note remains Outstanding, the Company must nevertheless file with the SEC (if permitted) and the Trustee, on the date upon which the Company would have been required to file with the SEC, current, quarterly and annual financial statements, including any notes thereto (and with respect to annual reports, an auditor's report by a firm of established national reputation, upon which the Trustee may conclusively rely), and a "Management's Discussion and Analysis of Financial Condition and Results of Operations," both comparable to that which the Company would have been required to include in such current, quarterly and annual reports, information, documents or other reports on Forms 8-K, 10-Q and 10-K if the Company was subject to the requirements of Section 13 or 15(d) of the Exchange Act; provided that the Company will not be required to register under the Exchange Act by virtue of this provision, if not otherwise required to do so.

Modification and Waivers; Obligations of the Company Absolute. The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Securities of each series. Such amendment may be effected under the Indenture at any time by the Company and the Trustee with the consent of the Holders of a majority in aggregate principal amount of all Securities issued under the Indenture at the time Outstanding and affected thereby. The Indenture also contains provisions permitting the Holders of a majority in aggregate principal amount of the Securities of each series at the time Outstanding, on behalf of the Holders of all Outstanding Securities of such series, to waive compliance by the Company with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences. Any such consent or waiver shall be conclusive and binding upon the Holder of this Global Note and upon all future Holders of this Global Note and of any Note issued upon the registration of transfer hereof or in exchange hereof or in lieu hereof, whether or not notation of such consent or waiver is made upon this Note.

No reference herein to the Indenture and no provision of this Global Note or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal, premium, if any, and interest with respect to this Global Note at the times, place and rate, and in the coin or currency herein prescribed.

Defeasance. The Indenture contains provisions for defeasance at any time of the entire indebtedness of the Company on this Global Note, upon compliance by the Company with certain conditions set forth in the Indenture, which provisions apply to this Global Note.

Authorized Denominations. The Notes are issuable only in registered form without coupons in minimum denominations of $2,000 and integral multiples of $1,000 in excess thereof.

Registration of Transfer or Exchange of this Global Note. As provided in the Indenture and subject to certain limitations herein and therein set forth, the transfer of this Global Note is registrable in the Security Register upon surrender of this Global Note for registration of transfer at the office or agency of the Company in any place where the principal

of (and premium, if any) and interest on this Global Note are payable, duly endorsed by, or accompanied by a written instrument of transfer in form satisfactory to the Company and the Security Registrar duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Global Notes of this series of like tenor, of authorized denominations and for the same aggregate principal amount, will be issued to the designated transferee or transferees.

As provided in the Indenture and subject to certain limitations herein and therein set forth, the Global Notes are exchangeable for a like aggregate principal amount of Global Notes of different authorized denominations, as requested by the Holders surrendering the same.

This Global Note is a "Security in global form" within the meaning of the Indenture. If The Depository Trust Company is at any time unwilling, unable or ineligible to continue as depository and a successor depository is not appointed by the Company within 90 days or an Event of Default under the Indenture has occurred and is continuing, the Company will issue Notes in certificated form in exchange for this Global Note. In addition, the Company may at any time determine not to have Notes represented by one or more Securities in global form and, in such event, will issue Notes in certificated form in exchange in whole for this Global Note. In any such instance, an owner of a beneficial interest in this Global Note will receive Notes in certificated form equal in principal amount to such beneficial interest and to have such Notes registered in its name. Notes so issued in certificated form will be issued in denominations of $2,000 and integral multiples of $1,000 in excess thereof and will be issued in registered form only, without coupons.

No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

Prior to due presentment of this Global Note for registration of transfer, the Company, the Trustee and any agent of the Company or the Trustee may treat the Holder of this Global Note as the owner hereof for all purposes, whether or not this Global Note be overdue, and neither the Company, the Trustee nor any such agent shall be affected by notice to the contrary.

Governing Law. This Global Note shall be governed by and construed in accordance with the law of the State of New Jersey.

Unless the certificate of authentication hereon has been executed by the Trustee by manual signature, this Global Note shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

Re: Public Service Enterprise Group Incorporated
Registration Statement on Form S-3 (No. 333-200352)

Ladies and Gentlemen:

This opinion is furnished in connection with the issuance and sale by Public Service Enterprise Group Incorporated (the "Company") of $700,000,000 aggregate principal amount of its 2.650% Senior Notes due 2022 (the "Notes") pursuant to (i) the Company's Registration Statement on Form S-3, Registration No. 333-200352 (the "Registration Statement"); (ii) the base prospectus constituting a part of the Registration Statement, dated November 18, 2014 (the "Base Prospectus"), relating to the offering from time to time of certain debt securities of the Company, among other securities, pursuant to Rule 415 promulgated under the Securities Act of 1933, as amended (the "Act"); and (iii) the prospectus supplement, dated November 2, 2017 (the "Prospectus Supplement" and together with the Base Prospectus, the "Prospectus"). The Notes were issued under the Indenture, dated as of November 1, 1998 (as amended and supplemented to the date hereof, the "Indenture"), between the Company and U.S. Bank National Association, as trustee (the "Trustee").

I have examined the Registration Statement, the Prospectus, the Indenture, the global certificates representing the Notes and such other agreements, instruments, documents and records and such certificates or comparable documents of public officials which I deemed relevant and necessary for the basis of the opinion hereinafter expressed. In such examination, I have assumed the following: (a) the authenticity of original documents and the genuineness of all signatures; (b) the conformity to the originals of all documents submitted to me as copies; and (c) the truth, accuracy, and completeness of the information, representations, and warranties contained in the records, documents, instruments, and certificates I have reviewed.

Based on such examination, I am of the opinion that the Notes, assuming the due authentication thereof by the Trustee pursuant to the Indenture, constitute valid and binding obligations of the Company, enforceable against the Company in accordance with their terms, subject to applicable bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium

Item 8.01. Other Events

On November 8, 2016, Public Service Enterprise Group Incorporated ("PSEG") completed a public offering of $400.0 million aggregate principal amount of its 1.600% Senior Notes due 2019 (the "2019 Notes") and $300.0 million aggregate principal amount of its 2.000% Senior Notes due 2021 (the "2021 Notes" and together with the 2019 Notes, the "Notes"). The Notes were offered and sold by PSEG pursuant to a registration statement on Form S-3 (File No. 333-200352) (the "Registration Statement") and the related Prospectus dated November 18, 2014 and Prospectus Supplement dated November 3, 2016. The Notes were issued pursuant to an underwriting agreement (the "Underwriting Agreement"), dated November 3, 2016, between PSEG and Barclays Capital Inc., J.P. Morgan Securities LLC and RBC Capital Markets, LLC, as representatives of the several underwriters named therein (the "Underwriters"). Pursuant to the Underwriting Agreement and subject to the terms and conditions expressed therein, PSEG agreed to sell the Notes to the Underwriters, and the Underwriters agreed to purchase the Notes for resale to the public. The Underwriting Agreement is filed as Exhibit 1 hereto. The Notes are governed by an indenture, dated as of November 1, 1998 (the "Indenture"), between PSEG and U.S. Bank National Association, as successor trustee. The Indenture, the form of 2019 Note and the form of 2021 Note are filed as Exhibits 4-1, 4-2 and 4-3 hereto, respectively. The Underwriting Agreement, Indenture, the form of 2019 Note and the form of 2021 Note are incorporated by reference into the Registration Statement.

In connection with the offering of the Notes, PSEG is filing herewith as Exhibit 5 an opinion of Shawn P. Leyden, Vice President and Deputy General Counsel of PSEG Services Corporation, addressing the legality of the Notes. Such opinion is incorporated by reference into the Registration Statement.

Item 9.01. Financial Statements and Exhibits

Exhibit 1	Underwriting Agreement, dated November 3, 2016, between PSEG and Barclays Capital Inc., J.P. Morgan Securities LLC and RBC Capital Markets, LLC, as representatives of the several underwriters named therein.
Exhibit 4-1	Indenture dated as of November 1, 1998 between PSEG and U.S. Bank National Association (as successor to First Union National Bank), as Trustee (incorporated by reference to Exhibit 4(f) to the Annual Report on Form 10-K for the year ended December 31, 1998, File No. 001-09120).
Exhibit 4-2	Form of 2019 Note.
Exhibit 4-3	Form of 2021 Note.
Exhibit 5	Opinion of Shawn P. Leyden, Vice President and Deputy General Counsel of PSEG Services Corporation, addressing the legality of the Notes.
Exhibit 23	Consent of Shawn P. Leyden, Vice President and Deputy General Counsel of PSEG Services Corporation (included in Exhibit 5).

BARCLAYS CAPITAL INC.
J.P. MORGAN SECURITIES LLC
RBC CAPITAL MARKETS, LLC

c/o J.P. Morgan Securities LLC
383 Madison Avenue
New York, New York 10179

As Representatives of the several Underwriters

Ladies and Gentlemen:

Public Service Enterprise Group Incorporated, a New Jersey corporation (the "**Company**"), proposes to issue and sell to the several underwriters named in Schedule 1 hereto (the "**Underwriters,**" which term shall include any underwriter substituted as hereinafter provided in Section 10), acting severally and not jointly, the respective principal amounts set forth in such Schedule 1 of (i) $400,000,000 aggregate principal amount of the Company's 1.600% Senior Notes due 2019 (the "**2019 Notes**") and (ii) $300,000,000 aggregate principal amount of the Company's 2.000% Senior Notes due 2021 (the "**2021 Notes**" and, together with the 2019 Notes, the "**Securities**"). Barclays Capital Inc. ("**Barclays**"), J.P. Morgan Securities LLC ("**J.P. Morgan**") and RBC Capital Markets, LLC ("**RBC Capital Markets**") have agreed to act as representatives of the several Underwriters (in such capacity, the "**Representatives**") in connection with the offering and sale of the Securities.

The Securities will be issued pursuant to the provisions of an Indenture dated as of November 1, 1998, as amended and supplemented by the First Supplemental Indenture, dated as of September 10, 2002, and the Second Supplemental Indenture, dated as of July 27, 2005 (collectively, the **"Indenture"**), between the Company and U.S. Bank National Association (as successor trustee to First Union National Bank), as trustee (the **"Trustee"**).

The Company has filed with the Securities and Exchange Commission (the "**Commission**") a registration statement on Form S-3 (No. 333-200352), which contains a base prospectus (the "**Base Prospectus**"), to be used in connection with the public offering and sale of certain securities by the Company, including the Securities, under the Securities Act of 1933, as amended (the "**1933 Act**"), and the offering thereof from time to time in accordance with Rule 415 of the rules and regulations of the Commission under the 1933 Act (the "**1933 Act Regulations**"). Such registration statement, including the financial statements, exhibits and

schedules thereto, in the form in which it became effective under the 1933 Act, including any required information deemed to be a part thereof at the time of effectiveness pursuant to Rule 430B of the 1933 Act Regulations ("**Rule 430B**"), is called the "**Registration Statement**." The term "**Prospectus**" shall mean the final prospectus supplement relating to the Securities, together with the Base Prospectus, that is first filed pursuant to Rule 424(b) of the 1933 Act Regulations ("**Rule 424(b)**") after the date and time that this Agreement is executed (the "**Execution Time**") by the parties hereto. The term "**preliminary prospectus**" shall mean any preliminary prospectus supplement relating to the Securities, together with the Base Prospectus, that is first filed with the Commission pursuant to Rule 424(b). Any reference herein to the Registration Statement, any preliminary prospectus or the Prospectus shall be deemed to refer to and include the documents that are or are deemed to be incorporated by reference therein pursuant to Item 12 of Form S-3 under the 1933 Act prior to the Applicable Time (as defined below). For purposes of this Agreement, all references to the Registration Statement, any preliminary prospectus or the Prospectus or to any amendment or supplement to any of the foregoing shall be deemed to include any copy filed with the Commission pursuant to its Electronic Data Gathering, Analysis and Retrieval system ("**EDGAR**").

All references in this Agreement to financial statements and schedules and other information which is "contained," "included" or "stated" (or other references of like import) in the Registration Statement, any preliminary prospectus or the Prospectus or any amendment or supplement thereto shall be deemed to mean and include all such financial statements and schedules and other information which is or is deemed to be incorporated by reference in or otherwise deemed by the 1933 Act Regulations to be a part of or included in the Registration Statement, any preliminary prospectus or the Prospectus or any amendment or supplement thereto, as the case may be, on or before the effective date of the Registration Statement or the date of such preliminary prospectus or the Prospectus or such amendment or supplement, as the case may be; and all references in this Agreement to amendments or supplements to the Registration Statement, any preliminary prospectus or the Prospectus shall be deemed to mean and include the filing of any document under the Securities Exchange Act of 1934, as amended (the "**1934 Act**"), which is or is deemed to be incorporated by reference in or otherwise deemed by the 1933 Act Regulations to be a part of or included in the Registration Statement, such preliminary prospectus or the Prospectus, as the case may be, at the time of such amendment or supplement.

SECTION 1. Representations and Warranties.

(a) Representations and Warranties. The Company represents and warrants to each Underwriter, as of the date hereof, as of the Applicable Time and as of the Closing Time (as defined below) (in each case, a "**Representation Date**"), as follows:

(1) Compliance with Registration Requirements. The Company meets the requirements for use of Form S-3 under the 1933 Act. The Registration Statement became effective upon filing with the Commission under Rule 462(e) of the 1933 Act Regulations ("**Rule 462(e)**") on November 18, 2014 and any post-effective amendment thereto also became effective upon filing under Rule 462(e). No stop order suspending the effectiveness of the Registration Statement or preventing or suspending the use of any prospectus has been issued under the 1933 Act and no proceedings for that purpose or

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

pursuant to Section 8A of the 1933 Act against the Company or related to the offering of the Securities have been instituted or are pending or, to the knowledge of the Company, are contemplated by the Commission, any request on the part of the Commission for additional information has been complied with, and no notice of objection of the Commission to the use of the Registration Statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) of the 1933 Act Regulations has been received by the Company. In addition, the Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended (the "**1939 Act**").

At the respective times the Registration Statement and any post-effective amendments thereto became effective and as of each Representation Date, the Registration Statement and any amendments thereto complied, complies and will comply in all material respects with the requirements of the 1933 Act and the 1933 Act Regulations and the 1939 Act and the rules and regulations of the Commission under the 1939 Act (the "**1939 Act Regulations**"), and did not, does not and will not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading; provided, that the Company makes no representation or warranty with respect to the Underwriter Information (as defined below).

The Prospectus and each amendment or supplement thereto, if any, at the time the Prospectus or any such amendment or supplement is issued and at the Closing Time, complied, complies and will comply in all material respects with the requirements of the 1933 Act and the 1933 Act Regulations, and neither the Prospectus nor any amendment or supplement thereto included, includes or will include an untrue statement of a material fact or omitted, omits or will omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, that the Company makes no representation or warranty with respect to the Underwriter Information.

Each preliminary prospectus and any amendment thereto complied when so filed in all material respects with the 1933 Act and the 1933 Act Regulations and each preliminary prospectus and the Prospectus delivered or made available to the Underwriters for use in connection with the offering of the Securities was and will be, at the time of such delivery, identical to the electronically transmitted copies thereof filed with the Commission pursuant to EDGAR, except to the extent permitted by Regulation S-T.

As of the Applicable Time, neither (x) the General Disclosure Package (as defined below) nor (y) any individual Issuer Limited Use Free Writing Prospectus (as defined below), when considered together with the General Disclosure Package, included any untrue statement of a material fact or omitted to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided that the Company makes no representation or warranty with respect to the Underwriter Information.

As used in this subsection and elsewhere in this Agreement:

Source: PUBLIC SERVICE ENTERPRISE GROUP INC, 8-K, November 08, 2016 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

"**Applicable Time**" means 4:35 P.M. (New York City time) on November 3, 2016 or such other time as agreed by the Company and the Representatives.

"**General Disclosure Package**" means (i) the Issuer General Use Free Writing Prospectus(es) (as defined below) relating to the Securities issued at or prior to the Applicable Time, including the Final Term Sheet (as defined below) attached as Schedule 3 hereto, and (ii) the most recent preliminary prospectus (including any documents incorporated therein by reference) that is distributed to investors prior to the Applicable Time, all considered together.

"**Issuer Free Writing Prospectus**" means any "issuer free writing prospectus," as defined in Rule 433 of the 1933 Act Regulations ("**Rule 433**"), relating to the Securities that (i) is required to be filed with the Commission, (ii) is a "road show that is a written communication" within the meaning of Rule 433(d)(8)(i), whether or not required to be filed with the Commission or (iii) is exempt from filing pursuant to Rule 433(d)(5)(i) because it contains a description of the Securities or of the offering thereof that does not reflect the final terms, in each case in the form filed or required to be filed with the Commission or, if not required to be filed, in the form retained in the Company's records pursuant to Rule 433(g).

"**Issuer General Use Free Writing Prospectus**" means any Issuer Free Writing Prospectus that is intended for general distribution to prospective investors, as evidenced by its being specified in Schedule 2-A hereto.

"**Issuer Limited Use Free Writing Prospectus**" means any Issuer Free Writing Prospectus that is not an Issuer General Use Free Writing Prospectus and that is specified in Schedule 2-B hereto.

Each Issuer Free Writing Prospectus, as of its issue date and at all subsequent times through the completion of the offering and sale of the Securities under this Agreement or until any earlier date that the Company notified or notifies you as described in Section 3(e), did not, does not and will not include any information that conflicted, conflicts or will conflict with the information contained in the Registration Statement or the Prospectus. The Company has complied with the requirements of Rule 164 and Rule 433 of the 1933 Act Regulations with respect to each Issuer Free Writing Prospectus.

(2) Status as a Well-Known Seasoned Issuer. Since the time of initial filing of the Registration Statement, the Company has been, and continues to be, a "well known seasoned issuer" as defined in Rule 405 of the 1933 Act Regulations ("**Rule 405**").

(3) Status as Non-Ineligible Issuer. At the earliest time that the Company or another offering participant made a *bona fide* offer (within the meaning of Rule 164(h)(2) of the 1933 Act Regulations) of the Securities and at each Representation Date, the Company was not and is not an "ineligible issuer," as defined in Rule 405.

(4) Incorporated Documents. The documents incorporated or deemed to be incorporated by reference in the Registration Statement, the General Disclosure Package or the Prospectus, at the time they were or hereafter are filed with the Commission,

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

complied and will comply in all material respects with the requirements of the 1934 Act and the rules and regulations of the Commission thereunder (the "**1934 Act Regulations**") and, when read together with the other information in the Registration Statement, the General Disclosure Package or the Prospectus, as the case may be, (a) at the time the Registration Statement originally became effective and (b) at each Representation Date, did not, does not and will not include an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

(5) Independent Accountants. The accountants who certified the financial statements and any supporting schedules thereto included in the Registration Statement, the General Disclosure Package or the Prospectus are independent public accountants as required by the 1933 Act and the 1933 Act Regulations and the Public Company Accounting Oversight Board (United States).

(6) Financial Statements. The financial statements of the Company included or incorporated by reference in the Registration Statement, the General Disclosure Package or the Prospectus, together with the related schedules and notes, as well as those financial statements, schedules and notes of any other entity included or incorporated by reference therein, present fairly the financial position of the Company and its consolidated subsidiaries, or such other entity, as the case may be, at the dates indicated and the statement of operations, member's equity and cash flows of the Company and its consolidated subsidiaries, or such other entity, as the case may be, for the periods specified. Such financial statements have been prepared in conformity with U.S. generally accepted accounting principles ("**GAAP**") applied on a consistent basis throughout the periods involved. Except as otherwise included or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus, neither pro forma financial statements of the Company nor the financial statements of any entity other than the Company are required to be included in the Registration Statement, the General Disclosure Package or the Prospectus under the 1933 Act, the 1933 Act Regulations, the 1934 Act or the 1934 Act Regulations. The supporting schedules, if any, included or incorporated by reference in the Registration Statement, the General Disclosure Package or the Prospectus present fairly in accordance with GAAP the information required to be stated therein. The Company's ratios of earnings to fixed charges included or incorporated by reference in the Registration Statement (including Exhibit 12), the General Disclosure Package or the Prospectus have been calculated in compliance with Item 503(d) of Regulation S-K of the 1933 Act Regulations. The selected financial data and the summary financial information included or incorporated by reference in the Registration Statement, the General Disclosure Package or the Prospectus present fairly the information shown therein and have been compiled on a basis consistent with that of the audited financial statements included or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus. All disclosures contained in the Registration Statement, the General Disclosure Package or the Prospectus, if any, regarding "non-GAAP financial measures" (as such term is defined by the rules and regulations of the Commission) comply with Regulation G under the 1934 Act and Item 10 of Regulation S-K of the 1933 Act

Regulations, to the extent applicable. The interactive data in eXtensible Business Reporting Language included or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus fairly presents the information called for in all material respects and has been prepared in accordance with the Commission's rules and guidelines applicable thereto.

(7) No Material Adverse Change in Business. The Company has not sustained since the date of the latest audited financial statements included or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus any material loss from fire, explosion, flood, accident or other calamity not fully covered by insurance, otherwise than as set forth or contemplated in the Registration Statement, the General Disclosure Package and the Prospectus. Since the respective dates as of which information is given in the Registration Statement, the General Disclosure Package or the Prospectus, except as otherwise stated therein, (A) there has been no material adverse change, or any development involving a prospective material adverse change, in the general affairs, financial condition, earnings or business affairs of the Company and its subsidiaries (each such subsidiary, a "**Subsidiary**" and, collectively, the "**Subsidiaries**"), considered as one enterprise, whether or not arising in the ordinary course of business (a "**Material Adverse Change**"); (B) there have been no transactions entered into by the Company or any of its Subsidiaries, other than those arising in the ordinary course of business, which are material with respect to the Company and its Subsidiaries considered as one enterprise; (C) other than, in the case of the Company, regular dividends on the Company's common stock or preferred stock, in amounts per share that are consistent with past practice or the applicable charter document or supplement thereto, respectively, or, in the case of any of the Company's Subsidiaries, to the Company, there has been no dividend or distribution of any kind declared, paid or made by the Company or any of its Subsidiaries on any class of its capital stock; and (D) there has not been any material change in the capital stock (other than upon exercise of outstanding stock options, upon conversion of convertible securities outstanding as of the date of the most recent balance sheet incorporated by reference into the Registration Statement, the General Disclosure Package and the Prospectus or pursuant to the Company's employee or director compensation and benefit plans or the Company's dividend reinvestment and stock purchase plan) or long-term debt of the Company and its Subsidiaries considered as one enterprise.

(8) Good Standing of the Company. The Company has been duly incorporated, is validly existing as a corporation in good standing under the laws of the jurisdiction of its incorporation, has the requisite power and authority to own its property and to conduct its business as described in the Registration Statement, the General Disclosure Package and the Prospectus and is duly qualified to transact business and is in good standing in each jurisdiction in which the conduct of its business or its ownership or leasing of property requires such qualification, except to the extent that the failure to be so qualified or be in good standing would not result in a Material Adverse Change.

(9) Good Standing of Significant Subsidiaries. Each Subsidiary of the Company which is a significant subsidiary, as defined in Rule 405 (each, a "**Significant Subsidiary**"), has been duly incorporated or organized, is validly existing as a

Past financial performance is no guarantee of future results.

corporation or limited liability company in good standing under the laws of the jurisdiction of its incorporation or organization, has the requisite power and authority to own its property and to conduct its business as described in the Registration Statement, the General Disclosure Package and the Prospectus and is duly qualified to transact business and is in good standing in each jurisdiction in which the conduct of its business or its ownership or leasing of property requires such qualification, except to the extent that the failure to be so qualified or be in good standing would not result in a Material Adverse Change. All of the issued shares of capital stock or other equity interests of each Significant Subsidiary have been duly and validly authorized and issued, are fully paid and non-assessable and are owned directly by the Company or a direct wholly-owned Subsidiary of the Company, as the case may be, free and clear of all liens, encumbrances, equities or claims. None of the outstanding shares of capital stock or other equity interests of any Significant Subsidiary were issued in violation of preemptive or other similar rights of any security holder of such Significant Subsidiary.

(10) Capitalization. The authorized, issued and outstanding shares of capital stock of the Company are as set forth in the Company's most recent Annual Report on Form 10-K or, if applicable, subsequent Quarterly Report on Form 10-Q (except for subsequent issuances thereof, if any, pursuant to reservations, agreements or employee benefit plans or pursuant to the exercise of convertible securities or options, in each case which are referred to in the Registration Statement, the General Disclosure Package and the Prospectus). Such shares of capital stock have been duly authorized and validly issued by the Company and are fully paid and non-assessable and none of such shares of capital stock of the Company were issued in violation of preemptive or other similar rights of any security holder of the Company.

(11) Authorization of this Agreement. This Agreement has been duly authorized, executed and delivered by the Company.

(12) Authorization of Securities. The Securities have been duly authorized by the Company for issuance and sale pursuant to this Agreement. At the Closing Time, the Securities will have been duly executed by the Company and, when authenticated in the manner provided for in the Indenture and delivered against payment of the requisite consideration therefor, will constitute valid and legally binding obligations of the Company, enforceable against the Company in accordance with their terms, except as the enforcement thereof may be limited by bankruptcy, insolvency (including, without limitation, all laws relating to fraudulent transfers), reorganization, moratorium or other similar laws affecting the enforcement of creditors' rights generally or by general equitable principles (regardless of whether enforcement is considered in a proceeding in equity or at law), and except further as enforcement thereof may be limited by requirements that a claim with respect to any debt securities payable in a foreign or composite currency (or a foreign or composite currency judgment in respect of such claim) be converted into U.S. dollars at a rate of exchange prevailing on a date determined pursuant to applicable law or by governmental authority to limit, delay or prohibit the making of payments outside the United States. Each series of Securities will be in the form contemplated by, and each registered holder thereof will be entitled to the benefits of, the Indenture.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(13) Authorization of the Indenture. The Indenture has been duly authorized, executed and delivered by the Company and constitutes a valid and legally binding agreement of the Company, enforceable against the Company in accordance with its terms, except as the enforcement thereof may be limited by bankruptcy, insolvency (including, without limitation, all laws relating to fraudulent transfers), reorganization, moratorium or other similar laws affecting the enforcement of creditors' rights generally or by general equitable principles (regardless of whether enforcement is considered in a proceeding in equity or at law), and except further as enforcement thereof may be limited by requirements that a claim with respect to any debt securities issued or issuable under the Indenture that are payable in a foreign or composite currency (or a foreign or composite currency judgment in respect of such claim) be converted into U.S. dollars at a rate of exchange prevailing on a date determined pursuant to applicable law or by governmental authority to limit, delay or prohibit the making of payments outside the United States.

(14) Descriptions of the Securities and the Indenture. The Indenture conforms, and, upon issuance, the Securities will conform, in all material respects to the statements relating thereto contained in the Registration Statement, the General Disclosure Package and the Prospectus and will be substantially in the forms filed or incorporated by reference, as the case may be, as an exhibit to the Registration Statement.

(15) Absence of Defaults and Conflicts. Neither the Company nor any of its Subsidiaries is in violation of its certificate of incorporation or by-laws or other organizational documents or in default in the performance or observance of any obligation, agreement, covenant or condition contained in any contract, indenture, mortgage, deed of trust, loan or credit agreement, note, lease or other agreement or instrument to which the Company or any of its Subsidiaries is a party or by which it or any of them may be bound, or to which any of the assets, properties or operations of the Company or any of its Subsidiaries is subject (collectively, "**Agreements and Instruments**"), except for such defaults that would not result in a Material Adverse Change. The execution, delivery and performance of this Agreement, the Indenture, the Securities and any other agreement or instrument entered into or issued or to be entered into or issued by the Company in connection with the transactions contemplated hereby or thereby or in the Registration Statement, the General Disclosure Package and the Prospectus and the consummation of the transactions contemplated herein and in the Registration Statement, the General Disclosure Package and the Prospectus (including the issuance and sale of the Securities and the use of the proceeds from the sale of the Securities as described therein) and compliance by the Company with its obligations hereunder and thereunder have been duly authorized by all necessary corporate action and do not and will not, whether with or without the giving of notice or passage of time or both, conflict with or constitute a breach of, or default or Repayment Event (as defined below) under, or result in the creation or imposition of any lien, charge or encumbrance upon any assets, properties or operations of the Company or any of its Subsidiaries pursuant to, any Agreements and Instruments, nor will such action result in any violation of the provisions of the certificate of incorporation or by-laws or other organizational documents of the Company or any of its Subsidiaries or any applicable law, statute, rule, regulation, judgment, order, writ or decree of any government, government

instrumentality or court, domestic or foreign, having jurisdiction over the Company or any of its Subsidiaries or any of their assets, properties or operations. As used herein, a "**Repayment Event**" means any event or condition which gives the holder of any note, debenture or other evidence of indebtedness (or any person acting on such holder's behalf) the right to require the repurchase, redemption or repayment of all or a portion of such indebtedness by the Company or any of its Subsidiaries.

(16) Absence of Labor Dispute. Other than as set forth in or contemplated by the Registration Statement, the General Disclosure Package and the Prospectus, no labor dispute with the employees of the Company or any of its Subsidiaries exists or, to the knowledge of the Company, is imminent, and the Company does not have actual knowledge of any existing or imminent labor disturbance by the employees of any of its or any Subsidiary's principal suppliers, manufacturers, customers or contractors, which, in either case, may reasonably be expected to result in a Material Adverse Change.

(17) Absence of Proceedings. Other than as set forth in or contemplated by the Registration Statement, the General Disclosure Package and the Prospectus, there is no action, suit, proceeding, inquiry or investigation before or brought by any court or governmental agency or body, domestic or foreign, now pending, or, to the knowledge of the Company, threatened, against or affecting the Company or any of its Subsidiaries which is required to be disclosed in the Registration Statement, the General Disclosure Package and the Prospectus (other than as stated in the Registration Statement, the General Disclosure Package and the Prospectus), or which might reasonably be expected to result in a Material Adverse Change, or which might reasonably be expected to materially and adversely affect the consolidated assets, properties or operations thereof or the consummation of the transactions contemplated under the Registration Statement, the General Disclosure Package and the Prospectus, this Agreement, the Securities or the Indenture, or the performance by the Company of its obligations hereunder and thereunder. The aggregate of all pending legal or governmental proceedings to which the Company or any of its Subsidiaries is a party or of which any of their respective assets, properties or operations is the subject which are not described in the Registration Statement, the General Disclosure Package and the Prospectus, including ordinary routine litigation incidental to the business, could not reasonably be expected to result in a Material Adverse Change.

(18) Accuracy of Exhibits. There are no contracts or documents which are required under the 1933 Act, the 1933 Act Regulations, the 1934 Act or the 1934 Act Regulations to be described in the Registration Statement, the General Disclosure Package, the Prospectus or the documents incorporated by reference therein or to be filed as exhibits thereto which have not been so described or filed as required.

(19) Absence of Further Requirements. No filing with, or authorization, approval, consent, license, order, registration, qualification or decree of, any court or governmental authority or agency, domestic or foreign, is necessary or required for the due authorization, execution and delivery by the Company of this Agreement, the Indenture, the Securities or for the performance by the Company of the transactions contemplated under the Registration Statement, the General Disclosure Package, the

Prospectus, this Agreement, the Securities or the Indenture, except the registration of the Securities under the 1933 Act, the qualification of the Indenture under the 1939 Act and such consents, approvals, registrations or qualifications as may be required under state securities or Blue Sky laws in connection with the issuance and sale of the Securities and except such as have been already made, obtained or rendered, as applicable.

(20) Possession of Licenses and Permits. The Company and its Subsidiaries possess such permits, licenses, approvals, consents and other authorizations (collectively, "**Governmental Licenses**") issued by the appropriate federal, state, local or foreign regulatory agencies or bodies necessary to conduct the business now operated by them, except where the failure so to possess such Governmental Licenses would not, singly or in the aggregate, result in a Material Adverse Change. The Company and its Subsidiaries are in compliance with the terms and conditions of all such Governmental Licenses, except where the failure so to comply would not, singly or in the aggregate, result in a Material Adverse Change. All of the Governmental Licenses are valid and in full force and effect, except where the invalidity of such Governmental Licenses or the failure of such Governmental Licenses to be in full force and effect would not result in a Material Adverse Change. Neither the Company nor any of its Subsidiaries has received any notice of proceedings relating to the revocation or modification of any such Governmental Licenses which, singly or in the aggregate, if the subject of an unfavorable decision, ruling or finding, would result in a Material Adverse Change.

(21) Title to Property. The Company and its Subsidiaries have good and marketable title to all real property owned by the Company and its Subsidiaries and good title to all other properties owned by them, in each case, free and clear of all mortgages, pledges, liens, security interests, claims, restrictions or encumbrances of any kind, except (A) as otherwise stated in the Registration Statement, the General Disclosure Package and the Prospectus or (B) those which do not, singly or in the aggregate, materially affect the value of the properties owned by the Company and its Subsidiaries considered as one enterprise and do not interfere in any material respect with the use made and proposed to be made of such properties. All of the leases and subleases material to the business of the Company and its Subsidiaries considered as one enterprise, and under which the Company or any of its Subsidiaries holds properties, are in full force and effect, and neither the Company nor any of its Subsidiaries has received any notice of any material claim of any sort that has been asserted by anyone adverse to the rights of the Company or any of its Subsidiaries under any of the leases or subleases mentioned above, or affecting or questioning the rights of the Company or such Subsidiary of the continued possession of the leased or subleased premises under any such lease or sublease.

(22) Insurance. The Company and its Subsidiaries have in full force and effect insurance with insurers believed to be reputable by the Company, covering their assets, properties, operations, personnel and business against such losses, damage, risks and hazards as are adequate in accordance with customary industry practice to protect the Company and its Subsidiaries considered as one enterprise.

(23) Commodity Exchange Act. The Securities will be excluded or exempted under, or beyond the purview of, the Commodity Exchange Act, as amended (the

"**Commodity Exchange Act**"), and the rules and regulations of the Commodity Futures Trading Commission under the Commodity Exchange Act (the "**Commodity Exchange Act Regulations**").

(24) Investment Company Act. The Company is not, or upon the issuance and sale of the Securities as herein contemplated and the application of the net proceeds therefrom as described in the Registration Statement, the General Disclosure Package and the Prospectus will not be, an "investment company" within the meaning of the Investment Company Act of 1940, as amended (the "**1940 Act**").

(25) Environmental Laws. Except as otherwise stated in the Registration Statement, the General Disclosure Package and the Prospectus or except as would not, singly or in the aggregate, result in a Material Adverse Change, (A) neither the Company nor any of its Subsidiaries is in violation of any federal, state, local or foreign statute, law, rule, regulation, ordinance, code, policy or rule of common law or any judicial or administrative interpretation thereof, including any judicial or administrative order, consent, decree or judgment, relating to pollution or protection of human health, the environment (including, without limitation, ambient air, surface water, groundwater, land surface or subsurface strata) or wildlife, including, without limitation, laws and regulations relating to the release or threatened release of chemicals, pollutants, contaminants, wastes, toxic substances, hazardous substances, petroleum or petroleum products (collectively, "**Hazardous Materials**") or to the manufacture, processing, distribution, use, treatment, storage, disposal, transport or handling of Hazardous Materials (collectively, "**Environmental Laws**"), (B) the Company and its Subsidiaries have all permits, authorizations and approvals required under any applicable Environmental Laws and are each in compliance with their requirements, (C) there are no pending or threatened administrative, regulatory or judicial actions, suits, demands, demand letters, claims, liens, notices of noncompliance or violation, investigation or proceedings relating to any Environmental Law against the Company or any of its Subsidiaries and (D) there are no events or circumstances known to the Company that might reasonably be expected to form the basis of an order for clean-up or remediation, or an action, suit or proceeding by any private party or governmental body or agency, against or affecting the Company or any of its Subsidiaries relating to Hazardous Materials or any Environmental Laws.

(26) Patriot Act. The Company will apply the net proceeds received from the offering and sale of the Securities as described in the Registration Statement, the General Disclosure Package and the Prospectus and, to the knowledge of the Company, none of such net proceeds will be used to further any action in violation or contravention of the U.S.A. Patriot Act or otherwise violate or contravene the rules, regulations or policies of the U.S. Office of Foreign Assets Control.

(27) Internal Control Over Financial Reporting. The Company and each of its Subsidiaries maintains a system of internal accounting controls sufficient to provide reasonable assurances that (i) transactions are executed in accordance with management's general or specific authorization; (ii) transactions are recorded as necessary to permit preparation of financial statements in conformity with GAAP and to maintain

accountability for assets; (iii) access to assets is permitted only in accordance with management's general or specific authorization; (iv) the recorded accountability for assets is compared with the existing assets at reasonable intervals and appropriate action is taken with respect to any differences; and (v) the interactive data in eXtensible Business Reporting Language included or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus fairly presents the information called for in all material respects and is prepared in accordance with the Commission's rules and guidelines applicable thereto. Except as described in the Registration Statement, the General Disclosure Package and the Prospectus, since the end of the Company's most recent audited fiscal year, there has been (A) no material weakness in any such party's internal control over financial reporting (whether or not remediated) and (B) no change in any such party's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, such internal control over financial reporting.

(28) Disclosure Controls and Procedures. The Company employs disclosure controls and procedures that are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the 1934 Act is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms and is accumulated and communicated to the Company's management, including its principal executive officer or officers and principal financial officer or officers, as appropriate, to allow timely decisions regarding disclosure.

(29) Compliance with the Sarbanes-Oxley Act. There is and has been no failure on the part of the Company or any of the Company's directors or officers, in their capacities as such, to comply in all material respects with any provision of the Sarbanes-Oxley Act of 2002 and the rules and regulations promulgated in connection therewith, including Section 402 related to loans and Sections 302 and 906 related to certifications.

(30) Pending Proceedings and Examinations. The Registration Statement is not the subject of a pending proceeding or examination under Section 8(d) or 8(e) of the 1933 Act, and the Company is not the subject of a pending proceeding under Section 8A of the 1933 Act in connection with the offering and sale of the Securities.

(31) No Unlawful Contributions or Other Payments. Neither the Company nor any of its Subsidiaries nor, to the knowledge of the Company, any director, officer, agent, employee or affiliate of the Company or any of its Subsidiaries is aware of or has taken any action, directly or indirectly, that would result in a violation by such persons of the Foreign Corrupt Practices Act of 1977, as amended, and the rules and regulations thereunder (the "**FCPA**"), including, without limitation, making use of the mails or any means or instrumentality of interstate commerce corruptly in furtherance of an offer, payment, promise to pay or authorization of the payment of any money, or other property, gift, promise to give, or authorization of the giving of anything of value to any "foreign official" (as such term is defined in the FCPA) or any foreign political party or official thereof or any candidate for foreign political office, in contravention of the FCPA, and the Company, its Subsidiaries and, to the knowledge of the Company, its affiliates have conducted their businesses in compliance with the FCPA and have

instituted and maintain policies and procedures designed to ensure, and which are reasonably expected to continue to ensure, continued compliance therewith.

(32) No Conflict with Money Laundering Laws. The operations of the Company and its Subsidiaries are and have been conducted at all times in compliance with applicable financial recordkeeping and reporting requirements of the Currency and Foreign Transactions Reporting Act of 1970, as amended, the money laundering statutes of all applicable jurisdictions, the rules and regulations thereunder and any related or similar rules, regulations or guidelines issued, administered or enforced by any governmental agency (collectively, the "**Money Laundering Laws**") and no action, suit or proceeding by or before any court or governmental agency, authority or body or any arbitrator involving the Company or any of its Subsidiaries with respect to the Money Laundering Laws is pending or, to the knowledge of the Company, threatened.

(33) OFAC. Neither the Company nor any of its Subsidiaries, nor, to the knowledge of the Company, any director, officer, agent or employee of the Company or any of its Subsidiaries is currently the subject of any sanctions administered or enforced by the Office of Foreign Assets Control of the U.S. Department of the Treasury or the U.S. Department of State.

(b) Officers' Certificates. Any certificate signed by any officer of the Company or any of its Subsidiaries and delivered to any Underwriter or to counsel for the Underwriters in connection with the offering of the Securities shall be deemed a representation and warranty by the Company to each Underwriter as to the matters covered thereby on the date of such certificate.

SECTION 2. Sale and Delivery to Underwriters; Closing.

(a) The Securities. On the basis of the representations, warranties and agreements herein contained, and upon the terms but subject to the conditions herein set forth, the Company agrees to sell to each Underwriter, severally and not jointly, and each Underwriter agrees, severally and not jointly, to purchase from the Company the aggregate principal amount of the Securities of each series set forth opposite the names of the Underwriters on Schedule 1 at a purchase price of 99.533% of the aggregate principal amount of the 2019 Notes, plus accrued interest thereon, if any, from November 8, 2016 to the Closing Time and 99.210% of the aggregate principal amount of the 2021 Notes, plus accrued interest thereon, if any, from November 8, 2016 to the Closing Time, respectively. The Securities of each series and the offering thereof will have the terms specified in the Final Term Sheet referred to in Section 3(b).

(b) Payment. The Company will deliver against payment of the respective purchase prices set forth in Section 2(a) each series of Securities in the form of permanent global securities (the "**Global Securities**") deposited with the Trustee as custodian for The Depository Trust Company ("**DTC**") and registered in the name of Cede & Co., as nominee for DTC. Interests in any permanent Global Securities will be held only in book-entry form through DTC, except in the limited circumstances described in the General Disclosure Package. Payment for the Securities shall be made by the Underwriters in immediately available funds by wire transfer to an account specified by the Company drawn to the order of the Company at the office of the

Company, 80 Park Plaza, Newark, New Jersey 07102, or at such other place as shall be agreed upon by the Representatives and the Company, at 9:00 A.M. (New York City time) on November 8, 2016, or such other time and date as the Representatives and the Company shall mutually agree (the time and date of such closing are called (unless postponed in accordance with the provisions of Section 10 hereof) the "**Closing Time**"), against delivery to the Trustee as custodian for DTC of the Global Securities representing all of the Securities.

It is understood that each Underwriter has authorized the Representatives, for their accounts, to accept delivery of, receipt for, and make payment of the respective purchase prices for, the Securities which it has severally agreed to purchase. Each Representative, individually and not as representative of the Underwriters, may (but shall not be obligated to) make payment of the respective purchase prices for the Securities to be purchased by any Underwriter whose funds have not been received by the Closing Time, but such payment shall not relieve such Underwriter from its obligations hereunder.

(c) Denominations; Registration. The Securities shall be in such denominations and registered in such names as the Representatives may request in writing at least one full business day prior to the Closing Time. The Securities will be made available for examination by the Representatives in The City of New York not later than 9:00 A.M. (New York City time) on the business day prior to the Closing Time.

SECTION 3. Covenants of the Company. The Company covenants with each Underwriter as follows:

(a) Compliance with Securities Regulations and Commission Requests. The Company, subject to Section 3(b), will comply with the requirements of Rule 430B and, during the Prospectus Delivery Period (as defined below), will notify the Representatives promptly, and confirm the notice in writing, (i) of the effectiveness of any post-effective amendment to the Registration Statement or of a new registration statement relating to the Securities or the filing of any supplement or amendment to the Prospectus or any preliminary prospectus, (ii) of the receipt of any comments from the Commission, (iii) of any request by the Commission for any amendment to the Registration Statement or the filing of a new registration statement or any amendment or supplement to the Prospectus or any preliminary prospectus or any document incorporated by reference therein or otherwise deemed to be a part thereof or for additional information, (iv) of the issuance by the Commission of any stop order suspending the effectiveness of the Registration Statement or such new registration statement, or notice objecting to its use pursuant to Rule 401(g)(2) of the 1933 Act Regulations, or of any order preventing or suspending the use of any preliminary prospectus or the Prospectus, or of the suspension of the qualification of the Securities for offering or sale in any jurisdiction, or of the initiation or threatening of any proceedings for any of such purposes or of any examination pursuant to Section 8(e) of the 1933 Act concerning the Registration Statement and (v) if the Company becomes the subject of a proceeding under Section 8A of the 1933 Act in connection with the offering of the Securities. The Company will promptly effect the filings necessary pursuant to Rule 424(b), in the manner and within the time period required by Rule 424(b) (without reliance on Rule 424(b)(8)), and will take such steps as it deems necessary to ascertain promptly whether the Prospectus transmitted for filing under Rule 424(b) was received for filing by the Commission and, in the event that it was not, the Company will promptly file the

Prospectus. The Company will make every reasonable effort to prevent the issuance of any stop order and, if any stop order is issued, promptly to use its best efforts to obtain its withdrawal. The Company agrees to pay the required Commission filing fees relating to the offering of the Securities within the time required by and in accordance with Rule 456(b)(1) and 457(r) of the 1933 Act Regulations.

(b) Filing of Amendments and 1934 Act Documents; Preparation of Final Term Sheet. During such period beginning on the date of this Agreement and ending on the later of the Closing Time or such date as, in the opinion of counsel for the Underwriters, the Prospectus is no longer required by law to be delivered in connection with sales of the Securities by an Underwriter or dealer, including in circumstances where such requirement may be satisfied pursuant to Rule 172 of the 1933 Act Regulations (the "**Prospectus Delivery Period**"), the Company will give the Representatives notice of its intention to file or prepare any amendment to the Registration Statement or a new registration statement relating to the Securities or any amendment, supplement or revision to any preliminary prospectus or to the Prospectus, whether pursuant to the 1933 Act, the 1934 Act or otherwise, will furnish the Representatives with copies of any such documents a reasonable amount of time prior to such proposed filing or use, as the case may be, and will not file or use any such document of which the Representatives or counsel for the Underwriters shall reasonably disapprove. The Company has given the Representatives notice of any filings made pursuant to the 1934 Act or the 1934 Act Regulations within 48 hours prior to the Applicable Time; the Company will give the Representatives notice of its intention to make any such filing from the Applicable Time to the Closing Time and will furnish the Representatives with copies of any such documents a reasonable amount of time prior to such proposed filing and will not file or use any such document to which the Representatives or counsel for the Underwriters shall object. The Company will prepare a final term sheet (the "**Final Term Sheet**") reflecting the final terms of the Securities, in form and substance satisfactory to the Underwriters and attached as Schedule 3 hereto, and will file such Final Term Sheet pursuant to Rule 433(d) within the time required by such rule. The Final Term Sheet is an Issuer Free Writing Prospectus for purposes of this Agreement.

(c) Delivery of Registration Statement. The Company has furnished or will deliver to the Representatives and counsel for the Underwriters, in such quantities as the Representatives may reasonably request, without charge, signed copies of the Registration Statement as originally filed and any amendment thereto (including exhibits filed therewith or incorporated by reference therein and documents incorporated or deemed to be incorporated by reference therein or otherwise deemed to be a part thereof) and signed copies of all consents and certificates of experts, and will also deliver to the Representatives, without charge, a conformed copy of the Registration Statement as originally filed and any amendment thereto (without exhibits) for each of the Underwriters. The Registration Statement and any amendment thereto furnished to the Underwriters will be identical to any electronically transmitted copies thereof filed with the Commission pursuant to EDGAR, except to the extent permitted by Regulation S-T.

(d) Delivery of Prospectuses. The Company will deliver to each Underwriter, without charge, as many copies of each preliminary prospectus and any amendment or supplement thereto as such Underwriter may reasonably request, and the Company hereby consents to the use of such copies for purposes permitted by the 1933 Act. The Company will furnish to each Underwriter, without charge, during the Prospectus Delivery Period, such number of copies of

Past financial performance is no guarantee of future results.

the Prospectus (as amended or supplemented) as such Underwriter may reasonably request. Each preliminary prospectus and the Prospectus and any amendments or supplements thereto furnished to the Underwriters will be identical to any electronically transmitted copies thereof filed with the Commission pursuant to EDGAR, except to the extent permitted by Regulation S-T.

(e) Continued Compliance with Securities Laws. The Company will comply with the 1933 Act and the 1933 Act Regulations, the 1934 Act and the 1934 Act Regulations and the 1939 Act and the rules and regulations of the Commission under the 1939 Act so as to permit the completion of the distribution of the Securities as contemplated in this Agreement and in the Registration Statement, the General Disclosure Package and the Prospectus. If at any time during the Prospectus Delivery Period, any event shall occur or condition shall exist as a result of which it is necessary, in the opinion of counsel for the Underwriters or for the Company, to amend the Registration Statement in order that the Registration Statement will not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading or to amend or supplement the General Disclosure Package or the Prospectus in order that such General Disclosure Package or the Prospectus, as the case may be, will not include an untrue statement of a material fact or omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances existing at the Applicable Time or at the time it is delivered or conveyed to a purchaser, not misleading, or if it shall be necessary, in the opinion of such counsel, at any such time to amend the Registration Statement, to file a new registration statement or to amend or supplement the General Disclosure Package or the Prospectus in order to comply with the requirements of the 1933 Act or the 1933 Act Regulations, the Company will: (i) promptly prepare and file with the Commission, subject to Sections 3(b) and 3(k), such amendment or supplement or new registration statement as may be necessary to correct such statement or omission or to make the Registration Statement, the General Disclosure Package or the Prospectus comply with such requirements; (ii) use their best efforts to have such amendment or new registration statement (if it is not an automatic shelf registration statement) declared effective as soon as practicable; and (iii) furnish to the Underwriters, without charge, such number of copies of such amendment or supplement or new registration statement as the Underwriters may reasonably request. If, prior to the completion of the public offer and sale of the Securities, at any time following the issuance of an Issuer Free Writing Prospectus there occurred or occurs an event or development as a result of which such Issuer Free Writing Prospectus conflicted or would conflict with the information then contained in the Registration Statement, any preliminary prospectus or the Prospectus or included or would include an untrue statement of a material fact or omitted or would omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances prevailing at that subsequent time, not misleading, the Company will promptly (i) notify the Representatives and (ii) either (1) amend or supplement such Issuer Free Writing Prospectus to eliminate or correct such conflict, untrue statement or omission or (2) file a report with the Commission under the 1934 Act that corrects such untrue statement or omission and notify the Representatives in writing that such Issuer Free Writing Prospectus shall no longer be used.

(f) Blue Sky Qualifications. The Company will use its best efforts, in cooperation with the Underwriters, to qualify the Securities for offering and sale under the applicable securities laws of such states and other jurisdictions (domestic or foreign) as the Representatives may

Past financial performance is no guarantee of future results.

designate and to maintain such qualifications in effect for a period of not less than one year from the date of this Agreement; provided, however, that the Company shall not be obligated to file any general consent to service of process or to qualify as a foreign corporation or as a dealer in securities in any jurisdiction in which it is not so qualified or to subject itself to taxation in respect of doing business in any jurisdiction in which it is not otherwise so subject. In each jurisdiction in which the Securities have been so qualified, the Company will file such statements and reports as may be required by the laws of such jurisdiction to continue such qualification in effect for a period of not less than one year from the date of this Agreement.

(g) Earnings Statement. The Company will timely file such reports pursuant to the 1934 Act as are necessary in order to make generally available to its security holders as soon as practicable an earnings statement for the purposes of, and to provide the benefits contemplated by, the last paragraph of Section 11(a) of the 1933 Act; provided, that the Company will be deemed to have furnished such statement to its security holders to the extent it is filed on EDGAR.

(h) Use of Proceeds. The Company will use the net proceeds received by it from the sale of the Securities in the manner specified in the Registration Statement, the General Disclosure Package and the Prospectus under "Use of Proceeds."

(i) Restriction on Sale of Securities. Between the date of this Agreement and the Closing Time, the Company will not, without the prior written consent of the Representatives, directly or indirectly, issue, sell, offer or contract to sell, grant any option for the sale of, or otherwise dispose of, the Securities.

(j) Reporting Requirements. The Company, during the Prospectus Delivery Period, will file all documents required to be filed with the Commission pursuant to the 1934 Act within the time periods required by the 1934 Act and the 1934 Act Regulations.

(k) Permitted Free Writing Prospectuses. The Company represents and agrees that, unless it obtains the prior consent of the Representatives, and each Underwriter represents and agrees that, unless it obtains the prior consent of the Representatives and the prior consent of the Company, it has not made and will not make any offer relating to the Securities that would constitute an "issuer free writing prospectus," as defined in Rule 433, or that would otherwise constitute a "free writing prospectus," as defined in Rule 405, required to be filed with the Commission; provided, however, that the Underwriters are authorized to use any free writing prospectus that contains substantially only information specified in the Final Term Sheet. Any such free writing prospectus consented to by the Company and the Representatives is hereinafter referred to as a "**Permitted Free Writing Prospectus**." The Company represents that it has treated or agrees that it will treat each Permitted Free Writing Prospectus as an "issuer free writing prospectus," as defined in Rule 433, and has complied and will comply with the requirements of Rule 433 applicable to each and every Permitted Free Writing Prospectus, including timely filing with the Commission where required, legending and record keeping.

(l) Renewal of Registration Statement. If, immediately prior to the third anniversary of the initial effective date of the Registration Statement (the "**Renewal Date**"), any of the Securities remain unsold by the Underwriters, the Company will, prior to the Renewal Date and

subject to Section 3(b), file, if it has not already done so and is eligible to do so, a new automatic shelf registration statement relating to the Securities. If no longer eligible to file an automatic shelf registration statement, the Company will, prior to the Renewal Date and subject to Section 3(b), if it has not already done so, file a new shelf registration statement relating to the Securities and will use its reasonable best efforts to cause such registration statement to be declared effective within 180 days after the Renewal Date, and will take all other reasonable actions necessary or appropriate to permit the public offering and sale of the Securities to continue as contemplated in the expired registration statement relating to the Securities. References herein to the "**Registration Statement**" shall include such new automatic shelf registration statement or shelf registration statement, as the case may be.

(m) Notice of Inability to Use Automatic Shelf Registration Statement Form. If, at any time during the Prospectus Delivery Period, the Company receives from the Commission a notice pursuant to Rule 401(g)(2) of the 1933 Act Regulations or otherwise ceases to be eligible to use the automatic shelf registration statement form, the Company will (i) promptly notify the Representatives, (ii) promptly file a new registration statement or post-effective amendment on the proper form relating to the Securities, in a form satisfactory to the Representatives, (iii) use its reasonable best efforts to cause such registration statement or post-effective amendment to be declared effective and (iv) promptly notify the Representatives of such effectiveness. The Company will take all other action necessary or appropriate to permit the public offering and sale of the Securities to continue as contemplated in the registration statement that was the subject of the Rule 401(g)(2) notice or for which the Company has otherwise become ineligible. References herein to the Registration Statement shall include such new registration statement or post-effective amendment, as the case may be.

SECTION 4. Payment of Expenses. *(a) Expenses*. The Company will pay all expenses incident to the performance of its obligations under this Agreement, including (i) the preparation, printing and filing of the Registration Statement (including financial statements and exhibits) and any amendment thereto, (ii) the preparation, printing and delivery to the Underwriters of this Agreement, the Indenture and such other documents as may be required in connection with the offering, purchase, sale, issuance or delivery of the Securities, (iii) the preparation, issuance and delivery of the Securities to the Underwriters, including any transfer taxes and any stamp or other duties payable upon the sale, issuance or delivery of the Securities to the Underwriters, (iv) the fees and disbursements of counsel to the Company, accountants and other advisors or agents (including transfer agents and registrars), as well as the fees and disbursements of the Trustee and its counsel, (v) the qualification of the Securities under state securities laws in accordance with the provisions of Section 3(f) hereof, including filing fees and the reasonable fees and disbursements of counsel for the Underwriters in connection therewith and in connection with the preparation, printing and delivery of the Blue Sky Survey, and any amendment thereto, (vi) the printing and delivery to the Underwriters of copies of the Registration Statement, each preliminary prospectus, any Issuer Free Writing Prospectus and the Prospectus and any amendments or supplements thereto, (vii) the fees charged by nationally recognized statistical rating organizations for the rating of the Securities, (viii) the filing fees incident to, and the reasonable fees and disbursements of counsel to the Underwriters in connection with, the review, if any, by the Financial Industry Regulatory Authority ("**FINRA**") of the terms of the sale of the Securities, (ix) all fees and expenses in connection with making the Securities eligible for clearance, settlement and trading through the facilities of DTC, and (x) all other costs and

Past financial performance is no guarantee of future results.

expenses incident to the performance of the obligations of the Company hereunder for which provision is not otherwise made in this Section. It is understood, however, that except as provided in this Section, Section 5(j), Section 6, Section 7 and Section 9(b), the Underwriters will pay all of their costs and expenses, including fees and disbursements of their counsel, transfer taxes payable on resale of any of the Securities by them and any advertising expenses connected with any offers they may make.

(b) Termination of Agreement. If this Agreement is terminated by the Representatives in accordance with the provisions of Section 5 hereof, the Company shall reimburse the Underwriters for all of their out of pocket expenses, including the reasonable fees and disbursements of counsel for the Underwriters.

SECTION 5. Conditions of Underwriters' Obligations. The obligations of the Underwriters to purchase and pay for the Securities pursuant to this Agreement are subject to the accuracy of the representations and warranties of the Company contained in Section 1 hereof or in certificates of any officer of the Company or any of its Subsidiaries delivered pursuant to the provisions hereof, to the performance by the Company of its covenants and other obligations hereunder, and to the following further conditions:

(a) Effectiveness of Registration Statement. At Closing Time, (i) the Registration Statement shall have been filed by the Company with the Commission not earlier than three years prior to the date hereof and shall have become effective upon filing in accordance with Rule 462(e), and no stop order suspending the effectiveness of the Registration Statement shall have been issued under the 1933 Act and no proceedings for that purpose or pursuant to Section 8A of the 1933 Act against the Company or related to the offering of the Securities shall have been instituted or be pending or threatened by the Commission, any request on the part of the Commission for additional information shall have been complied with to the reasonable satisfaction of counsel for the Underwriters, and no notice of objection of the Commission to the use of such form of registration statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) of the 1933 Act Regulations shall have been received by the Company, (ii) each preliminary prospectus and the Prospectus shall have been filed with the Commission in the manner and within the time period required by Rule 424(b) without reliance on Rule 424(b)(8) (or a post-effective amendment providing such information shall have been filed and become effective in accordance with the requirements of Rule 430B) and (iii) the Final Term Sheet and any other material required to be filed by the Company pursuant to Rule 433(d) shall have been filed with the Commission within the applicable time periods prescribed for such filings under such Rule 433.

(b) Opinion of Counsel for Company. At Closing Time, the Representatives shall have received the favorable opinion, dated as of Closing Time, of either Tamara L. Linde, Esquire, Executive Vice President and General Counsel of the Company, or Shawn P. Leyden, Esquire, Vice President and Deputy General Counsel of PSEG Services Corporation, in form and substance satisfactory to counsel for the Underwriters, together with signed or reproduced copies of such letter for each of the other Underwriters, to the effect set forth in Exhibit A hereto and to such further effect as counsel to the Underwriters may reasonably request.

(c) Opinion of Counsel for Underwriters. At Closing Time, the Representatives shall have received the favorable opinion, dated as of Closing Time, of Sidley Austin llp, counsel for the Underwriters, together with signed or reproduced copies of such letter for each of the other Underwriters, in form and substance satisfactory to the Representatives. In giving such opinion, such counsel may rely, as to all matters governed by the laws of the State of New Jersey, upon the opinion, dated as of Closing Time, of either Tamara L. Linde, Esquire, Executive Vice President and General Counsel of the Company, or Shawn P. Leyden, Esquire, Vice President and Deputy General Counsel of the Company, and as to all matters governed by the laws of other jurisdictions other than the law of the State of New York and the federal law of the United States, upon the opinions of counsel satisfactory to the Representatives. Such counsel may also state that, insofar as such opinion involves factual matters, they have relied, to the extent they deem proper, upon certificates of officers of the Company and its Subsidiaries and certificates of public officials.

(d) Officer's Certificate. At Closing Time, there shall not have been, since the date of this Agreement or since the respective dates as of which information is given in the Registration Statement, the General Disclosure Package or the Prospectus, any Material Adverse Change, and the Representatives shall have received a certificate of the Chairman, the President or any Vice President of the Company, dated as of Closing Time, to the effect that (i) there has been no such Material Adverse Change, (ii) the representations and warranties in Section 1(a) are true and correct with the same force and effect as though expressly made at and as of the Closing Time, (iii) the Company has complied with all agreements contained in this Agreement and satisfied all conditions on its part to be performed or satisfied at or prior to the Closing Time, and (iv) no stop order suspending the effectiveness of the Registration Statement has been issued and no proceedings for that purpose or pursuant to Section 8A of the 1933 Act against the Company or relating to the offering have been instituted, are pending or, to the best of such officer's knowledge, are threatened by the Commission.

(e) Accountant's Comfort Letter. At the Execution Time, the Representatives shall have received from Deloitte & Touche LLP, independent registered public accountants for the Company, a letter, dated as of the date hereof addressed to the Underwriters, in form and substance satisfactory to the Representatives, together with signed or reproduced copies of such letter for each of the other Underwriters, with respect to the audited and unaudited financial statements and certain financial information contained or incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus.

(f) Bring-down Comfort Letter. At Closing Time, the Representatives shall have received from Deloitte & Touche LLP, independent registered public accountants for the Company, a letter, dated as of Closing Time addressed to the Underwriters, in form and substance satisfactory to the Representatives, together with signed or reproduced copies of such letter for each of the other Underwriters to the effect that they reaffirm the statements made in the letter furnished pursuant to subsection (e) of this Section 5, except that the specified date referred to shall be a date not more than three business days prior to the Closing Time.

(g) Ratings. At Closing Time, the Securities shall have the ratings accorded by any "nationally recognized statistical rating organization," as defined in Section 3(a)(62) of the 1934 Act, as specified in the Final Term Sheet, and the Company shall have delivered to the

Representatives a letter, dated as of such date, from each such rating organization, or other evidence satisfactory to the Representatives, confirming that the Securities have such ratings. Since the Execution Time, there shall not have occurred a downgrading in, or withdrawal of, the rating assigned to the Securities or any of the Company's other securities by any such rating organization, and no such rating organization shall have publicly announced or given notice of any intended or potential decrease in or withdrawal of any such rating or of a possible change in any such rating that does not indicate the direction of the possible change.

(h) No Objection. If the Registration Statement or the offering of the Securities has been filed with FINRA for review, FINRA shall not have raised any objection with respect to the fairness and reasonableness of the underwriting terms and arrangements.

(i) Additional Documents. At Closing Time, counsel for the Underwriters shall have been furnished with such documents and opinions as they may require for the purpose of enabling them to pass upon the issuance and sale of the Securities as herein contemplated, or in order to evidence the accuracy of any of the representations or warranties, or the fulfillment of any of the conditions, herein contained; and all proceedings taken by the Company in connection with the issuance and sale of the Securities as herein contemplated shall be satisfactory in form and substance to the Representatives and counsel for the Underwriters.

(j) Termination. If any condition specified in this Section 5 shall not have been fulfilled when and as required to be fulfilled, this Agreement may be terminated by the Representatives by notice to the Company at any time at or prior to the Closing Time, and such termination shall be without liability of any party to any other party except as provided in Section 4 and except that Sections 1, 6, 7, 8 and 14 shall survive any such termination and remain in full force and effect.

SECTION 6. Indemnification.

(a) Indemnification of Underwriters. The Company agrees to indemnify and hold harmless each Underwriter and their respective partners, directors and officers and each person, if any, who controls any Underwriter (collectively, "**Underwriter Indemnified Parties**") within the meaning of Section 15 of the 1933 Act or Section 20 of the 1934 Act as follows:

(i) against any and all loss, liability, claim, damage and expense whatsoever, as incurred, arising out of any untrue statement or alleged untrue statement of a material fact contained in the Registration Statement (or any amendment thereto) or the omission or alleged omission therefrom of a material fact required to be stated therein or necessary to make the statements therein not misleading or arising out of any untrue statement or alleged untrue statement of a material fact contained in any preliminary prospectus, any Issuer Free Writing Prospectus or the Prospectus (or any amendment or supplement thereto) or in any "issuer information" (as defined in Rule 433) of the Company that is filed or required to be filed under Rule 433(d) or the omission or alleged omission therefrom of a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading;

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(ii) against any and all loss, liability, claim, damage and expense whatsoever, as incurred, to the extent of the aggregate amount paid in settlement of any litigation, or any investigation or proceeding by any governmental agency or body, commenced or threatened, or of any claim whatsoever based upon any such untrue statement or omission referred to in subsection (i) above or any alleged untrue statement or omission, if such settlement is effected with the written consent of the Company; and

(iii) against any and all expense whatsoever, as incurred, reasonably incurred in investigating, preparing or defending against any litigation, or any investigation or proceeding by any governmental agency or body, commenced or threatened, or any claim whatsoever based upon any such untrue statement or omission, or any such alleged untrue statement or omission, to the extent that any such expense is not paid under (i) or (ii) above;

provided, however, that this indemnity agreement shall not apply to any loss, liability, claim, damage or expense to the extent arising out of any untrue statement or omission or alleged untrue statement or omission made in reliance upon and in conformity with written information furnished to the Company by any Underwriter through the Representatives expressly for use in the Registration Statement (or any amendment thereto) or any preliminary prospectus, any Issuer Free Writing Prospectus or the Prospectus (or any amendment or supplement thereto) or made in reliance upon the Trustee's Statement of Eligibility filed as an exhibit to the Registration Statement. The Company and the Underwriters hereby acknowledge and agree that the only written information furnished to the Company by any Underwriter through the Representatives expressly for use in the Registration Statement (or any amendment thereto) or any preliminary prospectus, any Issuer Free Writing Prospectus or the Prospectus (or any amendment or supplement thereto) are the statements set forth in the (x) first, second and third sentences of the third paragraph, (y) second sentence of the fifth paragraph and (z) first, second, third, fourth and sixth sentences of the sixth paragraph, in each case under the caption "Underwriting" in the Prospectus (collectively, the "**Underwriter Information**").

(b) In no case shall the Company be liable under the indemnity agreement set forth in Section 6(a) hereof with respect to any claim made against any Underwriter Indemnified Party unless such party shall be notified in writing of the nature of the claim promptly after the assertion thereof, but failure to so notify such party shall not relieve it from any liability which it may have otherwise than on account of said indemnity agreement. The Company shall be entitled to participate at its own expense in the defense, or, if the Company so elects, within a reasonable time after receipt of such notice, to assume the defense of any suit brought to enforce any such claim, but if they so elect to assume the defense, such defense shall be conducted by counsel chosen by the Company and approved by the Underwriter Indemnified Parties who are party to such suit, which approval shall not be unreasonably withheld. In the event that the Company elects to assume the defense of any such suit and retain such counsel, the Underwriter Indemnified Parties who are party to such suit shall bear the fees and expenses of any additional counsel thereafter retained by them. In the event that the parties to any such action (including impleaded parties) include the Company and one or more Underwriters and any such Underwriter shall have been advised by counsel chosen by it and satisfactory to the Company, as the case may be, that there may be one or more legal defenses available to it which are different from or additional to those available to the Company, the Company shall not have the right to

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

assume the defense of such action on behalf of such Underwriter and the Company will reimburse, without duplication, such Underwriter Indemnified Parties as aforesaid for the reasonable fees and expenses of any counsel retained by them, it being understood that the Company shall not, in connection with any one action or separate but similar or related actions in the same jurisdiction arising out of the same general allegations or circumstances, be liable for the reasonable fees and expenses of more than one separate firm of attorneys for all such Underwriter Indemnified Parties, which firm shall be designated by the Representatives in writing. The Company agrees to notify the Representatives promptly after the assertion of any claim against it, any of its directors, any of its officers who signed the Registration Statement, or any person who controls the Company within the meaning of Section 15 of the 1933 Act or Section 20 of the 1934 Act, in connection with the offering and sale of the Securities.

(c) Indemnification of the Company, Directors and Officers. The Underwriters, severally and not jointly, agree to indemnify and hold harmless the Company, its directors, each of its officers who signed the Registration Statement, and each person, if any, who controls the Company within the meaning of Section 15 of the 1933 Act or Section 20 of the 1934 Act against any and all loss, liability, claim, damage and expense described in the indemnity contained in subsection (a) of this Section, as incurred, but only with respect to untrue statements or omissions, or alleged untrue statements or omissions, made in the Registration Statement (or any amendment thereto) or any preliminary prospectus, any Issuer Free Writing Prospectus or the Prospectus (or any amendment or supplement thereto) in reliance upon and in conformity with the Underwriter Information. In case any action shall be brought against the Company or any person so indemnified based on the Registration Statement (or any amendment thereto) or such preliminary prospectus, such Issuer Free Writing Prospectus or the Prospectus (or any amendment or supplement thereto) and in respect of which indemnity may be sought against any Underwriter, such Underwriter shall have the rights and duties given to the Company, and the Company and each person so indemnified shall have the rights and duties given to the Underwriters by the provisions of Section 6(b) hereof.

(d) The indemnity agreements contained in this Section 6 shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of the Company or any Underwriter Indemnified Parties, and shall survive the delivery of the Securities to the Underwriters.

(e) Settlement. No indemnifying party shall, without the prior written consent of the indemnified parties, settle or compromise or consent to the entry of any judgment with respect to any litigation, or any investigation or proceeding by any governmental agency or body, commenced or threatened, or any claim whatsoever in respect of which indemnification or contribution could be sought under this Section 6 or Section 7 hereof (whether or not the indemnified parties are actual or potential parties thereto), unless such settlement, compromise or consent (i) includes an unconditional release of each indemnified party from all liability arising out of such litigation, investigation, proceeding or claim and (ii) does not include a statement as to or an admission of fault, culpability or a failure to act by or on behalf of any indemnified party.

SECTION 7. Contribution. In order to provide for just and equitable contribution in circumstances in which the indemnity agreement provided for in Section 6 is for any reason held

Past financial performance is no guarantee of future results.

to be unenforceable by the indemnified parties although applicable in accordance with its terms, the Company and the Underwriters shall contribute to the aggregate losses, liabilities, claims, damages and expenses of the nature contemplated by said indemnity agreements incurred by the Company and the Underwriters, in such proportions that the Underwriters are responsible for that portion represented by the percentage that the total underwriting discounts appearing on the cover page of the Prospectus relating to the Securities bears to the respective aggregate initial public offering prices appearing thereon and the Company is responsible for the balance; provided, however, that (i) no Underwriter shall be required to contribute any amount in excess of the amount by which the total discount or commission received by such Underwriter in connection with the offering of the Securities exceeds the amount of any damages which such Underwriter has otherwise been required to pay by reason of any applicable untrue or alleged untrue statement or omission or alleged omission and (ii) no person guilty of fraudulent misrepresentation (within the meaning of Section 11(f) of the 1933 Act) shall be entitled to contribution from any person who was not guilty of such fraudulent misrepresentation. For purposes of this Section, each Underwriter Indemnified Party shall have the same rights to contribution as the Underwriters, and each director of the Company, each officer of the Company who signed the Registration Statement, and each person, if any, who controls the Company within the meaning of Section 15 of the 1933 Act or Section 20 of the 1934 Act shall have the same rights to contribution as the Company. The Underwriters' respective obligations to contribute pursuant to this Section 7 are several in proportion to their respective underwriting obligations, and not joint.

SECTION 8. Representations, Warranties and Agreements to Survive Delivery. All representations, warranties and agreements contained in this Agreement or in certificates of officers of the Company or any of its Subsidiaries submitted pursuant hereto or thereto shall remain operative and in full force and effect, regardless of any investigation made by or on behalf of any Underwriter or controlling person, or by or on behalf of the Company, and shall survive delivery of and payment for the Securities.

In all dealings hereunder, the Representatives shall act on behalf of each of the Underwriters, and the parties hereto shall be entitled to act and rely upon any statement, request, notice or agreement on behalf of any Underwriter made or given by the Representatives or by the Representatives on behalf of the Underwriters.

SECTION 9. Termination.

(a) The Representatives may terminate this Agreement, by notice to the Company, at any time at or prior to the Closing Time, (i) if there has been, since the time of execution of this Agreement or since the respective dates as of which information is given in the Registration Statement, the General Disclosure Package or the Prospectus, any Material Adverse Change, or (ii) if there has occurred any material adverse change in the financial markets in the United States, any outbreak of hostilities or escalation thereof or other calamity or crisis or any change or development involving a prospective change in national or international political, financial or economic conditions, in each case the effect of which is such as to make it, in the judgment of the Underwriters, impracticable or inadvisable to market the Securities or to enforce contracts for the sale of the Securities, or (iii) if trading in any securities of the Company has been suspended or materially limited by the Commission or the New York Stock Exchange, or if trading

generally on the NYSE MKT or the New York Stock Exchange or in the Nasdaq Stock Market has been suspended or materially limited, or minimum or maximum prices for trading have been fixed, or maximum ranges for prices have been required, by any of said exchanges or by such system or by order of the Commission, FINRA or any other governmental authority, or a material disruption has occurred in commercial banking or settlement or clearance services in the United States, or (iv) if a banking moratorium has been declared by either federal or New York authorities or (v) if the rating accorded the Securities or any debt securities or other security of the Company by any nationally recognized statistical rating organization shall have been decreased or withdrawn or any such rating organization has publicly announced or given notice of any intended or potential decrease in or withdrawal of any such rating or of a possible change in any such rating that does not indicate the direction of the possible change.

(b) Liabilities. If this Agreement is terminated pursuant to this Section 9, such termination shall be without liability of any party to any other party except as provided in Section 4 hereof, and provided further that Sections 1, 6, 7, 8 and 14 shall survive such termination and remain in full force and effect.

SECTION 10. Default by One or More of the Underwriters. If one or more of the Underwriters shall fail at the Closing Time to purchase the Securities of either series which it or they are obligated to purchase hereunder (the unpurchased securities of such series, the "**Defaulted Securities**"), then the Representatives shall have the right, within 36 hours thereafter, to make arrangements for one or more of the non-defaulting Underwriters, or any other underwriters, to purchase all, but not less than all, of the Defaulted Securities in such amounts as may be agreed upon and upon the terms herein set forth; if, however, the Representatives shall not have completed such arrangements within such 36-hour period, then:

(a) if the aggregate principal amount of Defaulted Securities does not exceed 10% of the aggregate principal amount of Securities of such series to be purchased on such date, the non-defaulting Underwriters shall be obligated, severally and not jointly, to purchase the full amount thereof in the proportions that their respective underwriting obligations under this Agreement bear to the underwriting obligations of all non-defaulting Underwriters; or

(b) if the aggregate principal amount of Defaulted Securities exceeds 10% of the aggregate principal amount of Securities of such series to be purchased on such date, this Agreement shall terminate with respect to the Securities of such series without liability on the part of any non-defaulting Underwriter.

No action taken pursuant to this Section 10 shall relieve any defaulting Underwriter from liability in respect of its default.

In the event of any such default which does not result in a termination of this Agreement, either the Representatives, on the one hand, or the Company, on the other, shall have the right to postpone the Closing Time for a period not exceeding seven days in order to effect any required changes in the Registration Statement, the General Disclosure Package or the Prospectus or in any other documents or arrangements.

SECTION 11. No Advisory or Fiduciary Relationship. The Company acknowledges and agrees that (a) the purchase and sale of the Securities pursuant to this Agreement, including the determination of the respective public offering prices of the Securities and any related discounts and commissions, is an arm's-length commercial transaction among the Company, on the one hand, and the Underwriters, on the other hand, (b) in connection with the offering contemplated by this Agreement and the process leading to such transaction, each Underwriter is and has been acting solely as a principal and is not the agent or fiduciary of the Company, or its stockholders, creditors, employees or any other party, (c) no Underwriter has assumed or will assume an advisory or fiduciary responsibility in favor of the Company with respect to the offering contemplated hereby or the process leading thereto (irrespective of whether such Underwriter has advised or is currently advising the Company on other matters) and no Underwriter has any obligation to the Company with respect to the offering contemplated by this Agreement except the obligations expressly set forth in this Agreement, (d) the Underwriters and their respective affiliates may be engaged in a broad range of transactions that involve interests that differ from those of the Company and (e) no Underwriter has provided any legal, accounting, regulatory or tax advice with respect to the offering contemplated by this Agreement and the Company has consulted its own legal, accounting, regulatory and tax advisors to the extent it deemed appropriate.

SECTION 12. Notices. All notices and other communications hereunder shall be in writing and shall be deemed to have been duly given if mailed or transmitted by any standard form of telecommunication. Notices to the Underwriters shall be directed to the Representatives c/o J.P. Morgan Securities LLC, 383 Madison Avenue, 3rd Floor, New York, New York 10179, Attention: Investment Grade Syndicate Desk, Telecopy: (212) 834-6081; Barclays Capital Inc., 745 Seventh Avenue, New York, New York 10019, Attention: Syndicate Registration, Telecopy: (636) 834-8133; RBC Capital Markets, LLC, 200 Vesey Street, New York, New York, 10281, Attention: DCM Transaction Management, Telecopy: (212) 658-6137, and notices to the Company shall be directed to it at 80 Park Plaza, P.O. Box 1171, Newark, New Jersey 07101, attention of Tamara L. Linde, Esq.

SECTION 13. Parties. This Agreement shall inure to the benefit of and be binding upon the Company and the Underwriters and their respective successors. Nothing expressed or mentioned in this Agreement is intended or shall be construed to give any person, firm or corporation, other than the Underwriters, the Company and their respective successors and the controlling persons and officers and directors referred to in Sections 6 and 7 and their heirs and legal representatives, any legal or equitable right, remedy or claim under or in respect of this Agreement or any provision herein or therein contained. This Agreement and all conditions and provisions hereof and thereof are intended to be for the sole and exclusive benefit of the parties hereto and thereto and their respective successors, and said controlling persons and officers and directors and their heirs and legal representatives, and for the benefit of no other person, firm or corporation. No purchaser of Securities from any Underwriter shall be deemed to be a successor by reason merely of such purchase.

SECTION 14. GOVERNING LAW AND TIME. THIS AGREEMENT SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF NEW YORK. SPECIFIED TIMES OF DAY REFER TO NEW YORK CITY TIME.

EXHIBIT A

FORM OF OPINION OF COUNSEL FOR THE COMPANY
TO BE DELIVERED PURSUANT TO
SECTION 5(b)

On the basis of the foregoing and of my examination and consideration of such other legal and factual matters as I have deemed appropriate, I am of the opinion that:

(i) The Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of the State of New Jersey and has the requisite power and authority to own, lease and operate its properties, to conduct its business as described in the Registration Statement, the General Disclosure Package (as defined in Annex A hereto), and the Prospectus and to enter into and perform its obligations under, or as contemplated under, the Underwriting Agreement.

(ii) Each Significant Subsidiary has been duly incorporated or organized and is validly existing as a corporation or limited liability company in good standing under the laws of the jurisdiction of its incorporation or organization, has the requisite power and authority to own, lease and operate its properties and to conduct its business as described in the Registration Statement, the General Disclosure Package and the Prospectus.

(iii) To the best of my knowledge, the Company and each Significant Subsidiary is duly qualified as a foreign corporation or limited liability company to transact business and is in good standing in each jurisdiction in which such qualification is required, whether by reason of the ownership or leasing of property or the conduct of business, except where the failure to so qualify and be in good standing would not have a material adverse effect on the financial condition, business or properties of the Company and its Subsidiaries considered as one enterprise.

(iv) The authorized, issued and outstanding shares of capital stock of the Company is as set forth in the Company's Annual Report on Form 10-K for the year ended December 31, 2015 and subsequent Quarterly Report on Form 10-Q for the quarter ended September 30, 2016 (except for subsequent issuances thereof, if any, pursuant to reservations, agreements or employee benefit plans referred to in the Registration Statement, the General Disclosure Package and the Prospectus or pursuant to the exercise of convertible securities or options referred to in the Registration Statement, the General Disclosure Package and the Prospectus). Such shares of capital stock have been duly authorized and validly issued by the Company and are fully paid and non-assessable, and none of such shares of capital stock were issued in violation of preemptive or other similar rights of any security holder of the Company.

(v) All of the shares of capital stock or other equity interests of each Significant Subsidiary have been duly and validly authorized and issued, are fully paid and non-assessable (except in the case of a limited liability company), and are owned directly by the Company or another Subsidiary, as the case may be, free and clear

Past financial performance is no guarantee of future results.

of all liens, encumbrances, equities or claims. None of the outstanding shares of capital stock or other equity interests of any Significant Subsidiary were issued in violation of preemptive or other similar rights of any security holder of such Significant Subsidiary.

(vi) The Underwriting Agreement has been duly authorized, executed and delivered by the Company.

(vii) The Indenture has been duly authorized, executed and delivered by the Company and (assuming the Indenture has been duly authorized, executed and delivered by the Trustee) constitutes a valid and legally binding agreement of the Company, enforceable against each of them in accordance with its terms, subject to applicable bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and similar laws affecting creditors' rights and remedies generally, and subject, as to enforceability, to general principles of equity, including principles of commercial reasonableness, good faith and fair dealing (regardless of whether enforcement is sought in a proceeding at law or in equity).

(viii) The Securities have been duly authorized and executed by the Company pursuant to the Underwriting Agreement and, when delivered pursuant to the provisions of the Underwriting Agreement and the Indenture against the requisite payment therefor (assuming the due authentication thereof by the Trustee), will constitute valid and legally binding obligations of the Company enforceable against the Company in accordance with their terms, subject to applicable bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and similar laws affecting creditors' rights and remedies generally, and subject, as to enforceability, to general principles of equity, including principles of commercial reasonableness, good faith and fair dealing (regardless of whether enforcement is sought in a proceeding at law or in equity). The registered holders of the Securities will be entitled to the benefit of the Indenture.

(ix) The statements in (i) the Registration Statement, the General Disclosure Package and the Prospectus under the captions "Description of the Senior Notes" and "Description of the Senior and Subordinated Debt Securities," (ii) the Company's Annual Report on Form 10-K for the year ended December 31, 2015, under the captions (A) Part I, Item 1. Business – Regulatory Issues, (B) Part I, Item 1. Business – Environmental Matters, and (C) Part I, Item 3. Legal Proceedings and (iii) the Company's Quarterly Report on Form 10-Q for the quarter ended September 30, 2016 under the caption Part II, Item 1. Legal Proceedings and Part II, Item 5. Other Information, in each case including the information incorporated by reference in such section and insofar as such statements constitute summaries of the legal matters, documents or proceedings referred to therein, fairly summarize the matters referred to therein in all material respects.

(x) The Indenture has been duly qualified under the Trust Indenture Act of 1939, as amended, and the regulations thereunder (the "1939 Act").

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(xi) The Registration Statement is effective under the 1933 Act and, to the best of my knowledge, no stop order suspending the effectiveness of the Registration Statement or the use of any prospectus relating to the Securities has been issued under the 1933 Act or proceedings therefor initiated or threatened by the SEC or any other governmental agency or authority.

(xii) The Registration Statement (except for the financial statements and the related notes thereto, the financial statement schedules or the financial or accounting data incorporated by reference therein or Exhibits 25-1 and 25-2 thereto, as to which I express no opinion), as of its most recent effective date pursuant to Rule 430B(f)(2), and the Prospectus (except for the financial statements and the related notes thereto, the financial statement schedules or the financial or accounting data incorporated by reference therein, as to which I express no opinion), as of November 3, 2016, appeared on their face to be appropriately responsive, in all material respects relevant to the offering of the Securities, to the applicable requirements of the 1933 Act;

(xiii) Each document filed pursuant to the Securities Exchange Act of 1934 and the regulations thereunder (the "1934 Act") and incorporated by reference in the Registration Statement, the General Disclosure Package and the Prospectus appeared on its face, at the time it was filed, to be appropriately responsive in all material respects with the applicable requirements of the 1934 Act.

(xiv) To the best of my knowledge, none of the Company nor any Significant Subsidiary is in violation of its certificate of incorporation or by-laws or other organizational documents, or in default in the performance or observance of any obligation, agreement, covenant or condition contained in any material contract, indenture, mortgage, loan agreement, note or lease to which it is a party or by which it or any its properties may be bound.

(xv) The execution and delivery of the Underwriting Agreement, the Indenture and the Securities, and the consummation by the Company of the transactions contemplated thereby, will not conflict with, violate or constitute a breach of, or default under, or, except as contemplated thereby, result in the creation or imposition of: (A) any lien, charge or encumbrance upon any property or assets of the Company or any Significant Subsidiary pursuant to, any contract, indenture, mortgage, loan agreement, note, lease or other instrument known to me and to which the Company or any Significant Subsidiary is a party or by which it may be bound or to which any of the property or assets of the Company or any Significant Subsidiary is subject; (B) any law, administrative regulation or administrative or court decree known to me to be applicable to the Company or any Significant Subsidiary of any court or governmental agency, authority or body or any arbitrator having jurisdiction over the Company or any Significant Subsidiary (other than federal and state securities or blue sky laws, as to which I express no opinion in this paragraph), or (C) the

certificate of incorporation or by-laws or other organizational documents of the Company or any Significant Subsidiary.

(xvi) No consent, approval, waiver, license or authorization or other action by or filing with any New York, New Jersey or federal governmental authority is required in connection with the execution and delivery by the Company of the Underwriting Agreement, the Indenture and the Securities, the consummation by the Company of the transactions contemplated thereby or the performance by the Company of its obligations thereunder, except for filings and other actions required pursuant to the 1933 Act and/or the 1934 Act and the rules and regulations thereunder and federal and state securities or blue sky laws, as to which I express no opinion in this paragraph.

(xvii) To the best of my knowledge, except as disclosed in the Registration Statement, the General Disclosure Package and the Prospectus, there is not pending or threatened any action, suit, proceeding, inquiry or investigation to which the Company or any Subsidiary is a party or to which the assets, properties or operations of the Company or any Subsidiary is subject, before or by any court or governmental agency or body, domestic or foreign, which might reasonably be expected to result in a Material Adverse Change or which might reasonably be expected to materially and adversely affect the assets, properties or operations thereof or the consummation of the transactions contemplated under the Underwriting Agreement, the Securities or the Indenture or the performance by the Company of its obligations thereunder.

(xviii) The Company is not, and immediately after giving effect to the sale of the Securities and the application of the proceeds thereof as described in the Prospectus will not be, an "investment company" under the Investment Company Act of 1940, as amended.

(xix) The Securities, upon issuance, will be excluded or exempted under, or beyond the purview of, the Commodity Exchange Act and the Commodity Exchange Act Regulations.

I have generally reviewed the Registration Statement, the General Disclosure Package and the Prospectus and discussed the information therein with certain officers and employees of the Company, but without independent check or verification except as indicated above, and no facts have come to my attention that would lead me to believe that:

(1) the Registration Statement, at the time it originally became effective under the 1933 Act or as of each "new effective date" with respect to the Securities and the Underwriters pursuant to, and within the meaning of, Rule 430B(f)(2) under the 1933 Act, contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary to make the statements therein not misleading;

(2) the General Disclosure Package, as of 4:35 p.m. (Eastern Time) on November 3, 2016, contained an untrue statement of a material fact or omitted to state a

UNLESS THIS CERTIFICATE IS PRESENTED BY AN AUTHORIZED REPRESENTATIVE OF THE DEPOSITORY TRUST COMPANY (55 WATER STREET, NEW YORK, NEW YORK) (THE "DEPOSITORY") TO PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED OR ITS AGENT FOR REGISTRATION OF TRANSFER, EXCHANGE OR PAYMENT, AND SUCH CERTIFICATE ISSUED IS REGISTERED IN THE NAME OF CEDE & CO., OR SUCH OTHER NAME AS REQUESTED BY AN AUTHORIZED REPRESENTATIVE OF THE DEPOSITORY, ANY TRANSFER, PLEDGE OR OTHER USE HEREOF FOR VALUE OR OTHERWISE BY OR TO ANY PERSON IS WRONGFUL, SINCE THE REGISTERED OWNER HEREOF, CEDE & CO., HAS AN INTEREST HEREIN.

UNLESS AND UNTIL THIS CERTIFICATE IS EXCHANGED IN WHOLE OR IN PART FOR NOTES IN CERTIFICATED FORM, THIS CERTIFICATE MAY NOT BE TRANSFERRED EXCEPT AS A WHOLE BY THE DEPOSITORY TO A NOMINEE THEREOF OR BY A NOMINEE THEREOF TO THE DEPOSITORY OR ANOTHER NOMINEE OF THE DEPOSITORY OR BY THE DEPOSITORY OR ANY SUCH NOMINEE TO A SUCCESSOR OF THE DEPOSITORY OR A NOMINEE OF SUCH SUCCESSOR.

CUSIP NO. 744573 AJ5 $400,000,000

No. R-01

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED
1.600% Senior Note due 2019

GLOBAL NOTE

PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED, a New Jersey corporation (herein referred to as the "Company," which term includes any successor corporation under the Indenture hereinafter referred to), for value received, hereby promises to pay to Cede & Co., or registered assigns, the principal sum of $400,000,000 on November 15, 2019 (the "Stated Maturity Date"), unless redeemed in accordance with the provisions of this Global Note, and to pay interest on the outstanding principal amount of this Global Note from November 8, 2016, semi-annually in arrears on May 15 and November 15 of each year, beginning on May 15, 2017 (each, an "Interest Payment Date") at 1.600% per annum until the principal hereof is paid or duly provided for. Interest payable on each Interest Payment Date will include interest accrued from and including November 8, 2016 or from and including the most recent Interest Payment Date to which interest has been paid or duly provided for, as the case may be, to, but excluding, such Interest Payment Date. Interest will be computed based on a 360-day year consisting of twelve 30-day months.

The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date will, except as provided below, be paid to the person (the "Holder") in whose name this Global Note (or one or more Predecessor Securities) is registered at the close of business on the fifteenth day (whether or not a Business Day (as defined below)) immediately preceding the applicable Interest Payment Date (a "Regular Record Date"). Any such interest not so punctually paid or duly provided for ("Defaulted Interest") will forthwith cease to be payable to the Holder on such Regular Record Date and may either be paid to the person in whose name this Global Note (or one or more Predecessor Securities) is registered at the close of business on a special record date (the "Special Record Date") for the payment of such Defaulted Interest to be fixed by the Trustee hereinafter referred to, notice whereof shall be

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

given to the Holder of this Global Note not less than ten days prior to such Special Record Date, or may be paid at any time in any other lawful manner, all as more fully provided in the Indenture.

For purposes of this Global Note, "Business Day" means each Monday, Tuesday, Wednesday, Thursday and Friday which is not a day on which banking institutions in Newark, New Jersey and The City of New York are authorized or obligated by law or executive order to close.

Payments of principal, premium, if any, and interest with respect to this Global Note will be made in such coin or currency of the United States of America as at the time of payment is legal tender for the payment of public and private debts. Payment of the principal of and any premium on this Global Note on the Stated Maturity Date or date of earlier redemption will be made in immediately available funds against presentation of this Global Note at the office or agency of the Company maintained for that purpose in the Borough of Manhattan, The City of New York. Payments of interest on an Interest Payment Date will be made, at the option of the Company, by check mailed to the Holder entitled thereto at the applicable address appearing in the Security Register or by transfer of immediately available funds to an account maintained by the payee with a bank located in the United States of America; provided, however, that so long as Cede & Co. is the Holder of this Global Note, payments of interest on an Interest Payment Date will be made in immediately available funds.

Any payment of principal, premium or interest required to be made with respect to this Global Note on a day that is not a Business Day need not be made on such day, but may be made on the next succeeding Business Day with the same force and effect as if made on such day and no additional interest shall be payable on the next succeeding Business Day as a result of such delayed payment.

General. This Global Note is one of the duly authorized series of securities of the Company (the "Securities"), issued or to be issued under the Indenture, dated as of November 1, 1998 (together with all amendments and supplements thereto, the "Indenture"), between the Company and U.S. Bank National Association, as successor trustee (the "Trustee"), to which Indenture reference is hereby made for a statement of the respective rights, limitations of rights, duties and immunities thereunder of the Company, the Trustee and each of the Holders of the Securities and of the terms upon which the Securities are, and are to be, authenticated and delivered and transferred. This Global Note is one of the duly authorized series of Securities designated as the “1.600% Senior Notes due 2019” (collectively, the “Notes”). The Notes will be limited to $400,000,000 aggregate principal amount, except as permitted in the Indenture, and will be subject, without the consent of the Holders of any series of Securities under the Indenture, to the issuance of additional Notes in the future having the same terms, other than the date of original issuance and the date on which interest begins to accrue, so as to form one series with the Notes. All terms used in this Global Note, which are not defined herein shall have the meanings given to them in the Indenture.

Events of Default. If an Event of Default with respect to the Notes shall have occurred and be continuing, the principal of the Notes may be declared due and payable in the manner and with the effect provided in the Indenture.

As used in this Global Note and the Indenture, the term “Event of Default” wherever used with respect to the Notes means any one of the events described under Article Five, Section 501 of the Indenture or the following event:

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

an event of default shall have occurred and be continuing with respect to indebtedness for borrowed money of the Company in excess of $75,000,000 and such event of default shall have been accelerated, and such acceleration shall not be rescinded or annulled within ten days after written notice thereof shall have been given to the Company by the Trustee or to the Company and the Trustee by the Holders of at least 25% in aggregate principal amount of the Notes then Outstanding; *provided*, *however*, that if such event of default with respect to such other indebtedness shall be remedied or cured by the Company, or waived by the holders of such other indebtedness, then the Event of Default hereunder by reason thereof shall be deemed likewise to have been thereupon remedied, cured or waived without further action upon the part of either the Trustee or any of the Holders of the Notes; and *provided, further*, that, subject to the provisions of Section 601 of the Indenture, the Trustee shall not be charged with knowledge of any such event of default or any remedy, cure or waiver thereof or any such acceleration unless written notice thereof shall have been given to the Trustee by the Company, by a holder or an agent of such other indebtedness or by the Trustee then acting under this Indenture with respect to such other series of Securities or under any other indenture or instrument, as the case may be, under which such event of default shall have occurred, or by the Holders of at least twenty-five percent in aggregate principal amount of the Notes at the time Outstanding;

in each case whatever the reason for such Event of Default and whether or not it shall be voluntary or involuntary or be effected by operation of law or pursuant to any judgment, decree or order of any court or any order, rule or regulation of any administrative or governmental body.

Sinking Fund. This Global Note will not be entitled to the benefit of, or be subject to, any sinking fund.

Optional Redemption. This Global Note (or portion hereof) will be redeemable at the option of the Company, in whole or in part at any time prior to the Stated Maturity Date, on at least 10 days but not more than 60 days prior written notice mailed to the Holder hereof, at a price (the "Make-Whole Redemption Price") equal to the greater of (i) 100% of the principal amount of this Global Note (or portion hereof) to be redeemed, and (ii) the sum of the present values of the remaining scheduled payments of principal of and interest on this Global Note (or portion hereof) to be redeemed, exclusive of accrued interest to the date of redemption (each, a “Make-Whole Redemption Date”), discounted to such Make-Whole Redemption Date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate (as defined below) plus 15 basis points, plus, in either case, any accrued and unpaid interest thereon to, but excluding, such Make-Whole Redemption Date.

If money sufficient to pay the Make-Whole Redemption Price of this Global Note (or portion hereof) to be redeemed on a Make-Whole Redemption Date is deposited with the Trustee or a Paying Agent on or before such Make-Whole Redemption Date and certain other conditions are satisfied, then on and after such Make-Whole Redemption Date, interest will cease to accrue on this Global Note (or such portion hereof) called for redemption.

For purposes of the foregoing, the following definitions apply:

"Comparable Treasury Issue" means, with respect to any Make-Whole Redemption Date for this Global Note (or portion hereof) to be redeemed, the United States Treasury security selected by the Independent Investment Banker (as defined below) as having the maturity

Source: PUBLIC SERVICE ENTERPRISE GROUP INC, 8-K, November 08, 2016 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

comparable to the remaining term of this Global Note (or portion hereof) to be redeemed that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of this Global Note (or portion hereof) to be redeemed.

"Comparable Treasury Price" means, with respect to any Make-Whole Redemption Date for this Global Note (or portion hereof) to be redeemed, (a) the average of three Reference Treasury Dealer Quotations (as defined below) for the Make-Whole Redemption Date for this Global Note (or portion hereof) to be redeemed, after excluding the highest and lowest of five Reference Treasury Dealer Quotations, or, (b) if the Independent Investment Banker obtains fewer than five Reference Treasury Dealer Quotations, the average of all Reference Treasury Dealer Quotations obtained.

"Independent Investment Banker" means one of the Reference Treasury Dealers appointed by the Company after consultation with the Trustee.

"Reference Treasury Dealer" means each of Barclays Capital Inc., J.P. Morgan Securities LLC, RBC Capital Markets, LLC, Scotia Capital (USA) Inc. and Wells Fargo Securities, LLC, and their respective affiliates or successors, *provided* that if any of the foregoing shall cease to be a primary U.S. government securities dealer in the United States (a “Primary Treasury Dealer”), the Company will substitute therefor another Primary Treasury Dealer.

"Reference Treasury Dealer Quotations" means, with respect to each Reference Treasury Dealer and any Make-Whole Redemption Date, the average, as determined by the Independent Investment Banker, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Independent Investment Banker by such Reference Treasury Dealer at 5:00 p.m., New York City time, on the third Business Day preceding such Make-Whole Redemption Date.

"Treasury Rate" means, with respect to any Make-Whole Redemption Date, the rate per annum equal to the semi-annual equivalent yield to maturity of the Comparable Treasury Issue, assuming a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such Make-Whole Redemption Date. The Treasury Rate will be calculated by the Company on the third Business Day preceding the Make-Whole Redemption Date. The Trustee shall not be responsible for any such calculation.

Reports. So long as this Global Note remains Outstanding, the Company will file with the Trustee, within 30 days of filing them with the Securities and Exchange Commission (the "SEC"), copies of the current, quarterly and annual reports and of the information, documents and other reports (or copies of such portions of any of the foregoing as the SEC may by rules and regulations prescribe) that the Company is required to file with the SEC pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934 (the “Exchange Act”). If the Company is not subject to the requirements of Section 13 or Section 15(d) of the Exchange Act and this Global Note remains Outstanding, the Company must nevertheless file with the SEC (if permitted) and the Trustee, on the date upon which the Company would have been required to file with the SEC, current, quarterly and annual financial statements, including any notes thereto (and with respect to annual reports, an auditor's report by a firm of established national reputation, upon which the Trustee may conclusively rely), and a "Management's Discussion and Analysis of Financial Condition and Results of Operations," both comparable to that which the Company would have been required to include in such current, quarterly and annual reports,

information, documents or other reports on Forms 8-K, 10-Q and 10-K if the Company was subject to the requirements of Section 13 or 15(d) of the Exchange Act; provided that the Company will not be required to register under the Exchange Act by virtue of this provision, if not otherwise required to do so.

Modification and Waivers; Obligations of the Company Absolute. The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Securities of each series. Such amendment may be effected under the Indenture at any time by the Company and the Trustee with the consent of the Holders of a majority in aggregate principal amount of all Securities issued under the Indenture at the time Outstanding and affected thereby. The Indenture also contains provisions permitting the Holders of a majority in aggregate principal amount of the Securities of each series at the time Outstanding, on behalf of the Holders of all Outstanding Securities of such series, to waive compliance by the Company with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences. Any such consent or waiver shall be conclusive and binding upon the Holder of this Global Note and upon all future Holders of this Global Note and of any Note issued upon the registration of transfer hereof or in exchange hereof or in lieu hereof, whether or not notation of such consent or waiver is made upon this Note.

No reference herein to the Indenture and no provision of this Global Note or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal, premium, if any, and interest with respect to this Global Note at the times, place and rate, and in the coin or currency herein prescribed.

Defeasance. The Indenture contains provisions for defeasance at any time of the entire indebtedness of the Company on this Global Note, upon compliance by the Company with certain conditions set forth in the Indenture, which provisions apply to this Global Note.

Authorized Denominations. The Notes are issuable only in registered form without coupons in minimum denominations of $2,000 and integral multiples of $1,000 in excess thereof.

Registration of Transfer or Exchange of this Global Note. As provided in the Indenture and subject to certain limitations herein and therein set forth, the transfer of this Global Note is registrable in the Security Register upon surrender of this Global Note for registration of transfer at the office or agency of the Company in any place where the principal of (and premium, if any) and interest on this Global Note are payable, duly endorsed by, or accompanied by a written instrument of transfer in form satisfactory to the Company and the Security Registrar duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Global Notes of this series of like tenor, of authorized denominations and for the same aggregate principal amount, will be issued to the designated transferee or transferees.

As provided in the Indenture and subject to certain limitations herein and therein set forth, the Global Notes are exchangeable for a like aggregate principal amount of Global Notes of different authorized denominations, as requested by the Holders surrendering the same.

This Global Note is a “Security in global form” within the meaning of the Indenture. If The Depository Trust Company is at any time unwilling, unable or ineligible to continue as depository and a successor depository is not appointed by the Company within 90 days or an Event of

Default under the Indenture has occurred and is continuing, the Company will issue Notes in certificated form in exchange for this Global Note. In addition, the Company may at any time determine not to have Notes represented by one or more Securities in global form and, in such event, will issue Notes in certificated form in exchange in whole for this Global Note. In any such instance, an owner of a beneficial interest in this Global Note will receive Notes in certificated form equal in principal amount to such beneficial interest and to have such Notes registered in its name. Notes so issued in certificated form will be issued in denominations of $2,000 and integral multiples of $1,000 in excess thereof and will be issued in registered form only, without coupons.

No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

Prior to due presentment of this Global Note for registration of transfer, the Company, the Trustee and any agent of the Company or the Trustee may treat the Holder of this Global Note as the owner hereof for all purposes, whether or not this Global Note be overdue, and neither the Company, the Trustee nor any such agent shall be affected by notice to the contrary.

Governing Law. This Global Note shall be governed by and construed in accordance with the law of the State of New Jersey.

Unless the certificate of authentication hereon has been executed by the Trustee by manual signature, this Global Note shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

given to the Holder of this Global Note not less than ten days prior to such Special Record Date, or may be paid at any time in any other lawful manner, all as more fully provided in the Indenture.

For purposes of this Global Note, "Business Day" means each Monday, Tuesday, Wednesday, Thursday and Friday which is not a day on which banking institutions in Newark, New Jersey and The City of New York are authorized or obligated by law or executive order to close.

Payments of principal, premium, if any, and interest with respect to this Global Note will be made in such coin or currency of the United States of America as at the time of payment is legal tender for the payment of public and private debts. Payment of the principal of and any premium on this Global Note on the Stated Maturity Date or date of earlier redemption will be made in immediately available funds against presentation of this Global Note at the office or agency of the Company maintained for that purpose in the Borough of Manhattan, The City of New York. Payments of interest on an Interest Payment Date will be made, at the option of the Company, by check mailed to the Holder entitled thereto at the applicable address appearing in the Security Register or by transfer of immediately available funds to an account maintained by the payee with a bank located in the United States of America; provided, however, that so long as Cede & Co. is the Holder of this Global Note, payments of interest on an Interest Payment Date will be made in immediately available funds.

Any payment of principal, premium or interest required to be made with respect to this Global Note on a day that is not a Business Day need not be made on such day, but may be made on the next succeeding Business Day with the same force and effect as if made on such day and no additional interest shall be payable on the next succeeding Business Day as a result of such delayed payment.

General. This Global Note is one of the duly authorized series of securities of the Company (the "Securities"), issued or to be issued under the Indenture, dated as of November 1, 1998 (together with all amendments and supplements thereto, the "Indenture"), between the Company and U.S. Bank National Association, as successor trustee (the "Trustee"), to which Indenture reference is hereby made for a statement of the respective rights, limitations of rights, duties and immunities thereunder of the Company, the Trustee and each of the Holders of the Securities and of the terms upon which the Securities are, and are to be, authenticated and delivered and transferred. This Global Note is one of the duly authorized series of Securities designated as the “2.000% Senior Notes due 2021” (collectively, the “Notes”). The Notes will be limited to $300,000,000 aggregate principal amount, except as permitted in the Indenture, and will be subject, without the consent of the Holders of any series of Securities under the Indenture, to the issuance of additional Notes in the future having the same terms, other than the date of original issuance and the date on which interest begins to accrue, so as to form one series with the Notes. All terms used in this Global Note, which are not defined herein shall have the meanings given to them in the Indenture.

Events of Default. If an Event of Default with respect to the Notes shall have occurred and be continuing, the principal of the Notes may be declared due and payable in the manner and with the effect provided in the Indenture.

As used in this Global Note and the Indenture, the term “Event of Default” wherever used with respect to the Notes means any one of the events described under Article Five, Section 501 of the Indenture or the following event:

Past financial performance is no guarantee of future results.

conditions are satisfied, then on and after such Make-Whole Redemption Date, interest will cease to accrue on this Global Note (or such portion hereof) called for redemption.

If money sufficient to pay the Par Redemption Price of this Global Note (or portion hereof) to be redeemed on a Par Redemption Date is deposited with the Trustee or a Paying Agent on or before such Par Redemption Date and certain other conditions are satisfied, then on and after such Par Redemption Date, interest will cease to accrue on this Global Note (or such portion hereof) called for redemption.

For purposes of the foregoing, the following definitions apply:

"Comparable Treasury Issue" means, with respect to any Make-Whole Redemption Date for this Global Note (or portion hereof) to be redeemed, the United States Treasury security selected by the Independent Investment Banker (as defined below) as having the maturity comparable to the remaining term of this Global Note (or portion hereof) to be redeemed (assuming that this Global Note matured on October 15, 2021) that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of this Global Note (or portion hereof) to be redeemed.

"Comparable Treasury Price" means, with respect to any Make-Whole Redemption Date for this Global Note (or portion hereof) to be redeemed, (a) the average of three Reference Treasury Dealer Quotations (as defined below) for the Make-Whole Redemption Date for this Global Note (or portion hereof) to be redeemed, after excluding the highest and lowest of five Reference Treasury Dealer Quotations, or, (b) if the Independent Investment Banker obtains fewer than five Reference Treasury Dealer Quotations, the average of all Reference Treasury Dealer Quotations obtained.

"Independent Investment Banker" means one of the Reference Treasury Dealers appointed by the Company after consultation with the Trustee.

"Reference Treasury Dealer" means each of Barclays Capital Inc., J.P. Morgan Securities LLC, RBC Capital Markets, LLC, Scotia Capital (USA) Inc. and Wells Fargo Securities, LLC, and their respective affiliates or successors, *provided* that if any of the foregoing shall cease to be a primary U.S. government securities dealer in the United States (a “Primary Treasury Dealer”), the Company will substitute therefor another Primary Treasury Dealer.

"Reference Treasury Dealer Quotations" means, with respect to each Reference Treasury Dealer and any Make-Whole Redemption Date, the average, as determined by the Independent Investment Banker, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Independent Investment Banker by such Reference Treasury Dealer at 5:00 p.m., New York City time, on the third Business Day preceding such Make-Whole Redemption Date.

"Treasury Rate" means, with respect to any Make-Whole Redemption Date, the rate per annum equal to the semi-annual equivalent yield to maturity of the Comparable Treasury Issue, assuming a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such Make-Whole Redemption Date. The Treasury Rate will be calculated by the Company on the third Business Day preceding the Make-Whole Redemption Date. The Trustee shall not be responsible for any such calculation.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Reports. So long as this Global Note remains Outstanding, the Company will file with the Trustee, within 30 days of filing them with the Securities and Exchange Commission (the "SEC"), copies of the current, quarterly and annual reports and of the information, documents and other reports (or copies of such portions of any of the foregoing as the SEC may by rules and regulations prescribe) that the Company is required to file with the SEC pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934 (the “Exchange Act”). If the Company is not subject to the requirements of Section 13 or Section 15(d) of the Exchange Act and this Global Note remains Outstanding, the Company must nevertheless file with the SEC (if permitted) and the Trustee, on the date upon which the Company would have been required to file with the SEC, current, quarterly and annual financial statements, including any notes thereto (and with respect to annual reports, an auditor's report by a firm of established national reputation, upon which the Trustee may conclusively rely), and a "Management's Discussion and Analysis of Financial Condition and Results of Operations," both comparable to that which the Company would have been required to include in such current, quarterly and annual reports, information, documents or other reports on Forms 8-K, 10-Q and 10-K if the Company was subject to the requirements of Section 13 or 15(d) of the Exchange Act; provided that the Company will not be required to register under the Exchange Act by virtue of this provision, if not otherwise required to do so.

Modification and Waivers; Obligations of the Company Absolute. The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Securities of each series. Such amendment may be effected under the Indenture at any time by the Company and the Trustee with the consent of the Holders of a majority in aggregate principal amount of all Securities issued under the Indenture at the time Outstanding and affected thereby. The Indenture also contains provisions permitting the Holders of a majority in aggregate principal amount of the Securities of each series at the time Outstanding, on behalf of the Holders of all Outstanding Securities of such series, to waive compliance by the Company with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences. Any such consent or waiver shall be conclusive and binding upon the Holder of this Global Note and upon all future Holders of this Global Note and of any Note issued upon the registration of transfer hereof or in exchange hereof or in lieu hereof, whether or not notation of such consent or waiver is made upon this Note.

No reference herein to the Indenture and no provision of this Global Note or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal, premium, if any, and interest with respect to this Global Note at the times, place and rate, and in the coin or currency herein prescribed.

Defeasance. The Indenture contains provisions for defeasance at any time of the entire indebtedness of the Company on this Global Note, upon compliance by the Company with certain conditions set forth in the Indenture, which provisions apply to this Global Note.

Authorized Denominations. The Notes are issuable only in registered form without coupons in minimum denominations of $2,000 and integral multiples of $1,000 in excess thereof.

Registration of Transfer or Exchange of this Global Note. As provided in the Indenture and subject to certain limitations herein and therein set forth, the transfer of this Global Note is registrable in the Security Register upon surrender of this Global Note for

registration of transfer at the office or agency of the Company in any place where the principal of (and premium, if any) and interest on this Global Note are payable, duly endorsed by, or accompanied by a written instrument of transfer in form satisfactory to the Company and the Security Registrar duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Global Notes of this series of like tenor, of authorized denominations and for the same aggregate principal amount, will be issued to the designated transferee or transferees.

As provided in the Indenture and subject to certain limitations herein and therein set forth, the Global Notes are exchangeable for a like aggregate principal amount of Global Notes of different authorized denominations, as requested by the Holders surrendering the same.

This Global Note is a "Security in global form" within the meaning of the Indenture. If The Depository Trust Company is at any time unwilling, unable or ineligible to continue as depository and a successor depository is not appointed by the Company within 90 days or an Event of Default under the Indenture has occurred and is continuing, the Company will issue Notes in certificated form in exchange for this Global Note. In addition, the Company may at any time determine not to have Notes represented by one or more Securities in global form and, in such event, will issue Notes in certificated form in exchange in whole for this Global Note. In any such instance, an owner of a beneficial interest in this Global Note will receive Notes in certificated form equal in principal amount to such beneficial interest and to have such Notes registered in its name. Notes so issued in certificated form will be issued in denominations of $2,000 and integral multiples of $1,000 in excess thereof and will be issued in registered form only, without coupons.

No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

Prior to due presentment of this Global Note for registration of transfer, the Company, the Trustee and any agent of the Company or the Trustee may treat the Holder of this Global Note as the owner hereof for all purposes, whether or not this Global Note be overdue, and neither the Company, the Trustee nor any such agent shall be affected by notice to the contrary.

Governing Law. This Global Note shall be governed by and construed in accordance with the law of the State of New Jersey.

Unless the certificate of authentication hereon has been executed by the Trustee by manual signature, this Global Note shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

Re: Public Service Enterprise Group Incorporated
Registration Statement on Form S-3 (No. 333-200352)

Ladies and Gentlemen:

This opinion is furnished in connection with the issuance and sale by Public Service Enterprise Group Incorporated (the "Company") of $400,000,000 aggregate principal amount of its 1.600% Senior Notes due 2019 and $300,000,000 aggregate principal amount of its 2.000% Senior Notes due 2021 (collectively, the "Notes") pursuant to (i) the Company's Registration Statement on Form S-3, Registration No. 333-200352 (the "Registration Statement"); (ii) the base prospectus constituting a part of the Registration Statement, dated November 18, 2014 (the "Base Prospectus"), relating to the offering from time to time of certain debt securities of the Company, among other securities, pursuant to Rule 415 promulgated under the Securities Act of 1933, as amended (the "Act"); and (iii) the prospectus supplement, dated November 3, 2016 (the "Prospectus Supplement" and together with the Base Prospectus, the "Prospectus"). The Notes were issued under the Indenture, dated as of November 1, 1998 (as amended and supplemented to the date hereof, the "Indenture"), between the Company and U.S. Bank National Association, as trustee (the "Trustee").

I have examined the Registration Statement, the Prospectus, the Indenture, the global certificates representing the Notes and such other agreements, instruments, documents and records and such certificates or comparable documents of public officials which I deemed relevant and necessary for the basis of the opinion hereinafter expressed. In such examination, I have assumed the following: (a) the authenticity of original documents and the genuineness of all signatures; (b) the conformity to the originals of all documents submitted to me as copies; and (c) the truth, accuracy, and completeness of the information, representations, and warranties contained in the records, documents, instruments, and certificates I have reviewed.

Based on such examination, I am of the opinion that the Notes, assuming the due authentication thereof by the Trustee pursuant to the Indenture, constitute valid and binding obligations of the Company, enforceable against the Company in accordance

with their terms, subject to applicable bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and similar laws affecting creditors' rights and remedies generally and to general principles of equity, including principles of commercial reasonableness, good faith and fair dealing (regardless of whether enforcement is sought in a proceeding at law or in equity).

The foregoing opinion is given as of the date hereof and is limited to matters arising under laws of the State of New Jersey as in effect on the date hereof and I express no opinion as to the effect on the matters covered by this letter of the laws of any other jurisdiction. I hereby consent to the incorporation by reference of this letter as an exhibit to the Registration Statement and to the use of my name wherever it appears in the Registration Statement. Item 5.02. Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers

On December 15, 2015, Public Service Enterprise Group Incorporated (PSEG) elected Mr. Willie A. Deese to its Board of Directors, effective February 16, 2016, for a term ending at the 2016 Annual Meeting of Stockholders. Mr. Deese has not been appointed to any committees at this time.

Mr. Deese has been Executive Vice President of Merck & Co. Inc. since January 2008 and has served as President of Merck Manufacturing Division since May 2005. He joined Merck & Co. in 2004 as Senior Vice President of Global Procurement.

Mr. Deese also serves as a Director of DENTSPLY International Inc., a dental equipment and supplies manufacturing company, and CDK Global, Inc., a provider of integrated technology solutions for automotive and heavy equipment dealerships.

Item 5.03. Amendment to Articles of Incorporation or Bylaws; Change in Fiscal Year

On December 15, 2015, the Board of Directors of PSEG approved, effective on that date, amendments to the By-Laws of PSEG to adopt a proxy access by-law that will allow PSEG to include in its proxy materials candidates nominated by a shareholder pursuant to certain conditions set forth within the By-Laws amended as of December 15, 2015.

PSEG ELECTS WILLIE A. DEESE TO BOARD OF DIRECTORS

Executive Vice President and President, Merck & Co. Manufacturing Division

(December 16, 2015 – Newark, NJ) – Public Service Enterprise Group (PSEG) today announced that Willie A. Deese has been elected to its Board of Directors, effective February 16, 2016.

Deese has been Executive Vice President of Merck & Co. Inc. since January 2008 and has served as President of Merck Manufacturing Division since May 2005. He oversees a network of over 55 manufacturing sites in more than 22 countries. Deese joined Merck & Co. in 2004 as Senior Vice President of Global Procurement.

"Willie's extensive experience in leading manufacturing and procurement operations will be a tremendous asset to our Board," said Ralph Izzo, PSEG's Chairman, President and Chief Executive Officer. "His skills, knowledge and counsel will be invaluable as we continue to focus on operational excellence and driving down costs in an increasingly competitive energy marketplace."

During his career, Deese has served in several leadership positions, including Senior Vice President and Director of Purchasing at SmithKline Beecham Pharmaceuticals in Philadelphia, Pennsylvania and Vice President of Purchasing at Kaiser Permanente in Oakland, California. He also led the integration of Glaxo and SmithKline procurement organizations during their merger and became Senior Vice President, Global Procurement and Logistics at GlaxoSmithKline.

He is Former Chairman of the North Carolina A&T State University Board of Trustees and has been named as one of the "100 Most Powerful Executives in Corporate America" by Black Enterprise Magazine.

Currently, Deese sits on the board of directors of DENSTPLY International Inc., a dental equipment and supplies manufacturing company, and CDK Global, Inc., a provider of integrated technology solutions for automotive and heavy equipment dealerships.

BY-LAWS
OF
PUBLIC SERVICE ENTERPRISE GROUP
INCORPORATED

ARTICLE I.

DIRECTORS.

SECTION 1. (a) Number, election and terms. Except as otherwise fixed by or pursuant to the provisions of Article 3 of the Certificate of Incorporation relating to the rights of the holders of any class or series of stock having a preference over the Common Stock as to dividends or upon liquidation to elect additional directors under specified circumstances, the number of the directors of the corporation shall be fixed from time to time by the Board of Directors but shall not be less than 3 nor more than 16. The directors, other than those who may be elected by the holders of any class or series of stock having a preference over the Common Stock as to dividends or upon liquidation, shall hold office for a term expiring at the next annual meeting of the stockholders of the corporation or until their respective successors are elected and qualified; provided, however, that directors elected to terms expiring at the 2010 annual meeting of stockholders shall continue to hold office until their respective successors are elected and qualified. As used in these By-Laws, the term "entire Board" means the total number of directors which the corporation would have if there were no vacancies.

(b) Stockholder nomination of director candidates. Advance notice of stockholder nominations for election of directors shall be given in the manner provided in Article IX, Section 9 of these By-Laws.

(c) Newly created directorships and vacancies. Except as otherwise provided for or fixed by or pursuant to the provisions of Article 3 of the Certificate of Incorporation relating to the rights of the holders of any class or series of stock having a preference over the Common Stock as to dividends or upon liquidation to elect directors under specified circumstances, newly created directorships resulting from any increase in the number of directors and any vacancies on the Board of Directors resulting from death, resignation, disqualification, removal or other cause shall be filled by the affirmative vote of a majority of the remaining directors then in office, even though less than a quorum of the Board of Directors. Any director elected in accordance with the preceding sentence shall hold office until the next succeeding annual meeting of stockholders and until such director's successor shall have been elected and qualified. No decrease in the number of directors constituting the Board of Directors shall shorten the term of any incumbent director.

(d) Removal and Suspension. Subject to the rights of any class or series of stock having a preference over the Common Stock as to dividends or upon liquidation to elect directors under specified circumstances, any director may be removed from office without cause only by the affirmative vote of the holders of 80% of the combined voting power of the then outstanding

shares of stock entitled to vote generally in the election of directors, voting together as a single class. The Board of Directors, by the affirmative vote of a majority of the directors in office, may remove a director or directors for cause where, in the judgment of such majority, the continuation of the director or directors in office would be harmful to the corporation and may suspend the director or directors for a reasonable period pending final determination that cause exists for such removal.

(e) Inclusion of stockholder director nominations in the corporation's proxy materials. The corporation shall include in its proxy statement for an annual meeting of stockholders the name, together with the Required Information (as defined below), of any person nominated for election ("Stockholder Nominee") in a timely notice, as set forth below, delivered by one or more stockholders who at the time of the request is delivered satisfy the ownership and other requirements of this Section 1(e) (such stockholder or stockholders, the "Eligible Stockholder"), and who expressly elect at the time of providing such written notice to have its nominee included in the corporation's proxy materials. To be timely, a stockholder's proxy access notice, which shall include the Required Information, must be delivered to and received by the Secretary no earlier than 150 days and no later than 120 days prior to the anniversary of the mailing date of the corporation's proxy statement in the prior year.

(1) For purposes of this Section 1(e), the "Required Information" that the corporation will include in its proxy statement is (i) information concerning the Stockholder Nominee and the Eligible Stockholder that, as determined by the corporation, is required to be disclosed in a proxy statement filed pursuant to the proxy rules of the Securities and Exchange Commission ("SEC"), (ii) if the Eligible Stockholder so elects, a Statement (as defined below), and (iii) any direct or indirect compensation and other monetary arrangement and understandings between the Stockholder Nominee and Eligible Stockholder related thereto. The corporation may in its sole discretion solicit against, and include in the proxy statement its own statement or other information relating to, any Eligible Stockholder and/or Stockholder Nominee, including any information provided to the corporation with respect to the foregoing.

(2) The number of Stockholder Nominees (including Stockholder Nominees that were submitted by an Eligible Stockholder for inclusion in the corporation's proxy materials pursuant to this Section 1(e) but either are subsequently withdrawn or that the Board of Directors decides to nominate) appearing in the corporation's proxy materials with respect to a meeting of stockholders shall not exceed 25% of the number of directors in office as of the last day on which notice of a nomination may be delivered pursuant to this Section 1(e), or if such amount is not a whole number, the closest whole number below 25%. In the event that the number of Stockholder Nominees submitted pursuant to this Section 1(e) exceeds this maximum number, each Eligible Stockholder shall select one Stockholder Nominee for inclusion in the corporation's proxy materials until the maximum number is reached, going in the order of the number (largest to smallest) of shares of the corporation's Common Stock that each Eligible Stockholder owns as disclosed in the written notice of the nomination submitted to the corporation. If the maximum number is not reached after each Eligible Stockholder has selected one Stockholder Nominee, this selection process shall continue as many times as necessary, following the same order each time, until the maximum number is reached.

(3) An Eligible Stockholder must have owned (as defined below) 3% or more of the corporation's outstanding Common Stock continuously for at least three years (the "Required Shares") as of both the date the written notice of the nomination is delivered to and received by the corporation in accordance with this Section 1(e) and the record date for determining stockholders entitled to vote at the meeting and must continue to own the Required Shares through the meeting date. For purposes of satisfying the foregoing ownership requirement, (i) the shares of Common Stock owned by one or more stockholders, or by the person or persons who own shares of the corporation's Common Stock and on whose behalf any stockholder is acting, may be aggregated, provided that the number of stockholders and other persons whose ownership of shares is aggregated for such purpose shall not exceed twenty, and (ii) a group of funds under common management and investment control shall be treated as one stockholder or person for this purpose. Within the time period specified in this Section 1(e) for providing notice of a nomination, an Eligible Stockholder must provide the following information in writing to the Secretary: (i) one or more written statements from the record holder of the shares (and from each intermediary through which the shares are or have been held during the requisite three-year holding period) verifying that, as of a date within seven calendar days prior to the date the written notice of the nomination is delivered to and received by the corporation, the Eligible Stockholder owns, and has owned continuously for the preceding three years, the Required Shares, and the Eligible Stockholder's agreement to provide, within five business days after the record date for the meeting, written statements from the record holder and intermediaries verifying the Eligible Stockholder's continuous ownership of the Required Shares through the record date, (ii) the written consent of each Stockholder Nominee to be named in the proxy statement as a nominee and to serve as a director if elected, and such consent shall include an affirmative representation that the Stockholder Nominee will comply with all of the corporation's policies and guidelines applicable to directors, including the confidentiality provision of the Standards of Integrity, which prohibits the disclosure of the corporation's confidential information, (iii) a copy of the Schedule 14N that has been filed with the SEC as required by Rule 14a-18 under the Securities Exchange Act of 1934, as may be amended ("Exchange Act"), (iv) a statement as to whether the Stockholder Nominee (a) is an officer or director of a public utility as defined in Section 305 of the Federal Power Act of 1935, as may be amended and (b) has any relationship, or any immediate family member has any relationship, with (x) the firm selected by the company to serve as its independent auditor and (y) the firm selected by the Board to serve as its independent compensation consultant, (v) a representation that the Eligible Stockholder (including each member of any group of stockholders that together is an Eligible Stockholder hereunder) (a) acquired the Required Shares in the ordinary course of business and not with the intent to change or influence control at the corporation, and does not presently have such intent, (b) has not nominated and will not nominate for election to the Board of Directors at the meeting any person other than the Stockholder Nominee(s) being nominated pursuant to this Section 1(e), (c) has not engaged and will not engage in, and has not and will not be, a "participant" in another person's "solicitation" within the meaning of Rule 14a-1(l) under

the Exchange Act in support of the election of any individual as a director at the meeting other than its Stockholder Nominee or a nominee nominated by the Board, (d) will not distribute to any stockholder any form of proxy for the meeting other than the form distributed by the corporation, (e) intends to continue to own the Required Shares through the date of the meeting, and (f) will provide facts, statements and other information in all communications with the corporation and its stockholders that are or will be true and correct in all material respects and do not and will not omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading, (vi) a description of the amount and terms of any direct or indirect compensation and other monetary arrangement and understandings between the Stockholder Nominee and Eligible Stockholder related to the proxy access nomination, (vii) an undertaking that the Eligible Stockholder agrees to (a) assume all liability stemming from any legal or regulatory violation arising out of the Eligible Stockholder's communications with the corporation's stockholders or out of the information that the Eligible Stockholder provided to the corporation, (b) indemnify and hold harmless the corporation and each of its directors, officers and employees individually against any liability, loss or damages in connection with any threatened or pending action, suit or proceeding, whether legal, administrative or investigative, against the corporation or any of its directors, officers or employees arising out of any nomination submitted by the Eligible Stockholder pursuant to this Section 1(e), and (c) comply with all other applicable laws, rules, regulations and listing standards with respect to any solicitation in connection with the meeting, and (viii) an undertaking that the Stockholder Nominee will complete a directors and officers questionnaire at the time such questionnaire is distributed to the nominees nominated by the Board and will provide such other information as may be reasonably requested by the Board in order to assess the compliance by the Stockholder Nominee with the requirements and conditions for inclusion of the Stockholder Nominee's name in its proxy materials. The inspector of elections shall not give effect to the Eligible Stockholder's votes with respect to the election of directors if the Eligible Stockholder does not comply with each of the representations noted above.

(4) For purposes of this Section 1(e), an Eligible Stockholder shall be deemed to "own" only those outstanding shares of the corporation's Common Stock as to which the stockholder possesses both (i) the full voting and investment rights pertaining to the shares and (ii) the full economic interest in (including the opportunity for profit and risk of loss on) such shares; provided that the number of shares calculated in accordance with clauses (i) and (ii) shall not include any shares (a) sold by such stockholder or any of its affiliates in any transaction that has not been settled or closed, (b) borrowed by such stockholder or any of its affiliates for any purposes or purchased by such stockholder or any of its affiliates pursuant to an agreement to resell or (c) subject to any option, warrant, forward contract, swap, contract of sale, other derivative or similar agreement entered into by such stockholder or any of its affiliates, whether any such instrument or agreement is to be settled with shares or with cash based on the notional amount or value of outstanding shares of the corporation's Common Stock, in any such case which instrument or agreement has, or is intended to have, the purpose or effect of (1) reducing in any manner, to any extent or at any time in the future, such stockholder's or affiliate's full right to vote or direct the voting of any such shares, and/or (2) hedging, offsetting or altering to

Past financial performance is no guarantee of future results.

any degree gain or loss arising from the full economic ownership of such shares by such stockholder or affiliate. A stockholder shall "own" shares held in the name of a nominee or other intermediary so long as the stockholder retains the right to instruct how the shares are voted with respect to the election of directors and possesses the full economic interest in the shares. A stockholder's ownership of shares that otherwise satisfies the requirements under this Section 1(e) shall be deemed to continue during any period in which the stockholder has (i) delegated any voting power by means of a proxy, power of attorney or other instrument or arrangement that is revocable at any time by the stockholder, (ii) loaned such shares, provided that such stockholder has the power to recall such loaned shares on three business days' notice; or (iii) delegated any voting power by means of a proxy, power of attorney or other instrument or arrangement that is revocable at any time by such stockholder. Whether outstanding shares of the corporation's Common Stock are "owned" for these purposes shall be determined by the Board of Directors, which determination shall be conclusive and binding on the corporation and its stockholders. For purposes of this Section 1(e), the term "affiliate" shall have the meaning ascribed thereto in the regulations promulgated under the Exchange Act.

(5) The Eligible Stockholder may provide to the Secretary, within the notice period specified above, a written statement for inclusion in the corporation's proxy statement for the meeting, not to exceed 500 words, in support of the Stockholder Nominee's candidacy (the "Statement"). Notwithstanding anything to the contrary contained in this Section 1(e), the corporation may omit from its proxy materials any information or Statement that it believes would violate any applicable law, rule, regulation or listing standard.

(6) The corporation shall not be required to include, pursuant to this Section 1(e), a Stockholder Nominee in its proxy materials (i) for any meeting for which the Secretary receives a notice that the Eligible Stockholder does not expressly elect at the time of providing the notice to have its nominee included in the corporation's proxy materials pursuant to this Section 1(e), (ii) if the Eligible Stockholder who has nominated such Stockholder Nominee has engaged in or is currently engaged in, or has been or is a "participant" in another person's, "solicitation" within the meaning of Rule 14a-1(l) under the Exchange Act in support of the election of any individual as a director at the meeting other than its Stockholder Nominee(s) or a nominee nominated by the Board, (iii) who is not independent under the independence standards for directors adopted by the Board, (iv) whose election as a member of the Board of Directors would cause the corporation to be in violation of these By-Laws, the corporation's certificate of incorporation, the listing standards of the principal exchange upon which the corporation's Common Stock is traded, or any applicable state or federal law, rule or regulation, (v) who is or has been, within the past three years, an officer or director of a competitor, as defined in Section 8 of the Clayton Antitrust Act of 1914, (vi) who is a named subject of a pending criminal proceeding (excluding traffic violations and other minor offenses) or has been convicted in such a criminal proceeding within the past ten years, (vii) who is subject to any order of the type specified in Rule 506(d) of Regulation D promulgated under the Securities Act of 1933, as amended, (viii) if such Stockholder Nominee or the applicable Eligible Stockholder shall have provided information to the corporation in respect to such nomination that was untrue in any

material respect or omitted to state a material fact necessary in order to make the statement made, in light of the circumstances under which they were made, not misleading, as determined by the Board of Directors, or (ix) if the Eligible Stockholder or applicable Stockholder Nominee otherwise contravenes any of the agreements or representations made by such Eligible Stockholder or Stockholder Nominee or fails to comply with its obligations pursuant to this Section 1(e).

(7) Notwithstanding anything to the contrary set forth herein, the Board of Directors or the person presiding at the meeting shall declare a nomination by an Eligible Stockholder to be invalid, and such nomination shall be disregarded notwithstanding that proxies in respect of such vote may have been received by the corporation, if (i) the Stockholder Nominee(s) and/or the applicable Eligible Stockholder shall have breached its or their obligations, agreements or representations under this Section 1(e), as determined by the Board of Directors or the person presiding at the meeting, or (ii) the Eligible Stockholder (or a qualified representative thereof) does not appear at the meeting to present any nomination pursuant to this Section 1(e).

(8) The Eligible Stockholder (including any person who owns shares that constitute part of the Eligible Stockholder's ownership for purposes of satisfying the requirements of this Section 1(e)) shall file with the SEC any solicitation or other communication with the corporation's stockholders relating to the meeting at which the Stockholder Nominee will be nominated, regardless of whether any such filing is required under Regulation 14A of the Exchange Act or whether any exemption from filing is available for such solicitation or other communication under Regulation 14A of the Exchange Act.

(9) No person may be a member of more than one group of persons constituting an Eligible Stockholder under this Section 1(e).

SECTION 2. The Board of Directors, by the affirmative vote of a majority of directors in office and irrespective of any personal interest of any of them, may establish reasonable compensation of directors for services to the corporation as directors, officers, or otherwise.

SECTION 3. Except as provided in Section 1 of Article I of these By-Laws and in this paragraph, each director shall be elected by the vote of the majority of the votes cast with respect to the director at any meeting for the election of directors at which a quorum is present; provided that if the number of nominees exceeds the number of directors to be elected, the directors shall be elected by the vote of a plurality of the shares represented in person or by proxy at any such meeting and entitled to vote on the election of directors. A majority of votes cast means that the number of shares cast "for" a director's election exceeds the number of votes cast "against" that director. The following shall not be votes cast: (i) a share which is marked as withheld; (ii) a share otherwise present at the meeting but for which there is an abstention; and (iii) a share otherwise present at the meeting as to which a shareholder gives no authority or direction.

ARTICLE II.

OFFICERS.

SECTION 1. The elective officers of the corporation shall include a President, one or more Vice Presidents, a Secretary, one or more Assistant Secretaries, a Treasurer, and one or more Assistant Treasurers, and may also include a Chairman of the Board, one or more Senior Executive Vice Presidents, one or more Executive Vice Presidents, and one or more Senior Vice Presidents. The Chairman of the Board and the President shall be members of the Board of Directors. All elective officers of the corporation shall be elected by the Board of Directors at the first meeting thereof after the annual election of directors. The Board of Directors shall also have power, at any time, to elect additional Senior Executive Vice Presidents, Executive Vice Presidents, Senior Vice Presidents, Vice Presidents, Assistant Secretaries, and Assistant Treasurers. The Board of Directors may appoint such other officers as it shall from time to time deem necessary, who shall have such powers and perform such duties as may be assigned to them by the Board of Directors, the Executive Committee, or the person exercising the authority of the chief executive officer of the corporation. Any two or more offices may be held by the same person.

The Board of Directors shall have the power to fill any vacancy in any existing office or to fill any newly created office, at any time.

The Chairman of the Board, the President, each Senior Executive Vice President, each Executive Vice President, each Senior Vice President, and each Vice President, severally, shall have the power to sign deeds, contracts, and other instruments. Each elective officer shall have such powers and perform such duties as may be assigned to him by the Board of Directors, the Executive Committee, or the chief executive officer, in addition to any powers and duties that are assigned to him specifically by these By-Laws.

The term of office of each officer shall be from the time of his or her election or appointment and qualification until the first meeting of the Board of Directors after the last annual election of Directors, or such other term of office as shall be provided in the resolution of election or appointment, and until the election or appointment and qualification of his or her successor, subject to earlier termination by removal or resignation.

ARTICLE III.

CHAIRMAN OF THE BOARD; PRESIDENT;
SENIOR EXECUTIVE VICE PRESIDENTS;
EXECUTIVE VICE PRESIDENTS; SENIOR VICE PRESIDENTS.

SECTION 1. If there be a Chairman of the Board, he shall preside at all meetings of the stockholders and of the Board of Directors, and shall have such other powers and perform such other duties as may be assigned to him by the Board of Directors or the Executive Committee.

SECTION 2. If there be a Chairman of the Board, the Board of Directors shall designate either the Chairman of the Board or the President as the chief executive officer of the corporation with plenary powers of supervision and direction of the business and affairs of the corporation, unless such offices are occupied by the same person. If there be no Chairman of the Board, the President shall be the chief executive officer.

SECTION 3. If there be a Chairman of the Board and if he be designated as the chief executive officer of the corporation, the President shall have charge of the coordination and supervision of all matters of operation of the corporation. In the absence of the Chairman of the Board, the President shall have the powers and perform the duties of the Chairman of the Board.

SECTION 4. The Senior Executive Vice Presidents, severally, in the order designated by the Chief Executive Officer, shall, in the absence of the President, have the powers and perform the duties of the President, and if there be a Chairman of the Board, they shall, in the absence of the Chairman of the Board and the President, have the powers and perform the duties of the Chairman of the Board.

SECTION 5. The Executive Vice Presidents, severally, in the order designated by the chief executive officer, shall, in the absence of the President and the Senior Executive Vice Presidents, have the powers and perform the duties of the President, and if there be a Chairman of the Board, they shall, in the absence of the Chairman of the Board and the President, have the powers and perform the duties of the Chairman of the Board.

SECTION 6. The Senior Vice Presidents, severally, in the order designated by the chief executive officer, shall, in the absence of the President, the Senior Executive Vice Presidents and the Executive Vice Presidents, have the powers and perform the duties of the President, and if there be a Chairman of the Board, they shall, in the absence of the Chairman of the Board, the President, the Senior Executive Vice Presidents and the Executive Vice Presidents, have the powers and perform the duties of the Chairman of the Board.

ARTICLE IV.

VICE PRESIDENTS.

SECTION 1. The Vice Presidents, severally, in the order designated by the chief executive officer, shall, in the absence of the President, the Senior Executive Vice Presidents, the Executive Vice Presidents and the Senior Vice Presidents, have the powers and perform the duties of the President, and if there be a Chairman of the Board, they shall, in the absence of the Chairman of the Board, the President, the Senior Executive Vice Presidents, the Executive Vice Presidents and the Senior Vice Presidents, have the powers and perform the duties of the Chairman of the Board.

ARTICLE V.

SECRETARY.

SECTION 1. The Secretary shall keep minutes of all meetings of the stockholders of the Board of Directors and of the Executive Committee, and shall give all notices of meetings of the stockholders, of the Board of Directors, and of the Executive Committee. He shall have custody of all deeds, contracts, and other instruments, documents, and records, except as otherwise provided in these By-Laws, or by the Board of Directors, and shall attend to such correspondence of the corporation as the Board of Directors or the chief executive officer shall direct. He shall be the custodian of the seal of the corporation and shall affix it to any instrument requiring the same, except as otherwise provided herein or by the Board of Directors.

ARTICLE VI.

ASSISTANT SECRETARIES.

SECTION 1. Each Assistant Secretary shall have such powers and shall perform such duties as may be assigned to him by the Secretary. In the absence of the Secretary, the Assistant Secretaries, in the order designated by the Secretary, shall have the powers and perform the duties of the Secretary.

ARTICLE VII.

TREASURER.

SECTION 1. The Treasurer shall have charge of all receipts and disbursements of the corporation and shall be the custodian of the corporation's funds. He shall have full authority to receive and give receipts for all moneys due and payable to the corporation from any source whatever, and to endorse or cause to be endorsed checks, drafts, warrants, and other instruments for the payment of money in its name and on its behalf, and full discharge for the

same to give. The funds of the corporation shall be deposited in its name in such depositaries as may be designated from time to time by the Board of Directors or by the Treasurer if the Board of Directors shall authorize him to do so. All checks, drafts, and other instruments for the payment of money, and all notes and other evidences of indebtedness, issued in the name of the corporation, shall be signed by such officer or officers, employee or employees, agent or agents, of the corporation, and in such manner, including the use of facsimile signatures, as shall be determined from time to time by the Board of Directors, or by the Treasurer if the Board of Directors shall authorize him to make such determination. A report of the financial condition of the corporation shall be made by the Treasurer whenever requested by the chief executive officer. If required by the Board of Directors, he shall give bond for the faithful performance of his duties, in such sum and with such surety or sureties as the Board of Directors may determine.

ARTICLE VIII.

ASSISTANT TREASURERS.

SECTION 1. Each Assistant Treasurer shall have such powers and shall perform such duties as may be assigned to him by the Treasurer. In the absence of the Treasurer, the Assistant Treasurers, in the order designated by the Treasurer, shall have the powers and perform the duties of the Treasurer.

ARTICLE IX.

MEETINGS.

SECTION 1. The meetings of the Stockholders shall, unless otherwise provided by law, be held at such place, within or without the State of New Jersey, as may be fixed by the Board of Directors and stated in the notice of the meeting.

Each annual meeting of the stockholders for the election of the class of directors for the ensuing year, and for the transaction of such other business as may be brought before the meeting, shall be held at such time, not more than 13 months after the last annual meeting, as may be fixed by the Board of Directors.

SECTION 2. Except as herein or in the Certificate of Incorporation expressly provided to the contrary or as otherwise required by law or except as otherwise fixed by or pursuant to the provisions of Article 3 of the Certificate of Incorporation relating to the rights of the holders of any class or series of stock having a preference over the Common Stock as to dividends or upon liquidation to elect additional directors under specified circumstances, all voting rights in the corporation shall be vested exclusively in the holders of Common Stock.

Except as herein or in the Certificate of Incorporation expressly provided to the contrary or as otherwise required by law or except as otherwise fixed by or pursuant to the provisions of Article 3 of the Certificate of Incorporation relating to the rights of the holders of any class or series of stock having a preference over the Common Stock as to dividends or upon liquidation to elect additional directors under specified circumstances, at all meetings of stockholders the holders of Common Stock shall be entitled to cast one vote for each share of Common Stock held.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

SECTION 3. Every stockholder entitled to vote at a meeting of stockholders or to express consent or dissent without a meeting may authorize another person or persons to act for him by proxy. No proxy shall be valid after 11 months from the date of its execution, unless a longer time is expressly provided therein, but in no event shall a proxy be valid after three years from the date of execution. A proxy shall not be revoked by the death or incapacity of the stockholder but shall continue in force until revoked by the personal representative or guardian of the stockholder. The presence at any meeting of any stockholder who has given a proxy shall not revoke such proxy unless the stockholder shall file written notice of such revocation with the secretary of the meeting prior to the voting of such proxy.

A person named in a proxy as the attorney or agent of a stockholder may, if the proxy so provides, substitute another person to act in his place, including any other person named as an attorney or agent in the same proxy. The substitution shall not be effective until an instrument effecting it is filed with the Secretary.

SECTION 4. All elections for directors shall be by ballot, and the polls at every such election shall remain open so long as may be reasonably necessary to permit all stockholders entitled to vote at such meeting, present in person or by proxy, to cast their votes.

SECTION 5. Special meetings of the stockholders may be called at any time by the Board of Directors or by the chief executive officer or upon the written request of the holders of the capital stock entitled to cast a majority of votes thereat.

Except as otherwise provided by law, and unless waived, written notice of the time, place and purposes of every meeting of stockholders shall be given not less than 10 nor more than 60 days before the date of the meeting, to each stockholder of record entitled to vote at the meeting, either personally or by mailing a notice to him at his last post office address appearing on the books of the corporation.

SECTION 6. At any meeting of the stockholders the holders of stock entitled to cast a majority of the votes at the meeting, present in person or represented by proxy, shall constitute a quorum of the stockholders for all purposes unless the representation of a larger number shall be required by law, and in that case the representation of the number so required shall constitute a quorum.

If the holders of the amount of stock necessary to constitute a quorum shall fail to attend in person or by proxy at the time and place and fixed for any meeting of stockholders, the meeting may be adjourned from time to time by the vote of a majority of the votes cast by the holders of stock present in person or represented by proxy at such meeting, without notice other than by announcement at the meeting, and at any such adjourned meeting held more than one week after such time the holders of stock entitled to cast 40% of the votes at such meeting, present in person or represented by proxy, shall constitute a quorum of the stockholders for all purposes unless the representation of a larger number shall be required by law, and in that case the representation of the number so required shall constitute a quorum. At any such adjourned meeting, whenever held, at which a quorum shall be present, any business may be transacted which might have been transacted at the meeting as originally called.

SECTION 7. Regular meetings of the Board of Directors shall be held monthly unless otherwise determined by resolution of the Board.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Special meetings of the Board of Directors may be called at any time by the Chairman of the Board, or by the President if he be the chief executive officer. The Secretary shall also call such meetings on the written request of a majority of the directors.

No notice shall be required for regular meetings of the Board of Directors. The meeting for organization may be held on the day of and after the annual meeting of stockholders. At least two days' notice of a special meeting of the Board of Directors shall be given, but this notice may be waived in writing or by telegraph, either before or after the meeting. A meeting may be held without notice at any time when all the directors are present.

At all meetings of the Board of Directors a majority of the directors in office, or one-third of the entire Board, whichever is greater, shall constitute a quorum for the transaction of business. A less number than a quorum, however, may meet and adjourn to any day.

SECTION 8. The Board of Directors may, in advance of any meeting of stockholders, appoint one or more inspectors to act at the meeting or any adjournment thereof. If inspectors are not so appointed by the Board of Directors or shall fail to qualify, the person presiding at a meeting of stockholders may, and on the request of any stockholder entitled to vote thereat, shall make such appointment. In case any person appointed as inspector fails to appear or act, the vacancy may be filled by appointment made by the Board of Directors in advance of the meeting of stockholders or at the meeting by the person presiding at the meeting. Each inspector, before entering upon the discharge of his duties, shall take and sign an oath faithfully to execute the duties of inspector at such meeting with strict impartiality and according to the best of his ability. No person shall be elected a director at a meeting at which he has served as an inspector.

SECTION 9. Subject to the rights of holders of any class or series of stock having a preference over the Common Stock as to dividends or upon liquidation, nominations for the election of directors may be made by the Board of Directors or a committee appointed by the Board of Directors or by any stockholder entitled to vote in the election of directors generally. However any stockholder entitled to vote in the election of directors generally may nominate one or more persons for election as directors at a meeting only if written notice of such stockholder's intent to make such nomination or nominations has been given, either by personal delivery or by United States mail, postage prepaid, to the Secretary not later than (i) with respect to an election to be held at an annual meeting of stockholders, 90 days in advance of such meeting, and (ii) with respect to an election to be held at a special meeting of stockholders for the election of directors, the close of business on the seventh day following the date on which notice of such meeting is first given to stockholders. Each such notice shall set forth: (a) the name and address of the stockholder who intends to make the nomination and of the person or persons to be nominated; (b) a representation that the stockholder is a holder of record of stock of the corporation entitled to vote at such meeting and intends to appear in person or by proxy at the meeting to nominate the person or persons specified in the notice; (c) a description of all arrangements or understandings between the stockholder and each nominee and any other person or persons (naming such person or persons) pursuant to which the nomination or nominations are to be made by the stockholder; (d) such other information regarding each nominee proposed by such stockholder as would be required to be included in a proxy statement filed pursuant to the proxy rules of the Securities and Exchange Commission, had the nominee been nominated, or intended to be nominated, by the Board of Directors; and (e) the consent of each nominee to serve as a director of the corporation if so elected. The Chairman of the meeting may refuse to acknowledge the nomination of

any person not made in compliance with the foregoing procedure. Nothing in this Section 9 shall be construed to require any such stockholder nomination to be included in any Proxy Statement issued on behalf of the Board of Directors or to require the Board to endorse any such nomination.

ARTICLE X.

RECORD DATE FOR DETERMINATION OF
RIGHTS OF STOCKHOLDERS.

SECTION 1. For the purpose of determining the stockholders entitled to notice of or to vote at any meeting of stockholders or any adjournment thereof, or to express consent to or dissent from any proposal without a meeting, or for the purpose of determining stockholders entitled to receive payment of any dividend or allotment of any right, or for the purpose of any other action, the Board of Directors may fix, in advance, a date as the record date for any such determination of stockholders. Such date shall not be more than 60 nor less than 10 days before the date of such meeting, nor more than 60 days prior to any other action. When a determination of stockholders entitled to notice of or to vote at any meeting of stockholders has been so made, such determination shall apply to any adjournment thereof, unless the Board of Directors fixes a new record date for the adjourned meeting.

ARTICLE XI.

COMMITTEES.

SECTION 1. The Board of Directors, by resolution adopted by a majority of the entire Board, may appoint from among its members an Executive Committee and one or more other committees. Except as otherwise provided by law, the Executive Committee shall have and may exercise all the authority of the Board of Directors when the Board is not in session, and each such other committee of the Board shall have and may exercise the authority of the Board to the extent provided in the resolution of appointment.

The Board of Directors, by resolution adopted by a majority of the entire Board, may (a) fill any vacancy in any committee of the Board, (b) appoint one or more directors to serve as alternate members of any such committee, to act in the absence or disability of members of any such committee with all the powers of such absent or disabled members (c) abolish any such committee at its pleasure and (d) remove any director from membership on such committee at any time, with or without cause.

Actions taken at a meeting of any committee of the Board of Directors shall be reported to the Board at its next meeting following such committee meeting; except that, when the meeting of the Board is held within two days after the committee meeting, such report shall, if not made at the first meeting, be made to the Board at its second meeting following such committee meeting.

SECTION 2. The Board of Directors may appoint and prescribe the powers and duties of other committees, the members of which may but need not be directors and shall serve at the pleasure of the Board.

SECTION 3. One-third of the entire committee, or two members, whichever is greater, shall constitute a quorum for the transaction of business.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

SECTION 4. Each committee shall fix its own rules of procedure, shall meet where and as provided by such rules of procedure or by resolution of the Board of Directors, shall keep full records of its proceedings, and shall report from time to time to the Board as called upon by the Board.

ARTICLE XII.

VOTING UPON STOCKS OWNED BY THE CORPORATION.

SECTION 1. Unless otherwise ordered by the Board of Directors, the Chairman of the Board, the President, the Senior Executive Vice Presidents, the Executive Vice Presidents, the Senior Vice Presidents and the Vice Presidents, severally, shall each have full power and authority on behalf of the corporation to attend, act, and vote at any meeting of the stockholders of any corporation in which this corporation may hold stock, and to appoint one or more other persons as proxy or proxies to attend, act, and vote at any such meeting and such officer or such proxy or proxies shall possess and may exercise on behalf of this corporation any and all rights and powers incident to its ownership of such stock. The Board of Directors or the Executive Committee from time to time by resolution may confer like powers upon any other person or persons.

ARTICLE XIII.

STOCK.

SECTION 1. The shares of stock in this corporation may be represented by certificates or may be uncertificated shares. To the extent that certificates shall be issued for shares of stock in this corporation, such certificates shall be signed by the Chairman of the Board, the President, or a Vice President, and either the Treasurer or an Assistant Treasurer, or the Secretary or an Assistant Secretary. If the certificate is countersigned by a transfer agent or registrar, who is not an officer or employee of the corporation, any and all other signatures may be facsimiles.

SECTION 2. The shares of stock issued by this corporation shall be transferable only on the books of the corporation by the holder or owner thereof in person or by power of attorney, and if such shares are represented by a certificate, on surrender of the certificate therefor.

SECTION 3. The Treasurer shall make and certify a complete list of the stockholders entitled to vote at a meeting of stockholders or any adjournment thereof. Such list shall be arranged alphabetically within each class and series, with the addresses of, and the number of shares held by, each stockholder, shall be produced at the time and place of the meeting, and shall be subject to the inspection of any stockholder during the whole time of the meeting.

ARTICLE XIV.

FISCAL YEAR.

SECTION 1. The fiscal year of the corporation shall begin on January first of each year.

ARTICLE XV.

SEAL.

SECTION 1. The seal of the corporation shall be circular in form, and shall have inscribed thereon the following words and figures: "PUBLIC SERVICE ENTERPRISE GROUP INCORPORATED Incorporated 1985".

ARTICLE XVI.

AMENDMENTS.

SECTION 1. Subject to the provisions of the Certificate of Incorporation, these By-Laws may be altered, amended or repealed at any regular meeting of the stockholders (or at any special meeting thereof duly called for that purpose) by a majority vote of the shares represented and entitled to vote at such meeting. Subject to the laws of the State of New Jersey, the Certificate of Incorporation and these By-Laws, the Board of Directors may by majority vote of those present at any meeting at which a quorum is present amend these By-Laws or enact such other By-Laws as in their judgment may be advisable for the regulation of the conduct of the affairs of the corporation.

ARTICLE XVII.

ADVANCEMENT OF EXPENSES.

SECTION 1. Expenses incurred by any person made, or threatened to be made, a party to any pending, threatened or completed civil, criminal, administrative or arbitrative action, suit or proceeding and any appeal therein (and any inquiry or investigation which could lead to such action, suit or proceeding) by reason of the fact that he is or was a director, officer or employee of the corporation or serves or served any other enterprise as a director, officer or employee at the request of the corporation, shall be paid by the corporation in advance of the final disposition of the action, suit or proceeding promptly upon receipt of an undertaking by or on behalf of such person to repay such amount if it shall ultimately be determined that such person is not entitled to be indemnified by the corporation.

Past financial performance is no guarantee of future results.

Item 5.02 Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers.

On December 19, 2017, upon the recommendation of the Corporate Governance Committee, the Board of Directors (the "Board") of Public Service Enterprise Group Incorporated (the "Company") increased the size of the Board to twelve directors and elected Barry H. Ostrowsky to serve as a new director, in each case effective February 20, 2018. The Board has determined that Mr. Ostrowsky is an independent director within the meaning of the listing standards of the New York Stock Exchange and the Securities Exchange Act of 1934, as amended. Mr. Ostrowsky has not been named to any committees of the Board at this time, although the Board expects to name him to one or more committees in the future.

As of February 20, 2018, Mr. Ostrowsky will participate in the Company's compensation plans for non-management directors, as described under "Proposal 1: Election of Directors—Director Compensation" in the Company's proxy statement filed with the Securities and Exchange Commission on March 14, 2017.

As part of the Company's philanthropic activities and commitment to invest in the communities in which we do business, the Company, directly or through a subsidiary, and PSEG Foundation, a 501(c)(3) organization that is funded by the Company, have periodically made charitable contributions to facilities operated by RWJ Barnabas Health, Inc., a not-for-profit, tax-exempt corporation incorporated in New Jersey ("RWJBarnabas"). Mr. Ostrowsky is the President and Chief Executive Officer of RWJBarnabas. In 2016, the Company and PSEG Foundation, collectively, donated approximately $363,500 to facilities operated by RWJBarnabas and its predecessor entities. To date in 2017, the Company and PSEG Foundation, collectively, have donated approximately $186,550 to facilities operated by RWJBarnabas. The Board expects that the Company and PSEG Foundation will make future contributions to facilities operated by RWJBarnabas. PSEG Foundation has already pledged a $125,000 contribution to one facility operated by RWJBarnabas, to occur in 2018.

Since 2008, the Company's subsidiary, Public Service Electric and Gas Company ("PSE&G"), has engaged in an ongoing Hospital Energy Efficiency Program (the "HEE Program"), through which PSE&G provides funds for energy efficiency upgrades to hospitals throughout the PSE&G service territory. The HEE Program was approved, and is overseen, by the New Jersey Board of Public Utilities (the "BPU"). As of September 1, 2017, PSE&G has committed to invest approximately $199 million in a variety of hospitals through the HEE Program, including commitments of approximately $30.6 million to RWJBarnabas facilities. These projects are in various stages of completion, with several fully completed and others in progress or in the planning stage. The aggregate portion that RWJBarnabas facilities have committed to repay to PSE&G through utility bills in accordance with the BPU-approved terms of the program is equal to approximately $10.7 million. Because the HEE Program is ongoing, the investment and repayment figures are subject to change in the coming years.

Since 2013, the Company's subsidiary, PSEG Services Corporation, has had a contractual arrangement with an RWJBarnabas affiliate, Robert Wood Johnson University Hospital Hamilton ("RWJ Hamilton"), pursuant to which RWJ Hamilton provides medical care, medical testing and related services to the Company and its subsidiaries. In 2016, the Company paid a total of approximately $267,000 for services provided pursuant to this arrangement. As of October 31, 2017, the Company has paid a total of approximately $197,000 for services provided pursuant to this arrangement.

PSEG elects Barry Ostrowsky to board of directors

(December 22, 2017 – Newark, N.J.) – Public Service Enterprise Group (PSEG) today announced that Barry H. Ostrowsky, president and chief executive officer, RWJBarnabas Health, has been elected to its board of directors, effective February 20.

Mr. Ostrowsky joined Saint Barnabas Medical Center in 1991 as executive vice president and general counsel and served in the same role when Barnabas Health was created in 1996. At Barnabas Health, he became president and chief operating officer in 2010 and president and chief executive officer in 2012. In April 2016, with the merger of Barnabas Health and Robert Wood Johnson Health System, he assumed his present position. He has 20 years of experience, strong leadership skills and broad knowledge of the health care industry.

"Barry's vast experience in leading one of the largest health care systems in our region through this challenging, dynamic and highly regulated environment, combined with his widely acclaimed prominence as a role model of corporate citizenship makes him an invaluable addition to our board of directors," said Ralph Izzo, PSEG's chairman, president and chief executive officer.

Prior to Mr. Ostrowsky's tenure at RWJBarnabas, he was a senior partner in the law firm of Brach, Eichler, Rosenberg, Silver, Bernstein, Hammer and Gladstone. He currently serves on the board of directors of RWJBarnabas Health, Cerebral Palsy of North Jersey, Public Media NJ, Inc. and the New Jersey Chamber of Commerce. He has played an active role in shaping the evolution of New Jersey's health care delivery system and worked closely with physicians, hospitals and insurers to improve the health and wellness of our state's diverse communities.

Securities registered pursuant to Section 12(g) of the Act:

Registrant	Title of Each Class
PSEG Power LLC	Limited Liability Company Membership Interest
Public Service Electric and Gas Company	Medium-Term Notes

Indicate by check mark whether each registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Public Service Enterprise Group Incorporated	Yes ☒	No ☐
PSEG Power LLC	Yes ☐	No ☒
Public Service Electric and Gas Company	Yes ☒	No ☐

Indicate by check mark if each of the registrants is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes ☐ No ☒

Indicate by check mark whether each of the registrants (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrants were required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrants have submitted electronically and posted on their corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrants were required to submit and post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether each registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Public Service Enterprise Group Incorporated	Large accelerated filer ☒	Accelerated filer ☐	Non-accelerated filer ☐
PSEG Power LLC	Large accelerated filer ☐	Accelerated filer ☐	Non-accelerated filer ☒
Public Service Electric and Gas Company	Large accelerated filer ☐	Accelerated filer ☐	Non-accelerated filer ☒

Indicate by check mark whether any of the registrants is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The aggregate market value of the Common Stock of Public Service Enterprise Group Incorporated held by non-affiliates as of June 30, 2012 was $16,420,936,616 based upon the New York Stock Exchange Composite Transaction closing price.

The number of shares outstanding of Public Service Enterprise Group Incorporated's sole class of Common Stock as of January 31, 2013 was 505,959,216.

As of January 31, 2013, Public Service Electric and Gas Company had issued and outstanding 132,450,344 shares of Common Stock, without nominal or par value, all of which were privately held, beneficially and of record by Public Service Enterprise Group Incorporated.

PSEG Power LLC and Public Service Electric and Gas Company are wholly owned subsidiaries of Public Service Enterprise Group Incorporated and each meet the conditions set forth in General Instruction I(1)(a) and (b) of Form 10-K. Each is filing its Annual Report on Form 10-K with the reduced disclosure format authorized by General Instruction I.

FORWARD-LOOKING STATEMENTS

Certain of the matters discussed in this report constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties, which could cause actual results to differ materially from those anticipated. Such statements are based on management's beliefs as well as assumptions made by and information currently available to management. When used herein, the words "anticipate," "intend," "estimate," "believe," "expect," "plan," "should," "hypothetical," "potential," "forecast," "project," variations of such words and similar expressions are intended to identify forward-looking statements. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Other factors that could cause actual results to differ materially from those contemplated in any forward-looking statements made by us herein are discussed in Item 1A. Risk Factors, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A), Item 8. Financial Statements and Supplementary Data —Note 13. Commitments and Contingent Liabilities, and other factors discussed in filings we make with the United States Securities and Exchange Commission (SEC). These factors include, but are not limited to:

- adverse changes in the demand for or the price of the capacity and energy that we sell into wholesale electricity markets,
- adverse changes in energy industry law, policies and regulation, including market structures and a potential shift away from competitive markets toward subsidized market mechanisms, transmission planning and cost allocation rules, including rules regarding how transmission is planned and who is permitted to build transmission in the future, and reliability standards,
- any inability of our transmission and distribution businesses to obtain adequate and timely rate relief and regulatory approvals from federal and state regulators,
- changes in federal and state environmental regulations that could increase our costs or limit our operations,
- changes in nuclear regulation and/or general developments in the nuclear power industry, including various impacts from any accidents or incidents experienced at our facilities or by others in the industry, that could limit operations of our nuclear generating units,
- actions or activities at one of our nuclear units located on a multi-unit site that might adversely affect our ability to continue to operate that unit or other units located at the same site,
- any inability to balance our energy obligations, available supply and risks,
- any deterioration in our credit quality or the credit quality of our counterparties, including in our leveraged leases,
- availability of capital and credit at commercially reasonable terms and conditions and our ability to meet cash needs,
- changes in the cost of, or interruption in the supply of, fuel and other commodities necessary to the operation of our generating units,
- delays in receipt of necessary permits and approvals for our construction and development activities,
- delays or unforeseen cost escalations in our construction and development activities,
- any inability to achieve, or continue to sustain, our expected levels of operating performance,
- any equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers,
- increase in competition in energy supply markets as well as competition for certain rate-based transmission projects,
- any inability to realize anticipated tax benefits or retain tax credits,
- challenges associated with recruitment and/or retention of a qualified workforce,
- adverse performance of our decommissioning and defined benefit plan trust fund investments and changes in funding requirements, and
- changes in technology and customer usage patterns.

All of the forward-looking statements made in this report are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by management will be realized or, even if realized, will have the expected consequences to, or effects on, us or our business prospects, financial condition or results of operations. Readers are cautioned not to place undue reliance on these forward-looking statements in making any investment decision. Forward-looking statements made in this report apply only as of the date of this report. While we may elect to update forward-looking statements from time to time, we specifically disclaim any obligation to do so, even if internal estimates change, unless otherwise required by applicable securities laws.

The forward-looking statements contained in this report are intended to qualify for the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended.

FILING FORMAT AND GLOSSARY

This combined Annual Report on Form 10-K is separately filed by Public Service Enterprise Group Incorporated (PSEG), PSEG Power LLC (Power) and Public Service Electric and Gas Company (PSE&G). Information relating to any individual company is filed by such company on its own behalf. Power and PSE&G are each only responsible for information about itself and its subsidiaries.

Discussions throughout the document refer to PSEG and its direct operating subsidiaries, Power, PSE&G and PSEG Energy Holdings L.L.C. (Energy Holdings). Depending on the context of each section, references to "we," "us," and "our" relate to the specific company or companies being discussed. In addition, certain key acronyms and definitions are summarized in a glossary beginning on page 191.

WHERE TO FIND MORE INFORMATION

We file annual, quarterly and special reports, proxy statements and other information with the SEC. You may read and copy any document that we file at the Public Reference Room of the SEC at 100 F Street, N.E., Washington, D.C. 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. You may also obtain our filed documents from commercial document retrieval services, the SEC's internet website at www.sec.gov or our website at www.pseg.com. Information on our website should not be deemed incorporated into or as a part of this report. Our Common Stock is listed on the New York Stock Exchange under the ticker symbol PEG. You can obtain information about us at the offices of the New York Stock Exchange, Inc., 20 Broad Street, New York, New York 10005.

PART I

ITEM 1. BUSINESS

We were incorporated under the laws of the State of New Jersey in 1985 and our principal executive offices are located at 80 Park Plaza, Newark, New Jersey 07102. We conduct our business through three direct wholly owned subsidiaries, Power, PSE&G and Energy Holdings, each of which also has its principal executive offices at 80 Park Plaza, Newark, New Jersey 07102. PSEG Services Corporation (Services), our other wholly owned subsidiary, provides us and these operating subsidiaries with certain management, administrative and general services at cost.

We are an energy company with a diversified business mix. Our operations are located primarily in the Northeastern and Mid- Atlantic United States. Our business approach focuses on operational excellence, financial strength and disciplined investment. As a holding company, our profitability depends on our subsidiaries' operating results. Below are descriptions of our direct operating subsidiaries.

Power	PSE&G	Energy Holdings
A Delaware limited liability company formed in 1999 that integrates its generating asset operations with its wholesale energy sales, fuel supply and energy trading functions. Earns revenues from selling under contract or on the spot market a range of diverse products such as electricity, natural gas, capacity, emissions credits and a series of energy-related products used to optimize the operation of the energy grid.	A New Jersey corporation, incorporated in 1924, which is a franchised public utility in New Jersey. It is also the provider of last resort for gas and electric commodity service for end users in its service territory. Earns revenues from its regulated rate tariffs under which it provides electric transmission and electric and gas distribution to residential, commercial and industrial customers in its service territory. It also offers appliance services and repairs to customers throughout its service territory. Has also implemented demand response and energy efficiency programs and invested in solar generation within New Jersey.	A New Jersey limited liability company (successor to a corporation which was formed in 1989) that invests and operates through its two primary subsidiaries. Earns revenues primarily from its portfolio of lease investments and its solar generation projects.

The following is a more detailed description of our business, including a discussion of our:

- Business Operations and Strategy
- Competitive Environment
- Employee Relations
- Regulatory Issues
- Environmental Matters

BUSINESS OPERATIONS AND STRATEGY

Power

Through Power, we seek to produce low-cost energy by efficiently operating our nuclear, coal, gas and oil-fired generation facilities, while balancing generation production, fuel requirements and supply obligations through energy portfolio management. We use commodity contracts and financial instruments, combined with our owned generation, to cover our commitments for Basic Generation Service (BGS) in New Jersey and other bilateral supply contract agreements.

Products and Services

As a merchant generator, our profit is derived from selling a range of products and services under contract to power marketers and to others, such as investor-owned and municipal utilities, and to aggregators who resell energy to retail consumers, or in the spot market. These products and services include:

- **Energy**—the electrical output produced by generation plants that is ultimately delivered to customers for use in lighting, heating, air conditioning and operation of other electrical equipment. Energy is our principal product and is priced on a usage basis, typically in cents per kilowatt hour (kWh) or dollars per megawatt hour (MWh).
- **Capacity**—a product distinct from energy, is a market commitment that a given generation unit will be available to an Independent System Operator (ISO) for dispatch if it is needed to meet system demand. Capacity is typically priced in dollars per megawatt (MW) for a given sale period.
- **Ancillary Services**—related activities supplied by generation unit owners to the wholesale market, required by the ISO to ensure the safe and reliable operation of the bulk power system. Owners of generation units may bid units into the ancillary services market in return for compensatory payments. Costs to pay generators for ancillary services are recovered through charges imposed on market participants.
- **Emissions Allowances and Congestion Credits**—Emissions allowances (or credits) represent the right to emit a specific amount of certain pollutants. Allowance trading is used to control air pollution by providing economic incentives for achieving reductions in the emissions of pollutants. Congestion credits (or Financial Transmission Rights) are financial instruments that entitle the holder to a stream of revenues (or charges) based on the hourly congestion price differences across a transmission path.

Power also sells wholesale natural gas, primarily through a full requirements Basic Gas Supply Service (BGSS) contract with PSE&G to meet the gas supply requirements of PSE&G's customers. This long-term contract was for an initial period which extended through March 31, 2012 and continues on a year-to-year basis thereafter, unless terminated by either party with a one year notice.

Approximately 46% of PSE&G’s peak daily gas requirements is provided from Power’s firm transportation capacity, which is available every day of the year. Power satisfies the remainder of PSE&G’s requirements from storage contracts, liquefied natural gas, seasonal purchases, contract peaking supply, propane and refinery gas. Based upon availability, Power also sells gas to others.

How Power Operates

We own approximately 13,226 MW of generation capacity located in the Northeast and Mid-Atlantic regions of the United States in some of the country’s largest and most developed electricity markets.

S1-SSA-0009 - 10619

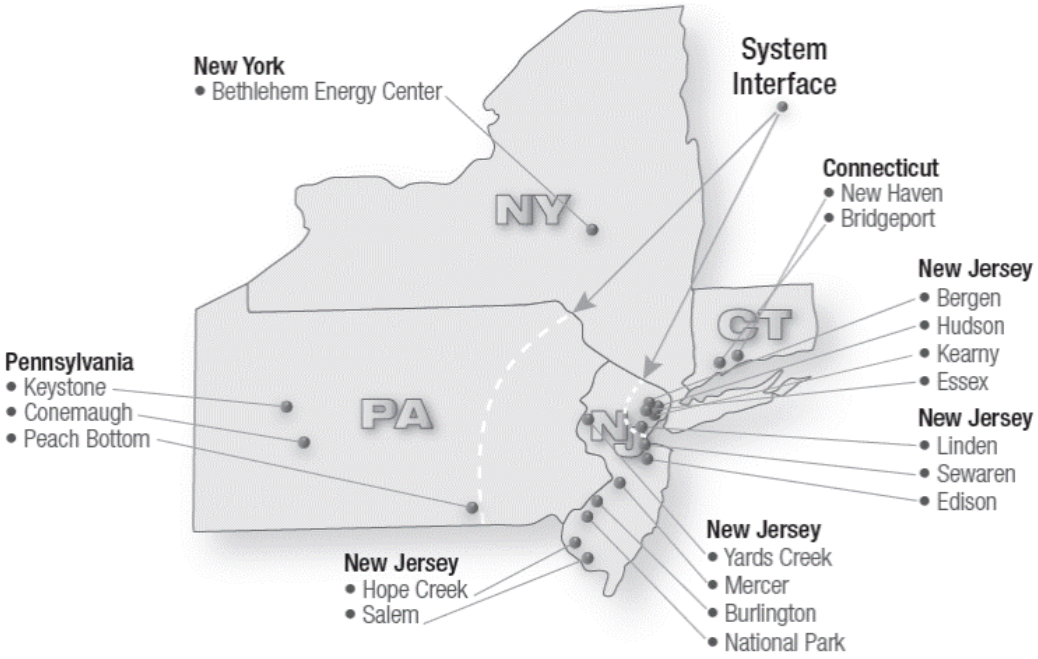
Past financial performance is no guarantee of future results.

The map below shows the locations of our Northeast and Mid-Atlantic generation facilities



- **Generation Capacity**

Power has approved the expenditure of approximately $192 million for a steam path retrofit and related upgrades at its co-owned Peach Bottom Units 2 and 3. Unit 3 upgrades were completed in October 2011. Unit 2 upgrades were completed in October 2012. The balance of work to ensure efficient operation is expected to be completed by 2014. Total expenditures through December 31, 2012 were $154 million.

Power has also approved the expenditure of $419 million for an extended power uprate of the Peach Bottom nuclear units. The uprate is expected to result in an increase in Power's share of nominal capacity by approximately 130 MW. The uprate is expected to be in service in 2015 for Unit 2 and 2016 for Unit 3. Total expenditures through December 31, 2012 were $73 million.

In 2011, we sold 2,000 MW of generation facilities we owned and operated in Texas. See Item 8. Financial Statements and Supplementary Data —Note 1. Organization, Basis of Presentation and Summary of Significant Accounting Policies and Note 4. Discontinued Operations and Dispositions, for additional information.

For additional information on each of our generation facilities, see Item 2. Properties.

Our installed capacity utilizes a diverse mix of fuels: 45% gas, 28% nuclear, 18% coal, 8% oil and 1% pumped storage. This fuel diversity helps to mitigate risks associated with fuel price volatility and market demand cycles. Our total generating output in 2012 was approximately 53,000 gigawatt hours (GWh). The generation mix by fuel type has changed slightly in recent years due to the relatively favorable price of natural gas as compared to coal, making it more economical to run certain of our gas units than our coal units. The following table indicates the proportionate share of generating output by fuel type.

Past financial performance is no guarantee of future results.

Generation by Fuel Type	Actual 2012	
Nuclear:		
New Jersey facilities	39%	
Pennsylvania facilities	18%	
Fossil:		
Coal:		
Pennsylvania facilities	9%	
Connecticut facilities	—%	(A)
Coal and Natural Gas:		
New Jersey facilities	2%	
Oil and Natural Gas:		
New Jersey facilities	23%	
New York facilities	9%	
Connecticut facilities	—%	(A)
Total	**100%**	

(A) Less than one percent.

- **Generation Dispatch**

Our generation units are typically characterized as serving one or more of three general energy market segments: base load; load following; and peaking, based on their operating capability and performance. On a capacity basis, our portfolio of generation assets consists of 33% base load, 43% load following and 24% peaking. This diversity helps to reduce the risk associated with market demand cycles and allows us to participate in the market at each segment of the dispatch curve.

- **Base Load Units** run the most and typically operate whenever they are available. These units generally derive revenues from energy and capacity sales. Variable operating costs are low due to the combination of highly efficient operations and the use of relatively lower-cost fuels. Performance is generally measured by the unit's "capacity factor," or the ratio of the actual output to the theoretical maximum output. In 2012, our base load capacity factors were as follows:

Unit	2012 Capacity Factor
Nuclear	
Salem Unit 1	95.2%
Salem Unit 2	87.3%
Hope Creek	89.8%
Peach Bottom Unit 2	85.9%
Peach Bottom Unit 3	99.0%
Coal	
Keystone	63.8%
Conemaugh	71.3%

No assurances can be given that these capacity factors will be achieved in the future.

- **Load Following Units** typically operate between 20% and 80% of the time. The operating costs are higher per unit of output due to lower efficiency and/or the use of higher-cost fuels such as oil, natural gas and, in some cases, coal. They operate less frequently than base load units and derive revenues from energy, capacity and ancillary services.
- **Peaking Units** run the least amount of time and utilize higher-priced fuels. These units typically operate less than 20% of the time. Costs per unit of output tend to be much higher than for base load units. The majority of

S1-SSA-0009 - 10621

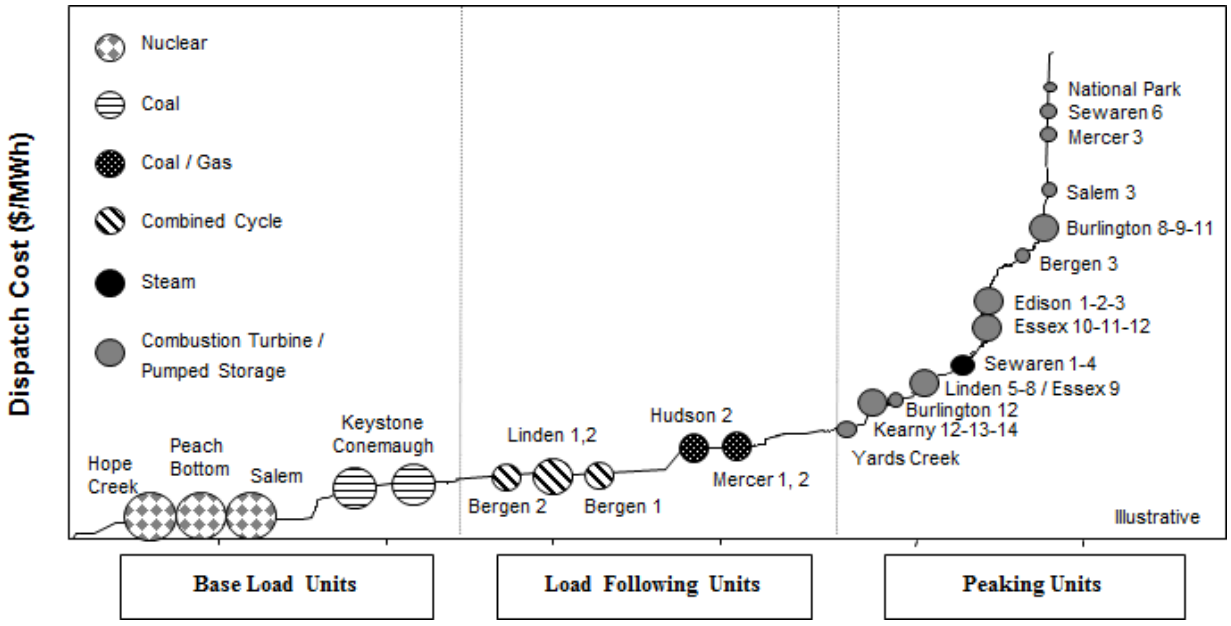
Past financial performance is no guarantee of future results.

revenues are from capacity and ancillary service sales. The characteristics of these units enable them to capture energy revenues during periods of high energy prices.

In the energy markets in which we operate, owners of power plants specify to the ISO prices at which they are prepared to generate and sell energy based on the marginal cost of generating energy from each individual unit. The ISOs will dispatch in merit order, calling on the lowest variable cost units first and dispatching progressively higher-cost units until the point that the entire system demand for power (known as the system "load") is satisfied. Base load units are dispatched first, with load following units next, followed by peaking units.

During periods when one or more parts of the transmission grid are operating at full capability, thereby resulting in a constraint on the transmission system, it may not be possible to dispatch units in merit order without violating transmission reliability standards. Under such circumstances, the ISO will dispatch higher-cost generation out of merit order within the congested area and power suppliers will be paid an increased Locational Marginal Price (LMP) in congested areas, reflecting the bid prices of those higher-cost generation units.

The following chart depicts the merit order of dispatch of our units in PJM Interconnection L.L.C. (PJM), where most of our generation units are located, based on illustrative historical dispatch cost. It should be noted that market price fluctuations have resulted in changes from historical norms, with lower gas prices allowing some gas generation to displace some coal generation.



The size of each facility's fuel circle in the above chart illustrates the relative MW capacity of the generating capacity of that facility. For additional information on each of our generation facilities, see Item 2. Properties.

The bid price of the last unit dispatched by an ISO establishes the energy market-clearing price. After considering the market-clearing price and the effect of transmission congestion and other factors, the ISO calculates the LMP for every location in the system. The ISO pays all units that are dispatched their respective LMP for each MWh of energy produced, regardless of their specific bid prices. Since bids generally approximate the marginal cost of production, units with lower marginal costs typically generate higher operating profits than units with comparatively higher marginal costs.

This method of determining supply and pricing creates an environment in the markets such that natural gas prices often have a major impact on the price that generators will receive for their output, especially in periods of relatively strong demand. Therefore, significant changes in the price of natural gas will often translate into significant changes in the wholesale price of electricity. This can be seen in the following graphs which present historical annual spot prices and forward calendar prices as averaged over each year.

S1-SSA-0009 - 10622

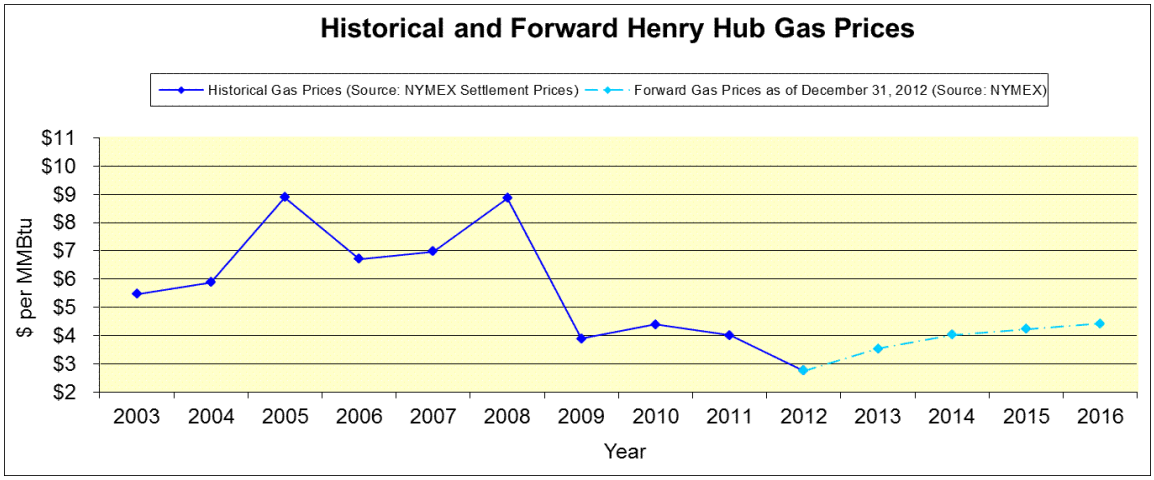
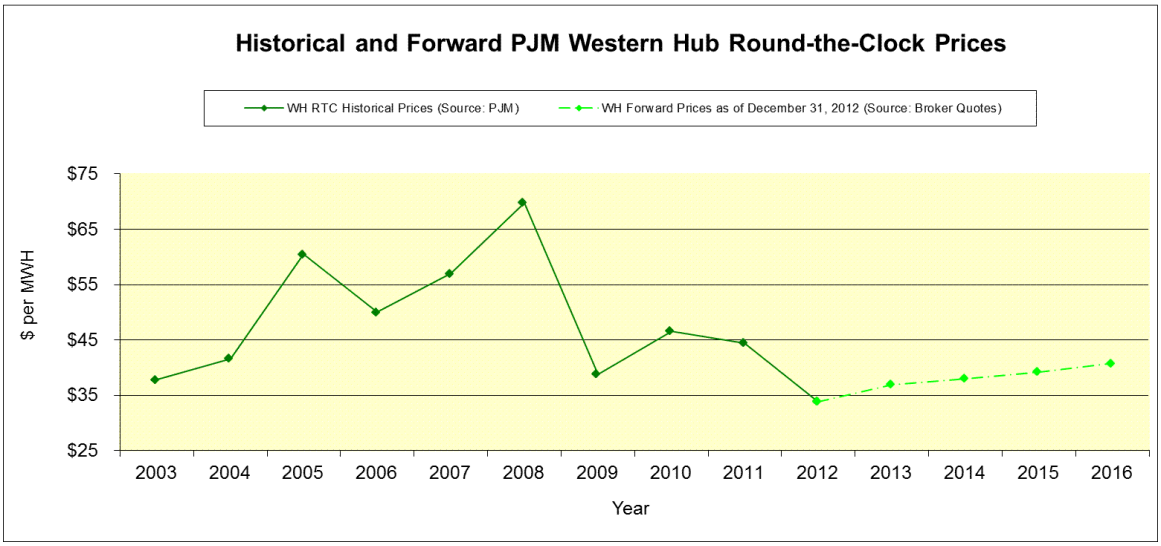
The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.





Historical data and forward prices would imply that the price of natural gas will continue to have a strong influence on the price of electricity in the primary markets in which we operate.

The prices reflected in the tables above do not necessarily illustrate our contract prices, but they are representative of market prices at relatively liquid hubs, with nearer-term forward pricing generally resulting from more liquid markets than pricing for later years. In addition, the prices do not reflect locational differences resulting from congestion or other factors, which can be considerable. While these prices provide some perspective on past and future prices, the forward prices are highly volatile and there can be no assurance that such prices will remain in effect or that we will be able to contract output at these forward prices.

Fuel Supply

- ***Nuclear Fuel Supply***—To run our nuclear units we have long-term contracts for nuclear fuel. These contracts provide for:
  - purchase of uranium (concentrates and uranium hexafluoride),
  - conversion of uranium concentrates to uranium hexafluoride,
  - enrichment of uranium hexafluoride, and
  - fabrication of nuclear fuel assemblies.

S1-SSA-0009 - 10623

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- ***Coal Supply***—Coal is the primary fuel for our Keystone, Conemaugh and Bridgeport stations. Coal is also used by Hudson and Mercer which operate on both coal and natural gas. We have coal contracts with numerous suppliers. Coal is delivered to our units through a combination of rail, truck, barge or ocean shipments.

  In order to minimize emissions levels, our Bridgeport 3 unit uses a specific type of coal obtained from Indonesia. If the supply from Indonesia or equivalent coal from other sources was not available for this facility, its long-term operations would be adversely impacted since additional material capital expenditures would be required to modify our Bridgeport 3 station to enable it to operate using a broader mix of coal sources.
- ***Gas Supply***—Natural gas is the primary fuel for the bulk of our load following and peaking fleet. We purchase gas directly from natural gas producers and marketers. These supplies are transported to New Jersey by four interstate pipelines with whom we have contracted. In addition, we have firm gas transportation contracts to serve our Bethlehem Energy Center (BEC) in New York.

  We have 1.3 billion cubic feet-per-day of firm transportation capacity under contract to meet our obligations under the BGSS contract. On an as available basis, this firm transportation capacity may also be used to serve the gas supply needs of our generation fleet. We supplement that supply with a total storage capacity of 76 billion cubic feet.
- ***Oil***—Oil is used as the primary fuel for one load following steam unit and nine combustion turbine peaking units and can be used as an alternate fuel by several load following and peaking units that have dual-fuel capability. Oil for operations is drawn from on-site storage and is generally purchased on the spot market and delivered by truck, barge or pipeline.

We expect to be able to meet the fuel supply demands of our customers and our own operations. However, the ability to maintain an adequate fuel supply could be affected by several factors not within our control, including changes in prices and demand, curtailments by suppliers, severe weather and other factors. For additional information, see Item 7. Management's Discussion and Analysis (MD&A)—Overview of 2012 and Future Outlook and Item 8. Financial Statements and Supplementary Data -Note 13. Commitments and Contingent Liabilities.

Markets and Market Pricing

Power's generation assets are located in three centralized, competitive electricity markets operated by ISO organizations all of which are subject to the regulatory oversight of the Federal Energy Regulatory Commission (FERC):

- **PJM Regional Transmission Organization**—PJM conducts the largest centrally dispatched energy market in North America. It serves over 60 million people, nearly 20% of the total United States population, and has a peak demand of over 163,848 MW. The PJM Interconnection coordinates the movement of electricity through all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia. The majority of our generating stations operate in PJM.
- **New York**—The NYISO is the market coordinator for New York State and is responsible for managing the New York Power Pool and for administering its energy marketplace. This service area has a population of about 19 million and a peak demand of over 33,939 MW. Our BEC station operates in New York.
- **New England**—ISO-NE coordinates the movement of electricity in a region covering Maine, New Hampshire, Vermont, Massachusetts, Connecticut and Rhode Island. This service area has a population of about 14 million and a peak demand of over 28,130 MW. Our Bridgeport and New Haven stations operate in Connecticut.

The price of electricity varies by location in each of these markets. Depending upon our production and our obligations, these price differentials can serve to increase or decrease our profitability.

Commodity prices, such as electricity, gas, coal, oil and emissions, as well as the availability of our diverse fleet of generation units to produce these products, also have a considerable effect on our profitability. These commodity prices have been, and continue to be, subject to significant market volatility. Over the long-term, the higher the forward prices are, the more attractive an environment exists for us to contract for the sale of our anticipated output. However, higher prices also increase the cost of replacement power; thereby placing us at greater risk should our generating units fail to function effectively or otherwise become unavailable.

Over the past few years, a decline in wholesale natural gas prices has resulted in lower electricity prices. One of the reasons for the decline in natural gas prices is greater supply from shale production. This trend has reduced margin on forward sales as we re-contract our expected generation output.

In addition to energy sales, we also earn revenue from capacity payments for our generating assets. These payments are compensation for committing a portion of our capacity to the ISO for dispatch at its discretion. Capacity payments reflect the

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

value to the ISO of assurance that there is sufficient generating capacity available at all times to meet system reliability and energy requirements. Currently, there is sufficient capacity in the markets in which we operate. However, in certain areas of these markets there are transmission system constraints, raising concerns about reliability and creating a more acute need for capacity.

In PJM and ISO-NE, where we operate most of our generation, the market design for capacity payments provides for a structured, forward-looking, transparent capacity pricing mechanism. This is through the Reliability Pricing Model (RPM) in PJM and the Forward Capacity Market (FCM) in ISO-NE. These mechanisms provide greater transparency regarding the value of capacity, resulting in an improved pricing signal to prospective investors in new generating facilities so as to encourage expansion of capacity to meet future market demands.

The prices to be received by generating units in PJM for capacity have been set through RPM base residual auctions and depend upon the zone in which the generating unit is located. The majority of our PJM generating units are located in zones where the following prices have been set:

Delivery Year	MW-day	kW-yr
June 2012 to May 2013	$ 139.73	$ 51.70
June 2013 to May 2014	$ 245.00	$ 89.43
June 2014 to May 2015	$ 136.50	$ 49.82
June 2015 to May 2016	$ 167.46	$ 61.12

For each delivery year, the prices differ in the various areas of PJM, depending on the constraints in each area of the transmission system. Keystone and Conemaugh receive lower prices than the majority of our PJM generating units since there are fewer constraints in that region and our generating units in northern New Jersey usually receive higher pricing.

The price that must be paid by an entity serving load in the various zones is also set through these auctions. These prices can be higher or lower than the prices noted in the table above due to import and export capability to and from lower-priced areas.

Like PJM and ISO-NE, the NYISO provides capacity payments to its generating units, but unlike the other two markets, the New York market does not provide a forward price signal beyond a six month auction period.

On a prospective basis, many factors may affect the capacity pricing, including but not limited to:

- changes in load and demand,
- changes in the available amounts of demand response resources,
- changes in available generating capacity (including retirements, additions, derates, forced outages, etc.),
- increases in transmission capability between zones,
- changes to the pricing mechanism, including potentially increasing the number of zones to create more pricing sensitivity to changes in supply and demand, as well as other potential changes that PJM and the other ISOs may propose over time, and
- changes driven by legislative and/or regulatory action, that permit states to subsidize local electric power generation.

For additional information on the RPM and FCM markets, as well as on state subsidization through various mechanisms, see Regulatory Issues—Federal Regulation.

Hedging Strategy

In an attempt to mitigate volatility in our results, we seek to contract in advance for a significant portion of our anticipated electric output, capacity and fuel needs. We seek to sell a portion of our anticipated lower-cost generation over a multi-year forward horizon, normally over a period of two to three years. We believe this hedging strategy increases stability of earnings.

Among the ways in which we hedge our output are: (1) sales at PJM West and (2) BGS contracts. Sales at PJM West reflect block energy sales at the liquid PJM Western Hub and other transactions that seek to secure price certainty for our generation related products. In addition, the BGS-Fixed Price contract, a full requirements contract that includes energy and capacity, ancillary and other services, is awarded for three-year periods through an auction process managed by the New Jersey Board of Public Utilities (BPU). The volume of BGS contracts and the electric utilities that our generation operations serve will vary from year to year. Pricing for the BGS contracts, including a capacity component, for recent and future periods by purchasing utility is as follows:

S1-SSA-0009 - 10625

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Load Zone ($/MWh)	2009-2012	2010-2013	2011-2014	2012-2015	2013-2016
PSE&G	$103.72	$95.77	$94.30	$83.88	$92.18
Jersey Central Power & Light	$103.51	$95.17	$92.56	$81.76	$83.70
Atlantic City Electric	$105.36	$98.56	$100.95	$85.10	$87.27
Rockland Electric Company	$112.70	$103.32	$106.84	$92.51	$92.58

We have obtained price certainty for all of our PJM and New England capacity through May 2016 through the RPM and FCM pricing mechanisms.

Although we enter into these hedges in an effort to provide price certainty for a large portion of our anticipated generation, there is variability in both our actual output as well as in our hedges. Our actual output will vary based upon total market demand, the relative cost position of our units compared to all units in the market and the operational flexibility of our units. Our hedge volume can also vary, depending on the type of hedge into which we have entered. The BGS auction, for example, results in a contract that provides for the supplier to serve a percentage of the default load of a New Jersey electric distribution company (EDC), that is, the load that remains after some customers have chosen to be served directly by third party suppliers. The amount of power supplied through the BGS auction varies based on the level of the EDC's default load, which is affected by the number of customers who choose a third party supplier, as well as by other factors such as weather and the economy.

Historically, the number of customers that have switched to third party suppliers was relatively constant, but in recent years, as market prices declined from past years' historic highs, there was additional incentive for more of the smaller commercial and industrial electric customers to switch. In a falling price environment, this has a negative impact on our margins, as the anticipated BGS pricing is replaced by lower spot market pricing. While this impact has been reduced as average BGS rates have declined to a level more closely resembling current market prices, customers may still see an incentive to switch to third party suppliers. We are unable to determine the degree to which this switching, or “migration,” will continue, but the impact on our results could be material.

As of February 6, 2013, we had contracted for the following percentages of our anticipated base load generation output for the next three years with modest amounts beyond 2015.

Base Load Generation	2013	2014	2015
Generation Sales	100%	80%-85%	40%-45%

Our strategy is to maintain certain levels of uranium in inventory and to make periodic purchases to support such levels. Our nuclear fuel commitments cover approximately 100% of its estimated uranium, enrichment and fabrication requirements for the three years. We also have various long-term fuel purchase commitments for coal to support our fossil generation stations. These purchase obligations are consistent with our strategy to enter into contracts for its fuel supply in comparable volumes to its sales contracts.

We take a more opportunistic approach in hedging our anticipated natural gas-fired generation. The generation from these units is less predictable, as a significant portion of these units will only dispatch when aggregate market demand has exceeded the supply provided by lower-cost units.

In a changing market environment, this hedging strategy may cause our realized prices to differ materially from current market prices. In a rising price environment, this strategy normally results in lower margins than would have been the case if little or no hedging activity had been conducted. Alternatively, in a falling price environment, this hedging strategy will tend to create margins higher than those implied by the then current market.

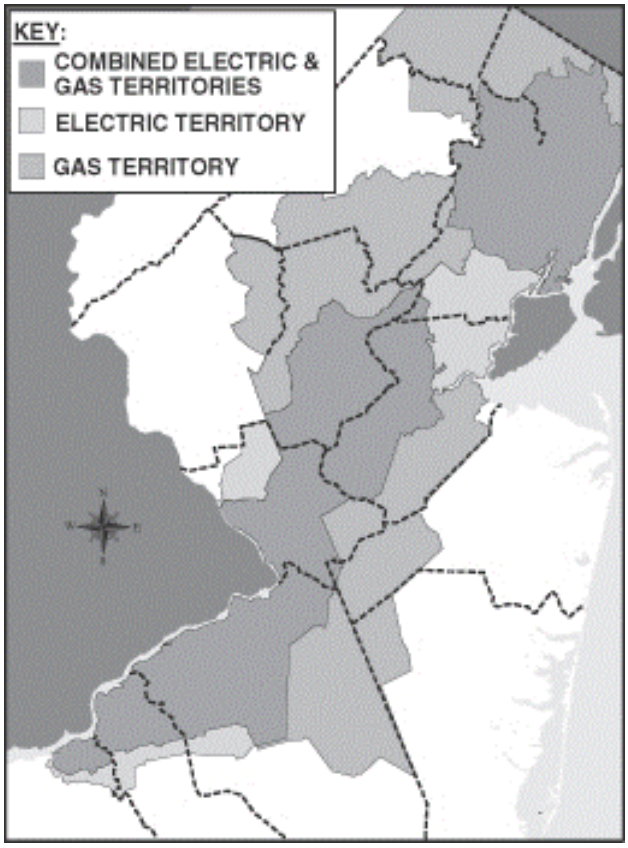
PSE&G

Our public utility, PSE&G, distributes electric energy and gas to customers within a designated service territory running diagonally across New Jersey where approximately 6.2 million people, or about 70% of New Jersey's population resides.



Products and Services

Our utility operations primarily earn margins through the transmission and distribution of electricity and the distribution of gas.

- **Transmission**—the movement of electricity at high voltage from generating plants to substations and transformers, where it is then reduced to a lower voltage for distribution to homes, businesses and industrial customers. Our revenues for these services are based upon tariffs approved by the FERC.
- **Distribution**—the delivery of electricity and gas to the retail customer's home, business or industrial facility. Our revenues for these services are based upon tariffs approved by the BPU.

We also earn margins through competitive services, such as appliance repair. The commodity portion of our utility business' electric and gas sales is managed by BGS and BGSS suppliers. Pricing for those services are set by the BPU as a pass-through, resulting in no margin for our utility operations.

In addition to our current utility products and services, we have implemented several programs to increase the level of solar generation including:

- a program to help finance the installation of solar power systems throughout our electric service area, and
- a program to develop, own and operate solar power systems.

We have also implemented a set of energy efficiency and demand response programs to encourage conservation and energy efficiency by providing energy and cost saving measures directly to businesses and families. For additional information concerning these programs and the components of our tariffs, see Regulatory Issues.

How PSE&G Operates

We provide network transmission and point-to-point transmission services, which are coordinated with PJM, and provide distribution service to 2.2 million electric customers and 1.8 million gas customers in a service area that covers approximately 2,600 square miles running diagonally across New Jersey. We serve the most heavily populated, commercialized and industrialized territory in New Jersey, including its six largest cities and approximately three hundred suburban and rural communities.

Transmission

We use formula rates for our transmission investments. Formula-type rates provide a method of rate recovery where the transmission owner annually determines its revenue requirements through a fixed formula which considers Operations and Maintenance expenditures, Rate Base and capital investments and applies an approved return on equity (ROE) in developing the weighted average cost of capital. Our approved rates provide for a base ROE of 11.68% on existing and new transmission investment, while certain investments are entitled to earn an additional incentive rate. For more information on current transmission construction activities, see Regulatory Issues, Federal Regulation—Transmission Regulation.

Transmission Statistics

December 31, 2012

Network Circuit Miles	Billing Peak (MW)	Historical Annual Load Growth 2008-2012
1,461	10,470	0.4%

Distribution

The primary business of our utility is the distribution of gas and electricity to end users in our service territory. Our load requirements were split among residential, commercial and industrial customers, as described below for 2012. We believe that we have all the franchise rights (including consents) necessary for our electric and gas distribution operations in the territory we serve.

	% of 2012 Sales	
Customer Type	**Electric**	**Gas**
Commercial	57%	36%
Residential	33%	60%
Industrial	10%	4%
Total	**100%**	**100%**

While our customer base has remained steady, gas and electric load have declined as illustrated:

Electric and Gas Distribution Statistics

December 31, 2012

	Number of Customers	Electric Sales and Gas Sold and Transported	Historical Annual Load Decline 2008-2012
Electric	2.2 Million	41,641 GWh	(1.4)%
Gas	1.8 Million	3,397 Million Therms	(0.6)%

The decline in both electric and gas sales were impacted by the unfavorable winter weather experienced in 2012 and customer conservation as a result of the economy. The first six months of 2012 were the warmest first half of a year on record in the United States. Electric sales were also impacted by a decline in the Industrial sector.

S1-SSA-0009 - 10628

Solar Generation

We have undertaken major initiatives in order to spur investment in solar power in New Jersey. For additional details, please refer to our discussion under Energy Policy.

Supply

Although commodity revenues make up almost 48% of our revenues, we make no margin on the supply of energy since the actual costs are passed through to our customers.

All electric and gas customers in New Jersey have the ability to choose their own electric energy and/or gas supplier. Pursuant to the BPU requirements, we serve as the supplier of last resort for electric and gas customers within our service territory that are not served by another supplier. As a practical matter, this means we are obligated to provide supply to a vast majority of residential customers and a smaller portion of commercial and industrial customers.

We procure the supply to meet our BGS obligations through auctions authorized by the BPU for New Jersey's total BGS requirement. These auctions take place annually in February. Results of these auctions determine which energy suppliers are authorized to supply BGS to New Jersey's EDCs. Once validated by the BPU, electricity prices for BGS service are set.

PSE&G procures the supply requirements of our default service BGSS gas customers through a full requirements contract with Power. The BPU has approved a mechanism designed to recover all gas commodity costs related to BGSS for residential customers. BGSS filings are made annually by June 1 of each year, with an effective date of October 1. Any difference between rates charged under the BGSS contract and rates charged to our residential customers is deferred and collected or refunded through adjustments in future rates. Commercial and industrial customers that do not have third party suppliers are also supplied under the BGSS arrangement. These customers are charged a market-based price largely determined by prices for commodity futures contracts.

Markets and Market Pricing

Historically, there has been significant volatility in commodity prices. Such volatility can have a considerable impact on us since a rising commodity price environment results in higher delivered electric and gas rates for customers. This could result in decreased demand for electricity and gas, increased regulatory pressures and greater working capital requirements as the collection of higher commodity costs from our customers may be deferred under our regulated rate structure. A declining commodity price on the other hand, would be expected to have the opposite effect. For additional information, including the impact of natural gas commodity prices on electricity prices such as BGS, see Item 7. MD&A—Overview of 2012 and Future Outlook.

Energy Holdings

Energy Holdings primarily owns and manages a portfolio of lease investments and solar generation projects and is exploring opportunities for additional investment in renewable generation.

Over the past several years, we have terminated all of our international leveraged leases in order to reduce the cash tax exposure related to these leases. We have also reduced our risk by opportunistically monetizing all of our previous international investments. In February, 2012, the California Public Utilities Commission approved the shutdown of GWF Power and we anticipate recovering the remaining book value of our investment. For additional information on these generation facilities, see Item 2. Properties.

Products and Services

The majority of our remaining $840 million of domestic lease investments are primarily energy-related leveraged leases. As of December 31, 2012, 67% of our total leveraged lease investments were rated as below investment grade by Standard & Poor's.

Our leveraged leasing portfolio is designed to provide a fixed rate of return. Leveraged lease investments involve three parties: an owner/lessor, a creditor and a lessee. In a typical leveraged lease financing, the lessor purchases an asset to be leased. The purchase price is typically financed 80% with debt provided by the creditor and the balance comes from equity funds provided by the lessor. The creditor provides long-term financing to the transaction secured by the property subject to the lease. Such long-term financing is non-recourse to the lessor and, with respect to our lease investments, is not presented on our Consolidated Balance Sheets.

The lessor acquires economic and tax ownership of the asset and then leases it to the lessee for a period of time no greater than 80% of its remaining useful life. As the owner, the lessor is entitled to depreciate the asset under applicable federal and state tax guidelines. The lessor receives income from lease payments made by the lessee during the term of the lease and from tax benefits associated with interest and depreciation deductions with respect to the leased property. Our ability to realize these tax

S1-SSA-0009 - 10629

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

benefits is dependent on operating gains generated by our other operating subsidiaries and allocated pursuant to the consolidated tax sharing agreement between us and our operating subsidiaries.

Lease rental payments are unconditional obligations of the lessee and are set at levels at least sufficient to service the non-recourse lease debt. The lessor is also entitled to any residual value associated with the leased asset at the end of the lease term. An evaluation of the after-tax cash flows to the lessor determines the return on the investment. Under accounting principles generally accepted in the United States (GAAP), the leveraged lease investment is recorded net of non-recourse debt and income is recognized as a constant return on the net unrecovered investment.

For additional information on leases, including the credit, tax and accounting risks, see Item 1A. Risk Factors, Item 7A. Quantitative and Qualitative Disclosures About Market Risk—Credit Risk, Item 8. Financial Statements and Supplementary Data—Note 8. Financing Receivables and Note 13. Commitments and Contingent Liabilities.

Through Energy Holdings, we own and operate solar projects in New Jersey, Delaware, Florida, Ohio and Arizona totaling 69 MW. See Item 2. Properties for additional information.

In January 2012, we acquired a 25 MW solar project in Arizona. This project is currently in service. All of the energy, capacity and environmental attributes generated by the project in the first 20 years are expected to be sold under a long-term power purchase agreement. The total investment for the project was approximately $75 million.

In September 2012, we acquired a 15 MW solar project in Delaware. This project is currently in service. The project has a 20-year power purchase agreement for energy and the majority of renewable energy credits with a wholesale electric utility servicing municipal EDCs in Delaware. Energy Holdings has issued guarantees of up to $37 million for payment of obligations related to the construction of the project, of which $4 million was outstanding as of December 31, 2012. The total investment for the project was approximately $47 million.

In December 2012, we acquired an additional 19 MW solar project currently under construction in Arizona. The project is expected to begin commercial operation in the latter half of 2013. Energy Holdings has issued guarantees of up to $48 million for payment of obligations related to the construction of the project, all of which were outstanding as of December 31, 2012. The total investment for the project is expected to be approximately $51 million.

Also, in December 2011, the Long Island Power Authority (LIPA) selected PSEG Long Island LLC (PSEG LI), a newly formed wholly owned subsidiary of Energy Holdings, to manage its electric transmission and distribution system in Long Island, New York. LIPA issued a press release that it had selected us for a variety of reasons, including our proven track record of first quartile customer service and reliability, commitment to cost control, corporate culture of transparency and local decision making, technical expertise and proven environmental track record. The ten-year contract, Operations Services Agreement (OSA), is scheduled to commence on January 1, 2014, following completion of the Transition Services Agreement (TSA). As part of the OSA, PSEG LI will be expected to develop and manage the implementation of a number of operational improvements to provide safe and reliable service for LIPA's customers, increase customer satisfaction and manage the operational and maintenance costs of LIPA. In November, 2012, the Governor of New York initiated an inquiry into the current structure of LIPA as a political subdivision of the State Of New York. The privatization of LIPA's transmission and distribution system is among the restructuring options under consideration. LIPA has the right under the OSA and the TSA to terminate each agreement, in the event that LIPA elects to either transfer its transmission and distribution system to a third party (privatization) or operate and maintain its transmission and distribution system with its own employees (municipalization). If LIPA elects to implement either of these options, LIPA is required to pay PSEG LI its service fees, milestone payments and wind-down expenses, in each case up to the effective date of such termination.

COMPETITIVE ENVIRONMENT

Power

Various market participants compete with us and one another in buying and selling in the wholesale energy markets, entering into bilateral contracts and selling to aggregated retail customers. Our competitors include:

- merchant generators,
- domestic and multi-national utility generators,
- energy marketers,
- banks, funds and other financial entities,
- fuel supply companies, and
- affiliates of other industrial companies.

S1-SSA-0009 - 10630

New additions of lower-cost or more efficient generation capacity could make our plants less economical in the future. Although it is not clear if this capacity will be built or, if so, what the economic impact will be, such additions could impact market prices and our competitiveness.

Our business is also under competitive pressure due to demand side management (DSM) and other efficiency efforts aimed at changing the quantity and patterns of usage by consumers which could result in a reduction in load requirements. A reduction in load requirements can also be caused by economic cycles, weather, customer migration and other factors. It is also possible that advances in technology, such as distributed generation, will reduce the cost of alternative methods of producing electricity to a level that is competitive with that of most central station electric production. To the extent that additions to the transmission system relieve or reduce congestion in eastern PJM where most of our plants are located, our revenues could be adversely affected. Changes in the rules governing what types of transmission will be built, who is permitted to build transmission and who will pay the costs of future transmission could also impact our revenues.

We are also at risk if the states in which we operate take actions that interfere with competitive wholesale markets. For example, on January 28, 2011, New Jersey enacted a law establishing a long-term capacity agreement pilot program (LCAPP) which provides for up to 2,000 MW of subsidized base load or mid-merit electric power generation. This action may have the effect of artificially depressing prices in the competitive wholesale market and thus has the potential to harm competitive markets, on both a short-term and a long-term basis.

Environmental issues, such as restrictions on emissions of carbon dioxide (CO_2) and other pollutants, may also have a competitive impact on us to the extent that it becomes more expensive for some of our plants to remain compliant, thus affecting our ability to be a lower-cost provider compared to competitors without such restrictions. In addition, most of our plants, which are located in the Northeast where rules are more stringent, can be at an economic disadvantage compared to our competitors in certain Midwest states. If any new legislation were to require our competitors to meet the environmental standards currently imposed upon us, we would likely have an economic advantage since we have already installed significant pollution-control technology at most of our fossil stations.

In addition, pressures from renewable resources could increase over time. For example, many parts of the country, including the mid-western region within the footprint of the Midwest Independent System Operator, the California ISO and the PJM region, have either implemented or proposed implementing changes to their respective regional transmission planning processes that may enable the construction of large amounts of "public policy" transmission to move renewable generation to load centers. For additional information, see the discussion in Regulatory Issues—Federal Regulation, below.

PSE&G

Our transmission and distribution business is minimally impacted when customers choose alternate electric or gas suppliers since we earn our return by providing transmission and distribution service, not by supplying the commodity. The demand for electric energy and gas by customers is affected by customer conservation, economic conditions, weather and other factors not within our control.

Changes in the current policies for building new transmission lines, such as those ordered by the FERC and being implemented by PJM and other ISOs to eliminate contractual provisions that provide us a "right of first refusal" to construct projects in our service territory, could result in additional competition to build transmission lines in our area in the future and would allow us to seek opportunities to build in other service territories.

Construction of new local generation, such as the proposed subsidized generation in New Jersey and Maryland, also has the potential to reduce the need for the construction of new transmission to transport remote generation and alleviate system constraints.

EMPLOYEE RELATIONS

As of December 31, 2012, we had 9,798 employees within our subsidiaries, including 6,248 covered under collective bargaining agreements. During the fourth quarter of 2012, we reached agreements with four labor unions to extend their collective bargaining agreements for four years. Three of these agreements expire in April 2017 and one expires in October 2017. Collectively, these four unions represent approximately 80% of union employees of PSE&G, Power and Services. Our collective bargaining agreements with our other two unions are set to expire in April and May 2014, respectively. We believe we maintain satisfactory relationships with our employees.

REGULATORY ISSUES

Federal Regulation

FERC

The FERC is an independent federal agency that regulates the transmission of electric energy and gas in interstate commerce and the sale of electric energy and gas at wholesale pursuant to the Federal Power Act (FPA) and the Natural Gas Act. PSE&G and the generation and energy trading subsidiaries of Power are public utilities as defined by the FPA. The FERC has extensive oversight over such "public utilities." FERC approval is usually required when a public utility seeks to: sell or acquire an asset that is regulated by the FERC (such as a transmission line or a generating station); collect costs from customers associated with a new transmission facility; charge a rate for wholesale sales under a contract or tariff; or engage in certain mergers and internal corporate reorganizations.

The FERC also regulates generating facilities known as qualifying facilities (QFs). QFs are cogeneration facilities that produce electricity and another form of useful thermal energy, or small power production facilities where the primary energy source is renewable, biomass, waste or geothermal resources. QFs must meet certain criteria established by the FERC. We own various QFs through Energy Holdings. QFs are subject to some, but not all, of the same FERC requirements as public utilities.

The FERC also regulates Regional Transmission Operators/ISOs, such as PJM, and their energy and capacity markets.

For us, the major effects of the FERC regulation fall into five general categories:

- Regulation of Wholesale Sales—Generation/Market Issues
- Energy Clearing Prices
- Capacity Market Issues
- Transmission Regulation
- Compliance

Regulation of Wholesale Sales—Generation/Market Issues

Market Power

Under FERC regulations, public utilities must receive FERC authorization to sell power in interstate commerce. They can sell power at cost-based rates or apply to the FERC for authority to make market based rate (MBR) sales. For a requesting company to receive MBR authority, the FERC must first make a determination that the requesting company lacks market power in the relevant markets and/or that market power in the relevant markets is sufficiently mitigated. The FERC requires that holders of MBR tariffs file an update every three years demonstrating that they continue to lack market power and/or that market power has been sufficiently mitigated and report in the interim to FERC any material change in facts from those the FERC relied on in granting MBR authority.

PSE&G, PSEG Energy Resources & Trade LLC, PSEG Power Connecticut, PSEG Fossil LLC and PSEG Nuclear LLC were each granted continued MBR authority from the FERC in June 2011. PSEG New Haven LLC was also granted initial MBR authority in May 2012. Retention of MBR authority is important to the maintenance of our current generation business' revenues.

Energy Clearing Prices

Energy clearing prices in the markets in which we operate are generally based on bids submitted by generating units. Under FERC-approved market rules, bids are subject to price caps and mitigation rules applicable to certain generation units. The FERC rules also govern the overall design of these markets. At present, all units receive a single clearing price based on the bid of the marginal unit (i.e. the last unit that must be dispatched to serve the needs of load). These FERC rules have a direct impact on the energy prices received by our units.

Capacity Market Issues

PJM, NYISO, and ISO-NE each have capacity markets that have been approved by FERC.

PJM—RPM is a locational installed capacity market design for the PJM region, including a forward auction for installed capacity. Under RPM, generators located in constrained areas within PJM are paid more for their capacity as an incentive to ensure adequate supply where generation capacity is most needed. The mechanics of RPM in PJM continue to evolve and be refined in stakeholder proceedings in which we are active, and there is currently significant discussion about the future role of demand response in the RPM market, including examining how demand response resources should be paid and how these resources and programs should be measured and verified to ensure their availability.

ISO-NE—ISO-NE's market for installed capacity with all generators in New England provides fixed capacity payments. The market design consists of a forward-looking auction for installed capacity that is intended to recognize the locational value of generators on the system and contains incentive mechanisms to encourage generator availability during generation shortages. As in PJM, capacity market rules in ISO-NE continue to develop. We challenged in court the results of ISO-NE's first forward capacity auction, arguing that our units received inadequate compensation notwithstanding the location of our resources in a constrained area. The D.C. Circuit Court of Appeals ruled in our favor and remanded the proceeding to the FERC where it remains pending. We and other generators also filed a complaint at the FERC regarding ISO-NE's capacity market design, alleging that it insufficiently reflects locational capacity values. The FERC acted on the complaint, largely accepting the ISO-NE's capacity market design; however, an appeal of this rule is pending.

NYISO—NYISO operates a short-term capacity market that provides a forward price signal only for six months into the future. The NYISO capacity model recognizes only two separate zones that potentially may separate in price: New York City and Long Island. NYISO is creating a third locality encompassing the lower Hudson Valley to take effect May 1, 2014. The exact configuration of this new zone has not yet been determined. The triennial process for updating demand curves used for establishing capacity prices is also underway. The NYISO is required to file with the FERC by the end of 2013 revised demand curves covering the May 1, 2014 through April 30, 2017 period. Discussions concerning other potential changes to NYISO capacity markets, including rules to govern payments and bidding requirements for generators proposing to exit the market but required to remain in service for reliability reasons, are also ongoing.

Long-Term Capacity Agreement Pilot Program Act (LCAPP)—In 2011, the State of New Jersey concluded that new natural gas-fired generation was needed and enacted the LCAPP Act to subsidize approximately 2,000 MW of new generation. The LCAPP Act provided that subsidies would be offered through long-term standard offer capacity agreements (SOCAs) between selected generators and the New Jersey Electric Distribution Companies (EDCs). The SOCA required each New Jersey EDC to provide the generators with guaranteed capacity payments funded by ratepayers. Each of the New Jersey EDCs, including PSE&G, entered into the SOCAs as directed by the State, but did so under protest reserving their rights. In May 2012, two of the three generators, CPV Shore, LLC (CPV), a subsidiary of Competitive Power Ventures, Inc. and Hess Newark, LLC (Hess), a subsidiary of Hess Corporation, that received SOCA contracts cleared the RPM auction for the 2015/2016 delivery year in the aggregate notional amount of approximately 1,300 MW of installed capacity.

Legal challenges to the BPU's implementation of the LCAPP Act were filed in New Jersey appellate court and the appeal remains pending. In addition, the LCAPP Act has been challenged on constitutional grounds in federal court. The hearing for this matter is scheduled to begin in March 2013.

Maryland is also taking action to subsidize above-market new generation. In April 2012, the Maryland Public Service Commission (PSC) issued an order requiring the Maryland utility companies to enter into a contract with CPV Shore, LLC (CPV) to build a new 661 MW natural gas-fired, combined cycle station in Maryland with an in-service date of June 2015. This contract has not yet been finalized, as the Maryland PSC continues to evaluate its terms. In the May 2012 RPM auction, the CPV generator cleared the auction. We have joined other generators in challenging this order on constitutional grounds in federal court and that case is set for hearing in March 2013. The Maryland EDCs have also appealed the April 2012 order in state court.

These efforts to artificially depress prices in the wholesale capacity auction were intended to be mitigated by the Minimum Offer Price Rule (MOPR) approved by the FERC. The MOPR was intended to restrict new generation from bidding in RPM at less than an established minimum level established by Tariff, or a cost-based bid to the extent that the generator can demonstrate that its costs are lower than the MOPR. The MOPR was in place for the May 2012 auction, but we believe it did

S1-SSA-0009 - 10633

Past financial performance is no guarantee of future results.

not operate to protect the market against these suppression efforts given that two of the three SOCA generators cleared the auction. As a result, discussions among a diverse group of PJM stakeholders to improve the MOPR ensued and a settlement was reached among those stakeholders. That proposal was then subject to a PJM stakeholder review and vote. The proposal was modified and received almost a 90% supporting vote. In December 2012, PJM filed Tariff changes with the FERC to implement the revised MOPR. In February 2013, the FERC issued a deficiency letter to PJM seeking additional information regarding the proposed MOPR changes. PJM must respond to those changes within 30 days and then the FERC has 60 days to act on the proposal. If FERC approves the proposal, we believe these modifications should significantly improve the MOPR rules and appropriately reduce the ability for subsidized generation assets to artificially suppress wholesale market prices. We cannot predict the outcome of this matter.

Transmission Regulation

The FERC has exclusive jurisdiction to establish the rates and terms and conditions of service for interstate transmission. We currently have FERC-approved formula rates in effect to recover the costs of our transmission facilities. Under this formula, rates are put into effect in January of each year based upon our internal forecast of annual expenses and capital expenditures. Rates are then trued up the following year to reflect actual annual expenses/capital expenditures. Our allowed ROE is 11.68% for both existing and new transmission investments and we have received incentive rates, affording a higher ROE, for certain large scale transmission investments. Our 2012 Annual Formula Rate Update with the FERC provided for approximately $94 million in increased annual transmission revenues effective January 1, 2012. We filed our 2013 Annual Formula Rate Update with the FERC in October 2012, which provides for approximately $174 million in increased annual transmission revenues effective January 1, 2013.

- ***Transmission Policy Developments***—In 2010, the FERC initiated a proceeding to evaluate whether reforms to current transmission planning and cost allocation rules were necessary to stimulate additional transmission development. The rulemaking also addressed the issue of whether construction of transmission should be opened up to competition by eliminating the "right of first refusal" (ROFR) under which incumbent transmission companies such as PSE&G have a ROFR to build transmission located within their respective service territories. The FERC ultimately concluded in Order No. 1000 that the ROFR should be eliminated, subject to certain exceptions, and left it to Regional Transmission Organizations/Independent System Operators such as PJM to establish the implementation details. We, along with many other companies, have challenged the FERC's orders in federal court. In addition, we have joined other PJM transmission owners in filing for the FERC approval of new rules that will determine who pays for future transmission projects in PJM.

  We cannot predict the final outcome or impact on us; however, specific implementation of Order 1000 in the various regions, including within our service territory, may expose us to competition for certain types of transmission projects, while at the same time providing opportunities to build transmission outside of our service territory.

- ***Transmission Expansion***—In June 2007, PJM identified the need for the construction of the Susquehanna-Roseland line, a new 500 kiloVolt (kV) transmission line intended to maintain the reliability of the electrical grid serving New Jersey customers. PJM assigned construction responsibility for the new line to us and PPL Corporation (PPL) for the New Jersey and Pennsylvania portions of the project, respectively. The estimated cost of our portion of this construction project is up to $790 million, and PJM had originally directed that the line be placed into service by June 2012. As of December 31, 2012, total capital expenditures were $324 million. Construction of the Susquehanna-Roseland line is contingent upon obtaining all necessary federal, state, municipal and landowner permits and approvals. We have obtained environmental permits for the project from the New Jersey Department of Environmental Protection (NJDEP). On October 1, 2012, the National Park Service (NPS) issued a final Environmental Impact Statement (EIS) for the Susquehanna-Roseland line, selecting our and PPL's choice of route in certain federal park lands subject to the NPS' jurisdiction that follows the existing right of way. On October 15, 2012, several environmental groups filed a complaint in federal court, which, as amended, challenges the NPS' issuance of the final EIS, seeking to set aside the EIS and asking the court for an injunction that would generally prohibit construction of the project within the federal park lands at issue. If this request for injunctive relief is granted, the construction schedule for the project could be impacted. We have begun construction in those areas where necessary permits have been obtained. Currently, the expected in-service date for the Eastern segment of the project is June 2014 and for the Western segment is June 2015, although further delays are possible. Delays in the construction schedule could impact the cost of construction and the timing of expected transmission revenues.

Also, in 2010, certain environmental groups had appealed the BPU's approval of the Susquehanna-Roseland line, although no stay was sought. On February 11, 2013, the Appellate Division of the New Jersey Superior Court issued an order rejecting the appeal and affirming the BPU's approval of the project.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

We had previously been directed by PJM to build a 500 kV reliability project from Branchburg to Roseland to Hudson. The scope of this project has since changed; it is now a 230 kV project referred to as the Northeast Grid project, for which we are currently seeking to obtain municipal siting approvals. The Northeast Grid project has an expected in-service date of June 2015 and an estimated cost of construction of $895 million. As of December 31, 2012, total capital expenditures were $88 million.

In 2012, both the BPU and the NJDEP approved siting of the North Central Reliability project. This project, which involves upgrading certain circuits and switching stations from 138 kV to 230 kV in the northern and central portions of New Jersey, is estimated to cost up to $390 million and has an in-service date of June 2014. The project is currently under construction and, as of December 31, 2012, total capital expenditures for this project were $163 million.

In 2012, we received both municipal siting and the NJDEP approval for the Burlington-Camden project. The project, which also involves upgrading certain circuits and switching stations from 138 kV to 230 kV in the southern portion of New Jersey, is estimated to cost up to $399 million and has an in-service date of June 2014. The project is currently under construction. As of December 31, 2012, total capital expenditures for the project were $169 million.

We are still in the process of obtaining necessary municipal and environmental approvals for the Mickleton-Gloucester-Camden project. This is another project that involves converting both circuits and switching stations from 138 kV to 230 kV in southern New Jersey and is estimated to cost up to $435 million. The project has an in-service date of June 2015. This project is still in the engineering/design phase and, as of December 31, 2012, total capital expenditures were $24 million.

- ***Transmission Rate Proceedings***—In September 2011, the Massachusetts Attorney General, along with several state utility commissions, consumer advocates and consumer groups from six New England states, filed a complaint at the FERC against a group of New England transmission owners seeking to reduce the base return on equity used in calculating these transmission owners' formula transmission rates. The matter has been set for hearing, and the proceeding is pending. In addition, there have been FERC complaints filed by municipal utilities in New York against a New York transmission-owning utility seeking to lower that utility's transmission ROE. While we are not the subject of any of these complaints. The results of these proceedings could set a precedent for the FERC-regulated transmission owners with formula rates in place, such as ours.

Compliance

- ***FERC Audit***—Each of the PSEG companies that have MBR authority from the FERC is being audited by the FERC for compliance with its rules for (i) receiving and retaining MBR authority (ii) the filing of electric quarterly reports and (iii) our units' receipt of payments from the RTO/ISO when they are required to run for reliability reasons when it is not economic for them to do so. The FERC will issue a report at the conclusion of the audit.
- ***Reliability Standards—***Congress has required the FERC to put in place, through the North American Electric Reliability Council (NERC), national and regional reliability standards to ensure the reliability of the United States electric transmission and generation system and to prevent major system blackouts. Many reliability standards have been developed and approved. These standards apply both to reliability of physical assets interconnected to the bulk power system and to the protection of critical cyber assets. Our generation assets were audited in 2011 and our utility assets were audited in 2012. NERC compliance represents a significant and challenging area of compliance responsibility for us. As new standards are developed and approved, existing standards are revised and registration requirements are modified which could increase our compliance responsibilities.

Commodity Futures Trading Commission (CFTC)

In accordance with the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), the SEC and the CFTC are in the process of implementing a new regulatory framework for swaps and security-based swaps. The legislation was enacted to reduce systemic risk, increase transparency and promote market integrity within the financial system by providing for the registration and comprehensive regulation of swap dealers and by imposing recordkeeping, data reporting, margin and clearing requirements with respect to swaps. To implement the Dodd-Frank Act, the CFTC has engaged in a comprehensive rulemaking process and has issued a number of proposed and final rules addressing many of the key issues. For example, the CFTC has issued rules defining the term “swap dealer” and “commercial end user” (We fall in the latter category). The CFTC also issued rules establishing position limits for trading in certain commodities, such as natural gas but a federal court vacated these rules. The CFTC has appealed this decision to vacate the position limits rules. We are currently preparing to comply with the new record keeping and data reporting requirements of the Dodd-Frank Act applicable to commercial end users, for compliance in April 2013. We are continuing to analyze the potential impact of these rules and preparing to comply with the requirements that apply to entities that are considered commercial end-users under the Dodd-Frank Act.

Nuclear Regulatory Commission (NRC)

Our operation of nuclear generating facilities is subject to comprehensive regulation by the NRC, a federal agency established to regulate nuclear activities to ensure protection of public health and safety, as well as the security and protection of the environment. Such regulation involves testing, evaluation and modification of all aspects of plant operation in light of NRC safety and environmental requirements. Continuous demonstration to the NRC that plant operations meet requirements is also necessary. The NRC has the ultimate authority to determine whether any nuclear generating unit may operate. The current operating licenses of our nuclear facilities expire in the years shown below:

Unit	Year
Salem Unit 1	2036
Salem Unit 2	2040
Hope Creek	2046
Peach Bottom Unit 2	2033
Peach Bottom Unit 3	2034

In 2010, we also filed an application for an Early Site Permit (ESP) for a new nuclear generating station to be located at the current site of the Salem and Hope Creek generating stations. The NRC acceptance review is complete and agency evaluation is underway. There were no petitions filed for permission to intervene. The current NRC schedule would likely result in a decision with respect to the issuance of the ESP in 2015. While the ESP qualifies the site as an approved location for a new reactor for a period of 20 years, it imposes no obligation to do so.

As a result of events at the Fukushima Daiichi nuclear facility in Japan following the earthquake and tsunami in March 2011, the NRC began performing additional operational and safety reviews of nuclear facilities in the United States. These reviews and the lessons learned from the events in Japan have resulted in additional regulation for the nuclear industry and could impact future operations and capital requirements for our facilities. We believe that our nuclear plants currently meet the stringent applicable design and safety specifications of the NRC.

In 2011, the NRC task force submitted a report containing various recommendations to ensure plant protection, enhance accident mitigation, strengthen emergency preparedness and improve NRC program efficiency. The NRC staff also issued a document which provided for a prioritization of the task force recommendations. The NRC approved the staff's prioritization and implementation recommendations subject to a number of conditions. Among other things, the NRC advised the staff to give the highest priority to those activities that can achieve the greatest safety benefit and/or have the broadest applicability (Tier 1), to review filtration of boiling water reactor (BWR) primary containment vents and encouraged the staff to create requirements based on a performance-based system which allows for flexible approaches and the ability to address a diverse range of site-specific circumstances and conditions and strive to implement the requirements by 2016. The NRC issued letters and orders to licensees implementing the Tier 1 recommendations in March 2012. Additional regulations are expected.

Separately, a petition was filed with the NRC in April 2011 seeking suspension of the operating licenses of all General Electric BWRs utilizing the Mark I containment design in the United States, including our Hope Creek and Peach Bottom units, pending completion of the NRC review. Fukushima Daiichi Units 1-4 are BWRs equipped with Mark I containments. The petition names 23 of the total 104 active commercial nuclear reactors in the United States. While we do not believe the petition will be successful, we are unable to predict the outcome of any action that the NRC may take in connection with the petition

State Regulation

Since our operations are primarily located within New Jersey, our principal state regulator is the BPU, which oversees electric and natural gas distribution companies in New Jersey. Our utility operations are subject to comprehensive regulation by the BPU including, among other matters, regulation of retail electric and gas distribution rates and service, the issuance and sale of certain types of securities and compliance matters. PSE&G's participation in solar, demand response and energy efficiency programs is also regulated by the BPU, as the terms and conditions of these programs are approved by the BPU. BPU regulation can also have a direct or indirect impact on our power generation business as it relates to energy supply agreements and energy policy in New Jersey.

We are also subject to various other states' regulations due to our operations in those states.

Rates

- ***Electric and Gas Base Rates***—We must file electric and gas rate cases with the BPU in order to change our utility base distribution rates. Our last base rate adjustment was in 2010.

S1-SSA-0009 - 10636

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- ***Rate Adjustment Clauses and Other Regulatory Filings***—In addition to base rates, we recover certain costs or earn on certain investments, from customers pursuant to mechanisms known as adjustment clauses. These clauses permit, at set intervals, the flow-through of costs to, or the recovery of investments from, customers related to specific programs, outside the context of base rate case proceedings. Recovery of these costs or investments is subject to BPU approval for which we make periodic filings. Delays in the pass-through of costs or recovery of investments under these mechanisms could result in significant changes in cash flow. For additional information on our specific filings, see Item 8. Financial Statements and Supplementary Data—Note 6. Regulatory Assets and Liabilities.

Some of our more significant recovery mechanisms and filings are as follows:

- ***Storm Damage Deferral***—In December 2012, the BPU granted our request to defer on our books actually incurred, uninsured, incremental storm restoration costs to our gas and electric distribution systems associated with extraordinary storms, including Hurricane Irene and Superstorm Sandy. In February 2013, the BPU announced that it would initiate a generic proceeding to evaluate the prudency of extraordinary, storm-related costs incurred by all of the regulated utilities as a result of the natural disasters experienced in New Jersey in 2011 and 2012 and in this proceeding will consider the manner in which such prudent costs shall be recovered.
- ***Capital Infrastructure Programs (CIP I and CIP II)***—We have received approval from the BPU for programs that provide for accelerated investment in utility infrastructure. The goal of these accelerated capital investments is to improve the reliability of our utility's infrastructure and New Jersey's economy through job creation. The programs allow us to receive a full return of and on our investments. In December 2012, the BPU approved stipulations regarding our CIP I and CIP II filings effective January 1, 2013. These Orders resulted in a combined increase of $40 million and $23 million for electric and gas customers, respectively.
- ***Weather Normalization Clause (WNC)***—Our WNC is an annual rate mechanism that allows us to increase our rates to compensate for lower revenues we receive from customers as a result of warmer-than-normal winters and to decrease our rates to make up for higher revenues we receive as a result of colder-than-normal winters. The payments and refunds are subject to certain limitations and rate caps. Unrecovered balances associated with application of the rate cap are deferred until the next recovery period. This rate mechanism requires us to calculate, at the end of each October-to-May period, the level by which margin revenues differed from what would have resulted if normal weather had occurred. In June 2012, we filed a petition and testimony with the BPU including eight months of actual and four months of forecasted data, which sought BPU approval to recover $41 million in deficiency revenues from our customers during the 2012-2013 Winter Period (October 1 to May 31) and a carryover deficiency of $16 million to the 2013-2014 Winter Period. In September 2012, an Order approving the stipulation for provisional rates was signed. In December 2012, we made a supplemental filing incorporating twelve months of actual financial data, which would, if approved by the BPU, result in no change to customer rates during the 2012-2013 Winter Period. The supplemental filing would, however, result in an increase of the carryover deficiency to the 2013-2014 Winter Period from $16 million to $24 million. We are awaiting a final Order.
- ***Solar and Energy Efficiency Recovery Charges (RRC)*** —are comprised of: Carbon Abatement, Energy Efficiency Economic Stimulus Program (EEE), EEE Extension, Demand Response, Solar 4 All, and Solar Loan II. These programs are aimed at reducing the New Jersey's Greenhouse Gas (GHG) Emissions. We file for annual recovery for our investments under these programs which includes a return on our investment and recovery of expenses. In July 2012, we filed a petition with the BPU requesting an increase in RRC seeking to recover approximately $62 million in electric revenue and $8 million in gas revenue, on an annual basis consistent with the terms of the approved program. The discovery phase of this proceeding is underway.

Other material rate filings pending before the BPU include:

Energy Strong (ES) Program—In February 2013, we filed a petition with the BPU describing the improvements we recommend making to our BPU jurisdictional electric and gas system to harden and improve resiliency for the future. The changes that were described would be made over a ten year period. In this petition, we are seeking approval to invest $0.9 billion in our gas distribution system and $1.7 billion in our electric distribution system over an initial five year period, plus associated expenses, and to receive contemporaneous recovery of and on such investments. The current estimated cost of the entire program, including the first five years of investments for which we sought approval in this petition, is $3.9 billion. We anticipate seeking BPU approval to complete our investment under the program at a later date. For additional information, see Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Capital Requirements.

Solar 4 All Extension—In July 2012, we filed for an extension of our Solar 4 All program. In this filing, we are seeking BPU approval to invest up to $690 million to develop 136 MW of utility-owned solar photovoltaic systems over a five year period starting in 2013. Consistent with the existing Solar 4 All program, we propose to sell the energy and capacity from the solar systems in the PJM wholesale energy and capacity markets which will offset the cost of the program.

We also filed for an additional extension of our Solar Loan program (Solar Loan III) in July 2012. In the filing, we are seeking BPU approval to provide financing support for the installation of 97.5 MW of solar systems by providing loans to qualified customers. The total investment of the proposed Solar Loan III program is anticipated to be up to $193 million once the program is fully subscribed, the projects are built and the loans are closed.

Energy Supply

BGS—New Jersey's EDCs provide two types of BGS, the default electric supply service for customers who do not have a third party supplier. The first type, which represents about 80% of PSE&G's load requirements, provides default supply service for smaller industrial and commercial customers and residential customers at seasonally-adjusted fixed prices for a three-year term (BGS-Fixed Price). These rates change annually on June 1 and are based on the average price obtained at auctions in the current year and two prior years. The second type provides default supply for larger customers, with energy priced at hourly PJM real-time market prices for a contract term of 12 months (BGS-CIEP).

All of New Jersey's EDCs jointly procure the supply to meet their BGS obligations through two concurrent auctions authorized each year by the BPU for New Jersey's total BGS requirement. These auctions take place annually in February. Results of these auctions determine which energy suppliers provide BGS to New Jersey's EDCs.

Approximately one-third of PSE&G's total BGS-Fixed Price eligible load is auctioned each year for a three-year term. Current pricing is as follows:

	2010	2011	2012	2013	
36 Month Terms Ending	May 2013	May 2014	May 2015	May 2016	(A)
Eligible Load (MW)	2,800	2,800	2,900	2,800	
$ per kWh	0.09577	0.09430	0.08388	0.09218	

(A) Prices set in the February 2013 BGS Auction will be effective on June 1, 2013 when the 2010 BGS agreements expire.

The BPU approved the auction process for 2013 with no significant changes to the process.

For additional information, see Item 8. Financial Statements and Supplementary Data— Note 13. Commitments and Contingent Liabilities.

BGSS—BGSS is the mechanism approved by the BPU designed to recover all gas costs related to the supply for residential customers. BGSS filings are made annually by June 1 of each year, with an effective date of October 1. PSE&G's revenues are matched with its costs using deferral accounting, with the goal of achieving a zero cumulative balance by September 30 of each year. In addition, we have the ability to put in place two self-implementing BGSS increases on December 1 and February 1 of up to 5% and also may reduce the BGSS rate at any time.

PSE&G had a full requirements contract with Power for an initial period which extended through March 2012 to meet the supply requirements of default service gas customers. This long-term contract continues on a year-to-year basis thereafter, unless terminated by either party with a one year notice. Power charges PSE&G for gas commodity costs which PSE&G recovers from customers. Any difference between rates charged by Power under the BGSS contract and rates charged to PSE&G's residential customers are deferred and collected or refunded through adjustments in future rates. PSE&G earns no margin on the provision of BGSS.

In June 2012, we made our annual BGSS filing with the BPU. The filing requested a decrease in annual BGSS revenue of $71 million, excluding sales and use tax, to be effective October 1, 2012. This represented a reduction of approximately 5.2% for a typical residential gas heating customer. This BGSS reduction was the ninth consecutive reduction since January 2009. We entered into a Stipulation with the parties which put the requested lower BGSS rate into effect as filed on October 1, 2012 on a provisional basis. A final decision is expected in early 2013.

Energy Policy

New Jersey Energy Master Plan (EMP)—New Jersey law requires that an EMP be developed every three years, the purpose of which is to ensure safe, secure and reasonably-priced energy supply, foster economic growth and development and protect the environment. The most recent EMP was finalized in December 2011.

The 2011 EMP places an emphasis on expanding in-state electricity resources and reducing energy costs. The plan also recognizes the impact of climate change and accepts the previously set goal of a 22.5% target for the renewable portfolio standard (RPS) in 2021. It also references a goal that 70% of New Jersey's energy supplies should be from clean energy sources by 2050. To meet this goal, the plan redefined clean energy to include nuclear, natural gas and hydro power along with defined renewable sources and proposes a number of changes aimed at reducing the cost of achieving the 22.5% goal.

Specific program initiatives in the EMP include:

- construction of new combined cycle natural gas plants through the implementation of LCAPP, with the continued State challenge to FERC and PJM policies on market pricing rules in the capacity market,
- support for construction of new nuclear generation,
- changes to the solar program to reduce cost, expand opportunities, expand transparency and ensure economic and environmental benefits,
- expanded natural gas use to meet energy needs,
- development of decentralized combined heat and power,
- redesign of the delivery of state energy efficiency programs, and
- continued support for implementation of off-shore wind, without setting a specific capacity goal.

Solar Initiatives—In order to spur investment in solar power in New Jersey and meet renewable energy goals, we have undertaken two major initiatives at PSE&G.

- **Solar Loans:** The first solar initiative helps finance the installation of 81 MW of solar systems throughout our electric service area by providing loans to customers. The borrowers can repay the loans over a period of either 10 years (for residential customer loans) or 15 years (for non-residential customers), by providing us with solar renewable energy certificates (SRECs) or cash. The value of the SRECs towards the repayment of the loan is guaranteed to be not less than a floor price. SRECs received by us in repayment of the loan are sold through a periodic auction. Proceeds are used to offset program costs.

  The total investment of both phases of the Solar Loan Program is expected to be between $210 million and $250 million once the program is fully subscribed, projects are built and loans are closed. As of December 31, 2012, we have provided a total of $209 million in loans for 878 projects representing 67 MW.

- **Solar 4 All:** The second solar initiative is the Solar 4 All Program under which we are investing approximately $456 million to develop 80 MW of utility-owned solar photovoltaic (PV) systems over four years. The program consists of centralized solar systems 500 kW or greater installed on PSE&G-owned property and third-party sites in our electric service territory (40 MW) and solar panels installed on distribution system poles (40 MW). We sell the energy and capacity from the systems in the PJM wholesale electricity market. In addition, we sell any SRECs received from the projects through the same auction used in the loan program. Proceeds from these sales are used to offset program costs.

  As of December 31, 2012, we have installed and placed in service 35 MW on approximately 160,000 distribution poles with an investment of approximately $245 million, and 39 MW of centralized solar systems representing 23 projects with an investment of approximately $192 million.

BPU Storm Report — In 2011, the BPU commenced an investigation of all four New Jersey electric utilities, including PSE&G, to examine their preparations, performance and restoration efforts during Hurricane Irene and the October 2011 snow storm. Following the completion of a report by its consultant, the BPU issued an order in January 2013, ordering the utilities to take specific action to improve their preparedness and responses to major storms. There are 103 separate measures contained in the Order, with most of the measures requiring utility implementation by September 2013. We are evaluating the implications of this report.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

BPU Audits

Management/Affiliate Audit—In 2009, the BPU, in accordance with New Jersey statutes, initiated audits of PSE&G with respect to the effectiveness of its management and its compliance with rules governing PSE&G's interactions with its affiliated companies. In 2012, the BPU issued a report making a number of findings and recommendations, including the finding that no violations of either the state or federal affiliate rules were found. The BPU is expected to issue an order addressing the audit report's findings and recommendations, although timing is uncertain.

BPU Investigations

RRC/CIP—In January 2012, New Jersey's Rate Counsel requested that the BPU investigate certain allegations of wrong doing in PSE&G's solar, EEE, and CIP programs raised by three former employees in a lawsuit. The BPU initiated an inquiry into these allegations and requested documentation from PSE&G. PSE&G has cooperated with the BPU and provided all requested information and documentation.

ENVIRONMENTAL MATTERS

Changing environmental laws and regulations significantly impact the manner in which our operations are currently conducted and impose costs on us to reduce the health and environmental impacts of our operations. To the extent that environmental requirements are more stringent and compliance more costly in certain states where we operate compared to other states that are part of the same market, such rules may impact our ability to compete within that market. Due to evolving environmental regulations, it is difficult to project future costs of compliance and their impact on competition. Capital costs of complying with known pollution control requirements are included in our estimate of construction expenditures in Item 7. MD&A—Capital Requirements. The costs of compliance associated with any new requirements that may be imposed by future regulations are not known, but may be material.

Areas of environmental regulation may include, but are not limited to:

- air pollution control,
- climate change,
- water pollution control,
- hazardous substance liability, and
- fuel and waste disposal.

For additional information related to environmental matters, including proceedings not discussed below, as well as anticipated expenditures for installation of pollution control equipment, hazardous substance liabilities and fuel and waste disposal costs, see Item 1A. Risk Factors, Item 3. Legal Proceedings and Item 8. Financial Statements and Supplementary Data—Note 13. Commitments and Contingent Liabilities.

Air Pollution Control

Our facilities are subject to federal regulation under the Clean Air Act (CAA) which requires controls of emissions from sources of air pollution and imposes record keeping, reporting and permit requirements. Our facilities are also subject to requirements established under state and local air pollution laws.

The CAA requires all major sources, such as our generation facilities, to obtain and keep current an operating permit. The costs of compliance associated with any new requirements that may be imposed and included in these permits in the future could be material and are not included in our estimates of capital expenditures.

- ***New Jersey Nitrogen Oxide (NO_x) Regulation: High Electric Demand Day***—In April 2009, the New Jersey Department of Environmental Protection (NJDEP) finalized revisions to NO_x emission control regulations that impose new NO_x emission reduction requirements and limits for New Jersey fossil fuel-fired electric generation units. The rule has an impact on our generation fleet, as it imposes NO_x emissions limits that require capital investment for controls or the retirement of up to 86 combustion turbines (approximately 1,750 MW) and four older New Jersey steam electric generation units (approximately 400 MW) by May 2015. Retirement notifications for the combustion turbines, except for Salem Unit 3, have been filed with PJM. The Salem Unit 3 combustion turbine (38 MW) will be transitioning to an emergency generator. Evaluations are ongoing for the steam electric generation units.
- ***Connecticut NO_x Regulation***—Under current Connecticut regulations, our Bridgeport and New Haven facilities have been utilizing Discrete Emission Reduction Credits (DERCs) to comply with certain NOx emission limitations that

S1-SSA-0009 - 10641

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

were incorporated into the facilities' operating permits. In 2010, we negotiated new agreements with the State of Connecticut extending the continued use of DERCs for certain emission units and equipment until May 31, 2014.

- ***Hazardous Air Pollutants Regulation***—In accordance with a ruling of the United States Court of Appeals of the District of Columbia (Court of Appeals), the EPA published a Maximum Achievable Control Technology (MACT) regulation on February 16, 2012. These Mercury Air Toxics Standards (MATS) are scheduled to go into effect on April 16, 2015 and establish allowable emission levels for mercury as well as other hazardous air pollutants pursuant to the CAA. In February 2012, members of the electric generating industry filed a petition challenging the existing source National Emission Standard for Hazardous Air Pollutants (NESHAP), new source NESHAP and the New Source Performance Standard (NSPS). In March 2012, PSEG filed a motion to intervene with the Court of Appeals in support of the EPA's implementation of MATS. The Court of Appeals has split the litigation related to these matters into three cases, addressing separately the existing source NESHAP, new source NESHAP and the NSPS. These cases remain pending. The EPA has stayed implementation of the new source NESHAP rule pending its reconsideration. The EPA published the proposed reconsideration for the new source NESHAP and the NSPS in the Federal Register on November 30, 2012. The EPA expects to finalize the reconsideration of the new source NESHAP and the NSPS in March 2013.

  The impact to our fossil generation fleet in New Jersey and Connecticut and our jointly-owned coal fired generating facilities in Pennsylvania is currently being determined. We believe the back-end technology environmental controls installed at our Hudson and Mercer coal facilities should meet the MACT's requirements. Some additional controls could be necessary at our Connecticut facility, pending engineering evaluation. In December 2011, a decision was reached to upgrade the previously planned two flue gas desulfurization scrubbers and install Selective Catalytic Reduction (SCR) systems at our jointly-owned coal fired generating facility at Conemaugh in Pennsylvania. This installation is expected to be completed in the fourth quarter of 2014. Our share of this investment is approximately $147 million.

- ***Cross-State Air Pollution Rule (CSAPR)***—On July 6, 2011, the EPA issued the final CSAPR. CSAPR limits power plant emissions of Sulfur Dioxide (SO_2) and annual and ozone season NO_x in 28 states that contribute to the ability of downwind states to attain and/or maintain current particulate matter and ozone National Ambient Air Quality Standards (NAAQS).

  On August 21, 2012, the Court of Appeals vacated CSAPR and ordered that the existing Clean Air Interstate Rule (CAIR) requirements remain in effect until an appropriate substitute rule has been promulgated. On October 5, 2012, the EPA filed a request for rehearing which the Court denied on January 24, 2013. What future actions the EPA will take regarding the Court's decision or the timing of those actions are unknown at this time. The purpose of CAIR is to improve ozone and fine particulate air quality within states that have not demonstrated achievement of the NAAQS. CAIR was implemented through a cap-and-trade program and, to date, the impact has not been material to us as the allowances allocated to our stations were sufficient. If 2013 operations are similar to those in the past three years, it is expected that the impact to operations in New Jersey, New York and Connecticut from the temporary implementation of CAIR in 2013 will not be significant.

  We currently anticipate that this rule will not have a material adverse impact to our capital investment program or our units' operations.

Climate Change

- ***CO_2 Regulation Under the* CAA**—In April 2010, the EPA and the National Highway Transportation Safety Board (NHTSB) jointly issued a final rule to regulate GHGs emissions from certain motor vehicles (Motor Vehicle Rule). Under the CAA, the adoption of the Motor Vehicle Rule would have automatically subjected many emission sources, including ours, to CAA permitting for new facilities and major facility modifications that increase the emission of GHGs, including CO_2. However, guidance issued by the EPA in March 2010 interpreted the CAA to require permitting for GHGs at other facilities, such as ours, only when the Motor Vehicle Rule was scheduled to take effect in January 2011. In May 2010, the EPA finalized a "Tailoring Rule" that would have phased in beginning in 2011, the application of this permitting requirement to facilities such as ours. The significance of the permitting requirement is that, in cases where a new source is constructed or an existing source undergoes a major modification, the owner of the facility would need to evaluate and perhaps install best available control technology (BACT) for GHG emissions.

  In November 2010, the EPA published guidance to state and local permitting authorities to undertake BACT determinations for new and modified emission sources. The guidance does not define the specific technology or technologies that should be considered BACT. The guidance does emphasize the use of energy efficiency, and specifically states that the technology of storing CO_2 under the earth, also known as carbon capture and storage, is not yet mature enough to be considered a viable alternative at this stage. On April 13, 2012, the EPA published the

S1-SSA-0009 - 10642

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

proposed New Source Performance Standards (NSPS) for GHG for new power plants and refineries. New or modified sources must employ BACT which is defined on a case-by-case basis and can be no less stringent than the applicable NSPS. Thus, for new power plants where the proposed NSPS identifies the applicable standard, if adopted as proposed, all permit decisions regarding BACT and application completeness should be made to reflect at least the level of stringency contained in those standards. The EPA is expected to move to regulation of existing electric generating units under the CAA. However, implementation of such regulations for existing sources is anticipated to be several years away.

- ***Climate-Related Legislation***—The federal government may consider legislative proposals to define a national energy policy and address climate change. Proposals under consideration include, but are not limited to, provisions to establish a national clean energy portfolio standard and to establish an energy efficiency resource standard. Provisions of any new proposal may present material risks and opportunities to our businesses. The final design of any legislation will determine the impact on us, which we are not now able to reasonably estimate.
- ***Regional Greenhouse Gas Initiative (RGGI)***—In response to concerns over global climate change, some states have developed initiatives to stimulate national climate legislation through CO_2 emission reductions in the electric power industry. Ten northeastern states, including New Jersey, New York and Connecticut, originally established RGGI to cap and reduce CO_2 emissions in the region. In general, these states adopted state-specific rules to enable the RGGI regulatory mandate in each state.

  Applicable rules make allowances available through a regional auction whereby generators may acquire allowances that are each equal to one ton of CO_2 emissions. Generators are required to submit an allowance for each ton emitted over a three year period (e.g. 2009, 2010, and 2011). Allowances are available through the auction or through secondary markets and were required to be submitted to states by March 2012 for the first compliance period.

  The Governor of New Jersey withdrew New Jersey from RGGI beginning in 2012. Therefore, our New Jersey facilities are no longer obligated to acquire CO_2 emission allowances, but our generation facilities in New York and Connecticut remain subject to RGGI. The Governor's action to withdraw has been challenged by environmental groups in the New Jersey state court.

  New Jersey also adopted the Global Warming Response Act in 2007, which calls for stabilizing its GHGs emissions to 1990 levels by 2020, followed by a further reduction of greenhouse emissions to 80% below 2006 levels by 2050. To reach this goal, the NJDEP, the BPU, other state agencies and stakeholders are required to evaluate methods to meet and exceed the emission reduction targets, taking into account their economic benefits and costs.

Water Pollution Control

The Federal Water Pollution Control Act (FWPCA) prohibits the discharge of pollutants to U.S. waters from point sources, except pursuant to a National Pollutant Discharge Elimination System (NPDES) permit issued by the EPA or by a state under a federally authorized state program. The FWPCA authorizes the imposition of technology-based and water quality-based effluent limits to regulate the discharge of pollutants into surface waters and ground waters. The EPA has delegated authority to a number of state agencies, including those in New Jersey, New York and Connecticut, to administer the NPDES program through state acts. We also have ownership interests in facilities in other jurisdictions that have their own laws and implement regulations to control discharges to their surface waters and ground waters that directly govern our facilities in those jurisdictions.

In addition to regulating the discharge of pollutants, the FWPCA regulates the intake of surface waters for cooling. The use of cooling water is a significant part of the generation of electricity at steam-electric generating stations. Section 316(b) of the FWPCA requires that cooling water intake structures reflect the best technology available (BTA) for minimizing adverse environmental impact. The impact of regulations under Section 316(b) can be significant, particularly at steam-electric generating stations which do not have closed cycle cooling through the use of cooling towers to recycle water for cooling purposes. The installation of cooling towers at an existing generating station can impose significant engineering challenges and significant costs, which can affect the economic viability of a particular plant. In late 2010, the EPA entered into a settlement agreement with environmental groups that established a schedule to develop a new 316(b) rule by July 27, 2012.

In April 2011, the EPA published a new proposed rule which did not establish any particular technology as the BTA (e.g. closed-cycle cooling). Instead, the proposed rule established marine life mortality standards for existing cooling water intake structures with a design flow of more than two million gallons per day. We reviewed the proposed rule, assessed the potential impact on our generating facilities and used this information to develop our comments to the EPA which were filed in August 2011. On June 11, 2012, the EPA posted a Notice of Data Availability (NODA) requesting comment on a series of technical issues related to the impingement mortality proposed standards. On June 12, 2012, the EPA posted a second NODA outlining its plans to finalize a “Willingness to Pay” survey it initiated to develop non-use benefits data in support of the April 2011 rule proposal. PSEG and industry trade associations submitted comments on both NODAs in July 2012. In July 2012, the EPA and

S1-SSA-0009 - 10643

Past financial performance is no guarantee of future results.

environmental groups agreed to delay the deadline for finalization of the Rule to June 27, 2013 to allow for more time to address public comments and analyze data submitted in response to the NODAs.

If the rule were to be adopted as proposed, the impact on us would be material since the majority of our electric generating stations would be affected. We are unable to predict the outcome of this proposed rulemaking, the final form that the proposed regulations may take and the effect, if any, that they may have on our future capital requirements, financial condition or results of operations, although such impacts could be material. See Note 13. Commitments and Contingent Liabilities for additional information.

Hazardous Substance Liability

The production and delivery of electricity, the distribution of gas and, formerly, the manufacture of gas, results in various by-products and substances classified by federal and state regulations as hazardous. These regulations may impose liability for damages to the environment from hazardous substances, including obligations to conduct environmental remediation of discharged hazardous substances as well as monetary payments, regardless of the absence of fault and the absence of any prohibitions against the activity when it occurred, as compensation for injuries to natural resources. Our historic operations and the operations of hundreds of other companies along the Passaic and Hackensack Rivers are alleged by federal and state agencies to have discharged substantial contamination into the Passaic River/Newark Bay Complex. For additional information, see Item 8. Financial Statements and Supplementary Data —Note 13. Commitments and Contingent Liabilities.

- ***Site Remediation***—The Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) and the New Jersey Spill Compensation and Control Act (Spill Act) require the remediation of discharged hazardous substances and authorize the EPA, the NJDEP and private parties to commence lawsuits to compel clean-ups or reimbursement for such remediation. The clean-ups can be more complicated and costly when the hazardous substances are in a body of water.
- ***Natural Resource Damages***—CERCLA and the Spill Act authorize the assessment of damages against persons who have discharged a hazardous substance, causing an injury to natural resources. Pursuant to the Spill Act, the NJDEP requires persons conducting remediation to characterize injuries to natural resources and to address those injuries through restoration or damages. The NJDEP adopted regulations concerning site investigation and remediation that require an ecological evaluation of potential damages to natural resources in connection with an environmental investigation of contaminated sites. The NJDEP also issued guidance to assist parties in calculating their natural resource damage liability for settlement purposes, but has stated that those calculations are applicable only for those parties that volunteer to settle a claim for natural resource damages before a claim is asserted by the NJDEP. We are currently unable to assess the magnitude of the potential financial impact of this regulatory change, although such impacts could be material.

Fuel and Waste Disposal

- ***Nuclear Fuel Disposal***—The federal government has entered into contracts with the operators of nuclear power plants for transportation and ultimate disposal of spent nuclear fuel. To pay for this service, nuclear plant owners are required to contribute to a Nuclear Waste Fund. Under the contracts, the U.S. Department of Energy (DOE) was required to begin taking possession of the spent nuclear fuel by no later than 1998 but has not yet done so. The Nuclear Waste Policy Act of 1982 requires the DOE to perform an annual review of the Nuclear Waste Fee to determine whether that fee is set appropriately to fund the national nuclear waste disposal program. In October 2009, the DOE stated that the current fee of 1/10 cent per kWh was adequate to recover program costs. In March 2011, we joined the Nuclear Energy Institute (NEI) and fifteen other nuclear plant operators in a lawsuit seeking suspension of the Nuclear Waste Fee. On June 1, 2012, The U.S. Court of Appeals for the District of Columbia ruled that the DOE failed to justify continued payments by electricity consumers into the Nuclear Waste Fund. The court ordered the DOE to conduct a complete reassessment of this fee within six months. The DOE's assessment was completed in January 2013, and concluded that fee collection should be maintained. On January 31, 2013, motions were filed with the Court seeking to reopen the case and set a schedule for expedited review of the DOE fee adequacy report.

  Spent nuclear fuel generated in any reactor can be stored in reactor facility storage pools or in Independent Spent Fuel Storage Installations located at reactors or away from reactor sites. We have on-site storage facilities that are expected to satisfy the storage needs of Salem 1, Salem 2, Hope Creek, Peach Bottom 2 and Peach Bottom 3 through the end of their operating licenses.
- ***Low Level Radioactive Waste***—As a by-product of their operations, nuclear generation units produce low level radioactive waste. Such waste includes paper, plastics, protective clothing, water purification materials and other materials. These waste materials are accumulated on site and disposed of at licensed permanent disposal facilities. New Jersey, Connecticut and South Carolina have formed the Atlantic Compact, which gives New Jersey nuclear

Past financial performance is no guarantee of future results.

generators continued access to the Barnwell waste disposal facility which is owned by South Carolina. We believe that the Atlantic Compact will provide for adequate low level radioactive waste disposal for Salem and Hope Creek through the end of their current licenses including full decommissioning, although no assurances can be given. Low Level Radioactive Waste is periodically being shipped to the Barnwell site from Salem and Hope Creek. Additionally, there are on-site storage facilities for Salem, Hope Creek and Peach Bottom, which we believe have the capacity for at least five years of temporary storage for each facility.

- ***Coal Combustion Residuals (CCRs)***—In June 2010, the EPA formally published a proposed rule offering three main options for the management of CCRs under the Resource Conservation and Recovery Act. One of these options regulates CCRs as a hazardous waste and the other two options are variations of a non-hazardous designation. All options communicate the EPA's intent of ceasing wet ash transfer and instituting engineering controls on ash ponds and landfills to limit impact on human health and the environment. The outcome of the EPA rulemaking cannot be predicted. The EPA has not established a date for release of a final rule.

  On April 5, 2012, several environmental organizations and CCR marketers brought a citizens' suit against the EPA in federal court arguing that the EPA has a non-discretionary duty to issue the CCR rules by a certain date. On May 15, 2012, the Utility Solid Waste Activities Group Policy Committee filed a Motion to Intervene in order to be in alignment with the EPA in defending against the environmental organizations' action. After May 2012, all parties agreed to a schedule for submitting briefs in this case. Motions for summary judgment remain pending.

SEGMENT INFORMATION

Financial information with respect to our business segments is set forth in Item 8. Financial Statements and Supplementary Data—Note 22. Financial Information by Business Segment.

ITEM 1A. RISK FACTORS

The following factors should be considered when reviewing our business. These factors could have a material adverse impact on our financial position, results of operations or net cash flows and could cause results to differ materially from those expressed elsewhere in this document.

The factors discussed in Item 7. MD&A may also have a material adverse effect on our results of operations and cash flows and affect the market prices for our publicly-traded securities. While we believe that we have identified and discussed the key risk factors affecting our business, there may be additional risks and uncertainties that are not presently known or that are not currently believed to be significant.

We are subject to comprehensive and evolving regulation by federal, state and local regulatory agencies that affects, or may affect, our businesses.

We are subject to regulation by federal, state and local authorities. Changes in regulation can cause significant delays in or materially affect business planning and transactions and can materially increase our costs. Regulation affects almost every aspect of our businesses, such as our ability to:

- ***Obtain fair and timely rate relief***—Our utility's retail rates are regulated by the BPU and its wholesale transmission rates are regulated by the FERC. The retail rates for electric and gas distribution services are established in a base rate case and remain in effect until a new base rate case is filed and concluded. In addition, our utility has received approval for several clause recovery mechanisms, some of which provide for recovery of and on the authorized investments. These clause mechanisms require periodic updates to be reviewed and approved by the BPU. Our utility's transmission rates are recovered through a FERC approved formula rate. The revenue requirements are reset each year through this formula. Transmission ROEs have recently become the target of certain state utility commissions, municipal utilities, consumer advocates and consumer groups seeking to lower customer rates in New England and New York. These agencies and groups have filed complaints at the FERC asking the FERC to reduce the base ROE of various transmission owners. They point to changes in the capital markets as justification for lowering the ROE of these companies. While we are not the subject of any of these complaints, the matter could set a precedent for FERC-regulated transmission owners, such as PSE&G. Inability to obtain fair or timely recovery of all our costs, including a return of or on our investments in rates, could have a material impact on our business.
- ***Obtain required regulatory approvals***—The majority of our businesses operate under MBR authority granted by the FERC, which has determined that our subsidiaries do not have unmitigated market power and that MBR rules have

S1-SSA-0009 - 10646

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

been satisfied. Failure to maintain MBR eligibility, or the effects of any severe mitigation measures that may be required if market power was evaluated differently in the future, could have a material adverse effect on us.

We may also require various other regulatory approvals to, among other things, buy or sell assets, engage in transactions between our public utility and our other subsidiaries, and, in some cases, enter into financing arrangements, issue securities and allow our subsidiaries to pay dividends. Failure to obtain these approvals on a timely basis could materially adversely affect our results of operations and cash flows.

- ***Comply with regulatory requirements***—There are Federal standards, including mandatory NERC and cybersecurity standards, in place to ensure the reliability of the U. S. electric transmission and generation system and to prevent major system black-outs. We have been, and will continue to be, periodically audited by the NERC for compliance.

  Further, the FERC requires compliance with all of its rules and orders, including rules concerning Standards of Conduct, market behavior and anti-manipulation rules, reporting, interlocking directorate rules and cross-subsidization. Our companies with MBR authority are currently being audited by the FERC for compliance with FERC's rules regarding MBR authority, the filing of Electric Quarterly Reports (EQRs) and the receipt of payments in organized markets by our generating units that are required to run for reliability reasons when it is not economical for them to do so.

  We will soon be subject to the reporting and record-keeping requirements of the Dodd-Frank Act, as implemented by the CFTC, and may in the future be subject to CFTC requirements regarding position limits for trading of certain commodities. As part of the Dodd-Frank Act compliance, we will need to be vigilant in monitoring and reporting our swap transactions.

  The BPU conducts periodic combined management/competitive service audits of New Jersey utilities related to affiliate standard requirements, competitive services, cross-subsidization, cost allocation and other issues. The BPU is near completion of a management audit and an affiliate transactions audit of PSE&G.

We are exposed to commodity price volatility as a result of our participation in the wholesale energy markets.

The material risks associated with the wholesale energy markets known or currently anticipated that could adversely affect our operations include:

- ***Price fluctuations and collateral requirements***—We expect to meet our supply obligations through a combination of generation and energy purchases. We also enter into derivative and other positions related to our generation assets and supply obligations. As a result, we are subject to the risk of price fluctuations that could affect our future results and impact our liquidity needs. These include:
  - variability in costs, such as changes in the expected price of energy and capacity that we sell into the market,
  - increases in the price of energy purchased to meet supply obligations or the amount of excess energy sold into the market,
  - the cost of fuel to generate electricity, and
  - the cost of emission credits and congestion credits that we use to transmit electricity.

In the markets where we operate, natural gas prices typically have a major impact on the price that generators will receive for their output, especially in periods of relatively strong demand. Therefore, significant changes in the price of natural gas will usually translate into significant changes in the wholesale price of electricity.

Over the past few years, wholesale prices for natural gas have declined from the peak levels experienced in 2008. One of the reasons for this decline is increased shale gas production as extraction technology has improved. Lower gas prices have resulted in lower electricity prices, which has reduced our margins as nuclear and coal generation costs have not declined similarly. Over that time, generation by our coal units was also adversely affected by the relatively lower price of natural gas as compared to coal, making it sometimes more economical to run certain of our gas units than our coal units.

Natural gas prices may remain at low levels for an extended period and continue to decline if further advances in technology result in greater volumes of shale gas production.

Many factors may affect capacity pricing in PJM, including but not limited to:

- changes in load and demand,
- changes in the available amounts of demand response resources,
- changes in available generating capacity (including retirements, additions, derates, forced outage rates, etc.),

S1-SSA-0009 - 10647

Past financial performance is no guarantee of future results.

- increases in transmission capability between zones, and
- changes to the pricing mechanism, including increasing the potential number of zones to create more pricing sensitivity to changes in supply and demand, as well as other potential changes that PJM may propose over time, including issues currently pending at the FERC.

Potential changes to the rules governing energy markets in which the output of our plants is sold also poses risk to our business.

Also, as market prices for energy and fuel fluctuate, our forward energy sale and forward fuel purchase contracts could require us to post substantial additional collateral, thus requiring us to obtain additional sources of liquidity during periods when our ability to do so may be limited. If Power were to lose its investment grade credit rating, it would be required under certain agreements to provide a significant amount of additional collateral in the form of letters of credit or cash, which would have a material adverse effect on our liquidity and cash flows. If Power had lost its investment grade credit rating as of December 31, 2012, it may have had to provide approximately $654 million in additional collateral. We may also be subject to additional collateral requirements which could be required under new rules being developed by the CFTC which are expected to be implemented in 2013.

- ***Our cost of coal and nuclear fuel may substantially increase*** —Our coal and nuclear units have a diversified portfolio of contracts and inventory that will provide a substantial portion of our fuel needs over the next several years. However, it will be necessary to enter into additional arrangements to acquire coal and nuclear fuel in the future. Market prices for coal and nuclear fuel have recently been volatile. Although our fuel contract portfolio provides a degree of hedging against these market risks, future increases in our fuel costs cannot be predicted with certainty and could materially and adversely affect liquidity, financial condition and results of operations.

  While our generation runs on diverse fuels, allowing for flexibility, the mix of fuels ultimately used can impact earnings.
- ***Third party credit risk***—We sell generation output and buy fuel through the execution of bilateral contracts. These contracts are subject to credit risk, which relates to the ability of our counterparties to meet their contractual obligations to us. Any failure to perform by these counterparties could have a material adverse impact on our results of operations, cash flows and financial position. In the spot markets, we are exposed to the risks of whatever default mechanisms exist in those markets, some of which attempt to spread the risk across all participants, which may not be an effective way of lessening the severity of the risk and the amounts at stake. The impact of economic conditions may also increase such risk.

We are subject to numerous Federal and state environmental laws and regulations that may significantly limit or affect our businesses, adversely impact our business plans or expose us to significant environmental fines and liabilities.

We are subject to extensive environmental regulation by Federal, state and local authorities regarding air quality, water quality, site remediation, land use, waste disposal, aesthetics, impact on global climate, natural resources damages and other matters. These laws and regulations affect the manner in which we conduct our operations and make capital expenditures. Future changes may result in significant increases in compliance costs.

Delay in obtaining, or failure to obtain and maintain, any environmental permits or approvals, or delay in or failure to satisfy any applicable environmental regulatory requirements, could:

- prevent construction of new facilities,
- prevent continued operation of existing facilities,
- prevent the sale of energy from these facilities, or
- result in significant additional costs, each of which could materially affect our business, results of operations and cash flows.

In obtaining required approvals and maintaining compliance with laws and regulations, we focus on several key environmental issues, including:

- ***Concerns over global climate change could result in laws and regulations to limit CO_2 emissions or other GHG produced by our fossil generation facilities***—Federal and state legislation and regulation designed to address global climate change through the reduction of GHG emissions could materially impact our fossil generation facilities. Legislation enacted in the states where our generation facilities are located establishes aggressive goals for the reduction of CO_2 emissions over a 40-year period. There could be significant costs incurred to continue operation of our fossil generation facilities, including the potential need to purchase CO_2 emission allowances. Such expenditures could materially affect the continued economic viability of one or more such facilities. Multiple states are developing

S1-SSA-0009 - 10648

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

or have developed state-specific or regional initiatives to obtain CO_2 emissions reductions in the electric power industry. The RGGI is such a program in the northeast.

- ***CO_2 Litigation***—In addition to legislative and regulatory initiatives, the outcome of certain legal proceedings regarding alleged impacts of global climate change not involving us could be material to the future liability of energy companies.

  In June 2012, the United States Court of Appeals for the D.C. Circuit upheld the EPA finding that GHGs could reasonably be expected to endanger public health and welfare. However, the Court dismissed the action brought by individuals, local governments and interest groups alleging that various industries, including various energy companies, emitted GHGs, causing global climate change resulting in a variety of damages. Plaintiffs are expected to appeal to the United States Supreme Court.

  In November 2012, the Ninth Circuit Court of Appeals refused to reconsider its decision not to rehear an Alaskan village's public nuisance lawsuit alleging that GHGs emissions from ExxonMobil Corporation and many other energy companies had made the village uninhabitable. The appellate court denied the petition for rehearing which accused these companies of causing GHGs emissions that contributed to global warming and alleged injury to the village. If relevant federal or state common law were to develop that imposed liability upon those that emit GHGs for alleged impacts of GHGs emissions, such potential liability to us could be material.

- ***Potential closed-cycle cooling requirements***—Our Salem nuclear generating facility has a permit from the NJDEP allowing for its continued operation with its existing cooling water system. That permit expired in July 2006. Our application to renew the permit, filed in February 2006, estimated the costs associated with cooling towers for Salem to be approximately $1 billion, of which our share was approximately $575 million. These amounts have not been updated since our 2006 filing.

  If the NJDEP and the Connecticut Department of Environmental Protection were to require installation of closed-cycle cooling or its equivalent at our Salem, Mercer, Hudson, Bridgeport, Sewaren or New Haven generating stations, the related increased costs and impacts would be material to our financial position, results of operations and net cash flows and would require further economic review to determine whether to continue operations or decommission the stations.

  The EPA issued a proposed rule in 2011 regarding regulation of cooling water intake structures. If adopted as proposed, the impact of this rulemaking could significantly impact states' permitting decisions on whether to require closed cycle cooling and could materially increase our cost of compliance. For additional information, see Item 8. Financial Statements and Supplementary Data—Note 13. Commitments and Contingent Liabilities.

- ***Remediation of environmental contamination at current or formerly owned facilities***—We are subject to liability under environmental laws for the costs of remediating environmental contamination of property now or formerly owned by us and of property contaminated by hazardous substances that we generated. Remediation activities associated with our former Manufactured Gas Plant (MGP) operations are one source of such costs. Also, we are currently involved in a number of proceedings relating to sites where other hazardous substances may have been discharged and may be subject to additional proceedings in the future, the related costs of which could have a material adverse effect on our financial condition, results of operations and cash flows. Recent amendments to New Jersey law now place affirmative obligations on us to investigate and, if necessary, remediate contaminated property upon which we were in any way responsible for a discharge of hazardous substances. While those amendments do not change our liability, they do impact the speed by which we will need to investigate contaminated properties, which could adversely impact cash flow.

  The State of New Jersey has filed multiple lawsuits against parties, including us, who were alleged to be responsible for injuries to natural resources in New Jersey, including a site being remediated under our MGP program. We cannot predict what further actions, if any, or the costs or the timing thereof, that may be required with respect to these or other natural resource damages claims. For additional information, see Item 8. Financial Statements and Supplementary Data—Note 13. Commitments and Contingent Liabilities.

- ***More stringent air pollution control requirements in New Jersey***—Most of our generating facilities are located in New Jersey where restrictions are generally considered to be more stringent in comparison to other states. Therefore, there may be instances where the facilities located in New Jersey are subject to more restrictive and, therefore, more costly pollution control requirements and liability for damage to natural resources, than competing facilities in other states. Most of New Jersey has been classified as "nonattainment" with NAAQS for one or more air pollutants. This requires New Jersey to develop programs to reduce air emissions. Such programs can impose additional costs on us by requiring that we offset any emissions increases from new electric generators we may want to build and by setting more stringent emission limits on our facilities that run during the hottest days of the year.

S1-SSA-0009 - 10649

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- ***Coal Ash Management***—Coal ash is a CCR produced as a byproduct of generation at our coal-fired facilities. We currently have a program to beneficially reuse coal ash as presently allowed by federal and state regulations. In June 2010, the EPA formally published a proposed rule offering three main options for the management of CCRs under the Resource Conservation and Recovery Act. One of these options regulates CCRs as a hazardous waste and the other two options are variations of a non-hazardous designation. All options communicate the EPA's intent of ceasing wet ash transfer and instituting engineering controls on ash ponds and landfills to limit impact on human health and the environment. The outcome of the EPA rulemaking cannot be predicted. Proposed regulations which more stringently regulate coal ash, including regulating coal ash as hazardous waste, could materially increase costs at our coal-fired generation facilities. The EPA has not established a date for release of a final rule.

Our ownership and operation of nuclear power plants involve regulatory, financial, environmental, health and safety risks.

Approximately half of our total generation output each year is provided by our nuclear fleet, which comprises approximately one-fourth of our total owned generation capacity. For this reason, we are exposed to risks related to the continued successful operation of our nuclear facilities and issues that may adversely affect the nuclear generation industry. These include:

- ***Storage and Disposal of Spent Nuclear Fuel***—We currently use on-site storage for spent nuclear fuel. Disposal of nuclear materials, including the availability or unavailability of a permanent repository for spent nuclear fuel, could impact future operations of these stations. In addition, the availability of an off-site repository for spent nuclear fuel may affect our ability to fully decommission our nuclear units in the future.
- ***Regulatory and Legal Risk***—The NRC may modify, suspend or revoke licenses, or shut down a nuclear facility and impose substantial civil penalties for failure to comply with the Atomic Energy Act, related regulations or the terms and conditions of the licenses for nuclear generating facilities. As with all of our generation facilities, as discussed above, our nuclear facilities are also subject to comprehensive, evolving environmental regulation. Our nuclear generating facilities are currently operating under NRC licenses that expire in 2033 through 2046.
- ***Operational Risk***—Operations at any of our nuclear generating units could degrade to the point where the affected unit needs to be shut down or operated at less than full capacity. If this were to happen, identifying and correcting the causes may require significant time and expense. Since our nuclear fleet provides the majority of our generation output, any significant outage could result in reduced earnings as we would need to purchase or generate higher-priced energy to meet our contractual obligations.
- ***Nuclear Incident or Accident Risk***—Accidents and other unforeseen problems have occurred at nuclear stations, both in the United States and elsewhere. The consequences of an accident can be severe and may include loss of life, significant property damage and/or a change in the regulatory climate. We have nuclear units at two sites. It is possible that an accident or other incident at a nuclear generating unit could adversely affect our ability to continue to operate unaffected units located at the same site, which would further affect our financial condition, operating results and cash flows. An accident or incident at a nuclear unit not owned by us could also affect our ability to continue to operate our units. Any resulting financial impact from a nuclear accident may exceed our resources, including insurance coverages.

We may be adversely affected by changes in energy regulatory policies, including energy and capacity market design rules and developments affecting transmission.

The energy industry continues to be regulated and the rules to which our businesses are subject are always at risk of being changed. Our business has been impacted by established rules that create locational capacity markets in each of PJM, ISO-NE and NYISO. Under these rules, generators located in constrained areas are paid more for their capacity so there is an incentive to locate in those areas where generation capacity is most needed. Because much of our generation is located in constrained areas in PJM and ISO-NE, the existence of these rules has had a positive impact on our revenues. PJM's locational capacity market design rules and New England forward capacity market rules have been challenged in court and continue to evolve. Any changes to these rules may have an adverse impact on our financial condition, results of operations and cash flows.

In addition, legislative developments in the State of New Jersey have the potential to adversely impact RPM prices. In January 2011, New Jersey enacted a law establishing a LCAPP which provides for the construction of subsidized base load or mid-merit electric power generation. The LCAPP may have the effect of artificially depressing prices in the competitive wholesale market on both a short-term and long-term basis. PJM's Independent Market Monitor has released a report estimating that the impact of bidding 2,000 MW of capacity in New Jersey as a price taker could be a reduction in capacity market revenues to PJM suppliers of more than $2 billion in the first year.

S1-SSA-0009 - 10650

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

We could also be impacted by a number of other events, including regulatory or legislative actions favoring non-competitive markets and energy efficiency and demand response initiatives. Further, some of the market-based mechanisms in which we participate, including BGS auctions, are at times the subject of review or discussion by some of the participants in the New Jersey and Federal regulatory and political arenas. We can provide no assurance that these mechanisms will continue to exist in their current form, nor otherwise be modified.

To the extent that additions to the transmission system relieve or reduce congestion in eastern PJM where most of our plants are located, Power's revenues could be adversely affected. Moreover, the FERC has issued a rule, currently being challenged in court, that requires changes to transmission planning processes which may result in more transmission being built to facilitate renewable generation. This rule has also opened up the construction of certain types of transmission to competition through elimination of the ROFR.

Changes in the current policies for building new transmission lines could result in additional competition to build transmission lines in our service territory in the future and would allow us to seek opportunities to build in other service territories.

We face significant competition in the merchant energy markets.

Our wholesale power and marketing businesses are subject to significant competition that may adversely affect our ability to make investments or sales on favorable terms and achieve our annual objectives. Increased competition could contribute to a reduction in prices offered for power and could result in lower earnings. Decreased competition could negatively impact results through a decline in market liquidity. Some of our competitors include:

- merchant generators,
- domestic and multi-national utility rate-based generators,
- energy marketers,
- utilities,
- banks, funds and other financial entities,
- fuel supply companies, and
- affiliates of other industrial companies.

Regulatory, environmental, industry and other operational developments will have a significant impact on our ability to compete in energy markets, potentially resulting in erosion of our market share and impairment in the value of our power plants. Our ability to compete will also be impacted by:

- ***DSM and other efficiency efforts***—DSM and other efficiency efforts aimed at changing the quantity and patterns of consumers' usage could result in a reduction in load requirements.
- ***Changes in technology and/or customer conservation*** —It is possible that advances in technology will reduce the cost of alternative methods of producing electricity, such as fuel cells, micro turbines, windmills and PV (solar) cells, to a level that is competitive with that of most central station electric production. It is also possible that electric customers may significantly decrease their electric consumption due to demand-side energy conservation programs. Changes in technology could also alter the channels through which retail electric customers buy electricity, which could adversely affect our financial results.

Our inability to balance energy obligations with available supply could negatively impact results.

The revenues generated by the operation of our generating stations are subject to market risks that are beyond our control. Generation output will either be used to satisfy wholesale contract requirements, other bilateral contracts or be sold into competitive power markets. Participants in the competitive power markets are not guaranteed any specified rate of return on their capital investments. Generation revenues and results of operations are dependent upon prevailing market prices for energy, capacity, ancillary services and fuel supply in the markets served.

Our generation business frequently involves the establishment of forward sale positions in the wholesale energy markets on long-term and short-term bases. To the extent that we have produced or purchased energy in excess of our contracted obligations, a reduction in market prices could reduce profitability. Conversely, to the extent that we have contracted obligations in excess of energy we have produced or purchased, an increase in market prices could reduce profitability. If the strategy we utilize to hedge our exposure to these various risks is not effective, we could incur significant losses. Our market positions can also be adversely affected by the level of volatility in the energy markets that, in turn, depends on various factors,

S1-SSA-0009 - 10651

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

including weather in various geographical areas, short-term supply and demand imbalances, customer migration and pricing differentials at various geographic locations. These cannot be predicted with certainty.

Increases in market prices also affect our ability to hedge generation output and fuel requirements as the obligation to post margin increases with increasing prices and could require the maintenance of liquidity resources that would be prohibitively expensive.

Any inability to recover the carrying amount of our assets could result in future impairment charges which could have a material adverse impact on our financial condition, results of operations and cash flows.

In accordance with accounting guidance, management evaluates long-lived assets for impairment whenever events or changes in circumstances, such as significant adverse changes in regulation, business climate or market conditions, could potentially indicate an asset's or group of assets' carrying amount may not be recoverable. Significant reductions in our expected revenues or cash flows for an extended period of time resulting from such events could result in future asset impairment charges, which could have a material adverse impact on our financial condition and results of operations.

Inability to access sufficient capital at reasonable rates or commercially reasonable terms or maintain sufficient liquidity in the amounts and at the times needed could adversely impact our business.

Capital for projects and investments has been provided primarily by internally-generated cash flow and external financings. We have significant capital requirements and will need continued access to debt capital from outside sources in order to efficiently fund the construction and other cash flow needs of our businesses. The ability to arrange financing and the costs of capital depend on numerous factors including, among other things, general economic and market conditions, the availability of credit from banks and other financial institutions, investor confidence, the success of current projects and the quality of new projects.

The ability to have continued access to the credit and capital markets at a reasonable economic cost is dependent upon our current and future capital structure, financial performance, our credit ratings and the availability of capital under reasonable terms and conditions. As a result, no assurance can be given that we will be successful in obtaining re-financing for maturing debt, financing for projects and investments or funding the equity commitments required for such projects and investments in the future.

Financial market performance directly affects the asset values of our nuclear decommissioning trust funds and defined benefit plan trust funds. Sustained decreases in asset value of trust assets could result in the need for significant additional funding.

The performance of the financial markets will affect the value of the assets that are held in trust to satisfy our future obligations under our pension and postretirement benefit plans and to decommission our nuclear generating plants. A decline in the market value of our pension assets similar to the one experienced in 2008 could result in the need for us to make significant contributions in the future to maintain our funding at sufficient levels.

An extended economic recession would likely have a material adverse effect on our businesses.

Our results of operations may be negatively affected by sustained downturns or sluggishness in the economy, including low levels in the market prices of commodities. Adverse conditions in the economy affect the markets in which we operate and can negatively impact our results. Declines in demand for energy will reduce overall sales and lessen cash flows, especially as customers reduce their consumption of electricity and gas. Although our utility business is subject to regulated allowable rates of return, overall declines in electricity and gas sold and/or increases in non-payment of customer bills would materially adversely affect our liquidity, financial condition and results of operations.

We may be adversely affected by equipment failures, accidents, severe weather events or other incidents that impact our ability to provide safe and reliable service to our customers and remain competitive.

The success of our businesses is dependent on our ability to continue providing safe and reliable service to our customers while minimizing service disruptions. We are also exposed to the risk of accidents, severe weather events such as we experienced from Hurricane Irene and Superstorm Sandy, or other incidents which could result in damage to or destruction of our facilities or damage to persons or property. The physical risks of climate change, such as more frequent or more extreme weather events, changes in temperature and precipitation patterns and other related phenomena have exacerbated these risks. Such issues experienced at our facilities, or by others in our industry, could adversely impact our revenues, increase costs to repair and maintain our systems, subject us to potential litigation and/or damage claims and increase the level of oversight of our utility and generation operations and infrastructure through investigations or through the imposition of additional regulatory or legislative requirements. Such actions could affect our costs, competitiveness and future investments, which could be material to our financial position, results of operations and cash flow.

S1-SSA-0009 - 10652

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Acts of war, terrorism or cybersecurity breaches could adversely affect our operations.

Our businesses and industry may be impacted by acts and threats of war or terrorism. These actions could result in increased political, economic and financial market instability and volatility in fuel prices which could materially adversely affect our operations. In addition, our infrastructure facilities, such as our generating stations, transmission and distribution facilities and information management systems for customer-related operations, could be direct or indirect targets or be affected by terrorist or other criminal activity.

Our businesses could also be impacted by cybersecurity breaches. Cybersecurity threats include:

- operational interference, such as attacks on our generation facilities, transmission lines or the power grid,
- information theft as to employees, shareholders, vendors and/or customers, such as personal financial and health records, and
- business system interruption or compromise.

Such events could severely disrupt business operations and prevent us from servicing our customers or collecting revenues. These events could also result in significant expenses to repair security breaches or system damage as well as increased capital, insurance and operating costs, including increased security costs for our facilities. A breach of certain business systems could affect our ability to record, process and/or report financial information correctly. In addition, new or updated security regulations may require us to make changes to our current measures which could also result in additional expenses.

Inability to successfully develop or construct generation, transmission and distribution projects within budget could adversely impact our businesses.

Our business plan calls for extensive investment in capital improvements and additions, including the installation of required environmental upgrades and retrofits, construction and/or acquisition of additional generation units and transmission facilities and modernizing existing infrastructure. Currently, we have several significant projects underway or being contemplated.

Our success will depend, in part, on our ability to complete these projects within budgets, on commercially reasonable terms and conditions and, in our regulated businesses, our ability to recover the related costs through rates. Any delays, cost escalations or otherwise unsuccessful construction and development could materially affect our financial position, results of operations and cash flows.

We may be unable to achieve, or continue to sustain, our expected levels of operating performance.

One of the key elements to achieving the results in our business plan is the ability to sustain generating operating performance and capacity factors at expected levels since our forward sales of energy and capacity assume acceptable levels of operating performance. This is especially important at our lower-cost facilities. Operations at any of our plants could degrade to the point where the plant has to shut down or operate at less than full capacity. Some issues that could impact the operation of our facilities are:

- breakdown or failure of equipment, processes or management effectiveness,
- disruptions in the transmission of electricity,
- labor disputes,
- fuel supply interruptions,
- transportation constraints,
- limitations which may be imposed by environmental or other regulatory requirements,
- permit limitations, and
- operator error or catastrophic events such as fires, earthquakes, explosions, floods, severe storms, acts of terrorism or other similar occurrences.

Identifying and correcting any of these issues may require significant time and expense. Depending on the materiality of the issue, we may choose to close a plant rather than incur the expense of restarting it or returning it to full capacity. In either event, to the extent that our operational targets are not met, we could have to operate higher-cost generation facilities or meet our obligations through higher-cost open market purchases.

S1-SSA-0009 - 10653

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Challenges associated with retention of a qualified workforce could adversely impact our businesses.

Our operations depend on the retention of a skilled workforce. The loss or retirement of key executives or other employees, including those with the specialized knowledge required to support our generation, transmission and distribution operations, could result in various operational challenges. These challenges may include the lack of appropriate replacements, the loss of institutional and industry knowledge and the increased costs to hire and train new personnel. This has the potential to become more critical over the next several years as a growing number of employees become eligible to retire.

In addition, because a significant portion of our employees are covered under collective bargaining agreements, our success will depend on our ability to successfully renegotiate these agreements as they expire. Inability to do so may result in employee strikes or work stoppages which would disrupt our operations and could also result in increased costs.

Our receipt of payment of receivables related to our domestic leveraged leases is dependent upon the credit quality and the ability of lessees to meet their obligations.

Our receipt of payments of equity rent, debt service and other fees related to our leveraged lease portfolio in accordance with the lease contracts can be impacted by various factors. The factors which may impact future lease cash flow include, but are not limited to, new environmental legislation regarding air quality and other discharges in the process of generating electricity, market prices for fuel and electricity, including the impact of low gas prices on our coal generation investments, overall financial condition of lease counterparties and the quality and condition of assets under lease. If a lessee were to default, we could potentially be required to impair our current investment balances. For additional information relating to these leases, see Item 7. MD&A—Critical Accounting Estimates and Item 8. Financial Statements and Supplementary Data—Note 8. Financing Receivables.

ITEM 1B. UNRESOLVED STAFF COMMENTS

PSEG, Power and PSE&G

None.

ITEM 2. PROPERTIES

Our subsidiaries own all of our physical property. We believe that we and our subsidiaries maintain adequate insurance coverage against loss or damage to plants and properties, subject to certain exceptions, to the extent such property is usually insured and insurance is available at a reasonable cost. For a discussion of nuclear insurance, see Item 8. Financial Statements and Supplementary Data—Note 13. Commitments and Contingent Liabilities.

Generation Facilities

Power

As of December 31, 2012, Power's share of summer installed generating capacity is shown in the following table:

Name	Location	Total Capacity (MW)	% Owned	Owned Capacity (MW)	Principal Fuels Used	Mission
Steam:						
Hudson	NJ	620	100%	620	Coal/Gas	Load Following
Mercer	NJ	632	100%	632	Coal/Gas	Load Following
Sewaren	NJ	453	100%	453	Gas	Load Following
Keystone (A)	PA	1,711	23%	391	Coal	Base Load
Conemaugh (A)	PA	1,711	23%	385	Coal	Base Load
Bridgeport Harbor	CT	383	100%	383	Coal	Load Following
New Haven Harbor	CT	448	100%	448	Oil	Load Following
Total Steam		**5,958**		**3,312**		
Nuclear:						
Hope Creek	NJ	1,174	100%	1,174	Nuclear	Base Load
Salem 1 & 2	NJ	2,326	57%	1,335	Nuclear	Base Load
Peach Bottom 2 & 3 (B)	PA	2,245	50%	1,123	Nuclear	Base Load
Total Nuclear		**5,745**		**3,632**		
Combined Cycle:						
Bergen	NJ	1,183	100%	1,183	Gas	Load Following
Linden	NJ	1,236	100%	1,236	Gas	Load Following
Bethlehem	NY	757	100%	757	Gas	Load Following
Total Combined Cycle		**3,176**		**3,176**		
Combustion Turbine:						
Essex	NJ	617	100%	617	Gas	Peaking
Edison	NJ	504	100%	504	Gas	Peaking
Kearny	NJ	463	100%	463	Gas	Peaking
Burlington	NJ	557	100%	557	Oil/Gas	Peaking

PSE&G

As of December 31, 2012, PSE&G had 73 MW of installed solar capacity throughout New Jersey.

Energy Holdings

Energy Holdings had investments in the following generation facilities as of December 31, 2012:

Name	Location	Total Capacity (MW)	% Owned	Owned Capacity (MW)	Principal Fuels Used
Kalaeloa	HI	209	50%	105	Oil
Hackettstown	NJ	2	100%	2	Solar
Wyandot	OH	12	100%	12	Solar
Jacksonville	FL	15	100%	15	Solar
Queen Creek	AZ	25	100%	25	Solar
Milford	DE	15	100%	15	Solar
Total Operating Power Plants		**278**		**174**	

Transmission and Distribution Facilities

As of December 31, 2012, PSE&G's electric transmission and distribution system included 23,856 circuit miles, of which 8,357 circuit miles were underground, and 838,236 poles, of which 546,614 poles were jointly-owned. Approximately 99% of this property is located in New Jersey.

In addition, as of December 31, 2012, PSE&G owned four electric distribution headquarters and five subheadquarters in four operating divisions, all located in New Jersey.

As of December 31, 2012, the daily gas capacity of PSE&G's 100%-owned peaking facilities (the maximum daily gas delivery available during the three peak winter months) consisted of liquid petroleum air gas (LPG) and liquefied natural gas (LNG) and aggregated 2,790,500 therms (270,932,330 cubic feet on an equivalent basis of 100,000 Btu/therm and 1,030 Btu/cubic foot) as shown in the following table:

Plant	Location	Daily Capacity (Therms)
Burlington LNG	Burlington, NJ	670,500
Camden LPG	Camden, NJ	320,000
Central LPG	Edison, NJ	900,000
Harrison LPG	Harrison, NJ	900,000
Total		**2,790,500**

As of December 31, 2012, PSE&G owned and operated 17,713 miles of gas mains, owned 12 gas distribution headquarters and two subheadquarters, all in four operating regions located in New Jersey and owned one meter shop in New Jersey serving all such areas. In addition, PSE&G operated 62 natural gas metering and regulating stations, all located in New Jersey, of which 26 were located on land owned by customers or natural gas pipeline suppliers and were operated under lease, easement or other similar arrangement. In some instances, the pipeline companies owned portions of the metering and regulating facilities.

PSE&G's First and Refunding Mortgage, securing the bonds issued thereunder, constitutes a direct first mortgage lien on substantially all of PSE&G's property.

PSE&G's electric lines and gas mains are located over or under public highways, streets, alleys or lands, except where they are located over or under property owned by PSE&G or occupied by it under easements or other rights. PSE&G deems these easements and other rights to be adequate for the purposes for which they are being used.

In addition, as of December 31, 2012, PSE&G owned 42 switching stations in New Jersey with an aggregate installed capacity of 25,103 megavolt-amperes (MVA) and 246 substations with an aggregate installed capacity of 8,179 MVA. In addition, four of our substations in New Jersey having an aggregate installed capacity of 109 MVA were operated on leased property.

ITEM 3. LEGAL PROCEEDINGS

We are party to various lawsuits and regulatory matters, including in the ordinary course of business. For information regarding material legal proceedings, other than those discussed below, see Item 1. Business—Regulatory Issues and Environmental Matters and Item 8. Financial Statements and Supplementary Data—Note 13. Commitments and Contingent Liabilities.

Con Edison (Con Ed)

In 2001, Con Ed filed a complaint with the FERC against PSE&G, PJM and NYISO asserting a failure to comply with agreements between PSE&G and Con Ed covering 1,000 MW of transmission. On September 16, 2010, the FERC approved a settlement agreement entered into by PSE&G, Con Ed, PJM, NYISO and others. This settlement provides the basis for moving forward with Con Ed after the current contracts expire in 2012 and settles all issues associated with the existing contracts, including cases pending in the D.C. Circuit Court of Appeals. However, dismissal of these court cases is contingent upon receipt of a final, non-appealable order from the FERC. One party to the proceeding sought rehearing of the FERC approval order, which the FERC denied in an order issued on April 8, 2011. The party then appealed this decision to the D.C. Circuit Court of Appeals. This appeal is pending.

Electric Discount and Energy Competition Act (Competition Act)

In 2007, PSE&G and Transition Funding were served with a purported class action complaint (Complaint) in New Jersey Superior Court challenging the constitutional validity of certain stranded cost recovery provisions of the Competition Act, seeking injunctive relief against continued collection from PSE&G's electric customers of the Transition Bond Charge (TBC) of Transition Funding, as well as recovery of TBC amounts previously collected. The Superior Court subsequently granted PSE&G's motion to dismiss the Complaint, which dismissal was upheld by the Appellate Division.

In July 2007, the same plaintiff also filed a petition with the BPU requesting review and adjustment to PSE&G's recovery of the same stranded cost charges. In June 2010, the BPU granted PSE&G's motion to dismiss, and the plaintiff/petitioner subsequently appealed this dismissal to the Appellate Division. In June 2012, the Appellate Division affirmed the BPU's decision, concluding that the BPU had correctly found that the plaintiff's claims failed as a matter of law. The petitioner subsequently filed a Notice of Petition for Certification with the New Jersey Supreme Court. By order dated November 16, 2012, the New Jersey Supreme Court denied this Notice. On February 11, 2013, the Court denied the plaintiff's subsequent motion for reconsideration.

Environmental Matters

The following items are environmental matters involving governmental authorities not discussed elsewhere in this Form 10-K. We do not expect expenditures for any such site relating to the items listed below, individually or for all such current sites in the aggregate, to have a material effect on our financial condition, results of operations and net cash flows.

(1) Claim made in 1985 by the U.S. Department of the Interior under CERCLA with respect to the Pennsylvania Avenue and Fountain Avenue municipal landfills in Brooklyn, New York, for damages to natural resources. The United States Government alleges damages of approximately $200 million. To PSE&G's knowledge there has been no action on this matter since 1988.

(2) Various Spill Act directives were issued by the NJDEP to PRPs, including PSE&G with respect to the PJP Landfill in Jersey City, Hudson County, New Jersey, ordering payment of costs associated with operation and maintenance, interim remedial measures and a Remedial Investigation and Feasibility Study (RI/FS) in excess of $25 million. The directives also sought reimbursement of the NJDEP's past and future oversight costs and the costs of any future remedial action.

(3) Claim by the EPA, Region III, under CERCLA with respect to a Cottman Avenue Superfund Site, a former non-ferrous scrap reclamation facility located in Philadelphia, Pennsylvania, owned and formerly operated by Metal Bank of America, Inc. PSE&G, other utilities and other companies are alleged to be liable for contamination at the site and PSE&G has been named as a PRP. A Final Remedial Design Report was submitted to the EPA in September of 2002. This document presented the design details of the EPA's selected remediation remedy. PSE&G and other utility companies as members of a PRP group entered into a Consent Decree and agreed to implement a negotiated EPA selected remediation remedy. The PRP group implementation of the remedy was completed in 2010. Although subject to EPA approval and oversight, long term monitoring activities designed to demonstrate the effectiveness of the implemented remedy are planned through 2018 at an estimated cost of $2.8 million.

(4) The Klockner Road site is located in Hamilton Township, Mercer County, New Jersey, and occupies approximately two acres on PSE&G's Trenton Switching Station property. In 1996, PSE&G entered into a memorandum of

agreement with the NJDEP for the Klockner Road site pursuant to which PSE&G conducted an RI/FS and remedial action at the site to address the presence of soil and groundwater contamination. Anticipated future activities at the site include the filing of certification(s) with the NJDEP once every two years regarding the effectiveness of engineering and institutional controls, quarterly groundwater monitoring for several years and the installation of additional off-site groundwater monitoring wells as directed by the NJDEP.

(5) In 1996, Morton International, Inc., a subsidiary of The Dow Chemical Company, filed a lawsuit against the former customers of a former mercury refining operation located on the banks of Berry's Creek in Wood-Ridge, New Jersey. The lawsuit seeks to recover cleanup costs incurred and to be incurred in remediating the site. PSE&G was among the former customers sued based on allegations that mercury originating at its Kearny Generating Station was sent to the site for refining.

(6) The EPA sent Power, PSE&G and approximately 157 other entities a notice that the EPA considered each of the entities to be a PRP with respect to contamination in Berry's Creek in Bergen County, New Jersey and requesting that the PRPs perform a RI/FS on Berry's Creek and the connected tributaries and wetlands. Berry's Creek flows through approximately 6.5 miles of areas that have been used for a variety of industrial purposes and landfills. The EPA estimates that the study could be completed in approximately five years at a total cost of approximately $18 million. As members of a PRP Group, Power and certain of the other entities named in the EPA Notice entered into an Administrative Settlement Agreement and Order on Consent to conduct the RI/FS.

(7) In January 2010, we received a letter from the NJDEP asserting that we are the current owner of the Gates Construction Corporation Landfill and that the subject landfill has not been properly closed in accordance with NJDEP Solid Waste Regulations.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

The following table indicates the high and low sale prices for our common stock and dividends paid for the periods indicated:

Common Stock	High	Low	Dividend per Share
2012			
First Quarter	$ 33.25	$ 29.59	$ 0.3550
Second Quarter	$ 32.51	$ 28.92	$ 0.3550
Third Quarter	$ 34.07	$ 31.19	$ 0.3550
Fourth Quarter	$ 33.36	$ 29.05	$ 0.3550
2011			
First Quarter	$ 33.12	$ 30.15	$ 0.3425
Second Quarter	$ 34.22	$ 30.30	$ 0.3425
Third Quarter	$ 35.48	$ 27.97	$ 0.3425
Fourth Quarter	$ 34.96	$ 30.60	$ 0.3425

On February 19, 2013, our Board of Directors approved $0.36 per share of common stock dividend for the first quarter of 2013. This reflects an indicated annual dividend rate of $1.44 per share.

The following table indicates our common share repurchases in the open market to satisfy obligations under various equity compensation award grants during the fourth quarter of 2012:

Three Months Ended December 31, 2012	Total Number of Shares Purchased	Average Price Paid per Share
October 1-October 31	—	$ —
November 1-November 30	50,000	$ 30.36
December 1-December 31	31,000	$ 30.01

The following table indicates the securities authorized for issuance under equity compensation plans as of December 31, 2012:

Plan Category	Number of Securities to be Issued upon Exercise of Outstanding Options, Warrants and Rights	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance under Equity Compensation Plans	
Equity compensation plans approved by security holders	2,945,400	$ 34.19	17,013,520	(A)
Equity compensation plans not approved by security holders	—	$ —	3,589,032	(B)
Total	**2,945,400**	**$ 34.19**	**20,602,552**	

(A) Shares issuable under our Long-Term Incentive Plan.
(B) Shares issuable under our Employee Stock Purchase Plan.

For additional discussion of specific plans concerning equity-based compensation, see Item 8. Financial Statements and Supplementary Data—Note 18. Stock Based Compensation.

Power

We own all of Power's outstanding limited liability company membership interests. For additional information regarding Power's ability to pay dividends, see Item 7. MD&A—Overview of 2012 and Future Outlook.

PSE&G

We own all of the common stock of PSE&G. For additional information regarding PSE&G's ability to continue to pay dividends, see Item 7. MD&A —Overview of 2012 and Future Outlook.

ITEM 6. SELECTED FINANCIAL DATA

PSEG

The information presented below should be read in conjunction with the MD&A and the Consolidated Financial Statements and Notes to Consolidated Financial Statements (Notes).

PSEG

Years Ended December 31,	2012	2011	2010	2009	2008
	Millions, except Earnings per Share				
Operating Revenues	$ 9,781	$ 11,079	$ 11,793	$ 12,035	$ 12,609
Income from Continuing Operations (A)	$ 1,275	$ 1,407	$ 1,557	$ 1,594	$ 918
Net Income	$ 1,275	$ 1,503	$ 1,564	$ 1,592	$ 1,188
Earnings per Share:					
Income from Continuing Operations					
Basic (A)	$ 2.52	$ 2.78	$ 3.08	$ 3.15	$ 1.81
Diluted (A)	$ 2.51	$ 2.77	$ 3.07	$ 3.14	$ 1.81
Net Income					
Basic	$ 2.52	$ 2.97	$ 3.09	$ 3.15	$ 2.34
Diluted	$ 2.51	$ 2.96	$ 3.08	$ 3.14	$ 2.34
Dividends Declared per Share	$ 1.42	$ 1.37	$ 1.37	$ 1.33	$ 1.29
As of December 31:					
Total Assets	$ 31,725	$ 29,821	$ 29,909	$ 28,678	$ 29,049
Long-Term Obligations (B)	$ 6,701	$ 7,482	$ 7,847	$ 7,679	$ 8,044

(A) Income from Continuing Operations for 2011 and 2008 includes after-tax charges of $ 170 million and $490 million, respectively, related to certain leveraged leases.

(B) Includes capital lease obligations.

Power and PSE&G

Omitted pursuant to conditions set forth in General Instruction I of Form 10-K.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (MD&A)

This combined MD&A is separately filed by Public Service Enterprise Group Incorporated (PSEG), PSEG Power LLC (Power) and Public Service Electric and Gas Company (PSE&G). Information contained herein relating to any individual company is filed by such company on its own behalf. Power and PSE&G each make representations only as to itself and make no representations whatsoever as to any other company.

PSEG's business consists of three reportable segments, which are:

- **Power,** our wholesale energy supply company that integrates its generating asset operations with its wholesale energy, fuel supply, energy trading and marketing and risk management activities primarily in the Northeast and Mid-Atlantic United States,
- **PSE&G,** our public utility company which provides transmission and distribution of electric energy and gas in New Jersey; implements demand response and energy efficiency programs and invests in solar generation, and
- **Energy Holdings,** which principally owns and manages a portfolio of lease investments and solar generation projects.

Our business discussion in Part I, Item 1. Business provides a review of the regions and markets where we operate and compete, as well as our strategy for conducting our businesses within these markets, focusing on operational excellence, financial strength and making disciplined investments. Our risk factor discussion in Part I Item 1A provides information about factors that could have a material adverse impact on our businesses. The following discussion provides an overview of the significant events and business developments that have occurred during 2012 and key factors that we expect will drive our future performance. This discussion refers to the Consolidated Financial Statements (Statements) and the Related Notes to Consolidated Financial Statements (Notes). This discussion should be read in conjunction with such Statements and Notes.

OVERVIEW OF 2012 AND FUTURE OUTLOOK

2012 Overview

During 2012, our financial results continued to be adversely impacted by lower prices for electricity and natural gas in the markets we serve. Electricity prices remained low due to a combination of a slow recovery in demand growth and sustained low natural gas prices. The slow economic recovery negatively impacts utility sales, and the wholesale energy and capacity markets in which we operate. The continued decline in wholesale natural gas prices resulting from greater supply from shale production has further contributed to the steady decline in the wholesale price of electricity.

In the face of reduced pricing and lower demand for electricity, we continued to pursue our three-pronged strategy of operational excellence, financial strength and disciplined investment. Our focus has been to change the business mix of our operations with increased investments in our regulated utility. Through our regulated utility operations, we secured higher and more stable transmission revenues in 2012 resulting from our annual transmission formula rate update filing with the Federal Energy Regulatory Commission (FERC) and made additional solar and energy efficiency investments in New Jersey, on which we receive contemporaneous returns. Through allocating capital to transmission and distribution infrastructure projects, we were able to take advantage of a low interest rate environment and tap into an available labor pool in the region, while enhancing the reliability of our service to our customers. Additionally, these sources of revenue allowed us to partially offset the impact of lower prices for electricity and natural gas, while the reduction in supply costs allows us to continue to invest in infrastructure improvements without raising our utility customers' rates.

While we have been successfully increasing our regulated utility earnings, we have not fully compensated for the reduction in generation earnings. Over the past few years, we experienced a decline in wholesale energy prices. Basic Generation Service (BGS) rates also declined, resulting in lower revenues for our generation business. As BGS rates reached a level closer to current spot market prices, customer migration away from BGS supply contracts continued in 2012, but at a slower pace as there was less incentive to switch to third party suppliers.

In addition, at year-end we were severely impacted by Superstorm Sandy, which resulted in the highest level of customer outages in our history. We sustained significant damage to some of our generation, transmission and distribution facilities. We received an order from the New Jersey Board of Public Utilities (BPU) allowing us to defer incurred, uninsured, incremental storm restoration costs associated with our gas and electric distribution systems.

S1-SSA-0009 - 10662

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

As of December 31, 2012, Power had incurred approximately $85 million in costs related to Superstorm Sandy, primarily comprised of repairs at certain generating stations and damage to materials and supplies, both at our fossil fleet. All the costs were recognized in Operation and Maintenance Expense, offset by $19 million of a pending future recovery of insurance proceeds. Power estimates that it will incur additional future costs primarily relating to repairs to, and replacement of, equipment and property up to approximately $215 million.

As of December 31, 2012, PSE&G had incurred approximately $295 million of costs to restore service to PSE&G's distribution and transmission systems and $5 million to repair its infrastructure and return it to pre-storm conditions. Of the costs incurred, approximately $40 million was recognized in Operation and Maintenance Expense, $75 million was recorded as Property, Plant and Equipment and $180 million was recorded as a Regulatory Asset because such costs were deferred as approved by the BPU under an Order received in December 2012. PSE&G recognized $6 million of insurance proceeds.

We are working with our insurance carriers with regard to other losses and expenses due to the storm but no assurances can be given relative to the timing or amount of insurance recovery. For additional information on the impacts of Superstorm Sandy, see Item 8. Financial Statements and Supplementary Data-Note 13. Commitments and Contingent Liabilities.

There have also been significant regulatory and legislative developments during the year which may affect our operations and financial results in the future as new rules and regulations are developed. Competitive wholesale power market design is of particular importance to our results. Through litigation and the regulatory processes, we advocated for policies and rules in response to subsidized generation and procurement activities in New Jersey in connection with the Long-Term Capacity Agreement Pilot Program (LCAPP), and in Maryland through the Maryland Public Service Commission's Request for Proposal. After a favorable stakeholder vote, PJM filed proposed modifications to the Minimum Offer Price Rule (MOPR) with the FERC. In February 2013, the FERC issued a deficiency letter to PJM seeking additional information regarding the proposed MOPR changes. If the FERC approves the proposal, these modifications should significantly improve the MOPR rules and appropriately reduce the ability for subsidized generation assets to artificially suppress wholesale market prices. Litigation with respect to the New Jersey LCAPP and Maryland's efforts to subsidize new generation and challenges to the BPU's implementation of LCAPP continues. See Item 1. Business, Federal Regulation, FERC - Capacity Market Issues for further information.

We continued to monitor and advocate for the development and implementation of fair and reasonable rules by the U.S. Environmental Protection Agency (EPA). The EPA is proceeding to implement its regulatory initiatives but the outcome of judicial review remains uncertain. The EPA's 316(b) rule on cooling water intake could adversely impact future nuclear and fossil operations and costs. However, we believe our generation business remains well-positioned for Clean Air Act regulations, if and when they are implemented. For additional information on the potential impacts of the 316(b) rule, see Item 8. Financial Statements and Supplementary Data-Note 13. Commitments and Contingent Liabilities.

Another regulatory development in 2012 that could have a material impact on our business are FERC rules under Order 1000, which altered the right of first refusal previously held by incumbent utilities to build all transmission within their respective service territories. We are opposing these rules in litigation and have worked with PJM to develop implementing rules that mitigate the impact of Order 1000. We cannot predict the final outcome or impact on us; however, specific implementation of Order 1000 within our service territory may expose us to competition for certain types of transmission projects, while at the same time affording us opportunities to construct transmission outside of our service territory. See Item 1. Business, Federal Regulation, FERC -Transmission Regulation.

We are making progress in addressing these challenges, but regulatory uncertainty remains a concern.

In 2012, our continued focus on operational excellence provided the foundation for our financial strength, in turn enabling us to invest in a disciplined way for growth, providing value for our customers, employees and shareholders and allowing us to best succeed in a sustained low electricity price environment. Some specific highlights in the areas of operational excellence, financial strength and disciplined investment in 2012 are discussed in more detail below.

Operational Excellence

We seek to emphasize operational performance while developing opportunities in our competitive and regulated businesses. Low commodity prices continue to stress margins, but the flexibility of our generating fleet has allowed us to take advantage of market opportunities as we remain diligent in managing costs. In 2012, we

- constructed approximately $656M million of gross plant additions to our transmission assets currently in service,
- continued to achieve high nuclear capacity factors, which averaged 91.1% for our nuclear fleet in 2012,
- improved fossil plant summer output,
- realized high combined cycle gas turbine fleet capacity utilization factors,

S1-SSA-0009 - 10663

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- optimized fleet-switching from coal to gas to improve dispatch economics,
- extended collective bargaining agreements with four of our labor unions for four years,
- implemented more efficient plant staffing,
- were awarded the 2011 National Reliability Excellence Award for “demonstrating sustained leadership, innovation and achievement in the area of electric reliability," representing the fifth time in eight years we received this recognition, and eleven straight years that we garnered the ReliabilityOne Award for the Mid-Atlantic region, and
- received other award recognition for reliability and outage response.

Financial Strength

Our financial metrics remained strong in 2012. We maintained

- a strong balance sheet and operating cash flow,
- substantial liquidity resources, including total credit capacity of $4.3 billion and $379 million of cash on hand as of December 31, 2012, with a portion of available credit facilities extending until 2017,
- stable credit ratings,
- dividend payments of $1.42 per share for 2012, representing a change in our dividend policy moving from a strict earnings payout based approach to one that takes into consideration the growing contribution to earnings and cash from our regulated operations and continued cash flow from our generation business, and
- a well-funded position for our pension obligation, having made a $224 million contribution to our pension plan in 2012.

We also funded our capital program with internally generated cash and external debt financing.

In addition, we entered into a closing agreement settling our dispute with the Internal Revenue Service (IRS) over certain international leveraged lease transactions with finality for all tax periods in which we realized tax deductions from these transactions. Also, we executed settlement agreements covering all audit issues for tax years 1997 through 2006, concluding ten years of open audits for us. For additional information on the IRS audit settlements, see Item 8. Financial Statements and Supplementary Data-Note 20. Income Taxes.

Disciplined Investment

We seek to invest in areas that complement our existing businesses and provide attractive risk-adjusted returns. These areas include upgrading our energy infrastructure, responding to trends in environmental protection and providing new energy supplies in domestic markets with growing demand. We also have several projects where we are investing to continue to improve our operational performance. As noted above, over the past few years, we have shifted our focus to investing at the utility. Our capital expenditure forecast includes approximately $6.1 billion in spending over the next three years, 80% of which is at PSE&G. In addition, in 2012 we:

- invested approximately $1.1 billion in transmission infrastructure projects,
- completed the Peach Bottom steam path retrofit,
- added 400 MW of additional capacity with new peaking plants in New Jersey and Connecticut,
- completed solar projects in Arizona and Delaware, with the expectation to complete an additional Arizona solar project in 2013,
- made additional investments in our Capital Infrastructure Program (CIP II) and our Energy Efficiency and Demand Response Programs, and
- obtained BPU and NJDEP approvals of the North Central Reliability transmission project.

On February 20, 2013, we filed a petition with the BPU describing $3.9 billion of improvements we recommend making to our electric and gas distribution systems over a ten year period to harden and improve resiliency for the future. In addition, we anticipate investing an additional $1.5 billion in improvements to our transmission system for the same reason. See Capital Requirements for additional information.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

There is no guarantee that our projects currently underway or any future initiatives will be achieved since many issues need to be favorably resolved, such as regulatory approvals. Delays in the construction schedules of our projects could impact their costs as well as the timing of expected revenues.

Future Outlook

Our future success will depend on our ability to continue to maintain strong operational and financial performance in a difficult economy and cost-constrained environment and to respond to the issues and challenges described below and take advantage of these and other regulatory and legislative initiatives. In order to do this, we must continue to:

- focus on controlling costs while maintaining our safety, reliability and compliance standards,
- successfully re-contract our open supply positions,
- execute our capital investment program, including investments for growth that yield contemporaneous and attractive risk-adjusted returns while enhancing the reliability of the service we provide to our customers,
- advocate for measures to ensure the implementation by PJM and FERC of market design rules that continue to protect competition and achieve appropriate RPM and BGS pricing, and
- reach out to and engage multiple stakeholders, including regulators, government officials, customers and investors.

For 2013 and beyond, the key issues and challenges we expect our business to confront include

- the continuing potential for sustained lower natural gas and electricity prices, both at market hubs and at locations where we operate,
- challenges to competitive markets, including support for subsidized generation in many states, particularly in New Jersey,
- customer migration away from our BGS supply contracts,
- uncertainty in the national and regional economic recovery and continuing customer conservation efforts, which impact customer demand,
- regulatory and political uncertainty, particularly with regard to future energy policy, design of energy and capacity markets, transmission policy and environmental regulation,
- the aftermath of Hurricane Irene and Superstorm Sandy, including addressing the BPU's review of performance and communications, as well as cost recovery and opportunities for investment in system strengthening and improvements,
- compressed margins and reduced utilization at coal plants,
- uncertain pension expenses and funding requirements given market volatility,
- liquidating the remaining portfolio of non-core assets where possible, while managing risk,
- monitoring financially stressed power plant leveraged lease investments, and
- successfully managing the transition to our operation of Long Island Power Authority's (LIPA) transmission and distribution system.

RESULTS OF OPERATIONS

	Years Ended December 31,		
	2012	2011	2010
Earnings (Losses)	Millions		
Power (A)	$ 647	$ 1,002	$ 1,136
PSE&G (A) (B)	528	521	359
Energy Holdings (C)	86	(134)	49
Other (D)	14	18	13
PSEG Income from Continuing Operations	**1,275**	**1,407**	**1,557**
Income (Loss) from Discontinued Operations, Including Gain on Disposal (E)	—	96	7
PSEG Net Income	**$ 1,275**	**$ 1,503**	**$ 1,564**

	Years Ended December 31,		
Earnings Per Share (Diluted)	2012	2011	2010
PSEG Income from Continuing Operations	**$ 2.51**	**$ 2.77**	**$ 3.07**
Income from Discontinued Operations, Including Gain on Disposal (E)	—	0.19	0.01
PSEG Net Income	**$ 2.51**	**$ 2.96**	**$ 3.08**

(A) Power's and PSE&G's results in 2012 include after-tax expenses of $39 million and $24 million, respectively, for Operation and Maintenance (O&M) costs due to severe damage caused by Superstorm Sandy. See Item 8. Financial Statements and Supplementary Data—Note 13. Commitments and Contingencies.

(B) PSE&G's results in 2010 include an after-tax charge of $72 million related to an agreement to refund previous Market Transition Charge (MTC) collections in the succeeding two years.

(C) Energy Holdings' results include an after-tax charge of $170 million taken in 2011 related to the reserve for assets underlying a leveraged lease receivable. See Item 8. Financial Statements and Supplementary Data—Note 8. Financing Receivables.

(D) Other includes parent company interest and financing costs, donations, certain administrative and general expenses.

(E) See Item 8. Financial Statements and Supplementary Data—Note 4. Discontinued Operations and Dispositions.

The 2012 year-over-year decrease in our Income from Continuing Operations was driven by the following:

- lower average pricing and volumes for electricity sold under our BGS contracts,
- lower average prices realized on generation sold into various power pools,
- unfavorable amounts related to the MTM activity, discussed below,
- higher Operation and Maintenance costs due to severe damage caused by Superstorm Sandy to our transmission and distribution system throughout our service territory as well as to some of our generation infrastructure in the northern part of New Jersey.

The decreases were partially offset by:

- the absence of the $170 million after-tax charge taken in 2011 on leveraged leases related to Dynegy and the settlement proceeds received in 2012 (see Item 8. Financial Statements and Supplementary Data—Note 8. Financing Receivables), and
- higher transmission revenues at PSE&G.

S1-SSA-0009 - 10666

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The 2011 year-over-year decrease in our Income from Continuing Operations was driven by the following:

- the $170 million after-tax charge on leveraged leases related to Dynegy,
- the absence of an after-tax charge of $72 million related to an agreement to refund previous MTC collections in the succeeding two years,
- lower average pricing and volumes for electricity sold under our BGS contracts,
- lower realized prices and/or lower sales volumes in the various power pools,
- higher interest costs and depreciation expense related to the completion of installation of back-end technology at two of our fossil plants, and
- the absence of realized gains recognized in 2010 due to restructuring of the investments in our Rabbi Trust.

The decreases were partially offset by:

- favorable amounts related to the MTM activity reported below,
- an increase in revenues from new wholesale contracts entered into in the first half of 2011, and
- lower Operation and Maintenance costs primarily due to lower pension and OPEB costs.

Our results include the realized gains, losses and earnings on Power's Nuclear Decommissioning Trust (NDT) Fund and other related NDT activity. Net realized gains, interest and dividend income and other costs related to the NDT Fund are recorded in Other Income and Deductions, and impairments on certain NDT securities are recorded as Other-Than-Temporary Impairments. Interest accretion expense on Power's nuclear Asset Retirement Obligation (ARO) is recorded in Operation and Maintenance Expense, as well as the depreciation related to the ARO asset. In September 2012, we restructured a portion of our NDT Fund and realized gains of $59 million. The investments were transitioned to new investment managers.

Our results also include the after-tax impacts of non-trading mark-to-market (MTM) activity, which consist of the financial impact from positions with forward delivery dates.

The combined after-tax impact on Income from Continuing Operations for the years ended December 31, 2012, 2011 and 2010 include the changes related to NDT Fund and MTM activity shown in the chart below:

Years Ended December 31,	2012	2011	2010
	Millions, after tax		
NDT Fund and Related Activity	$ 52	$ 50	$ 46
Non-Trading MTM Gains (Losses)	$ (10)	$ 107	$ (1)

PSEG

Our results of operations are primarily comprised of the results of operations of our operating subsidiaries, Power, PSE&G and Energy Holdings, excluding charges related to intercompany transactions, which are eliminated in consolidation. We also include certain financing costs, charitable contributions and general and administrative costs at the parent company. For additional information on intercompany transactions, see Item 8. Financial Statements and Supplementary Data—Note 23. Related-Party Transactions.

Income from Equity Method Investments	12	4	4	8	N/A	—	—
Other Income and (Deductions)	162	135	158	27	20	(23)	(15)
Other-Than-Temporary Impairments	18	22	11	(4)	(18)	11	100
Interest Expense	423	475	472	(52)	(11)	3	1
Income Tax Expense	736	977	1,059	(241)	(25)	(82)	(8)
Income from Discontinued Operations, including Gain on Disposal, net of tax	—	96	7	(96)	(100)	89	N/A

For a detailed explanation of the variances, see the discussions for Power, PSE&G and Energy Holdings below.

Power

	Years Ended December 31,			Increase/ (Decrease)	Increase/ (Decrease)
	2012	2011	2010	2012 vs. 2011	2011 vs. 2010
	Millions				
Income from Continuing Operations	$ 647	$ 1,002	$ 1,136	$ (355)	$ (134)
Income (Loss) from Discontinued Operations, net of tax	—	96	7	(96)	89
Net Income	$ 647	$ 1,098	$ 1,143	$ (451)	$ (45)

The 2012 year-over-year decrease in Income from Continuing Operations was driven by the following:

- lower average prices realized on generation sold into the PJM and New York (NY) power pools and MTM losses due from the realization of prior year unrealized gains and adverse changes in unrealized prices in 2012 for forward positions,
- lower average pricing and lower volumes of electricity sold under our BGS contracts, net of lower cost to serve,
- lower volumes on wholesale load contracts in PJM, lower operating reserve, ancillary and Reliability Must Run (RMR) revenues primarily in PJM and New England,
- lower average pricing and volumes of gas sold under our BGSS contracts, net of lower cost to serve, and
- higher Operation and Maintenance Expense due to damage to our generation infrastructure, primarily our fossil fleet, from Superstorm Sandy and higher refueling and maintenance costs at our nuclear plants.

These decreases were partially offset by

- lower planned outages and maintenance costs in 2012 at certain of our fossil plants, and

S1-SSA-0009 - 10668

Past financial performance is no guarantee of future results.

- lower interest expense due to the maturity of Senior Notes in April 2011 and the early redemption of Senior Notes in December 2011.

For the year ended December 31, 2011, the primary reasons for the decrease in Income from Continuing Operations were

- lower average pricing and lower volumes of electricity sold under our BGS contracts, as a result of customer migration,
- higher Operation and Maintenance expense related to planned outage work at certain of our fossil plants, and
- higher depreciation expense related to the completion of installation of back-end technology at two of our fossil plants.

The decreases were partially offset by

- favorable amounts related to the MTM activity,
- favorable results from our coal optimization efforts, and
- an increase from new wholesale contracts entered into in the first half of 2011.

The year-over-year detail for these variances for these periods is discussed below:

Power	Years Ended December 31, 2012	2011	2010	Increase / (Decrease) 2012 vs. 2011		Increase / (Decrease) 2011 vs. 2010	
		Millions		Millions	%	Millions	%
Operating Revenues	$ 4,865	$ 6,143	$ 6,558	$ (1,278)	(21)	$ (415)	(6)
Energy Costs	2,383	3,046	3,374	(663)	(22)	(328)	(10)
Operation and Maintenance	1,122	1,102	1,046	20	2	56	5
Depreciation and Amortization	237	224	175	13	6	49	28
Other Income (Deductions)	109	111	117	(2)	(2)	(6)	(5)
Other-Than-Temporary Impairments	18	20	9	(2)	(10)	11	N/A
Interest Expense	134	175	157	(41)	(23)	18	11
Income Tax Expense	433	685	778	(252)	(37)	(93)	(12)
Income (Loss) from Discontinued Operations	—	96	7	(96)	(100)	89	N/A

Year ended December 31, 2012 as compared to 2011

Operating Revenues decreased $1,278 million due to

Generation Revenues decreased $975 million due primarily to

- lower net revenues of $564 million due primarily to lower average realized prices for our generation sold into the PJM and NY power pools and MTM losses due from the realization of prior year unrealized gains and adverse changes in unrealized prices in 2012 for forward positions,
- a decrease of $264 million due primarily to lower average pricing and lower volumes of electricity sold under our BGS contracts, primarily as a result of warmer winter weather in 2012 as well as customer migration, and
- a net decrease of $154 million due to lower volumes on wholesale load contracts in the PJM and New England (NE) regions,
- partially offset by a net increase of $7 million in other revenues consisting of higher net capacity revenues, partially offset by lower operating reserve, ancillary and RMR revenues.

S1-SSA-0009 - 10669

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Gas Supply Revenues decreased $336 million due primarily to

- a decrease of $306 million in sales under the BGSS contract, substantially comprised of lower average gas prices on lower volumes of sales in 2012 due to warmer average temperatures during the first quarter of 2012, and
- a net decrease of $31 million due primarily to lower average prices, partially offset by higher sales volumes to third party customers.

Trading Revenues increased $33 million in 2012 due to the discontinuation of trading activities in the second quarter of 2011. As a result, the increase is due primarily to the absence of losses on electric energy supply contracts recognized in 2011.

Operating Expenses

Energy Costs represent the cost of generation, which includes fuel costs for generation as well as purchased energy in the market, and gas purchases to meet Power's obligation under its BGSS contract with PSE&G. Energy Costs decreased $663 million due to

- ***Gas costs*** decreased $312 million, principally related to obligations under the BGSS contract, reflecting lower average gas inventory costs coupled with lower sales volumes in 2012 due primarily to warmer average temperatures during the first quarter of 2012.
- ***Generation costs*** decreased $351 million due primarily to $227 million of lower fuel costs, reflecting the utilization of lower volumes of coal and lower average natural gas prices, partially offset by the utilization of higher volumes of natural gas and higher nuclear fuel prices in 2012. The decrease was also attributable to $152 million of lower energy purchases, primarily in the PJM region as a result of lower load contract volumes in 2012, and $31 million of lower emission charges due to lower coal generation in the PJM and NE regions and impairment charges recorded in 2011 related to excess SO_2 emission allowances. These decreases were partially offset by an increase of $59 million due primarily to higher congestion costs in the PJM region.

Operation and Maintenance increased $20 million due primarily to

- an increase of $85 million due to damage from Superstorm Sandy for repairs to certain of our generation plants, primarily those in our fossil fleet, and to recognize the estimated loss of use of fossil materials and supplies, partially offset by a $19 million insurance recovery, and
- a net increase of $64 million due to higher refueling costs in 2012 for refueling outages at our 100%-owned Hope Creek nuclear unit and our 57%-owned Salem Unit 2 as compared to refueling outages for both of our 57%-owned Salem nuclear units in 2011,
- partially offset by a net decrease of $109 million largely due to lower fossil planned outages in 2012 and lower maintenance costs, principally at our gas-fired Bethlehem Energy Center (BEC) in New York, gas-fired Bergen and Linden facilities, coal/gas-fired Hudson and Mercer coal/gas-fired plants in New Jersey, and 23%-owned coal-fired Conemaugh plant in Pennsylvania, as well as to the absence of costs incurred for the cancellation and renegotiation of a major contractual agreement for parts and services in 2011.

Depreciation and Amortization increased $13 million due primarily to higher depreciable asset bases at Fossil and Nuclear, including placing into service the new gas-fired peaking units at Kearny, New Jersey and New Haven, Connecticut on June 1, 2012 and completion of the steam path retrofit upgrades at our co-owned Peach Bottom Units 2 and 3 in October 2012 and October 2011, respectively.

Other Income (Deductions) experienced no material change.

Other-Than-Temporary Impairments decreased $2 million due to lower impairments in 2012 on the NDT and Rabbi Trust Funds.

Interest Expense decreased $41 million due primarily to a decrease of $55 million resulting primarily from the maturity of $606 million of 7.75% Senior Notes in early April 2011 and the early redemption of $600 million of 6.95% Senior Notes in December 2011, partially offset by increases of $12 million due to two $250 million Senior Notes issuances in September 2011 and $3 million in higher interest costs since interest capitalization ceased for our Kearny and New Haven projects on their June 1, 2012 in-service date.

Income Tax Expense decreased $252 million in 2012 due primarily to lower pre-tax income.

Income (Loss) from Discontinued Operations

In 2011, we sold our two 1,000 MW combined-cycle generating facilities in Texas in separate transactions. In March 2011, we completed the sale of one plant for proceeds of $352 million at an after-tax gain of $54 million. In July 2011, we completed the sale of the second plant for proceeds of $335 million at an after-tax gain of $25 million. The results of operations for both

plants for 2011 and 2010, including the gains in 2011 on the sales of the plants, are included in this category. See Item 8. Financial Statements and Supplementary Data—Note 4. Discontinued Operations and Dispositions for additional information.

Year ended December 31, 2011 as compared to 2010

Operating Revenues decreased $415 million due to

Gas Supply Revenues decreased $290 million due primarily to

- a net decrease of $283 million in sales under the BGSS contract, substantially comprised of lower average gas prices on lower volumes of sales in 2011 due to warmer average temperatures during the fourth quarter of 2011,
- a net decrease of $7 million due primarily to lower average gas prices partially offset by higher sales volumes to third party customers.

Generation Revenues decreased $143 million due primarily to

- a net decrease of $305 million due primarily to lower average pricing and lower volumes of electricity sold under our BGS contracts as a result of customer migration,
- a decrease of $70 million due primarily to lower capacity payments from the various power pools resulting from lower market prices, and
- a decrease of $8 million due to lower operating reserve revenue in 2011.

These were partially offset by

- an increase of $136 million from new wholesale load contracts in the PJM and NE regions commencing in January 2011 and April 2011, respectively, net of lower average realized prices in the NE region, and
- higher net revenues of $108 million due primarily to MTM gains on economic hedging activity of $228 million, partially offset by lower realized prices in the PJM and NY power pools and lower volumes of generation sold in the PJM and NE power pools of $120 million.

Trading Revenues increased $18 million due primarily to lower net losses in 2011 on certain electric energy supply contracts as well as the discontinuation of trading activities in the second quarter of 2011.

Operating Expenses

Energy Costs represent the cost of generation, which includes fuel purchases for generation as well as purchased energy in the market, and gas purchases to meet Power's obligation under its BGSS contract with PSE&G. Energy Costs decreased $328 million due to

- Gas costs decreased $282 million, principally related to obligations under the BGSS contract, reflecting lower average gas inventory costs coupled with lower sales volumes in 2011 due to warmer average temperatures during the fourth quarter of 2011.
- Generation costs decreased by $46 million due primarily to $211 million of lower fuel costs, including $251 million of lower fossil fuel costs primarily reflecting the utilization of lower volumes of both coal and oil, favorable results from our coal optimization efforts, and lower natural gas prices, partially offset by higher MTM losses and higher nuclear fuel costs in 2011. The decrease was also attributable to $16 million of lower emission charges, including $10 million of lower impairment charges related to excess SO_2 emission allowances. These decreases were partially offset by an increase of $153 million in higher energy purchases in 2011 in the PJM and NE power pools as the result of lower generation and the need to meet higher load contract demand in 2011 and $23 million of higher operating reserve obligations in the PJM region.

Operation and Maintenance increased $56 million due primarily to

- a net increase of $47 million due largely to planned outage costs, including hot gas path inspection outage costs at our BEC and Linden facilities as well as higher outage costs at our Bergen, and Keystone facilities, partially offset by higher outage and repair costs at certain of our other fossil plants in 2010,
- $20 million of costs incurred for the cancellation and renegotiation of a major contractual agreement for parts and services for our combined cycle Bethlehem Energy (BEC) facility in New York and Linden and Bergen facilities in New Jersey, and

- a net increase of $3 million due to refurbishment projects at our Salem nuclear facilities,
- partially offset by a decrease of $13 million due to a decrease in pension and OPEB costs tempered by higher labor costs and incentive awards.

Depreciation and Amortization increased $49 million due primarily to

- a $37 million increase due to completion of installation of back-end technology at the end of 2010 at our Mercer and Hudson generating facilities, and
- a $12 million increase due to higher depreciable asset bases at Nuclear and Fossil.

Other Income and (Deductions) The net decrease of $6 million was due primarily to

- a $17 million premium paid on the early extinguishment of 6.95% Senior Notes due in June 2012, and
- the absence of $7 million of gains realized in 2010 from restructuring the Rabbi Trust,
- partially offset by higher net realized gains of $19 million on our NDT Fund.

Other-Than-Temporary Impairments increased $11 million due primarily to higher impairments on the NDT Fund in 2011.

Interest Expense increased $18 million due primarily to

- Higher interest expense of $49 million resulting primarily from the installation by year-end 2010 of back-end technology at our Mercer and Hudson stations for which we had been allowed to capitalize interest costs in 2010 while such projects were under construction,
- partially offset by lower interest expense of $30 million due primarily to the redemption of $606 million of 7.75% Senior Notes in early April 2011 and lower debt issuance costs of $3 million.

Income Tax Expense decreased $93 million in 2011 due primarily to lower pre-tax income.

Income (Loss) from Discontinued Operations

See explanation above for year ended December 31, 2012 as compared to 2011.

PSE&G

	Years Ended December 31,			Increase	Increase
	2012	2011	2010	2012 vs. 2011	2011 vs. 2010
	Millions				
Income from Continuing Operations	$ 528	$ 521	$ 359	$ 7	$ 162
Net Income	$ 528	$ 521	$ 359	$ 7	$ 162

For the year ended December 31, 2012, the primary reasons for the increase in Income from Continuing Operations were

- higher transmission revenues due to increased investments in transmission projects, and
- tax benefits related to settlement of IRS audits,
- partially offset by higher Operation and Maintenance expense, including higher storm costs and higher pension and OPEB expenses.

For the year ended December 31, 2011, the primary reasons for the increase in Income from Continuing Operations were

- the absence of a $72 million after-tax charge recorded in June 2010 related to the refund of previous MTC collections,
- higher annualized base rates for electric and gas delivery as well as transmission, and
- lower Operation and Maintenance expense, largely due to lower pension and OPEB expenses.

Year ended December 31, 2012 as compared to 2011

Operating Revenues decreased $700 million due primarily to

Commodity Revenue decreased $792 million due to lower Electric and Gas revenues. This is entirely offset as savings in Energy Costs. PSE&G earns no margin on the provision of BGS and BGSS to retail customers.

- Electric revenues decreased $488 million due primarily to $431 million in lower BGS revenues and $57 million in lower revenues from the sale of Non-Utility Generation (NUG) energy and collections of Non-Utility Generation Charges (NGC) due primarily to lower prices. BGS sales decreased 12% due primarily to customer migration to third party suppliers (TPS); in contrast, delivery sales decreased only 1%.
- Gas revenues decreased $304 million due to lower BGSS volumes of $115 million and lower BGSS prices of $189 million. The average price of natural gas was 15% lower in 2012 than in 2011.

Delivery Revenues increased $81 million due primarily to an increase in transmission revenues.

- Transmission revenues were $83 million higher due to increased investments in transmission projects.
- Electric distribution revenues decreased $6 million due primarily to lower Transitional Energy Facilities Assessment (TEFA) revenue of $22 million due to a lower TEFA rate and lower sales volumes of $13 million, partially offset by higher Solar, Energy Efficiency and Conservation Program (Solar/EE) revenue of $20 million and higher Capital Infrastructure Program (CIP) revenue of $9 million.
- Gas distribution revenues increased $4 million due primarily to higher Weather Normalization Clause (WNC) revenue of $52 million and higher CIP revenue of $8 million, partially offset by lower sales volumes of $43 million, and lower TEFA revenue of $13 million due to a lower TEFA rate.

Clause Revenues increased $12 million due primarily to higher Securitization Transition Charge (STC) revenues of $19 million, partially offset by lower Societal Benefit Charges (SBC) of $6 million and a lower Margin Adjustment Clause (MAC) of $2 million. The changes in STC and SBC amounts were entirely offset by the amortization of related costs (Regulatory Assets) in O&M, Depreciation and Amortization and Interest Expense. PSE&G does not earn margin on SBC, MAC or STC collections.

Energy Costs decreased $792 million. This is entirely offset by Commodity Revenue.

- Electric costs decreased $488 million or 18% due to $258 million in lower BGS and NUG volumes, $202 million of lower BGS prices, and $28 million for decreased deferred cost recovery. BGS and NUG volumes decreased 10% due primarily to customer migration to TPS.
- Gas costs decreased $304 million or 24% due to $115 million or 9% in lower sales volumes due primarily to weather and $189 million or 15% in lower prices.

S1-SSA-0009 - 10673

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Operation and Maintenance increased $136 million, of which the most significant components were

- a $32 million increase in costs recognized related to SBC, Solar/EE and CIP,
- a $27 million increase in pension and other postretirement benefits (OPEB) expenses,
- a $17 million increase in storm damages,
- a $10 million increase in transmission related costs, and
- a $7 million increase in payroll costs.

Depreciation and Amortization increased $59 million due primarily to

- a $39 million increase in amortization of Regulatory Assets, and
- a $21 million increase in additional plant in service.

Taxes Other Than Income Taxes decreased $35 million due to a lower TEFA rate and lower sales volumes for electric and gas.

Other Income and (Deductions) net increase of $26 million was due primarily to

- a $14 million increase in capitalized allowance for equity funds used during construction,
- an $8 million increase in solar loan interest income, and
- a $4 million increase in Rabbi Trust interest and gains.

Other-Than-Temporary Impairments experienced no material change.

Interest Expense decreased $15 million due primarily to the partial redemption of securitization debt and higher interest capitalization related to higher construction work in progress, partially offset by interest relating to the new debt issued in 2012. See Note 9. Changes in Capitalization for details.

Income Tax Expense decreased $33 million due primarily to changes in tax reserves related to settlement of IRS tax audits.

Year ended December 31, 2011 as compared to 2010

Operating Revenues decreased $543 million due primarily to

Commodity Revenue decreased $704 million due to lower Electric and Gas revenues. This is entirely offset as savings in Energy Costs. PSE&G earns no margin on the provision of BGS and BGSS.

- Electric revenues decreased $397 million due primarily to $466 million in lower BGS revenues, partially offset by $69 million in higher revenues from the sale of NUG energy and collections of NGC due primarily to higher prices. BGS sales decreased 16% due primarily to customer migration to TPS; in contrast, delivery sales decreased only 2%.
- Gas revenues decreased $307 million due to lower BGSS prices of $259 million and lower BGSS volumes of $48 million. The average price of gas was 3% lower in 2011 than in 2010.

Delivery Revenues increased $74 million due primarily to an increase in prices for electric and gas distribution and transmission.

- Transmission revenues were $42 million higher due primarily to increased investments in transmission projects.
- Gas distribution revenues increased $32 million due primarily to higher WNC revenue of $19 million and the impact of base rate increases of $17 million, partially offset by lower CIP revenue of $5 million.
- Electric distribution revenues were flat due primarily to the impact of base rate increases of $17 million and higher CIP revenue of $1 million, offset by lower sales volumes of $18 million.

Clause Revenues increased $73 million due primarily to the absence of $122 million charge recorded in June 2010 related to our agreement to refund previous MTC collections over two years and higher SBC and MAC of $49 million, partially offset by lower STC revenues of $98 million. The changes in STC, SBC and MAC amounts were entirely offset by the amortization of related costs (Regulatory Assets) in O&M, Depreciation and Amortization and Interest Expense. PSE&G earns no margins on SBC, STC or MAC collections.

Other Operating Revenues increased $14 million due primarily to increased revenues from our appliance repair business and miscellaneous electric operating revenues.

S1-SSA-0009 - 10674

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Energy Costs decreased $704 million. This is entirely offset by Commodity Revenue.

- Electric costs decreased $397 million due to $405 million in lower BGS and NUG volumes and $75 million of lower BGS and NUG prices, partially offset by $83 million for increased deferred cost recovery. BGS and NUG volumes decreased 14% due primarily to customer migration to TPS.
- Gas costs decreased $307 million or 19% due to $259 million or 16% in lower prices and $48 million or 3% in lower sales volumes due primarily to weather.

Operation and Maintenance decreased $70 million due primarily to

- a $71 million decrease in pension and OPEB expenses,
- $20 million of lower net deferred expenses associated with SBC, Regional Greenhouse Gas Initiative and Stimulus clauses, and
- the absence of $15 million in expenses relating to 2010 rate case disallowances.

These were partially offset by

- a $9 million increase in storm restoration work,
- a $6 million increase in costs relating to tree trimming,
- a $3 million increase in bad debt expense, and
- a $3 million increase in incentive payments.

Depreciation and Amortization decreased $31 million due primarily to

- a decrease of $63 million for amortization of Regulatory Assets,
- partially offset by an increase of $28 million for additional plant in service, and an increase of $3 million in net other charges.

Other Income and (Deductions) experienced no material change.

Other-Than-Temporary Impairments experienced no material change.

Interest Expense decreased $8 million due primarily to lower average debt balances.

Income Tax Expense increased $108 million due primarily to higher pre-tax income.

Energy Holdings

	Years Ended December 31,			Increase/ (Decrease)	Increase/ (Decrease)
	2012	2011	2010	2012 vs. 2011	2011 vs. 2010
	Millions				
Income from Continuing Operations	$ 86	$ (134)	$ 49	$ 220	$ (183)
Net Income	$ 86	$ (134)	$ 49	$ 220	$ (183)

For the year ended December 31, 2012, the primary reasons for the increase in Income from Continuing Operations were

- the absence of the $170 million after-tax charge on leveraged leases related to Dynegy in 2011 and the settlement proceeds received in 2012 (see Item 8. Financial Statements and Supplementary Data—Note 8. Financing Receivables), and
- the tax benefits related to the settlement of IRS tax audits in the first quarter of 2012.

For the year ended December 31, 2011, the primary reason for the decrease in Income from Continuing Operations was

- the $170 million after-tax charge on leveraged leases related to Dynegy.

LIQUIDITY AND CAPITAL RESOURCES

The following discussion of our liquidity and capital resources is on a consolidated basis, noting the uses and contributions, where material, of our three direct operating subsidiaries.

Financing Methodology

We expect our capital requirements to be met through internally generated cash flows and external financings, consisting of short-term debt for working capital needs and long-term debt for capital investments.

PSE&G's sources of external liquidity include a $600 million multi-year syndicated credit facility. PSE&G's commercial paper program is the primary vehicle for meeting seasonal, intra-month and temporary working capital needs. PSE&G does not engage in any intercompany borrowing or lending. PSE&G maintains back-up facilities in an amount sufficient to cover 100% of commercial paper outstanding. PSE&G's dividend payments to PSEG are consistent with its capital structure objectives which have been established to maintain investment grade credit ratings. PSE&G's long-term financing plan is designed to replace maturities, fund a portion of its capital program and manage short-term debt balances. Generally, PSE&G uses either secured medium-term notes or first mortgage bonds to raise long-term capital.

PSEG, Power, Energy Holdings and PSEG Services Corporation participate in a corporate money pool, an aggregation of daily cash balances designed to efficiently manage their respective short-term liquidity needs. PSEG's sources of external liquidity include multi-year syndicated credit facilities totaling $1 billion. These facilities are available to back-stop PSEG's commercial paper program, issue letters of credit and for general corporate purposes. These facilities may also be used to provide support to PSEG's subsidiaries. PSEG's credit facilities and the commercial paper program are available to support PSEG working capital needs or to temporarily fund growth opportunities in advance of obtaining permanent financing. From time to time, PSEG may make equity contributions or provide credit support to its subsidiaries.

Power's sources of external liquidity include $2.7 billion of syndicated multi-year credit facilities. Additionally, from time to time, Power maintains bilateral credit agreements designed to enhance its liquidity position. Credit capacity is primarily used to provide collateral in support of hedging activities and to meet potential collateral postings in the event of a credit rating downgrade below investment grade. Power's dividend payments to PSEG are also designed to be consistent with its capital structure objectives which have been established to maintain investment grade credit ratings and provide sufficient financial flexibility. Generally, Power issues senior unsecured debt to raise long-term capital.

Operating Cash Flows

We expect our operating cash flows combined with cash on hand and financing activities to be sufficient to fund capital expenditures and shareholder dividend payments.

For the year ended December 31, 2012, our operating cash flow decreased by $770 million. For the year ended December 31, 2011, our operating cash flow increased by $1,393 million. The net changes were due to net changes from our subsidiaries as discussed below.

Power

Power's operating cash flow decreased $433 million from $1,812 million to $1,379 million for the year ended December 31, 2012, as compared to 2011, primarily resulting from lower earnings and a $173 million decrease from lower net collections of counterparty receivables, partially offset by

- a decrease of $57 million in benefit plan funding,
- a $73 million decrease in spending for fuel, materials and supplies, and
- a $246 million decrease in net payment of counterparty payables.

Power's operating cash flow increased $246 million from $1,566 million to $1,812 million for the year ended December 31, 2011, as compared to 2010, primarily resulting from

- an increase of $368 million due to lower tax payments, primarily related to the benefits of accelerated tax depreciation under new tax provisions enacted in 2010 (see Item 8. Financial Statements and Supplementary Data—Note 20. Income Taxes for additional information), and
- a $302 million increase from net collection of counterparty receivables.

These were partially offset by

- a $171 million increase in net payment of counterparty payables,

S1-SSA-0009 - 10676

Past financial performance is no guarantee of future results.

- a $161 million net increase in spending on fuel inventories, and
- lower earnings.

PSE&G

PSE&G's operating cash flow decreased $520 million from $1,776 million to $1,256 million for the year ended December 31, 2012, as compared to 2011, due primarily to

- a lower tax receipt of $484 million due to lower benefit of accelerated tax depreciation, and
- a decrease of $306 million due to lower collections from customer billings,
- partially offset by a decrease of $117 million in benefit plan funding, and
- a decrease of $88 million in net prepayments due primarily to the application of prior year prepayment carryforwards towards current year state tax liabilities.

PSE&G's operating cash flow increased $765 million from $1,011 million to $1,776 million for the year ended December 31, 2011, as compared to 2010, due primarily to higher earnings combined with

- an increase of $587 million due to lower tax payments, primarily related to the benefits of accelerated tax depreciation under new tax provisions enacted in 2010 (see Item 8. Financial Statements and Supplementary Data—Note 20. Income Taxes for additional information), and
- an increase of $273 million due to higher collections of customer billings,
- partially offset by a decrease of $108 million in net other working capital.

Energy Holdings

Energy Holdings' operating cash flow increased $149 million for the year ended December 31, 2012, as compared to 2011, primarily due to lower tax payments in 2012 related to the absence of lease sale activity in 2012 and tax benefits related to settlement of IRS audits.

Energy Holdings' operating cash flow increased $341 million for the year ended December 31, 2011, as compared to 2010, primarily due to lower tax payments in 2011 related to less lease sale activity in 2011.

Short-Term Liquidity

We continually monitor our liquidity and seek to add capacity as needed to meet our liquidity requirements. Each of our credit facilities is restricted as to availability and use to the specific companies as listed below; however, if necessary, the PSEG facilities can also be used to support our subsidiaries' liquidity needs. Our total credit facilities and available liquidity as of December 31, 2012 were as follows:

	As of December 31, 2012		
Company/Facility	**Total Facility**	**Usage**	**Available Liquidity**
	Millions		
PSEG	$ 1,000	$ 4	$ 996
Power	2,700	165	2,535
PSE&G	600	276	324
Total	**$ 4,300**	**$ 445**	**$ 3,855**

As of December 31, 2012, our credit facility capacity is in excess of our projected maximum liquidity requirements over our 12 month planning horizon. Our maximum liquidity requirements are based on stress scenarios that incorporate changes in commodity prices and the potential impact of Power losing its investment grade credit rating. PSE&G's credit facility primary use is to support its Commercial Paper Program under which as of December 31, 2012, $263 million was outstanding. For

S1-SSA-0009 - 10677

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

additional information, see Item 8. Financial Statements and Supplementary Data—Note 13. Commitments and Contingent Liabilities and Note 14. Schedule of Consolidated Debt.

Long-Term Debt Financing

PSE&G had $150 million of 5.00% Medium Term Notes mature in January 2013 and issued $400 million of 3.80% Secured Medium-Term Notes, Series H, due January, 2043. PSE&G also has $300 million of 5.38% Medium Term Notes maturing in September 2013 and $275 million of 6.33% Medium Term Notes maturing in November 2013. Power has $300 million of 2.50% Senior Notes maturing in April 2013.

For a discussion of our long-term debt transactions during 2012 and into 2013, see Item 8. Financial Statements and Supplementary Data—Note 14. Schedule of Consolidated Debt.

Debt Covenants

Our credit agreements contain maximum debt to equity ratios and other restrictive covenants and conditions to borrowing. We are currently in compliance with all of our debt covenants. Continued compliance with applicable financial covenants will depend upon our future financial position, level of earnings and cash flows, as to which no assurances can be given.

In addition, under its First and Refunding Mortgage (Mortgage), PSE&G may issue new First and Refunding Mortgage Bonds against previous additions and improvements, provided that its ratio of earnings to fixed charges calculated in accordance with its Mortgage is at least 2 to 1, and/or against retired Mortgage Bonds. As of December 31, 2012, PSE&G's Mortgage coverage ratio was 3.6 to 1 and the Mortgage would permit up to approximately $2.6 billion aggregate principal amount of new Mortgage Bonds to be issued against additions and improvements to its property.

Default Provisions

Our bank credit agreements and indentures contain various default provisions that could result in the potential acceleration of payment under the defaulting company's agreement. We have not defaulted under these agreements.

PSEG's bank credit agreements contain cross default provisions under which events at Power or PSE&G, including payment defaults, bankruptcy events, the failure to satisfy certain final judgments or other events of default under their financing agreements, would each constitute an event of default. Under the bank credit agreements, it would be an event of default if both Power and PSE&G cease to be wholly owned by PSEG.

There are no cross default provisions to affiliates in Power's or PSE&G's credit agreements or indentures.

Ratings Triggers

Our debt indentures and credit agreements do not contain any material 'ratings triggers' that would cause an acceleration of the required interest and principal payments in the event of a ratings downgrade. However, in the event of a downgrade, any one or more of the affected companies may be subject to increased interest costs on certain bank debt and certain collateral requirements. In the event that we are not able to affirm representations and warranties on credit agreements, lenders would not be required to make loans.

Fluctuations in commodity prices or a deterioration of Power's credit rating to below investment grade could increase Power's required margin postings under various agreements entered into in the normal course of business. Power believes it has sufficient liquidity to meet the required posting of collateral which would likely result from a credit rating downgrade at today's market prices.

In accordance with BPU requirements under the BGS contracts, PSE&G is required to maintain an investment grade credit rating. If PSE&G were to lose its investment grade rating, it would be required to file a plan to assure continued payment for the BGS requirements of its customers.

PSE&G is the servicer for the bonds issued by PSE&G Transition Funding LLC and PSE&G Transition Funding II LLC. Cash collected by PSE&G to service these bonds is commingled with PSE&G's other cash until it is remitted to the bond trustee each month. If PSE&G were to lose its investment grade rating, PSE&G would be required to remit collected cash daily to the bond trustee. PSE&G is prohibited from advancing its own funds to make payments related to such bonds.

Common Stock Dividends

Dividend Payments on Common Stock	Years Ended December 31, 2012	2011	2010
Per Share	$ 1.42	$ 1.37	$ 1.37
in Millions	$ 718	$ 693	$ 693

In 2012, dividend payments increased from $1.37 per share to $1.42 per share, representing a change in our dividend policy, moving from a strict earnings payout based approach to one that takes into consideration the growing contribution to earnings and cash from our regulated operations and continued cash flow from our generation business.

On February 19, 2013, our Board of Directors approved a $0.36 per share common stock dividend for the first quarter of 2013. This reflects an indicated annual dividend rate of $1.44 per share. We expect to continue to pay cash dividends on our common stock; however, the declaration and payment of future dividends to holders of our common stock will be at the discretion of the Board of Directors and will depend upon many factors, including our financial condition, earnings, capital requirements of our businesses, alternate investment opportunities, legal requirements, regulatory constraints, industry practice and other factors that the Board of Directors deems relevant.

Credit Ratings

If the rating agencies lower or withdraw our credit ratings, such revisions may adversely affect the market price of our securities and serve to materially increase our cost of capital and limit access to capital. Outlooks assigned to ratings are as follows: stable, negative (Neg) or positive (Pos). There is no assurance that the ratings will continue for any given period of time or that they will not be revised by the rating agencies, if, in their respective judgments, circumstances warrant. Each rating given by an agency should be evaluated independently of the other agencies' ratings. The ratings should not be construed as an indication to buy, hold or sell any security.

In May 2012, Moody's published updated credit opinions on PSEG, Power and PSE&G. Moody's upgraded PSE&G's Mortgage Bond Rating to A1 from A2 and revised the outlook to stable from positive. PSEG's and Power's ratings and outlooks remained unchanged. In October 2012, S&P published updated credit opinions that left the ratings and outlooks for Power and PSE&G unchanged. In November 2012, S&P published an updated credit opinion for PSEG that left its ratings and outlook unchanged. In July 2012, Fitch upgraded PSE&G's Mortgage Bond Rating to A+ from A and its stable outlook remained unchanged. In January 2013, Fitch published updated credit opinions on PSEG, Power and PSE&G. PSEG's, Power's and PSE&G's ratings and outlooks remained unchanged.

	Moody's (A)	S&P (B)	Fitch (C)
PSEG			
Outlook	**Stable**	**Positive**	**Stable**
Commercial Paper	P2	A2	F2
Power			
Outlook	**Stable**	**Positive**	**Stable**
Senior Notes	Baa1	BBB	BBB+
PSE&G			
Outlook	**Stable**	**Positive**	**Stable**
Mortgage Bonds	A1	A-	A+
Commercial Paper	P2	A2	F2

(A) Moody's ratings range from Aaa (highest) to C (lowest) for long-term securities and P1 (highest) to NP (lowest) for short-term securities.
(B) S&P ratings range from AAA (highest) to D (lowest) for long-term securities and A1 (highest) to D (lowest) for short-term securities.
(C) Fitch ratings range from AAA (highest) to D (lowest) for long-term securities and F1 (highest) to D (lowest) for short-term securities.

Other Comprehensive Loss

For the year ended December 31, 2012, we had Other Comprehensive Loss of $51 million on a consolidated basis. Other Comprehensive Loss was due primarily to a $46 million increase in our consolidated liability for pension and postretirement benefits and $24 million of unrealized losses on derivative contracts accounted for as hedges and was partially offset by $19 million of net unrealized gains related to Available-for-Sale Securities.

CAPITAL REQUIREMENTS

It is expected that all of our capital requirements over the next three years will come from a combination of internally generated funds and external debt financing. Projected capital construction and investment expenditures, excluding nuclear fuel purchases, for the next three years are presented in the table below. These amounts are subject to change, based on various factors. We will continue to approach non-regulated solar and other renewables investments opportunistically, seeking projects that will provide attractive risk-adjusted returns for our shareholders.

	2013	2014	2015
Power:		Millions	
Baseline Maintenance	$ 215	$ 170	$ 200
Environmental/Regulatory	70	70	15
Nuclear Expansion	115	125	90
Total Power	**$ 400**	**$ 365**	**$ 305**
PSE&G:			
Transmission			
Reliability Enhancements	$ 1,230	$ 1,040	$ 550
Facility Replacement	265	145	160
Support Facilities	10	15	10
Environmental/Regulatory	5	—	—
Distribution			
Reliability Enhancements	85	75	75
Facility Replacement	140	150	175
Support Facilities	45	50	45
New Business	125	130	135
Environmental/Regulatory	35	35	30
Renewables	100	40	—
Total PSE&G	**$ 2,040**	**$ 1,680**	**$ 1,180**
Non-Utility Renewables	50	—	—
Other	45	40	30
Total PSEG	**$ 2,535**	**$ 2,085**	**$ 1,515**

Power

Power's projected expenditures for the various items listed above are primarily comprised of the following:

- Baseline Maintenance—investments to replace major parts and enhance operational performance.
- Environmental/Regulatory—investments made in response to environmental, regulatory or legal mandates.
- Nuclear Expansion—investments associated with various capital projects at existing facilities to either extend plants' useful lives or increase operating output.

In 2012, Power made $438 million of capital expenditures, including interest capitalized during construction (IDC) but excluding $208 million for nuclear fuel, primarily related to various projects at Fossil and Nuclear.

S1-SSA-0009 - 10680

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

PSE&G

PSE&G's projections for future capital expenditures include material additions and replacements to its transmission and distribution systems to meet expected growth and to manage reliability. As project scope and cost estimates develop, PSE&G will modify its current projections to include these required investments. PSE&G's projected expenditures for the various items reported above are primarily comprised of the following:

- Reliability Enhancements—investments made to improve the reliability and efficiency of the system or function.
- Facility Replacement—investments made to replace systems or equipment in kind.
- Support Facilities—ancillary equipment needed to support the business lines, such as computers, office furniture and buildings and structures housing support personnel or equipment/inventory.
- New Business—investments made in support of new business (e.g. to add new customers).
- Environmental/Regulatory—investments made in response to environmental, regulatory or legal mandates.
- Renewables—investments made in response to regulatory or legal mandates relating to renewable energy.

In 2012, PSE&G made $1,852 million of capital expenditures, including $1,770 million of investment in plant, primarily for transmission and distribution system reliability and $82 million in solar loan investments. This does not include expenditures for certain energy efficiency and renewable programs of $8 million or cost of removal, net of salvage, of $116 million, which are included in operating cash flows.

Additional Projects

The estimated project expenditures related to the following filings or transmission infrastructure investments are not included in our $6.1 billion three-year capital forecast table.

In February 2013, we filed a petition with the BPU describing the improvements we recommend making to our electric and gas distribution systems over a ten year period to harden and improve resiliency for the future. In this petition, we sought approval to invest $0.9 billion in our gas distribution system and $1.7 billion in our electric distribution over an initial five year period, plus associated expenses, and to receive contemporaneous recovery of and on such investments. This matter is pending. The current estimated cost of the entire program, including the first five years of investments for which we sought approval in this petition, is $3.9 billion. We anticipate seeking BPU approval to complete our investment under the program at a later date. We also intend to invest $1.5 billion in FERC jurisdictional investments in transmission infrastructure over the next ten years.

In July 2012, we filed for an extension of our Solar 4 All program. In this filing, we are seeking BPU approval for up to $690 million to develop 136 MW of utility-owned solar photovoltaic systems over a five year period starting in 2013. Consistent with the existing Solar 4 All program, we propose to sell the energy and capacity from the solar systems in the PJM wholesale energy and capacity markets which will offset the cost of the program.

We also filed for an additional extension of our Solar Loan program (Solar Loan III) in July 2012. In the filing, we are seeking BPU approval to provide financing support for the installation of 97.5 MW of solar systems by providing loans to qualified customers. The total investment of the proposed Solar Loan III program is anticipated to be up to $193 million once the program is fully subscribed, projects are built and loans are closed.

Disclosures about Long-Term Maturities, Contractual and Commercial Obligations and Certain Investments

The following table reflects our contractual cash obligations and other commercial commitments in the respective periods in which they are due. See Item 8. Financial Statements and Supplementary Data -Note 13. Commitments and Contingent Liabilities for a discussion of contractual commitments related to the construction activity, discussed above, and for a variety of services for which annual amounts are not quantifiable. In addition, the table summarizes anticipated recourse and non-recourse debt maturities for the years shown. For additional information, see Item 8. Financial Statements and Supplementary Data—Note 14. Schedule of Consolidated Debt. The table below does not reflect any anticipated cash payments for pension obligations due to uncertain timing of payments or liabilities for uncertain tax positions since we are unable to reasonably estimate the timing of liability payments in individual years beyond 12 months due to uncertainties in the timing of the effective settlement of tax positions. See Item 8. Financial Statements and Supplementary Data—Note 20. Income Taxes for additional information.

OFF-BALANCE SHEET ARRANGEMENTS

Power

Power issues guarantees in conjunction with certain of its energy contracts. See Item 8. Financial Statements and Supplementary Data—Note 13. Commitments and Contingent Liabilities for further discussion.

Energy Holdings

We have certain investments that are accounted for under the equity method in accordance with GAAP. Accordingly, amounts recorded on the Consolidated Balance Sheets for such investments represent our equity investment, which is increased for our pro-rata share of earnings less any dividend distribution from such investments. One of the companies in which we invest that is accounted for under the equity method has an aggregate $28 million of long-term debt on its Consolidated Balance Sheet. Our pro-rata share of such debt is $14 million. This debt is non-recourse to us. We are generally not required to support the debt service obligations of this company. However, default with respect to this non-recourse debt could result in a loss of invested equity.

Through Energy Holdings, we have investments in leveraged leases that are accounted for in accordance with GAAP Accounting for Leases. Leveraged lease investments generally involve three parties: an owner/lessor, a creditor and a lessee. In a typical leveraged lease arrangement, the lessor purchases an asset to be leased. The purchase price is typically financed 80% with debt provided by the creditor and the balance comes from equity funds provided by the lessor. The creditor provides long-term financing to the transaction secured by the property subject to the lease. Such long-term financing is non-recourse to the lessor and is not presented on our Consolidated Balance Sheets. In the event of default, the leased asset, and in some cases the lessee, secures the loan. As a lessor, Energy Holdings has ownership rights to the property and rents the property to the lessees for use in their business operations. For additional information, see Item 8. Financial Statements and Supplementary Data—Note 7. Long-Term Investments.

In the event that collectability of the minimum lease payments to be received by Energy Holdings is no longer reasonably assured, the accounting treatment for some of the leases may change. In such cases, Energy Holdings may deem that a lessee has a high probability of defaulting on the lease obligation, and would reclassify the lease from a leveraged lease to an operating lease and would consider the need to record an impairment of its investment. Should this event occur, the fair value of the underlying asset and the associated debt would be recorded on the Consolidated Balance Sheets instead of the net equity investment in the lease.

CRITICAL ACCOUNTING ESTIMATES

Under GAAP, many accounting standards require the use of estimates, variable inputs and assumptions (collectively referred to as estimates) that are subjective in nature. Because of this, differences between the actual measure realized versus the estimate can have a material impact on results of operations, financial position and cash flows. We have determined that the following estimates are considered critical to the application of rules that relate to the respective businesses.

Accounting for Pensions

We calculate pension costs using various economic and demographic assumptions.

***Assumptions and Approach Used*:** Economic assumptions include the discount rate and the long-term rate of return on trust assets. Demographic assumptions include projections of future mortality rates, pay increases and retirement patterns.

Assumption	2012	2011	2010
Discount Rate	4.20%	5.00%	5.51%
Rate of Return on Plan Assets	8.00%	8.50%	8.50%

Our discount rate assumption, which is determined annually, is based on the rates of return on high-quality fixed-income investments currently available and expected to be available during the period to maturity of the pension benefits. The discount rate used to calculate pension obligations is determined as of December 31 each year, our measurement date. The discount rate used to determine year-end obligations is also used to develop the following year's net periodic pension cost.

Our expected rate of return on plan assets reflects current asset allocations, historical long-term investment performance and an estimate of future long-term returns by asset class and long-term inflation assumptions.

S1-SSA-0009 - 10683

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Based on the above assumptions, we have estimated net periodic pension expense of approximately $110 million, net of amounts capitalized, and contributions of up to $145 million in 2013.

***Effect if Different Assumptions Used*:** As part of the business planning process, we have modeled future costs assuming an 8.00% rate of return and a 4.20% discount rate for 2013, a 4.50% discount rate for 2014, increasing annually by 25 basis points to 5.25% in 2017. Actual future pension expense and funding levels will depend on future investment performance, changes in discount rates, market conditions, funding levels relative to our projected benefit obligation and accumulated benefit obligation and various other factors related to the populations participating in the pension plans.

The following chart reflects the sensitivities associated with a change in certain assumptions. The effects of the assumption changes shown below solely reflect the impact of that specific assumption.

Assumption	% Change	Impact on Pension Benefit Obligation As of December 31, 2012	Increase to Pension Expense in 2013
		Millions	
Discount Rate	(1)%	$ 751	$ 72
Rate of Return on Plan Assets	(1)%	$ —	$ 44

See Item 7A. Quantitative and Qualitative Disclosures About Market Risk for additional information.

Hedge and MTM Accounting

Current guidance requires us to recognize the fair value of derivative instruments, not designated as normal purchases or normal sales, at their fair value on the balance sheet. Many non-trading contracts qualify for normal purchases and normal sales exemption and are accounted for upon settlement.

***Assumptions and Approach Used*:** In general, the fair value of our derivative instruments is determined by reference to quoted market prices from contracts listed on exchanges or from brokers. Some of these derivative contracts are long-term and rely on forward price quotations over the entire duration of the derivative contracts.

For a small number of contracts where quoted market prices are not available, we utilize mathematical models that rely on historical data to develop forward pricing information in the determination of fair value. Because the determination of fair value using such models is subject to significant assumptions and estimates, we developed reserve policies that are consistently applied to model-generated results to determine reasonable estimates of the fair value to record in the financial statements.

We have entered into various derivative instruments to manage risk from changes in commodity prices and interest rates. In accordance with our hedging strategy, derivatives that are hedging these risks and qualify are designated as either cash flow hedges or fair value hedges. For derivatives designated as hedges, the change in the value of a derivative instrument is measured against the offsetting change in the value of the underlying contract, anticipated transaction or other business condition that the derivative instrument is intended to hedge. This is known as the measure of hedge effectiveness. Changes in the fair value of the effective portion of a derivative instrument designated as a fair value hedge, along with changes in the fair value of the hedged asset or liability that are attributable to the hedged risk, are recorded in current period earnings. Changes in the fair value of the effective portion of derivative instruments designated as cash flow hedges, are reported in Accumulated Other Comprehensive Income (Loss), net of tax, until earnings are affected by the variability of cash flows of the hedged transaction. Any hedge ineffectiveness is included in current period earnings. During periods of extreme price volatility, there will be significant changes in the value recorded in Accumulated Other Comprehensive Income (Loss).

For our wholesale energy business, many of the forward sale, forward purchase, option and other contracts are derivative instruments that hedge commodity price risk, but do not meet the requirements for either cash flow or fair value hedge accounting. The changes in value of such derivative contracts are marked to market through earnings as the related commodity prices fluctuate. As a result, our earnings may experience significant fluctuations depending on the volatility of commodity prices.

***Effect if Different Assumptions Used*:** Any significant changes to the fair market values of our derivatives instruments could result in a material change in the value of the assets or liabilities recorded on our Consolidated Balance Sheets and could result in a material change to the unrealized gains or losses recorded in our Consolidated Statements of Operations.

For additional information regarding Derivative Financial Instruments, see Item 8. Financial Statements and Supplementary Data—Note 16. Financial Risk Management Activities.

S1-SSA-0009 - 10684

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Lease Investments

Our Investments in Leases, included in Long-Term Investments on our Consolidated Balance Sheets, are comprised of Lease Receivables (net of non-recourse debt), the estimated residual value of leased assets, and unearned and deferred income. A significant portion of the estimated residual value of leased assets is related to merchant power plants leased to other energy companies. See Item 8. Financial Statements and Supplementary Data – Note 7. Long-Term Investments, and Note 8. Financing Receivables.

Assumptions and Approach Used: Residual values are the estimated values of the leased assets at the end of the respective lease terms. The estimated values are calculated by discounting the cash flows related to the leased assets after the lease term. For the merchant power plants, the estimated discounted cash flows are dependent upon various assumptions, including:

- estimated forward power and capacity prices in the years after the lease,
- related prices of fuel for the plants,
- dispatch rates for the plants,
- future capital expenditures required to maintain the plants,
- future operation and maintenance expenses, and
- discount rates.

Residual valuations are performed annually for each plant subject to lease using specific assumptions tailored to each plant. Those annual valuations are compared to the recorded residual values to determine if an impairment is warranted.

Effect if Different Assumptions Used: A significant change to the assumptions, such as a large decrease in near-term power prices that affects the market's view of long-term power prices, or a change in the credit rating or bankruptcy of a counterparty, could result in an impairment of one or more of the residual values, but not necessarily to all of the residual values. However, if, because of changes in assumptions, all the residual values related to the merchant energy plants were deemed to be zero, we would recognize an after-tax charge to income of approximately $177 million.

NDT Fund

Our NDT Fund is comprised of both debt and equity securities. The assets in the NDT Fund are classified as available-for-sale securities and are marked to market with unrealized gains and losses recorded in Accumulated Other Comprehensive Income (Loss) unless securities with such unrealized losses are deemed to be other-than-temporarily-impaired. Realized gains, losses and dividend and interest income are recorded in our Consolidated Statements of Operations as Other Income and Other Deductions. Unrealized losses that are deemed to be other-than-temporarily impaired are charged against earnings rather than Accumulated Other Comprehensive Income (Loss) and reflected as a separate line in the Consolidated Statement of Operations.

***Assumptions and Approach Used*:** The NDT Fund investments are valued using quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. See Item 8. Financial Statements and Supplementary Data—Note 17. Fair Value Measurements for additional information.

***Effect if Different Assumptions Used*:** Any significant changes to the fair market values of the fund securities could result in a material change in the value of our NDT Fund with a corresponding impact to earnings, which could potentially result in additional funding requirements to satisfy our decommissioning obligations. See Item 7A. Quantitative and Qualitative Disclosures About Market Risk for additional information.

Asset Retirement Obligations (ARO)

Power, PSE&G and Services recognize liabilities for the expected cost of retiring long-lived assets for which a legal obligation exists. These AROs are recorded at fair value in the period in which they are incurred and are capitalized as part of the carrying amount of the related long-lived assets. PSE&G, as a rate-regulated entity, recognizes regulatory assets or liabilities as a result of timing differences between the recording of costs and costs recovered through the ratemaking process. We accrete the ARO liability to reflect the passage of time.

Assumptions and Approach Used: Because quoted market prices are not available for AROs, we estimate the initial fair value of an ARO by calculating discounted cash flows that are dependent upon various assumptions, including:

- estimation of dates for retirement,
- amounts and timing of future cash expenditures associated with retirement, settlement or remediation activities,

S1-SSA-0009 - 10685

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

- discount rates,
- cost escalation rates,
- market risk premium,
- inflation rates, and
- if applicable, past experience with government regulators regarding similar obligations.

We obtain updated cost studies every three years unless new information necessitates more frequent updates. The most recent cost study was done in 2012. When we revise any assumptions used to calculate fair values of existing AROs, we adjust the ARO balance and corresponding long-lived asset which impacts the amount of accretion and depreciation expense recognized in future periods.

Nuclear Decommissioning AROs

AROs related to the future decommissioning of Power's nuclear facilities comprised 94% of Power's total AROs as of December 31, 2012. Power determines its AROs for its nuclear units by assigning probability weighting to various discounted cash flow outcomes for each of its nuclear units that incorporate the assumptions above as well as:

- license renewals,
- early shutdown,
- safe storage for a period of time after retirement, and
- recovery from the federal government of costs incurred for spent nuclear fuel.

Effect if Different Assumptions Used: Changes in the assumptions could result in a material change in the ARO balance sheet obligation and the period over which we accrete to the ultimate liability. For example, a 1% decrease in the discount rate used at December 31, 2012 would result in a $134 million increase in the Nuclear ARO as of December 31, 2012. A 1% increase in the inflation rate used at December 31, 2012 would result in a $335 million increase in the Nuclear ARO as of December 31, 2012. Also, if we did not assume that we would recover from the federal government the costs incurred for spent nuclear fuel, the Nuclear ARO would increase by $273 million at December 31, 2012.

Accounting for Regulated Businesses

PSE&G prepares its financial statements to comply with GAAP for rate-regulated enterprises, which differs in some respects from accounting for non-regulated businesses. In general, accounting for rate-regulated enterprises should reflect the economic effects of regulation. As a result, a regulated utility is required to defer the recognition of costs (Regulatory Asset) or recognize obligations (Regulatory Liability) if the rates established are designed to recover the costs and if the competitive environment makes it probable that such rates can be charged or collected. This accounting results in the recognition of revenues and expenses in different time periods than that of enterprises that are not regulated.

Assumptions and Approach Used: PSE&G recognizes Regulatory Assets where it is probable that such costs will be recoverable in future rates from customers and Regulatory Liabilities where it is probable that refunds will be made to customers in future billings. The highest degree of probability is an order from the BPU either approving recovery of the deferred costs over a future period or requiring the refund of a liability over a future period.

Virtually all of PSE&G's regulatory assets and liabilities are supported by BPU orders. In the absence of an order, PSE&G will consider the following when determining whether to record a Regulatory Asset or Liability:

- past experience regarding similar items with the BPU,
- treatment of a similar item in an order by the BPU for another utility,
- passage of new legislation, and
- recent discussions with the BPU.

All deferred costs are subject to prudence reviews by the BPU. When the recovery of a Regulatory asset or payment of a Regulatory Liability is no longer probable, PSE&G charges or credits earnings, as appropriate.

S1-SSA-0009 - 10686

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

***Effect if Different Assumptions Used*:** A change in the above assumptions may result in a material impact on our results of operations or our cash flows. See Item 8. Financial Statements and Supplementary Data—Note 6. Regulatory Assets and Liabilities for a description of the amounts and nature of regulatory balance sheet amounts.

Accounting for Insurance Proceeds

In late October 2012, Superstorm Sandy caused severe damage to our transmission and distribution system as well as to some of our generation infrastructure in the northern part of New Jersey. Strong winds resulted in a storm surge that caused damage to switching stations, substations and generating infrastructure. We are in the early stages of gathering information needed in preparing an insurance claim relating to that damage. As of December 31, 2012, we recorded estimated insurance proceeds of $25 million ($19 million for Power and $6 million for PSE&G). See Item 8. Financial Statements and Supplementary Data —Note 13. Commitments and Contingencies for additional information.

Assumptions and Approach Used: In December 2012, we received correspondence from representatives of the various insurance carriers acknowledging that damages were sustained and authorizing $25 million in advance payments to be made to us. Based on that authorization, we recorded the estimated insurance proceeds of $25 million. We believe that any further proceeds to be received under our policies are not estimable at December 31, 2012. We are at the early stages of documenting our insurance claim which then needs to be submitted to, and reviewed by, the insurers. We believe we have no basis for developing an estimate for any further insurance recoveries at this time.

Effect if Different Assumptions Used: If we were to use different assumptions regarding additional insurance proceeds, there would be a dollar for dollar effect on Operation and Maintenance Expense and Operating Income for Power. If we were to recognize any additional insurance proceeds for PSE&G, we would allocate those proceeds between Operation and Maintenance Expense and costs that have been deferred for regulatory recovery or capitalized. In either case, we would not recognize insurance proceeds in excess of actual costs incurred.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The market risk inherent in our market-risk sensitive instruments and positions is the potential loss arising from adverse changes in commodity prices, equity security prices and interest rates as discussed in the Notes to Consolidated Financial Statements. It is our policy to use derivatives to manage risk consistent with business plans and prudent practices. We have a Risk Management Committee comprised of executive officers who utilize a risk oversight function to ensure compliance with our corporate policies and risk management practices.

Additionally, we are exposed to counterparty credit losses in the event of non-performance or non-payment. We have a credit management process, which is used to assess, monitor and mitigate counterparty exposure. In the event of non-performance or non-payment by a major counterparty, there may be a material adverse impact on our financial condition, results of operations or net cash flows.

Commodity Contracts

The availability and price of energy-related commodities are subject to fluctuations from factors such as weather, environmental policies, changes in supply and demand, state and federal regulatory policies, market rules and other events. To reduce price risk caused by market fluctuations, we enter into supply contracts and derivative contracts, including forwards, futures, swaps and options with approved counterparties. These contracts, in conjunction with physical sales and other services, help reduce risk and optimize the value of owned electric generation capacity.

Value-at-Risk (VaR) Models

VaR represents the potential losses, under normal market conditions, for instruments or portfolios due to changes in market factors, for a specified time period and confidence level. We estimate VaR across our commodity businesses.

MTM VaR consists of MTM derivatives that are economic hedges, some of which qualify for hedge accounting. The MTM VaR calculation does not include market risks associated with activities that are subject to accrual accounting, primarily our generating facilities and some load serving activities.

The VaR models used are variance/covariance models adjusted for the change of positions with 95% and 99.5% confidence levels and a one-day holding period for the MTM activities. The models assume no new positions throughout the holding periods; however, we actively manage our portfolio.

Period End	$	18
Average for the Period	$	16
High	$	29
Low	$	7
99.5% Confidence Level,		
Loss could exceed VaR one day in 200 days		
Period End	$	28
Average for the Period	$	25
High	$	46
Low	$	11

(A) As of December 31, 2012 and December 31, 2011, there was no trading VaR since we discontinued trading activities in the second quarter of 2011.

See Item 8. Financial Statements and Supplementary Data—Note 16. Financial Risk Management Activities for a discussion of credit risk.

Interest Rates

We are subject to the risk of fluctuating interest rates in the normal course of business. We manage interest rate risk by targeting a balanced debt maturity profile which limits refinancing in any given period or interest rate environment. In addition, we use a mix of fixed and floating rate debt, interest rate swaps and interest rate lock agreements.

As of December 31, 2012, a hypothetical 10% increase in market interest rates would result in

- less than $1 million of additional annual interest costs related to both the current and long-term portion of long-term debt, and
- a $223 million decrease in the fair value of debt, including a $56 million decrease at Power and a $166 million decrease at PSE&G.

Debt and Equity Securities

We have $4.6 billion of assets in our pension plan trusts. Although fluctuations in market prices of securities within this portfolio do not directly affect our earnings in the current period, changes in the value of these investments could affect

- our future contributions to these plans,
- our financial position if our accumulated benefit obligation under our pension plans exceeds the fair value of the pension trust funds, and
- future earnings, as we could be required to adjust pension expense and the assumed rate of return.

The NDT Fund is comprised of both fixed income and equity securities totaling $1.5 billion as of December 31, 2012. As of December 31, 2012, the portfolio includes $789 million of equity securities and $627 million in fixed income securities. The fair market value of the assets in the NDT Fund will fluctuate primarily depending upon the performance of equity markets. As of December 31, 2012, a hypothetical 10% change in the equity market would impact the value of the equity securities in the NDT Fund by approximately $79 million.

We use duration to measure the interest rate sensitivity of the fixed income portfolio. Duration is a summary statistic of the effective average maturity of the fixed income portfolio. The benchmark for the fixed income component of the NDT Fund currently has duration of 4.31 years and a yield of 1.24%. The portfolio's value will appreciate or depreciate by the duration with a 1% change in interest rates. As of December 31, 2012, a hypothetical 1% increase in interest rates would result in a decline in the market value for the fixed income portfolio of approximately $27 million.

Credit Risk

See Item 8. Financial Statements and Supplementary Data—Note 16. Financial Risk Management Activities for a discussion of credit risk and a discussion about Power's credit risk.

BGS suppliers expose PSE&G to credit losses in the event of non-performance or non-payment upon a default of the BGS supplier. Credit requirements are governed under BPU approved BGS contracts.

Energy Holdings has credit risk with respect to its counterparties to power purchase agreements and other parties.

Energy Holdings also has credit risk related to its investments in leases, which totaled $117 million, net of deferred taxes of $723 million, as of December 31, 2012. These leveraged leases are concentrated in the United States energy industry. See Item 8. Financial Statements and Supplementary Data -Note 8. Financing Receivables for counterparties' credit ratings and other information. The credit exposure to the lessees is partially mitigated through various credit enhancement mechanisms within the lease transactions. These credit enhancement features vary from lease to lease. Some of the leasing transactions include covenants that restrict the flow of dividends from the lessee to its parent, over-collateralization of the lessee with non-leased assets, historical and forward cash flow coverage tests that prohibit discretionary capital expenditures and dividend payments to the parent/lessee if stated minimum coverages are not met and similar cash flow restrictions if ratings are not maintained at stated levels. These covenants are designed to maintain cash reserves in the transaction entity for the benefit of the non-recourse lenders and the lessor/equity participants in the event of a temporary market downturn or degradation in operating performance of the leased assets.

In any lease transaction, in the event of a default, Energy Holdings would exercise its rights and attempt to seek recovery of its investment. The results of such efforts may not be known for a period of time. A bankruptcy of a lessee and failure to recover adequate value could lead to a foreclosure of the lease. Under a worst-case scenario, if a foreclosure were to occur, Energy Holdings would record a pre-tax write-off up to its outstanding gross investment, including deferred taxes, in these facilities. Also, in the event of a potential foreclosure, the net tax benefits generated by Energy Holdings' portfolio of investments could be materially reduced in the period in which gains associated with the potential forgiveness of debt at these projects occurs. The amount and timing of any potential reduction in net tax benefits is dependent upon a number of factors including, but not limited to, the time of a potential foreclosure, the amount of lease debt outstanding, any cash trapped at the projects and negotiations during such potential foreclosure process. The potential loss of earnings, impairment and/or tax payments could have a material impact to our financial position, results of operations and net cash flows.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

This combined Form 10-K is separately filed by PSEG, Power and PSE&G. Information contained herein relating to any individual company is filed by such company on its own behalf. Power and PSE&G each make representations only as to itself and make no representations as to any other company.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors of
Public Service Enterprise Group Incorporated:

We have audited the accompanying consolidated balance sheets of Public Service Enterprise Group Incorporated and subsidiaries (the "Company") as of December 31, 2012 and 2011, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2012. Our audits also included the consolidated financial statement schedule listed in the Index at Item 15(B)(a). These consolidated financial statements and consolidated financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the consolidated financial statements and consolidated financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2012 and 2011, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2012, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such consolidated financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2012, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 25, 2013 expressed an unqualified opinion on the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Sole Member and Board of Directors of
PSEG Power LLC:

We have audited the accompanying consolidated balance sheets of PSEG Power LLC and subsidiaries (the "Company") as of December 31, 2012 and 2011, and the related consolidated statements of operations, comprehensive income, member's equity, and cash flows for each of the three years in the period ended December 31, 2012. Our audits also included the consolidated financial statement schedule listed in the Index at Item 15(B)(b). These consolidated financial statements and consolidated financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the consolidated financial statements and consolidated financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2012 and 2011, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2012, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such consolidated financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

Note 1. Organization, Basis of Presentation and Summary of Significant Accounting Policies

Public Service Enterprise Group Incorporated, (PSEG) is a holding company with a diversified business mix within the energy industry. Its operations are primarily in the Northeastern and Mid Atlantic United States and in other select markets. PSEG's principal direct wholly owned subsidiaries are:

- **PSEG Power LLC (Power)**—which is a multi-regional, wholesale energy supply company that integrates its generating asset operations and gas supply commitments with its wholesale energy, fuel supply and energy trading functions through three principal direct wholly owned subsidiaries. Power's subsidiaries are subject to regulation by the Federal Energy Regulatory Commission (FERC), the Nuclear Regulatory Commission (NRC) and the states in which they operate.
- **Public Service Electric and Gas Company (PSE&G)**—which is an operating public utility engaged principally in the transmission of electricity and distribution of electricity and natural gas in certain areas of New Jersey. PSE&G is subject to regulation by the New Jersey Board of Public Utilities (BPU) and the FERC. PSE&G also invests in solar generation projects and has implemented energy efficiency and demand response programs, which are regulated by the BPU.
- **PSEG Energy Holdings L.L.C. (Energy Holdings)**—which primarily has investments in leveraged leases and solar generation projects through its direct wholly owned subsidiaries. Certain Energy Holdings' subsidiaries are subject to regulation by the FERC and the states in which they operate. Energy Holdings has also been awarded a contract to manage the transmission and distribution assets of the Long Island Power Authority (LIPA) starting in 2014.
- **PSEG Services Corporation (Services)**—which provides management, administrative and general services to PSEG and its subsidiaries at cost.

Basis of Presentation

The respective financial statements included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) applicable to Annual Reports on Form 10-K and in accordance with accounting guidance generally accepted in the United States (GAAP).

Significant Accounting Policies

Principles of Consolidation

Each company consolidates those entities in which it has a controlling interest or is the primary beneficiary. See Note 3. Variable Interest Entities. Entities over which the companies exhibit significant influence, but do not have a controlling interest and/or are not the primary beneficiary, are accounted for under the equity method of accounting. For investments in which significant influence does not exist and the investor is not the primary beneficiary, the cost method of accounting is applied. All significant intercompany accounts and transactions are eliminated in consolidation, except as discussed in Note 23. Related-Party Transactions.

Power and PSE&G also have undivided interests in certain jointly-owned facilities, with each responsible for paying its respective ownership share of construction costs, fuel purchases and operating expenses. Power and PSE&G consolidated their portion of any revenues and expenses related to these facilities in the appropriate revenue and expense categories.

Accounting for the Effects of Regulation

In accordance with accounting guidance for rate-regulated entities, PSE&G's financial statements must reflect the economic effects of regulation. PSE&G is required to defer the recognition of costs (a Regulatory Asset) or record the recognition of obligations (a Regulatory Liability) if it is probable that, through the rate-making process, there will be a corresponding increase or decrease in future rates. Accordingly, PSE&G has deferred certain costs and recoveries, which are being amortized over various future periods. To the extent that collection of any such costs or payment of liabilities is no longer probable as a result of changes in regulation and/or competitive position, the associated Regulatory Asset or Liability is charged or credited to income. Management believes that PSE&G's transmission and distribution businesses continue to meet the accounting requirements for rate-regulated entities. For additional information, see Note 6. Regulatory Assets and Liabilities.

Derivative Financial Instruments

Each company uses derivative financial instruments to manage risk from changes in interest rates, commodity prices, congestion costs and emission credit prices, pursuant to its business plans and prudent practices.

S1-SSA-0009 - 10712

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Derivative instruments, not designated as normal purchases or sales, are recognized on the balance sheet at their fair value. Changes in the fair value of a derivative that is highly effective as, and that is designated and qualifies as, a fair value hedge, along with changes of the fair value of the hedged asset or liability that are attributable to the hedged risk, are recorded in current period earnings. Changes in the fair value of a derivative that is highly effective as, and that is designated and qualifies as, a cash flow hedge are recorded in Accumulated Other Comprehensive Income (Loss) until earnings are affected by the variability of cash flows of the hedged transaction. Any hedge ineffectiveness is included in current period earnings. For derivative contracts that do not qualify as cash flow or fair value hedges or are not designated as normal purchases or sales, changes in fair value are recorded in current period earnings.

Many non-trading contracts qualify for the normal purchases and normal sales exemption and are accounted for upon settlement.

For additional information regarding derivative financial instruments, see Note 16. Financial Risk Management Activities.

Revenue Recognition

The majority of Power's revenues relate to bilateral contracts, which are accounted for on the accrual basis as the energy is delivered. Power's revenue also includes changes in the value of non-trading energy derivative contracts that are not designated as normal purchases or sales or as cash flow or fair value hedges of other positions. Power records margins from energy trading on a net basis. See Note 16. Financial Risk Management Activities for further discussion.

PSE&G's revenues are recorded based on services rendered to customers. PSE&G records unbilled revenues for the estimated amount customers will be billed for services rendered from the time meters were last read to the end of the respective accounting period. The unbilled revenue is estimated each month based on usage per day, the number of unbilled days in the period, estimated seasonal loads based upon the time of year and the variance of actual degree-days and temperature-humidity-index hours of the unbilled period from expected norms.

Energy Holdings' revenues are earned primarily from income relating to its investments in leveraged leases, which is recognized by a method which produces a constant after-tax rate of return on the outstanding investment in the lease, net of the related deferred tax liability, in the years in which the net investment is positive. Any gains or losses incurred as a result of a lease termination are recorded in Operating Revenues as these events occur in the ordinary course of business of managing the investment portfolio. See Note 7. Long-Term Investments for further discussion.

Depreciation and Amortization

Power calculates depreciation on generation-related assets under the straight-line method based on the assets' estimated useful lives. The estimated useful lives are:

- general plant assets—3 years to 20 years
- fossil production assets—10 years to 79 years
- nuclear generation assets—approximately 60 years
- pumped storage facilities—76 years

PSE&G calculates depreciation under the straight-line method based on estimated average remaining lives of the several classes of depreciable property. These estimates are reviewed on a periodic basis and necessary adjustments are made as approved by the BPU or the FERC. The depreciation rate stated as a percentage of original cost of depreciable property was as follows:

	2012 Avg Rate	2011 Avg Rate	2010 Avg Rate
PSE&G Depreciation Rate	2.48%	2.46%	2.46%

Taxes Other Than Income Taxes

Excise taxes and transitional energy facilities assessment (TEFA) collected from PSE&G's customers are presented in the financial statements on a gross basis. For the years ended December 31, 2012, 2011 and 2010, TEFA is included in the following captions in the Consolidated Statements of Operations:

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

	Years Ended December 31,		
	2012	2011	2010
	Millions		
TEFA included in:			
Operating Revenues	$ 108	$ 146	$ 149
Taxes Other Than Income Taxes	$ 98	$ 133	$ 136

Interest Capitalized During Construction (IDC) and Allowance for Funds Used During Construction (AFUDC)

IDC represents the cost of debt used to finance construction at Power and Energy Holdings. AFUDC represents the cost of debt and equity funds used to finance the construction of new utility assets at PSE&G. The amount of IDC or AFUDC capitalized as Property, Plant and Equipment is included as a reduction of interest charges or other income for the equity portion. The amounts and average rates used to calculate IDC or AFUDC for the years ended December 31, 2012, 2011 and 2010 were as follows:

	IDC/AFUDC Capitalized					
	2012		2011		2010	
	Millions	Avg Rate	Millions	Avg Rate	Millions	Avg Rate
Power	$ 27	5.16%	$ 30	5.91%	$ 78	6.57%
PSE&G	$ 33	8.43%	$ 13	6.56%	$ 7	6.22%

Income Taxes

PSEG and its subsidiaries file a consolidated federal income tax return and income taxes are allocated to PSEG's subsidiaries based on the taxable income or loss of each subsidiary. Investment tax credits deferred in prior years are being amortized over the useful lives of the related property.

Uncertain income tax positions are accounted for using a benefit recognition model with a two-step approach, a more-likely-than-not recognition criterion and a measurement attribute that measures the position as the largest amount of tax benefit that is greater than 50% likely of being realized upon ultimate settlement. If it is not more-likely-than-not that the benefit will be sustained on its technical merits, no benefit will be recorded. Uncertain tax positions that relate only to timing of when an item is included on a tax return are considered to have met the recognition threshold. See Note 20. Income Taxes for further discussion.

Impairment of Long-Lived Assets

In accordance with accounting guidance, management evaluates long-lived assets for impairment whenever events or changes in circumstances, such as significant adverse changes in regulation, business climate or market conditions, could potentially indicate an asset's or asset group's carrying amount may not be recoverable. In such an event, an undiscounted cash flow analysis is performed to determine if an impairment exists. When a long-lived asset's carrying amount exceeds the undiscounted estimated future cash flows associated with the asset, the asset is considered impaired to the extent that the asset's fair value is less than its carrying amount. An impairment would result in a reduction of the long-lived asset value through a non-cash charge to earnings.

Cash and Cash Equivalents

Cash equivalents consist of short-term, highly liquid investments with original maturities of three months or less.

Accounts Receivable—Allowance for Doubtful Accounts

PSE&G's accounts receivable are reported in the balance sheet as gross outstanding amounts adjusted for doubtful accounts. The allowance for doubtful accounts reflects PSE&G's best estimates of losses on the accounts receivable balances. The allowance is based on accounts receivable aging, historical experience, write-off forecasts and other currently available evidence.

Accounts receivable are charged off in the period in which the receivable is deemed uncollectible. Recoveries of accounts receivable are recorded when it is known they will be received.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Materials and Supplies and Fuel

Materials and supplies for Power and Energy Holdings are valued at the lower of average cost or market. Fuel inventory at Power includes the weighted average costs of stored natural gas, coal, fuel oil and propane used to generate power and to satisfy obligations under Power's gas supply contracts with PSE&G. The costs of fuel, including transportation costs, are included in inventory when purchased and charged at average cost to Energy Costs when used or sold. PSE&G's materials and supplies are carried at average cost consistent with the rate-making process.

Restricted Funds

PSE&G's restricted funds represent revenues collected from its retail electric customers that must be used to pay the principal, interest and other expenses associated with the securitization bonds of PSE&G Transition Funding LLC (Transition Funding) and PSE&G Transition Funding II LLC (Transition Funding II).

Property, Plant and Equipment

Power capitalizes costs which increase the capacity or extend the life of an existing asset, represent a newly acquired or constructed asset or represent the replacement of a retired asset. The cost of maintenance, repair and replacement of minor items of property is charged to appropriate expense accounts as incurred. Environmental costs are capitalized if the costs mitigate or prevent future environmental contamination or if the costs improve existing assets' environmental safety or efficiency. All other environmental expenditures are expensed as incurred.

PSE&G's additions to and replacements of existing property, plant and equipment are capitalized at original cost. The cost of maintenance, repair and replacement of minor items of property is charged to expense as incurred. At the time units of depreciable property are retired or otherwise disposed of, the original cost, adjusted for net salvage value, is charged to accumulated depreciation.

Available-for-Sale Securities

These securities are comprised of the Nuclear Decommissioning Trust (NDT) Fund, a master independent external trust account maintained to provide for the costs of decommissioning upon termination of operations of Power's nuclear facilities and amounts comprising Other Special Funds that are deposited to fund a Rabbi Trust which was established to meet the obligations related to non-qualified pension plans and deferred compensation plans.

Realized gains and losses on available-for-sale securities are recorded in earnings and unrealized gains and losses on such securities are recorded as a component of Accumulated Other Comprehensive Income (Loss) (except credit loss on debt securities which is recorded in earnings). Securities with unrealized losses that are deemed to be other-than-temporarily impaired are recorded in earnings. See Note 9. Available-for-Sale Securities for further discussion.

Pension and Other Postretirement Benefits (OPEB) Plan Assets

The market-related value of plan assets held for the qualified pension and OPEB plans is equal to the fair value of those assets as of year-end. Fair value is determined using quoted market prices and independent pricing services based upon the security type as reported by the trustee at the measurement dates (December 31) for all plan assets. See Note 12. Pension, OPEB and Savings Plans for further discussion.

Basis Adjustment

Power and PSE&G have recorded a Basis Adjustment in their respective Consolidated Balance Sheets related to the generation assets that were transferred from PSE&G to Power in August 2000 at the price specified by the BPU. Because the transfer was between affiliates, the transaction was recorded at the net book value of the assets and liabilities rather than the transfer price. The difference between the total transfer price and the net book value of the generation-related assets and liabilities, $986 million, net of tax, was recorded as a Basis Adjustment on Power's and PSE&G's Consolidated Balance Sheets. The $986 million is a reduction of Power's Member's Equity and an addition to PSE&G's Common Stockholder's Equity. These amounts are eliminated on PSEG's consolidated financial statements.

Use of Estimates

The process of preparing financial statements in conformity with GAAP requires the use of estimates and assumptions regarding certain types of assets, liabilities, revenues and expenses. Such estimates primarily relate to unsettled transactions and events as of the date of the financial statements.

Reclassifications

During 2011, Power sold its two natural gas combined cycle power plants in Texas that were owned and operated by its subsidiary, PSEG Texas. As a result, amounts related to these plants were reclassified as Discontinued Operations in the financial statements of PSEG and Power for the years ended December 31, 2011 and 2010. See Note 4. Discontinued Operations and Dispositions.

Note 2. Recent Accounting Standards

New Standards Adopted during 2012

Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in GAAP and International Financial Reporting Standards (IFRS)

This accounting standard updates guidance related to fair value measurements and disclosures as a step towards achieving convergence between GAAP and IFRS. The updated guidance

- clarifies intent about application of existing fair value measurements and disclosures,
- changes some requirements for fair value measurements, and
- requires expanded disclosures.

We adopted this standard prospectively effective January 1, 2012. Upon adoption there was no material impact on our consolidated financial position, results of operations or cash flows; however, it has resulted in expanded disclosures. For additional information, see Note 17. Fair Value Measurements.

Presentation of Comprehensive Income

This accounting standard addresses the presentation of comprehensive income as a step towards achieving convergence between GAAP and IFRS. The updated guidance

- allows an entity to present components of net income and other comprehensive income in one continuous statement, referred to as the statement of comprehensive income, or in two separate, but consecutive statements, and
- eliminates the current option to report other comprehensive income and its components in the statement of changes in equity.

We adopted this standard retrospectively effective January 1, 2012. Upon adoption of the new amended guidance, there was no impact on our consolidated financial position, results of operations or cash flows, but there was a change in the presentation of the components of other comprehensive income.

New Accounting Standards Issued But Not Yet Adopted

Disclosures about Offsetting Assets and Liabilities

This accounting standard requires balance sheet offsetting disclosures to facilitate comparability between financial statements prepared on the basis of GAAP and IFRS. This standard requires entities

- to disclose information about offsetting and related arrangements to enable users of financial statements to understand the effect of those arrangements on an entity's financial position, and
- to present both net (offset amounts) and gross information in the notes to the financial statements for relevant assets and liabilities that are offset.

The guidance is applicable to certain financial instruments (i.e. derivatives, repurchase agreements and reverse repurchase agreements) and securities borrowing and lending transactions. It is effective for fiscal years and interim periods beginning on or after January 1, 2013. As this standard requires disclosures only, it will not have any impact on our consolidated financial position, results of operations or cash flows.

Reclassification Adjustments out of Accumulated Other Comprehensive Income (AOCI)

This accounting standard requires entities to disclose the following information about reclassification adjustments related to AOCI:

- changes in AOCI balances by components; and
- significant amounts reclassified out of AOCI by respective line items of net income (for amounts that are required by GAAP to be reclassified to net income in their entirety in the same reporting period). For other types of reclassifications, reference to other note disclosures would be required.

The guidance is effective for fiscal years and interim periods beginning on or after January 1, 2013. As this standard requires disclosures only, it will not have any impact on our consolidated financial position, results of operations or cash flows.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Note 3. Variable Interest Entities (VIEs)

VIEs for which PSE&G is the Primary Beneficiary

PSE&G is the primary beneficiary of and consolidates two marginally capitalized VIEs, Transition Funding and Transition Funding II, which were created for the purpose of issuing transition bonds and purchasing bond transitional property of PSE&G, which is pledged as collateral to the trustee for these bonds. PSE&G acts as the servicer for these entities to collect securitization transition charges authorized by the BPU. These funds are remitted to Transition Funding and Transition Funding II and are used for interest and principal payments on the transition bonds and related costs.

The assets and liabilities of these VIEs are presented separately on the face of the Consolidated Balance Sheets of PSEG and PSE&G because the Transition Funding and Transition Funding II assets are restricted and can only be used to settle their respective obligations. The Transition Funding and Transition Funding II creditors do not have any recourse to the general credit of PSE&G in the event the transition charges are not sufficient to cover the bond principal and interest payments of Transition Funding and Transition Funding II, respectively.

PSE&G's maximum exposure to loss is equal to its equity investment in these VIEs which was $16 million as of December 31, 2012 and 2011. PSE&G considers the risk of actual loss to be remote. PSE&G did not provide any financial support to Transition Funding or Transition Funding II in 2012 or 2011. Further, PSE&G does not have any contractual commitments or obligations to provide financial support to Transition Funding and Transition Funding II.

Note 4. Discontinued Operations and Dispositions

Discontinued Operations

Power

In March 2011, Power completed the sale of its 1,000 MW gas-fired Guadalupe generating facility for a total sale price of $ 352 million, resulting in an after-tax gain of $54 million.

In July 2011, Power completed the sale of its 1,000 MW gas-fired Odessa generating facility for a total sale price of $ 335 million, resulting in an after-tax gain of $25 million.

PSEG Texas' operating results for years ended December 31, 2011 and 2010, which were reclassified to Discontinued Operations, are summarized below:

	Years Ended December 31,	
	2011	2010
	Millions	
Operating Revenues	$ 112	$ 402
Income Before Income Taxes	$ 26	$ 15
Net Income (Loss)	$ 17	$ 7

Dispositions

Leveraged Leases

For the year ended December 31, 2011, Energy Holdings sold its leveraged lease investment in an office building in Denver, Colorado for gross proceeds of $215 million. Proceeds net of sales costs were $175 million.

For the year ended December 31, 2010, Energy Holdings sold its interest in six leveraged leases, including five international leases.

	Years Ended December 31,	
	2011	2010
	Millions	
Net Proceeds from Sales	$ 175	$ 433
Gain (Loss) on Sales, after-tax	$ 34	$ 30

Power holds undivided ownership interests in the jointly-owned facilities above, excluding related nuclear fuel and inventories. Power is entitled to shares of the generating capability and output of each unit equal to its respective ownership interests. Power also pays its ownership share of additional construction costs, fuel inventory purchases and operating expenses. Power's share of expenses for the jointly-owned facilities is included in the appropriate expense category. Each owner is responsible for any financing with respect to its pro rata share of capital expenditures.

Power co-owns Salem and Peach Bottom with Exelon Generation. Power is the operator of Salem and Exelon Generation is the operator of Peach Bottom. A committee appointed by the co-owners provides oversight. Proposed Operation and Maintenance (O&M) budgets and requests for major capital expenditures are reviewed and approved as part of the normal Power governance process.

GenOn Northeast Management Company is a co-owner and the operator for Keystone Generating Station and Conemaugh Generating Station. A committee appointed by the co-owners provides oversight. Proposed O&M budgets and requests for major capital expenditures are reviewed and approved as part of the normal Power governance process.

Power is a co-owner in the Yards Creek Pumped Storage Generation Facility. Jersey Central Power & Light Company (JCP&L) is also a co-owner and the operator of this facility. JCP&L submits separate capital and O&M budgets, subject to Power's approval as part of the normal Power governance process.

Power is a minority owner in the Merrill Creek Reservoir and Environmental Preserve in Warren County, New Jersey. Merrill Creek Owners Group is the owner-operator of this facility. The operator submits separate capital and O&M budgets, subject to Power's approval as part of the normal Power governance process.

Note 6. Regulatory Assets and Liabilities

PSE&G prepares its financial statements in accordance with GAAP accounting for regulated utilities. A regulated utility is required to defer the recognition of costs (a Regulatory Asset) or the recognition of obligations (a Regulatory Liability) if it is probable that, through the rate-making process, there will be a corresponding increase or decrease in future rates. Accordingly, PSE&G has deferred certain costs, which will be amortized over various future periods. These costs are deferred based on rate orders issued by the BPU or the FERC or PSE&G's experience with prior rate cases. Most of PSE&G's Regulatory Assets and Liabilities as of December 31, 2012 are supported by written orders, either explicitly or implicitly through the BPU's treatment of various cost items.

Regulatory Assets are subject to prudence reviews and can be disallowed in the future by regulatory authorities. PSE&G believes that all of its Regulatory Assets are probable of recovery. To the extent that collection of any Regulatory Assets or payments of Regulatory Liabilities is no longer probable, the amounts would be charged or credited to income.

Total Regulatory Liabilities	**$ 286**	**$ 337**	

(1) Recovered/Refunded with interest.

(2) Recoverable/Refundable per specific rate order.

All Regulatory Assets and Liabilities are excluded from PSE&G's rate base unless otherwise noted. The Regulatory Assets and Liabilities in the table above are defined as follows:

- **Underrecovered Electric Energy Costs:** These costs represent the underrecovered amounts associated with BGS, as approved by the BPU.
- **SBC:** The SBC, as authorized by the BPU and the New Jersey Electric Discount and Energy Competition Act (Competition Act), includes costs related to PSE&G's electric and gas business as follows: 1) the USF; 2) Energy Efficiency and Renewable Energy Programs; 3) Social Programs (electric only) which include electric bad debt expense; and 4) the RAC for incurred MGP remediation expenditures. All components accrue interest on both over and underrecoveries.
- **RRC:** These costs are amounts associated with various renewable energy and energy efficiency programs. Components of the RRC include: Carbon Abatement, Energy Efficiency Economic Stimulus Program, Energy Efficiency Economic Extension Program, the Demand Response Program, Solar Generation Investment Program (Solar 4 All) and Solar Loan II Program.
- **SPRC:** This charge is designed to recover the revenue requirements associated with the PSE&G Solar Pilot Program (Solar Loan I) per the BPU Order, less the net proceeds from the sale of associated Solar Renewable Energy Certificates (SRECs) or cash received in lieu of SRECs. The net recovery is subject to deferred accounting. Interest at the two-year constant maturity treasury rate plus 60 basis points will be accrued monthly on any under- or over-recovered balances.
- **Capital Stimulus Undercollection:** PSE&G has received approval from the BPU for programs that provide for accelerated investment in utility infrastructure. The goal of these accelerated capital investments is to improve the reliability of PSE&G's infrastructure and New Jersey's economy through job creation.
- **WNC Deferral:** This represents the over or under collection of gas margin refundable or recoverable under the BPU's weather normalization clause. The WNC requires PSE&G to calculate, at the end of each October-to-May period, the level by which margin revenues differed from what would have resulted if normal weather had occurred.

Past financial performance is no guarantee of future results.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

- **New Jersey Clean Energy Program:** The BPU approved future funding requirements for Energy Efficiency and Renewable Energy Programs through the first half of 2013. Once the rates are measured, they are recovered through the SBC.
- **Stranded Costs To Be Recovered:** This reflects deferred costs, which are being recovered through the securitization transition charges authorized by the BPU in irrevocable financing orders and being collected by PSE&G, as servicer on behalf of Transition Funding and Transition Funding II, respectively. Collected funds collected are remitted to Transition Funding and Transition Funding II and are used for interest and principal payments on the transition bonds and related costs and taxes.

  Transition Funding and Transition Funding II are wholly owned, bankruptcy-remote subsidiaries of PSE&G that purchased certain transition property from PSE&G and issued transition bonds secured by such property. The transition property consists principally of the rights to receive electricity consumption-based per kilowatt-hour (kWh) charges from PSE&G electric distribution customers, which represent irrevocable rights to receive amounts sufficient to recover certain of PSE&G's transition costs related to deregulation, as approved by the BPU.
- **MGP Remediation Costs:** Represents the low end of the range for the remaining environmental investigation and remediation program cleanup costs for manufactured gas plants that are probable of recovery in future rates. Once these costs are incurred, they are recovered through the RAC in the SBC.
- **Pension and Other Postretirement:** Pursuant to the adoption of accounting guidance for employers' defined benefit pension and OPEB plans, PSE&G recorded the unrecognized costs for defined benefit pension and other OPEB plans on the balance sheet as a Regulatory Asset. These costs represent actuarial gains or losses, prior service costs and transition obligations as a result of adoption, which have not been expensed. These costs are amortized and recovered in future rates.
- **Deferred Income Taxes:** These amounts represent the portion of deferred income taxes that will be recovered or refunded through future rates, based upon established regulatory practices.
- **RAC (Other SBC):** Costs incurred to clean up manufactured gas plants which are recovered over seven years.
- **MTM Contracts:** The estimated fair value of long-term standard offer capacity agreements (SOCAs), gas hedge contracts and gas cogeneration supply contracts. The regulatory asset/liability is offset by a derivative asset/liability and, with respect to the gas hedge contracts only, an intercompany receivable/payable on the Consolidated Balance Sheets.
- **Unamortized Loss on Reacquired Debt and Debt Expense:** Represents losses on reacquired long-term debt, which are recovered through rates over the remaining life of the debt.
- **Conditional Asset Retirement Obligation:** These costs represent the differences between rate regulated cost of removal accounting and asset retirement accounting under GAAP. These costs will be recovered in future rates.
- **Gas Margin Adjustment Clause:** PSE&G defers the margin differential received from Transportation Gas Service Non-Firm Customers versus bill credits provided to BGSS-Firm customers.
- **Storm Damage Deferral:** Costs incurred in the cleanup of 2012, 2011 and 2010 storms, as approved by the BPU under an Order received in December 2012 authorizing the deferral of incremental costs.
- **MTC Refund, net:** These costs represent the overrecovered amounts associated with MTC.
- **Overrecovered Gas and Electric Costs:** These costs represent the overrecovered amounts associated with BGSS and BGS, as approved by the BPU. Interest is accrued on overrecovered balances.
- **FERC Formula Rate True-up:** Overcollection or undercollection of transmission earnings calculated using a FERC approved formula.
- **NGC:** Represents the difference between the cost of non-utility generation and the amounts realized from selling that energy at market rates through PJM and ratepayer collections.
- **Electric Cost of Removal:** PSE&G accrues and collects for cost of removal in rates. The liability for non-legally required cost of removal is classified as a Regulatory Liability. This liability is reduced as removal costs are incurred. Accumulated cost of removal is a reduction to the rate base.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Significant 2012 orders and pending rate filings are as follows:

- ***Storm Damage Deferral***—In December 2012, the BPU granted PSE&G's request to defer on its books actually incurred, uninsured, incremental storm restoration costs to its gas and electric distribution systems associated with extraordinary storms, including Hurricane Irene and Superstorm Sandy. In February 2013, the BPU announced that it would initiate a generic proceeding to evaluate the prudency of extraordinary, storm-related costs incurred by all of the regulated utilities as a result of the natural disasters experienced in New Jersey in 2011 and 2012 and in this proceeding will consider the manner in which such prudent costs shall be recovered.
- ***Transmission Formula Rates***—PSE&G's 2012 Annual Formula Rate Update with the FERC provided for approximately $94 million in increased annual transmission revenues effective January 1, 2012. PSE&G filed its 2013 Annual Formula Rate Update with FERC in October 2012, which provides for approximately $174 million in increased annual transmission revenues effective January 1, 2013.
- ***SBC/NGC***—In March 2012, PSE&G made an annual SBC/NGC filing requesting a $5 million electric increase and a $29 million gas increase. PSE&G updated the filing with actual data through August 31, 2012, resulting in a decrease of $77 million for electric customers while the gas increase remained unchanged. A Stipulation signed by the Parties was approved by the BPU effective February 1, 2013.
- ***Universal Service Fund (USF)/Lifeline***—The USF is an energy assistance program mandated by the BPU to provide payment assistance to low income customers. The Lifeline program is a separate mandated energy assistance program to provide payment assistance to elderly and disabled customers. In June 2012, New Jersey's electric and gas utilities, including PSE&G, filed requests to reset the statewide rates for the USF and the Lifeline program. The filed USF rates were set to recover approximately $230 million on a statewide basis. Of this amount, the statewide electric rates are set to recover $173 million with the remaining $57 million recovered through gas rates. The rates for the Lifeline program were set to recover $66 million, $46 million for electric and $20 million for gas. The filed rates were subsequently updated and approved effective October 1, 2012. PSE&G earns no margin on the collection of the USF and Lifeline programs resulting in no impact on Net Income.
- ***Capital Infrastructure Programs (CIP I and CIP II)***—In December 2012, the BPU approved stipulations regarding our CIP I and CIP II filings resulting in a combined increase of $40 million and $23 million for electric and gas customers, respectively effective January 1, 2013.
- ***WNC***— In June 2012, PSE&G filed a petition and testimony with the BPU, including eight months of actual and four months of forecasted data, which sought BPU approval to recover $41 million in deficiency revenues from its customers during the 2012-2013 Winter Period (October 1 to May 31) and a carryover deficiency of $16 million to the 2013-2014 Winter Period. In September 2012, an Order approving the stipulation for provisional rates was signed. In December 2012, PSE&G made a supplemental filing incorporating twelve months of actual financial data, which would, if approved by the BPU, result in no change to customer rates during the 2012-2013 Winter Period. The supplemental filing would, however, result in an increase of the carryover deficiency to the 2013-2014 Winter Period from $16 million to $24 million. PSE&G is awaiting a final Order.
- ***RAC***—In November 2011, PSE&G filed a RAC 19 petition with the BPU requesting a decrease in electric and gas RAC revenues on an annual basis of $9 million and $10 million, respectively. In October 2012, PSE&G received the Administrative Law Judge's (ALJ) Initial Decision allowing full recovery of RAC 19 costs including costs of the Passaic River and Newark Bay Superfund (CERCLA) matters and the Occidental litigation that were allocated to PSE&G and included in this request. In October 2012, the BPU issued a final Order approving the ALJ's Initial Decision.
- ***RRC***—In July 2012, PSE&G filed a petition with the BPU requesting an increase in the RRC seeking to recover approximately $62 million in electric revenue and $8 million in gas revenue on an annual basis. The discovery phase of this proceeding is underway.
- ***SPRC***—In July 2012, the BPU approved a Stipulation regarding our March 2010 SPRC (Solar Loan I) filing authorizing an increase in rates of $3 million for PSE&G's electric customers effective August 1, 2012. In July 2012, PSE&G filed a petition with the BPU for an annual increase in the electric SPRC of $17 million. The discovery phase of this proceeding is underway.

Note 7. Long-Term Investments

Long-Term Investments as of December 31, 2012 and 2011 included the following:

	As of December 31, 2012	2011
	Millions	
Power		
Partnerships and Corporate Joint Ventures (Equity Method Investments)	$ 40	$ 32
PSE&G		
Life Insurance and Supplemental Benefits	161	162
Solar Loan Investments	180	111
Other Investments	7	7
Energy Holdings		
Leveraged Leases	840	881
Partnerships and Corporate Joint Ventures:		
Equity Method Investments (A)	94	106
Cost Method Investments (B)	2	4
Total Long-Term Investments	**$ 1,324**	**$ 1,303**

(A) During the three years ended December 31, 2012, 2011 and 2010, the amount of dividends from these investments was $17 million, $3 million and $5 million, respectively. Energy Holdings' share of income and cash flow distribution percentages were at 50% as of December 31, 2012.

(B) Reflects Energy Holdings' investments in certain companies in which it does not have the ability to exercise significant influence. Such investments are accounted for under the cost method.

Leases

Energy Holdings has investments in domestic energy and real estate assets subject primarily to leveraged lease accounting. A leveraged lease is typically comprised of an investment by an equity investor and debt provided by a third party debt investor. The debt is recourse only to the assets subject to lease and is not included on PSEG's Consolidated Balance Sheets. As an equity investor, Energy Holdings' equity investments in the leases are comprised of the total expected lease receivables over the lease terms plus the estimated residual values at the end of the lease terms, reduced for any income not yet earned on the leases. This amount is included in Long-Term Investments on PSEG's Consolidated Balance Sheets. The more rapid depreciation of the leased property for tax purposes creates tax cash flow that will be repaid to the taxing authority in later periods. As such, the liability for such taxes due is recorded in Deferred Income Taxes on PSEG's Consolidated Balance Sheets. The following table shows Energy Holdings' gross and net lease investment as of December 31, 2012 and 2011, respectively.

	As of December 31, 2012	2011
	Millions	
Lease Receivables (net of Non-Recourse Debt)	$ 721	$ 763
Estimated Residual Value of Leased Assets	535	553
	1,256	1,316
Unearned and Deferred Income	(416)	(435)
Gross Investments in Leases	840	881
Deferred Tax Liabilities	(723)	(716)
Net Investments in Leases	**$ 117**	**$ 165**

S1-SSA-0009 - 10727

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The pre-tax income and income tax effects, excluding gains and losses on sales, related to investments in leases were as follows:

	Years Ended December 31,		
	2012	2011	2010
	Millions		
Pre-Tax Income (Loss) from Leases	$ 78	$ (228)	$ 45
Income Tax Expense (Benefit) on Pre-Tax Income from Leases	$ 34	$ (77)	$ 14

Equity Method Investments

Power and Energy Holdings had the following equity method investments as of December 31, 2012:

Name	Location	% Owned
Power		
Keystone Fuels, LLC	PA	23%
Conemaugh Fuels, LLC	PA	23%
Energy Holdings		
Kalaeloa	HI	50%
GWF	CA	50%
Hanford L. P. (Hanford)	CA	50%

Note 8. Financing Receivables

PSE&G

PSE&G sponsors a solar loan program designed to help finance the installation of solar power systems throughout its electric service area. The loans are generally paid back with SRECS generated from the installed solar electric system. The following table reflects the outstanding short and long-term loans by class of customer, none of which would be considered "non-performing."

Credit Risk Profile Based on Payment Activity

Consumer Loans	As of December 31, 2012	2011
	Millions	
Commercial/Industrial	$ 174	$ 106
Residential	15	10
	$ 189	**$ 116**

Energy Holdings

Energy Holdings had a net investment in domestic energy and real estate assets subject primarily to leveraged lease accounting of $117 million and $165 million as of December 31, 2012 and 2011, respectively (See Note 7. Long-Term Investments).

The corresponding receivables associated with the lease portfolio are reflected below, net of non-recourse debt. The ratings in the table represent the ratings of the entities providing payment assurance to Energy Holdings. "Not Rated" counterparties relate to investments in leases of commercial real estate properties.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Counterparties' Credit Rating (S&P) as of December 31, 2012	Lease Receivables, Net of Non-Recourse Debt As of December 31, 2012	2011
	Millions	
AA	$ 21	$ 21
AA-	73	110
BBB+ - BBB-	316	316
B	166	299
D	134	—
Not Rated	11	17
	$ 721	**$ 763**

The "B" and "D" ratings above represent lease receivables related to coal-fired assets in Illinois and Pennsylvania. As of December 31, 2012, the gross investment in the leases of such assets, net of non-recourse debt, was $559 million ($19 million, net of deferred taxes). A more detailed description of such assets under lease is presented in the following table.

Asset	Location	Gross Investment	% Owned	Total	Fuel Type	Counterparties' S&P Credit Ratings	Counterparty
		Millions		MW			
Powerton Station Units 5 and 6	IL	$ 134	64%	1,538	Coal	D	Edison Mission Energy
Joliet Station Units 7 and 8	IL	$ 84	64%	1,044	Coal	D	Edison Mission Energy
Keystone Station Units 1 and 2	PA	$ 116	17%	1,711	Coal	B	GenOn REMA, LLC
Conemaugh Station Units 1 and 2	PA	$ 116	17%	1,711	Coal	B	GenOn REMA, LLC
Shawville Station Units 1, 2, 3 and 4	PA	$ 109	100%	603	Coal	B	GenOn REMA, LLC

The credit exposure for lessors is partially mitigated through various credit enhancement mechanisms within the lease transactions. These credit enhancement features vary from lease to lease and may include letters of credit or affiliate guarantees. Upon the occurrence of certain defaults, indirect subsidiary companies of Energy Holdings would exercise their rights and attempt to seek recovery of their investment, potentially including stepping into the lease directly to protect their investments. While these actions could ultimately protect or mitigate the loss of value, they could require the use of significant capital investments and trigger certain material tax obligations. A bankruptcy of a lessee would likely delay any efforts on the part of the lessors to assert their rights upon default and could delay the monetization of claims. Failure to recover adequate value could ultimately lead to a foreclosure on the lease by the lenders. If foreclosures were to occur, Energy Holdings could potentially record a pre-tax write-off up to its gross investment in these facilities and may also be required to pay significant cash tax liabilities.

Of facilities under lease by indirect subsidiary companies of Energy Holdings to GenOn REMA, LLC (GenOn REMA), a subsidiary of GenOn Energy Inc. (GenOn), which was acquired by NRG Energy, Inc. in December 2012. Keystone has installed flue gas desulfurization control for sulfur dioxide (SO_2), selective catalytic reduction (SCR) equipment for nitrogen oxide (NOx) and mercury control to meet current environmental requirements. Conemaugh has flue gas desulfurization control, while SCR and mercury control are scheduled to be installed and operational in the first quarter of 2015. GenOn's plan for the coal-fired units at the Shawville facility is to place them in a "long-term protective layup" by April 2015 while continuing to pay the required rent and maintaining the facility in accordance with the lease terms or terminating the lease for obsolescence in which case the lessee would be required, among other things, to pay the contractual termination value structured to recover Energy Holdings' indirect subsidiaries' lease investment as specified in the lease agreement.

Although all lease payments from the GenOn REMA leases are current, no assurances can be given that future payments in accordance with the lease contracts will continue. Factors which may impact future lease cash flows include, but are not limited

S1-SSA-0009 - 10729

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

to, new environmental legislation and regulation regarding air quality, water and other discharges in the process of generating electricity, market prices for fuel and electricity, overall financial condition of lease counterparties and the quality and condition of assets under lease.

With respect to Edison Mission Energy's (EME) Midwest Generation (MWG) leases on the Powerton and Joliet coal units in Illinois, the lessee, MWG, substantially completed investments in mercury removal (Activated Carbon Injection) and NOx emission controls (low NOx burners and Selective Non-Catalytic Reduction systems), and plans to invest in SO_2 emission controls (Dry Sorbent Injection (Trona) systems). EME does not anticipate a material change in this current approach in order to comply with existing federal and Illinois environmental rules. On November 30, 2012, MWG filed a variance request with the Illinois Pollution Control Board seeking two additional years to meet upcoming air emission compliance deadlines under Illinois law. EME and MWG remain in litigation with the U.S. Environmental Protection Agency (EPA) and the State of Illinois regarding certain air emissions. On March 16, 2011, the federal district court dismissed new source review claims in reference to Powerton and Joliet, but certain opacity claims remain pending against MWG. The EPA and the State of Illinois have appealed the dismissal of the new source review claims. On November 11, 2011, the federal district court stayed proceedings in connection with the opacity claims until the appeal by the EPA and the State of Illinois is resolved.

On December 17, 2012, EME and MWG filed for relief under Chapter 11 of the U.S. Bankruptcy Code. Immediately prior to that filing, EME, MWG, Nesbitt Asset Recovery, LLC (which is an indirect, wholly owned subsidiary of Energy Holdings), and Associates Capital Investments, L.L.P., as well as certain affiliated owner lessors and owner participants, entered into a forbearance agreement with holders of a majority of the lease debt that financed the original sale-leaseback transaction. The forbearance agreement, which was approved by the bankruptcy court and limited the ability of the lease indenture trustee to accelerate or exercise other remedies with respect to that nonrecourse debt, expired on February 15, 2013. A new forbearance agreement is currently being negotiated by the parties. MWG has not determined whether to assume or reject those leases. MWG did not make its scheduled rent payments (which related to the prior six month period) totaling approximately $48 million on the Powerton and Joliet leases due on January 2, 2013, most of which is a pre-petition bankruptcy claim. Rental for the utilization of the facilities by MWG during pendency of the bankruptcy will likely be treated as an administrative expense in bankruptcy. In mid-February, pursuant to the terms of the forbearance agreement, a rental payment of approximately $5 million was received covering the period from the date of the petition filing through January 2, 2013.

On December 13, 2011, indirect subsidiary companies of Energy Holdings and Dynegy Incorporated (Dynegy) reached a settlement agreement resolving disputes that had arisen between them with regard to Dynegy Holding’s (DH) rejection of the Dynegy leases. The settlement agreement resolved certain disputes regarding Energy Holdings' Dynegy leases, including claims under Tax Indemnity Agreements that indirect subsidiaries of Energy Holdings have with DH. The original terms of the settlement agreement included a cash payment to Energy Holdings of $7.5 million, which was received on January 4, 2012, and an allowed claim in Bankruptcy Court of $110 million against DH. On December 30, 2011, the effective date of the court order authorizing the Dynegy lease rejections, the leases no longer qualified for leveraged lease accounting treatment under GAAP. As a result, Energy Holdings wrote off the $264 million gross lease investment against the previously recorded reserve. The Energy Holdings' indirect subsidiary companies that are owners/lessors of the two plants ceased leveraged lease accounting and recorded the generation assets and related nonrecourse project debt on their balance sheets at their respective fair values (See Note 17. Fair Value Measurements).

On June 1, 2012, an amended and restated settlement agreement entered into by DH, Dynegy and their creditors (including indirect subsidiary companies of Energy Holdings) was approved by the Bankruptcy Court. The agreement allocated proceeds from the sale of the facilities to pay DH’s creditors, including the lease bondholders, and grants the lease bondholders claims in agreed upon amounts against DH in its bankruptcy proceedings. The settlement agreement also included an exchange of releases by various settling claimants, including parties to the leases with respect to claims arising out of the leases. On October 1, 2012, Dynegy emerged from bankruptcy and distributed cash and stock settlements to the claimants. The total recovery of Energy Holdings' indirect subsidiary companies from the Dynegy leases was approximately $63 million, of which $50 million was recorded in Operating Revenues in the fourth quarter of 2012.

Note 9. Available-for-Sale Securities

NDT Fund

In accordance with NRC regulations, entities owning an interest in nuclear generating facilities are required to determine the costs and funding methods necessary to decommission such facilities upon termination of operation. As a general practice, each nuclear owner places funds in independent external trust accounts it maintains to provide for decommissioning. Power is required to file periodic reports with the NRC demonstrating that the NDT Fund meets the formula-based minimum NRC funding requirements.

Power maintains an external master NDT to fund its share of decommissioning for its five nuclear facilities upon their respective termination of operation. The trust contains two separate funds: a qualified fund and a non-qualified fund.

Past financial performance is no guarantee of future results.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Section 468A of the Internal Revenue Code limits the amount of money that can be contributed into a qualified fund. Power's share of decommissioning costs related to its five nuclear units was estimated to be between $2.2 billion and $2.4 billion, including contingencies. The liability for decommissioning recorded on a discounted basis as of December 31, 2012 was approximately $348 million and is included in the Asset Retirement Obligation. The trust funds are managed by third-party investment advisors who operate under investment guidelines developed by Power. In September 2012, Power revised the asset structure for a portion of its NDT Fund and realized gains of $59 million. The investments were transitioned to new investment managers to remove under-performing managers.

Power classifies investments in the NDT Fund as available-for-sale. The following tables show the fair values and gross unrealized gains and losses for the securities held in the NDT Fund:

	As of December 31, 2012			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	Millions			
Equity Securities	$ 648	$ 147	$ (6)	$ 789
Debt Securities				
Government Obligations	274	11	—	285
Other Debt Securities	320	22	—	342
Total Debt Securities	594	33	—	627
Other Securities	124	—	—	124
Total NDT Available-for-Sale Securities	**$ 1,366**	**$ 180**	**$ (6)**	**$ 1,540**

	As of December 31, 2011			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	Millions			
Equity Securities	$ 582	$ 126	$ (23)	$ 685
Debt Securities

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table shows the value of securities in the NDT Fund that have been in an unrealized loss position for less than 12 months and greater than 12 months:

	As of December 31, 2012				As of December 31, 2011			
	Less Than 12 Months		Greater Than 12 Months		Less Than 12 Months		Greater Than 12 Months	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
	Millions							
Equity Securities (A)	$ 139	$ (6)	$ —	$ —	$ 183	$ (23)	$ —	$ —
Debt Securities								
Government Obligations (B)	34	—	1	—	20	—	3	—
Other Debt Securities (C)	31	—	6	—	56	(1)	4	(1)
Total Debt Securities	65	—	7	—	76	(1)	7	(1)
NDT Available-for-Sale Securities	**$ 204**	**$ (6)**	**$ 7**	**$ —**	**$ 259**	**$ (24)**	**$ 7**	**$ (1)**

(A) Equity Securities—Investments in marketable equity securities within the NDT Fund are primarily in common stocks within a broad range of industries and sectors. The unrealized losses are distributed over hundreds of companies with limited impairment durations. Power does not consider these securities to be other-than-temporarily impaired as of December 31, 2012.

(B) Debt Securities (Government)—Unrealized losses on Power's NDT investments in United States Treasury obligations and Federal Agency mortgage-backed securities were caused by interest rate changes. Since these investments are guaranteed by the United States government or an agency of the United States government, it is not expected that these securities will settle for less than their amortized cost basis, since Power does not intend to sell nor will it be more-likely-than-not required to sell. Power does not consider these securities to be other-than-temporarily impaired as of December 31, 2012.

(C) Debt Securities (Corporate)—Power's investments in corporate bonds are primarily in investment grade securities. It is not expected that these securities would settle for less than their amortized cost. Since Power does not intend to sell these securities nor will it be more-likely-than-not required to sell, Power does not consider these debt securities to be other-than-temporarily impaired as of December 31, 2012.

The proceeds from the sales of and the net realized gains on securities in the NDT Fund were:

	Years Ended December 31,		
	2012	2011	2010
	Millions		
Proceeds from Sales	**$ 1,433**	**$ 1,355**	**$ 958**
Net Realized Gains:			
Gross Realized Gains	$ 153	$ 144	$ 119
Gross Realized Losses	(52)	(45)	(39)
Net Realized Gains (Losses) on NDT Fund	**$ 101**	**$ 99**	**$ 80**

Net realized gains disclosed in the above table were recognized in Other Income and Other Deductions in PSEG's and Power's Consolidated Statements of Operations. Net unrealized gains of $84 million (after-tax) are included in Accumulated Other Comprehensive Loss on Power's Consolidated Balance Sheet as of December 31, 2012.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The available-for-sale debt securities held as of December 31, 2012 had the following maturities:

Time Frame	Fair Value
	Millions
Less than one year	$ 18
1 - 5 years	136
6 - 10 years	176
11 - 15 years	42
16 - 20 years	10
Over 20 years	245
Total NDT Available-for-Sale Debt Securities	**$ 627**

The cost of these securities was determined on the basis of specific identification.

Power periodically assesses individual securities whose fair value is less than amortized cost to determine whether the investments are considered to be other-than-temporarily impaired. For equity securities, management considers the ability and intent to hold for a reasonable time to permit recovery in addition to the severity and duration of the loss. For fixed income securities, management considers its intent to sell or requirement to sell a security prior to expected recovery. In those cases where a sale is expected, any impairment would be recorded through earnings. For fixed income securities where there is no intent to sell or likely requirement to sell, management evaluates whether credit loss is a component of the impairment. If so, that portion is recorded through earnings while the noncredit loss component is recorded through Accumulated Other Comprehensive Income (Loss). In 2012, other-than-temporary impairments of $18 million were recognized on securities in the NDT Fund. Any subsequent recoveries in the value of these securities would be recognized in Accumulated Other Comprehensive Income (Loss) unless the securities are sold, in which case, any gain would be recognized in income. The assessment of fair market value compared to cost is applied on a weighted average basis taking into account various purchase dates and initial cost of the securities.

Rabbi Trust

PSEG maintains certain unfunded nonqualified benefit plans to provide supplemental retirement and deferred compensation benefits to certain key employees. Certain assets related to these plans have been set aside in a grantor trust commonly known as a "Rabbi Trust."

In March 2012, PSEG restructured the fixed income component of its Rabbi Trust and realized a gain of $5 million. In August 2010, PSEG revised the asset structure of the Rabbi Trust and realized gains of approximately $31 million as the investments were transitioned to a new asset allocation and investment manager.

PSEG classifies investments in the Rabbi Trust as available-for-sale. The following tables show the fair values, gross unrealized gains and losses and amortized cost bases for the securities held in the Rabbi Trust.

	As of December 31, 2012			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	Millions			
Equity Securities	$ 13	$ 5	$ —	$ 18
Debt Securities				
Government Obligations	114	3	—	117
Other Debt Securities	45	2	—	47
Total Debt Securities	159	5	—	164
Other Securities	3	—	—	3
Total Rabbi Trust Available-for-Sale Securities	**$ 175**	**$ 10**	**$ —**	**$ 185**

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

	As of December 31, 2011			
	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	Millions			
Equity Securities	$ 16	$ 3	$ —	$ 19
Debt Securities	148	5	—	153
Total Rabbi Trust Available-for-Sale Securities	**$ 164**	**$ 8**	**$ —**	**$ 172**

As of December 31, 2012, amounts in the above table do not include Accounts Receivable of $4 million and Accounts Payable of $5 million for Rabbi Trust Fund transactions which had not yet settled. These amounts are included on the Consolidated Balance Sheets.

	Years Ended December 31,		
	2012	2011	2010
	Millions		
Proceeds from Rabbi Trust Sales	**$ 233**	**$ —**	**$ 158**
Net Realized Gains (Losses):			
Gross Realized Gains	$ 6	$ —	$ 31
Gross Realized Losses	—	—	—
Net Realized Gains (Losses) on Rabbi Trust	**$ 6**	**$ —**	**$ 31**

Gross realized gains disclosed in the above table were recognized in Other Income in the Consolidated Statements of Operations. Net unrealized gains of $6 million (after-tax) were recognized in Accumulated Other Comprehensive Loss on the Consolidated Balance Sheets as of December 31, 2012. The Rabbi Trust available-for-sale debt securities held as of December 31, 2012 had the following maturities:

Time Frame	Fair Value
	Millions
Less than one year	$ —
1 - 5 years	60
6 - 10 years	31
11 - 15 years	9
16 - 20 years	5
Over 20 years	59
Total Rabbi Trust Available-for-Sale Debt Securities	**$ 164**

The cost of these securities was determined on the basis of specific identification.

PSEG periodically assesses individual securities whose fair value is less than amortized cost to determine whether the investments are considered to be other-than-temporarily impaired. For equity securities, the Rabbi Trust is invested in a commingled indexed mutual fund. Due to the commingled nature of this fund, PSEG does not have the ability to hold these securities until expected recovery. As a result, any declines in fair market value below cost are recorded as a charge to earnings. For fixed income securities, management considers its intent to sell or requirement to sell a security prior to expected recovery. In those cases where a sale is expected, any impairment would be recorded through earnings. For fixed income securities where there is no intent to sell or likely requirement to sell, management evaluates whether credit loss is a component of the impairment. If so, that portion is recorded through earnings while the noncredit loss component is recorded through Accumulated Other Comprehensive Income (Loss). The assessment of fair market value compared to cost is applied on a weighted average basis taking into account various purchase dates and initial cost of the securities. In 2012, there were no other-than-temporary impairments recognized on investments of the Rabbi Trust.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The fair value of the Rabbi Trust related to PSEG, Power and PSE&G are detailed as follows:

	As of December 31, 2012	As of December 31, 2011
	Millions	
Power	$ 36	$ 33
PSE&G	61	57
Other	88	82
Total Rabbi Trust Available-for-Sale Securities	**$ 185**	**$ 172**

Note 10. Goodwill and Other Intangibles

As of each of December 31, 2012 and 2011, Power had goodwill of $16 million related to the Bethlehem Energy Center. Power conducted an annual review for goodwill impairment as of October 31, 2012 and concluded that goodwill was not impaired. No events occurred subsequent to that date which would require a further review of goodwill for impairment.

In addition to goodwill, as of December 31, 2012 and 2011, Power had intangible assets of $34 million and $131 million, respectively, related to emissions allowances and renewable energy credits. Emissions expense includes impairments of emissions allowances and costs for emissions, which is recorded as emissions occur. As load is served under contracts requiring energy from renewable sources, the related expense is recorded. Such expenses for the years ended December 31, 2012, 2011 and 2010 were as follows:

	Years Ended December 31,		
	2012	2011	2010
	Millions		
Emissions Expense	$ 5	$ 35	$ 52
Renewable Energy Expense	$ 34	$ 43	$ 50

Note 11. Asset Retirement Obligations (AROs)

PSEG, Power and PSE&G have recorded various AROs which represent legal obligations to remove or dispose of an asset or some component of an asset at retirement.

Power's ARO liability primarily relates to the decommissioning of its nuclear power plants in accordance with NRC requirements. To estimate this decommissioning obligation related to its nuclear power plants, Power uses a probability weighted, discounted cash flow model which, on a unit by unit basis, considers multiple outcome scenarios that include significant estimates and assumptions, and are based on decommissioning studies, cost escalation rates, inflation rates and discount rates. Power has an independent external trust that is intended to fund decommissioning of its nuclear facilities upon termination of operation. For additional information, see Note 9. Available-for-Sale Securities. Power also identified conditional AROs primarily related to Power's fossil generation units, including liabilities for

- removal of asbestos, stored hazardous liquid material and underground storage tanks from industrial power sites,
- restoration of leased office space to rentable condition upon lease termination,
- permits and authorizations,
- restoration of an area occupied by a reservoir when the reservoir is no longer needed, and
- demolition of certain plants, and the restoration of the sites at which they reside, when the plants are no longer in service.

PSE&G has a conditional ARO for legal obligations related to the removal of asbestos and underground storage tanks at certain industrial establishments, removal of wood poles, leases and licenses, removal of solar panels from leased property and the requirement to seal natural gas pipelines at all sources of gas when the pipelines are no longer in service. PSE&G did not record an ARO for its protected steel and poly-based natural gas transmission lines, as management believes that these categories of transmission lines have an indeterminable life.

S1-SSA-0009 - 10735

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

The changes to the ARO liabilities for PSEG, Power and PSE&G during 2011 and 2012 are presented in the following table:

	PSEG	Power	PSE&G	Other
	Millions			
ARO Liability as of January 1, 2011	$ 461	$ 242	$ 216	$ 3
Liabilities Settled	(6)	(1)	(5)	—
Liabilities Incurred	2	—	2	—
Accretion Expense	19	18	—	1
Accretion Expense Deferred and Recovered in Rate Base (A)	13	—	13	—
ARO Liability as of December 21, 2011	**$ 489**	**$ 259**	**$ 226**	**$ 4**
Liabilities Settled	(5)	(1)	(5)	1
Liabilities Incurred	11	1	7	3
Accretion Expense	21	21	—	—
Accretion Expense Deferred and Recovered in Rate Base (A)	14	—	14	—
Revisions to Present Values of Estimated Cash Flows	97	89	8	—
ARO Liability as of December 31, 2012	**$ 627**	**$ 369**	**$ 250**	**$ 8**

(A) Not reflected as expense in Consolidated Statements of Operations

During 2012, Power recorded an increase in its ARO liabilities, primarily due to an increase in the estimated cost to decommission its nuclear power plants and increased accretion. The increase in the estimated costs to decommission Power's nuclear plants resulted primarily from the receipt of updated decommissioning cost studies in 2012 and the impact of lower discount rates. This change in the ARO did not result in any material impact in Power's Consolidated Statement of Operations.

Note 12. Pension, OPEB and Savings Plans

PSEG sponsors several qualified and nonqualified pension plans and OPEB plans covering PSEG's and its participating affiliates' current and former employees who meet certain eligibility criteria. Eligible employees of Power, PSE&G, Energy Holdings and Services participate in non-contributory pension and OPEB plans sponsored by PSEG and administered by Services. In addition, represented and nonrepresented employees are eligible for participation in PSEG's two defined contribution plans described below.

PSEG, Power and PSE&G are required to record the under or over funded positions of their defined benefit pension and OPEB plans on their respective balance sheets. Such funding positions of each PSEG company are required to be measured as of the date of its respective year-end Consolidated Balance Sheets. For under funded plans, the liability is equal to the difference between the plan's benefit obligation and the fair value of plan assets. For defined benefit pension plans, the benefit obligation is the projected benefit obligation. For OPEB plans, the benefit obligation is the accumulated postretirement benefit obligation. In addition, accounting guidance requires that the total unrecognized costs for defined benefit pension and OPEB plans be recorded as an after-tax charge to Accumulated Other Comprehensive Income (Loss), a separate component of Stockholders' Equity. However, for PSE&G, because the amortization of the unrecognized costs is being collected from customers, the accumulated unrecognized costs are recorded as a Regulatory Asset. The unrecognized costs represent actuarial gains or losses, prior service costs and transition obligations arising from the adoption of the revised accounting guidance for pensions and OPEB, which had not been expensed.

For Power, the charge to Accumulated Other Comprehensive Income (Loss) is amortized and recorded as net periodic pension cost in the Consolidated Statements of Operations. For PSE&G, the Regulatory Asset is amortized and recorded as net periodic pension cost in the Consolidated Statements of Operations.

The following table provides a roll-forward of the changes in the benefit obligation and the fair value of plan assets during each of the two years in the periods ended December 31, 2012 and 2011. It also provides the funded status of the plans and the amounts recognized and amounts not recognized on the Consolidated Balance Sheets at the end of both years.

(A) Includes $827 million ($485 million, after-tax) and $745 million ($438 million, after-tax) in Accumulated Other Comprehensive Loss related to Pension and OPEB as of December 31, 2012 and 2011, respectively.

The pension benefits table above provides information relating to the funded status of all qualified and nonqualified pension plans and OPEB plans on an aggregate basis. As of December 31, 2012, PSEG had funded approximately 83% of its projected benefit obligation. This percentage does not include $ 185 million of assets in the Rabbi Trust as of December 31, 2012, which are used to partially fund the nonqualified pension plans. The fair values of the Rabbi Trust assets are included in the Consolidated Balance Sheets.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Amounts that are expected to be amortized from Accumulated Other Comprehensive Loss, Regulatory Assets and Deferred Assets into Net Periodic Benefit Cost in 2013 are as follows:

	Pension Benefits 2013	Other Benefits 2013
	Millions	
Actuarial (Gain) Loss	$ 188	$ 43
Prior Service Cost	$ (19)	$ (14)

The following assumptions were used to determine the benefit obligations and net periodic benefit costs:

	Pension Benefits			Other Benefits		
	2012	2011	2010	2012	2011	2010
Weighted-Average Assumptions Used to Determine Benefit Obligations as of December 31:						
Discount Rate	4.20%	5.00%	5.51%	4.20%	5.00%	5.50%
Rate of Compensation Increase	4.61%	4.61%	4.61%	4.61%	4.61%	4.61%
Weighted-Average Assumptions Used to Determine Net Periodic Benefit Cost for Years Ended December 31:						
Discount Rate	5.00%	5.40%	5.91%	5.00%	5.38%	5.90%
Expected Return on Plan Assets	8.00%	8.50%	8.50%	8.00%	8.50%	8.50%
Rate of Compensation Increase	4.61%	4.61%	4.61%	4.61%	4.61%	4.61%
Assumed Health Care Cost Trend Rates as of December 31:						
Administrative Expense				3.00%	5.00%	5.00%
Dental Costs				6.00%	6.00%	6.00%
Pre-65 Medical Costs						
Immediate Rate				8.88%	8.00%	7.75%
Ultimate Rate				5.00%	5.00%	5.00%
Year Ultimate Rate Reached				2023	2016	2015
Post-65 Medical Costs						
Immediate Rate				7.98%	8.25%	8.75%
Ultimate Rate				5.00%	5.00%	5.00%
Year Ultimate Rate Reached				2019	2017	2016
Effect of a 1% Increase in the Assumed Rate of Increase in Health Care Benefit Costs:						
				Millions		
Total of Service Cost and Interest Cost				$ 12	$ 11	$ 10
Postretirement Benefit Obligation				$ 180	$ 155	$ 122
Effect of a 1% Decrease in the Assumed Rate of Increase in Health Care Benefit Costs:						
Total of Service Cost and Interest Cost				$ (9)	$ (9)	$ (8)
Postretirement Benefit Obligation				$ (149)	$ (128)	$ (102)

Plan Assets

All the investments of pension plans and OPEB plans are held in a trust account by the trustee and consist of an undivided interest in an investment account of the Master Trust. The investments in the pension and OPEB plans are measured at fair value within a hierarchy that prioritizes the inputs to fair value measurements into three levels. See Note 17. Fair Value Measurements for more information on fair value guidance. Use of the Master Trust permits the commingling of pension plan assets and OPEB plan assets for investment and administrative purposes. Although assets of both plans are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net gain or loss of the investment account to the respective participating plans. The net investment income of the investment assets is allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of the participating

plans. As of December 31, 2012, the pension plan interest and OPEB plan interest in such assets of the Master Trust were approximately 94% and 6%, respectively.

The following tables present information about the investments measured at fair value on a recurring basis as of December 31, 2012 and 2011, including the fair value measurements and the levels of inputs used in determining those fair values.

	Recurring Fair Value Measurements as of December 31, 2012			
Description	**Total**	**Quoted Market Prices for Identical Assets (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
		Millions		
Temporary Investment Funds (A)	$ 67	$ —	$ 67	$ —
Common Stocks (B)

Bonds (C)				
Government (United States & Foreign)	623	—	623	—
Other	691	—	691	—
Private Equity (E)	31	—	—	31
Total	**$ 4,610**	**$ 3,198**	**$ 1,381**	**$ 31**

	Recurring Fair Value Measurements as of December 31, 2011			
Description	**Total**	**Quoted Market Prices for Identical Assets (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
		Millions		
Temporary Investment Funds (A)	$ 32	$ —	$ 32	$ —
Common Stocks (B)				
Commingled—United States	1,653	1,653	—	—
Commingled—International	603	603	—	—
Other	356	356	—	—
Bonds (C)				
Government (United States & Foreign)	662	—	662	—
Other	663	—	663	—
Pooled Real Estate (D)	36	—	—	36
Private Equity (E)	37	—	—	37
Total	**$ 4,042**	**$ 2,612**	**$ 1,357**	**$ 73**

(A) Certain temporary investment funds are valued using inputs such as time-to-maturity, coupon rate, quality rating and current yield (primarily Level 2).

(B) Wherever possible, fair values of equity investments in stocks and in commingled funds are derived from quoted market prices as substantially all of these instruments have active markets (primarily Level 1). Most investments in stocks are priced utilizing the principal market close price or in some cases midpoint, bid or ask price.

(C) Investments in fixed income securities including bond funds are priced using an evaluated pricing approach or the most recent exchange or quoted bid (primarily Level 2).

S1-SSA-0009 - 10740

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(D) The fair value of real estate investments is based on annual independent appraisals. The investments are also valued internally every quarter by the investment managers based on significant changes in property operations and market conditions (primarily Level 3).

(E) Limited partnership interests in private equity funds are valued using significant unobservable inputs as there is little, if any, market activity. In addition, there may be transfer restrictions on private equity securities. The process for determining the fair value of such securities relied on commonly accepted valuation techniques, including the use of earnings multiples based on comparable public securities, industry-specific non-earnings-based multiples and discounted cash flow models. These inputs require significant management judgment or estimation (primarily Level 3).

Reconciliations of the beginning and ending balances of the Pension and OPEB Plans' Level 3 assets for the years ended December 31, 2012 and 2011 follow:

	Balance as of January 1, 2012	Purchases/ (Sales)	Transfer In/ (Out)	Actual Return on Asset Sales	Actual Return on Assets Still Held	Balance as of December 31, 2012
			Millions			
Pooled Real Estate	$ 36	$ (38)	$ —	$ 2	$ —	$ —
Private Equity	$ 37	$ (6)	$ —	$ 5	$ (5)	$ 31

	Balance as of January 1, 2011	Purchases/ (Sales)	Transfer In/ (Out) (A)	Actual Return on Asset Sales	Actual Return on Assets Still Held	Balance as of December 31, 2011
			Millions			
Temporary Investment Funds	$ 23	$ —	$ (23)	$ —	$ —	$ —
Commingled Bonds —United States	$ 8	$ (8)	$ —	$ —	$ —	$ —
Pooled Real Estate	$ 48	$ (18)	$ —	$ 1	$ 5	$ 36
Private Equity	$ 38	$ (5)	$ —	$ 7	$ (3)	$ 37

(A) During the year ended December 31, 2011, $23 million of the temporary investment funds in the Pension and OPEB Fund were transferred from Level 3 to Level 2, due to more observable pricing for the underlying securities. As per PSEG's policy, this transfer was recognized as of the beginning of the first quarter (i.e. the quarter in which the transfer occurred).

The following table provides the percentage of fair value of total plan assets for each major category of plan assets held for the qualified pension and OPEB plans as of the measurement date, December 31:

	As of December 31,	
Investments	**2012**	**2011**
Equity Securities	69%	64%
Fixed Income Securities	29	33
Real Estate Assets	—	1
Other Investments	2	2
Total Percentage	**100%**	**100%**

PSEG utilizes forecasted returns, risk, and correlation of all asset classes in order to develop a portfolio designed to produce the maximum return opportunity per unit of risk. In 2011, PSEG completed its latest asset/liability study. The results from the study indicated that a long-term target asset allocation of 70% equities and 30% fixed income is consistent with the funds' financial objectives. Derivative financial instruments are used by the plans' investment managers primarily to rebalance the fixed

Past financial performance is no guarantee of future results.

income/equity allocation of the portfolio and hedge the currency risk component of foreign investments. The expected long-term rate of return on plan assets was 8.00% as of December 31, 2012 and will remain unchanged for 2013. This expected return was determined based on the study discussed above and considered the plans' historical annualized rate of return since inception, which was an annualized return of 9.3%.

Plan Contributions

PSEG may contribute up to $145 million into its pension plans and $14 million into its OPEB plan for calendar year 2013.

Estimated Future Benefit Payments

The following pension benefit and postretirement benefit payments are expected to be paid to plan participants.

Year	Pension Benefits	Other Benefits
	Millions	
2013	$ 254	$ 79
2014	260	80
2015	267	82
2016	274	84
2017	284	85
2018-2022	1,592	459
Total	**$ 2,931**	**$ 869**

401(k) Plans

PSEG sponsors two 401(k) plans, which are Employee Retirement Income Security Act defined contribution retirement plans. Eligible represented employees of PSEG's subsidiaries participate in the PSEG Employee Savings Plan (Savings Plan), while eligible non-represented employees of PSEG's subsidiaries participate in the PSEG Thrift and Tax-Deferred Savings Plan (Thrift Plan). Eligible employees may contribute up to 50% of their compensation to these plans. PSEG matches 50% of such employee contributions up to 7% of pay for Savings Plan participants and up to 8% of pay for Thrift Plan participants.

The amount paid for employer matching contributions to the plans for PSEG, Power and PSE&G are detailed as follows:

	Thrift Plan and Savings Plan		
	Years Ended December 31,		
	2012	2011	2010
	Millions		
Power	$ 10	$ 8	$ 5
PSE&G	18	14	9
Other	4	2	3
Total Employer Matching Contributions	**$ 32**	**$ 24**	**$ 17**

Note 13. Commitments and Contingent Liabilities

Guaranteed Obligations

Power's activities primarily involve the purchase and sale of energy and related products under transportation, physical, financial and forward contracts at fixed and variable prices. These transactions are with numerous counterparties and brokers that may require cash, cash-related instruments or guarantees.

Power has unconditionally guaranteed payments to counterparties by its subsidiaries in commodity-related transactions in order to

- support current exposure, interest and other costs on sums due and payable in the ordinary course of business, and
- obtain credit.

S1-SSA-0009 - 10742

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Under these agreements, guarantees cover lines of credit between entities and are often reciprocal in nature. The exposure between counterparties can move in either direction.

In order for Power to incur a liability for the face value of the outstanding guarantees, its subsidiaries would have to

- fully utilize the credit granted to them by every counterparty to whom Power has provided a guarantee, and
- all of the related contracts would have to be "out-of-the-money" (if the contracts are terminated, Power would owe money to the counterparties).

Power believes the probability of this result is unlikely. For this reason, Power believes that the current exposure at any point in time is a more meaningful representation of the potential liability under these guarantees. This current exposure consists of the net of accounts receivable and accounts payable and the forward value on open positions, less any collateral posted.

Power is subject to

- counterparty collateral calls related to commodity contracts, and
- certain creditworthiness standards as guarantor under performance guarantees of its subsidiaries.

Changes in commodity prices can have a material impact on collateral requirements under such contracts, which are posted and received primarily in the form of cash and letters of credit. Power also routinely enters into futures and options transactions for electricity and natural gas as part of its operations. These futures contracts usually require a cash margin deposit with brokers, which can change based on market movement and in accordance with exchange rules.

In addition to the guarantees discussed above, Power has also provided payment guarantees to third parties on behalf of its affiliated companies. These guarantees support various other non-commodity related contractual obligations.

The face value of outstanding guarantees, current exposure and margin positions as of December 31, 2012 and 2011 are shown below:

	As of December 31, 2012	As of December 31, 2011
	Millions	
Face Value of Outstanding Guarantees	$ 1,508	$ 1,756
Exposure under Current Guarantees	$ 226	$ 315
Letters of Credit Margin Posted	$ 124	$ 135
Letters of Credit Margin Received	$ 69	$ 91
Cash Deposited and Received		
Counterparty Cash Margin Deposited	$ 15	$ 20
Counterparty Cash Margin Received	$ (4)	$ (7)
Net Broker Balance Deposited (Received)	$ 26	$ (92)
In the Event Power were to Lose its Investment Grade Rating:		
Additional Collateral that could be Required	$ 654	$ 812
Liquidity Available under PSEG's and Power's Credit Facilities to Post Collateral	$ 3,531	$ 3,415
Additional Amounts Posted		
Other Letters of Credit	$ 45	$ 52

As part of determining credit exposure, Power nets receivables and payables with the corresponding net energy contract balances. See Note 16. Financial Risk Management Activities for further discussion. In accordance with PSEG's accounting policy, where it is applicable, cash (received)/deposited is allocated against derivative asset and liability positions with the same counterparty on the face of the Balance Sheet. The remaining balances of net cash (received)/deposited after allocation are generally included in Accounts Payable and Receivable, respectively.

In the event of a deterioration of Power's credit rating to below investment grade, which would represent a two level downgrade from its current S&P ratings or a three level downgrade from its current Moody's and Fitch ratings, many of these agreements allow the counterparty to demand further performance assurance. See table above.

During 2012, the SEC and the Commodity Futures Trading Commission (CFTC) continued efforts to implement new rules to enact stricter regulation over swaps and derivatives. The CFTC has issued Final Rules regarding the definition of a swap dealer

S1-SSA-0009 - 10743

Past financial performance is no guarantee of future results.

and the definition of a swap. However, in September 2012, a federal court vacated the CFTC's rule on monitoring of position limits for several commodities, including natural gas, thereby indefinitely delaying the effectiveness of these position limits rules. The CFTC has appealed the court's decision to vacate the position limits rules. PSEG is carefully monitoring all of these new rules as they are issued to analyze the potential impact on its swap and derivatives transactions, including any potential increase in its collateral requirements.

In addition to amounts for outstanding guarantees, current exposure and margin positions, Power had posted letters of credit to support various other non-energy contractual and environmental obligations. See table above.

Environmental Matters

Passaic River

Historic operations of PSEG companies and the operations of hundreds of other companies along the Passaic and Hackensack Rivers are alleged by Federal and State agencies to have discharged substantial contamination into the Passaic River/Newark Bay Complex.

Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA)

The EPA has determined that an eight-mile stretch of the Passaic River in the area of Newark, New Jersey is a "facility" within the meaning of that term under CERCLA. The EPA has determined the need to perform a study of the entire 17-mile tidal reach of the lower Passaic River.

PSE&G and certain of its predecessors conducted operations at properties in this area on or adjacent to the Passaic River. The properties included one operating electric generating station (Essex Site), which was transferred to Power, one former generating station and four former manufactured gas plant (MGP) sites. When the Essex Site was transferred from PSE&G to Power, PSE&G obtained releases and indemnities for liabilities arising out of the former Essex generating station and Power assumed any environmental liabilities.

The EPA believes that certain hazardous substances were released from the Essex Site and one of PSE&G's former MGP locations (Harrison Site). In 2006, the EPA notified the potentially responsible parties (PRPs) that the cost of its Remedial Investigation and Feasibility Study (RI/FS) would greatly exceed the original estimated cost of $20 million. The total cost of the RI/FS is now estimated at approximately $110 million. Seventy-three PRPs, including Power and PSE&G, agreed to assume responsibility for the RI/FS and formed the Cooperating Parties Group (CPG) to divide the associated costs according to a mutually agreed upon formula. The CPG group, currently 70 members, is presently executing the RI/FS. Approximately five percent of the RI/FS costs are attributable to PSE&G's former MGP sites and approximately one percent to Power's generating stations. Power has provided notice to insurers concerning this potential claim.

In 2007, the EPA released a draft "Focused Feasibility Study" (FFS) that proposed six options to address the contamination cleanup of the lower eight miles of the Passaic River. The EPA estimated costs for the proposed remedy range from $1.3 billion to $3.7 billion. The work contemplated by the FFS is not subject to the cost sharing agreement discussed above. The EPA's revised proposed FFS may be released for public comment as early as April 2013.

In June 2008, an agreement was announced between the EPA and Tierra Solutions, Inc. and Maxus Energy Corporation (Tierra/Maxus) for removal of a portion of the contaminated sediment in the Passaic River at an estimated cost of $80 million. Phase I of the removal work has been completed. Phase II is contingent on the approval of an appropriate sediment disposal facility. Tierra/Maxus have reserved their rights to seek contribution for the removal costs from the other PRPs, including Power and PSE&G.

The EPA has advised that the levels of contaminants at Passaic River mile 10.9 will require removal in advance of the completion of the RI/FS. The CPG members, with the exception of Tierra/Maxus, which are no longer members, have agreed to fund the removal, currently estimated at approximately $30 million. PSEG's share of that effort is approximately three percent.

Except for the Passaic River 10.9 mile removal, Power and PSE&G are unable to estimate their portion of the possible loss or range of loss related to the Passaic River matters.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

New Jersey Spill Compensation and Control Act (Spill Act)

In 2005, the New Jersey Department of Environmental Protection (NJDEP) filed suit against a PRP and its related companies in the New Jersey Superior Court seeking damages and reimbursement for costs expended by the State of New Jersey to address the effects of the PRP's discharge of hazardous substances into both the Passaic River and the balance of the Newark Bay Complex. Power and PSE&G are alleged to have owned, operated or contributed hazardous substances to a total of 11 sites or facilities that impacted these water bodies. In February 2009, third party complaints were filed against some 320 third party defendants, including Power and PSE&G, claiming that each of the third party defendants is responsible for its proportionate share of the clean-up costs for the hazardous substances it allegedly discharged into the Passaic River and the Newark Bay Complex. The third party complaints seek statutory contribution and contribution under the Spill Act to recover past and future removal costs and damages. Power and PSE&G filed answers to the complaints in June 2010. A special master for discovery has been appointed by the court and document production has commenced. In October 2012, the Court issued a 90 day stay of discovery for the third party defendants to explore a possible settlement of this matter with the State of New Jersey. The original stay has been extended, most recently until March 23, 2013, and is likely to be extended again, to permit the parties to continue forward with a settlement process. Power and PSE&G believe they have good and valid defenses to the allegations contained in the third party complaints and will vigorously assert those defenses. Power and PSE&G are unable to estimate their portion of the possible loss or range of loss related to this matter.

Natural Resource Damage Claims

In 2003, the NJDEP directed PSEG, PSE&G and 56 other PRPs to arrange for a natural resource damage assessment and interim compensatory restoration of natural resource injuries along the lower Passaic River and its tributaries pursuant to the Spill Act. The NJDEP alleged that hazardous substances had been discharged from the Essex Site and the Harrison Site. The NJDEP estimated the cost of interim natural resource injury restoration activities along the lower Passaic River at approximately $950 million. In 2007, agencies of the United States Department of Commerce and the United States Department of the Interior sent letters to PSE&G and other PRPs inviting participation in an assessment of injuries to natural resources that the agencies intended to perform. In 2008, PSEG and a number of other PRPs agreed to share certain immaterial costs the trustees have incurred and will incur going forward, and to work with the trustees to explore whether some or all of the trustees' claims can be resolved in a cooperative fashion. That effort is continuing. PSE&G is unable to estimate its portion of the possible loss or range of loss related to this matter.

Newark Bay Study Area

The EPA has established the Newark Bay Study Area, which it defines as Newark Bay and portions of the Hackensack River, the Arthur Kill and the Kill Van Kull. In August 2006, the EPA sent PSEG and 11 other entities notices that it considered each of the entities to be a PRP with respect to contamination in the Study Area. The notice letter requested that the PRPs fund an EPA-approved study in the Newark Bay Study Area and encouraged the PRPs to contact Occidental Chemical Corporation (OCC) to discuss participating in the Remedial Investigation/Feasibility Study that OCC was conducting. The notice stated the EPA's belief that hazardous substances were released from sites owned by PSEG companies and located on the Hackensack River, including two operating electric generating stations (Hudson and Kearny sites) and one former MGP site. PSEG has participated in and partially funded the second phase of this study. Notices to fund the next phase of the study have been received but it is uncertain at this time whether the PSEG companies will consent to fund the third phase. Power and PSE&G are unable to estimate their portion of the possible loss or range of loss related to this matter.

MGP Remediation Program

PSE&G is working with the NJDEP to assess, investigate and remediate environmental conditions at its former MGP sites. To date, 38 sites requiring some level of remedial action have been identified. Based on its current studies, PSE&G has determined that the estimated cost to remediate all MGP sites to completion could range between $588 million and $675 million through 2021. Since no amount within the range is considered to be most likely, PSE&G has recorded a liability of $588 million as of December 31, 2012. Of this amount, $113 million was recorded in Other Current Liabilities and $475 million was reflected as Environmental Costs in Noncurrent Liabilities. PSE&G has recorded a $588 million Regulatory Asset with respect to these costs. PSE&G periodically updates its studies taking into account any new regulations or new information which could impact future remediation costs and adjusts its recorded liability accordingly.

Prevention of Significant Deterioration (PSD)/New Source Review (NSR)

The PSD/NSR regulations, promulgated under the Clean Air Act (CAA), require major sources of certain air pollutants to obtain permits, install pollution control technology and obtain offsets, in some circumstances, when those sources undergo a "major modification," as defined in the regulations. The federal government may order companies that are not in compliance with the PSD/NSR regulations to install the best available control technology at the affected plants and to pay monetary penalties ranging from $25,000 to $37,500 per day for each violation, depending upon when the alleged violation occurred.

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

In 2009, the EPA issued a notice of violation to Power and the other owners of the Keystone coal-fired plant in Pennsylvania, alleging, among other things, that various capital improvement projects were completed at the plant which are considered modifications (or major modifications) causing significant net emission increases of PSD/NSR air pollutants, beginning in 1985 for Keystone Unit 1 and in 1984 for Keystone Unit 2. The notice of violation states that none of these modifications underwent PSD/NSR permitting process prior to being put into service, which the EPA alleges was required under the CAA. The notice of violation states that the EPA may issue an order requiring compliance with the relevant CAA provisions and may seek injunctive relief and/or civil penalties. Power owns approximately 23% of the plant. Power cannot predict the outcome of this matter.

Hazardous Air Pollutants Regulation

In accordance with a ruling of the U.S. Court of Appeals of the District of Columbia (Court of Appeals), the EPA published a Maximum Achievable Control Technology (MACT) regulation on February 16, 2012. These Mercury Air Toxics Standards (MATS) are scheduled to go into effect on April 16, 2015 and establish allowable emission levels for mercury as well as other hazardous air pollutants pursuant to the CAA. In February 2012, members of the electric generating industry filed a petition challenging the existing source National Emission Standard for Hazardous Air Pollutants (NESHAP), new source NESHAP and the New Source Performance Standard (NSPS). In March 2012, PSEG filed a motion to intervene with the Court of Appeals in support of the EPA's implementation of MATS. Litigation of these matters remains pending and the impact on the implementation schedule is unknown at this time.

Power believes that it will not be necessary to install any material controls at its other New Jersey facilities. Additional controls may be necessary at Power's Bridgeport Harbor coal-fired unit at an immaterial cost. In December 2011, to comply with the MACT regulators, a decision was reached to upgrade the previously planned two flue gas desulfurization scrubbers and install Selective Catalytic Reduction (SCR) systems at Power's jointly owned coal-fired generating facility at Conemaugh in Pennsylvania. This installation is expected to be completed in the first quarter of 2015. Power's share of this investment is approximately $147 million.

NOx Regulation

In April 2009, the NJDEP finalized revisions to NO_x emission control regulations that impose new NO_x emission reduction requirements and limits for New Jersey fossil fuel-fired electric generation units. The rule has an impact on Power's generation fleet, as it imposes NO_x emissions limits that will require capital investment for controls or the retirement of up to 86 combustion turbines (approximately 1,750 MW) and four older New Jersey steam electric generation units (approximately 400 MW) by May 30, 2015. Retirement notifications for the combustion turbines, except for Salem Unit 3, have been filed with PJM. The Salem Unit 3 combustion turbine (38 MW) will be transitioning to an emergency generator. Evaluations are ongoing for the steam electric generation units.

Under current Connecticut regulations, Power's Bridgeport and New Haven facilities have been utilizing Discrete Emission Reduction Credits (DERCs) to comply with certain NO_x emission limitations that were incorporated into the facilities' operating permits. In 2010, Power negotiated new agreements with the State of Connecticut extending the continued use of DERCs for certain emission units and equipment until May 31, 2014.

Clean Water Act Permit Renewals

Pursuant to the Federal Water Pollution Control Act (FWPCA), National Pollutant Discharge Elimination System (NPDES) permits expire within five years of their effective date. In order to renew these permits, but allow a plant to continue to operate, an owner or operator must file a permit application no later than six months prior to expiration of the permit. States with delegated federal authority for this program manage these permits. The New Jersey Department of Environmental Protection manages the permits under the New Jersey Pollutant Discharge Elimination System (NJPDES) program. Connecticut and New York also have permits to manage their respective pollutant discharge elimination system programs.

One of the most significant NJPDES permits governing cooling water intake structures at Power is for Salem. In 2001, the NJDEP issued a renewed NJPDES permit for Salem, expiring in July 2006, allowing for the continued operation of Salem with its existing cooling water intake system. In February 2006, Power filed with the NJDEP a renewal application allowing Salem to continue operating under its existing NJPDES permit until a new permit is issued. Power prepared its renewal application in accordance with the FWPCA Section 316(b) and the 316(b) rules published in 2004.

As a result of several legal challenges to the 2004 316(b) rule by certain northeast states, environmentalists and industry groups, the rule has been suspended and has been returned to the EPA to be consistent with a 2009 United States Supreme Court decision which concluded that the EPA could rely upon cost-benefit analysis in setting the national performance standards and in providing for cost-benefit variances from those standards as part of the Phase II regulations.

In late 2010, the EPA entered into a settlement agreement with environmental groups that established a schedule to develop a new 316(b) rule by July 27, 2012. In April 2011, the EPA published a new proposed rule which did not establish any particular technology as the best technology available (e.g. closed cycle cooling). Instead, the proposed rule established marine life

Past financial performance is no guarantee of future results.

mortality standards for existing cooling water intake structures with a design flow of more than two million gallons per day. In June 2012, the EPA posted two Notices of Data Availability (NODA) requesting comment on aspects of the April 2011 proposed rule. In July 2012, PSEG and industry trade associations submitted comments on both NODAs and the EPA and environmental groups agreed to delay the deadline for finalization of the Rule to June 27, 2013 to allow for more time to address public comments and analyze data submitted in response to the NODAs.

Power is unable to predict the outcome of this proposed rulemaking, the final form that the proposed regulations may take and the effect, if any, that they may have on its future capital requirements, financial condition, results of operations or cash flows. The results of further proceedings on this matter could have a material impact on Power's ability to renew permits at its larger once-through cooled plants, including Salem, Hudson, Mercer, Bridgeport and possibly Sewaren and New Haven, without making significant upgrades to existing intake structures and cooling systems. The costs of those upgrades to one or more of Power's once-through cooled plants would be material, and would require economic review to determine whether to continue operations at these facilities. For example, in Power's application to renew its Salem permit, filed with the NJDEP in February 2006, the estimated costs for adding cooling towers for Salem were approximately $1 billion, of which Power's share would have been approximately $575 million. These cost estimates have not been updated. Currently, potential costs associated with any closed cycle cooling requirements are not included in Power's forecasted capital expenditures.

Capital Expenditures

The construction programs of PSEG and its subsidiaries are currently estimated to include a base level total investment of approximately $6.1 billion for the three years ended 2015. The three year capital expenditures for PSEG, Power and PSE&G are as follows:

	2013	2014	2015
		Millions	
Power	$ 400	$ 365	$ 305
PSE&G	2,040	1,680	1,180
Other	95	40	30
Total PSEG	**$ 2,535**	**$ 2,085**	**$ 1,515**

Power's projected capital expenditures include baseline maintenance, investments in response to environmental or legal mandates and nuclear expansion. PSE&G's projections include material additions and replacements in its transmission and distribution systems to meet expected growth and manage reliability.

Basic Generation Service (BGS) and Basic Gas Supply Service (BGSS)

PSE&G obtains its electric supply requirements for customers who do not purchase electric supply from third party suppliers through the annual New Jersey BGS auctions. Pursuant to applicable BPU rules, PSE&G enters into the Supplier Master Agreement with the winners of these BGS auctions following the BPU's approval of the auction results. PSE&G has entered into contracts with Power, as well as with other winning BGS suppliers, to purchase BGS for PSE&G's load requirements. The winners of the auction (including Power) are responsible for fulfilling all the requirements of a PJM Load Serving Entity including the provision of capacity, energy, ancillary services, transmission and any other services required by PJM. BGS suppliers assume all volume risk and customer migration risk and must satisfy New Jersey's renewable portfolio standards.

Power seeks to mitigate volatility in its results by contracting in advance for the sale of most of its anticipated electric output as well as its anticipated fuel needs. As part of its objective, Power has entered into contracts to directly supply PSE&G and other New Jersey electric distribution companies (EDCs) with a portion of their respective BGS requirements through the New Jersey BGS auction process, described above.

PSE&G has contracted for its anticipated BGS-Fixed Price eligible load, as follows:

	Auction Year				
	2010	2011	2012	2013	
36-Month Terms Ending	May 2013	May 2014	May 2015	May 2016	(A)
Load (MW)	2,800	2,800	2,900	2,800	
$ per kWh	0.09577	0.09430	0.08388	0.09218	

(A) Prices set in the 2013 BGS auction will become effective on June 1, 2013 when the 2010 BGS auction agreements expire.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

PSE&G has a full requirements contract with Power to meet the gas supply requirements of PSE&G's gas customers. Power has entered into hedges for a portion of these anticipated BGSS obligations, as permitted by the BPU. The BPU permits PSE&G to recover the cost of gas hedging up to 115 billion cubic feet or 80% of its residential gas supply annual requirements through the BGSS tariff. Current plans call for Power to hedge on behalf of PSE&G approximately 70 billion cubic feet or 50% of its residential gas supply annual requirements. For additional information, see Note 23. Related-Party Transactions.

Minimum Fuel Purchase Requirements

Power has various long-term fuel purchase commitments for coal through 2017 to support its fossil generation stations and for supply of nuclear fuel for the Salem, Hope Creek and Peach Bottom nuclear generating stations and for firm transportation and storage capacity for natural gas.

Power's strategy is to maintain certain levels of uranium and to make periodic purchases to support such levels. As such, the commitments referred to in the following table may include estimated quantities to be purchased that deviate from contractual nominal quantities. Power's nuclear fuel commitments cover approximately 100% of its estimated uranium, enrichment and fabrication requirements through 2015 and a portion through 2017 at Salem, Hope Creek and Peach Bottom.

Power's various multi-year contracts for firm transportation and storage capacity for natural gas are primarily used to meet its gas supply obligations to PSE&G. These purchase obligations are consistent with Power's strategy to enter into contracts for its fuel supply in comparable volumes to its sales contracts.

As of December 31, 2012, the total minimum purchase requirements included in these commitments were as follows:

Fuel Type	Power's Share of Commitments through 2017
	Millions
Nuclear Fuel	
Uranium	$ 518
Enrichment	$ 453
Fabrication	$ 146
Natural Gas	$ 939
Coal	$ 555

Regulatory Proceedings

New Jersey Clean Energy Program

In 2008, the BPU approved funding requirements for each New Jersey EDC applicable to its Renewable Energy and Energy Efficiency programs for the years 2009 to 2012. In late 2012, the BPU approved additional funding requirements for these programs for the first half of 2013. The aggregate funding for the first half of 2013 is $195 million. PSE&G's share is $153 million which it recorded as a current liability as of December 31, 2012. The liability is reduced as normal payments are made. The liability has been recorded with an offsetting Regulatory Asset, since the costs associated with this program are recovered from PSE&G ratepayers through the SBC.

The BPU has started a new Comprehensive Resource Analysis proceeding to determine SBC funding for the years 2013-2016. The proceeding has no impact on current SBC assessments.

Long-Term Capacity Agreement Pilot Program (LCAPP)

In 2011, New Jersey enacted the LCAPP Act that resulted in the selection of three generators to build a total of approximately 2,000 MW of new combined-cycle generating facilities located in New Jersey. Each of the New Jersey EDCs, including PSE&G, was directed to execute a standard offer capacity agreement (SOCA) with the three selected generators, but did so under protest preserving their legal rights. The SOCA provides for the EDCs to guarantee specified annual capacity payments to the generators subject to the terms and conditions of the agreement. Legal challenges to the BPU's implementation of the LCAPP Act were filed in New Jersey appellate court and this appeal is pending. In addition, the LCAPP Act itself has been challenged on constitutional grounds in federal court.

In May 2012, two of the three generators cleared the Reliability Pricing Model auction for the 2015/2016 delivery year in the aggregate notional amount of approximately 1,300 MW of installed capacity. SOCA payments are for a 15 year term, which are scheduled to commence for one of the generators in the 2015/2016 delivery year and for the other generator in the 2016/2017

S1-SSA-0009 - 10748

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

delivery year. Based upon the expected percentage of state load that PSE&G will be serving during the term of these contracts, PSE&G would be responsible for approximately 52% or 676 MW of this amount.

Under current accounting guidance, the current estimated fair value of the SOCAs is recorded as a Derivative Asset or Liability with an offsetting Regulatory Asset or Liability on PSE&G's Consolidated Balance Sheets. See Note 17. Fair Value Measurements for additional information.

Superstorm Sandy

In late October 2012, Superstorm Sandy caused severe damage to PSE&G's transmission and distribution system throughout its service territory as well as to some of Power's generation infrastructure in the northern part of New Jersey. Strong winds resulted in a storm surge that caused damage to switching stations, substations and generating infrastructure.

As of December 31, 2012, Power had incurred approximately $85 million in costs related to Superstorm Sandy, primarily comprised of repairs at certain generating stations and damage to materials and supplies, both at our fossil fleet. All the costs were recognized in Operation and Maintenance Expense, offset by $19 million of a pending future recovery of insurance proceeds. Power expects that it will incur additional future costs, primarily relating to repairs to, and replacement of, equipment and property, which could be material.

As of December 31, 2012, PSE&G had incurred approximately $295 million of costs to restore service to PSE&G's distribution and transmission systems and $5 million to repair its infrastructure and return it to pre-storm conditions. Of the costs incurred, approximately $40 million was recognized in Operation and Maintenance Expense, $75 million was recorded as Property, Plant and Equipment and $180 million was recorded as a Regulatory Asset because such costs were deferred as approved by the BPU under an Order received in December 2012. PSE&G recognized $6 million of insurance proceeds.

PSEG maintains insurance coverage against loss or damage to plants and certain properties, subject to certain exceptions, to the extent such property is usually insured and insurance is available at a reasonable cost. PSEG is seeking recovery from its insurers for the property damage, above its self-insured retentions; however, no assurances can be given relative to the timing or amount of such recovery. PSEG received an authorization for $25 million from its insurance carriers as an advance payment which was recorded in 2012. PSEG believes that additional insurance recoveries are not estimable as of December 31, 2012. PSEG is at the early stages of documenting its insurance claim which then will need to be submitted to and reviewed by its insurers. PSEG does not believe that it has a basis for estimating additional probable insurance recoveries at this time.

Leveraged Lease Investments

On January 31, 2012, PSEG entered into a specific matter closing agreement with the Internal Revenue Service (IRS) settling all matters related to cross border lease transactions. This agreement settles the leasing dispute with finality for all tax periods in which PSEG realized tax deductions from these transactions. On January 31, 2012, PSEG also signed a Form 870-AD settlement agreement covering all audit issues for tax years 1997 through 2003. On March 26, 2012, PSEG executed a Form 870-AD settlement agreement covering all audit issues for tax years 2004 through 2006. These two agreements conclude ten years of audits for PSEG and the leasing issue for all tax years. For PSEG, the impact of these agreements is an increase in financial statement Income Tax Expense of approximately $175 million. In prior periods, PSEG had established financial statement tax liabilities for uncertain tax positions in the amount of $246 million with respect to these tax years. Accordingly, the settlement resulted in a net $71 million decrease in the Income Tax Expense of PSEG.

Cash Impact

For tax years 1997 through 2003, the tax and interest PSEG owes the IRS as a result of this settlement will be reduced by the $320 million PSEG has on deposit with the IRS for this matter. PSEG paid a net deficiency for these years of approximately $4 million during the second quarter of 2012. Based upon the closing agreement and the Form 870-AD for tax years 2004 through 2006, PSEG owes the IRS approximately $620 million in tax and interest for tax years from 2004 through 2006. Based on the settlement of the leasing dispute, for tax years 2007 through 2010, the IRS owes PSEG approximately $676 million. PSEG has filed amended returns for tax years 2007-2010 reflecting the impact of the settlement. These returns have been audited by the IRS and accepted as filed. As required by statute, the IRS presented the refund claim to the Joint Committee on Taxation for approval. On October 16, 2012, PSEG was notified that the Joint Committee took no exception to the refund claim. The IRS is now processing those claims and preparing interest computations. In spite of the progress noted above, it is still possible that PSEG would have to pay $620 million over the next year to the IRS and wait while the IRS processes the $676 million refund claim in the normal course; it could take several years for the IRS to process these claims. In addition to the above, PSEG will claim a tax deduction for the accrued deficiency interest associated with this settlement in 2012, which will give rise to a cash tax savings of approximately $100 million.

Nuclear Insurance Coverages and Assessments

Power is a member of an industry mutual insurance company, Nuclear Electric Insurance Limited (NEIL), which provides the primary property and decontamination liability insurance at Salem, Hope Creek and Peach Bottom. NEIL also provides excess

S1-SSA-0009 - 10749

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

property insurance through its decontamination liability, decommissioning liability and excess property policy and replacement power coverage through its accidental outage policy. NEIL policies may make retrospective premium assessments in case of adverse loss experience. Power's maximum potential liabilities under these assessments are included in the table and notes below. Certain provisions in the NEIL policies provide that the insurer may suspend coverage with respect to all nuclear units on a site without notice if the NRC suspends or revokes the operating license for any unit on that site, issues a shutdown order with respect to such unit or issues a confirmatory order keeping such unit down.

The American Nuclear Insurers (ANI) and NEIL policies both include coverage for claims arising out of acts of terrorism. NEIL makes a distinction between certified and non-certified acts of terrorism, as defined under the Terrorism Risk Insurance Act (TRIA), and thus its policies respond accordingly. For non-certified acts of terrorism, NEIL policies are subject to an industry aggregate limit of $3.2 billion plus any amounts available through reinsurance or indemnity for non-certified acts of terrorism. For any act of terrorism, Power's nuclear liability policies will respond similarly to other covered events. For certified acts, Power's nuclear property NEIL policies will respond similarly to other covered events.

The Price-Anderson Act sets the "limit of liability" for claims that could arise from an incident involving any licensed nuclear facility in the United States The "limit of liability" is based on the number of licensed nuclear reactors and is adjusted at least every five years based on the Consumer Price Index. The current "limit of liability" is $12.6 billion. All owners of nuclear reactors, including Power, have provided for this exposure through a combination of private insurance and mandatory participation in a financial protection pool as established by the Price-Anderson Act. Under the Price-Anderson Act, each party with an ownership interest in a nuclear reactor can be assessed its share of $118 million per reactor per incident, payable at $18 million per reactor per incident per year. If the damages exceed the "limit of liability," the President is to submit to Congress a plan for providing additional compensation to the injured parties. Congress could impose further revenue-raising measures on the nuclear industry to pay claims. Power's maximum aggregate assessment per incident is $370 million (based on Power's ownership interests in Hope Creek, Peach Bottom and Salem) and its maximum aggregate annual assessment per incident is $55 million. Further, a decision by the U.S. Supreme Court, not involving Power, has held that the Price-Anderson Act did not preclude awards based on state law claims for punitive damages.

Power's insurance coverages and maximum retrospective assessments for its nuclear operations are as follows:

Type and Source of Coverages	Total Site Coverage		Retrospective Assessments
	Millions		
Public and Nuclear Worker Liability (Primary Layer):			
ANI	$ 375	(A)	$ —
Nuclear Liability (Excess Layer):			
Price-Anderson Act	12,219	(B)	370
Nuclear Liability Total	**$ 12,594**	(C)	**$ 370**
Property Damage (Primary Layer):			
NEIL Primary (Salem/Hope Creek/Peach Bottom)	$ 500		$ 22
Property Damage (Excess Layers):			
NEIL II (Salem/Hope Creek/Peach Bottom)	750		8
NEIL Blanket Excess (Salem/Hope Creek/Peach Bottom)	850	(D)	5
Property Damage Total (Per Site)	**$ 2,100**		**$ 35**
Accidental Outage:			
NEIL I (Peach Bottom)	$ 245	(E)	$ 6
NEIL I (Salem)	281	(E)	7
NEIL I (Hope Creek)	490	(E)	6
Replacement Power Total	**$ 1,016**		**$ 19**

(A) The primary limit for Public Liability is a per site aggregate limit with no potential for assessment. The Nuclear Worker Liability represents the potential liability from workers claiming exposure to the hazard of nuclear radiation. This coverage is subject to an industry aggregate limit that is subject to reinstatement at ANI discretion.

(B) Retrospective premium program under the Price-Anderson Act liability provisions of the Atomic Energy Act of 1954, as amended. Power is subject to retrospective assessment with respect to loss from an incident at any licensed nuclear reactor in the United States that produces greater than 100 MW of electrical power. This retrospective assessment can be adjusted for inflation every five years. The last adjustment was effective as of October 29, 2008. The next

S1-SSA-0009 - 10750

Past financial performance is no guarantee of future results.

adjustment is due on or before October 29, 2013. This retrospective program is in excess of the Public and Nuclear Worker Liability primary layers.

(C) Limit of liability under the Price-Anderson Act for each nuclear incident.

(D) For property limits in excess of $1.25 billion, Power participates in a Blanket Limit policy where the $850 million limit is shared by Power with Exelon Generation among the Braidwood, Byron, Clinton, Dresden, La Salle, Limerick, Oyster Creek, Quad Cities, TMI-1 facilities owned by Exelon Generation and the Peach Bottom, Salem and Hope Creek facilities. This limit is not subject to reinstatement in the event of a loss. Participation in this program materially reduces Power's premium and the associated potential assessment.

(E) Peach Bottom has an aggregate indemnity limit based on a weekly indemnity of $2.3 million for 52 weeks followed by 80% of the weekly indemnity for 68 weeks. Salem has an aggregate indemnity limit based on a weekly indemnity of $2.5 million for 52 weeks followed by 80% of the weekly indemnity for 75 weeks. Hope Creek has an aggregate indemnity limit based on a weekly indemnity of $4.5 million for 52 weeks followed by 80% of the weekly indemnity for 71 weeks.

Minimum Lease Payments

Power, PSE&G and Energy Holdings have entered into various operating leases. The total future minimum payments of these operating leases as of December 31, 2012 are:

	PSEG	Power	PSE&G	Energy Holdings

(A) PSEG entered into various interest rate swaps to hedge the fair value of certain debt at Power. The fair value adjustments from these hedges are reflected as offsets to long-term debt on the Consolidated Balance Sheet. For additional information, see Note 16. Financial Risk Management Activities.

(B) In September 2009, Power completed an exchange offer with eligible holders of Energy Holdings' 8.50% Senior Notes due 2011 in order to manage long-term debt maturities. Since the debt exchange was between two subsidiaries of the same parent company, PSEG, and treated as a debt modification for accounting purposes, the resulting premium was deferred and is being amortized over the term of the newly issued debt. The deferred amount is reflected as an offset to Long-Term Debt on PSEG's Consolidated Balance Sheet.

(C) The Pennsylvania Economic Development Authority (PEDFA) bond and The Pollution Control Financing Authority of Salem County bonds for Power and PSE&G, respectively, are variable rate bonds that are in weekly reset mode.

(D) Secured by essentially all property of PSE&G pursuant to its First and Refunding Mortgage.

(E) Non-recourse financing transactions consist of loans from banks and other lenders that are typically secured by project assets and cash flows and generally impose no material obligation on the parent-level investor to repay any debt incurred by the project borrower. The consequences of permitting a project-level default include the potential for loss of any invested equity by the parent.

Past financial performance is no guarantee of future results.

(F) As a result of the Dynegy bankruptcy proceedings, Energy Holdings ceased leveraged lease accounting and recorded the related nonrecourse project debt on its balance sheet at its fair value of $50 million. Upon settlement of the claims against Dynegy in 2012, Energy Holdings was released from this debt.

Long-Term Debt Maturities

The aggregate principal amounts of maturities for each of the five years following December 31, 2012 are as follows:

		PSE&G			Energy Holdings	
Year	Power	PSE&G	Transition Funding	Transition Funding II	Non-Recourse Debt	Total
				Millions		
2013	$ 300	$ 725	$ 214	$ 12	$ 1	$ 1,252
2014	44	500	225	12	1	782
2015	300	300	251	8	17	876
2016	553	171	—	—	7	731
2017	—	—	—	—	1	1
Thereafter	1,156	3,108	—	—	17	4,281
Total	**$ 2,353**	**$ 4,804**	**$ 690**	**$ 32**	**$ 44**	**$ 7,923**

Long-Term Debt Financing Transactions

During 2012, PSEG and its subsidiaries had the following Long-Term Debt issuances, maturities and redemptions:

Power

- redeemed $250 million of 5.00% Senior Notes due April 1, 2014,
- redeemed and retired Pollution Control Notes servicing and securing $98 million of tax-exempt financings, including $14 million of 5.50% York County Industrial Development Authority Pollution Control Revenue Refunding Bonds due September 1, 2020; $19 million of 5.85% Indiana County Industrial Development Authority Pollution Control Revenue Refunding Bonds due June 1, 2027; $25 million of 5.75% Pollution Control Financing Authority of Salem County Pollution Control Revenue Refunding Bonds due April 1, 2031; and $40 million of 5.75% Connecticut Development Authority Solid Waste Disposal Facility Revenue Bonds due November 1, 2037,
- paid $66 million of 5.00% Pollution Control Revenue Refunding Notes at maturity, and
- paid cash dividends of $600 million to PSEG.

PSE&G

- remarketed $50 million of weekly-reset variable rate demand bonds of the Pollution Control Financing Authority of Salem County due November 1, 2033, which are serviced and secured by PSE&G's First and Refunding Mortgage Bonds of like tenor,
- paid $300 million of 5.13% Secured Medium-Term Notes at maturity,
- issued $350 million of 3.65% Secured Medium-Term Notes, Series H due September 2042,
- refinanced at par $50 million of 5.45% fixed rate Pollution Control Financing Authority of Salem County Authority Bonds due February 1, 2032, which were serviced and secured by PSE&G's First and Refunding Mortgage Bonds of like tenor, with $50 million of weekly-reset variable rate demand bonds due April 1, 2046, which are serviced and secured by PSE&G's First and Refunding Mortgage Bonds of like tenor,
- redeemed and retired at par $23 million of 5.20% fixed rate Pollution Control Financing Authority of Salem County Authority Bonds due March 1, 2025, which were serviced and secured by PSE&G's First and Refunding Mortgage Bonds of like tenor,
- issued $450 million of 3.95% Secured Medium-Term Notes, Series H due May 2042,
- paid $205 million of Transition Funding's securitization debt, and

- paid $11 million of Transition Funding II's securitization debt.

Energy Holdings

- was released from $50 million of nonrecourse project debt related to the Dynegy Leases, and
- paid cash dividends of $500 million to PSEG.

PSE&G

In January 2013, PSE&G issued $400 million of 3.80% Secured Medium-Term Notes, Series H, due January 2043, and paid $150 million of 5.00% Secured Medium-Term Notes, at maturity.

Short-Term Liquidity

PSEG meets its short-term liquidity requirements primarily through the issuance of commercial paper. PSE&G maintains its own separate commercial paper program to meet its short-term liquidity requirements. Both commercial paper programs are fully back-stopped by their own separate credit facilities.

The commitments under our credit facilities are provided by a diverse bank group. As of December 31, 2012, no single institution represented more than 8% of the total commitments in our credit facilities.

As of December 31, 2012, our total credit capacity was in excess of our anticipated maximum liquidity requirements.

Each of our credit facilities is restricted as to availability and use to the specific companies as listed below; however, if necessary, the PSEG facilities can also be used to support our subsidiaries' liquidity needs. Our total credit facilities and available liquidity as of December 31, 2012 were as follows:

	As of December 31, 2012			
Company/Facility	Total Facility	Usage	Available Liquidity	Expiration Date	Primary Purpose
	Millions				
PSEG					
5-year Credit Facility	$ 500	$ 4 (A)	$ 496	Mar 2017	Commercial Paper (CP) Support/Funding/Letters of Credit
5-year Credit Facility	500	—	500	Apr 2016	CP Support/Funding/Letters of Credit
Total PSEG	**$ 1,000**	**$ 4**	**$ 996**		
Power					
5-year Credit Facility	$ 1,600	$ 65 (A)	$ 1,535	Mar 2017	Funding/Letters of Credit
5-year Credit Facility	1,000	—	1,000	Apr 2016	Funding/Letters of Credit
Bilateral Credit Facility	100	100 (A)	—	Sept 2015	Letters of Credit
Total Power	**$ 2,700**	**$ 165**	**$ 2,535**		
PSE&G					
5-year Credit Facility	$ 600	$ 276 (B)	$ 324	Apr 2016	CP Support/Funding/Letters of Credit
Total PSE&G	**$ 600**	**$ 276**	**$ 324**		
Total	**$ 4,300**	**$ 445**	**$ 3,855**		

(A) Includes amounts related to letters of credit outstanding.
(B) Includes amounts related to CP and letters of credit outstanding

Fair Value of Debt

The estimated fair values were determined using the market quotations or values of instruments with similar terms, credit ratings, remaining maturities and redemptions as of December 31, 2012 and 2011. See Note 17. Fair Value Measurements for more information on fair value guidance and the hierarchy that prioritizes the inputs to fair value measurements into three levels.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

	December 31, 2012		December 31, 2011	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	Millions			
Long-Term Debt:				
PSEG (Parent) (A)	$ 38	$ 57	$ 39	$ 62
Power -Recourse Debt (B)	2,340	2,818	2,751	3,158
PSE&G (B)	4,795	5,606	4,270	4,905
Transition Funding (PSE&G) (B)	690	765	895	1,016
Transition Funding II (PSE&G) (B)	32	34	44	47
Energy Holdings:				
Project Level, Non-Recourse Debt (C)	44	44	95	95
	$ 7,939	**$ 9,324**	**$ 8,094**	**$ 9,283**

(A) Fair value represents net offsets to debt resulting from adjustments from interest rate swaps entered into to hedge certain debt at Power. Carrying amount represents such fair value reduced by the unamortized premium resulting from a debt exchange entered into between Power and Energy Holdings.

(B) The debt fair valuation is based on the present value of each bond's future cash flows. The discount rates used in the present value analysis are based on an estimate of new issue bond yields across the treasury curve. When a bond has embedded options, an interest rate model is used to reflect the impact of interest rate volatility into the analysis (primarily Level 2 measurements).

(C) Fair value amounts as of December 31, 2011 include $50 million of non-recourse project debt related to Dynegy which is classified as a Level 3 measurement. As of the June 5, 2012, the effective date of the amended settlement agreement, the $50 million of Notes Payable was written off. See the Fair Value Option Section of Note 17. Fair Value Measurements for additional information. Non-recourse project debt of $44 million is valued as equivalent to the amortized cost and is classified as a Level 3 measurement.

Note 15. Schedule of Consolidated Capital Stock

	As of December 31,			
	Outstanding Shares		Book Value	
	2012	2011	2012	2011
			Millions	
PSEG Common Stock (no par value) (A)				
Authorized 1,000,000,000 shares	505,892,472	505,945,286	$ 4,226	$ 4,222

(A) PSEG did not issue any new shares under the Dividend Reinvestment and Stock Purchase Plan (DRASPP) and the Employee Stock Purchase Plan (ESPP) in 2012 or 2011. Total authorized and unissued shares of common stock available for issuance through PSEG's DRASPP, ESPP and various employee benefit plans amounted to 7 million shares as of December 31, 2012.

As of December 31, 2012, there was an aggregate of 7.5 million shares of $100 par value and 10 million shares of $25 par value Cumulative Preferred Stock, which were authorized and unissued and which, upon issuance, may or may not provide for mandatory sinking fund redemption.

Note 16. Financial Risk Management Activities

The operations of PSEG, Power and PSE&G are exposed to market risks from changes in commodity prices, interest rates and equity prices that could affect their results of operations and financial condition. Exposure to these risks is managed through normal operating and financing activities and, when appropriate, through hedging transactions. Hedging transactions use derivative instruments to create a relationship in which changes to the value of the assets, liabilities or anticipated transactions exposed to market risks are expected to be offset by changes in the value of these derivative instruments.

Commodity Prices

The availability and price of energy commodities are subject to fluctuations due to weather, environmental policies, changes in supply and demand, state and federal regulatory policies, market conditions, transmission availability and other events. Power uses physical and financial transactions in the wholesale energy markets to mitigate the effects of adverse movements in fuel and electricity prices. Derivative contracts that do not qualify for hedge accounting or normal purchases/normal sales treatment are MTM with changes in fair value recorded in the income statement. The fair value for the majority of these contracts is obtained from quoted market sources. Modeling techniques using assumptions reflective of current market rates, yield curves and forward prices are used to interpolate certain prices when no quoted market exists.

Cash Flow Hedges

Power uses forward sale and purchase contracts, swaps and futures contracts to hedge

- forecasted energy sales from its generation stations and the related load obligations,
- the price of fuel to meet its fuel purchase requirements, and
- certain forecasted natural gas sales and purchases made to support the BGSS contract with PSE&G.

These derivative transactions are designated and effective as cash flow hedges. During the second quarter of 2012, Power de-designated certain of its commodity derivative transactions that had previously qualified as cash flow hedges as they were deemed to no longer be highly effective as required by the relevant accounting guidance. As a result, since June 1, 2012, Power recognizes all gains and losses from changes in the fair value of these derivatives immediately in earnings rather than deferring any such amounts in Accumulated Other Comprehensive Income (Loss). The fair values of Power's de-designated hedges were frozen in Accumulated Other Comprehensive Income (Loss) as the original forecasted transactions are still expected to occur and are reclassified into earnings as the original derivative transactions settle.

As of December 31, 2012 and 2011, the fair value and the impact on Accumulated Other Comprehensive Income (Loss) associated with accounting hedge activity was as follows:

	As of December 31,	
	2012	2011
	Millions	
Fair Value of Cash Flow Hedges	$ 3	$ 57
Impact on Accumulated Other Comprehensive Income (Loss) (after tax)	$ 9	$ 33

The expiration date of the longest-dated cash flow hedge at Power is in 2014. Power's after-tax unrealized gains on these derivatives that are expected to be reclassified to earnings during the next 12 months are $ 8 million. There was no ineffectiveness associated with qualifying hedges as of December 31, 2012.

Trading Derivatives

The primary purpose of Power's wholesale marketing operation is to optimize the value of the output of the generating facilities via various products and services available in the markets it serves. Historically, Power engaged in trading of electricity and energy-related products where such transactions were not associated with the output or fuel purchase requirements of its facilities. This trading consisted mostly of energy supply contracts where Power secured sales commitments with the intent to supply the energy services from purchases in the market rather than from its owned generation. Such trading activities were marked to market through the income statement and represented less than one percent of gross margin (revenues less energy costs) on an annual basis. Effective July 2011, Power has not entered into any trading derivative contracts and anticipates that it will not do so in the future.

S1-SSA-0009 - 10758

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

Other Derivatives

Power enters into additional contracts that are derivatives, but do not qualify for or are not designated as cash flow hedges. These transactions are intended to mitigate exposure to fluctuations in commodity prices and optimize the value of its expected generation. Trade types include financial options, futures, swaps, fuel purchases and forward purchases and sales of electricity. Changes in fair market value of these contracts are recorded in earnings.

PSE&G is a party to certain long-term natural gas sales contracts to optimize its pipeline capacity utilization. In addition, as further described in Note 13. Commitments and Contingent Liabilities, PSE&G was directed to execute long-term SOCAs with certain generators to support the LCAPP Act. Two of the three generators cleared the Reliability Pricing Model auction for the 2015/2016 delivery year. These two SOCA contracts qualify as derivatives and are marked to fair value with the offset recorded to Regulatory Assets and Liabilities.

Interest Rates

PSEG, Power and PSE&G are subject to the risk of fluctuating interest rates in the normal course of business. Exposure to this risk is managed by targeting a balanced debt maturity profile which limits refinancing in any given period or interest rate environment. In addition, they have used a mix of fixed and floating rate debt, interest rate swaps and interest rate lock agreements.

Fair Value Hedges

PSEG enters into fair value hedges to convert fixed-rate debt into variable-rate debt. In order to redeem Power's $250 million of 5% Senior Notes due April 2014 in December 2012, PSEG terminated its $250 million interest rate swap that had converted this debt into variable-rate. As of December 31, 2012, PSEG had seven interest rate swaps outstanding totaling $850 million. These swaps convert Power's $300 million of 5.5% Senior Notes due December 2015, $300 million of Power's $303 million of 5.32% Senior Notes due September 2016 and Power's $250 million of 2.75% Senior Notes due September 2016 into variable-rate debt. These interest rate swaps are designated and effective as fair value hedges. The fair value changes of the interest rate swaps are fully offset by the changes in the fair value of the underlying forecasted interest payments of the debt. As of December 31, 2012 and 2011, the fair value of all the underlying hedges was $57 million and $62 million, respectively.

Cash Flow Hedges

PSEG uses interest rate swaps and other derivatives, which are designated and effective as cash flow hedges, to manage its exposure to the variability of cash flows, primarily related to variable-rate debt instruments. The Accumulated Other Comprehensive Income (Loss) (after tax) related to interest rate derivatives designated as cash flow hedges was $(2) million as of December 31, 2012 and 2011.

(A) Represents the netting of fair value balances with the same counterparty (where the right of offset exists) and the application of collateral. As of December 31, 2012 and December 31, 2011, net cash collateral paid of $2 million and net cash collateral received of $82 million, respectively, was netted against the corresponding net derivative contract positions. Of the $2 million as of December 31, 2012, cash collateral of $(3) million was netted against current assets and cash collateral of $5 million was netted against current liabilities. Of the $82 million as of December 31, 2011, cash collateral of $(77) million and $(23) million were netted against current assets and noncurrent assets,

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠
The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

respectively, and cash collateral of $16 million and $2 million were netted against current liabilities and noncurrent liabilities, respectively.

Certain of Power's derivative instruments contain provisions that require Power to post collateral. This collateral may be posted in the form of cash or credit support with thresholds contingent upon Power's credit rating from each of the major credit rating agencies. The collateral and credit support requirements vary by contract and by counterparty. These credit risk-related contingent features stipulate that if Power were to be downgraded or lose its investment grade credit rating, it would be required to provide additional collateral. This incremental collateral requirement can offset collateral requirements related to other derivative instruments that are assets with the same counterparty, where the contractual right of offset exists under applicable master agreements. Power also enters into commodity transactions on the New York Mercantile Exchange (NYMEX) and Intercontinental Exchange (ICE). The NYMEX and ICE clearing houses act as counterparties to each trade. Transactions on the NYMEX and ICE must adhere to comprehensive collateral and margin requirements.

The aggregate fair value of all derivative instruments with credit risk-related contingent features in a liability position that are not fully collateralized (excluding transactions on the NYMEX and ICE that are fully collateralized) was $98 million and $285 million as of December 31, 2012 and 2011, respectively. As of December 31, 2012 and 2011, Power had the contractual right of offset of $61 million and $149 million, respectively, related to derivative instruments that are assets with the same counterparty under master agreements and net of margin posted. If Power had been downgraded or lost its investment grade rating, it would have had additional collateral obligations of $37 million and $136 million as of December 31, 2012 and 2011, respectively, related to its derivatives, net of the contractual right of offset under master agreements and the application of collateral. This potential additional collateral is included in the $654 million and $812 million as of December 31, 2012 and 2011, respectively, discussed in Note 13. Commitments and Contingent Liabilities.

The following shows the effect on the Consolidated Statements of Operations and on Accumulated Other Comprehensive Income (AOCI) of derivative instruments designated as cash flow hedges for the years ended December 31, 2012, 2011 and 2010:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following reconciles the AOCI for derivative activity included in the Accumulated Other Comprehensive Loss of PSEG on a pre-tax and after-tax basis:

AOCI	Pre-Tax	After-Tax
	Millions	
Balance as of December 31, 2010	**$ 188**	**$ 111**
Gain Recognized in AOCI	80	47
Less: Gain Reclassified into Income	(214)	(127)
Balance as of December 31, 2011	**$ 54**	**$ 31**
Gain Recognized in AOCI	28	17
Less: Gain Reclassified into Income	(70)	(41)
Balance as of December 31, 2012	**$ 12**	**$ 7**

The following shows the effect on the Consolidated Statements of Operations of derivative instruments not designated as hedging instruments or as normal purchases and sales for the years ended December 31, 2012, 2011 and 2010:

Derivatives Not Designated as Hedges	Location of Pre-Tax Gain (Loss) Recognized in Income on Derivatives	Pre-Tax Gain (Loss) Recognized in Income on Derivatives		
		Years Ended December 31,		
		2012	2011	2010
		Millions		
PSEG and Power				
Energy-Related Contracts	Operating Revenues	$ 232	$ 205	$ (53)
Energy-Related Contracts	Energy Costs	(19)	(42)	(9)
Total PSEG and Power		**$ 213**	**$ 163**	**$ (62)**

Power's derivative contracts reflected in the preceding tables include contracts to hedge the purchase and sale of electricity and natural gas and the purchase of fuel. Not all of these contracts qualify for hedge accounting. Most of these contracts are marked to market. The tables above do not include contracts for which Power has elected the normal purchase/normal sales exemption, such as its BGS contracts and certain other energy supply contracts that it has with other utilities and companies with retail load. In addition, PSEG has interest rate swaps designated as fair value hedges. The effect of these hedges was to reduce interest expense by $22 million, $25 million and $24 million for the years ended December 31, 2012, 2011 and 2010, respectively.

The following reflects the gross volume, on an absolute value basis, of derivatives as of December 31, 2012 and 2011:

Type	Notional	Total	PSEG	Power	PSE&G
			Millions		
As of December 31, 2012					
Natural Gas	Dth	596	—	404	192
Electricity	MWh	208	—	208	—
Capacity	MW days	4	—	—	4
FTRs	MWh	19	—	19	—
Interest Rate Swaps	U.S. Dollars	850	850	—	—
Coal	Tons	1	—	1	—
As of December 31, 2011					
Natural Gas	Dth	612	—	377	235
Electricity	MWh	137	—	137	—
FTRs	MWh	12	—	12	—
Interest Rate Swaps	U.S. Dollars	1,100	1,100	—	—
Coal	Tons	1	—	1	—

Credit Risk

Credit risk relates to the risk of loss that we would incur as a result of non-performance by counterparties pursuant to the terms of their contractual obligations. We have established credit policies that we believe significantly minimize credit risk. These policies include an evaluation of potential counterparties' financial condition (including credit rating), collateral requirements under certain circumstances and the use of standardized agreements, which allow for the netting of positive and negative exposures associated with a single counterparty. In the event of non-performance or non-payment by a major counterparty, there may be a material adverse impact on Power's and PSEG's financial condition, results of operations or net cash flows.

As of December 31, 2012, 94% of the credit for Power's operations was with investment grade counterparties. Credit exposure is defined as any positive results of netting accounts receivable/accounts payable and the forward value of open positions (which includes all financial instruments including derivatives and non-derivatives and normal purchases/normal sales).

The following table provides information on Power's credit risk from others, net of cash collateral, as of December 31, 2012. It further delineates that exposure by the credit rating of the counterparties and provides guidance on the concentration of credit risk to individual counterparties and an indication of the quality of Power's credit risk by credit rating of the counterparties.

Rating	Current Exposure	Securities held as Collateral	Net Exposure	Number of Counterparties >10%	Net Exposure of Counterparties >10%	
		Millions			Millions	
Investment Grade—External Rating	$ 317	$ 61	$ 313	2	$ 165	(A)
Non-Investment Grade—External Rating	22	—	22	—	—	
Investment Grade—No External Rating	10	—	10	—	—	
Non-Investment Grade—No External Rating	—	—	—	—	—	
Total	**$ 349**	**$ 61**	**$ 345**	**2**	**$ 165**	

(A) Includes net exposure of $119 million with PSE&G. The remaining net exposure of $46 million is with a nonaffiliated power purchaser which is a regulated investment grade counterparty.

The net exposure listed above, in some cases, will not be the difference between the current exposure and the collateral held. A counterparty may have posted more cash collateral than the outstanding exposure, in which case there would be no exposure.

S1-SSA-0009 - 10763

When letters of credit have been posted as collateral, the exposure amount is not reduced, but the exposure amount is transferred to the rating of the issuing bank. As of December 31, 2012, Power had 174 active counterparties.

Note 17. Fair Value Measurements

PSEG, Power and PSE&G adopted accounting standard update "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in GAAP and International Financial Reporting Standards (IFRS)" effective January 1, 2012. This standard defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Accounting guidance for fair value measurement emphasizes that fair value is a market-based measurement, not an entity-specific measurement, and establishes a fair value hierarchy that distinguishes between assumptions based on market data obtained from independent sources and those based on an entity's own assumptions. The hierarchy prioritizes the inputs to fair value measurement into three levels:

Level 1—measurements utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that PSEG, Power and PSE&G have the ability to access. These consist primarily of listed equity securities.

Level 2—measurements include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and other observable inputs such as interest rates and yield curves that are observable at commonly quoted intervals. These consist primarily of non-exchange traded derivatives such as forward contracts or options and most fixed income securities.

Level 3—measurements use unobservable inputs for assets or liabilities, based on the best information available and might include an entity's own data and assumptions. In some valuations, the inputs used may fall into different levels of the hierarchy. In these cases, the financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. As of December 31, 2012, these consisted primarily of electric swaps whose basis is deemed significant to the fair value measurement, electric load deals, long-term electric capacity contracts and long-term gas supply contracts.

The following tables present information about PSEG's, Power's and PSE&G's respective assets and (liabilities) measured at fair value on a recurring basis as of December 31, 2012 and December 31, 2011, including the fair value measurements and the levels of inputs used in determining those fair values. Amounts shown for PSEG include the amounts shown for Power and PSE&G.

Energy Related Contracts (A)	$ (7)	$ —	$ —	$ —	$ (7)

(A) Level 2—Fair values for energy-related contracts are obtained primarily using a market-based approach. Most derivative contracts (forward purchase or sale contracts and swaps) are valued using the average of the bid/ask midpoints from multiple broker or dealer quotes or auction prices. Prices used in the valuation process are also corroborated independently by management to determine that values are based on actual transaction data or, in the absence of transactions, bid and offers for the day. Examples may include certain exchange and non-exchange traded capacity and electricity contracts and natural gas physical or swap contracts based on market prices, basis adjustments and other premiums where adjustments and premiums are not considered significant to the overall inputs.

Level 3—For energy-related contracts, which include more complex agreements where limited observable inputs or pricing information are available, modeling techniques are employed using assumptions reflective of contractual

S1-SSA-0009 - 10767

Past financial performance is no guarantee of future results.

terms, current market rates, forward price curves, discount rates and risk factors, as applicable. Fair values of other energy contracts may be based on broker quotes that we cannot corroborate with actual market transaction data.

(B) Interest rate swaps are valued using quoted prices on commonly quoted intervals, which are interpolated for periods different than the quoted intervals, as inputs to a market valuation model. Market inputs can generally be verified and model selection does not involve significant management judgment.

(C) The NDT Fund maintains investments in various equity and fixed income securities classified as "available for sale." The Rabbi Trust maintains investments in an S&P 500 index fund and various fixed income securities classified as "available for sale." These securities are generally valued with prices that are either exchange provided (equity securities) or market transactions for comparable securities and/or broker quotes (fixed income securities).

Level 1—Investments in marketable equity securities within the NDT Fund are primarily investments in common stocks across a broad range of industries and sectors. Most equity securities are priced utilizing the principal market close price or, in some cases, midpoint, bid or ask price (primarily Level 1). The Rabbi Trust equity index fund is valued based on quoted prices in an active market (Level 1).

Level 2—NDT and Rabbi Trust fixed income securities are limited to investment grade corporate bonds and United States Treasury obligations or Federal Agency mortgage-backed securities with a wide range of maturities. Since many fixed income securities do not trade on a daily basis, they are priced using an evaluated pricing methodology that varies by asset class and reflects observable market information such as the most recent exchange price or quoted bid for similar securities. Market-based standard inputs typically include benchmark yields, reported trades, broker/dealer quotes, and issuer spreads (primarily Level 2). Short-term investments and certain commingled temporary investments are valued using observable market prices or market parameters such as time-to-maturity, coupon rate, quality rating and current yield (primarily Level 2).

(D) For Non-Recourse Debt, see Fair Value Option discussion.

(E) Cash collateral netting represents collateral amounts netted against derivative assets and liabilities as permitted under the accounting guidance for Offsetting of Amounts Related to Certain Contracts.

Additional Information Regarding Level 3 Measurements

For valuations that include both observable and unobservable inputs, if the unobservable input is determined to be significant to the overall inputs, the entire valuation is categorized in Level 3. This includes derivatives valued using indicative price quotations for contracts with tenors that extend into periods with no observable pricing. In instances where observable data is unavailable, consideration is given to the assumptions that market participants would use in valuing the asset or liability. This includes assumptions about market risks such as liquidity, volatility and contract duration. Such instruments are categorized in Level 3 because the model inputs generally are not observable. PSEG's Risk Management Committee approves risk management policies and objectives for risk assessment, control and valuation, counterparty credit approval, and the monitoring and reporting of risk exposures. The Risk Management Committee reports to the Audit Committee of the PSEG Board of Directors on the scope of the risk management activities and is responsible for approving all valuation procedures at PSEG. Forward price curves for the power market utilized by Power to manage the portfolio are maintained and reviewed by PSEG's Enterprise Risk Management market pricing group and used for financial reporting purposes. PSEG considers credit and nonperformance risk in the valuation of derivative contracts categorized in Levels 2 and 3, including both historical and current market data, in its assessment of credit and nonperformance risk by counterparty. The impacts of credit and nonperformance risk were not material to the financial statements.

The following table provides detail surrounding significant Level 3 valuations, of which the most significant positions are electric swaps and electric load deals for Power and long-term electric capacity contracts and long-term natural gas supply contracts for PSE&G. For Power, in general, electric swaps are valued based on at least two pricing inputs, basis and underlying. To the extent the basis component is based on a single broker quote and is significant to the fair value of the electric swap, it is categorized as Level 3. The remaining balance of Power's Level 3 positions consist primarily of certain long-term electric capacity contracts, electric load deals in which load consumption may change hourly and certain long-term natural gas supply contracts. Long-term electric capacity contracts are measured at fair value using capacity auction prices. If the fair value for the unobservable tenor is significant, then the entire capacity contract is categorized as Level 3. Electric load deals are fair valued using certain unobservable inputs, such as historic load variability. For Power and PSE&G, long-term gas supply contracts are measured at fair value using both actively traded pricing points as well as unobservable inputs such as gas prices beyond observable periods and long-term basis quotes and accordingly, the fair value measurements are classified in Level 3. For PSE&G, long-term electric capacity contracts are measured at fair value using both observable capacity prices and unobservable inputs consisting of forecasts of future long-term electric capacity prices and include adjustments for contingencies, such as litigation risk and plant construction risk. Accordingly, the fair value measurements are classified as Level 3.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The table below discloses the significant unobservable inputs used in developing the fair value of these Level 3 positions:

Quantitative Information About Level 3 Fair Value Measurements

Commodity	Level 3 Position	Fair Value as of December 31, 2012 Assets	Fair Value as of December 31, 2012 (Liabilities)	Valuation Technique(s)	Significant Unobservable Input	Range
		Millions				
Power						
Electricity	Electric Swaps	$ 7	$ (1)	Discounted cash flow	Power Basis	$0 - $10/MWh
Electricity	Electric Load Deals	1	(2)	Discounted cash flow	Historic Load Variability	-5% - +10%
Other	Various (A)	5	(1)			
Total Power		**$ 13**	**$ (4)**			
PSE&G						
Gas and Capacity	Forward Contracts (B)	$ 67	$ (107)	Discounted cash flow	Long-Term Gas Basis and Capacity Prices	(B)
Total PSE&G		**$ 67**	**$ (107)**			
Total PSEG		**$ 80**	**$ (111)**			

(A) Includes long-term electric capacity and long-term gas supply positions which are immaterial.

(B) Includes long-term gas supply and long-term electric capacity positions with various unobservable inputs. Significant unobservable inputs for the gas supply contracts include long-term basis prices in the range of $0 to $2/MMBTU of natural gas. Unobservable inputs for the long-term electric capacity contracts include forecasted capacity prices in the range of $100 to $400/MW day.

Significant unobservable inputs listed above would have a direct impact on the fair values of the above Level 3 instruments if they were adjusted. For energy-related contracts in cases where Power and PSE&G are sellers, an increase in either the power basis or the load variability or the longer-term basis amounts would decrease the fair value. For long-term electric capacity contracts where Power or PSE&G are buyers, an increase in the capacity price would increase the fair value.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Changes in Level 3 Assets and (Liabilities) Measured at Fair Value on a Recurring Basis for the Year Ended December 31, 2011

Description	Balance as of January 1, 2011	Total Gains or (Losses) Realized/Unrealized: Included in Income (A)	Total Gains or (Losses) Realized/Unrealized: Included in Regulatory Assets/ Liabilities (B)	Purchases, (Sales) (C)	Issuances (Settlements) (D)	Transfers In (Out) (E)	Balance as of December 31, 2011
			Millions				
PSEG							
Net Derivative Assets (Liabilities)	$ 47	$ 22	$ (8)	$ 30	$ (37)	$ (33)	$ 21
NDT Fund	$ 8	$ —	$ —	$ —	$ —	$ (8)	$ —
Non-Recourse Debt	$ —	$ —	$ —	$ —	$ (50)	$ —	$ (50)
Power							
Net Derivative Assets (Liabilities)	$ 42	$ 22	$ —	$ 30	$ (37)	$ (33)	$ 24
NDT Fund	$ 8	$ —	$ —	$ —	$ —	$ (8)	$ —
PSE&G							
Net Derivative Assets (Liabilities)	$ 5	$ —	$ (8)	$ —	$ —	$ —	$ (3)

(A) PSEG's and Power's gains and losses attributable to changes in net derivative assets and liabilities include $42 million and $17 million in Operating Income in 2012 and 2011, $0 million and $2 million in OCI in 2012 and 2011, and $3 million in Income from Discontinued Operations in 2011. Of the $42 million in Operating Income in 2012, $(15) million is unrealized. Of the $17 million in Operating Income in 2011, $9 million is unrealized. Energy Holding's release from its obligations under the non-recourse debt is included in PSEG's Operating Income and is offset by the write-off of the related assets.

(B) Mainly includes gains/losses on PSE&G's derivative contracts that are not included in either earnings or OCI, as they are deferred as a Regulatory Asset/Liability and are expected to be recovered from/returned to PSE&G's customers.

(C) Includes $66 million in purchases and $(36) million in sales in 2011.

(D) Represents $(57) million in settlements for derivative contracts in 2012. Includes $(25) million in issuances and $(12) million in settlements for derivative contracts and includes $(50) million of issuances due to initial recognition of lessor notes resulting from rejection of the Dynegy leveraged leases in 2011. See Fair Value Option discussion.

(E) During the year ended December 31, 2012, there were no transfers among levels. During the year ended December 31, 2011, $ 8 million of assets in the NDT Fund were transferred from Level 3 to Level 2, due to more observable pricing for the underlying securities and $33 million of net derivative assets were transferred from Level 3 to Level 2 due to more available observable market data. The transfers were recognized as of the beginning of the first quarter and fourth quarter, respectively, (i.e. the quarters in which the transfers occurred), as per PSEG's policy.

As of December 31, 2012, PSEG carried $1.8 billion of net assets that are measured at fair value on a recurring basis, of which $ 31 million of net liabilities were measured using unobservable inputs and classified as Level 3 within the fair value hierarchy.

As of December 31, 2011, PSEG carried $1.6 billion of net assets that are measured at fair value on a recurring basis, of which $ 29 million of net liabilities were measured using unobservable inputs and classified as Level 3 within the fair value hierarchy.

Fair Value Option

As of December 31, 2011, the effective date of the Dynegy lease rejections, the leases of the Roseton and Danskammer generation facilities were effectively terminated and no longer qualified for leveraged lease accounting under the guidance for leases. As the owner of the facilities, Energy Holdings was required to recognize the underlying assets and nonrecourse notes payable (Notes Payable) associated with these leases at their respective fair values on the effective date of the rejection. Energy Holdings elected to record the Notes Payable at fair value each reporting period under the fair value option in accordance with guidance for Financial Instruments. The fair value option permits the irrevocable fair value election for selected eligible financial assets or liabilities. Any changes in the fair value of the Notes Payable are included in earnings each period. The $ 550 million of contractual principal outstanding on the Notes Payable was valued at $ 50 million as of December 31, 2011. Energy Holdings elected this option to eliminate certain complexities in applying the effective interest method of amortization given the uncertain payment streams between the election date and the expected foreclosure date. There were no other debt instruments of this type eligible for the fair value option as of December 31, 2011. The $ 50 million fair value of these Notes Payable is included on PSEG's Consolidated Balance Sheet as of December 31, 2011. The fair values of the Notes Payable include significant internal assumptions based on expected cash flows and the fair values of the underlying collateral. Changes to projected capacity factors, capacity and energy prices, fuel costs and other required cash outflows could significantly impact the fair value of the collateral which would increase or decrease the fair value of the Notes. These Notes Payable are classified as Level 3 in the fair value hierarchy as a result of mainly unobservable inputs. As of the June 5, 2012 effective date of the amended settlement agreement, the Notes Payable and related assets were written off.

The table of fair value of debt is included in Note 14. Schedule of Consolidated Debt.

Non-recurring Fair Value Measurements

2011

During the fourth quarter of 2011, DH filed for protection under Chapter 11 of the U.S. Bankruptcy Code. As a result of the settlement agreement that was reached relating to the lease of electric generation facilities to subsidiaries of DH (See Note 8. Financing Receivables), Energy Holdings ceased leveraged lease accounting for the leased assets and recorded those generation facilities at their respective fair values totaling $50 million, which were carried as nonrecurring fair values as of December 31, 2011. The fair values of those generation facilities were determined based on a third party appraisal using significant assumptions including expectations of cash flows which are considered mainly unobservable inputs (Level 3).

Note 18. Stock Based Compensation

PSEG's 2004 Long-Term Incentive Plan (2004 LTIP) is a broad-based equity compensation program that provides for grants of various long-term incentive compensation awards, such as stock options, stock appreciation rights, performance units, restricted stock, restricted stock units, cash awards or any combination thereof. The types of long-term incentive awards that have been granted and remain outstanding under the 2004 LTIP are non-qualified options to purchase shares of PSEG's common stock, restricted stock awards, restricted stock unit awards and performance unit awards. The type of equity award that is granted and the details of that award may vary from time to time and is subject to the approval of the Organization and Compensation Committee of PSEG's Board of Directors (OCC), the plan's administrative committee.

The 2004 LTIP currently provides for the issuance of equity awards with respect to approximately 26 million shares of common stock. As of December 31, 2012, there were approximately 17 million shares available for future awards under the 2004 LTIP.

Stock Options

Under the 2004 LTIP, non-qualified options to acquire shares of PSEG common stock may be granted to officers and other key employees selected by the OCC. Option awards are granted with an exercise price equal to the market price of PSEG's common stock at the grant date. The options generally vest over four years of continuous service. Vesting schedules may be accelerated upon the occurrence of certain events, such as a change-in-control (unless substituted with an equity award of equal value), retirement, death or disability. Options are exercisable over a period of time designated by the OCC (but not prior to one year or longer than 10 years from the date of grant) and are subject to such other terms and conditions as the OCC determines. Payment by option holders upon exercise of an option may be made in cash or, with the consent of the OCC, by delivering previously acquired shares of PSEG common stock.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Restricted Stock

Under the 2004 LTIP, PSEG has granted restricted stock awards to officers and other key employees. These shares are subject to risk of forfeiture until vested by continued employment. Restricted stock generally vests annually over three or four years, but is considered outstanding at the time of grant, as the recipients are entitled to dividends and voting rights. Vesting may be accelerated upon certain events, such as change-in-control (unless substituted with an equity award of equal value), retirement, death or disability.

Restricted Stock Units

Under the 2004 LTIP, PSEG has granted restricted stock unit awards to officers and other key employees. These awards, which are bookkeeping entries only, are subject to risk of forfeiture until vested by continued employment. Until vested, the units are credited with dividend equivalents proportionate to the dividends paid on PSEG common stock. Distributions are made in shares of common stock. The restricted stock unit grants for 2012 and 2011 generally vest at the end of three years. Vesting may be accelerated upon certain events such as change-in-control or death. Prior to 2011, restricted stock unit grants generally vested over four years.

Performance Units

Under the 2004 LTIP, performance units were granted to officers and other key employees, which provide for payment in shares of PSEG common stock based on achievement of certain financial goals over a three-year performance period. The payout varies from 0% to 200% of the number of performance units granted depending on PSEG's performance with respect to certain financial targets, including targets related to comparative performance against other companies in a peer group of energy companies. The performance units are credited with dividend equivalents in an amount equal to dividends paid on PSEG common stock up until the shares are distributed. Vesting may be pro-rated for the employee's service during the performance period as a result of certain events, such as change-in-control (unless substituted with an equity award of equal value), retirement, death or disability.

Stock-Based Compensation

All outstanding unvested stock options are being expensed based on their grant date fair values, which were determined using the Black-Scholes option-pricing model. Stock option awards are expensed on a tranche-specific basis over the requisite service period of the award. Ultimately, compensation expense for stock options is recognized for awards that vest.

PSEG recognizes compensation expense for restricted stock and restricted stock units over the vesting period based on the grant date fair market value of the shares, which is equal to the market price of PSEG's common stock on the date of the grant.

PSEG recognizes compensation expense for performance units based on the grant date fair values of the award, which were determined using the Monte Carlo model. The accrual of compensation cost was based on the probable achievement of the performance conditions, which result in a payout from 0% to 200% of the initial grant. The accrual during the year of grant is estimated at 100% of the original grant. The accrual may be adjusted for subsequent changes in the estimated or actual outcome.

	2012	2011	2010
		Millions	
Compensation Cost included in Operation and Maintenance Expense	$ 25	$ 23	$ 29
Income Tax Benefit Recognized in Consolidated Statement of Operations	$ 10	$ 10	$ 12

There was less than $1 million of excess tax benefits for 2012. The was $1 million of excess tax benefits included as financing cash flows on the Consolidated Statements of Cash Flow for each of the years ended December 31, 2011 and 2010, respectively.

PSEG recognizes compensation cost of awards issued over the shorter of the original vesting period or the period beginning on the date of grant and ending on the date an individual is eligible for retirement and the award vests.

Stock Options

Changes in stock options for 2012 are summarized as follows:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Years Contractual Term	Aggregate Intrinsic Value
Outstanding as of January 1, 2012	3,272,300	$ 32.78		
Exercised	326,900	$ 20.10		
Outstanding as of December 31, 2012	**2,945,400**	**$ 34.19**	**5.3**	**$ 1,509,670**
Exercisable at December 31, 2012	2,750,325	$ 34.24	5.2	$ 1,506,268

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model. There were no option grants in 2012, 2011 and 2010.

Activity for options exercised for the years ended December 31, 2012, 2011 and 2010 is shown below:

	2012	2011	2010
		Millions	
Total Intrinsic Value of Options Exercised	$ 4	$ 2	$ 1
Cash Received from Options Exercised	$ 7	$ 6	$ 3
Tax Benefit Realized from Options Exercised	$ 1	$ 1	$ 1

Less than one million options vested during each of the years ended December 31, 2012, 2011 and 2010. The total fair value of the stock options vested during the years ended December 31, 2012, 2011 and 2010 was $3 million, $5 million and $7 million, respectively.

As of December 31, 2012, there was approximately $1 million of unrecognized compensation cost related to stock options, which is to be recognized over a weighted average period of 0.5 years.

Restricted Stock

Changes in restricted stock for the year ended December 31, 2012 are summarized as follows:

	Shares	Weighted Average Grant Date Fair Value	Weighted Average Remaining Years Contractual Term	Aggregate Intrinsic Value
Non-vested as of January 1, 2012	70,300	$ 32.83		
Vested	1,500	$ 44.44		
Non-vested as of December 31, 2012	**68,800**	**$ 32.57**	**0.2**	**$ 2,105,280**

There were no restricted stock awards granted in 2012, 2011 and 2010.

The total intrinsic value of restricted stock vested during the years ended December 31, 2012, 2011 and 2010 was less than $1 million, $1 million and $3 million, respectively.

Restricted Stock Units

Changes in restricted stock units for the year ended December 31, 2012 are summarized as follows:

	Shares	Weighted Average Grant Date Fair Value	Weighted Average Remaining Years Contractual Term	Aggregate Intrinsic Value
Non-vested as of January 1, 2012	648,551	$ 31.17		
Granted	345,440	$ 30.95		
Vested	125,838	$ 30.87		
Canceled/Forfeited	33,626	$ 31.24		
Non-vested as of December 31, 2012	**834,527**	**$ 31.12**	**1.2**	**$ 25,536,532**

The weighted average grant date fair value per share for restricted stock during the years ended December 31, 2012, 2011 and 2010 was $30.95, $32.03 and $31.13 per share, respectively.

The total intrinsic value of restricted stock units vested during the years ended December 31, 2012, 2011 and 2010 was $5 million, $7 million and $6 million, respectively.

As of December 31, 2012, there was approximately $9 million of unrecognized compensation cost related to the restricted stock units, which is expected to be recognized over a weighted average period of 1.0 year. Dividend equivalents units of 40,044 accrued on the restricted stock units during the year.

Performance Share Units

Changes in Performance Share Units for the year ended December 31, 2012 are summarized as follows:

	Shares	Weighted Average Grant Date Fair Value	Weighted Average Remaining Years Contractual Term	Aggregate Intrinsic Value
Non-vested as of January 1, 2012	641,986	$ 35.13		
Granted	404,460	$ 31.25		
Vested	258,501	$ 36.35		
Canceled/Forfeited	37,952	$ 33.51		
Non-vested as of December 31, 2012	**749,993**	**$ 32.70**	**1.5**	**$ 22,949,786**

The weighted average grant date fair value per share for performance share units during the years ended December 31, 2012, 2011 and 2010 was $31.25, $35.33 and $34.29 per share, respectively.

The total intrinsic value of performance share units vested during the year ended December 31, 2012, 2011 and 2010 was $4 million, $9 million and $15 million, respectively.

As of December 31, 2012, there was approximately $13 million of unrecognized compensation cost related to the performance share units, which is expected to be recognized over a weighted average period of 1.0 year. Dividend equivalents units of 49,170 accrued on the performance share units during the year.

Outside Directors

Under the Directors Equity Plan, annually, on the first business day of May, each non-employee member of the Board of Directors is awarded stock units based on amount of annual compensation to be paid at the closing price of PSEG common stock on that date. Dividend equivalents are credited quarterly and distributions will commence upon the director leaving the Board.

The fair value of these awards is recorded as compensation expense in the Consolidated Statements of Operations. Compensation expense for the plan for each of the years ended December 31, 2012, 2011 and 2010 was approximately $1 million.

Employee Stock Purchase Plan (ESPP)

PSEG maintains an ESPP for all eligible employees of PSEG and its subsidiaries. Under the ESPP, shares of PSEG common stock may be purchased at 95% of the fair market value through payroll deductions. In any year, employees may purchase shares having a value not exceeding 10% of their base pay. During the years ended December 31, 2012, 2011 and 2010,

As of December 31, 2012, PSE&G had New Jersey State income tax net operating loss (NOL) carryforwards of $1.5 billion, on which a deferred tax asset of $87 million was recorded, which will expire between 2031 and 2033. We believe that it is more-likely-than-not that the benefit from the state NOL carryforwards will be realized.

Each of PSEG, Power and PSE&G provide deferred taxes at the enacted statutory tax rate for all temporary differences between the financial statement carrying amounts and the tax bases of existing assets and liabilities irrespective of the treatment for rate-making purposes. Management believes that it is probable that the accumulated tax benefits that previously have been treated as a flow-through item to PSE&G customers will be recovered from or refunded to PSE&G's customers in the future. These amounts were determined using the enacted federal income tax rate of 35% and state income tax rate of 9%. For additional information, see Note 6. Regulatory Assets and Liabilities.

The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 include various health care-related provisions which will go into effect over the next several years. One of the provisions eliminates the tax deductibility of retiree health care costs, to the extent of federal subsidies received by plan sponsors that provide retiree prescription drug benefits equivalent to Medicare Part D coverage. Although this change does not take effect immediately, the accounting impact was required to be recognized when the legislation was signed. As a result, in the first quarter of 2010, PSEG recorded non-cash after tax charges of $9 million for income tax expense to establish the related deferred tax liabilities,

primarily related to Power. There was no immediate impact on PSE&G's income tax expense or effective tax rate since the related amount of $78 million was deferred as a Regulatory Asset to be collected and amortized over future periods.

Two other tax provisions were enacted during 2010 that had a significant impact on PSEG's cash position. The Small Business Jobs Act of 2010 extended the tax deduction for 50% bonus depreciation through 2010 for qualified property. The Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 included a provision making qualified property placed into service after September 8, 2010 and before January 1, 2012, eligible for 100% bonus depreciation for tax purposes. In addition, qualified property placed into service in 2012 is eligible for 50% bonus depreciation for tax purposes. On January 2, 2013, the President signed into law the American Taxpayer Relief Act of 2012 that further extends 50% bonus depreciation for property placed in service before January 1, 2014. These provisions contain rules which afford certain projects which have a long production period, the benefit of bonus depreciation. These provisions will also generate cash for PSEG through tax benefits related to accelerated depreciation, most of which was realized in 2011. These tax benefits would have otherwise been received over an estimated average 20 year period.

With respect to ITC, for financial statement periods including 2010 and 2011, the law provided an option to claim either a grant or the ITC. Accordingly, in those periods, the ITC was accounted for as a reduction of the book basis of the related assets as opposed to being recorded in tax expense. In 2012 the law changed and the grant option is no longer available; as such, the accumulated deferred ITC generated in 2012 was recorded as a noncurrent deferred tax liability, which was included in Deferred Income Taxes and ITC on PSEG's and PSE&G's Consolidated Balance Sheets as of December 31, 2012.

PSEG recorded the following amounts related to its unrecognized tax benefits, which was primarily comprised of amounts recorded for Power, PSE&G and Energy Holdings:

2012	PSEG	Power	PSE&G	Energy Holdings

On June 26, 2009, September 15, 2008 and December 17, 2007, PSEG made tax deposits with the IRS in the amount of $140 million, $80 million and $100 million, respectively, to defray potential interest costs associated with disputed tax assessments associated with certain lease investments (see Note 13. Commitments and Contingent Liabilities). The $320 million of deposits were fully refundable and were recorded in Current Accrued Taxes on PSEG's Consolidated Balance Sheets in the years in which the deposits were made, but are not reflected in the amounts shown above. On January 31, 2012, PSEG signed a specific matter closing agreement with the IRS regarding this matter. Based on this agreement, these deposits have been applied against tax and interest due pursuant to the closing agreement.

PSEG and its subsidiaries include all accrued interest and penalties related to uncertain tax positions required to be recorded, as income tax expense. Interest and penalties on uncertain tax positions were as follows:

S1-SSA-0009 - 10784

Other	—	10	9
Total	**$ 38**	**$ 395**	**$ 379**

It is reasonably possible that total unrecognized tax benefits will decrease within the next twelve months due to either agreements with various taxing authorities upon audit or the expiration of the Statute of Limitations. These potential decreases are as follows:

Possible Decrease in Total Unrecognized Tax Benefits including Interest	Over the next 12 Months
	Millions
PSEG	$ 75
Power	$ 5
PSE&G	$ —

As a result of a change in accounting method for the capitalization of indirect costs, PSEG reduced the net amount of its uncertain tax positions (including interest) by $97 million, approximately $43 million of which related to PSE&G. Pursuant to an agreement signed with the IRS on January 31, 2012, this matter is settled and there will be a resulting increase in uncertain tax positions within the next twelve months. These amounts are not included in the table above.

A description of income tax years that remain subject to examination by material jurisdictions, where an examination has not already concluded are:

	PSEG	Power	PSE&G

Note 21. Earnings Per Share (EPS) and Dividends

EPS

Diluted EPS is calculated by dividing Net Income by the weighted average number of shares of common stock outstanding, including shares issuable upon exercise of stock options outstanding or vesting of restricted stock awards granted under our stock compensation plans and upon payment of performance units or restricted stock units. The following table shows the effect of these stock options, performance units and restricted stock units on the weighted average number of shares outstanding used in calculating diluted EPS:

	Years Ended December 31,					
	2012		2011		2010	
	Basic	Diluted	Basic	Diluted	Basic	Diluted
EPS Numerator:						
(Millions)						
Continuing Operations	$ 1,275	$ 1,275	$ 1,407	$ 1,407	$ 1,557	$ 1,557
Discontinued Operations	—	—	96	96	7	7
Net Income	**$ 1,275**	**$ 1,275**	**$ 1,503**	**$ 1,503**	**$ 1,564**	**$ 1,564**
EPS Denominator:						
(Thousands)						
Weighted Average Common Shares Outstanding	505,933	505,933	505,949	505,949	505,985	505,985
Effect of Stock Based Compensation Awards	—	1,153	—	1,033	—	1,060
Total Shares	**505,933**	**507,086**	**505,949**	**506,982**	**505,985**	**507,045**
EPS:						
Continuing Operations	$ 2.52	$ 2.51	$ 2.78	$ 2.77	$ 3.08	$ 3.07
Discontinued Operations	—	—	0.19	0.19	0.01	0.01
Net Income	**$ 2.52**	**$ 2.51**	**$ 2.97**	**$ 2.96**	**$ 3.09**	**$ 3.08**

There were approximately 1.8 million, 1.8 million and 1.9 million stock options excluded from the weighted average common shares used for diluted EPS due to their antidilutive effect for the years ended December 31, 2012, 2011 and 2010, respectively. No other stock options had an antidilutive effect for the years ended December 31, 2012, 2011 or 2010.

Dividends

	Years Ended December 31,		
Dividend Payments on Common Stock	**2012**	**2011**	**2010**
Per Share	$ 1.42	$ 1.37	$ 1.37
in Millions	$ 718	$ 693	$ 693

On February 19, 2013, PSEG's Board of Directors approved a $ 0.36 per share common stock dividend for the first quarter of 2013.

Note 22. Financial Information by Business Segment

Basis of Organization

PSEG's operating segments are Power, PSE&G and Energy Holdings. The operating segments were determined by management in accordance with GAAP —Disclosures about Segments of an Enterprise and Related Information. These segments were determined based on how management measures performance based on segment Net Income, as illustrated in the following table, and how it allocates resources to each business.

See Note 1. Organization, Basis of Presentation and Summary of Significant Accounting Policies for additional information.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Power

Power earns revenues by selling energy, capacity and ancillary services on a wholesale basis under contract to power marketers and to load serving entities and by bidding energy, capacity and ancillary services into the markets for these products. Power also enters into contracts for energy, capacity, FTRs, gas, emission allowances and other energy-related contracts to optimize the value of its portfolio of generating assets and its electric and gas supply obligations.

PSE&G

PSE&G earns revenues from its tariffs, under which it provides electric transmission and electric and gas distribution services to residential, commercial and industrial customers in New Jersey. The rates charged for electric transmission are regulated by the FERC while the rates charged for electric and gas distribution are regulated by the BPU. Revenues are also earned from several other activities such as sundry sales, the appliance service business, wholesale transmission services and other miscellaneous services.

Energy Holdings

Energy Holdings earns revenues from its solar generation projects and its portfolio of passive investments primarily consisting of domestic leveraged leases. Gains and losses on sales of the lease investments are typically recognized in revenues. Energy Holdings also has equity method generation projects. Earnings from these projects are presented below Operating Income.

Other

Other activities include amounts applicable to PSEG (parent corporation), Services and intercompany eliminations, primarily relating to intercompany transactions between Power and PSE&G. No gains or losses are recorded on any intercompany transactions; rather, all intercompany transactions are at cost or, in the case of the BGS and BGSS contracts between Power and PSE&G, at rates prescribed by the BPU. For a further discussion of the intercompany transactions between Power and PSE&G, see Note 23. Related-Party Transactions. The net losses primarily relate to financing and certain administrative and general costs.

Long-Term Accrued Taxes Receivable (Payable) (C)	**$ (32)**	**$ (83)**

(A) PSE&G has a full requirements contract with Power to meet the supply requirements of default service gas customers. This long-term contract was for an initial period which extended through March 31, 2012 and continues on a year-to-year basis thereafter, unless terminated by either party with a one year notice. Power has also entered into contracts to supply energy, capacity and ancillary services to PSE&G through the BGS auction process.

(B) Services provides and bills administrative services to Power and PSE&G at cost. In addition, Power and PSE&G have other payables to Services, including amounts related to certain common costs, such as pension and OPEB costs, which Services pays on behalf of each of the operating companies.

(C) PSEG files a consolidated federal income tax return with its affiliated companies. A tax allocation agreement exists between PSEG and each of its affiliated companies. The general operation of these agreements is that the subsidiary company will compute its taxable income on a stand-alone basis. If the result is a net tax liability, such amount shall be paid to PSEG. If there are net operating losses and/or tax credits, the subsidiary shall receive payment for the tax savings from PSEG to the extent that PSEG is able to utilize those benefits.

(D) Power's short-term loans with PSEG are for working capital and other short-term needs. Interest Income and Interest Expense relating to these short-term funding activities were immaterial.

(E) Power and PSE&G have advanced working capital to Services. The amounts are included in Other Noncurrent Assets on Power's and PSE&G's Consolidated Balance Sheets.

(F) In 2008, the BPU issued a decision that certain BGS suppliers will be reimbursed for the cost they incurred above $300 per Solar Renewable Energy Certificate (SREC) during the period June 1, 2008 through May 31, 2010. The BPU order further provided that the excess cost may be passed on to ratepayers. Following an appeal, on March 10, 2011, the New Jersey Supreme Court reversed and remanded the BPU's 2008 order. On May 1, 2012, the BPU reaffirmed its earlier decision and on December 19, 2012, approved a settlement that defines requirements for review and reimbursement of incremental SREC costs to certain BGS suppliers. PSE&G has estimated and accrued a total liability for the excess SREC cost of $17 million as of December 31, 2012 and 2011, including approximately $7 million for Power's share which is included in PSE&G's Accounts Payable—Affiliated Companies as of December 31, 2012 and 2011. Under current guidance, Power is unable to record the related intercompany receivable on its Consolidated Balance Sheet. As a result, PSE&G's liability to Power is not eliminated in consolidation and is included in Other Current Liabilities on PSEG's Consolidated Balance Sheet as of December 31, 2012 and 2011.

Note 24. Selected Quarterly Data (Unaudited)

The information shown in the following tables, in the opinion of PSEG, Power and PSE&G includes all adjustments, consisting only of normal recurring accruals, necessary to fairly present such amounts.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

PSEG, Power and PSE&G

We have established and maintain disclosure controls and procedures as defined under Rule 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (Exchange Act) that are designed to provide reasonable assurance that information required to be disclosed in the reports that are filed or submitted under the Exchange Act is recorded, processed, summarized and reported and is accumulated and communicated to the Chief Executive Officer and Chief Financial Officer of each respective company, as appropriate, by others within the entities to allow timely decisions regarding required disclosure. We have established a disclosure committee which includes several key management employees and which reports directly to the Chief Financial Officer and Chief Executive Officer of each respective company. The committee monitors and evaluates the effectiveness of these disclosure controls and procedures. The Chief Financial Officer and Chief Executive Officer of each company have evaluated the effectiveness of the disclosure controls and procedures and, based on this evaluation, have concluded that disclosure controls and procedures at each respective company were effective at a reasonable assurance level as of the end of the period covered by the report.

Internal Controls

PSEG, Power and PSE&G

We have conducted assessments of our internal control over financial reporting as of December 31, 2012, as required by Section 404 of the Sarbanes-Oxley Act, using the framework promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as "COSO". Management's reports on PSEG's, Power's and PSE&G's internal control over financial reporting are included on pages 173, 174 and 175, respectively. The Independent Registered Public Accounting Firm's report with respect to the effectiveness of PSEG's internal control over financial reporting is included on page 176. Management has concluded that internal control over financial reporting is effective as of December 31, 2012.

We continually review our disclosure controls and procedures and make changes, as necessary, to ensure the quality of their financial reporting. There have been no changes in internal control over financial reporting that occurred during the fourth quarter of 2012 that have materially affected, or are reasonably likely to materially affect, each registrant's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

S1-SSA-0009 - 10795

Source: PUBLIC SERVICE ELECTRIC & GAS CO, 10-K, February 26, 2013 Powered by Morningstar® Document Research℠

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

MANAGEMENT REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING—PSEG

Management of Public Service Enterprise Group (PSEG) is responsible for establishing and maintaining effective internal control over financial reporting and for the assessment of the effectiveness of internal control over financial reporting. As defined by the SEC in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and implemented by the company's management and other personnel, with oversight by the Audit Committee of the Board of Directors to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America (generally accepted accounting principles).

PSEG's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of PSEG's assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of PSEG are being made only in accordance with authorizations of PSEG's management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of PSEG's assets that could have a material effect on the financial statements.

In connection with the preparation of PSEG's annual financial statements, management of PSEG has undertaken an assessment, which includes the design and operational effectiveness of PSEG's internal control over financial reporting using the framework promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as "COSO". The COSO framework is based upon five integrated components of control: control environment, risk assessment, control activities, information and communications and ongoing monitoring.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projection of any evaluation of effectiveness to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Based on the assessment performed, management has concluded that PSEG's internal control over financial reporting is effective and provides reasonable assurance regarding the reliability of PSEG's financial reporting and the preparation of its financial statements as of December 31, 2012 in accordance with generally accepted accounting principles. Further, management has not identified any material weaknesses in internal control over financial reporting as of December 31, 2012.

PSEG's external auditors, Deloitte & Touche LLP, have audited PSEG's financial statements for the year ended December 31, 2012 included in this annual report on Form 10-K and, as part of that audit, have issued a report on the effectiveness of PSEG's internal control over financial reporting, a copy of which is included in this annual report on Form 10-K.

/S/ RALPH IZZO

MANAGEMENT REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING—Power

Management of PSEG Power LLC (Power) is responsible for establishing and maintaining effective internal control over financial reporting and for the assessment of the effectiveness of internal control over financial reporting. As defined by the SEC in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and implemented by the company's management and other personnel, with oversight by the Audit Committee of the Board of Directors of its parent, Public Service Enterprise Group Incorporated, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America (generally accepted accounting principles).

Power's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of Power's assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of Power are being made only in accordance with authorizations of Power's management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of Power's assets that could have a material effect on the financial statements.

In connection with the preparation of Power's annual financial statements, management of Power has undertaken an assessment, which includes the design and operational effectiveness of Power's internal control over financial reporting using the framework promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as "COSO". The COSO framework is based upon five integrated components of control: control environment, risk assessment, control activities, information and communications and ongoing monitoring.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projection of any evaluation of effectiveness to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Based on the assessment performed, management has concluded that Power's internal control over financial reporting is effective and provides reasonable assurance regarding the reliability of Power's financial reporting and the preparation of its financial statements as of December 31, 2012 in accordance with generally accepted accounting principles. Further, management has not identified any material weaknesses in internal control over financial reporting as of December 31, 2012.

MANAGEMENT REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING—PSE&G

Management of Public Service Electric and Gas Company (PSE&G) is responsible for establishing and maintaining effective internal control over financial reporting and for the assessment of the effectiveness of internal control over financial reporting. As defined by the SEC in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and implemented by the company's management and other personnel, with oversight by the Audit Committee of the Board of Directors of its parent, Public Service Enterprise Group Incorporated, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America (generally accepted accounting principles).

PSE&G's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of PSE&G's assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of PSE&G are being made only in accordance with authorizations of PSE&G's management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of PSE&G's assets that could have a material effect on the financial statements.

In connection with the preparation of PSE&G's annual financial statements, management of PSE&G has undertaken an assessment, which includes the design and operational effectiveness of PSE&G's internal control over financial reporting using the framework promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as "COSO". The COSO framework is based upon five integrated components of control: control environment, risk assessment, control activities, information and communications and ongoing monitoring.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projection of any evaluation of effectiveness to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Based on the assessment performed, management has concluded that PSE&G's internal control over financial reporting is effective and provides reasonable assurance regarding the reliability of PSE&G's financial reporting and the preparation of its financial statements as of December 31, 2012 in accordance with generally accepted accounting principles. Further, management has not identified any material weaknesses in internal control over financial reporting as of December 31, 2012.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors of

Public Service Enterprise Group Incorporated:

We have audited the internal control over financial reporting of Public Service Enterprise Group Incorporated and subsidiaries (the "Company") as of December 31, 2012, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Report on Internal Control Over Financial Reporting-PSEG. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on the criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and consolidated financial statement schedule listed in the Index at Item 15(B)(a) as of and for the year ended December 31, 2012 of the Company and our report dated February 25, 2013 expressed an unqualified opinion on those consolidated financial statements and consolidated financial statement schedule.

Energy Holdings' and Services' respective principal executive officer, principal financial officer, principal accounting officer or Controller and persons performing similar functions). Each such person is responsible for understanding and complying with the Standards. The Standards are posted on our website, www.pseg.com/info/investors/governance/document.jsp. We will send you a copy on request.

The Standards establish a set of common expectations for behavior to which each employee must adhere in dealings with investors, customers, fellow employees, competitors, vendors, government officials, the media and all others who may associate their words and actions with us. The Standards have been developed to provide reasonable assurance that, in conducting our business, employees behave ethically and in accordance with the law and do not take advantage of investors, regulators or customers through manipulation, abuse of confidential information or misrepresentation of material facts.

We will post on our website, www.pseg.com/info/investors/governance/document.jsp:

- Any amendment (other than one that is technical, administrative or non-substantive) that we adopt to our Standards; and
- Any grant by us of a waiver from the Standards that applies to any director, principal executive officer, principal financial officer, principal accounting officer or Controller, or persons performing similar functions, for us or our direct subsidiaries noted above, and that relates to any element enumerated by the SEC.

In 2012, we did not grant any waivers to the Standards.

ITEM 11. EXECUTIVE COMPENSATION

PSEG

The information required by Item 11 of Form 10-K is set forth in PSEG's definitive Proxy Statement for the 2013 Annual Meeting of Stockholders which definitive Proxy Statement is expected to be filed with the U.S. Securities and Exchange Commission (SEC) on or about March 8, 2013 and such information set forth under such heading is incorporated herein by this reference thereto.

Section 16 Beneficial Ownership Reporting Compliance

During 2012, none of our directors or executive officers was late in filing a Form 3, 4 or 5 in accordance with the requirements of Section 16(a) of the Securities Exchange Act of 1934, as amended, with regard to transactions involving our Common Stock, with the exception of Susan Tomasky, one of our Directors. Ms. Tomasky filed one late report on Form 3 to report any ownership by her of our Common Stock at the time of her election to the Board. At that time, Ms. Tomasky did not own any of our Common Stock.

Power and PSE&G

Omitted pursuant to conditions set forth in General Instruction I of Form 10-K.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDERS MATTERS

PSEG

The information required by Item 12 of Form 10-K with respect to directors, executive officers and certain beneficial owners is set forth under the heading "Security Ownership of Directors, Management and Certain Beneficial Owners" in PSEG's definitive Proxy Statement for the 2013 Annual Meeting of Stockholders which definitive Proxy Statement is expected to be filed with the SEC on or about March 8, 2013, and such information set forth under such heading is incorporated herein by this reference thereto.

For information relating to securities authorized for issuance under equity compensation plans, see Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Power and PSE&G

Omitted pursuant to conditions set forth in General Instruction I of Form 10-K.

GLOSSARY OF TERMS

When the following terms and abbreviations appear in the text of this report, they have the meanings indicated below:

Term	Phrase/Description
Base load	Minimum amount of electric power delivered or required over a given period of time at a constant rate, this is the level of demand that is seen as a minimum during a 24-hour day
BGS	Basic Generation Service
	PSE&G is required to provide BGS for all customers in New Jersey who are not supplied by a TPS.
BGS-Fixed Price	Basic Generation Service-Fixed Price
	Seasonally adjusted fixed prices charged for a three-year term for electric supply service to smaller industrial and commercial customers and residential customers who are not supplied by a TPS
BGSS	Basic Gas Supply Service
	Mechanism approved by the BPU for NJ utilities to recover all commodity costs related to supplying gas to residential customers
BPU	New Jersey Board of Public Utilities
	Agency responsible for regulating public utilities doing business in New Jersey
Capacity	Amount of electricity that can be produced by a specific generating facility
CAA	Clean Air Act
Combined Cycle	A method of generation whereby electricity and process steam are produced from otherwise lost waste heat exiting from one or more combustion turbines. The exiting heat is routed to a conventional boiler or to a heat recovery steam generator for use by a steam turbine in the production of electricity
Competition Act	Electric Discount and Energy Competition Act
	New Jersey's 1999 Electric Utility Restructuring Legislation
Congestion	Condition when the available capacity of a transmission line is being closely approached (or exceeded) by the electric power trying to go through it; at such times, alternative power line pathways (or local generators near the load) must be used instead
Distribution	The delivery of electricity to the retail customer's home, business or industrial facility through low voltage distribution lines
EDC	Electric Distribution Company
	A company that owns the power lines and equipment necessary to deliver purchased electricity to the end user.
Energy Holdings	PSEG Energy Holdings L.L.C.
EPA	U.S. Environmental Protection Agency
FASB	Financial Accounting Standards Board
	A private, not-for-profit organization whose primary purpose, as designated by the SEC, is to develop accounting standards for public companies in the U.S.
FERC	U.S. Federal Energy Regulatory Commission
Forward contracts	A customized, non-exchange traded contract in which the buyer is obligated to deliver a specified amount of a commodity with a predetermined price formula on a specified future date, at which time payment is due in full
GAAP	Generally Accepted Accounting Principles
	Standard framework of guidelines issued by the FASB for financial accounting used in the U.S.
GHG	Greenhouse gas emissions (including carbon dioxide, methane, nitrous oxide, ozone, and chlorofluorocarbon) that trap the heat of the sun in the earth's atmosphere, increasing the mean global surface temperature of the earth

Term	Phrase/Description
Grid	A system of interconnected power lines and generators that is managed so that the generators are dispatched as needed to meet the electricity requirements of the customers connected to the grid at various points
Hedging	Entering into a contract or transaction designed to reduce exposure to various risks, such as changes in market prices
Hope Creek	Hope Creek Nuclear Generating Station
ISO	Independent System Operator
	An independent, regulated entity established to manage a regional electric transmission system in a non-discriminatory manner and to help ensure the safety and reliability of the bulk of the power system
ITC	Investment Tax Credit
	A credit against income taxes, usually computed as a percent of the cost of investment in certain types of assets
LCAPP	Long-Term Capacity Agreement Pilot Program
	A program established in January 2011 which provides for up to 2,000 MW of subsidized base load or mid-merit electric power generation in New Jersey.
Lifeline Program	A New Jersey social program for utility assistance that offers $225 per year to persons who meet the eligibility requirements
Load	Amount of electric power delivered or required at any specific point or points on a system. The requirement originates at the energy-consuming equipment of consumers.
MBR	Market Based Rates
	Electric service prices determined in an open market system of supply and demand under which the price is set solely by agreement as to what a buyer will pay and a seller will accept
MGP	Manufactured Gas Plant
NDT	Nuclear Decommissioning Trust
ISO-NE	New England Power Pool
	An ISO comprised of an alliance of approximately 100 utility companies who manage and direct all major energy production and transmission in the New England states
NJDEP	New Jersey Department of Environmental Protection
NRC	U.S. Nuclear Regulatory Commission
NUG	Non-Utility Generation
	Power produced by independent power producers, exempt wholesale generators and other companies that have been exempted from traditional utility regulation
OPEB	Other Postretirement Benefits
	Benefits other than pensions payable to former employees
Outage	The period during which a generating unit, transmission line, or other facility is out of service due to scheduled (planned) or unscheduled maintenance
Peach Bottom	Peach Bottom Atomic Power Station

Term	Phrase/Description
PJM	PJM Interconnection, L.L.C.
	A regional transmission organization that coordinates the movement of wholesale electricity in all or parts of 13 northeastern states and the District of Columbia
Power	PSEG Power LLC
Power Pool	An association of two or more interconnected electric systems having an agreement to coordinate operations and planning for improved reliability and efficiencies
PRP	Potentially Responsible Parties
PSE&G	Public Service Electric and Gas Company
PSEG	Public Service Enterprise Group Incorporated
Renewable Energy	Energy derived from resources that are regenerative or that cannot be depleted (i.e. moving water (hydro, tidal and wave power), thermal gradients in ocean water, biomass, geothermal energy, solar energy, and wind energy)
Regulatory Asset	Costs deferred by a regulated utility company in accordance with SFAS 71
Regulatory Liability	Costs recognized by a regulated utility company in accordance with SFAS 71
RGGI	Regional Greenhouse Gas Initiative
	The first mandatory, market-based effort in the U. S. to reduce greenhouse gas emissions; states will sell emission allowances through auctions and invest proceeds in consumer benefits: energy efficiency, renewable energy, and other clean energy technologies
RMR	Reliability-Must-Run
	Designation of a power plant whose output is needed to maintain local reliability regardless of its operating cost or market price
RPM	Reliability Pricing Model
	A process for pricing generation capacity based on overall system reliability requirements; using multi-year forward auctions, participants could bid capacity in the form of generation, demand response, or transmission to meet reliability needs by location and/or an ISO market
Salem	Salem Nuclear Generating Station
SBC	Societal Benefits Charge
SEC	U.S. Securities and Exchange Commission
Services	PSEG Services Corporation
Spill Act	New Jersey Spill Compensation and Control Act
TPS	Third Party Supplier
Transmission	The high-voltage wires and networks that move electricity through states and regions in large quantities -- from power plants where it is produced, to the distribution networks that deliver it to homes and businesses.

WHEREAS, the Indenture granted, bargained, sold, aliened, remised, released, conveyed, confirmed, assigned, transferred and set over unto the Trustee certain property of the Company, more fully set forth and described in the Indenture, then owned or which might thereafter be acquired by the Company; and

WHEREAS, the Company, by various supplemental indentures, supplemental to the Indenture, the last of which was dated October 1, 2010, has granted, bargained, sold, aliened, remised, released, conveyed, confirmed, assigned, transferred and set over unto the Trustee certain property of the Company acquired by it after the execution and delivery of the Indenture; and

WHEREAS, since the execution and delivery of said supplemental indenture dated October 1, 2010, the Company has acquired property which, in accordance with the provisions of the Indenture, is subject to the lien thereof and the Company desires to confirm such lien; and

WHEREAS, the Indenture has been amended or supplemented from time to time; and

WHEREAS, it is provided in the Indenture that no bonds other than those of the 5-1/2% Series due 1959 therein authorized may be issued thereunder unless a supplemental indenture providing for the issue of such additional bonds shall have been executed and delivered by the Company to the Trustee; and

WHEREAS, the Company is making provisions for the issuance and sale of its Secured Medium-Term Notes, Series H (the “Series H Notes”), to be issued under an Indenture of Trust (the “Note Indenture”) dated as of July 1, 1993 between the Company and The Chase Manhattan Bank (National Association) as predecessor trustee (The Bank of New York Mellon, as successor trustee to the predecessor trustee), as Trustee (the “Note Trustee”); and

WHEREAS, such Note Indenture provides, among other things, for the pledge and delivery by the Company of a series of First and Refunding Mortgage Bonds of the Company to evidence the Company’s obligation to pay the principal and interest with respect to outstanding Series H Notes; and for such purpose and in order to service and secure payment of the principal and interest in respect of the Series H Notes, the Company desires to provide for the issue of $1,500,000,000 aggregate principal amount of bonds under the Indenture of a series to be designated as “First and Refunding Mortgage Bonds, Medium-Term Notes Series H” (hereinafter sometimes called “Bonds of the Medium-Term Notes Series H”); and

WHEREAS, the text of the Bonds of the Medium-Term Notes Series H and of the certificate of authentication to be borne by the Bonds of the Medium-Term Notes Series H shall be substantially of the following tenor:

(FORM OF BOND)

This Bond is not transferable except as provided in the Indenture and in the Indenture of Trust dated as of July 1, 1993 between the Company and The Chase Manhattan Bank (National Association) (The Bank of New York Mellon, successor trustee) as Trustee.

REGISTERED NUMBER R REGISTERED AMOUNT $1,500,000,000

PUBLIC SERVICE ELECTRIC AND GAS COMPANY
FIRST AND REFUNDING MORTGAGE BOND,
MEDIUM-TERM NOTES SERIES H

Public Service Electric and Gas Company (hereinafter called the "Company"), a corporation of the State of New Jersey, for value received, hereby promises to pay to The Bank of New York Mellon as successor trustee to The Chase Manhattan Bank (National Association)), under the Indenture of Trust dated as of July 1, 1993 between the Company and such trustee, or registered assigns, on the surrender hereof, the principal sum of One Billion Five Hundred Million Dollars, on May 1, 2047, and to pay interest thereon from the date hereof, at the rate of 10% per annum, and until payment of said principal sum, such interest to be payable May 1 and November 1 in each year; provided, however, that the Company shall receive certain credits against such obligations as set forth in the Supplemental Indenture dated May 1, 2012 referred to below.

Both the principal hereof and interest hereon shall be paid at the principal corporate trust office of U.S. Bank National Association in the City of Morristown, State of New Jersey, or (at the option of the registered owner) at the corporate trust office of any paying agent appointed by the Company, in such coin or currency of the United States of America as at the time of payment shall constitute legal tender for the payment of public and private debts; provided, however, that any such payments of principal and interest shall be subject to receipt of certain credits against such payment obligations as set forth in the Supplemental Indenture dated May 1, 2012 referred to below.

This Bond is one of the First and Refunding Mortgage Bonds of the Company issued and to be issued under and pursuant to, and all equally secured by, an indenture of mortgage or deed of trust dated August 1, 1924, as supplemented and amended by supplemental indentures thereto, including the Supplemental Indenture dated May 1, 2012, duly executed by the Company and U.S. Bank National Association as Trustee. This Bond is one of the Bonds of the Medium-Term Notes Series H, which series is limited to the aggregate principal amount of $1,500,000,000 and is issued pursuant to said Supplemental Indenture dated May 1, 2012. Reference is hereby made to said indenture and all supplements thereto for a specification of the principal amount of Bonds from time to time issuable thereunder, and for a description of the properties mortgaged and conveyed or assigned to said Trustee or its successors, the nature and extent of the security, and the rights of the holders of said Bonds and any coupons appurtenant thereto, and of the Trustee in respect of such security.

In and by said indenture, as amended and supplemented, it is provided that with the written approval of the Company and the Trustee, any of the provisions of said indenture may from time to time be eliminated or modified and other provisions may be added thereto provided the change does not alter the annual interest rate, redemption price or date, date of maturity or amount payable on maturity of any then outstanding Bond or conflict with the Trust Indenture Act of 1939 as then in effect, and provided the holders of 85% in principal amount of the Bonds secured by said indenture and then outstanding (including, if such change affects the Bonds of one or more series but less than all series then outstanding, a like percentage of the then outstanding Bonds of each series affected by such change, and excluding Bonds owned or controlled by the Company or by the parties owning at least 10% of the outstanding voting stock of the Company, as more fully specified in said indenture) consent in writing thereto, all as more fully set forth in said indenture, as amended and supplemented.

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

First and Refunding Mortgage Bonds issuable under said indenture are issuable in series, and the Bonds of any series may be for varying principal amounts and in the form of coupon bonds and of registered bonds without coupons, and the Bonds of any one series may differ from the Bonds of any other series as to date, maturity, interest rate and otherwise, all as in said indenture provided and set forth. The Bonds of the Medium-Term Notes Series H, in which this Bond is included, are designated "First and Refunding Mortgage Bonds, Medium-Term Notes Series H".

In case of the happening of an event of default as specified in said indenture and said supplemental indenture dated March 1, 1942, the principal sum of the Bonds of this series may be declared or may become due and payable forthwith, in the manner and with the effect in said indenture provided.

The Bonds of this series are subject to redemption as provided in the Supplemental Indenture dated May 1, 2012.

This Bond is transferable, but only as provided in said indenture and the Indenture of Trust dated as of July 1, 1993 between the Company and The Chase Manhattan Bank (National Association) as predecessor trustee (The Bank of New York Mellon, as successor trustee to the predecessor trustee), as trustee, upon surrender hereof, by the registered owner in person or by attorney duly authorized in writing, at either of said offices where the principal hereof and interest hereon are payable; upon any such transfer a new fully registered Bond similar hereto will be issued to the transferee. This Bond may in like manner be exchanged for one or more new fully registered Bonds of the same series of other authorized denominations but of the same aggregate principal amount. No service charge shall be made for any such transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in relation thereto. The Company and the Trustee hereunder and any paying agent may deem and treat the person in whose name this Bond is registered as the absolute owner hereof for the purpose of receiving payment of or on account of the principal hereof and the interest hereon and for all other purposes; and neither the Company nor the Trustee hereunder nor any paying agent shall be affected by any notice to the contrary.

The Bonds of this series are issuable only in fully registered form, in any denomination authorized by the Company.

No recourse under or upon any obligation, covenant or agreement contained in said indenture or in any indenture supplemental thereto, or in any Bond issued thereunder, or because of any indebtedness arising thereunder, shall be had against any incorporator, or against any past, present or future stockholder, officer, or director, as such, of the Company or of any successor corporation, either directly or through the Company or any successor corporation, under any rule of law, statute or constitutional provision or by the enforcement of any assessment or by any legal or equitable proceeding or otherwise, it being expressly agreed and understood that said indenture, any indenture supplemental thereto and the obligations issued thereunder, are solely corporate obligations, and that no personal liability whatever shall attach to, or be incurred by, such incorporators, stockholders, officers or directors, as such, of the Company, or of any successor corporation, or any of them, because of the incurring of the indebtedness thereby authorized, or under or by reason of any of the obligations, covenants or agreements contained in the indenture or in any indenture supplemental thereto or in any of the Bonds issued thereunder, or implied therefrom.

This Bond shall not be entitled to any security or benefit under said indenture, as amended and supplemented, and shall not become valid or obligatory for any purpose, until the certificate of authentication, hereon endorsed, shall have been signed by U.S. Bank National Association as Trustee, or by its successor in trust under said indenture.

WHEREAS, the execution and delivery of this supplemental indenture have been duly authorized by the Board of Directors of the Company; and

WHEREAS, the Company represents that all things necessary to make the bond of the series hereinafter described, when duly authenticated by the Trustee and issued by the Company, a valid, and legal obligation of the Company, and to make this supplemental indenture a valid and binding agreement supplemental to the Indenture, have been done and performed:

NOW, THEREFORE, THIS SUPPLEMENTAL INDENTURE WITNESSETH that the Company, in consideration of the premises and the execution and delivery by the Trustee of this supplemental indenture, and in pursuance of the covenants and agreements contained in the Indenture and for other good and valuable consideration, the receipt of which is hereby acknowledged, has granted, bargained, sold, aliened, remised, released, conveyed, confirmed, assigned, transferred and set over, and by these presents does grant, bargain, sell, alien, remise, release, convey, confirm, assign, transfer and set over unto the Trustee, its successors and assigns, forever, all the right, title and interest of the Company in and to all property of every kind and description (except cash, accounts and bills receivable and all merchandise bought, sold or manufactured for sale in the ordinary course of the Company's business, stocks, bonds or other corporate obligations or securities, other than such as are described in Part V of the Granting Clauses of the Indenture, not acquired with the proceeds of bonds secured by the Indenture, and except as in the Indenture and herein otherwise expressly excluded) acquired by the Company since the execution and delivery of the supplemental indenture dated October 1, 2010, subsequent to the Indenture (except any such property duly released from, or disposed of, free from the lien of the Indenture, in accordance with the provisions thereof) and all such property which at any time hereafter may be acquired by the Company;

All of which property it is intended shall be included in and granted by this supplemental indenture and covered by the lien of the Indenture as heretofore and hereby amended and supplemented;

UNDER AND SUBJECT to any encumbrances or mortgages existing on property acquired by the Company at the time of such acquisition and not heretofore discharged of record; and

SUBJECT also, to the exceptions, reservations and provisions in the Indenture and in this supplemental indenture recited, and to the liens, reservations, exceptions, limitations, conditions and restrictions imposed by or contained in the several deeds, grants, franchises and contracts or other instruments through which the Company acquired or claims title to the aforesaid property; and Subject, also, to the existing leases, to liens on easements or rights of way, to liens for taxes, assessments and governmental charges not in default or the payment of which is deferred, pending appeal or other contest by legal proceedings, pursuant to Section 4 of Article Five of the indenture, or the payment of which is deferred pending billing, transfer of title or final determination of amount, to easements for alleys, streets, highways, rights of way and railroads that may run across or encroach upon the said property, to joint pole and similar agreements, to undetermined liens and charges, if any, incidental to construction, and other encumbrances permitted by the indenture as heretofore and hereby amended and supplemented;

TO HAVE AND TO HOLD the property hereby conveyed or assigned, or intended to be conveyed or assigned, unto the Trustee, its successor or successors and assigns, forever;

IN TRUST, NEVERTHELESS, upon the terms, conditions and trusts set forth in the Indenture as heretofore and hereby amended and supplemented, to the end that the said property shall be subject to the lien of the Indenture as heretofore and hereby amended and supplemented, with the same force and effect as though said property had been included in the Granting Clauses of the Indenture at the time of the execution and delivery thereof;

AND THIS SUPPLEMENTAL INDENTURE FURTHER WITNESSETH that for the considerations aforesaid, it is hereby covenanted between the Company and the Trustee as follows:

ARTICLE I.

BONDS OF THE MEDIUM-TERM NOTES SERIES H.

The series of bonds authorized by this supplemental indenture to be issued under and secured by the Indenture shall be designated "First and Refunding Mortgage Bonds, Medium-Term Notes Series H"; shall be limited to the aggregate principal amount of $1,500,000,000; shall be issued initially to the Note Trustee and shall mature and bear interest as set forth in the form of bond set forth herein; provided, however, that the Company shall receive certain credits against principal and interest as set forth in Section 3.01 hereof. The date of each Bond of the Medium-Term Notes Series H shall be the interest payment date next preceding the date of authentication, unless such date of authentication be an interest payment date, in which case the date shall be the date of authentication, or unless such date of authentication be prior to the first semi-annual interest payment date, in which case the date shall be May 1, 2012.

Bonds of the Medium-Term Notes Series H shall be issuable only in the form of fully registered bonds in any denomination authorized by the Company. Interest on the Bonds of the Medium-Term Notes Series H shall be payable semi-annually in arrears on May 1 and November 1 of each year, payable initially on November 1, 2012, subject to receipt of certain credits against principal and interest as set forth in Section 3.01 hereof and shall be payable as to both principal and interest in such coin or currency of the United States of America as at the time of payment shall constitute legal tender for the payment of public and private debts, at the principal corporate trust office of the Trustee, or at the corporate trust office of any paying agent appointed.

Bonds of the Medium-Term Notes Series H shall be transferable and exchangeable, but only as provided in the Indenture and the Note Indenture, upon surrender thereof for cancellation by the registered owner in person or by attorney duly authorized in writing at either of said offices. The Company hereby waives any right to make a charge for any transfer or exchange of Bonds of the Medium-Term Notes Series H, but the Company may require payment of a sum sufficient to cover any tax or any other governmental charge that may be imposed in relation thereto.

ARTICLE II.

REDEMPTION OF BONDS OF MEDIUM-TERM NOTES SERIES H.

SECTION 2.01. *Redemption—Redemption Price*. Bonds of the Medium-Term Notes Series H shall be subject to redemption prior to maturity under the conditions, and upon payment of the amounts as may be specified in the following conditions:

(a) at any time in whole or in part at the option of the Company upon receipt by the Trustee of written certification of the Company and of the Note Trustee that the principal amount of the Series H Notes then outstanding under the Note Indenture is not in excess of such principal amount of the Bonds of the Medium-Term Notes Series H as shall remain pledged to the Note Trustee after giving effect to such redemption; (b) at any time by the application of any proceeds of released property or other money held by the Trustee and which, pursuant to Section 4C of Article Eight of the Indenture, as amended and supplemented, are applied to the redemption of Bonds of the Medium-Term Notes Series H, upon payment of 100% of the principal amount thereof, together with interest accrued to the redemption date, provided that any such payment shall be subject to receipt by the Company of certain credits against such obligations as set forth in Section 3.01 hereof or (c) automatically upon failure to pay the principal of any Series H Notes then outstanding under the Note Indenture when due, on their stated maturity date or earlier redemption or repayment date, in a principal amount of Bonds of the Medium-Term Notes Series H equal to the principal amount of such Series H Notes, in each case, at a price equal to 100% of the principal amount thereof, together with accrued interest, if applicable.

SECTION 2.02. *Redemptions Pursuant to Section 4C of Article Eight of the Indenture*. If, pursuant to Section 4C of Article Eight of the Indenture, as amended and supplemented, any proceeds of released property or other money then held by the Trustee shall be applied to the redemption of the Bonds of the Medium-Term Notes Series H, the Trustee shall give at least 45 days prior written notice of such redemption to the Note Trustee whereupon on the date fixed for redemption such principal amount thereof

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

as is equal to such proceeds shall be redeemed; provided that no such redemption shall be made unless the Trustee shall be in receipt of a written certification of the Company and the Note Trustee that a like principal amount of Series H Notes shall have been theretofore redeemed in accordance with the provisions of the Note Indenture. For purposes of determining which of the Company's First and Refunding Mortgage Bonds are subject to such mandatory redemption, the Mortgage Trustee shall consider the 10% stated annual interest rate of the Bonds of the Medium-Term Notes Series H, not the weighted average interest rate of outstanding Series H Notes. Bonds of said series so redeemed shall be cancelled.

SECTION 2.03. *Interest on Called Bonds to Cease.* Each Bond of the Medium-Term Notes Series H or portion thereof called for redemption under Section 2.02 hereof shall be due and payable at the office of the Note Trustee, as paying agent hereunder, at its redemption price and on the specified redemption date, anything herein or in such Bond to the contrary notwithstanding. From and after the date when each Bond of the Medium-Term Notes Series H or portion thereof shall be due and payable as aforesaid (unless upon said date the full amount due thereon shall not be held by the Note Trustee, as paying agent hereunder, and be immediately available for payment), all further interest shall cease to accrue on such bond or on such portion thereof, as the case may be.

SECTION 2.04. *Bonds Called in Part.* If only a portion of any Bond of the Medium-Term Notes Series H shall be called for redemption pursuant to Section 2.02 hereof, upon payment of the portion so called for redemption, the Note Trustee shall make an appropriate notation upon the Bond of the principal amount so redeemed.

SECTION 2.05. *Provisions of Indenture Not Applicable*. The provisions of Article Four of the Indenture, as amended and supplemented, shall not apply to the procedure for the exercise of any right of redemption reserved by the Company, or to any mandatory redemption provided, in this Article in respect of the Bonds of the Medium-Term Notes Series H. There shall be no sinking fund for the Bonds of the Medium-Term Notes Series H.

ARTICLE III.

CREDITS WITH RESPECT TO BONDS OF THE MEDIUM-TERM NOTES SERIES H.

SECTION 3.01. *Credits.* In addition to any other credit, payment or satisfaction to which the Company is entitled with respect to the Bonds of the Medium-Term Notes Series H, the Company shall be entitled to credits against amounts otherwise payable in respect of the Bonds of the Medium-Term Notes Series H in an amount corresponding to (i) the principal amount of any of the Company's Series H Notes issued under the Note Indenture surrendered to the Note Trustee by the Company, or purchased by the Note Trustee, for cancellation, (ii) the amount of money held by the Note Trustee and available and designated for the payment of principal or redemption price (exclusive of any premium) of, and/or interest on, the Series H Notes, regardless of the source of payment to the Note Trustee of such moneys and (iii) the amount by which principal of and interest due on the Bonds of the Medium-Term Notes Series H exceeds principal of and interest due on the Series H Notes. The Note Trustee shall make notation on such Bonds authorized hereby of any such credit.

SECTION 3.02. *Certificate of the Company.* A certificate of the Company signed by the President or any Vice President, and attested to by the Secretary or any Assistant Secretary, and consented to by the Note Trustee, stating that the Company is entitled to a credit under Section 3.01 hereof or that Bonds of the Medium-Term Notes Series H have been cancelled, and setting forth the basis therefor in reasonable detail, shall be conclusive evidence of such entitlement, and the Trustee shall accept such certificate as such evidence without further investigation or verification of the matters stated therein.

ARTICLE IV.

MISCELLANEOUS.

SECTION 4.01. *Authentication of Bonds of Medium-Term Notes Series H.* None of the Bonds of the Medium-Term Notes Series H, the issue of which is provided for by this supplemental indenture, shall be authenticated by or on behalf of the Trustee except in accordance with the provisions of the Indenture, as amended and supplemented, and this supplemental indenture, and upon compliance with the conditions in that behalf therein contained.

SECTION 4.02. *Additional Restrictions on Authentication of Additional Bonds Under Indenture.* The Company covenants that from and after the date of execution of this supplemental indenture no additional bonds (as defined in Section 1 of Article Two of the Indenture) shall be authenticated and delivered by the

Past financial performance is no guarantee of future results.

Trustee under Subdivision A of Section 4 of said Article Two on account of additions or improvements to the mortgaged property;

(1) unless the net earnings of the Company for the period required by Subdivision C of Section 6 of said Article Two shall have been at least twice the fixed charges (in lieu of 1-3/4 times such fixed charges, as required by said Subdivision C); and for the purpose of this condition (a) such fixed charges shall in each case include interest on the bonds applied for, notwithstanding the parenthetical provision contained in clause (4) of said Subdivision C, and (b) in computing such net earnings there shall be included in expenses of operation (under paragraph (c) of said Subdivision C) all charges against earnings for depreciation, renewals or replacements, and all certificates with respect to net earnings delivered to the Trustee in connection with any authentication of additional bonds under said Article Two shall so state; and (2) except to the extent of 60% (in lieu of 75% as permitted by Subdivision A of Section 7 of said Article Two) of the cost or fair value to the Company of the additions or improvements forming the basis for such authentication of additional bonds.

SECTION 4.03. *Restriction on Dividends.* The Company will not declare or pay any dividend on any shares of its common stock (other than dividends payable in shares of its common stock) or make any other distribution on any such shares, or purchase or otherwise acquire any such shares (except shares acquired without cost to the Company) whenever such action would reduce the earned surplus of the Company to an amount less than $10,000,000 or such lesser amount as may remain after deducting from said $10,000,000 all amounts appearing in the books of account of the Company on December 31, 1948, which shall thereafter, pursuant to any order or rule of any regulatory body entered after said date, be required to be removed, in whole or in part, from the books of account of the Company by charges to earned surplus.

SECTION 4.04. *Use of Facsimile Seal and Signatures.* The seal of the Company and any or all signatures of the officers of the Company upon any of the Bonds of the Medium-Term Notes Series H may be facsimiles.

SECTION 4.05. *Time for Making of Payment.* All payments of principal or redemption price of, and interest on, the Bonds of the Medium-Term Notes Series H shall be made either prior to the due date thereof or on the due date thereof in immediately available funds. In any case where the date of any such payment shall be a Saturday or Sunday or a legal holiday or a day on which banking institutions in the city of payment are authorized by law to close, then such payment need not be made on such date but may be made on the next succeeding business day with the same force and effect as if made on the due date, and no interest on such payment shall accrue for the period after such date.

SECTION 4.06. *Effective Period of Supplemental Indenture.* The preceding provisions of Articles I, II and III of this supplemental indenture shall remain in effect only so long as any of the Bonds of the Medium-Term Notes Series H shall remain outstanding.

SECTION 4.07. *Effect of Approval of Board of Public Utilities of the State of New Jersey.* The approval of the Board of Public Utilities of the State of New Jersey of the execution and delivery of these presents and of the issue of any Bond of the Medium-Term Notes Series H shall not be construed as approval of said Board of any other act, matter or thing which requires approval of said Board under the laws of the State of New Jersey.

SECTION 4.08. *Execution in Counterparts.* For the purpose of facilitating the recording hereof, this supplemental indenture has been executed in several counterparts, each of which shall be and shall be taken to be an original, and all collectively but one instrument.

WHEREAS, the Indenture granted, bargained, sold, aliened, remised, released, conveyed, confirmed, assigned, transferred and set over unto the Trustee certain property of the Company, more fully set forth and described in the Indenture, then owned or which might thereafter be acquired by the Company; and

WHEREAS, the Company, by various supplemental indentures, supplemental to the Indenture, the last of which was dated May 1, 2012, has granted, bargained, sold, aliened, remised, released, conveyed, confirmed, assigned, transferred and set over unto the Trustee certain property of the Company acquired by it after the execution and delivery of the Indenture; and

WHEREAS, since the execution and delivery of said supplemental indenture dated May 1, 2012, the Company has acquired property which, in accordance with the provisions of the Indenture, is subject to the lien thereof and the Company desires to confirm such lien; and

WHEREAS, the Indenture has been amended or supplemented from time to time; and

WHEREAS, it is provided in the Indenture that no bonds other than those of the 5 1/2% Series due 1959 therein authorized may be issued thereunder unless a supplemental indenture providing for the issue of such additional bonds shall have been executed and delivered by the Company to the Trustee; and

WHEREAS, The Pollution Control Financing Authority of Salem County (the "Authority") has previously issued and sold $50,000,000 aggregate principal amount of its Pollution Control Revenue Bonds, 1994 Series A (Public Service Electric and Gas Company Project) (the "1994 Authority Bonds") to finance the acquisition and construction by the Company of certain pollution control facilities at the Hope Creek Generating Station located in Lower Alloways Creek Township, Salem County, New Jersey (such generating station being sometimes referred to herein as the "Plant" and the pollution control facilities being sometimes referred to herein as the "Project"); and

WHEREAS, the ownership and operation of the Plant and the Project has been transferred by the Company to its affiliate, PSEG Nuclear LLC ("PSEG Nuclear"); and

WHEREAS, the Authority is making provision for the issuance and sale of its Pollution Control Revenue Refunding Bonds, 2012 Series A (Public Service Electric and Gas Company Project) (the "2012 Authority Bonds") to provide a portion of the funds for the refunding and redemption of the 1994 Authority Bonds; and

WHEREAS, the 2012 Authority Bonds are to be issued under a Trust Indenture to be dated as of June 1, 2012 (the "Authority Indenture") between the Authority and U.S. Bank National Association, as trustee (the "Authority Trustee"); and

WHEREAS, the Company will enter into a Pollution Control Facilities Loan Agreement dated as of June 1, 2012 (the "Agreement") with the Authority providing, among other things, for the loan by the Authority to the Company of funds to provide a portion of the funds for the refunding and redemption of the 1994 Authority Bonds, and for the issuance by the Company to the Authority Trustee, as assignee of the Authority, of First and Refunding Mortgage Bonds of the Company to evidence the Company's obligation to repay said loan, and for such purposes the Company desires to provide for the issue of $50,000,000 aggregate principal amount of bonds secured by the Indenture of a series to be designated as "First and Refunding Mortgage Bonds, Pollution Control Series AG" (hereinafter sometimes called "Pollution Control Series AG"); and

WHEREAS, the text of the bonds of the Pollution Control Series AG and of the certificate of authentication to be borne by the bonds of the Pollution Control Series AG shall be substantially of the following tenor:

[FORM OF BOND]

This Bond is not transferable except as provided in the Trust Indenture dated as of June 1, 2012 between The Pollution Control Financing Authority of Salem County and U.S. Bank National Association, as Trustee (the "Authority Indenture"). Capitalized terms used herein, not otherwise expressly defined herein, shall have the meanings ascribed to them in the Authority Indenture.

REGISTERED REGISTERED
NUMBER AMOUNT
R- $50,000,000

PUBLIC SERVICE ELECTRIC AND GAS COMPANY
FIRST AND REFUNDING MORTGAGE BOND,
POLLUTION CONTROL SERIES AG

Public Service Electric and Gas Company (hereinafter called the "Company"), a corporation of the State of New Jersey, for value received, hereby promises to pay to U.S. Bank National Association, as trustee under the Authority Indenture, or registered assigns, the principal sum of Fifty Million Dollars, on April 1, 2046, and to pay interest thereon from the date hereof, at the rate of 15.0% per annum, and until payment of said principal sum, provided, however, that the Company shall receive certain credits against such obligations to the extent that interest payable by the Authority from time to time for the Authority's Pollution Control Revenue Refunding Bonds, 2012 Series A (Public Service Electric and Gas Company Project) (the "2012 Authority Bonds") issued pursuant to the Authority Indenture is less than interest calculated pursuant to the foregoing rate. Such interest to be payable at such times and in such manner as interest is payable on the 2012 Authority Bonds.

Both the principal hereof and interest hereon shall be paid at the corporate trust office of U.S. Bank National Association in the City of Morristown, State of New Jersey, or at the corporate trust office of any paying agent appointed by the Company, in such coin or currency of the United States of America as at the time of payment shall constitute legal tender for the payment of public and private debts.

This Bond is one of the First and Refunding Mortgage Bonds of the Company issued and to be issued under and pursuant to, and all equally secured by, an indenture of mortgage or deed of trust dated August 1, 1924, between the Company and U.S. Bank National Association, a national banking association, as successor Trustee, as supplemented and amended by the supplemental indentures thereto, including the supplemental indenture dated June 1, 2012. This Bond is one of the Bonds of the Pollution Control Series AG, which series is limited to the aggregate principal amount of $50,000,000 and is issued pursuant to said supplemental indenture dated June 1, 2012. Reference is hereby made to said indenture and all supplements thereto for a specification of the principal amount of Bonds from time to time issuable thereunder, and for a description of the properties mortgaged and conveyed or assigned to said Trustee or its successors, the nature and extent of the security, and the rights of the holders of said Bonds and any coupons appurtenant thereto, and of the Trustee in respect of such security.

In and by said indenture, as amended and supplemented, it is provided that with the written approval of the Company and the Trustee, any of the provisions of said indenture may from time to time be eliminated or modified and other provisions may be added thereto provided the change does not alter the annual interest rate, interest payment dates, redemption price or date, date of maturity or amount payable on maturity of any then outstanding Bond or conflict with the Trust Indenture Act of 1939 as then in effect, and provided the holders of 85% in principal amount of the Bonds secured by said indenture and then outstanding (including, if such change affects the Bonds of one or more series but less than all series then outstanding, a like percentage of the then outstanding Bonds of each series affected by such change, and excluding Bonds owned or controlled by the Company or by the parties owning at least 10% of the outstanding voting stock of the Company, as more fully specified in said indenture) consent in writing thereto, all as more fully set forth in said indenture, as amended and supplemented.

First and Refunding Mortgage Bonds issuable under said indenture are issuable in series, and the Bonds of any series may be for varying principal amounts and in the form of coupon Bonds and of registered Bonds without coupons, and the Bonds of any one series may differ from the Bonds of any other series as to date, maturity, interest rate and otherwise, all as in said indenture provided and set forth. The Bonds of the Pollution Control Series AG, in which this Bond is included, are designated "First and Refunding Mortgage Bonds, Pollution Control Series AG".

In case of the happening of an event of default as specified in said indenture and in the supplemental indenture dated March 1, 1942 supplemental thereto, the principal sum of the Bonds of this issue may be declared or may become due and payable forthwith, in the manner and with the effect in said indenture provided.

The Bonds of this series are subject to redemption as provided in said supplemental indenture dated June 1, 2012.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

This Bond is transferable, but only as provided in the Authority Indenture upon surrender hereof, by the registered owner in person or by attorney duly authorized in writing, at the office of the Trustee; upon any such transfer a new Bond similar hereto will be issued to the transferee. No service charge shall be made for any such transfer, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in relation thereto. The Company and the Trustee and any paying agent may deem and treat the person in whose name this Bond is registered as the absolute owner hereof for the purpose of receiving payment of or on account of the principal hereof and the interest hereon and for all other purposes; and neither the Company nor the Trustee nor any paying agent shall be affected by any notice to the contrary.

The Bonds of this series are issuable only in fully registered form, in any denomination authorized by the Company.

No recourse under or upon any obligation, covenant or agreement contained in said indenture or in any indenture supplemental thereto, or in any Bond or coupon issued thereunder, or because of any indebtedness arising thereunder, shall be had against any incorporator, or against any past, present or future stockholder, officer or director, as such, of the Company or of any successor corporation, either directly or through the Company or any successor corporation, under any rule of law, statute or constitutional provision or by the enforcement of any assessment or by any legal or equitable proceeding or otherwise; it being expressly agreed and understood that said indenture, any indenture supplemental thereto and the obligations issued thereunder, are solely corporate obligations, and that no personal liability whatever shall attach to, or be incurred by, such incorporators, stockholders, officers or directors, as such, of the Company, or of any successor corporation, or any of them, because of the incurring of the indebtedness thereby authorized, or under or by reason of any of the obligations, covenants or agreements contained in the indenture or in any indenture supplemental thereto or in any of the Bonds or coupons issued thereunder, or implied therefrom.

This Bond shall not be entitled to any security or benefit under said indenture, as amended and supplemented, and shall not become valid or obligatory for any purpose, until the certificate of authentication, hereon endorsed, shall have been signed by U.S. Bank National Association, as Trustee, or by its successor in trust under said indenture.

IN WITNESS WHEREOF, the Company has caused this Bond to be duly executed by its proper officers under its corporate seal.

Dated

PUBLIC SERVICE ELECTRIC AND GAS COMPANY,

By. . . . . .

WHEREAS, the execution and delivery of this supplemental indenture have been duly authorized by the Board of Directors of the Company; and

WHEREAS, the Company represents that all things necessary to make the bonds of the Pollution Control Series AG hereinafter described, when duly authenticated by the Trustee and issued by the Company, valid, binding and legal obligations of the Company, and to make this supplemental indenture a valid and binding agreement supplemental to the Indenture, have been done and performed:

NOW, THEREFORE, THIS SUPPLEMENTAL INDENTURE WITNESSETH that the Company, in consideration of the premises and the execution and delivery by the Trustee of this supplemental indenture, and in pursuance of the covenants and agreements contained in the Indenture and for other good and valuable consideration, the receipt of which is hereby acknowledged, has granted, bargained, sold, aliened, remised, released, conveyed, confirmed, assigned, transferred and set over, and by these presents does grant, bargain, sell, alien, remise, release, convey, confirm, assign, transfer and set over unto the Trustee, its successors and assigns, forever, all the right, title and interest of the Company in and to all property of every kind and description (except cash, accounts and bills receivable and all merchandise bought, sold or manufactured for sale in the ordinary course of the Company's business, stocks, bonds or other corporate obligations or securities, other than such as are described in Part V of the Granting Clauses of the Indenture, not acquired with the proceeds of bonds secured by the Indenture, and except as in the Indenture and herein otherwise expressly excluded) acquired by the Company since the execution and delivery of the supplemental indenture dated May 1, 2012, supplemental to the Indenture (except any such property duly released from, or disposed of free from, the lien of the Indenture, in accordance with the provisions thereof) and all such property which at any time hereafter may be acquired by the Company;

All of which property it is intended shall be included in and granted by this supplemental indenture and covered by the lien of the Indenture as heretofore and hereby amended and supplemented;

UNDER AND SUBJECT to any encumbrances or mortgages existing on property acquired by the Company at the time of such acquisition and not heretofore discharged of record; and

SUBJECT, also, to the exceptions, reservations and provisions in the Indenture and in this supplemental indenture recited, and to the liens, reservations, exceptions, limitations, conditions and restrictions imposed by or contained in the several deeds, grants, franchises and contracts or other instruments through which the Company acquired or claims title to the aforesaid property; and subject, also, to existing leases, to liens on easements or rights of way, to liens for taxes, assessments and governmental charges not in default or the payment of which is deferred, pending appeal or other contest by legal proceedings, pursuant to Section 4 of Article Five of the Indenture, or the payment of which is deferred pending billing, transfer of title or final determination of amount, to easements for alleys, streets, highways, rights of way and railroads that may run across or encroach upon the said property, to joint pole and similar agreements, to undetermined liens and charges, if any, incidental to construction, and other encumbrances permitted by the Indenture as heretofore and hereby amended and supplemented;

TO HAVE AND TO HOLD the property hereby conveyed or assigned, or intended to be conveyed or assigned, unto the Trustee, its successor or successors and assigns, forever;

IN TRUST, NEVERTHELESS, upon the terms, conditions and trusts set forth in the Indenture as heretofore and hereby amended and supplemented, to the end that the said property shall be subject to the lien of the Indenture as heretofore and hereby amended and supplemented, with the same force and effect as though said property had been included in the Granting Clauses of the Indenture at the time of the execution and delivery thereof;

AND THIS SUPPLEMENTAL INDENTURE FURTHER WITNESSETH that for the considerations aforesaid, it is hereby

covenanted between the Company and the Trustee as follows: ARTICLE I.

BONDS OF THE POLLUTION CONTROL SERIES AG.

The series of bonds authorized by this supplemental indenture to be issued under and secured by the Indenture shall be designated "First and Refunding Mortgage Bonds, Pollution Control Series AG"; shall be limited to the aggregate principal amount of $50,000,000; shall be issued initially to the Authority Trustee, as assignee of the

Authority, to evidence the Company's obligation to repay the loan to refinance a portion of the costs of the Project made pursuant to the Pollution Control Facilities Loan Agreement; and shall mature and bear interest as set forth in the form of bond hereinbefore described; provided, however, that the Company shall receive certain credits against principal and interest obligations as set forth in Section 3.01 hereof. The date of each bond of the Pollution Control Series AG shall be the interest payment date next preceding the date of authentication, unless such date of authentication be an interest payment date, in which case the date shall be the date of authentication, or unless such date of authentication be prior to the first interest payment date, in which case the date shall be June 1, 2012.

Bonds of the Pollution Control Series AG shall be issued as fully registered bonds in any denomination authorized by the Company. Interest on bonds of the Pollution Control Series AG shall be payable at such time and in such manner as interest is payable on the 2012 Authority Bonds, subject to certain credits against principal and interest as set forth in Section 3.01 hereof and shall be payable as to both principal and interest in such coin or currency of the United States of America as at the time of payment shall constitute legal tender for the payment of public and private debts, at the principal office of the Trustee, or at the corporate trust office of any paying agent appointed by the Company.

Bonds of the Pollution Control Series AG shall be transferable (but only as provided in the Authority Indenture) upon surrender thereof for cancellation by the registered owner in person or by attorney duly authorized in writing at said office of the Trustee.

The Company hereby waives any right to make a charge for any transfer of bonds of the Pollution Control Series AG, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in relation thereto.

ARTICLE II.

REDEMPTION OF BONDS—POLLUTION CONTROL SERIES AG.

SECTION 2.01. *Redemption—Redemption Prices.* Bonds of the Pollution Control Series AG shall be subject to redemption prior to maturity, under the conditions and upon the payment of the amounts specified in the following subsections, together, in each case, with interest accrued to the redemption date:

(a) At the option of the Company:

(i) whenever the Interest Rate Mode for the 2012 Authority Bonds is the Daily Rate, the Weekly Rate, or the Semi-Annual Rate ,in whole or in part on any date, at a redemption price of 100% of the principal amount thereof;

(ii) whenever the Interest Rate Mode for the 2012 Authority Bonds is the Commercial Paper Rate, in whole or in part, at a redemption price of 100% of the principal amount thereof on the Interest Payment Date for each Commercial Paper Rate Period for a 2012 Authority Bond or Bonds, such redemption to be in the same principal amount of such 2012 Authority Bond or Bonds;

(iii) whenever the Interest Rate Mode for the 2012 Authority Bonds is the Auction Rate, in whole or in part, at a redemption price of 100% of the principal amount thereof on the final Interest Payment Date for each Auction Period;

(iv) whenever the Interest Rate Mode for the 2012 Authority Bonds is the Term Rate, in whole or in part, on the final Interest Payment Date for the then current Term Rate Period at a redemption price of 100% of the principal amount thereof plus accrued interest, if any, to the redemption date, and, prior to the end of the then current Term Rate Period, at any time during the redemption periods and at the redemption prices set forth below, plus accrued interest, if any, to the redemption date:

Greater than 10 years but equal to or less than 15 years	Fifth anniversary of commencement of Term Rate Period	100%
Equal to or less than 10 years	Non-callable	Non-callable

If, at the time of the Company's notice of a change in the Term Rate Period pursuant to Section 2.02(d) of the Authority Indenture, or its notice of Conversion of the Interest Rate Mode for the 2012 Authority Bonds to the Term Rate pursuant to Section 2.02(e) of the Authority Indenture, or, when the Interest Rate Mode for the 2012 Authority Bonds is the Term Rate, at least 35 days prior to the Purchase Date for the 2012 Authority Bonds pursuant to Section 3.01 (b)(i) of the Authority Indenture, the Company provides a certification of the Remarketing Agent to the Authority Trustee and the Authority that the foregoing schedule is not consistent with Prevailing Market Conditions and an opinion of Bond Counsel that a change in the redemption provisions of the 2012 Authority Bonds will not adversely affect the exclusion from gross income of interest on the 2012 Authority Bonds for federal income tax purposes, the foregoing redemption periods and redemption prices may be revised effective as of the date of such change in the Term Rate Period, the Conversion Date, or that Purchase Date, as determined by the Remarketing Agent in its judgment, taking into account the then Prevailing Market Conditions, as stipulated in such certification, which shall be appended by the Trustee to its counterpart of this supplemental indenture. Any such revision of the redemption periods and redemption prices shall not be considered an amendment of or a supplement to this supplemental indenture and shall not require the consent of any other person or entity.

(v) whenever the Interest Rate Mode for 2012 Authority Bonds is the Annual Rate, in whole or in part, at a redemption price equal to 100% of the principal amount thereof on the final Interest Payment Date for such Annual Rate Period.

(b) Special Mandatory Redemption: in whole (or in part, if in the opinion of Bond Counsel such partial redemption will preserve the exclusion from gross income for federal income tax purposes of interest on the 2012 Authority Bonds remaining outstanding after such redemption) at any time at a redemption price of 100% of the principal amount thereof, plus interest accrued to the redemption date, if a "final determination" (as defined in the Authority Indenture) is made that the interest paid or payable on any 2012 Authority Bond to other than a "substantial user" of the Project or a "related person" (within the meaning of Section 147(a) of the Code) is or was includable in the gross income of the owner thereof for federal income tax purposes under the Code as a result of the failure by the Company to observe or perform any covenant, condition or warranty on its part to be observed or performed under the Agreement or the inaccuracy of any representation or warranty by the Company under the Agreement and under the Use of Proceeds Certificate of the Company dated the Closing Date. Any special mandatory redemption shall be made as soon as practicable but in any event not more than 180 days from the date of such "final determination" and shall be on the date specified by the Company pursuant to Section 8.01(b) of the Authority Indenture or, if no date is so specified, the date established by the Authority Trustee in accordance with Section 8.01(b) of the Authority Indenture.

(c) in whole at 100% of the principal amount thereof whenever the Company receives from the Authority Trustee a copy of a written demand sent to the Trustee stating that the principal of all outstanding 2012 Authority Bonds has been declared to be immediately due and payable because of an Event of Default under the Authority Indenture. In such case, redemption of the bonds of the Pollution Control Series AG shall be any date selected by the Company, not more than 180 days after receipt by the Company of such written demand for redemption.

SECTION 2.02. *Notice of Redemption.* (a) The election of the Company under subsection (a) of Section 2.01 hereof to redeem any of the bonds of the Pollution Control Series AG shall be evidenced by a resolution of the Board of

Past financial performance is no guarantee of future results.

Directors of the Company calling for redemption on a stated date of all or a stated principal amount thereof. To exercise its option to redeem the bonds of the Pollution Control Series AG under subsection (a) of Section 2.01 hereof, the Company shall deliver to the Trustee, the Authority and the Authority Trustee a certified copy of said resolution calling all or a stated principal amount of the bonds of the Pollution Control Series AG for redemption on a date not less than 20 days (35 days if the Interest Rate Mode is the Term Rate) nor more than 65 days from the date said resolution is delivered. The delivery to the Authority Trustee of a certified copy of such resolution shall constitute notice to the Authority Trustee of the redemption referred to therein, on the terms specified therein. The Company shall on or before such redemption date deposit with the Trustee, as paying agent hereunder, the total applicable redemption price of all the bonds so called, with interest accrued thereon to the redemption date, less any credits to which the Company may be entitled pursuant to Section 3.01 hereof, and the Trustee, as such paying agent, shall apply such funds on the redemption date to the redemption of the bonds so called.

(b) The Company shall, within 10 days after the occurrence of a "final determination" under subsection (b) of Section 2.01 hereof, deliver to the Trustee written notice of such "final determination". The Company shall, by resolution of its Board of Directors, fix a redemption date for such redemption and shall deliver to the Trustee, the Authority and the Authority Trustee a certified copy of said resolution not later than 60 days after a "final determination" is made and at least 40 days prior to the date so selected for redemption. Such redemption date may be any day not more than 180 days after the occurrence of such "final determination". If the Trustee does not receive written notice of such selection by the Company within 60 days after the date of the occurrence of such "final determination," then the redemption date shall be the redemption date established by the Authority Trustee in accordance with Section 8.01(b) of the Authority Indenture. On or before such redemption date, the Company shall deposit with the Trustee, as paying agent hereunder, the total redemption price of the bonds so called, with interest accrued thereon to the redemption date, less any credits to which the Company may be entitled pursuant to Section 3.01 hereof, and the Trustee, as such paying agent, shall apply such funds, on the redemption date, to the redemption of the bonds so called. The delivery to the Authority Trustee of a certified copy of such resolution shall constitute notice to the Authority Trustee of the redemption referred to therein on the terms specified therein.

SECTION 2.03. *Interest on Called Bonds to Cease.* Each bond or portion thereof of the Pollution Control Series AG called for redemption under Section 2.02 hereof shall be due and payable at the office of the Trustee, as paying agent hereunder, at the applicable redemption price and on the specified redemption date, anything herein or in such bond to the contrary notwithstanding. From and after the date when each bond or portion thereof of the Pollution Control Series AG shall be due and payable as aforesaid (unless upon said date the full amount due thereon shall not be held by or provided to the Trustee, as paying agent hereunder, and be immediately available for payment), all further interest shall cease to accrue on such bond or on such portion thereof, as the case may be.

SECTION 2.04. *Bonds Called in Part.* If only a portion of any bond of the Pollution Control Series AG shall be called for redemption pursuant to Section 2.02 hereof, the notice of redemption hereinbefore provided for shall specify the portion of the principal amount thereof to be redeemed. Upon payment of the portion so called for redemption, the Trustee, as paying agent hereunder, shall give prompt written notice thereof to the Company.

SECTION 2.05. *Provisions of Indenture Not Applicable.* The provisions of Article Four of the Indenture, as amended and supplemented, shall not apply to the procedure for the exercise of any right of redemption reserved by the Company, or to any mandatory redemption provided in this Article in respect of the bonds of the Pollution Control Series AG. There shall be no sinking fund for the bonds of the Pollution Control Series AG.

ARTICLE III.

CREDITS WITH RESPECT TO THE BONDS OF THE POLLUTION CONTROL SERIES AG.

SECTION 3.01. *Credits.* (a) In addition to any other credit, payment or satisfaction to which the Company is entitled with respect to the bonds of the Pollution Control Series AG, the Company shall be entitled to credits against amounts otherwise payable in respect of the bonds of the Pollution Control Series AG in an amount corresponding to the amount by which interest due on the bonds of the Pollution Control Series AG exceeds the interest due on the 2012 Authority Bonds.

(b) The Company shall be entitled to credits against amounts otherwise payable in respect of the bonds of the Pollution Control Series AG in an amount corresponding to (i) the principal amount of any 2012 Authority Bond surrendered to the Authority Trustee by the Company or the Authority, or purchased by the Authority Trustee, for cancellation and (ii) the amount of money held by the Authority Trustee and available and designated for or applied toward the payment of principal or redemption price of and interest on the 2012 Authority Bonds, as the case may

be, regardless of the source of payment to the Authority Trustee of such moneys. The Trustee, as paying agent hereunder, shall give prompt written notice to the Company of any such credit with respect to the payment of interest.

(c) The Trustee, as paying agent hereunder, shall (i) promptly notify the Company of each deposit in the Debt Service Fund under the Authority Indenture, (ii) provide evidence to the Company that such deposit has been credited to such Fund and (iii) give prompt written notice to the Company of any credits with respect to payment of principal or redemption price of and interest on the bonds of the Pollution Control Series AG.

SECTION 3.02. *Certificate of the Company.* A certificate of the Company signed by the President, any Vice President or any Assistant Treasurer, and attested to by the Secretary or any Assistant Secretary, and consented to by the Authority Trustee, stating that the Company is entitled to a credit under Section 3.01 hereof and setting forth the basis therefor in reasonable detail, shall be conclusive evidence of such entitlement, and the Trustee shall accept such certificate as such evidence without further investigation or verification of the matters stated therein.

ARTICLE IV.

MISCELLANEOUS.

SECTION 4.01. *Authentication of Bonds of Pollution Control Series AG.* None of the bonds of the Pollution Control Series AG, the issue of which is provided for by this supplemental indenture, shall be authenticated by the Trustee except in accordance with the provisions of the Indenture, as amended and supplemented, and this supplemental indenture, and upon compliance with the conditions in that behalf therein contained.

SECTION 4.02. *Additional Restrictions on Authentication of Additional Bonds Under Indenture.* The Company covenants that from and after the date of execution of this supplemental indenture, no additional bonds (as defined in Section I of Article Two of the Indenture) shall be authenticated and delivered by the Trustee under Subdivision A of Section 4 of said Article Two on account of additions or improvements to the mortgaged property:

(1) unless the net earnings of the Company for the period required by Subdivision C of Section 6 of said Article Two shall have been at least twice the fixed charges (in lieu of 1 3/4 times such fixed charges, as required by said Subdivision C); and for the purpose of this condition (a) such fixed charges shall in each case include interest on the bonds applied for, notwithstanding the parenthetical provision contained in clause (4) of said Subdivision C, and (b) in computing such net earnings there shall be included in expenses of operation (under paragraph (c) of said Subdivision C) all charges against earnings for depreciation, renewals or replacements, and all certificates with respect to net earnings delivered to the Trustee in connection with any authentication of additional bonds under said Article Two shall so state; and

(2) except to the extent of 60% (in lieu of 75% as permitted by Subdivision A of Section 7 of said Article Two) of the cost or fair value to the Company of the additions or improvements forming the basis for such authentication of additional bonds.

SECTION 4.03. *Restriction on Dividends.* The Company will not declare or pay any dividend on any shares of its common stock (other than dividends payable in shares of its common stock) or make any other distribution on any such shares, or purchase or otherwise acquire any such shares (except shares acquired without cost to the Company) whenever such action would reduce the earned surplus of the Company to an amount less than $10,000,000 or such lesser amount as may remain after deducting from said $10,000,000 all amounts appearing in the books of account of the Company on December 31, 1948, which shall thereafter, pursuant to any order or rule of any regulatory body entered after said date, be required to be removed, in whole or in part, from the books of account of the Company by charges to earned surplus.

SECTION 4.04. *Use of Facsimile Seal and Signatures.* The seal of the Company and any or all signatures of the officers of the Company upon any of the bonds of the Pollution Control Series AG may be facsimiles.

SECTION 4.05. *Effective Period of Supplemental Indenture.* The preceding provisions of Articles I, II and III of this supplemental indenture shall remain in effect only so long as any of the bonds of the Pollution Control Series AG shall remain outstanding.

SECTION 4.06. *Time for Making of Payment.* All payments of principal or redemption price of and interest on the bonds of the Pollution Control Series AG shall be made to the Authority Trustee in such funds as shall constitute immediately available funds when payment is due. In any case where the date of payment of the principal or redemption price of or interest on the bonds of the Pollution Control Series AG or the date fixed for redemption of any such bonds shall be in the city of payment a Saturday, Sunday or a legal holiday or a day on which banking institutions are authorized

by law to close, then such payment need not be made on such date but may be made on the next succeeding business day with the same force and effect as if made on the date of maturity or the date fixed for redemption, and no interest on such payment shall accrue for the period after such date.

SECTION 4.07. *Effect of Approval of Board of Public Utilities of the State of New Jersey.* The approval of the Board of Public Utilities of the State of New Jersey of the execution and delivery of these presents and of the issue of any bonds of the Pollution Control Series AG shall not be construed as approval of said Board of any other act, matter or thing which requires approval of said Board under the laws of the State of New Jersey.

SECTION 4.08. *Execution in Counterparts.* For the purpose of facilitating the recording hereof, this supplemental indenture has been executed in several counterparts, each of which shall be and shall be taken to be an original, and all collectively but one instrument.

Past financial performance is no guarantee of future results.

ARTICLE I

PURPOSE OF THE PLAN

1.1 Purpose The Key Executive Severance Plan of Public Service Enterprise Group Incorporated ("Plan") is maintained by the Company to provide severance benefits to certain key executive-level employees of the Company and its affiliates whose employment is terminated under the circumstances described herein. The Plan is being amended and restated effective December 17, 2012.

The Plan is intended to comply in operation and form with Section 409A to the Internal Revenue Code of 1986, as amended ("Code"). The timing and form of payment of benefits provided under the Plan will be deemed to be automatically modified, and a Participant's rights under the Plan will be limited so as to conform to any requirements under Section 409A of the Code.

ARTICLE II

DEFINITIONS

2.1 "Accrued Obligation" shall have the meaning set forth in Section 4.1 or 5.1 of the Plan.

2.2 "Affiliate" means any corporation, trade or business if it or the Company are members of a controlled group of corporations, are under common control or are members of an affiliated service group, within the meanings of Sections 414(b), 414(c) and 414(m), respectively, of the Code. The term "Affiliate" shall also include any other entity required to be aggregated with the Company pursuant to regulations under Section 414(o) of the Code.

2.3 "Annual Base Salary" means the annual rate of base salary payable to a Participant for services performed for an Employer, as in effect immediately prior to the Participant's Date of Termination.

2.4 "Board" means the board of directors of the Company.

2.5 "Cause" means:

(a) For purposes of Article IV:

(i) Misconduct, gross negligence, theft, or fraud against the Company;

(ii) For "Performance Reasons," as defined in Section 2.21 of the Plan;

(iii) Violation of the Standards of Integrity or other Company policy;

(iv) Insubordination;

(v) One or more significant acts of dishonesty;

The information contained herein may not be copied, adapted or distributed and is not warranted to be accurate, complete or timely. The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

(vi) Any act that is likely to have the effect of injuring the reputation, business, or business relationship of, the Company, its Board of Directors, Officers, or employees, or its affiliates or subsidiaries;

(vii) Violation of any fiduciary duty;

(viii) Breach of any duty of loyalty;

(ix) Any breach of the restrictive covenants contained in Exhibit I below;

(x) One or more acts of moral turpitude that constitute a violation of applicable law (included but not limited to a felony); or

(xi) Conviction of a felony or plea of *nolo contendere* to a felony charge.

(b) For purposes of Article V:

(i) The willful and continued failure to substantially perform his employment duties;

(ii) The willful engaging in gross misconduct that is materially and demonstrably injurious to the Employer;

(iii) The willful violation of the Company's Standards of Integrity or other applicable corporate code of conduct, or

(iv) The conviction of a felony or a plea of *nolo contetendere* to a felony charge.

No act or failure to act on the part of the Participant shall be considered "willful" unless it is done, or omitted to be done, by the Participant in bad faith or without reasonable belief that the Participant's action or omission was in the best interests of the Employer. Any act or failure to act that is based upon authority given pursuant to a resolution duly adopted by the Board, or the advice of counsel for the Employer, shall be conclusively presumed to be done, or omitted to be done, by the Participant in good faith and in the best interests of the Employer.

Notwithstanding the forgoing, for purposes of the Plan, the termination of a Participant's employment with an Employer shall not be deemed to be for Cause unless such termination is effected in accordance with the following procedures. The Employer shall give the Participant written notice ("Notice of Termination for Cause") of its intention to terminate the Participant's employment for Cause, setting forth in reasonable detail the specific conduct of the Participant that it considers to constitute Cause. Such notice shall be given no later than 60 days after the act or failure (or the last in a series of acts or failures) that the Employer alleges to constitute Cause. The Participant shall have 30 days after receiving the Notice of Termination for Cause in which to cure such act or failure, to the extent such cure is possible. In the case of a termination under clause (a), (b) or (c) above, if the Participant fails to cure such act or failure to the reasonable satisfaction of the Employer, the Employer shall give the Participant a second written notice stating that in the good faith opinion of the Employer, the Participant is guilty of the conduct described in the Notice of Termination for Cause and that such conduct constitutes Cause under the Plan.

2.6 "Change in Control" means the occurrence of any of the following events:

(a) Any "person" (within the meaning of Section 13(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act") is or becomes the beneficial owner within the meaning of Rule 13d-3 under the Exchange Act (a "Beneficial Owner"), directly or indirectly, of securities of the Company (not including in the securities beneficially owned by such person any securities acquired directly from the Company or its Affiliates) representing 25% or more of the combined voting power of the Company's then outstanding securities, excluding any person who becomes such a Beneficial Owner in connection with a transaction described in clause (i) of paragraph (c) below; or

(b) The following individuals cease for any reason to constitute a majority of the number of directors of the Company then serving: individuals who, on the Effective Date, constitute the Board and any new director (other than a director whose initial assumption of office is in connection with an actual or threatened election contest, including but not limited to a consent solicitation, relating to the election of directors of the Company) whose appointment or election by the Board or nomination for election by the Company's stockholders was approved or recommended by a vote of at least two-thirds of the directors then still in office who either were directors on the Effective Date or whose appointment, election or nomination for election was previously so approved or recommended; or

(c) There is consummated a merger or consolidation of the Company or any direct or indirect wholly-owned subsidiary of the Company with any other corporation, other than (i) a merger or consolidation which would result in the voting securities of the Company outstanding immediately prior to such merger or consolidation continuing to represent (either by remaining outstanding or by being converted into voting securities of the surviving entity or any parent thereof), in combination with the ownership of any trustee or other fiduciary holding securities under an employee benefit plan of the Company or of its Affiliates, at least 75% of the combined voting power of the securities of the Company or such surviving entity or any parent thereof outstanding immediately after such merger or consolidation, or (ii) a merger or consolidation effected to implement a recapitalization of the Company (or similar transaction) in which no person is or becomes the Beneficial Owner, directly or indirectly, of securities of the Company representing 25% or more of the combined voting power of the Company's then outstanding securities; or

(d) The shareholders of the Company approve a plan of complete liquidation or dissolution of the Company or there is consummated an agreement for the sale or disposition by the Company of all or substantially all of the Company's assets, other than a sale or disposition by the Company of all or substantially all of the Company's assets to an entity, at least 75% of the combined voting power of the voting securities of which are owned by stockholders of the Company in substantially the same proportions as their ownership of the Company immediately prior to such sale.

Past financial performance is no guarantee of future results.

Notwithstanding the foregoing, a "Change in Control" shall not be deemed to have occurred by virtue of the consummation of any transaction or series of integrated transactions immediately following which the record holders of the common stock of the Company immediately prior to such transaction or series of transactions continue to have substantially the same proportionate ownership in an entity which owns all or substantially all of the assets of the Company immediately following such transaction or series of transactions.

2.7 "Code" means the Internal Revenue Code of 1986, as amended, and the regulations promulgated thereunder.

2.8 "Committee" means the Organization and Compensation Committee of the Board or any successor of such Committee.

2.9 "Company" means Public Service Enterprise Group Incorporated and any successors thereto.

2.10 "Confidential Information" means all trade secrets, proprietary and confidential business information belonging to, used by, or in the possession of the Company or any of its Affiliates, including but not limited to information, knowledge or data related to business strategies, plans and financial information, mergers, acquisitions or consolidations, purchase or sale of property, leasing, pricing, sales programs or tactics, actual or past sellers, purchasers, lessees, lessors or customers, those with whom the Company or its Affiliates has begun negotiations for new business, costs, employee compensation, marketing and development plans, inventions and technology, whether such confidential information, knowledge or data is oral, written or electronically recorded or stored, except information in the public domain, information known by the Participant prior to employment with an Employer, and information received by the Participant from sources other than the Company or its Affiliates, without obligation of confidentiality.

2.11 "Date of Termination" means the date of a Participant's death, Disability Effective Date, or the date on which the termination of the Participant's employment by an Employer for Cause or without Cause or by the Participant for Good Reason or without Good Reason, including Retirement, is effective, as the case may be, provided that the termination constitutes a Separation from Service.

2.12 "Disability" means that the Participant (a) is unable to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than 12 months, or (b) is, by reason of any medically determinable physical or mental impairment which can be expected to result in death or can be expected to last for a continuous period of not less than 12 months, receiving income replacement benefits for a period of not less than three months under an accident or health plan covering employees of an Employer.

2.13 "Disability Effective Date" means the 30th day after the Participant's receipt of written notice of the Employer's intention to terminate the Participant's employment on account of Disability, provided that, within the 30 days after the Participant's receipt of such notice, the Participant shall not have returned to full-time performance of his employment duties.

2.14 "Eligible Employee" means an individual who is designated as such in accordance with Section 3.1.

2.15 "Effective Date" of the amendment and restatement is December 17, 2012.

2.16 "Employer" means the Company and each Affiliate, and any successors thereto.

2.17 "Good Reason" means:

(a) Any material reduction in the Participant's Annual Base Salary, Target Bonus or Target Long-Term Incentive, other than reductions pursuant to a broad-based compensation reduction program or policy affecting the Participant and all similarly situated employees of the Employer;

(b) Any material adverse change in the Participant's title, authority, duties, or responsibilities or the assignment to the Participant of any duties or responsibilities inconsistent in any respect with those customarily associated with the position of the Participant immediately prior to the Change in Control;

(c) The failure of any successor to the Company to assume this Plan in accordance with Section 11.5(b);

(d) Where the only comparable position offered to the Participant within the Employer following a Change in Control would otherwise meet the requirements of subsections (a) and (b) of this Section 2.17 of the Plan, but would require the Participant to increase his or her one-way commuting distance from his or her principal residence by more than 50 miles; or

(e) Any other material breach of the terms of the Plan by the Company that either is not taken in good faith or, even if taken in good faith, is not remedied by the Company promptly after receipt of notice thereof from the Participant.

Notwithstanding the forgoing, for purposes of the Plan, the termination of a Participant's employment with an Employer shall not be deemed to be for Good Reason unless such termination is effected in accordance with the following procedures. The Participant shall give his Employer a written notice ("Notice of Termination for Good Reason") of the termination, setting forth in reasonable detail the specific acts or omissions of the Employer that constitute Good Reason and the specific provision(s) of the Plan on which the Participant relies. Unless the Committee determines otherwise, a Notice of Termination for Good Reason by the Participant must be made within 60 days after the Participant first has actual knowledge of the act or omission (or the last in a series of acts or omissions) that the Participant alleges to constitute Good Reason, and the Employer shall have 30 days from the receipt of such Notice of Termination for Good Reason to cure the conduct cited therein. A termination of employment by the Participant for Good Reason shall be effective on the final day of such 30-day cure period unless prior to such time the Employer has cured the specific conduct asserted by the Participant to constitute Good Reason to the reasonable satisfaction of the Participant.

The user assumes all risks for any damages or losses arising from any use of this information, except to the extent such damages or losses cannot be limited or excluded by applicable law. Past financial performance is no guarantee of future results.

For purposes of the Plan, a Participant's determination that an act or failure to act constitutes Good Reason shall be presumed to be valid unless such determination is decided to be unreasonable by the Committee or its delegate pursuant to Article IX.

2.18 "Nonqualified Plan" the Retirement Income Reinstatement Plan for Non-Represented Employees of Public Service Enterprise Group Incorporated.

2.19 "Other Benefits" shall have the meaning set forth in Articles IV and V, as applicable.

2.20 "Participant" means an Eligible Employee who has satisfied the conditions for participation in the Plan, as set out in Section 3.2, and is listed on either Schedule A or Schedule B hereto, as the same may be amended from time to time.

2.21 "Performance Reasons" means the Participant's failure meet the expectations established for his function in the Company as: (a) communicated to him by his manager during any performance review, or (b) may be communicated to him otherwise by his manager from time to time either orally or in writing.

2.22 "Plan" means this Key Executive Severance Plan of Public Service Enterprise Group Incorporated, as set forth herein and as may be amended, modified or supplemented from time to time.

2.23 "Prior Equity Awards" shall mean outstanding stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares and performance shares units.

2.24 "Retirement" means a Separation from Service after the Participant has satisfied the eligibility requirements for early or normal retirement under the terms of the Retirement Plan in which the Participant participates. Notwithstanding the foregoing, for the purposes of determining benefit entitlements under Article V of the Plan, Retirement shall not include forced retirements or any termination by an Employer without Cause or voluntary termination by the Participant for Good Reason that occurs on a date on which the Participant is Retirement eligible.

2.25 "Retirement Plan" the retirement plan in which the Participant participates either the Pension Plan of Public Service Enterprise Group Incorporated or the Cash Balance Pension Plan of Public Service Enterprise Group Incorporated.

2.26 "Schedule A Participant" shall mean a Participant listed on Schedule A hereto.

2.27 "Schedule B Participant" shall mean a Participant listed on Schedule B hereto.

2.28 "Separation from Service" shall be deemed to have occurred if a Participant and the Company or any Affiliate reasonably anticipates, based on the facts and circumstances, that either:

(a) The Participant will not provide any additional services for the Company or an Affiliate after a certain date; or

Past financial performance is no guarantee of future results.

(b) The level of bona fide services performed by the Participant after a certain date will permanently decrease to no more than 50 percent of the average level of bona fide services performed by the Participant over the immediately preceding 36 months.

(c) If a Participant is absent from employment due to military leave, sick leave or any other bona fide leave of absence authorized by the Company or an Affiliate and there is a reasonable expectation that the Participant will return to perform services for the Company or an Affiliate, a Separation from Service will not occur until the later of: (i) the first date immediately following the date that is six months after the date that the Participant was first absent from employment; or (ii) the date the Participant no longer retains a right to reemployment, to the extent the Participant retains a right to reemployment with the Company or any Affiliates under applicable law or by contract. If a Participant fails to return to work upon the expiration of any military leave, sick leave or other bona fide leave of absence where such leave is for less than six months, the Separation from Service shall occur as of the date of the expiration of such leave, unless a greater period is provided for under applicable law.

2.29 "Specified Employee" shall mean any individual who is a key employee (as defined in Section 416(i) of the Code without regard to Section 416(i)(5)) of the Company at any time during the 12-month period ending on each December 31 (the "identification date"). If an individual is a key employee as of an identification date, the individual shall be treated as a Specified Employee for the 12-month period beginning on the April 1 following the identification date. Notwithstanding the foregoing, an individual shall not be treated as a Specified Employee unless any stock of the Company or an Affiliate is publicly traded on an established securities market or otherwise.

2.30 "Target Bonus" means the Participant's target annual bonus, if any, under the applicable annual incentive compensation plan of the Company for the fiscal year in which the Date of Termination occurs.

2.31 "Target Long-Term Incentive" means the Participant's target long-term incentive award, if any, under the applicable long-term incentive compensation plan of the Company.

ARTICLE III

ELIGIBILITY AND PARTICIPATION

3.1 Eligible Employees. Eligibility to participate in the Plan shall be limited to certain key executives of an Employer who (a) are not parties to individual employment or change in control agreements that provide for severance benefits, and (b) are designated, by duly adopted resolution of the Committee, as Eligible Employees.

3.2 Participation. As a condition to becoming a Participant and being entitled to the benefits and protections provided under the Plan, each Eligible Employee must execute and deliver to the Company, within 30 days after the later of the Effective Date and the date such individual is designated by the Committee as an Eligible Employee, a written agreement in the

form attached hereto as Exhibit I (or in such other form as may be satisfactory to the Company) to be bound by the restrictive covenants set forth in Article VII. Schedules A and B hereto list the Eligible Employees who have satisfied the conditions for Plan participation and the date as of which each such Eligible Employee became a Participant. The Committee shall cause Schedules A and B to be updated from time to time to reflect the Participants who are currently participating in the Plan.
