Wind Capital Holdings, LLC, Docket No. ER11-2005-___

Notice of Change in Status of the Integrys Entities and the Exelon Entities

Dear Secretary Bose:

Pursuant to Section 35.42(a)(2) of the Federal Energy Regulatory Commission's ("Commission" or "FERC") regulations,[1] Integrys Energy Services, Inc. ("Integrys Energy Services") and Integrys Energy Services of New York, Inc. ("Integrys Energy Services NY" and, collectively with Integrys Energy Services, "Integrys Entities") and the remaining above-captioned affiliates of Exelon Corporation ("Exelon") with market-based rate authority ("Exelon Entities" and, with Integrys Entities, "Sellers") respectfully submit this notice of change in status to inform the Commission of certain new affiliations. As explained below, the affiliations reported herein do not constitute a material departure from the characteristics the Commission relied upon in granting Sellers market-based rate authority. Therefore, Sellers respectfully request that the Commission accept for filing this Notice of Change in Status.

I. COMMUNICATIONS

Communications concerning this notice should be directed to the following persons:

Vincenzo Franco*

II. NON-MATERIAL CHANGE IN STATUS

Effective November 1, 2014, Exelon Generation Company, LLC ("Exelon Generation") indirectly acquired all of the issued and outstanding voting stock of Integrys Energy Services and its wholly owned subsidiary Integrys Energy Services NY ("Transaction").[2] As a result of the Transaction, the Integrys Entities became indirect wholly owned subsidiaries of Exelon Generation.

The Integrys Entities are retail power marketers that do not own or control any electric generation facilities, electric transmission facilities, distribution facilities, or inputs to electric power production, as defined in Section 35.36 of the Commission's regulations.[3] The Integrys Entities also do not hold a franchise or service territory for the transmission, distribution, or sale of electric power in the United States. The Commission has authorized both Integrys Energy Services[4] and Integrys Energy Services NY[5] to sell power at market-based rates.

In addition, Sellers inform the Commission of their affiliation with Mohave Sunrise Solar I, LLC ("Mohave Sunrise") and 2014 ESA Project Company, LLC ("2014 ESA"). Mohave Sunrise is an indirect, wholly owned subsidiary of Exelon Generation that is developing a 4.6 MW (net) solar-powered generation facility located in Fort Mohave, Arizona. The facility is expected to be installed and begin operations in April 2015. The facility will be a qualifying

[2] The Commission authorized the Transaction under FPA Section 203 on September 16, 2014. *Integrys Energy Group, Inc., et al.*, 148 FERC ¶ 62,206 (2014). Exelon Generation notified the Commission on November 6, 2014 that the Transaction was consummated effective November 1, 2014. *See* Notice of Consummation of Exelon Generation Co., LLC, FERC Docket No. EC14-124-000 (Nov. 6, 2014).

[3] 18 C.F.R. § 35.36(a)(4) defines "[i]nputs to electric power production" as "intrastate natural gas transportation, intrastate natural gas storage or distribution facilities; sites for generation capacity development; physical coal supply sources and ownership of or control over who may access transportation of coal supplies."

[4] *Wisconsin Public Service Corp., et al.*, 75 FERC ¶ 61,057 (1996). *See also, Integrys Energy Group, Inc.* Docket No. ER07-650-000, unpublished letter order (May 10, 2007) (accepting the notice of succession of WPS Energy Services, Inc. changing its name to Integrys Energy Services, Inc.).

[5] *Advantage Energy, Inc.*, Docket No. ER97-2758-000, unpublished letter order (July 14, 1997). *See also, Integrys Energy Group, Inc.* Docket No. ER07-651-000, unpublished letter order (May 10, 2007) (accepting the notice of succession of Advantage Energy, Inc. changing its name to Integrys Energy Services of New York, Inc.).

facility ("QF") under the Public Utility Regulatory Policies Act of 1978[6] and will be interconnected to Mohave Electric Cooperative's ("MEC") transmission system within the Western Area Power Administration - Lower Colorado Region ("WALC") balancing authority area. Mohave Sunrise will sell the output of its facility to MEC under a long-term power purchase agreement.

2014 ESA is a Delaware limited liability company indirectly owned by Bloom Energy Corporation ("Bloom Energy") and Exelon Generation. 2014 ESA is developing fuel cell generation projects in California, Connecticut, New Jersey, and New York to provide energy services to third-party commercial and industrial customers. 2014 ESA will only own fuel cells located behind-the-meter, is not a public utility under the Federal Power Act, and does not engage in wholesale sales of electricity. The electricity generated by the fuel cells will be sold only to retail users or pursuant to state-approved net metering programs. 2014 ESA's first fuel cell project commenced operations on October 24, 2014. Since then, three additional fuel cell projects have commenced operations for a total of approximately 1.4 MW, all located in California.

The Exelon Entities' affiliation with the Integrys Entities does not materially affect the facts upon which the Commission relied in granting the Exelon Entities and the Integrys Entities market-based rate authority. The affiliation does not raise any horizontal market power concerns for the Exelon Entities because the Integrys Entities do not own or control any generation facilities and therefore the affiliation does not change the Exelon Entities' affiliated uncommitted capacity under the pivotal supplier and market share screens in any market. Likewise, the affiliation does not raise any horizontal market power concerns for the Integrys Entities because the Commission previously granted market-based rate authority to the Exelon Entities, having found that the Exelon Entities lack horizontal market power. Affiliation with the Integrys Entities would not change the results of the pivotal supplier and market share screens in any market since the Integrys Entities do not own or control any generation facilities. The affiliation also does not raise any vertical market power concerns, because the Integrys Entities do not own or control any transmission facilities or any inputs to electric power production as defined in Section 35.36 of the Commission's regulations and cannot raise barriers to entry.[7]

The affiliation with Mohave Sunrise and 2014 ESA similarly does not raise any horizontal market power concerns. Mohave Sunrise will own only a *de minimis* amount of generation (4.6 MW) that will be under long-term contract to MEC, an unaffiliated third party. 2014 ESA will only own behind-the-meter generation that is not used for wholesale sales. Therefore, the affiliation with Mohave Sunrise and 2014 ESA has no material impact on the ability of any of the Sellers to exercise horizontal market power in any relevant market. With respect to vertical market power, neither Mohave Sunrise nor 2014 ESA owns or controls any transmission facilities, except for limited interconnection facilities required to connect individual generating facilities to the transmission grid, or any inputs to electric power production, as

[6] A notice of self-certification of QF status is being filed concurrently.

[7] To the extent necessary, the Sellers confirm that they have not erected barriers to entry into the relevant markets and will not erect barriers to entry into the relevant markets.

defined in Section 35.36 of the Commission's regulations and cannot raise barriers to entry. Therefore the affiliation with Mohave Sunrise and 2014 ESA does not raise any vertical market power concerns.

Therefore, Sellers continue to satisfy the requirements for market-based rate authority.

III. CONCLUSION

Sellers request that the Commission accept this notice of change in status for filing. Attached hereto are the required tables listing (1) all affiliates that have market-based rate authority and identifying all generation assets the corporate family owns or controls by balancing authority area and geographic region, and (2) all electric transmission and regulated natural gas intrastate pipelines and/or gas storage facilities the corporate family owns or controls.[8]

Respectfully submitted,

/s/ Jane E. Rueger

1 Unless otherwise indicated, generation capacity ratings (megawatts) are based on the summer seasonal ratings.

2 Facilities solely in the region administered by the Electric Reliability Council of Texas ("ERCOT") are not included herein.

3 MBR authority was not obtained for this entity, because it is a qualifying facility with a capacity of less than 20 MW *(see* 18 C.F.R. § 292.601(c)(1)).

4 The capacity rating for this entity is based on its nameplate capacity.

5 MBR authority was not obtained for this entity, because it is a qualifying facility that sells power pursuant to a PURPA contract or pursuant to a contract executed on or before March 17, 2006 *(see* 18 C.F.R. § 292.601(c)(1)).

6 ExGen has a tolling agreement for 795 MW from Green Country.

7 This generation rating reflects the full plant rating, not just Exelon's ownership share.

8 This row pertains to one or more behind-the-meter facilities that sell entirely at retail and therefore do not participate in the wholesale market.

Re: Revised Asset Appendices for Notice of Non-Material Change in Status

Per Staff's request, enclosed please find revised asset appendices for the above-captioned entities' November 24, 2014 Notice of Non-Material Change in Status (Change in Status Notice). The asset appendices attached to the November 24 Filing inadvertently ommitted 2014 ESA Project Company, LLC, one of the new affiliations that was the subject of the non-material change in status. The above-captioned entities respectfully renew their request that the Commission accept the Change in Status Notice.

Respectfully submitted,

/s/ Jane E. Rueger

Notice of Change in Status of the Exelon MBR Entities

Dear Secretary Bose:

Pursuant to the requirements of section 35.42 of the regulations of the Federal Energy Regulatory Commission ("FERC" or "Commission"),[1] the above-captioned affiliates of Exelon Corporation ("Exelon") with market-based rate authority (the "Exelon MBR Entities") submit this notice of change in status to inform the Commission that on December 30, 2014, Exelon Generation Company, LLC ("Exelon Generation") entered into a long-term tolling agreement ("Tolling Agreement") with Mobile Energy LLC ("Mobile"). Mobile owns and operates the Hog Bayou Energy Center, a 230 MW (summer) natural gas-fired, combined cycle electric generation facility located in Mobile County, Alabama and interconnected to Alabama Power Company's transmission system within the Southern Company Services, Inc. ("SOCO") balancing authority area ("BAA"). The Commission authorized Mobile to sell energy, capacity, and ancillary services at market-based rates.[2] Pursuant to the Tolling Agreement, Exelon Generation purchases all of the output of the Hog Bayou Energy Center. Power deliveries under the Tolling Agreement commenced on January 1, 2015.

On December 23, 2014, Exelon Generation and its affiliates that are Category 2 Sellers in the Southeast region filed an Updated Market Analysis for the Southeast Region ("SE Triennial") in Docket Nos. ER12-2178-022, *et al.* The SE Triennial demonstrated that Exelon Generation and its affiliates pass the pivotal supplier and market share screens for the SOCO and Associated Electric Cooperative, Inc. BAAs, the two relevant markets for Exelon Generation in the Southeast region, and lack vertical market power.

The Tolling Agreement does not affect the SE Triennial's conclusion that Exelon Generation and its affiliates lack market power in the SOCO BAA. With respect to horizontal market power, the Exelon MBR Sellers have revised the pivotal supplier and market share screens submitted with the SE Triennial to reflect the purchase of the Hog Bayou Energy Center. The revised screens show that in the SOCO BAA the Exelon MBR Sellers continue to pass the pivotal screen and their market share ranges from 10.6% to 15.1%. A copy of the revised screens is provided as Attachment A hereto.[3] With respect to

[1] 18 C.F.R. § 35.42 (2014).

[2] Mobile Energy, LLC, Letter Order, Docket Nos. ER01-480-000, *et al.* (Jan. 10, 2001) (granting market-based rate authority).

[3] Attachments B and C hereto provide updated asset appendices in the format set forth in Appendix B to 18 C.F.R. Part 35, Subpart H.

20150202-5343 FERC PDF (Unofficial) 2/2/2015 3:45:23 PM

vertical market power, the Tolling Agreement did not result in the acquisition of ownership or control of, or affiliation with, any electric transmission facilities or inputs to electric power production, as defined in section 35.36 of the Commission's regulations.[4] Therefore, the Exelon MBR Sellers continue to lack vertical market power in the SOCO BAA.

For the reasons set forth above, the Tolling Agreement between Exelon Generation and Mobile did not materially change the facts and circumstances that the Commission relied upon in granting the Exelon MBR Entities market-based rate authority. Therefore, the Exelon MBR Entities respectfully request that the Commission accept for filing this notice of change in status and find that no further inquiry is necessary.

Respectfully submitted,

Vincenzo Franco

Notice of Change in Status and Tariff Revisions of the Exelon MBR Entities

Dear Secretary Bose:

Pursuant to the requirements of section 35.42 of the regulations of the Federal Energy Regulatory Commission (FERC or Commission),[1] the above-captioned affiliates of Exelon Corporation (Exelon) with market-based rate authority (the Exelon MBR Entities) submit this notice of change in status to inform the Commission that as of April 1, 2015, the Exelon MBR Entities could be deemed to have acquired control over additional generation in the Northwest region as a result of a transaction described below. In addition, certain of the Exelon MBR Entities specified below submit revisions to their market-based rate tariffs (Tariffs) to update their seller category designation and make additional ministerial changes, and respectfully request an effective date of April 1, 2015 for such revisions.

I. DESCRIPTION OF CHANGE IN STATUS

Exelon Generation Company, LLC (Exelon Generation) is a direct, wholly-owned subsidiary of Exelon that has Commission-granted market-based rate authority.[2] Exelon Generation entered into an agreement (Transaction) with J.P. Morgan Ventures Energy Corporation (JPMVEC) that will result in Exelon Generation being assigned JPMVEC's rights and obligations under certain contracts for the purchase and sale of the output of the Stateline Wind Energy Project (Stateline Project). The Stateline Project is a wind-powered electric generation facility with approximately 300 MW aggregate nameplate capacity located in the states of Oregon and Washington within the PacifiCorp-West (PACW) balancing authority area (BAA). The Stateline Project is owned and operated by FPL Energy Vansycle, LLC (Vansycle), which sells the output of the facility at market-based rates.[3]

1 18 C.F.R. § 35.42 (2014).

2 *Exelon Generating Co.*, 93 FERC ¶ 61,140 (2000), *reh'g denied*, 95 FERC ¶ 61,309 (2001).

3 *See FPL Energy Vansycle, LLC*, Docket No. ER01-838-000 (letter order issued Feb. 15, 2001) (granting market-based rate authority).

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

Prior to the Transaction, JPMVEC purchased from Vansycle the entire output of the Stateline Project and resold a combined total of 290 MW to Bonneville Power Administration (BPA), Eugene Water & Electric Board, and Seattle City Light (collectively, Buyers) pursuant to long-term agreements. As a result of the Transaction, Exelon Generation will purchase from Vansycle the entire output of the Stateline Project and resell a combined total of 290 MW to the Buyers. Accordingly, only about 10 MW of uncommitted generation capacity will be added to the total uncommitted generation capacity owned or controlled by Exelon Generation and its affiliates in the PACW BAA[4] as a result of the Transaction.

Exelon Generation has not yet received consents to assign all of the contracts affected by the Transaction, but under the terms of the Transaction Exelon Generation began receiving the economic benefits and being exposed to the economic risks associated with the purchase and sale of the output of the Stateline Project as of April 1, 2015, and could be deemed to "control" the output of the Stateline Project as of that date. Therefore, for purposes of this notice of change in status, Exelon Generation is conservatively treating the Transaction as closed as of April 1, 2015.

II. ANALYSIS OF CHANGE IN STATUS

The change in status described in this notice does not change the conclusion that the Exelon MBR Entities continue to satisfy the Commission's test for determining whether to grant a public utility market-based rate authority. As demonstrated in Attachment A, the Exelon MBR Entities pass both the pivotal supplier screen (PSS) and market share screen (MSS) taking into account the small net increase in uncommitted generation capacity. The Exelon MBR Entities pass the PSS in the PACW BAA because the Exelon MBR Entities' net uncommitted capacity (126 MW) is significantly less than the market net uncommitted supply (1,647 MW).[5] The Exelon MBR Entities also pass the MSS in the PACW BAA because the Exelon MBR Entities' market share ranges from 4.7% (Summer) to 6.0% (Winter), well below the 20% threshold. Because the Exelon MBR Entities pass both the PSS and MSS, the Exelon MBR Entities continue to satisfy the Commission's test for determining whether to grant a public utility market-based rate authority.

---

4 The Stateline Project is electrically interconnected with the BPA BAA in addition to the PACW BAA. However, the full capacity of the BPA interconnection (90 MW) is used for the long-term sales to BPA from the Stateline Project. In addition, except for the 4.8 MW owned by Outback Solar, LLC—which are fully committed—none of the Exelon MBR Entities or any of their affiliates owns or controls any generation in the BPA BAA. Moreover, the Simultaneous Transmission Import Limit (SIL) values for imports into the BPA BAA are zero. *See Puget Sound Energy, Inc.*, 147 FERC ¶ 61,021 (2014). In any event, as shown in the attached market power screens analyzing the PACW BAA market, all other generation located within markets first-tier to the BPA BAA that is owned or controlled by the Exelon MBR Entities or their affiliates is fully committed, other than the uncommitted 10 MW from the Stateline Project, a *de minimis* amount. Therefore, the Exelon MBR Entities have not produced separate screens analyzing the BPA BAA market.

5 In the PACW BAA, the Exelon MBR Entities used to be affiliated with CER Generation II, LLC (CER II), which owned and operated an approximately 189 MW generation facility located in West Valley City, Utah. All of the interests in CER II were sold to an unaffiliated third party in a transaction authorized by the Commission in Docket No. EC15-2-000 and consummated on December 3, 2014.

SI-SSA-0010-1627

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

Because the Transaction involves only the purchase and sale of power and does not involve any transmission or distribution facilities or inputs to electric power production as defined in 18 C.F.R. §35.36, there have been no changes with respect to the Exelon MBR Entities' lack of transmission market power or their lack of ability to erect barriers to entry that would affect the Commission's prior finding that the Exelon MBR Entities lack vertical market power. To the extent necessary, the Exelon MBR Entities confirm that they have not erected barriers to entry into the relevant market and will not erect barriers to entry into the relevant market. Therefore, the Exelon MBR Entities continue to qualify for market-based rate authority.

As required by 18 C.F.R. § 35.42, attached hereto is an updated asset appendix listing (1) all affiliates that have market-based rate authority and identifying all generation assets owned or controlled by Exelon or its affiliates by BAA and geographic region, and (2) all electric transmission and natural gas intrastate pipelines and/or gas storage facilities owned or controlled by Exelon or its affiliates (Attachment B).[6]

III. TARIFF REVISIONS, EFFECTIVE DATE AND WAIVER

Exelon Generation, Constellation Energy Commodities Group Maine, LLC, Constellation NewEnergy, Inc., Constellation Energy Services, Inc.,[7] Constellation Energy Services of New York, Inc.,[8] Cassia Gulch Wind Park, LLC (Cassia Gulch), High Mesa Energy, LLC (High Mesa), and Tuana Springs Energy, LLC (Tuana Springs) (collectively, the Exelon NW Sellers)[9] have revised their Tariffs in several ministerial respects and have included herewith "redlined" versions of the Tariffs in Attachment C. The Exelon NW Sellers have submitted "clean" Tariffs in RTF format with metadata attached through the Commission's eTariff system. The Tariff revisions include:

- Updated ancillary services language to match the FERC-approved, standard ancillary services language;
- Updated language regarding compliance with Commission regulations to match the FERC-approved, standard compliance language;
- Elimination of Order No. 614 formatting and removal of the legal name of the market-based rate seller, which is now reflected in the CID; and

6 18 C.F.R. § 35.42(c) (2014).

7 Constellation Energy Services, Inc. was formerly known as Integrys Energy Services, Inc. A notice of succession reflecting the change in name was filed in Docket No. ER15-1537-000.

8 Constellation Energy Services of New York, Inc. was formerly known as Integrys Energy Services of New York, Inc. A notice of succession reflecting the change in name was filed in Docket No. ER15-1539-000.

9 The Exelon NW Sellers are the subset of Exelon MBR Entities that are either power marketers or own or control generation within the Northwest region.

SI-SSA-0010-1628

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

- Revised seller category classifications. Currently, the effective Tariffs reflect category 1 seller status in the Northwest region. However, as of the April 1, 2015, Exelon Generation could be deemed to "control" the output of the Stateline Project pursuant to the Transaction, which results in Exelon Generation and its affiliates owning and/or controlling more than 500 MW of generation in the Northwest region. Therefore, the Exelon NW Sellers are updating their Tariffs to reflect that they are category 2 sellers in the Northwest region.

  In addition, Cassia Gulch, High Mesa, and Tuana Springs have revised their seller category classifications to reflect that they are category 1 sellers in the Central, Northeast, Southeast, Southwest, and Southwest Power Pool (SPP) regions.[10] Currently, their Tariffs reflect category 2 status in the Central, Northeast, Southeast, and SPP regions due to their affiliation with entities that own or control, collectively, over 500 MW of generation in those regions. However, Cassia Gulch, High Mesa, and Tuana Springs do not themselves own or control any generation in any region outside of the Northwest region. Likewise, Cassia Gulch, High Mesa, and Tuana Springs do not own, operate, or control transmission facilities other than limited equipment necessary to interconnect their individual generating facilities to the transmission grid. Further, Cassia Gulch, High Mesa, and Tuana Springs are not affiliated with any entity that owns, operates or controls transmission facilities or is a franchised public utility in the same region as their generation assets. Finally, Cassia Gulch, High Mesa, and Tuana Springs do not raise other vertical market power issues. For these reasons, Cassia Gulch, High Mesa, and Tuana Springs respectfully request a determination that they meet the criteria for classification as a category 1 seller in the Central, Northeast, Southeast, Southwest, and SPP regions.

The Exelon MBR Entities respectfully ask that the Commission accept this notice and the updated Tariffs for filing, effective April 1, 2015. To the extent necessary, the Exelon NW Sellers request waiver of the 60-day prior notice requirement pursuant to Section 35.11 of the Commission's regulations[11] in order to permit the revised Tariffs to become effective April 1, 2015. Good cause for such waiver exists because the Commission generally finds a waiver of notice requirements "appropriate when an uncontested filing has no rate impact."[12] The Exelon NW Sellers' tariff revisions specified in this filing have no impact on rates since no substantive changes have been made to the Tariffs. The Commission routinely grants waiver of its notice requirements in similar circumstances.[13]

---

[10] Cassia Gulch, High Mesa, and Tuana Springs are already classified as category 1 sellers in the Southwest region.

V. DOCUMENTS SUBMITTED WITH FILING

The Exelon MBR Entities submit the following documents:

1. This transmittal letter;
2. Attachment A: Pivotal supplier and market share screens;
3. Attachment B: Asset appendices of Exelon Corporation and affiliates; and
4. Attachment C: Redlined tariffs.

VI. CONCLUSION

For the reasons set forth above, the change in status described herein does not materially change the facts and circumstances that the Commission relied upon in granting the Exelon MBR Entities market-based rate authority. Therefore, the Exelon MBR Entities respectfully request that the Commission accept for filing this notice of change in status. Further, the Exelon NW Sellers also request that the Commission accept the included Tariff revisions, waive any

date of the name change); *Pastoria Energy Facility, L.L.C.*, Docket No. ER12- 2645-000 (unpublished delegated letter order issued Oct. 16, 2012).

Secretary
Federal Energy Regulatory Commission
888 First Street, NE, Room 1A
Washington, DC 20426

RE: *PacifiCorp*
Docket No. ER10-3246-___
Triennial Market Power Update

Dear Secretary Bose:

Pursuant to Section 35.37(a)(1) of the Commission's regulations,[1] and Order No. 697, *et seq.*,[2] PacifiCorp respectfully submits this Triennial Market Power Update ("Triennial Update") in the above-referenced proceeding. Concurrent with this filing, PacifiCorp is submitting under separate cover through the Commission's eTariff system certain changes to its market-based rate tariff in Docket No. ER13-1823-000.

1. Description of PacifiCorp and Public Utility Affiliates

PacifiCorp is a vertically-integrated public utility primarily engaged in the business of providing retail electric service to approximately 1.8 million residential, commercial, industrial, and other customers in portions of the following states: Utah, Oregon, Wyoming, Washington, Idaho, and California. In addition, PacifiCorp provides electric transmission service in nine Western states and owns, controls, or has interests in: (i) approximately 9,191 pole miles of transmission lines and (ii) certain thermal, hydroelectric, and wind-powered generating plants with a combined rated capacity of approximately 11,004 MW.[3]

---

[1] 18 C.F.R. § 35.37(a)(1) (2013).

[2] *Market-Based Rates for Wholesale Sales of Electric Energy, Capacity and Ancillary Services by Public Utilities*, Order No. 697, 119 FERC ¶ 61,295, *clarified*, 121 FERC ¶ 61,260 (2007), *on reh'g*, Order No. 697-A, 123 FERC ¶ 61,055 (2008), *on reh'g*, Order No. 697-B, 125 FERC ¶ 61,326 (2008), *on reh'g*, Order No. 697-C, 127 FERC ¶ 61,284 (2009); *on reh'g*, Order No. 697-D, 130 FERC ¶ 61,206 (2010); *clarified*, 131 FERC ¶ 61,021 (2010).

[3] This figure, which reflects nameplate ratings for solar and wind facilities, and summer seasonal ratings for all other facilities, includes approximately 495 MW of capacity leased or purchased through long-term contract, and

Part I - Pivotal Supplier Analysis
Base Case
PACW Balancing Authority Area
Applicant: PacifiCorp

Row		MW	Reference
	Generation		
	Seller and Affiliate Capacity		
A	Installed Capacity	2,889	Workpaper - Generation
B	Long-Term Firm Purchases	243	Workpaper - Generation
C	Long-Term Firm Sales	0	Workpaper - Generation
D	Imported Power	118	Workpaper - Imported Power
	Non-Affiliate Capacity		
E	Installed Capacity	237	Workpaper - Generation
F	Long-Term Firm Purchases	0	Workpaper - Generation
G	Long-Term Firm Sales	-6	Workpaper - Generation
H	Imported Power	1,601	Workpaper - Imported Power
I	Balancing Authority Area Reserve Requirement	-377	Workpaper - Reserves
J	Amount of Line I Attributable to Seller, if any	-359	Workpaper - Reserves
K	Total Uncommitted Supply (SUM A,B,C,D,E,F,G,H,I,M)	1,581	
	Load		
L	Balancing Authority Area Annual Peak Load	3,844	Workpaper - Load
M	Average Daily Peak Native Load in Peak Month	-3,123	Workpaper - Load
N	Amount of Line M Attributable to Seller, if any	-2,974	Workpaper - Load
O	Wholesale Load (SUM L,M)	721	
P	Net Uncommitted Supply (K-O)	860	
Q	Seller's Uncommitted Capacity (SUM A,B,C,D,J,N)	-84	

Result of Pivotal Supplier Screen (Pass if Line Q < Line P) **PASS**
(Fail if Line Q > 0 and Line Q > Line P)[1]

Note:
[1] Formulation in Appendix A of Order No. 697 adjusted to ensure that an applicant with zero or negative uncommitted capacity does not fail the pivotal supplier analysis.

Federal Energy Regulatory Commission
FERC Form No. 714

Annual Electric Balancing Authority Area and Planning Area Report

For the Year Ending December 31, 2012

Utility Code: 14355
Utility Name: PacifiCorp - West

Part II - Schedule 3. Balancing Authority Area Net Energy for Load and Peak Demand Sources by Month

Enter the monthly "Net Energy for Load" which is the amount of energy that the balancing authority area requires internally including balancing authority area losses. The total in column (d) should equal the difference in the totals for columns (e) minus (f) on Schedule 5. The value in column (f) for the month of the annual peak demand should equal the total in column (e) in Schedule 1. Any differences must be explained in a footnote. Refer to the Form 714 instructions for specific guidelines.

Line No (a)	Month (b)	Balancing Authority Area Net Generation (MWh) (c)	Net Actual Interchange (MWh) (d)	Net Energy for Load (MWh) (c + d) (e)	Balancing Authority Area Area Load Sources at Time of Balancing Authority Area Area Monthly Peak Demand, Based on Net Energy For Load (NEL)					Monthly Minimum Demand (MW) (k)
					Output of Generating Plants (MW) (f)	Unit or Firm Purchases (MW) (g)	Unit or Firm Sales (MW) (h)	Net Non-Firm & Inadvertent (MW) (i)	Monthly Peak Demand (MW) (f+g-h+i) (j)

Redlined Tariffs

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

CASSIA GULCH WIND PARK, LLC
FERC ELECTRIC TARIFF

1. Availability: Cassia Gulch Wind Park, LLC ("Cassia Gulch" or "Seller") makes electric energy, capacity, and ancillary services available under this Tariff to any purchaser for resale, except as prohibited below.

   Ancillary Services - Third Party Provider

   Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, *i.e.*, where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

2. Applicability: This schedule is applicable to all wholesale sales of energy, capacity, and ancillary services by Seller not otherwise subject to a particular rate schedule of Seller.

3. Rates: All sales shall be made at rates established by agreement between the purchaser and Seller.

4. Other Terms and Conditions: All other terms and conditions shall be established by agreement between the purchaser and Cassia Gulch.

5. Compliance with Commission Regulations: ~~Cassia Gulch~~Seller shall comply with the provisions of 18 C.F.R. Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning ~~Cassia Gulch~~Seller's market-based rate authority, including orders in which the Commission authorizes ~~Cassia Gulch~~Seller to engage in affiliate sales under this tariff or otherwise restricts or limits ~~Cassia Gulch~~Seller's market-based rate authority. Failure to comply with the applicable provisions of 18 C.F.R. Part 35, Subpart H, and with any orders of the Commission concerning ~~Cassia Gulch~~Seller's market-based rate authority, will constitute a violation of this tariff.

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

6. Limitations and Exemptions Regarding Market-Based Rate Authority: The Commission granted Cassia Gulch in Docket No. ER10-75-000 the following waivers and exemptions in connection with its market-based rate authority: (i) waiver of Subparts B and C of Part 35 regarding the filing of rate schedules, except Sections 35.12(a), 35.13(b), 35.15 and 35.16; (ii) waiver of the accounting and related reporting requirements under Part 41, Part 101 and Part 141, except sections 141.14 and 141.15, of the Commission's regulations; and (iii) blanket approval under Section 204 of the Federal Power Act, 16 U.S.C. § 824c, and Part 34 of the Commission's regulations for all future issuances of securities and debt and assumptions and liabilities.

   The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140 at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC ¶ 61,270 (2000).

7. Seller Category: Cassia Gulch is a Category 1 Seller in the Central, Northeast, Southeast, Southwest, and Southwest Power Pool ~~Northwest and Southwest~~ regions, and a Category 2 Seller in the Northwest region ~~Northeast, Southeast, Central, and Southwest Power Pool regions~~, as defined in 18 C.F.R. § 35.36(a).

8. Effective Date: This Tariff shall be effective on and after the date on which the Commission permits it to become effective.

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

CONSTELLATION ENERGY COMMODITIES GROUP MAINE, LLC
FERC ELECTRIC TARIFF

1. **Availability.** Constellation Energy Commodities Group Maine, LLC ("CCG Maine" or "Seller") will make available under this Tariff for sales to any purchaser for resale, including bilateral sales, into wholesale markets administered by an ISO or RTO that has market monitoring and mitigation measures approved by the Commission: (i) electric capacity; (ii) electric energy; and (iii) the following Ancillary Services:

    a. ~~NYISO~~New York: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc~~NYISO~~.

    b. New England~~ISO NE~~: Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO New England, Inc~~ISO NE~~.

    c. PJM: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, LLC ("PJM") and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

    d. California~~CAISO~~: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

    e. Southwest Power Pool: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Southwest Power Pool, Inc. (SPP) and to others that are self- supplying ancillary services to SPP.

2. **Applicability.** This Tariff is applicable to all wholesale sales of each of the services listed in Paragraph 1 of this Tariff to the extent such sales are not otherwise subject to a particular Tariff of CCG Maine.

3. **Rates.** All sales shall be made at the rates established between the purchaser and CCG Maine.

4. **Compliance with Commission Regulations.** Seller shall comply with the provisions of 18 CFR Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 CFR Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

5. **Limitations and Exemptions Regarding Market-Based Rate Authority.**

   - The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140 at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co*., 91 FERC ¶ 61,270 (2000).

   - Seller has requested and been granted (1) waiver of Subparts B and C of Part 35 of the Commission's regulations, except as to sections 35.12(a), 35.13(b), 35.15 and 35.16; (2) waiver of Parts 41, 101 and 141 of the Commission's accounting and reporting regulations, with the exception of 18 C.F.R. §§ 141.14, 141.15 (1999); and (3) blanket authorization for all future issuances of securities or assumptions of liabilities pursuant to Part 34 of the Commission's regulations. *See Constellation Power Source Maine, LLC*, Docket No. ER02-699-000 (unpublished delegated letter order issued Feb. 26, 2002).

6. **Other Terms and Conditions.** All other terms and conditions of sale shall be established between the purchaser and CCG Maine.

7. **Effective Date.** This Tariff shall become effective upon the date specified by the Commission.

8. **Seller Category.** Seller is a Category 1 Seller in the ~~Northwest and~~ Southwest region~~s~~, and a Category 2 Seller in the Northeast, Northwest, Southeast, Central, and Southwest Power Pool regions, as ~~those categories are~~ defined in 18 C.F.R. § 35.36(a).

WHOLESALE MARKET-BASED RATE TARIFF

OF

CONSTELLATION ENERGY SERVICES, INC.

PROVIDING FOR

SALES OF CAPACITY, ENERGY AND/OR ANCILLARY SERVICES

**MARKET-BASED RATE TARIFF
OF
CONSTELLATION ENERGY SERVICES, INC.
PROVIDING FOR
SALES OF CAPACITY, ENERGY AND/OR ANCILLARY SERVICES**

I. DEFINITIONS

The following words and terms used herein shall be understood to have the following meanings:

1. Buyer: A purchaser of electric capacity, energy and/or ancillary services under this Tariff.

2. Commission: "Commission" means the Federal Energy Regulatory Commission or such successor Federal regulatory agency as may have jurisdiction over this Tariff.

3. Parties: "Parties" mean Seller and Buyer that have entered into a Transaction pursuant to this Tariff.

4. Seller: Constellation Energy Services, Inc.

5. Tariff: "Tariff" means this market-based rate tariff, as amended from time to time.

6. Transaction: "Transaction" means a particular transaction agreed to by the Parties under this Tariff.

II. SALES OF ELECTRIC CAPACITY, ENERGY AND/OR ANCILLARY SERVICES

1. Electric Capacity and Energy: Seller may sell electric capacity and/or energy to Buyer under this Tariff from time to time at rates, terms and conditions established by the agreement of the Parties. All such Transactions shall be voluntary.

2. Ancillary Services: Seller may sell the following ancillary services to Buyer under this Tariff from time to time at rates, terms and conditions established by the agreement of the Parties. All such Transactions shall be voluntary.

a. New England: Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO New England, Inc.

b. PJM: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, L.L.C. ("PJM") and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

c. New York: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc.

d. California: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

e. MISO: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Midcontinent Independent System Operator, Inc. (MISO) and to others that are self-supplying ancillary services to MISO.

f. Southwest Power Pool: Seller offers regulation service and operating

reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Southwest Power Pool, Inc. (SPP) and to others that are self-supplying ancillary services to SPP.

g. Ancillary Services – Third-Party Provider
Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, i.e., where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

III. RATES

All sales shall be made at rates established by agreement between Seller and Buyer.

IV. OTHER TERMS AND CONDITIONS

All other terms and conditions shall be established by agreement between Seller and Buyer.

V. EFFECTIVE DATE

This Tariff is effective on the date specified by the Commission.

VI. REVISIONS TO THE TARIFF

Seller may file revisions to this Tariff by notifying Buyer in writing and by unilaterally making the appropriate filing with the Commission pursuant to the provisions

of Section 205 of the Federal Power Act; provided, however, that such revision shall not affect the rates, terms and conditions of Transactions entered into prior to the date of such revision, unless otherwise agreed by the Parties.

VII. COMPLIANCE WITH THE COMMISSION REGULATIONS

Seller shall comply with the provisions of 18 CFR Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 CFR Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

VIII. LIMITATIONS AND EXEMPTIONS REGARDING MARKET-BASED RATE AUTHORITY

The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC 61,140 at 61,425 (2000), *on reh'g*, 95 FERC 61,309 (2001); *AmerGen VT, LLC*, 90 FERC 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC 61,270 (2000). The Commission also granted Seller the following waivers and blanket authorization: (a) waiver of Subparts B and C of Part 35 of the Commission's regulations requiring the filing of cost-of-service information, except for sections 35.12(a), 35.13(b), 35.15 and 35.16; (b) waiver of the accounting and other requirements Parts 41, 101 and 141, except sections 141.14 and 141.15, of the Commission's regulations; and (c) blanket approval as to Section 204 of the Federal Power Act and Part 34 of the Commission's regulations for all future issuances of securities and assumption of liabilities. *Wisconsin Public Service Corp., et al.*, 75 FERC 61,057 (1996) (Docket No. ER96-1088-000).

IX. SELLER CATEGORY

Seller is a Category 1 seller in the Southwest region, and a Category 2 seller in the Central, Northeast, Northwest, Southeast, and Southwest Power Pool rRegions ~~and a Category 1 seller in the Northwest and Southwest Regions,~~ , as defined in 18 C.F.R. § 35.36(a).

WHOLESALE MARKET-BASED RATE TARIFF

OF

CONSTELLATION ENERGY SERVICES OF NEW YORK, INC.

PROVIDING FOR

SALES OF CAPACITY AND ENERGY
MARKET-BASED RATE TARIFF OF
CONSTELLATION ENERGY SERVICES OF NEW YORK, INC.
PROVIDING FOR
SALES OF CAPACITY AND ENERGY

I. DEFINITIONS

The following words and terms used herein shall be understood to have the following meanings:

1. Buyer: A purchaser of electric capacity, energy and/or ancillary services under this Tariff.

2. Commission: "Commission" means the Federal Energy Regulatory Commission or such successor Federal regulatory agency as may have jurisdiction over this Tariff.

3. Parties: "Parties" mean Seller and Buyer that have entered into a Transaction pursuant to this Tariff.

4. Seller: Constellation Energy Services of New York, Inc.

5. Tariff: "Tariff" means this market-based rate tariff, as amended from time to time.

6. Transaction: "Transaction" means a particular transaction agreed to by the Parties under this Tariff.

II. SALES OF ELECTRIC CAPACITY, ENERGY AND/OR ANCILLARY SERVICES

1. Electric Capacity and Energy: Seller may sell electric capacity and/or energy to Buyer under this Tariff from time to time at rates, terms and conditions established by the agreement of the Parties. All such Transactions shall be voluntary.

2. Ancillary Services: Seller may sell the following ancillary services to Buyer under this Tariff from time to time at rates, terms and conditions established by the agreement of the Parties. All such Transactions shall be voluntary.

a. New England: Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO New England, Inc.

b. PJM: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, L.L.C. ("PJM") and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

c. New York: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc.

d. California: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

e. MISO: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Midcontinent Independent System Operator, Inc. (MISO) and to others that are self-supplying ancillary services to MISO.

f. Southwest Power Pool: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute

supplemental reserve) for sale to the Southwest Power Pool, Inc. (SPP) and to others that are self-supplying ancillary services to SPP.

g. Ancillary Services – Third-Party Provider

Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, i.e., where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

III. RATES

All sales shall be made at rates established by agreement between Seller and Buyer.

IV. OTHER TERMS AND CONDITIONS

All other terms and conditions shall be established by agreement between Seller and Buyer.

V. EFFECTIVE DATE

This Tariff is effective on the date specified by the Commission.

VI. REVISIONS TO THE TARIFF

Seller may file revisions to this Tariff by notifying Buyer in writing and by

unilaterally making the appropriate filing with the Commission pursuant to the provisions of Section 205 of the Federal Power Act; provided, however, that such revision shall not affect the rates, terms and conditions of Transactions entered into prior to the date of such revision, unless otherwise agreed by the Parties.

VII. COMPLIANCE WITH THE COMMISSION REGULATIONS

Seller shall comply with the provisions of 18 CFR Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 CFR Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

VIII. LIMITATIONS AND EXEMPTIONS REGARDING MARKET-BASED RATE AUTHORITY

The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC 61,140 at 61,425 (2000), *on reh'g*, 95 FERC 61,309 (2001); *AmerGen VT, LLC*, 90 FERC 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC 61,270 (2000). The Commission also granted Seller the following waivers and blanket authorization: (a) waiver of Subparts B and C of Part 35 of the Commission's regulations requiring the filing of cost-of-service information, except for sections 35.12(a), 35.13(b), 35.15 and 35.16; (b) waiver of the accounting and other requirements Parts 41, 101 and 141, except sections 141.14 and 141.15, of the Commission's regulations; and (c) blanket approval as to Section 204 of the Federal Power Act and Part 34 of the Commission's regulations for all future issuances of securities and assumption of liabilities. *See Advantage Energy, Inc.*, Docket No. ER97-2758-000 (July 14, 1997) (unpublished letter order).

IX. SELLER CATEGORY

Seller is a Category 1 seller in the Southwest region, and a Category 2 seller in the Central, Northeast, Northwest, Southeast, and Southwest Power Pool rRegions ~~and a Category 1 seller in the Northwest and Southwest Regions,~~ as defined in 18 C.F.R. § 35.36(a).

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

CONSTELLATION NEWENERGY, INC.

FERC ELECTRIC TARIFF NO. 1

1. Availability: Constellation NewEnergy, Inc. ("Constellation NewEnergy" or "Seller") makes electric energy and capacity available under this tariff to any purchaser for resale. Constellation NewEnergy also separately makes available for wholesale sales to purchasers with whom Constellation NewEnergy has contracted the following ancillary services:

(A) ~~Within the market administered by PJM Interconnection, L.L.C. ("PJM")~~: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, LLC ("PJM") and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

(B) ~~Within the markets administered by the Independent System Operator of~ New England ("ISO-NE"): Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO New England, Inc~~ISO-NE~~.

(C) ~~Within the markets administered by the~ New York ~~Independent System Operator ("NYISO")~~: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc~~NYISO~~.

(D) ~~Within the markets administered by the~ California ~~Independent System Operator ("CAISO")~~: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

(E) ~~Within the markets administered by the Midcontinent Independent System Operator ("MISO")~~: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Midcontinent Independent System Operator, Inc. (MISO) and to

others that are self-supplying ancillary services to MISO.

(F) ~~*Within the markets administered by the*~~ *Southwest Power Pool*: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Southwest Power Pool, Inc. (SPP) and to others that are self- supplying ancillary services to SPP.

(G) Ancillary Services – Third Party Provider

Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, i.e., where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

2. Applicability: This tariff is applicable to wholesale sales of each of the services listed in Paragraph 1 by Constellation NewEnergy not otherwise subject to a particular tariff of Constellation NewEnergy.

3. Rates: All sales shall be made at rates established by agreement between the purchaser and Constellation NewEnergy.

4. Other Terms and Conditions: All other terms and conditions shall be established by agreement between the purchaser and Constellation NewEnergy.

5. Compliance with Commission Regulations: Seller shall comply with the provisions of 18 CFR Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 CFR Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

6. Limitations and Exemptions Regarding Market-Based Rate Authority:

   - The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140 at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC ¶ 61,270 (2000).

   - Seller has requested and been granted (1) waiver of Subparts B and C of Part 35 of the Commission's regulations, except as to sections 35.12(a), 35.13(b), 35.15 and 35.16; (2) waiver of Parts 41,101 and 141, except sections 141.14 and 141.15, of the Commission's accounting and reporting regulations; and (3) blanket authorization for all future issuances of securities or assumptions of liabilities pursuant to Part 34 of the Commission's regulations. *See NEV, L.L.C.*, 81 FERC ¶ 61,186 (1997).

7. Effective Date: This tariff shall be effective on the date specified by the Federal Energy Regulatory Commission.

8. Seller Category: Seller is a Category 1 Seller in the ~~Northwest and~~ Southwest region~~s~~, and a Category 2 Seller in the Northeast, Northwest, Southeast, Central, and Southwest Power Pool regions, as ~~those categories are~~ defined in 18 C.F.R. § 35.36(a).

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

Exelon Generation Company, LLC

Market-Based Rate Tariff

1. Availability and Character of Service

Exelon Generation Company, LLC ("Exelon Generation" or "Seller") may sell electric capacity and/or energy under this tariff in amounts, at levels of firmness or priorities of service, for periods of service, and under such other terms and conditions, all as established by agreement between Exelon Generation and the Customer under a transaction agreement hereunder.

2. Ancillary Services

PJM: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, L.L.C. ("PJM") and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

New York: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc.

New England: Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO New England, Inc.

California: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

MISO: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Midcontinent Independent System Operator, Inc. (MISO) and to others that are self-supplying ancillary services to MISO.

Southwest Power Pool: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Southwest Power Pool, Inc. (SPP) and to others that are self- supplying ancillary services to SPP.

3. Ancillary Services - Third Party Provider

Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, i.e., where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

4. Rates

All rates for sales under this rate schedule shall be established by agreement between Exelon Generation and Customer.

5. General Terms and Conditions:

A. Acceptance of service hereunder by a Customer shall bind Customer to the provisions of this tariff and to the terms of a transaction agreement between or among the parties.

B. The rights of Exelon Generation and a customer to seek changes to the rates or other terms and conditions of service initially agreed upon between them shall be governed by parties' transaction agreement.

C. Compliance with Commission Regulations: Seller shall comply with the provisions of 18 C.F.R. Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 C.F.R. Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

D. Limitations and Exemptions Regarding Market-Based Rate Authority: The Commission has granted waiver of its code of conduct and affiliate sales

restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140 at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC ¶ 61,270 (2000). The Commission also granted Seller the following waivers and blanket authorization: (a) waiver of Subparts B and C of Part 35 of the Commission's regulations requiring the filing of cost-of-service information, except for sections 35.12(a), 35.13(b), 35.15 and 35.16; (b) waiver of the accounting and other requirements Parts 41, 101 and 141, except sections 141.14 and 141.15, of the Commission's regulations; and (c) blanket approval as to Section 204 of the Federal Power Act and Part 34 of the Commission's regulations for all future issuances of securities and assumption of liabilities. *See Exelon Generation Co., LLC*, 93 FERC ¶ 61,140, at 61,427 (2000); *Exelon Generation Co., LLC*, Docket No. ER01-2794-000 (Oct. 3, 2001) (unreported) (accepting Tariff No. 2 under Exelon Generation's market based rate authority).

E. Seller Category: Seller is a Category 1 Seller in the Southwest region, and a Category 2 Seller in the Central, Northeast, Northwest, Southeast, and Southwest Power Pool regions~~, and a Category 1 Seller in the Southwest and Northwest regions~~, as defined in 18 C.F.R. § 35.36(a).

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

FERC Electric Tariff, Volume No. 1

Market Based Rate Tariff

I. Availability

Seller makes electric energy, capacity, and ancillary services available under this tariff to any purchaser with whom Seller has contracted, except as prohibited below.

II. Rates

All sales shall be made at rates established by agreement between the purchaser and Seller.

III. Other Terms and Conditions

All other terms and conditions of sale shall be established by agreement between the purchaser and Seller.

IV. Seller Category

Seller is a Category 1 Seller in the ~~Northwest and~~ Central, Northeast, Southeast, Southwest, and Southwest Power Pool ~~Southwest~~ ~~,~~ regions and a Category 2 Seller in the Northwest region ~~all other regions~~, as ~~those Categories are~~ defined in 18 C.F.R. § 35.36(a).

V. Compliance with Commission Regulations

Seller shall comply with the provisions of 18 C.F.R. Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 C.F.R. Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

VI. Limitations and Exemptions Regarding Market-Based Rate Authority

In *High Mesa Energy, LLC*, ER12-2528-000 (2012):

- The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140, at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307, at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC ¶ 61,270 (2000).

- Seller has received (1) waiver of Subparts B and C of Part 35, except for sections 35.12(a), 35.13(b), 35.15 and 35.16; (2) waiver of Parts 41, 101 and 141 except sections 141.14 and 141.15; and (3) blanket authorization for all future issuances of securities or assumptions of liabilities pursuant to Part 34 of the Commission's regulations.

VII. Ancillary Services

(A) ~~Within the market administered by PJM Interconnection, LLC ("PJM")~~: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, L.L.C. ("PJM")~~,~~ and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

(B) ~~Within the markets administered by the Independent System Operator of~ New England ("ISO NE")~~: Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO -New England, Inc.

(C) ~~Within the markets administered by the~ New York Independent System Operator ("NYISO")~~: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc.

(D) ~~Within the markets administered by the~ California Independent System Operator ("CAISO")~~: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

(E) ~~Within the markets administered by the Midcontinent System Operator ("MISO")~~: Seller offers regulation service and operating reserve service (including 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Midcontinent Independent System Operator, Inc. (MISO) and to others that are self-supplying ancillary services to MISO.

(F) Ancillary Services – Third Party Provider

Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, i.e., where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales

to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

VIII. Effective Date

This Rate Schedule shall be effective as of the date specified by the Federal Energy Regulatory Commission.

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

TUANA SPRINGS ENERGY, LLC
FERC ELECTRIC TARIFF

1. Availability: Tuana Springs Energy, LLC ("Tuana Springs" or "Seller") makes electric energy, capacity, and ancillary services available under this Tariff to any purchaser for resale, except as prohibited below.

   Ancillary Services - Third Party Provider

   Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, *i.e.*, where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

2. Applicability: This schedule is applicable to all wholesale sales of energy, capacity, and ancillary services by Seller not otherwise subject to a particular rate schedule of Seller.

3. Rates: All sales shall be made at rates established by agreement between the purchaser and Tuana Springs.

4. Other Terms and Conditions: All other terms and conditions shall be established by agreement between the purchaser and Tuana Springs.

5. Compliance with Commission Regulations: ~~Tuana Springs~~Seller shall comply with the provisions of 18 C.F.R. Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning ~~Tuana Spring~~Seller~~s~~'s market-based rate authority, including orders in which the Commission authorizes ~~Tuana Springs~~Seller to engage in affiliate sales under this tariff or otherwise restricts or limits ~~Tuana Springs~~Seller's market-based rate authority. Failure to comply with the applicable provisions of 18 C.F.R. Part 35, Subpart H, and with any orders of the Commission concerning ~~Tuana Springs~~Seller's~~'~~ market-based rate authority, will constitute a violation of this tariff.

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

6. Limitations and Exemptions Regarding Market-Based Rate Authority: The Commission granted Tuana Springs in Docket No. ER10-87-000 the following waivers and exemptions in connection with its market-based rate authority: (i) waiver of Subparts B and C of Part 35 regarding the filing of rate schedules, except Sections 35.12(a), 35.13(b), 35.15 and 35.16; (ii) waiver of the accounting and related reporting requirements under Part 41, Part 101 and Part 141, except sections 141.14 and 141.15, of the Commission's regulations; and (iii) blanket approval under Section 204 of the Federal Power Act, 16 U.S.C. § 824c, and Part 34 of the Commission's regulations for all future issuances of securities and debt and assumptions and liabilities.

   The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140 at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC ¶ 61,270 (2000).

7. Seller Category: Tuana Springs is a Category 1 Seller in the Central, Northeast, Southeast, Southwest, and Southwest Power Pool ~~Northwest and Southwest~~ regions, and a Category 2 Seller in the Northwest~~Northeast, Southeast, Central, and Southwest Power Pool regions~~ region, as defined in 18 C.F.R. § 35.36(a).

8. Effective Date: This Tariff shall be effective on and after the date on which the Commission permits it to become effective.

Market-Based Rate Tariff

1. Availability and Character of Service

Seller may sell electric capacity and/or energy under this tariff in amounts, at levels of firmness or priorities of service, for periods of service, and under such other terms and conditions, all as established by agreement between Seller and the Customer under a transaction agreement hereunder.

2. Ancillary Services

PJM: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, L.L.C. ("PJM") and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

New York: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc.

New England: Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO New England, Inc.

20150430-5588 FERC PDF (Unofficial) 4/30/2015 4:51:54 PM

California: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

MISO: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Midcontinent Independent System Operator, Inc. (MISO) and to others that are self-supplying ancillary services to MISO.

Southwest Power Pool: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Southwest Power Pool, Inc. (SPP) and to others that are self- supplying ancillary services to SPP.

3. Ancillary Services - Third Party Provider

Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, i.e., where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

4. Rates

All rates for sales under this rate schedule shall be established by agreement between Exelon Generation and Customer.

5. General Terms and Conditions:

A. Acceptance of service hereunder by a Customer shall bind Customer to the provisions of this tariff and to the terms of a transaction agreement between or among the parties.

B. The rights of Seller and a customer to seek changes to the rates or other terms and conditions of service initially agreed upon between them shall be governed by parties' transaction agreement.

C. Compliance with Commission Regulations: Seller shall comply with the provisions of 18 C.F.R. Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 C.F.R. Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

D. Limitations and Exemptions Regarding Market-Based Rate Authority: The Commission has granted waiver of its code of conduct and affiliate sales

Notice of Change in Status and Tariff Revisions of the Exelon MBR Entities

Dear Secretary Bose:

Pursuant to the requirements of section 35.42 of the regulations of the Federal Energy Regulatory Commission (FERC or Commission),[1] the above-captioned affiliates of Exelon Corporation (Exelon) with market-based rate authority (the Exelon MBR Entities) submit this notice of change in status to inform the Commission that as of April 1, 2015, the Exelon MBR Entities could be deemed to have acquired control over additional generation in the Northwest region as a result of a transaction described below. In addition, certain of the Exelon MBR Entities specified below submit revisions to their market-based rate tariffs (Tariffs) to update their seller category designation and make additional ministerial changes, and respectfully request an effective date of April 1, 2015 for such revisions.

I. DESCRIPTION OF CHANGE IN STATUS

Exelon Generation Company, LLC (Exelon Generation) is a direct, wholly-owned subsidiary of Exelon that has Commission-granted market-based rate authority.[2] Exelon Generation entered into an agreement (Transaction) with J.P. Morgan Ventures Energy Corporation (JPMVEC) that will result in Exelon Generation being assigned JPMVEC's rights and obligations under certain contracts for the purchase and sale of the output of the Stateline Wind Energy Project (Stateline Project). The Stateline Project is a wind-powered electric generation facility with approximately 300 MW aggregate nameplate capacity located in the states of Oregon and Washington within the PacifiCorp-West (PACW) balancing authority area (BAA). The Stateline Project is owned and operated by FPL Energy Vansycle, LLC (Vansycle), which sells the output of the facility at market-based rates.[3]

1 18 C.F.R. § 35.42 (2014).

2 *Exelon Generating Co.*, 93 FERC ¶ 61,140 (2000), *reh'g denied*, 95 FERC ¶ 61,309 (2001).

3 *See FPL Energy Vansycle, LLC*, Docket No. ER01-838-000 (letter order issued Feb. 15, 2001) (granting market-based rate authority).

20150430-5652 FERC PDF (Unofficial) 4/30/2015 4:30:12 PM

Prior to the Transaction, JPMVEC purchased from Vansycle the entire output of the Stateline Project and resold a combined total of 290 MW to Bonneville Power Administration (BPA), Eugene Water & Electric Board, and Seattle City Light (collectively, Buyers) pursuant to long-term agreements. As a result of the Transaction, Exelon Generation will purchase from Vansycle the entire output of the Stateline Project and resell a combined total of 290 MW to the Buyers. Accordingly, only about 10 MW of uncommitted generation capacity will be added to the total uncommitted generation capacity owned or controlled by Exelon Generation and its affiliates in the PACW BAA[4] as a result of the Transaction.

Exelon Generation has not yet received consents to assign all of the contracts affected by the Transaction, but under the terms of the Transaction Exelon Generation began receiving the economic benefits and being exposed to the economic risks associated with the purchase and sale of the output of the Stateline Project as of April 1, 2015, and could be deemed to "control" the output of the Stateline Project as of that date. Therefore, for purposes of this notice of change in status, Exelon Generation is conservatively treating the Transaction as closed as of April 1, 2015.

II. ANALYSIS OF CHANGE IN STATUS

The change in status described in this notice does not change the conclusion that the Exelon MBR Entities continue to satisfy the Commission's test for determining whether to grant a public utility market-based rate authority. As demonstrated in Attachment A, the Exelon MBR Entities pass both the pivotal supplier screen (PSS) and market share screen (MSS) taking into account the small net increase in uncommitted generation capacity. The Exelon MBR Entities pass the PSS in the PACW BAA because the Exelon MBR Entities' net uncommitted capacity (126 MW) is significantly less than the market net uncommitted supply (1,647 MW).[5] The Exelon MBR Entities also pass the MSS in the PACW BAA because the Exelon MBR Entities' market share ranges from 4.7% (Summer) to 6.0% (Winter), well below the 20% threshold. Because the Exelon MBR Entities pass both the PSS and MSS, the Exelon MBR Entities continue to satisfy the Commission's test for determining whether to grant a public utility market-based rate authority.

---

[4] The Stateline Project is electrically interconnected with the BPA BAA in addition to the PACW BAA. However, the full capacity of the BPA interconnection (90 MW) is used for the long-term sales to BPA from the Stateline Project. In addition, except for the 4.8 MW owned by Outback Solar, LLC—which are fully committed—none of the Exelon MBR Entities or any of their affiliates owns or controls any generation in the BPA BAA. Moreover, the Simultaneous Transmission Import Limit (SIL) values for imports into the BPA BAA are zero. *See Puget Sound Energy, Inc.*, 147 FERC ¶ 61,021 (2014). In any event, as shown in the attached market power screens analyzing the PACW BAA market, all other generation located within markets first-tier to the BPA BAA that is owned or controlled by the Exelon MBR Entities or their affiliates is fully committed, other than the uncommitted 10 MW from the Stateline Project, a *de minimis* amount. Therefore, the Exelon MBR Entities have not produced separate screens analyzing the BPA BAA market.

[5] In the PACW BAA, the Exelon MBR Entities used to be affiliated with CER Generation II, LLC (CER II), which owned and operated an approximately 189 MW generation facility located in West Valley City, Utah. All of the interests in CER II were sold to an unaffiliated third party in a transaction authorized by the Commission in Docket No. EC15-2-000 and consummated on December 3, 2014.

SI-SSA-0010-1715

20150430-5652 FERC PDF (Unofficial) 4/30/2015 4:30:12 PM

Because the Transaction involves only the purchase and sale of power and does not involve any transmission or distribution facilities or inputs to electric power production as defined in 18 C.F.R. §35.36, there have been no changes with respect to the Exelon MBR Entities' lack of transmission market power or their lack of ability to erect barriers to entry that would affect the Commission's prior finding that the Exelon MBR Entities lack vertical market power. To the extent necessary, the Exelon MBR Entities confirm that they have not erected barriers to entry into the relevant market and will not erect barriers to entry into the relevant market. Therefore, the Exelon MBR Entities continue to qualify for market-based rate authority.

As required by 18 C.F.R. § 35.42, attached hereto is an updated asset appendix listing (1) all affiliates that have market-based rate authority and identifying all generation assets owned or controlled by Exelon or its affiliates by BAA and geographic region, and (2) all electric transmission and natural gas intrastate pipelines and/or gas storage facilities owned or controlled by Exelon or its affiliates (Attachment B).[6]

III. TARIFF REVISIONS, EFFECTIVE DATE AND WAIVER

Exelon Generation, Constellation Energy Commodities Group Maine, LLC, Constellation NewEnergy, Inc., Constellation Energy Services, Inc.,[7] Constellation Energy Services of New York, Inc.,[8] Cassia Gulch Wind Park, LLC (Cassia Gulch), High Mesa Energy, LLC (High Mesa), and Tuana Springs Energy, LLC (Tuana Springs) (collectively, the Exelon NW Sellers)[9] have revised their Tariffs in several ministerial respects and have included herewith "redlined" versions of the Tariffs in Attachment C. The Exelon NW Sellers have submitted "clean" Tariffs in RTF format with metadata attached through the Commission's eTariff system. The Tariff revisions include:

- Updated ancillary services language to match the FERC-approved, standard ancillary services language;
- Updated language regarding compliance with Commission regulations to match the FERC-approved, standard compliance language;
- Elimination of Order No. 614 formatting and removal of the legal name of the market-based rate seller, which is now reflected in the CID; and

6 18 C.F.R. § 35.42(c) (2014).

7 Constellation Energy Services, Inc. was formerly known as Integrys Energy Services, Inc. A notice of succession reflecting the change in name was filed in Docket No. ER15-1537-000.

8 Constellation Energy Services of New York, Inc. was formerly known as Integrys Energy Services of New York, Inc. A notice of succession reflecting the change in name was filed in Docket No. ER15-1539-000.

9 The Exelon NW Sellers are the subset of Exelon MBR Entities that are either power marketers or own or control generation within the Northwest region.

SI-SSA-0010-1716

20150430-5652 FERC PDF (Unofficial) 4/30/2015 4:30:12 PM

- Revised seller category classifications. Currently, the effective Tariffs reflect category 1 seller status in the Northwest region. However, as of the April 1, 2015, Exelon Generation could be deemed to "control" the output of the Stateline Project pursuant to the Transaction, which results in Exelon Generation and its affiliates owning and/or controlling more than 500 MW of generation in the Northwest region. Therefore, the Exelon NW Sellers are updating their Tariffs to reflect that they are category 2 sellers in the Northwest region.

  In addition, Cassia Gulch, High Mesa, and Tuana Springs have revised their seller category classifications to reflect that they are category 1 sellers in the Central, Northeast, Southeast, Southwest, and Southwest Power Pool (SPP) regions.[10] Currently, their Tariffs reflect category 2 status in the Central, Northeast, Southeast, and SPP regions due to their affiliation with entities that own or control, collectively, over 500 MW of generation in those regions. However, Cassia Gulch, High Mesa, and Tuana Springs do not themselves own or control any generation in any region outside of the Northwest region. Likewise, Cassia Gulch, High Mesa, and Tuana Springs do not own, operate, or control transmission facilities other than limited equipment necessary to interconnect their individual generating facilities to the transmission grid. Further, Cassia Gulch, High Mesa, and Tuana Springs are not affiliated with any entity that owns, operates or controls transmission facilities or is a franchised public utility in the same region as their generation assets. Finally, Cassia Gulch, High Mesa, and Tuana Springs do not raise other vertical market power issues. For these reasons, Cassia Gulch, High Mesa, and Tuana Springs respectfully request a determination that they meet the criteria for classification as a category 1 seller in the Central, Northeast, Southeast, Southwest, and SPP regions.

The Exelon MBR Entities respectfully ask that the Commission accept this notice and the updated Tariffs for filing, effective April 1, 2015. To the extent necessary, the Exelon NW Sellers request waiver of the 60-day prior notice requirement pursuant to Section 35.11 of the Commission's regulations[11] in order to permit the revised Tariffs to become effective April 1, 2015. Good cause for such waiver exists because the Commission generally finds a waiver of notice requirements "appropriate when an uncontested filing has no rate impact."[12] The Exelon NW Sellers' tariff revisions specified in this filing have no impact on rates since no substantive changes have been made to the Tariffs. The Commission routinely grants waiver of its notice requirements in similar circumstances.[13]

---

[10] Cassia Gulch, High Mesa, and Tuana Springs are already classified as category 1 sellers in the Southwest region.

2. Attachment A: Pivotal supplier and market share screens;
3. Attachment B: Asset appendices of Exelon Corporation and affiliates; and
4. Attachment C: Redlined tariffs.

VI. CONCLUSION

For the reasons set forth above, the change in status described herein does not materially change the facts and circumstances that the Commission relied upon in granting the Exelon MBR Entities market-based rate authority. Therefore, the Exelon MBR Entities respectfully request that the Commission accept for filing this notice of change in status. Further, the Exelon NW Sellers also request that the Commission accept the included Tariff revisions, waive any

date of the name change); *Pastoria Energy Facility, L.L.C.*, Docket No. ER12- 2645-000 (unpublished delegated letter order issued Oct. 16, 2012).

RE: *PacifiCorp*
Docket No. ER10-3246-___
Triennial Market Power Update

Dear Secretary Bose:

Pursuant to Section 35.37(a)(1) of the Commission's regulations,[1] and Order No. 697, *et seq.*,[2] PacifiCorp respectfully submits this Triennial Market Power Update ("Triennial Update") in the above-referenced proceeding. Concurrent with this filing, PacifiCorp is submitting under separate cover through the Commission's eTariff system certain changes to its market-based rate tariff in Docket No. ER13-1823-000.

1. Description of PacifiCorp and Public Utility Affiliates

PacifiCorp is a vertically-integrated public utility primarily engaged in the business of providing retail electric service to approximately 1.8 million residential, commercial, industrial, and other customers in portions of the following states: Utah, Oregon, Wyoming, Washington, Idaho, and California. In addition, PacifiCorp provides electric transmission service in nine Western states and owns, controls, or has interests in: (i) approximately 9,191 pole miles of transmission lines and (ii) certain thermal, hydroelectric, and wind-powered generating plants with a combined rated capacity of approximately 11,004 MW.[3]

---

[1] 18 C.F.R. § 35.37(a)(1) (2013).

[2] *Market-Based Rates for Wholesale Sales of Electric Energy, Capacity and Ancillary Services by Public Utilities*, Order No. 697, 119 FERC ¶ 61,295, *clarified*, 121 FERC ¶ 61,260 (2007), *on reh'g*, Order No. 697-A, 123 FERC ¶ 61,055 (2008), *on reh'g*, Order No. 697-B, 125 FERC ¶ 61,326 (2008), *on reh'g*, Order No. 697-C, 127 FERC ¶ 61,284 (2009); *on reh'g*, Order No. 697-D, 130 FERC ¶ 61,206 (2010); *clarified*, 131 FERC ¶ 61,021 (2010).

[3] This figure, which reflects nameplate ratings for solar and wind facilities, and summer seasonal ratings for all other facilities, includes approximately 495 MW of capacity leased or purchased through long-term contract, and

Part I - Pivotal Supplier Analysis
Base Case
PACW Balancing Authority Area
Applicant: PacifiCorp

Row		MW	Reference
	Generation		
	Seller and Affiliate Capacity		
A	Installed Capacity	2,889	Workpaper - Generation
B	Long-Term Firm Purchases	243	Workpaper - Generation
C	Long-Term Firm Sales	0	Workpaper - Generation
D	Imported Power	118	Workpaper - Imported Power
	Non-Affiliate Capacity		
E	Installed Capacity	237	Workpaper - Generation
F	Long-Term Firm Purchases	0	Workpaper - Generation
G	Long-Term Firm Sales	-6	Workpaper - Generation
H	Imported Power	1,601	Workpaper - Imported Power
I	Balancing Authority Area Reserve Requirement	-377	Workpaper - Reserves
J	Amount of Line I Attributable to Seller, if any	-359	Workpaper - Reserves
K	Total Uncommitted Supply (SUM A,B,C,D,E,F,G,H,I,M)	1,581	
	Load		
L	Balancing Authority Area Annual Peak Load	3,844	Workpaper - Load
M	Average Daily Peak Native Load in Peak Month	-3,123	Workpaper - Load
N	Amount of Line M Attributable to Seller, if any	-2,974	Workpaper - Load
O	Wholesale Load (SUM L,M)	721	
P	Net Uncommitted Supply (K-O)	860	
Q	Seller's Uncommitted Capacity (SUM A,B,C,D,J,N)	-84	

Result of Pivotal Supplier Screen (Pass if Line Q < Line P) **PASS**
(Fail if Line Q > 0 and Line Q > Line P)[1]

Note:
[1] Formulation in Appendix A of Order No. 697 adjusted to ensure that an applicant with zero or negative uncommitted capacity does not fail the pivotal supplier analysis.

Part II - Market Share Analysis

Federal Energy Regulatory Commission
FERC Form No. 714

Annual Electric Balancing Authority Area and Planning Area Report

For the Year Ending December 31, 2012

Utility Code: 14355
Utility Name: PacifiCorp - West

Part II - Schedule 3. Balancing Authority Area Net Energy for Load and Peak Demand Sources by Month

Enter the monthly "Net Energy for Load" which is the amount of energy that the balancing authority area requires internally including balancing authority area losses. The total in column (d) should equal the difference in the totals for columns (e) minus (f) on Schedule 5. The value in column (f) for the month of the annual peak demand should equal the total in column (e) in Schedule 1. Any differences must be explained in a footnote. Refer to the Form 714 instructions for specific guidelines.

Line No (a)	Month (b)	Balancing Authority Area Net Generation (MWh) (c)	Net Actual Interchange (MWh) (d)	Net Energy for Load (MWh) (c + d) (e)	Balancing Authority Area Area Load Sources at Time of Balancing Authority Area Area Monthly Peak Demand, Based on Net Energy For Load (NEL)					Monthly Minimum Demand (MW) (k)
					Output of Generating Plants (MW) (f)	Unit or Firm Purchases (MW) (g)	Unit or Firm Sales (MW) (h)	Net Non-Firm & Inadvertent (MW) (i)	Monthly Peak Demand (MW) (f+g-h+i) (j)

Attachment C:

Redlined Tariffs

20150430-5652 FERC PDF (Unofficial) 4/30/2015 4:30:12 PM

CASSIA GULCH WIND PARK, LLC
FERC ELECTRIC TARIFF

1. Availability: Cassia Gulch Wind Park, LLC ("Cassia Gulch" or "Seller") makes electric energy, capacity, and ancillary services available under this Tariff to any purchaser for resale, except as prohibited below.

   Ancillary Services - Third Party Provider

   Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, *i.e.*, where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

2. Applicability: This schedule is applicable to all wholesale sales of energy, capacity, and ancillary services by Seller not otherwise subject to a particular rate schedule of Seller.

3. Rates: All sales shall be made at rates established by agreement between the purchaser and Seller.

4. Other Terms and Conditions: All other terms and conditions shall be established by agreement between the purchaser and Cassia Gulch.

5. Compliance with Commission Regulations: ~~Cassia Gulch~~Seller shall comply with the provisions of 18 C.F.R. Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning ~~Cassia Gulch~~Seller's market-based rate authority, including orders in which the Commission authorizes ~~Cassia Gulch~~Seller to engage in affiliate sales under this tariff or otherwise restricts or limits ~~Cassia Gulch~~Seller's market-based rate authority. Failure to comply with the applicable provisions of 18 C.F.R. Part 35, Subpart H, and with any orders of the Commission concerning ~~Cassia Gulch~~Seller's market-based rate authority, will constitute a violation of this tariff.

20150430-5652 FERC PDF (Unofficial) 4/30/2015 4:30:12 PM

6. Limitations and Exemptions Regarding Market-Based Rate Authority: The Commission granted Cassia Gulch in Docket No. ER10-75-000 the following waivers and exemptions in connection with its market-based rate authority: (i) waiver of Subparts B and C of Part 35 regarding the filing of rate schedules, except Sections 35.12(a), 35.13(b), 35.15 and 35.16; (ii) waiver of the accounting and related reporting requirements under Part 41, Part 101 and Part 141, except sections 141.14 and 141.15, of the Commission's regulations; and (iii) blanket approval under Section 204 of the Federal Power Act, 16 U.S.C. § 824c, and Part 34 of the Commission's regulations for all future issuances of securities and debt and assumptions and liabilities.

   The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140 at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC ¶ 61,270 (2000).

7. Seller Category: Cassia Gulch is a Category 1 Seller in the Central, Northeast, Southeast, Southwest, and Southwest Power Pool ~~Northwest and Southwest~~ regions, and a Category 2 Seller in the Northwest region ~~Northeast, Southeast, Central, and Southwest Power Pool regions~~, as defined in 18 C.F.R. § 35.36(a).

8. Effective Date: This Tariff shall be effective on and after the date on which the Commission permits it to become effective.

20150430-5652 FERC PDF (Unofficial) 4/30/2015 4:30:12 PM

CONSTELLATION ENERGY COMMODITIES GROUP MAINE, LLC
FERC ELECTRIC TARIFF

1. Availability. Constellation Energy Commodities Group Maine, LLC ("CCG Maine" or "Seller") will make available under this Tariff for sales to any purchaser for resale, including bilateral sales, into wholesale markets administered by an ISO or RTO that has market monitoring and mitigation measures approved by the Commission: (i) electric capacity; (ii) electric energy; and (iii) the following Ancillary Services:

a. ~~NYISO~~New York: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc~~NYISO~~.

b. New England~~ISO NE~~: Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO New England, Inc~~ISO NE~~.

c. PJM: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, LLC ("PJM") and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

d. California~~CAISO~~: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

e. Southwest Power Pool: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Southwest Power Pool, Inc. (SPP) and to others that are self- supplying ancillary services to SPP.

2. Applicability. This Tariff is applicable to all wholesale sales of each of the services listed in Paragraph 1 of this Tariff to the extent such sales are not otherwise subject to a particular Tariff of CCG Maine.

3. **Rates.** All sales shall be made at the rates established between the purchaser and CCG Maine.

4. **Compliance with Commission Regulations.** Seller shall comply with the provisions of 18 CFR Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 CFR Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

5. **Limitations and Exemptions Regarding Market-Based Rate Authority.**

   - The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140 at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co*., 91 FERC ¶ 61,270 (2000).

   - Seller has requested and been granted (1) waiver of Subparts B and C of Part 35 of the Commission's regulations, except as to sections 35.12(a), 35.13(b), 35.15 and 35.16; (2) waiver of Parts 41, 101 and 141 of the Commission's accounting and reporting regulations, with the exception of 18 C.F.R. §§ 141.14, 141.15 (1999); and (3) blanket authorization for all future issuances of securities or assumptions of liabilities pursuant to Part 34 of the Commission's regulations. *See Constellation Power Source Maine, LLC*, Docket No. ER02-699-000 (unpublished delegated letter order issued Feb. 26, 2002).

6. **Other Terms and Conditions.** All other terms and conditions of sale shall be established between the purchaser and CCG Maine.

7. **Effective Date.** This Tariff shall become effective upon the date specified by the Commission.

8. **Seller Category.** Seller is a Category 1 Seller in the ~~Northwest and~~ Southwest region~~s~~, and a Category 2 Seller in the Northeast, Northwest, Southeast, Central, and Southwest Power Pool regions, as ~~those categories are~~ defined in 18 C.F.R. § 35.36(a).

WHOLESALE MARKET-BASED RATE TARIFF

OF

CONSTELLATION ENERGY SERVICES, INC.

PROVIDING FOR

SALES OF CAPACITY, ENERGY AND/OR ANCILLARY SERVICES

**MARKET-BASED RATE TARIFF
OF
CONSTELLATION ENERGY SERVICES, INC.
PROVIDING FOR
SALES OF CAPACITY, ENERGY AND/OR ANCILLARY SERVICES**

I. DEFINITIONS

The following words and terms used herein shall be understood to have the following meanings:

1. Buyer: A purchaser of electric capacity, energy and/or ancillary services under this Tariff.

2. Commission: "Commission" means the Federal Energy Regulatory Commission or such successor Federal regulatory agency as may have jurisdiction over this Tariff.

3. Parties: "Parties" mean Seller and Buyer that have entered into a Transaction pursuant to this Tariff.

4. Seller: Constellation Energy Services, Inc.

5. Tariff: "Tariff" means this market-based rate tariff, as amended from time to time.

6. Transaction: "Transaction" means a particular transaction agreed to by the Parties under this Tariff.

II. SALES OF ELECTRIC CAPACITY, ENERGY AND/OR ANCILLARY SERVICES

1. Electric Capacity and Energy: Seller may sell electric capacity and/or energy to Buyer under this Tariff from time to time at rates, terms and conditions established by the agreement of the Parties. All such Transactions shall be voluntary.

2. Ancillary Services: Seller may sell the following ancillary services to Buyer under this Tariff from time to time at rates, terms and conditions established by the agreement of the Parties. All such Transactions shall be voluntary.

a. New England: Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO New England, Inc.

b. PJM: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, L.L.C. ("PJM") and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

c. New York: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc.

d. California: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

e. MISO: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Midcontinent Independent System Operator, Inc. (MISO) and to others that are self-supplying ancillary services to MISO.

f. Southwest Power Pool: Seller offers regulation service and operating

reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Southwest Power Pool, Inc. (SPP) and to others that are self-supplying ancillary services to SPP.

g. Ancillary Services – Third-Party Provider
Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, i.e., where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

III. RATES

All sales shall be made at rates established by agreement between Seller and Buyer.

IV. OTHER TERMS AND CONDITIONS

All other terms and conditions shall be established by agreement between Seller and Buyer.

V. EFFECTIVE DATE

This Tariff is effective on the date specified by the Commission.

VI. REVISIONS TO THE TARIFF

Seller may file revisions to this Tariff by notifying Buyer in writing and by unilaterally making the appropriate filing with the Commission pursuant to the provisions

of Section 205 of the Federal Power Act; provided, however, that such revision shall not affect the rates, terms and conditions of Transactions entered into prior to the date of such revision, unless otherwise agreed by the Parties.

VII. COMPLIANCE WITH THE COMMISSION REGULATIONS

Seller shall comply with the provisions of 18 CFR Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 CFR Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

VIII. LIMITATIONS AND EXEMPTIONS REGARDING MARKET-BASED RATE AUTHORITY

The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC 61,140 at 61,425 (2000), *on reh'g*, 95 FERC 61,309 (2001); *AmerGen VT, LLC*, 90 FERC 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC 61,270 (2000). The Commission also granted Seller the following waivers and blanket authorization: (a) waiver of Subparts B and C of Part 35 of the Commission's regulations requiring the filing of cost-of-service information, except for sections 35.12(a), 35.13(b), 35.15 and 35.16; (b) waiver of the accounting and other requirements Parts 41, 101 and 141, except sections 141.14 and 141.15, of the Commission's regulations; and (c) blanket approval as to Section 204 of the Federal Power Act and Part 34 of the Commission's regulations for all future issuances of securities and assumption of liabilities. *Wisconsin Public Service Corp., et al.*, 75 FERC 61,057 (1996) (Docket No. ER96-1088-000).

IX. SELLER CATEGORY

Seller is a Category 1 seller in the Southwest region, and a Category 2 seller in the Central, Northeast, Northwest, Southeast, and Southwest Power Pool rRegions ~~and a Category 1 seller in the Northwest and Southwest Regions,~~ , as defined in 18 C.F.R. § 35.36(a).

20150430-5652 FERC PDF (Unofficial) 4/30/2015 4:30:12 PM

WHOLESALE MARKET-BASED RATE TARIFF

OF

CONSTELLATION ENERGY SERVICES OF NEW YORK, INC.

PROVIDING FOR

SALES OF CAPACITY AND ENERGY
MARKET-BASED RATE TARIFF OF
CONSTELLATION ENERGY SERVICES OF NEW YORK, INC.
PROVIDING FOR
SALES OF CAPACITY AND ENERGY

I. DEFINITIONS

The following words and terms used herein shall be understood to have the following meanings:

1. Buyer: A purchaser of electric capacity, energy and/or ancillary services under this Tariff.

2. Commission: "Commission" means the Federal Energy Regulatory Commission or such successor Federal regulatory agency as may have jurisdiction over this Tariff.

3. Parties: "Parties" mean Seller and Buyer that have entered into a Transaction pursuant to this Tariff.

4. Seller: Constellation Energy Services of New York, Inc.

5. Tariff: "Tariff" means this market-based rate tariff, as amended from time to time.

6. Transaction: "Transaction" means a particular transaction agreed to by the Parties under this Tariff.

II. SALES OF ELECTRIC CAPACITY, ENERGY AND/OR ANCILLARY SERVICES

1. Electric Capacity and Energy: Seller may sell electric capacity and/or energy to Buyer under this Tariff from time to time at rates, terms and conditions established by the agreement of the Parties. All such Transactions shall be voluntary.

2. Ancillary Services: Seller may sell the following ancillary services to Buyer under this Tariff from time to time at rates, terms and conditions established by the agreement of the Parties. All such Transactions shall be voluntary.

a. New England: Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO New England, Inc.

b. PJM: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, L.L.C. ("PJM") and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

c. New York: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc.

d. California: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

e. MISO: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Midcontinent Independent System Operator, Inc. (MISO) and to others that are self-supplying ancillary services to MISO.

f. Southwest Power Pool: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute

supplemental reserve) for sale to the Southwest Power Pool, Inc. (SPP) and to others that are self-supplying ancillary services to SPP.

g. Ancillary Services – Third-Party Provider

Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, i.e., where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

III. RATES

All sales shall be made at rates established by agreement between Seller and Buyer.

IV. OTHER TERMS AND CONDITIONS

All other terms and conditions shall be established by agreement between Seller and Buyer.

V. EFFECTIVE DATE

This Tariff is effective on the date specified by the Commission.

VI. REVISIONS TO THE TARIFF

Seller may file revisions to this Tariff by notifying Buyer in writing and by

unilaterally making the appropriate filing with the Commission pursuant to the provisions of Section 205 of the Federal Power Act; provided, however, that such revision shall not affect the rates, terms and conditions of Transactions entered into prior to the date of such revision, unless otherwise agreed by the Parties.

VII. COMPLIANCE WITH THE COMMISSION REGULATIONS

Seller shall comply with the provisions of 18 CFR Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 CFR Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

VIII. LIMITATIONS AND EXEMPTIONS REGARDING MARKET-BASED RATE AUTHORITY

The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC 61,140 at 61,425 (2000), *on reh'g*, 95 FERC 61,309 (2001); *AmerGen VT, LLC*, 90 FERC 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC 61,270 (2000). The Commission also granted Seller the following waivers and blanket authorization: (a) waiver of Subparts B and C of Part 35 of the Commission's regulations requiring the filing of cost-of-service information, except for sections 35.12(a), 35.13(b), 35.15 and 35.16; (b) waiver of the accounting and other requirements Parts 41, 101 and 141, except sections 141.14 and 141.15, of the Commission's regulations; and (c) blanket approval as to Section 204 of the Federal Power Act and Part 34 of the Commission's regulations for all future issuances of securities and assumption of liabilities. *See Advantage Energy, Inc.*, Docket No. ER97-2758-000 (July 14, 1997) (unpublished letter order).

IX. SELLER CATEGORY

Seller is a Category 1 seller in the Southwest region, and a Category 2 seller in the Central, Northeast, Northwest, Southeast, and Southwest Power Pool rRegions ~~and a Category 1 seller in the Northwest and Southwest Regions,~~ as defined in 18 C.F.R. § 35.36(a).

20150430-5652 FERC PDF (Unofficial) 4/30/2015 4:30:12 PM

CONSTELLATION NEWENERGY, INC.

FERC ELECTRIC TARIFF NO. 1

1. Availability: Constellation NewEnergy, Inc. ("Constellation NewEnergy" or "Seller") makes electric energy and capacity available under this tariff to any purchaser for resale. Constellation NewEnergy also separately makes available for wholesale sales to purchasers with whom Constellation NewEnergy has contracted the following ancillary services:

(A) ~~Within the market administered by PJM Interconnection, L.L.C. ("PJM")~~: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, LLC ("PJM") and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

(B) ~~Within the markets administered by the Independent System Operator of~ New England ("ISO-NE"): Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO New England, Inc~~ISO-NE~~.

(C) ~~Within the markets administered by the~ New York ~~Independent System Operator ("NYISO")~~: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc~~NYISO~~.

(D) ~~Within the markets administered by the~ California ~~Independent System Operator ("CAISO")~~: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

(E) ~~Within the markets administered by the Midcontinent Independent System Operator ("MISO")~~: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Midcontinent Independent System Operator, Inc. (MISO) and to

others that are self-supplying ancillary services to MISO.

(F) ~~*Within the markets administered by the*~~ *Southwest Power Pool*: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Southwest Power Pool, Inc. (SPP) and to others that are self- supplying ancillary services to SPP.

(G) Ancillary Services – Third Party Provider

Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, i.e., where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

2. Applicability: This tariff is applicable to wholesale sales of each of the services listed in Paragraph 1 by Constellation NewEnergy not otherwise subject to a particular tariff of Constellation NewEnergy.

3. Rates: All sales shall be made at rates established by agreement between the purchaser and Constellation NewEnergy.

4. Other Terms and Conditions: All other terms and conditions shall be established by agreement between the purchaser and Constellation NewEnergy.

5. Compliance with Commission Regulations: Seller shall comply with the provisions of 18 CFR Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 CFR Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

6. Limitations and Exemptions Regarding Market-Based Rate Authority:

   - The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140 at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC ¶ 61,270 (2000).

   - Seller has requested and been granted (1) waiver of Subparts B and C of Part 35 of the Commission's regulations, except as to sections 35.12(a), 35.13(b), 35.15 and 35.16; (2) waiver of Parts 41,101 and 141, except sections 141.14 and 141.15, of the Commission's accounting and reporting regulations; and (3) blanket authorization for all future issuances of securities or assumptions of liabilities pursuant to Part 34 of the Commission's regulations. *See NEV, L.L.C.*, 81 FERC ¶ 61,186 (1997).

7. Effective Date: This tariff shall be effective on the date specified by the Federal Energy Regulatory Commission.

8. Seller Category: Seller is a Category 1 Seller in the ~~Northwest and~~ Southwest region~~s~~, and a Category 2 Seller in the Northeast, Northwest, Southeast, Central, and Southwest Power Pool regions, as ~~those categories are~~ defined in 18 C.F.R. § 35.36(a).

20150430-5652 FERC PDF (Unofficial) 4/30/2015 4:30:12 PM

Exelon Generation Company, LLC

Market-Based Rate Tariff

1. Availability and Character of Service

Exelon Generation Company, LLC ("Exelon Generation" or "Seller") may sell electric capacity and/or energy under this tariff in amounts, at levels of firmness or priorities of service, for periods of service, and under such other terms and conditions, all as established by agreement between Exelon Generation and the Customer under a transaction agreement hereunder.

2. Ancillary Services

PJM: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, L.L.C. ("PJM") and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

New York: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc.

New England: Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO New England, Inc.

California: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

MISO: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Midcontinent Independent System Operator, Inc. (MISO) and to others that are self-supplying ancillary services to MISO.

Southwest Power Pool: Seller offers regulation service and operating reserve service (which include 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Southwest Power Pool, Inc. (SPP) and to others that are self- supplying ancillary services to SPP.

3. Ancillary Services - Third Party Provider

Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, i.e., where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

4. Rates

All rates for sales under this rate schedule shall be established by agreement between Exelon Generation and Customer.

5. General Terms and Conditions:

A. Acceptance of service hereunder by a Customer shall bind Customer to the provisions of this tariff and to the terms of a transaction agreement between or among the parties.

B. The rights of Exelon Generation and a customer to seek changes to the rates or other terms and conditions of service initially agreed upon between them shall be governed by parties' transaction agreement.

C. Compliance with Commission Regulations: Seller shall comply with the provisions of 18 C.F.R. Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 C.F.R. Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

D. Limitations and Exemptions Regarding Market-Based Rate Authority: The Commission has granted waiver of its code of conduct and affiliate sales

restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140 at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC ¶ 61,270 (2000). The Commission also granted Seller the following waivers and blanket authorization: (a) waiver of Subparts B and C of Part 35 of the Commission's regulations requiring the filing of cost-of-service information, except for sections 35.12(a), 35.13(b), 35.15 and 35.16; (b) waiver of the accounting and other requirements Parts 41, 101 and 141, except sections 141.14 and 141.15, of the Commission's regulations; and (c) blanket approval as to Section 204 of the Federal Power Act and Part 34 of the Commission's regulations for all future issuances of securities and assumption of liabilities. *See Exelon Generation Co., LLC*, 93 FERC ¶ 61,140, at 61,427 (2000); *Exelon Generation Co., LLC*, Docket No. ER01-2794-000 (Oct. 3, 2001) (unreported) (accepting Tariff No. 2 under Exelon Generation's market based rate authority).

E. Seller Category: Seller is a Category 1 Seller in the Southwest region, and a Category 2 Seller in the Central, Northeast, Northwest, Southeast, and Southwest Power Pool regions~~, and a Category 1 Seller in the Southwest and Northwest regions~~, as defined in 18 C.F.R. § 35.36(a).

FERC Electric Tariff, Volume No. 1

Market Based Rate Tariff

I. Availability

Seller makes electric energy, capacity, and ancillary services available under this tariff to any purchaser with whom Seller has contracted, except as prohibited below.

II. Rates

All sales shall be made at rates established by agreement between the purchaser and Seller.

III. Other Terms and Conditions

All other terms and conditions of sale shall be established by agreement between the purchaser and Seller.

IV. Seller Category

Seller is a Category 1 Seller in the ~~Northwest and~~ Central, Northeast, Southeast, Southwest, and Southwest Power Pool ~~Southwest~~ , ~~-~~regions and a Category 2 Seller in the Northwest region ~~all other regions~~, as ~~those Categories are~~ defined in 18 C.F.R. § 35.36(a).

V. Compliance with Commission Regulations

Seller shall comply with the provisions of 18 C.F.R. Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning seller's market-based rate authority, including orders in which the Commission authorizes seller to engage in affiliate sales under this tariff or otherwise restricts or limits the seller's market-based rate authority. Failure to comply with the applicable provisions of 18 C.F.R. Part 35, Subpart H, and with any orders of the Commission concerning seller's market-based rate authority, will constitute a violation of this tariff.

VI. Limitations and Exemptions Regarding Market-Based Rate Authority

In *High Mesa Energy, LLC*, ER12-2528-000 (2012):

- The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140, at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307, at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC ¶ 61,270 (2000).

- Seller has received (1) waiver of Subparts B and C of Part 35, except for sections 35.12(a), 35.13(b), 35.15 and 35.16; (2) waiver of Parts 41, 101 and 141 except sections 141.14 and 141.15; and (3) blanket authorization for all future issuances of securities or assumptions of liabilities pursuant to Part 34 of the Commission's regulations.

VII. Ancillary Services

(A) ~~Within the market administered by PJM Interconnection, LLC ("PJM")~~: Seller offers regulation and frequency response service, energy imbalance service, and operating reserve service (which includes spinning, 10-minute, and 30-minute reserves) for sale into the market administered by PJM Interconnection, L.L.C. ("PJM")~~,~~ and, where the PJM Open Access Transmission Tariff permits, the self-supply of these services to purchasers for a bilateral sale that is used to satisfy the ancillary services requirements of the PJM Office of Interconnection.

(B) ~~Within the markets administered by the Independent System Operator of~ New England ("ISO NE")~~: Seller offers regulation and frequency response service (automatic generator control), operating reserve service (which includes 10-minute spinning reserve, 10-minute non-spinning reserve, and 30-minute operating reserve service) to purchasers within the markets administered by the ISO -New England, Inc.

(C) ~~Within the markets administered by the~ New York Independent System Operator ("NYISO")~~: Seller offers regulation and frequency response service, and operating reserve service (which include 10-minute non-synchronous, 30-minute operating reserves, 10-minute spinning reserves, and 10-minute non-spinning reserves) for sale to purchasers in the market administered by the New York Independent System Operator, Inc.

(D) ~~Within the markets administered by the~ California Independent System Operator ("CAISO")~~: Seller offers regulation service, spinning reserve service, and non-spinning reserve service to the California Independent System Operator Corporation ("CAISO") and to others that are self-supplying ancillary services to the CAISO.

(E) ~~Within the markets administered by the Midcontinent System Operator ("MISO")~~: Seller offers regulation service and operating reserve service (including 10-minute spinning reserve and 10-minute supplemental reserve) for sale to the Midcontinent Independent System Operator, Inc. (MISO) and to others that are self-supplying ancillary services to MISO.

(F) Ancillary Services – Third Party Provider

Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, i.e., where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales

to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

VIII. Effective Date

This Rate Schedule shall be effective as of the date specified by the Federal Energy Regulatory Commission.

20150430-5652 FERC PDF (Unofficial) 4/30/2015 4:30:12 PM

TUANA SPRINGS ENERGY, LLC
FERC ELECTRIC TARIFF

1. Availability: Tuana Springs Energy, LLC ("Tuana Springs" or "Seller") makes electric energy, capacity, and ancillary services available under this Tariff to any purchaser for resale, except as prohibited below.

   Ancillary Services - Third Party Provider

   Third-party ancillary services: Seller offers Regulation and Frequency Response Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating Reserve-Spinning, and Operating Reserve-Supplemental. Sales will not include the following: (1) sales to an RTO or an ISO, *i.e.*, where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation and Frequency Response Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

2. Applicability: This schedule is applicable to all wholesale sales of energy, capacity, and ancillary services by Seller not otherwise subject to a particular rate schedule of Seller.

3. Rates: All sales shall be made at rates established by agreement between the purchaser and Tuana Springs.

4. Other Terms and Conditions: All other terms and conditions shall be established by agreement between the purchaser and Tuana Springs.

5. Compliance with Commission Regulations: ~~Tuana Springs~~Seller shall comply with the provisions of 18 C.F.R. Part 35, Subpart H, as applicable, and with any conditions the Commission imposes in its orders concerning ~~Tuana Spring~~Seller~~s~~'s market-based rate authority, including orders in which the Commission authorizes ~~Tuana Springs~~Seller to engage in affiliate sales under this tariff or otherwise restricts or limits ~~Tuana Springs~~Seller's market-based rate authority. Failure to comply with the applicable provisions of 18 C.F.R. Part 35, Subpart H, and with any orders of the Commission concerning ~~Tuana Springs~~Seller's~~'~~ market-based rate authority, will constitute a violation of this tariff.

20150430-5652 FERC PDF (Unofficial) 4/30/2015 4:30:12 PM

6. Limitations and Exemptions Regarding Market-Based Rate Authority: The Commission granted Tuana Springs in Docket No. ER10-87-000 the following waivers and exemptions in connection with its market-based rate authority: (i) waiver of Subparts B and C of Part 35 regarding the filing of rate schedules, except Sections 35.12(a), 35.13(b), 35.15 and 35.16; (ii) waiver of the accounting and related reporting requirements under Part 41, Part 101 and Part 141, except sections 141.14 and 141.15, of the Commission's regulations; and (iii) blanket approval under Section 204 of the Federal Power Act, 16 U.S.C. § 824c, and Part 34 of the Commission's regulations for all future issuances of securities and debt and assumptions and liabilities.

   The Commission has granted waiver of its code of conduct and affiliate sales restrictions for transactions between Seller and its franchised public utility affiliates. *See Exelon Generation Co.*, 93 FERC ¶ 61,140 at 61,425 (2000), *on reh'g*, 95 FERC ¶ 61,309 (2001); *AmerGen VT, LLC*, 90 FERC ¶ 61,307 at 61,995, *on reh'g*, *Baltimore Gas & Elec. Co.*, 91 FERC ¶ 61,270 (2000).

7. Seller Category: Tuana Springs is a Category 1 Seller in the Central, Northeast, Southeast, Southwest, and Southwest Power Pool ~~Northwest and Southwest~~ regions, and a Category 2 Seller in the Northwest~~Northeast, Southeast, Central, and Southwest Power Pool regions~~ region, as defined in 18 C.F.R. § 35.36(a).

8. Effective Date: This Tariff shall be effective on and after the date on which the Commission permits it to become effective.

Notice of Change in Status of the Exelon MBR Entities

Dear Secretary Bose:

Pursuant to the requirements of section 35.42 of the regulations of the Federal Energy Regulatory Commission ("FERC" or "Commission"),[1] the above-captioned affiliates of Exelon Corporation ("Exelon") with market-based rate authority (the "Exelon MBR Entities") and 2014 ESA Project Company, LLC[2] submit this notice of change in status to inform the Commission of certain new affiliations with entities that own or will own generation facilities.[3]

On June 26, 2015, 2015 ESA Project Company, LLC ("Bloom PPA V") filed in Docket No. ER15-2009-000 an application seeking acceptance of a market-based rate tariff for the sale of energy, capacity, and ancillary services. Bloom PPA V is developing and will own and operate Bloom Energy Servers, which are small distributed-energy generation facilities that convert methane into electricity using direct electrochemical reaction rather than combustion. The Bloom Energy Servers are installed behind-the-meter and are used to provide energy services to third-party industrial and commercial customers. Bloom PPA V is developing Bloom Energy Servers in California (approximately 28.6 MW), Connecticut (approximately 2 MW), New Jersey (approximately 4.75 MW), and New York (approximately 4.6 MW). All of output of these Bloom Energy Servers is (or will be upon deployment of the facilities) fully committed pursuant long-term contracts with customers that will take service under retail or applicable state net-metering programs. Exelon Generation Company, LLC ("Exelon Generation") owns certain non-managing interests in Bloom PPA V. Specifically, Bloom PPA V is wholly owned by 2015 ESA Holdco, LLC ("2015 Holdco"). 2015 ESA InvestoCo, LLC owns 100% of the non-managing Class B interests in 2015 Holdco; a wholly owned subsidiary of Bloom Energy Corporation ("Bloom") owns 100% of the Class A managing interests. 2015 ESA InvestoCo, LLC is wholly owned by Exelon Generation.

On July 28, 2015, Fair Wind Power Partners, LLC ("Fair Wind"), an indirect wholly owned subsidiary of Exelon, filed with the Commission an application for market-based rate authority in Docket No. ER15-2293-000. Fair Wind is a wholly owned subsidiary of Exelon

---

[1] 18 C.F.R. § 35.42 (2015).

[2] 2014 ESA Project Company, LLC is included out of an abundance of caution as a result of Exelon Generation Company, LLC's indirect, non-managing equity interests in that entity.

[3] The Exelon MBR Entities have attached an updated asset appendix in the format set forth in Appendix B to 18 C.F.R. Part 35, Subpart H that reflects the new affiliations.

Wind, LLC ("Exelon Wind"). Exelon Wind is a wholly owned subsidiary of Exelon Generation Acquisitions, LLC, which is a wholly owned subsidiary of Exelon Generation. Fair Wind is developing and will own and operate an approximately 30 MW (nameplate) wind-powered electric generation facility located in Garrett County, Maryland and interconnected to the transmission system owned by The Potomac Edison Company and operated by the PJM Interconnection, L.L.C. ("PJM"). Fair Wind will sell all of its output into PJM's market. It is currently anticipated that Fair Wind will begin sale of test power in October 2015 and will begin commercial operations in November 2015. Fair Wind will file a notice of exempt wholesale generator EWG status under the Public Utility Holding Company Act of 2005 ("PUHCA") prior to the commencement of commercial operations.

On July 29, 2015, Constellation Solar Maryland MC, LLC ("CSMMC") began the operation of a 0.25 MW (net) solar-powered generation facility located in Millersville, Maryland. The facility is a qualifying facility ("QF") under the Public Utility Regulatory Policies Act of 1978 and is interconnected to the transmission system owned by Baltimore Gas and Electric Company and operated by PJM.[4]

The affiliations reported herein do not raise any horizontal or vertical market power concerns. Each of Bloom PPA V, Fair Wind, and CSMMC will own only *de minimis* amounts of generation in each relevant market, which will have no material impact on the ability of any of the Exelon MBR Entities to exercise horizontal market power. In addition, Bloom PPA V's and Fair Wind's respective applications for market-based rate authority demonstrate that they pass the pivotal supplier and market share screens in the relevant markets. Therefore, the affiliations reported herein do not raise any horizontal market power concerns.[5] With respect to vertical market power, none of Bloom PPA V, Fair Wind, or

---

[4] *See* the notice of self-certification of QF status filed on July 29, 2015 in Docket No. QF15-938-000. CSMMC is developing and will own additional solar QFs, for which CSMMC will submit the necessary notice of self-certification.

[5] Certain of the Exelon MBR Entities recently increased their generation capacity in PJM, but those additions do not result in a net increase of 100 MW since the last time the Commission reviewed Exelon's market power analysis for the PJM market and its submarkets. Exelon Generation owns 50% of the Peach Bottom 2 nuclear generating facility. In May 2015, Peach Bottom 2 completed an approximately 100 MW uprate, which resulted in approximately 50 MW of additional generation capacity affiliated with Exelon. In addition, Constellation Power Source Generation, LLC owns the new Perryman 6 unit, an approximately 110 MW gas-fired generating unit that commenced commercial operations on June 28, 2015. On August 5, 2014, the Commission accepted the Exelon MBR Entities' updated market power analysis for the Northeast region ("Northeast Triennial"). *See AV Solar Ranch 1, LLC*, 148 ¶ 61,102 (2014); *see also Fourmile Wind Energy, LLC*, 148 FERC ¶ 61,104 (2014). Since the Commission's acceptance of the Northeast Triennial, Exelon, through its subsidiaries, completed the following transactions, resulting in the sale of Exelon's indirect interests in approximately 1,556 MW of generation capacity in PJM and its submarkets: (1) Exelon sold its indirect 66% ownership interest in Safe Harbor Water Power Corp., which owns and operates a 417.5 MW hydroelectric generation facility located within the 5004/5005 and AP South submarkets of PJM (s*ee Constellation Power Source Generation, LLC*, 148 FERC ¶ 62,043 (2014)); (2) Exelon sold its indirect 25% ownership interest in Inter-Power/AhlCon Partners, L.P., which owns and operates the approximately 110 MW Colver generating facility (*see* Notice of Self-Recertification filed on January 12, 2015 in Docket No. QF87-632-011); and (3) Exelon sold its indirect undivided ownership interests in the Conemaugh Electric Generation Station (corresponding to approximately 535 MW) and the Keystone Electric Generating Station (corresponding to approximately 718 MW) (*see Constellation Power Source Generation, LLC*, 149 FERC ¶ 62,214 (2014). The net result of these transactions is that, even after taking into account the uprate of Peach Bottom 2, the completion of Perryman 6, and the new affiliations

20150730-5270 FERC PDF (Unofficial) 7/30/2015 1:08:10 PM

CSMMC owns or controls any transmission facilities, except for limited interconnection facilities required to connect individual generating facilities to the transmission grid, or any inputs to electric power production, as defined in section 35.36 of the Commission's regulations.[6] Therefore the affiliations reported herein do not raise any vertical market power concerns.

For the reasons set forth above, the Exelon MBR Entities' affiliations with Bloom PPA V, Fair Wind, and CSMMC do not materially change the facts and circumstances that the Commission relied upon in granting the Exelon MBR Entities market-based rate authority. Nor do the new affiliations raise any horizontal or vertical market power concerns with respect to the Exelon MBR Entities. Therefore, the Exelon MBR Entities respectfully request that the Commission accept for filing this notice of change in status and find that no further inquiry is necessary.

Respectfully submitted,

/s/ Vincenzo Franco

Enclosures

described herein, the Exelon MBR Entities' uncommitted capacity in PJM or any of the PJM submarkets is less than was attributed to them in the Northeast Triennial.

[6] 18 C.F.R. § 35.36(a)(4) defines "[i]nputs to electric power production" as "intrastate natural gas transportation, intrastate natural gas storage or distribution facilities; sites for generation capacity development; physical coal supply sources and ownership of or control over who may access transportation of coal supplies."

SI-SSA-0010-1800

Notice of Change in Status of the Exelon MBR Entities

Dear Secretary Bose:

Pursuant to the requirements of section 35.42 of the regulations of the Federal Energy Regulatory Commission (FERC or Commission),[1] the above-captioned affiliates of Exelon Corporation (Exelon) with market-based rate authority (collectively, the Exelon MBR Entities) respectfully submit for filing this notice of change in status (Notice) to reflect the March 23, 2016 consummation of a transaction whereby Exelon purchased the outstanding stock of Pepco Holdings, Inc. (PHI) and merged PHI into a wholly-owned subsidiary of Exelon (the Transaction).[2] As a result of the Transaction, the following entities with market-based rate authority are now affiliates of Exelon and the other above-captioned Exelon MBR Entities: Atlantic City Electric Company (ACE), Bethlehem Renewable Energy, LLC (Bethlehem Renewable), Delmarva Power & Light Company (DPL), Eastern Landfill Gas, LLC (Eastern Landfill), Fauquier Landfill Gas, LLC (Fauquier), Pepco Energy Services, Inc. (PES), Potomac Electric Power Company (Pepco) and Potomac Power Resources, LLC (PPR) (collectively, the PHI MBR Entities).[3] The new affiliation does not present any competitive concerns in the PJM Interconnection, L.L.C. (PJM) balancing authority area (BAA) and its submarkets, which are the

1 18 C.F.R. § 35.42 (2016).

2 *See Exelon Corporation and Pepco Holdings, Inc.*, 149 FERC ¶ 61,148 (2014) (approving the Transaction); *See also* Notice of Consummation, Docket No. EC14-96-000 (filed Mar. 28, 2016).

3 On April 20, 2016, Fauquier and PPR both filed notices to cancel their market-based rate tariffs, effective April 21, 2016 (one day before submission of this filing) in Docket Nos. ER16-1471-000 and ER16-1470-000, respectively. The notices are currently pending before the Commission.

relevant markets for this Notice, and does not materially alter the facts upon which the Commission relied in granting market-based rate authority to the Exelon MBR Entities. Although some market share screens exceed 20% in two submarkets of PJM, the Exelon MBR Entities continue to satisfy the Commission's requirements for market-based rates regarding horizontal market power.

I. REQUEST FOR PRIVILEGED TREATMENT

The Exelon MBR Entities request privileged treatment pursuant to Section 388.112 of the Commission's regulations for the Exelon MBR Entities' hourly load data, which is accessible via links to the work papers of Julie Solomon contained in the market screens submitted as part of Attachment A. The work papers contain information about confidential, commercially sensitive load data that could harm the Exelon MBR Entities if publicly released. Pursuant to Section 35.37(f) of the Commission's regulations, a proposed protective order is included herewith as Attachment B. Communications concerning this request for privileged treatment should be directed to Jane Rueger at 202-626-6534 or Harold Bulger at 202-637-6182.

II. DOCUMENTS SUBMITTED

The Exelon MBR Entities submit the following documents:

1. This transmittal letter;

2. Attachment A: Affidavit of Julie R. Solomon, Managing Director of Navigant Consulting, Inc. including exhibits and work papers;

3. Attachment B: Proposed protective order; and

4. Attachment C: Asset appendices of Exelon Corporation and affiliates in workable file format.

III. COMMUNICATIONS

Communications concerning this filing should be directed to the individuals listed below:

*The persons denoted with an asterisk are designated for service pursuant to 18 C.F.R. § 385.2010.

IV. DESCRIPTION OF CHANGE IN STATUS

Exelon is a publicly traded company headquartered in Chicago, Illinois and has operations and business activities in 48 states, the District of Columbia, and Canada. Exelon Generation Company, LLC (Exelon Generation) is a direct wholly-owned subsidiary of Exelon that owns, directly or through its subsidiaries, electric generation facilities in PJM and the PJM submarkets, as well as in markets first-tier to PJM.[4] In addition, Exelon Generation has certain long-term power purchase agreements (PPAs) pursuant to which it purchase power generated from electric facilities located in PJM and its submarkets as well as in markets first-tier to PJM.[5] In PJM, Exelon also owns indirectly Commonwealth Edison Company (ComEd), PECO Energy Company (PECO), and Baltimore Gas and Electric Company (BGE). ComEd, PECO, and BGE are franchised public utilities within the meaning of 18 C.F.R. § 35.36(a)(5) and own electric distribution systems through which they deliver electricity to approximately 6.6 million customers in Illinois, Pennsylvania, and Maryland. ComEd, PECO, and BGE own transmission facilities, but have transferred operational control over such facilities to PJM, which provides transmission service pursuant to its Open Access Transmission Tariff (OATT) on file with the Commission.[6] In addition, PECO and BGE own certain intrastate natural gas transportation and distribution facilities used distribute natural gas to customers in Philadelphia and central Maryland and operate liquefied natural gas facilities and propane-air facilities associated with their respective distribution activities that do not offer services to third parties.[7] Affiliates of Exelon own or control sites for the development of new generation capacity that are in the interconnection process in PJM as well as in other markets. In Order No. 816 the Commission eliminated the requirement to file land acquisition reports and revised section 35.37 of its

[4] The electric generation facilities owned by Exelon Generation and its subsidiaries are identified in the asset appendix provided in Attachment C.

[5] The PPAs that are relevant for the market power analysis as a result of the refinements to the Commission's market-based rate program adopted in Order No. 816 are identified in the asset appendix provided in Attachment C.

[6] The electric transmission facilities owned by ComEd, PECO, and BGE are identified in the asset appendix in Attachment C.

[7] The intrastate natural gas facilities owned by PECO and BGE are identified in the asset appendix in Attachment C.

regulations to remove the requirement that sellers provide information regarding sites for generation capacity development to demonstrate lack of vertical market power.[8]

As a result of the Transaction, the PHI MBR Entities are now indirect wholly-owned subsidiaries of Exelon.[9] ACE, DPL, and Pepco are now direct wholly-owned subsidiaries of Pepco Holdings LLC, which is a direct wholly-owned subsidiary of PH Holdco LLC. PH Holdco LLC is a direct wholly-owned subsidiary of Exelon Energy Delivery Company, LLC, which is a direct wholly-owned subsidiary of Exelon. ACE, DPL, and Pepco are state-regulated franchised public utilities and together provide transmission and distribution services to retail customers in the Mid-Atlantic Region. All of ACE, DPL, and Pepco's retail customers have access to competitively priced retail power and, as a result, are not considered captive for the purposes of the Commission's market-based rate regulations.[10] ACE, DPL, and Pepco have been granted authority to sell energy, capacity, and ancillary services at market-based rates by the Commission.[11]

ACE, DPL, and Pepco do not own any electric generation facilities, except for limited behind-the-meter facilities located at substation sites.[12] ACE and DPL have long-term power purchase agreements that, as a result of the refinements to the Commission's market-based rate program adopted in Order No. 816,[13] are now included in the asset appendix and in the market power analysis. ACE has long-term power purchase agreements with Logan Generating Company, L.P., Chambers Cogeneration, Limited Partnership, and Covanta Delaware Valley, L.P., each of which owns a qualifying facility under the Public Utility Regulatory Policies Act of 1978 located in the PJM East submarket. These contracts obligate ACE to pay the generators for specified amounts of energy at a specified price, and the costs are recovered from ACE's retail customers. ACE bids the energy into the PJM market and credits retail customers for all energy revenues received by ACE from PJM. ACE does not control those generating units and cannot withhold the output of the units from the market. DPL has long-term power purchase agreements with Armenia Mountain Wind, LLC, Roth Rock Wind Farm, LLC, and Chestnut

---

8 *See* Order No. 816 at P 212. The Commission however retained the right to request additional information about land acquisitions. *Id.* at P 210.

9 The Exelon MBR Entities anticipate filing proposed tariff revisions in the next week, as necessitated by consummation of the Transaction and to comply with recent Commission orders on market-based rate tariff filings.

10 *See Potomac Elec. Power Co.*, *et al.*, 93 FERC ¶ 61,240 at 61,781-82 (2000) (granting waiver of the code of conduct requirement, in part, on the basis that Pepco's customers have retail choice and are not captive); *see also Pepco Holdings, Inc*., 141 FERC ¶ 61,034 (2012) (granting waiver of affiliate restrictions, in part, on the basis that ACE, DPL, and Pepco do not have captive customers).

11 *Atlantic City Elec. Co.*, *et al.*, Docket Nos. ER10-2997-003, *et al*, (Jun. 20, 2014) (unpublished letter order) (renewing the market-based rate authority of the PHI MBR Entities).

12 Consistent with Order No. 816, these behind-the-meter facilities have not been included in the indicative screens or asset appendix herewith. *See* Order No. 816 at P 255 (2015) ("[W]e clarify that qualifying facilities that are exempt from [Federal Power Act] section 205 and facilities that are behind-the-meter facilities do not need to be reported in the asset appendix or indicative screens.").

13 *Refinements to Policies and Procedures for Market-Based Rates for Wholesale Sales of Electric Energy, Capacity and Ancillary Services by Public Utilities*, 153 FERC ¶ 61,065 (2015) (Order No. 816).

Flats, LLC, each of which owns a wind-power electric generation facility located in PJM. Each of these agreements is fixed-price, must-run contract, and DPL has no ability to withhold this generation.

PES is now a direct wholly-owned subsidiary of Constellation NewEnergy, Inc., which is owned by Constellation Energy Resources, LLC (Constellation Energy Resources). Constellation Energy Resources is owned by Exelon Generation, which is a direct wholly-owned subsidiary of Exelon. Bethlehem Renewable and Eastern Landfill are now direct wholly-owned subsidiaries of Exelon Generation. PES, Bethlehem Renewable and Eastern Landfill each have been granted market-based rate authority by the Commission.[14]

PES is primarily engaged in providing energy services, including investment-grade energy audits and installation of energy conservation measures for federal, state and local governments, specialized construction work for electric utilities, and the delivery of thermal energy under long-term contracts. PES does not own any electrical generation facilities, except for certain limited behind-the-meter generation facilities.[15] Bethlehem Renewable owns a 4.7 MW landfill gas-fired facility located in Bethlehem, Pennsylvania and interconnected with the transmission system of PPL Electric Utilities Corporation in the 5004/5005 PJM submarket. Bethlehem Renewable is an exempt wholesale generator (EWG) within the meaning of the Public Utility Holding Company Act of 2005.[16] Eastern Landfill owns a 3 MW landfill gas-fired facility located in Baltimore County, Maryland and interconnected with the transmission system of Baltimore Gas and Electric Company in the 5004/5005 PJM submarket. Eastern Landfill is an EWG.[17]

Other than the generation facilities described above, PES and its subsidiaries do not own, operate, or have reportable long-term firm purchases from any other generating capacity in the Northeast Region or in any other region.

V. ANALYSIS OF CHANGE IN STATUS

The change in status reported herein does not raise any horizontal market power concerns. Likewise, the Exelon MBR Entities continue to satisfy the Commission's requirements with respect to transmission market power and the ability to erect barriers to entry. Therefore, the Exelon MBR Entities respectfully request that the Commission accept this notice of change in status.

---

[14] *See id.*; *see also supra* n. 3 regarding the recent notices of cancellation of the market-based rate tariffs of PPR and Fauquier, which are now also indirect wholly-owned subsidiaries of Exelon but no longer own any operational generating facilities as explained in the notices of cancellation.

[15] Consistent with Order No. 816, these behind-the-meter facilities owned by PES have not been included in the indicative screens or asset appendix herewith. *See* Order No. 816 at P 255 (2015).

[16] *Bethlehem Renewable Energy, LLC*, *et al.*, Notice of Effectiveness of Exempt Wholesale Generator or Foreign Utility Company Status, Docket Nos. EG07-53-000, et al. (Sept. 12, 2007) (unpublished letter order).

[17] *Eastern Landfill Gas, LLC*, 112 FERC ¶ 62,065 (2005).

a. Horizontal Market Power Analysis

As demonstrated below and in the Affidavit of Julie Solomon attached hereto as Attachment A (Solomon Affidavit), the Exelon MBR Entities continue to satisfy the Commission's requirements for showing a lack of horizontal market power. Ms. Solomon conducted her analyses consistent with Order No. 697, Order No. 816 and related orders, performing the two indicative horizontal market power screens required by the Commission, namely the pivotal supplier screen (PSS) and the market share screen (MSS). The relevant geographic markets for purposes of this change in status notice are the PJM BAA and three submarkets within the PJM BAA, the PJM East, AP South, and 5004/5005 submarkets. Ms. Solomon's analysis is based on the study period of December 2014-November 2015, the most recent available actual historical data. Consistent with Order No. 816, Ms. Solomon attributes to the Exelon MBR Entities the generation owned by the Exelon MBR Entities and their affiliates in each of the relevant markets and submarkets, adjusted for long-term firm purchases and sales, as well as a pro rata share of imports from affiliated uncommitted capacity in relevant first-tier markets.[18] As permitted by the Commission in Order No. 816, however, Ms. Solomon has not included qualifying facilities that are exempt from Section 205 of the Federal Power Act or behind-the-meter facilities in the generation attributed to the Exelon MBR Entities.[19]

As demonstrated in the Solomon Affidavit, the Exelon MBR Entities pass the PSS in PJM and all relevant submarkets because the Exelon MBR Entities' net uncommitted capacity is less than each market's net uncommitted supply. The following table summarizes the results of the PSS.

Relevant Market	Exelon MBR Entities Uncommitted Capacity	Net Uncommitted Supply	Result
PJM	6,215 MW	45,884 MW	Pass[20]
AP South	3,635 MW	18,207 MW	Pass[21]
5004/5005	3,591 MW	11,732 MW	Pass[22]
PJM East	4,314 MW	8,403 MW	Pass[23]

The Exelon MBR Entities pass the MSS in PJM and in the AP South submarket, because their market share is below the 20% threshold in each season. The Exelon MBR Entities do not pass the MSS in one season of the 5004/5005 submarket (Spring), or in the PJM East submarket, because the Exelon MBR Entities' market share exceeds the 20% threshold in these submarkets. The following table summarizes the results of the MSS.

---

[18] Attachment A, Solomon Aff. at 4-9.

[19] *See* Order No. 816 at P 255. Likewise, consistent with Order No. 816, these assets are not included in the Exelon MBR Entities' asset appendix.

[20] Attachment A, Exhibit JRS-4.

[21] *Id.* at JRS-6.

[22] *Id.* at JRS-8.

[23] *Id.* at JRS-10.

Relevant Market	Winter	Spring	Summer	Fall	Result
PJM	10.6%	10.9%	9.0%	9.7%	Pass[24]
AP South	14.3%	14.8%	11.7%	11.2%	Pass[25]
5004/5005	19.1%	21.3%	16.4%	15.8%	Fail[26]
PJM East	26.7%	30.2%	28.6%	23.0%	Fail[27]

Although the Exelon MBR Entities do not pass the MSS in the 5004/5005 and PJM East submarkets, as Ms. Solomon explains in Attachment A, PJM and each of the relevant submarkets are subject to extensive Commission-approved market monitoring and mitigation, and the Commission previously has found that such market monitoring and mitigation generally results in transparent pricing and mitigates any attempts to exercise market power.[28] For example, the Commission recently found that market-based rate sellers with MSS for PJM or its submarkets in excess of 20% continue to satisfy the Commission's requirements for market-based rates regarding horizontal market power.[29] Also, Ms. Solomon notes the Exelon MBR Entities are subject to certain additional behavioral commitments in PJM, entered into via a Settlement Agreement with the PJM Market Monitor at the time of the merger between Exelon and Constellation Energy Group, Inc. that mitigates any horizontal market power.[30] Further, Exelon's hedging strategy also reduces its ability or incentive to exercise market power; as of the end of 2015, expected generation was more than 90% hedged for 2016 and more than 60% hedged for 2017.[31] Finally, Ms. Solomon's market share analysis is extremely conservative, which means the Exelon MBR Entities' market share is overstated in PJM and the relevant submarkets.[32]

[27] *Id.* at JRS-11.

[28] Attachment A, Solomon Aff. at 3 (citing Order No. 697 at PP 241-242). *Market-Based Rates for Wholesale Sales of Electric Energy, Capacity and Ancillary Services by Public Utilities*, Order No. 697, FERC Stats. & Regs. ¶ 31,252 at PP 241-242), *clarified*, 121 FERC ¶ 61,260 (2007), *order on reh'g*, Order No. 697-A, FERC Stats. & Regs. ¶ 31, 268 (2008), *clarified*, 124 FERC ¶ 61,055 (2008), *order on reh'g*, Order No. 697-B, FERC Stats. & Regs. ¶ 31,285 (2008), *order on reh'g*, Order No. 697-C, FERC Stats. & Regs. ¶ 31,291 (2009), *order on reh'g*, Order No. 697-D, FERC Stats. & Regs. ¶ 31,305 (2010), *clarified*, 131 FERC ¶ 61,021 (2010), *aff'd sub nom. Montana Consumer Council v. FERC*, 659 F.3d 910 (9th Cir. 2011) (Order No. 697).

[29] *See NRG Power Marketing LLC*, 150 FERC ¶ 61,011 (2015) (accepting for filing notice of change in status with MSS for PJM ranging from 21.2% to 25.8%); *See also Lower Mount Bethel Energy, LLC*, ER10-1959-004, Letter Order (Dec. 21, 2015) (accepting for filing notice of change in status with MSS for the AP South submarket ranging from 25.5% to 36.8% and MSS for the 5004/5005 submarket ranging from 31.6% to 45.9%).

[30] Attachment A, Solomon Aff. at 3.

[31] *Id.*

[32] *Id.* at 8-9. Ms. Solomon explains that her Total Uncommitted Capacity determination in PJM and the relative submarkets is "extremely conservative" because her "analysis assumes that every MW of generation is

In sum, Ms. Solomon concludes that the Exelon MBR Entities do not have market power in any of the relevant markets in the Northeast Region. Therefore, the new affiliation of the Exelon MBR Entities with the PHI MBR Entities does not raise any horizontal market power concerns.

b. Vertical Market Power Analysis

The change in status does not raise any vertical market power concerns. PES, Bethlehem Renewable, and Eastern Landfill do not own, operate, or control transmission facilities other than the limited and discrete facilities necessary to connect their generating facilities to the grid. In addition, neither PES nor its subsidiaries control inputs to electric power production as defined in section 35.36 of the Commission's regulations. While ACE, DPL, and Pepco own transmission facilities, their transmission facilities are operated by PJM and service over these facilities is provided pursuant to PJM's OATT. The Commission has frequently held that membership in a Commission-approved regional transmission organization (RTO) sufficiently addresses vertical market power concerns in an RTO market such as PJM.[33] ACE, DPL, and Pepco do not own or control inputs to electric power production other than DPL's ownership of approximately 111 combined miles of intrastate natural gas transportation pipelines, 3,279 combined miles of intrastate natural gas distribution pipelines, and a 248 million cubic foot liquefied natural gas (LNG) storage facility, all located within the PJM footprint. The Commission has adopted a rebuttable presumption that sellers cannot erect barriers to entry based on ownership or control of, or affiliation with an entity that owns or controls such natural gas facilities.[34] Further, the Exelon MBR Entities and their affiliates affirmatively state that they have not erected barriers to entry into the relevant markets and will not erect barriers to entry into the relevant markets.[35] Thus, the new affiliations reported herein do not raise any vertical market power concerns.

VI. CONCLUSION

For the reasons set forth above, the Exelon MBR Entities' new affiliation reported herein does not materially change the facts and circumstances that the Commission relied upon in granting the Exelon MBR Entities market-based rate authority. Nor does the affiliation raise any horizontal or vertical market power concerns with respect to the Exelon MBR Entities. Therefore, the Exelon MBR Entities respectfully request that the Commission accept this Notice for filing. Submitted with this Notice are asset appendices in workable file format listing (1) all

---

'committed' to the extent there is load, even though in reality every MW of generation is not necessarily committed by ownership or contractual commitment to serving a specific load." As Ms. Solomon notes, some parties rely on short-term purchases from PJM and the relevant submarkets to meet load obligations and thus competing uncommitted capacity is conservatively low in her analysis.

[35] 18 CFR 35.37(e)(3) (2016).

Exelon affiliates that have market-based rate authority and identifying all generation assets the corporate family owns or from which there are long-term firm purchases by balancing authority area and geographic region,[36] and (2) all electric transmission and regulated natural gas intrastate pipelines and/or gas storage facilities the corporate family owns or controls.[37]

Respectfully submitted,

/s/ Jane E. Rueger
Jane E. Rueger
Harold W. Bulger, III

Counsel for the Exelon MBR Entities

[36] The Exelon asset appendices have been updated to comply with the new requirements of Order No. 816. Accordingly, there are additional contracts included in this generation asset appendix that were not previously included in pre-Order No. 816 versions of the Exelon generation asset appendix and some contracts that were included in pre-Order No. 816 versions of the Exelon generation asset appendix have been removed since such contracts are no longer reportable long-term purchases.

AFFIDAVIT OF
JULIE R. SOLOMON

I. INTRODUCTION

My name is Julie R. Solomon. I am a Managing Director of Navigant Consulting, Inc. My business address is 1200 19th Street, N.W., Suite 700, Washington, DC 20036. A large portion of my consulting activities involves electric utility industry restructuring and the transition from regulation to competition. I have been involved extensively in consulting on market power issues concerning mergers, other asset transactions and market-based rate applications. I have filed a number of affidavits before the Federal Energy Regulatory Commission (the "Commission") in connection with electric utility mergers, the purchase and sale of jurisdictional assets, applications for market-based rates, and triennial updates. Included among these, I have filed a number of affidavits with the Commission on behalf of relevant affiliates of Exelon Corporation ("Exelon") with market-based rate authority in connection with past triennial updates. My resume is attached as Exhibit JRS-1.

I have been asked by counsel for the above-captioned subsidiaries of Exelon with market-based rate authority (the "Exelon MBR Entities" or "Sellers") to perform an analysis of market power in compliance with the Commission's guidelines contained in Order No. 697[1] and Order No. 816[2] in connection with a notice of change in status arising from the merger of Exelon and

[2] *Refinements to Policies and Procedures for Market-Based Rates for Wholesale Sales of Electric Energy, Capacity and Ancillary Services by Public Utilities*, Order No. 816, 153 FERC ¶ 61,065 (2015).

Pepco Holdings, Inc. ("PHI").[3] Here I provide an evaluation of horizontal and vertical market power issues for PJM Interconnection, L.L.C. ("PJM") and relevant submarkets, where the Exelon MBR Entities own or control generation facilities, and are now affiliated with generation and transmission facilities that were previously owned or controlled by affiliates of PHI.

II. SUMMARY OF CONCLUSIONS

Based on the analyses discussed herein, I find that, under the Commission's guidelines, the Exelon MBR Entities satisfy the Commission's horizontal market power screens, or are subject to Commission-approved market monitoring and mitigation rules that are sufficient to address any market power concerns. The Exelon MBR Entities also do not have vertical market power in PJM.

Order No. 697 contemplates that Commission-approved market monitoring and mitigation in RTO markets or submarkets be considered as part of market power analysis.[4] Each of the relevant Northeast Region markets and submarkets is subject to extensive Commission-approved market monitoring and mitigation that generally results in transparent pricing and mitigates attempts to exercise market power.[5] Second, the Exelon MBR Entities are subject to additional behavioral commitments in PJM, entered into as part of the transaction between Exelon Corporation and Constellation Energy Group, Inc. (*see* Docket No. EC11-83-000) (the "Exelon-Constellation merger") that mitigate any horizontal market power.[6] Further, Exelon's hedging strategy limits exposure to risk but also reduces its ability or incentive to exercise market power. Exelon Generation Company, LLC ("Exelon Generation") maintains hedge percentage targets for its entire generation fleet, and as of the end of 2015 expected generation was more than 90 percent hedged for 2016 and more than 60 percent hedged for 2017.

---

3 *Exelon Corporation*, 149 FERC ¶ 61,148 (2014). The merger was consummated on March 23, 2016.

4 *See* Order No. 697 at PP 241-242.

5 Order No. 697 at P 241.

6 *See* Answer of Exelon Corporation and Constellation Energy Group, Inc., Docket No. EC11-83-000 (filed Oct. 11, 2011) ("Section 203 Amendment") (describing the behavioral commitments). A copy of the Section 203 Amendment was provided in Attachment A-2 to the Exelon MBR Entities' April 11, 2012 Change in Status Filing in the captioned dockets.

The analysis I have conducted is consistent with Order No. 697, Order No. 816 and related orders. I have performed the two indicative horizontal market power screens required by the Commission, namely a pivotal supplier analysis based on the annual peak demand of the relevant market ("Pivotal Supplier Analysis") and a market share analysis ("Market Share Analysis") applied on a seasonal basis for the relevant study period of December 2014-November 2015.

I understand that an affirmative statement on behalf of the Exelon MBR Entities and their affiliates is included in their submission to the effect that they have not erected barriers to entry and will not erect barriers to entry.

III. DESCRIPTION OF EXELON MBR ENTITIES

For purposes of my analysis, Exhibit JRS-2 details the generation owned or controlled by the Exelon MBR Entities in PJM, and also reflects generation owned or controlled in relevant first-tier markets. A more detailed description of the Exelon MBR Entities is provided in the submittal letter.

IV. HORIZONTAL MARKET POWER

In Order No. 697, the Commission codified a methodology for assessing market power to be used by applicants requesting market-based rate authority under Section 205 of the Federal Power Act or making their required triennial market power update filings. The Commission applies two screens – the Pivotal Supplier Analysis and the Market Share Analysis – intended to demonstrate a lack of horizontal market power. If an entity fails to pass either of the screens, there is a presumption of horizontal market power and further analysis is required.

In Order No. 697, the Commission defines the default relevant market as the Balancing Authority Area ("BAA") in which the applicant is physically located and markets directly interconnected to the seller's balancing authority area (first-tier balancing authority area markets). Where a generator is interconnected to a non-affiliate owned transmission system, the only relevant market is the BAA in which the generator is located.[7] Sellers located in, and members of, Regional Transmission Organizations ("RTOs") may use the geographic region under the control

[7] *Order No.697* at P 232 n.217.

of the RTO as the default relevant geographic market.[8] Sellers located in and a member of an RTO/ISO are not required to analyze first-tier markets to the RTO/ISO.

Pivotal Supplier Analysis

The Pivotal Supplier Analysis seeks to determine if load can be served without an applicant's generation. Order No. 697-A specifies a number of calculations for the Pivotal Supplier Analysis.[9]

First, Total Uncommitted Supply is calculated based on installed capacity (adjusted for long-term firm purchases and sales) plus imports less the reserve requirement (*i.e.*, operating reserves) less the average daily peak native load for the peak month.

Second, Wholesale Load is calculated based on the difference between the annual peak load (needle peak) and the average daily peak native load for the peak month.

Third, Net Uncommitted Supply is calculated based on the difference between Total Uncommitted Supply and Wholesale Load. Seller's Uncommitted Capacity is based on Seller's Total Uncommitted Capacity less its average daily peak native load.

If Seller's Uncommitted Capacity is less than the Net Uncommitted Supply, the Pivotal Supplier Analysis is passed.

Market Share Analysis

The Market Share Analysis evaluates, for each of the four seasons, whether the seller has a dominant position in the market, with dominance defined as a market share in excess of 20 percent.

Order No. 697 specifies a number of calculations for the market share screen.[10]

---

[8] *Id.* at P 235.

[9] *See* Order No. 697-A at Appendix A to Subpart H.

[10] *See id.*

First, Seller and Affiliate Capacity is calculated based on installed capacity (adjusted for long-term firm purchases and sales) plus imports less planned outages. Non-Affiliate Capacity is calculated in a similar manner.

Second, Capacity Deductions are calculated based on average peak native load in the season (averaged over all days)[11] plus operating reserves.

Third, Seller's Uncommitted Capacity is calculated by subtracting the Capacity Deductions attributed to Seller from Seller and Affiliate Capacity, and Total Competing Supply is calculated by subtracting the Capacity Deductions attributed to others from Non-Affiliate Capacity. Total Seasonal Uncommitted Capacity is the sum of Seller's Uncommitted Capacity and Total Competing Supply.

Finally, Seller's Market Share is calculated as Seller's Uncommitted Capacity as a percentage of Total Seasonal Uncommitted Capacity.

If Seller's Market Share is less than 20 percent in all seasons, the Market Share Analysis is passed.

Assumptions

Relevant Geographic Markets. My analysis is focused on PJM and submarkets (namely PJM East, 5004/5005, and AP South) as the only relevant geographic markets.

Study Period. My analysis is based on a December 2014-November 2015 study period, consistent with the instruction that "[t]ransmission-owning applicants…submitting a change in status filing, should rely on the most recent available actual historical data for each complete season of: winter (December – February), spring (March – May), summer (June – August) and fall (September – November)."[12]

---

[11] Consistent with the *Clarification Order* at P 12(a), I used the following seasons for my analysis: Winter (December-February), Spring (March-May), Summer (June-August) and Fall (September-November).

[12] Clarification Order, 121 FERC ¶ 61,260 at P 12(c) (2007).

Generating Capacity. For seasonal ratings relevant to the Exelon MBR Entities' generation, I rely on summer and winter ratings reported in the Energy Information Administration's "Annual Electric Generator Report," Form EIA-860.[13] For PJM installed capacity, I relied on data reported by Energy Velocity based on seasonal EIA-860 ratings.[14] For the PJM submarkets, I relied on the same installed capacity data, identifying generating units in the submarkets consistent with the submarket definitions outlined by PJM in its 2012 Simultaneous Import Limit ("SIL") Study.[15]

Operating Reserves. I calculated operating reserves for PJM and its relevant submarkets based on *PJM Manual 13 (Emergency Operations)*.[16] Day-ahead scheduling (operating) reserves in 2015 were based on 5.93 percent of the peak load forecast for the portion of PJM within the NERC Reliability*First* Corporation region. For the Dominion zone, the operating reserve requirement is based on Dominion's share of the Virginia-Carolinas ("VACAR") reserve sharing requirement.[17] I conservatively did not assign any operating reserves to the Exelon MBR Entities.

Load Data. I used hourly load data reported on the websites for the Northeast Region RTOs.

The PJM submarkets are defined based on the following transmission zones:

Transmission Zones		PJM East	5004/5005	AP South
AE	Atlantic City Electric Company	x	x	x
DP&L	Delmarva Power & Light	x	x	x
JCP&L	Jersey Central Power & Light Company	x	x	x
PE	PECO Energy Company	x	x	x
PSE&G	Public Service Electric & Gas Company	x	x	x
RECO	Rockland Electric Company	x	x	x
ME	Metropolitan Edison Company		x	x
PPL	PPL Electric Utilities		x	x

Transmission Zones		PJM East	5004/5005	AP South
BGE	Baltimore Gas & Electric		x	x
PEPCO	Potomac Electric Power Company		x	x
UGI	UGI Utilities, Inc.		x	x
VAP	Virginia Electric & Power (Dominion)			x

The Exelon MBR Entities provided me with data on the load they served in the relevant markets during the study period. This includes load directly supplied by Exelon Generation, including net physical sales to parties that primarily serve load,[18] as well as sales by Exelon Generation to retail affiliates of the Exelon MBR Entities in support of their load obligations.[19]

Other Load and Generation Commitments. I note that the Total Uncommitted Capacity determined in PJM and submarkets is extremely conservative, because no attempt has been made to match load commitments (and, correspondingly, generation commitments) attributable to individual parties, other than the Exelon MBR Entities, in these markets. Under the Market Share Analysis, for example, the amount of load attributable to "others" is simply the difference between the total average peak native load in the season and the amount attributable to the seller (in this case, the Exelon MBR Entities). The result is conservative in that it assumes all load in the market is met with specific generation committed to serving it via ownership or contractual commitment, which is not an accurate reflection of the facts in a market where some parties rely on short-term market purchases from PJM to meet load obligations. In other words, my analysis assumes that every MW of generation is "committed" to the extent there is load, even though in reality every MW of generation is not necessarily committed by ownership or contractual commitment to serving a specific load. Thus, the Total Competing (Uncommitted) Supply that is assumed to

---

[18] The Commission allows market-based rate sellers to consider their sales to load-serving entities on a short-term basis when computing their uncommitted capacity ("We will allow IPPs to deduct short term native load obligations if they can show that the power sold to the utility was used to meet native load." Order No. 697 at P 155). For purposes of my screen calculations, I considered only sales by the Exelon MBR Entities to load-serving entities that are subject to contracts for the sale of physical energy while simultaneously netting out purchases from the same load-serving entities.

[19] Sellers may deduct "long-term load following contracts to the extent that the seller has included in its total capacity a corresponding generating unit or long-term firm purchase contract that will be used to meet the obligation." Order No. 697 at P 154.

compete with Exelon MBR Entities' Uncommitted Capacity in my analysis is conservatively low, which means the Exelon MBR Entities' market share is overstated.

Planned Outages. I calculated average planned outages for each of the season based on the day-ahead planned outage forecast. For the submarkets, I estimated outages based on the submarket's share of generation relative to total RTO generation. For the Exelon MBR Entities, I estimated outages based on their share of generation relative to total generation in the relevant market or submarket.

SIL. I rely on the Commission's order approving SILs in the Northeast Region,[20] which covered an earlier (December 2011-November 2012) study period.

Allocating Imports. I allocated imports to the Exelon MBR Entities in a manner consistent with the Order No. 697-A Clarification Order, which states that "market-based rate sellers, after accounting for the firm transmission rights held by the sellers and their affiliates, may allocate simultaneous transmission import capability on a *pro rata* basis (*i.e.*, based on the relative shares of the market-based rate seller's (and its affiliates') and competing suppliers' uncommitted generation capacity in first-tier markets when performing the indicative screens."[21] Based on the Exelon MBR Entities' share of uncommitted capacity in markets first-tier to the relevant markets (or submarkets) being analyzed, I allocated a pro rata share of the SIL to them. The remainder of the SIL was assumed to be Non-Affiliate Capacity.

Results of Analysis

The detailed results of the Pivotal Supplier Analysis and Market Share Analysis are contained in Exhibits JRS-3 and JRS-4, respectively, consistent with the Appendix A screen format

---

20 *New Brunswick Energy Marketing Corporation*, Order On Simultaneous Transmission Import Limit Values For The Northeast Region, 147 FERC ¶ 61,190 (2014).

21 Order No. 697-A Clarification Order at Ordering Paragraph (A).

contained in Order No. 816.[22] The indicative screens also are being provided in a workable spreadsheet format, as is required under Order No. 816.[23]

As shown in Exhibit JRS-3, the Pivotal Supplier Analysis is passed in PJM (including submarkets). The Market Share Analysis is passed in PJM and the AP South submarket. However, the Exelon MBR Entities market share exceeds the 20 percent threshold for the Market Share Analysis in one season in the 5004/5005 submarket, and in the PJM East submarket. This result should not result in a determination that the Exelon MBR Entities have horizontal market power because any perceived generation market power in PJM or its submarkets is deemed to be adequately mitigated by existing Commission-approved market structure and market monitoring and mitigation. Order No. 697 contemplates that Commission-approved market monitoring and mitigation in RTO/ISO markets or submarkets be considered as part of market power analysis.[24] PJM is subject to extensive Commission-approved market monitoring and mitigation, and the Commission has previously found that the PJM market monitoring and mitigation rules are sufficient to address market power concerns in the PJM submarkets,[25] and the Commission re-affirmed this policy as recently as December 2015.[26] In addition, as I noted earlier, Exelon MBR Entities are subject to additional behavioral commitments in PJM that further mitigate any concerns regarding horizontal market power.[27]

PJM

Pivotal Supplier Analysis. The Exelon MBR Entities' Installed Capacity in PJM is 22,574 MW. They have 2,913 MW of long-term purchases and 854 MW of long-term sales. After taking into account their load commitments and imports attributed to them, Sellers' Uncommitted

---

22 *Order No. 816*, 153 FERC ¶ 61,065 (2015). The screen formats are provided electronically on the FERC website. http://www.ferc.gov/industries/electric/gen-info/mbr/OrderNo816/appendix-A.xls.

23 *Id*. at P 80.

24 Order No. 697, FERC Stats. & Regs. ¶ 31,252 at P 240-42, P 290. *See also*, Order No. 697-A, FERC Stats. & Regs. ¶ 31,268 at P 111 (adopting a rebuttable presumption that existing Commission-approved RTO/ISO market monitoring and mitigation is sufficient to address any market power concerns).

25 *NRG Power Marketing LLC*, 150 FERC ¶ 61,011 (2015).

26 *See Lower Mount Bethel Energy, LLC*, ER10-1959-004, Letter Order (Dec. 21, 2015).

27 *See* note 3.

Capacity is 6,215 MW. Net Uncommitted Supply is 45,884 MW. Because Sellers' Uncommitted Capacity is less than the Net Uncommitted Supply, the Pivotal Supplier Analysis is passed in PJM. *See* Exhibit JRS-4.

Market Share Analysis. The Exelon MBR Entities' Installed Capacity in PJM ranges from 22,574 MW to 23,261 MW. The Exelon MBR Entities have 2,913 MW to 3,161 MW of long-term purchases, 854 MW to 867 MW of long-term sales. After taking into account their load commitments and planned outages and imports attributed to them, Sellers' Uncommitted Capacity ranges from 6,312 MW to 9,671 MW. Total Seasonal Uncommitted Capacity ranges from 70,042 MW to 91,168 MW. Sellers' Market Share ranges from 9.0 to 10.9 percent. Because Sellers' Market Share is less than 20 percent in all seasons, the Market Share Analysis is passed in PJM. *See* Exhibit JRS-5.

Thus, on the basis of the Commission's screens, the Exelon MBR Entities do not have horizontal market power in PJM.

AP South

Pivotal Supplier Analysis. The Exelon MBR Entities' Installed Capacity in AP South is 11,818 MW. They have 1,108 MW of long-term purchases and 854 MW of long-term sales. After taking into account their load commitments and imports attributed to them, Sellers' Uncommitted Capacity is 3,635 MW. Net Uncommitted Supply is 18,207 MW. Because Sellers' Uncommitted Capacity is less than the Net Uncommitted Supply, the Pivotal Supplier Analysis is passed in AP South. *See* Exhibit JRS-6.

Market Share Analysis. The Exelon MBR Entities' Installed Capacity in AP South ranges from 11,818 MW to 12,331 MW. The Exelon MBR Entities have 1,107 MW to 1,108 MW of long-term purchases, 854 MW to 867 MW of long-term sales. After taking into account their load commitments and planned outages and imports attributed to them, Sellers' Uncommitted Capacity ranges from 3,774 MW to 5,429 MW. Total Seasonal Uncommitted Capacity ranges from 32,269 MW to 39,860 MW. Sellers' Market Share ranges from 11.2 to 14.8 percent. Because Sellers' Market Share is less than 20 percent in all seasons, the Market Share Analysis is passed in AP South. *See* Exhibit JRS-7.

Thus, on the basis of the Commission's screens, the Exelon MBR Entities do not have horizontal market power in AP South.

5004/5005

Pivotal Supplier Analysis. The Exelon MBR Entities' Installed Capacity in 5004/5005 is 11,816 MW. They have 1,102 MW of long-term purchases and 854 MW of long-term sales. After taking into account their load commitments and imports attributed to them, Sellers' Uncommitted Capacity is 3,591 MW. Net Uncommitted Supply is 11,732 MW. Because Sellers' Uncommitted Capacity is less than the Net Uncommitted Supply, the Pivotal Supplier Analysis is passed in 5004/5005. *See* Exhibit JRS-8.

Market Share Analysis. The Exelon MBR Entities' Installed Capacity in 5004/5005 ranges from 11,816 MW to 12,330 MW. The Exelon MBR Entities have 1,102 MW of long-term purchases, 854 MW to 867 MW of long-term sales. After taking into account their load commitments and planned outages and imports attributed to them, Sellers' Uncommitted Capacity ranges from 3,748 MW to 5,679 MW. Total Seasonal Uncommitted Capacity ranges from 22,808 MW to 29,798 MW. Seller's Market Share exceeds 20 percent in one season (Spring) and, hence, the Market Share Screen is failed. See Exhibit JRS-9.

However, as I explained earlier, the Commission previously has found that the presence of Commission-approved market monitoring and mitigation in PJM adequately mitigates any market power concerns in that market. Therefore, the Exelon MBR Entities satisfy the Commission's requirements for market-based rates regarding horizontal market power in the 5004/5005 submarket notwithstanding the violation of the market share screen.

PJM East

Pivotal Supplier Analysis. The Exelon MBR Entities' Installed Capacity in PJM East is 7,156 MW. They have 476 MW of long-term purchases. After taking into account their load commitments and imports attributed to them, Sellers' Uncommitted Capacity is 4,314 MW. Net Uncommitted Supply is 8,403 MW. Because Sellers' Uncommitted Capacity is less than the Net Uncommitted Supply, the Pivotal Supplier Analysis is passed in PJM East. *See* Exhibit JRS-10.

Market Share Analysis. The Exelon MBR Entities' Installed Capacity in PJM East ranges from 7,156 MW to 7,576 MW. The Exelon MBR Entities have 476 MW of long-term purchases. After taking into account their load commitments and planned outages and imports attributed to them, Sellers' Uncommitted Capacity ranges from 4,434 MW to 5,760 MW. Total Seasonal Uncommitted Capacity ranges from 15,517 MW to 20,775 MW. Seller's Market Share exceeds 20 percent and, hence, the Market Share Screen is failed. See Exhibit JRS-11.

Again, the presence of Commission-approved market monitoring and mitigation in PJM adequately mitigates any market power concerns in that market. Therefore, the Exelon MBR Entities satisfy the Commission's requirements for market-based rates regarding horizontal market power in the PJM East submarket notwithstanding the violation of the market share screen.

V. VERTICAL MARKET POWER

Transmission

Exelon's franchised public utilities each own transmission facilities located in PJM, but those facilities are under the functional control of PJM and subject to the terms and conditions of the PJM OATT, which the Commission has deemed to mitigate a seller's transmission market power.[28]

Barriers to Entry

The Exelon MBR Entities have no ownership or control of intrastate natural gas transportation or intrastate natural gas storage, except for Baltimore Gas and Electric Company, Delmarva Power & Light Gas Company, and PECO Energy Company, which provide natural gas distribution service to their customers and own certain intrastate transportation, storage, and distribution facilities in PJM. As the Commission has determined, there is rebuttable presumption that such ownership does not allow a seller to raise entry barriers.[29]

---

[28] Order No. 697 at P 21.

[29] *Id.* at P 22.

The Exelon MBR Entities or their affiliates own or control sites for the development of new generation capacity that are in the interconnection process in PJM as well as in other markets. In Order No. 816 the Commission eliminated the requirement to file land acquisition reports and revised section 35.37 of its regulations to remove the requirement that sellers provide information regarding sites for generation capacity development to demonstrate lack of vertical market power.[30] The Exelon MBR Entities do not own or control sources of coal supplies or the transportation of coal supplies. Here again, the Commission has determined that there is a rebuttable presumption that such ownership or control does not allow a seller to raise entry barriers. There are no other issues that raise any relevant competitive concerns.

I understand that an affirmative statement on behalf of the Exelon MBR Entities is included in their submission that they have not erected barriers to entry and will not erect barriers to entry.

Based on these facts, the Exelon MBR Entities have demonstrated a lack of vertical market power.

VI. CONCLUSION

On the basis of the foregoing analysis, the Exelon MBR Entities continue to satisfy the Commission's horizontal and vertical market power requirements for market-based rate authority in PJM.

---

[30] *See* Order No. 816 at P 212. The Commission however retained the right to request additional information about land acquisitions. *Id.* at P 210.

Testimony

- Written testimony provided in more than 150 regulatory proceedings

Julie Solomon is a Managing Director at Navigant Consulting, Inc. in the Energy Practice's Power Systems, Markets & Pricing group. She has more than 20 years of consulting experience, specializing in the areas of regulatory and utility economics, financial analysis and business valuation. Ms. Solomon has participated in analysis of proposed regulatory reforms, supply options and utility industry restructuring in the gas and electric industries. She also has advised utility clients in corporate strategy and corporate restructuring, and consulted to legal counsel on a variety of litigation and regulatory matters, including antitrust litigation and contract disputes. She has filed testimony in numerous proceedings before the Federal Energy Regulatory Commission. Much of her current practice focuses on regulatory and market power issues concerning mergers and acquisitions and compliance filings in the electricity market.

» Advised clients in the electric and gas utility industry on competition issues, including the impact of mergers on competition. Directed a large number of analytic studies relating to obtaining merger approval from regulatory authorities.

» Advised clients in the electric utility industry on restructuring strategies, including potential mergers and acquisitions, functional unbundling and cost savings.

» Consulted in the electric and gas utility industries in a variety of regulatory and competition matters, including rate proceedings, prudence reviews, proposed regulatory reforms, analysis of supply options, privatization and restructuring.

» Advised utility and non-utility clients on many aspects of the competitive independent power industry, including strategic and financial consulting assignments.

» Consulted legal counsel on a variety of litigation matters, including the development of expert testimony on liability issues and the calculation of damages in a variety of industries.

» Provided strategic and economic analyses for clients in trade regulatory proceedings such as dumping and subsidies.

» Provided financial and business valuation analyses in a number of transactions, including fair market value for taxation purposes and valuation of family-owned businesses.

Professional Experience

Electric and Gas Utilities

Mergers and Acquisitions (Market Power and Competition Issues)

» Advised clients and conducted analytic studies in connection with a large number of major electric and electric-gas mergers and asset transactions of regulated companies. Provided testimony to FERC for a number of these types of transactions.

» Advised clients and provided confidential pre-screening analyses for potential mergers and acquisitions.

» Conducted numerous analytic studies in connection with FERC market-based rate applications and compliance filings for electricity sellers. Provided testimony to FERC for a number of these types of transactions.

» Conducted numerous analytic studies in connection with FERC market-based rate applications and compliance filings for gas storage facilities. Provided testimony to FERC for a number of these types of transactions.

Utility Restructuring and Stranded Cost

» Conducted analytic studies and provided litigation support in connection with state stranded cost proceedings in Ohio (Cincinnati Gas & Electric and Dayton Power & Light); West Virginia (Monongahela Power and Potomac Edison); Maryland (Potomac Edison) and Pennsylvania (West Penn Power).

» Provided analytic support evaluating the benefits of Public Service of Colorado's proposed DC transmission line between Colorado and Kansas in support of a regulatory proceeding.

» Assisted in studies relating to privatization of the electricity industry in the United Kingdom, including development of a computer model to simulate electricity dispatch and project future prices, capacity needs and utility revenues under various scenarios. During temporary assignment to London office.

» Participated in antitrust litigation involving a utility and a cogenerator, including preparation of an expert report on liability and damage issues, preparation of expert witnesses for deposition, and assistance in preparation for depositions of opposing expert and in-house witnesses.

» Assisted in the valuation of the interests of several firms in various cogeneration projects for the purpose of combining these interests into a new entity or selling interests to third parties.

» Analyzed the financial feasibility and viability of a large number of cogeneration projects, assisted in the preparation of presentations and filings and presented testimony to the relevant public utility commission. Ms. Solomon also assisted in the development of a PC-based financial model to analyze various cogeneration projects.

» Participated in a study to analyze the financial effects of a variety of restructuring options for a utility, including transfer and/or sale of assets and subsequent sale-leasebacks, and debt restructuring alternatives. In addition, she developed a PC-based financial model with applications to utility restructuring plans.

» Provided litigation support in major utility rate proceedings, including assisting in the preparation of responses to interrogatories and data requests, preparation of company and outside expert witnesses for deposition and hearings, and assistance in the deposition and cross-examination of intervenor witnesses.

» Participated in proceedings involving regulation of an oil pipeline, which included evaluating the business risks faced by the company.

Business Valuation

» Participated in a valuation study involving the fair market value of a privately held company for purposes of an IRS proceeding.

» Participated in a valuation study in a divorce proceeding, where the assets being valued included a privately held business.

» Participated in two strategic engagements that developed business plans and identified potential acquisition candidates for the client.

» Provided advice to a client concerning the benefits and potential risks of developing a partnership with a competitor.

PROTECTIVE ORDER

(Issued April __, 2016)

1. This Protective Order shall govern the use of all Protected Materials produced by, or on behalf of, any Participant. Notwithstanding any order terminating this proceeding, this Protective Order shall remain in effect until specifically modified or terminated by the Presiding Administrative Law Judge ("Presiding Judge") or the Federal Energy Regulatory Commission ("Commission").

2. This Protective Order applies to the following two categories of materials: (A) A Participant may designate as protected those materials which customarily are treated by that Participant as sensitive or proprietary, which are not available to the public, and which, if disclosed freely, would subject that Participant or its customers to risk of competitive disadvantage or other business injury; and (B) A Participant shall designate as protected those materials which contain critical energy infrastructure information, as defined in 18 C.F.R. § 388.113(c)(1) ("Critical Energy Infrastructure Information").

3. Definitions -- For purposes of this Order:

(a) The term "Participant" shall mean a Participant as defined in 18 C.F.R. § 385.102(b).

(b)(1) The term "Protected Materials" means (A) materials (including depositions) provided by a Participant in response to discovery requests and/or filed with the Commission and, in each case, designated by such Participant as protected; (B) any information contained in or obtained from such designated materials; (C) any other materials which are made subject to this Protective Order by the Presiding Judge, by the Commission, by any court or other body having appropriate authority, or by agreement of the Participants; (D) notes of Protected Materials; and (E) copies of Protected Materials. The Participant producing the Protected Materials shall physically mark them on each page as "PROTECTED MATERIALS" or with words of similar import as long as the term "Protected Materials" is included in that designation to indicate that they are Protected Materials. If the Protected Materials contain Critical Energy Infrastructure Information, the Participant producing such information shall additionally mark on each page containing such information the words "Contains Critical Energy Infrastructure Information — Do Not Release." In addition if the Protected Materials contain market sensitive information, public disclosure of which the disclosing Participant believes in

good faith would competitively harm the Participant, the disclosing Participant shall additionally mark on each page containing such information the words "HIGHLY SENSITIVE PROTECTED MATERIALS." Except for the more limited list of persons who qualify as Reviewing Representatives for purposes of reviewing Highly Sensitive Protected Materials, such materials are subject to the same provisions in the Protective Order as Protected Materials.

(2) The term "Notes of Protected Materials" means memoranda, handwritten notes, or any other form of information (including electronic form) which copies or discloses materials described in Paragraph 3(b)(1). Notes of Protected Materials are subject to the same restrictions provided in this order for Protected Materials except as specifically provided in this order.

(3) Protected Materials shall not include (A) any information or document contained in the files of the Commission (other than pursuant to this Protective Order), or any other federal or state agency, or any federal or state court, unless the information or document has been determined to be protected by such agency or court, or (B) information that is public knowledge, or which becomes public knowledge, other than through disclosure in violation of this Protective Order, or (C) any information or document labeled as "Non-Internet Public" by a Participant, in accordance with Paragraph 30 of FERC Order No. 630, FERC Stat. & Reg. & 31,140. Protected Materials do include any information or document contained in the files of the Commission that has been designated as Critical Energy Infrastructure Information.

(c) The term "Non-Disclosure Certificate" shall mean the certificate annexed hereto by which Participants who have been granted access to Protected Materials shall certify their understanding that such access to Protected Materials is provided pursuant to the terms and restrictions of this Protective Order, and that such Participants have read the Protective Order and agree to be bound by it. All Non-Disclosure Certificates shall be served on all parties on the official service list maintained by the Secretary in this proceeding.

(d) The term "Reviewing Representative" shall mean a person who has signed a Non-Disclosure Certificate (to the extent required by Section 9) and:

(i) For purposes of reviewing Protected Materials (other than Highly Sensitive Protected Materials), who is

(1) Commission Staff ("Staff");

(2) an attorney who has made an appearance in this proceeding for a Participant;

(3) attorneys, paralegals, and other employees associated for purposes of this case with an attorney described in Subparagraph (2);

(4) an expert or an employee of an expert retained by a Participant for the purpose of advising, preparing for or testifying in this proceeding;

(5) a person designated as a Reviewing Representative by order of the Presiding Judge or the Commission; or

(6) employees or other representatives of Participants appearing in this proceeding with significant responsibility for this docket.

(ii) For purposes of reviewing Highly Sensitive Protected Materials, who is:

(1) Staff;

(2) Members or staff of any state or local utilities commission which is a Participant;

(3) An outside attorney who has made an appearance in this proceeding for a Participant;

(4) Attorneys, paralegals, and other employees of the firm of the outside attorney described in Paragraph 3(d)(ii)(3) working with such outside attorney for purposes of this case;

(5) An outside expert or an employee of an outside expert retained by a Participant for the purpose of advising, preparing for or testifying in this proceeding who is working under the direction of an attorney described in Paragraph 3(d)(ii)(2) or 3(d)(ii)(3);

(6) If, after a good faith effort, parties fail to agree on designating a specifically-named inside employee(s) of a non-governmental Participant as a Reviewing Representative for the review of specific Highly Sensitive Protected Material(s), a party may request that the Presiding Judge so-designate such a specifically-named inside employee(s) who, for example, is not directly involved in, or having direct or supervisory responsibilities over, the purchase, sale, or marketing of electricity (including transmission service) at retail or wholesale, the negotiation or development of participation or cost-sharing arrangements for transmission or generation facilities, or other activities or transactions of a type with respect to which the disclosure of Highly Sensitive Protected Materials may present an unreasonable risk of harm; or

(7) A person designated as a Reviewing Representative by order of the Presiding Judge or the Commission specifically ruling on and indicating each such person by name.

4. Protected Materials shall be made available under the terms of this Protective Order only to Participants and only through their Reviewing Representatives as provided in Paragraphs 7-9.

5. Protected Materials shall remain available to Participants until the later of the date that an order terminating this proceeding becomes no longer subject to judicial review, or the date that any other Commission proceeding relating to the Protected Material is concluded and no longer subject to judicial review. If requested to do so in writing after that date, the Participants shall, within fifteen days of such request, return the Protected Materials (excluding Notes of Protected Materials) to the Participant that produced them, or shall destroy the materials, except that copies of filings, official transcripts and exhibits in this proceeding that contain Protected Materials, and Notes of Protected Material may be retained, if they are maintained in accordance with Paragraph 6, below. Within such time period each Participant, if requested to do so, shall also submit to the producing Participant an affidavit stating that, to the best of its knowledge, all Protected Materials and all Notes of Protected Materials have been returned or have been destroyed or will be maintained in accordance with Paragraph 6. To the extent Protected Materials are not returned or destroyed, they shall remain subject to the Protective Order.

6. All Protected Materials shall be maintained by the Participant in a secure place. Access to those materials shall be limited to those Reviewing Representatives specifically authorized pursuant to Paragraphs 8-9. The Secretary shall place any Protected Materials filed with the Commission in a non-public file. By placing such documents in a non-public file, the Commission is not making a determination of any claim of privilege. The Commission retains the right to make determinations regarding any claim of privilege and the discretion to release information necessary to carry out its jurisdictional responsibilities. For documents submitted to Staff, Staff shall follow the notification procedures of 18 C.F.R. § 388.112 before making public any Protected Materials.

7. Protected Materials shall be treated as confidential by each Participant and by the Reviewing Representative in accordance with the certificate executed pursuant to Paragraph 9. Protected Materials shall not be used except as necessary for the conduct of this proceeding, nor shall they be disclosed in any manner to any person except a Reviewing Representative who is engaged in the conduct of this proceeding and who needs to know the information in order to carry out that person's responsibilities in this proceeding. Reviewing Representatives may make copies of Protected Materials, but such copies become Protected Materials. Reviewing Representatives may make notes of Protected Materials, which shall be treated as Notes of Protected Materials if they disclose the contents of Protected Materials.

8. (a) If a Reviewing Representative's scope of employment includes the marketing of energy, the direct supervision of any employee or employees whose duties include the marketing of energy, the provision of consulting services to any person whose duties include the marketing of energy, or the direct supervision of any employee or employees whose duties include the marketing of energy, such Reviewing Representative may not

use information contained in any Protected Materials obtained through this proceeding to give any Participant or any competitor of any Participant a commercial advantage.

(b) In the event that a Participant wishes to designate as a Reviewing Representative a person not described in Paragraph 3 (d) above, the Participant shall seek agreement from the Participant providing the Protected Materials. If an agreement is reached that person shall be a Reviewing Representative pursuant to Paragraphs 3(d) above with respect to those materials. If no agreement is reached, the Participant shall submit the disputed designation to the Presiding Judge for resolution.

9. (a) A Reviewing Representative shall not be permitted to inspect, participate in discussions regarding, or otherwise be permitted access to Protected Materials pursuant to this Protective Order unless that Reviewing Representative has first executed a Non-Disclosure Certificate; provided, that if an attorney qualified as a Reviewing Representative has executed such a certificate, the paralegals, secretarial and clerical personnel under the attorney's instruction, supervision or control need not do so. A copy of each Non-Disclosure Certificate shall be provided to counsel for the Participant asserting confidentiality prior to disclosure of any Protected Material to that Reviewing Representative. NOTWITHSTANDING THE FOREGOING, A MEMBER OF THE COMMISSION'S ADVISORY STAFF REVIEWING PROTECTED MATERIAL OR HIGHLY SENSITIVE PROTECTED MATERIAL SUBJECT TO THIS AGREEMENT IN CONNECTION WITH ITS REVIEW OF APPLICANT'S MARKET-BASED RATE AUTHORIZATION SHALL NOT BE REQUIRED TO SIGN OR RETURN A NON-DISCLOSURE CERTIFICATE.

(b) Attorneys qualified as Reviewing Representatives are responsible for ensuring that persons under their supervision or control comply with this order.

10. Any Reviewing Representative may disclose Protected Materials to any other Reviewing Representative as long as the disclosing Reviewing Representative and the receiving Reviewing Representative both have executed a Non-Disclosure Certificate. In the event that any Reviewing Representative to whom the Protected Materials are disclosed ceases to be engaged in these proceedings, or is employed or retained for a position whose occupant is not qualified to be a Reviewing Representative under Paragraph 3(d), access to Protected Materials by that person shall be terminated. Even if no longer engaged in this proceeding, every person who has executed a Non-Disclosure Certificate shall continue to be bound by the provisions of this Protective Order and the certification.

11. Subject to Paragraph 18, the Presiding Administrative Law Judge shall resolve any disputes arising under this Protective Order. Prior to presenting any dispute under this Protective Order to the Presiding Administrative Law Judge, the parties to the dispute shall use their best efforts to resolve it. Any participant that contests the designation of materials as protected shall notify the party that provided the protected materials by specifying in writing the materials the designation of which is contested. This Protective Order shall automatically cease to apply to such materials five (5) business days after the

notification is made unless the designator, within said 5-day period, files a motion with the Presiding Administrative Law Judge, with supporting affidavits, demonstrating that the materials should continue to be protected. In any challenge to the designation of materials as protected, the burden of proof shall be on the participant seeking protection. If the Presiding Administrative Law Judge finds that the materials at issue are not entitled to protection, the procedures of Paragraph 18 shall apply. The procedures described above shall not apply to protected materials designated by a Participant as Critical Energy Infrastructure Information. Materials so designated shall remain protected and subject to the provisions of this Protective Order, unless a Participant requests and obtains a determination from the Commission's Critical Energy Infrastructure Information Coordinator that such materials need not remain protected.

12. All copies of all documents reflecting Protected Materials, including the portion of the hearing testimony, exhibits, transcripts, briefs and other documents which refer to Protected Materials, shall be filed and served in sealed envelopes or other appropriate containers endorsed to the effect that they are sealed pursuant to this Protective Order. Such documents shall be marked "PROTECTED MATERIALS" and shall be filed under seal and served under seal upon the Presiding Judge and all Reviewing Representatives who are on the service list. Such documents containing Critical Energy Infrastructure Information shall be additionally marked "Contains Critical Energy Infrastructure Information — Do Not Release." For anything filed under seal, redacted versions or, where an entire document is protected, a letter indicating such, will also be filed with the Commission and served on all parties on the service list and the Presiding Judge. Counsel for the producing Participant shall provide to all Participants who request the same, a list of Reviewing Representatives who are entitled to receive such material. Counsel shall take all reasonable precautions necessary to assure that Protected Materials are not distributed to unauthorized persons.

13. If any Participant desires to include, utilize or refer to any Protected Materials or information derived therefrom in testimony or exhibits during the hearing in these proceedings in such a manner that might require disclosure of such material to persons other than reviewing representatives, such participant shall first notify both counsel for the disclosing participant and the Presiding Judge of such desire, identifying with particularity each of the Protected Materials. Thereafter, use of such Protected Material will be governed by procedures determined by the Presiding Judge.

14. Nothing in this Protective Order shall be construed as precluding any Participant from objecting to the use of Protected Materials on any legal grounds.

15. Nothing in this Protective Order shall preclude any Participant from requesting the Presiding Judge, the Commission, or any other body having appropriate authority, to find that this Protective Order should not apply to all or any materials previously designated as Protected Materials pursuant to this Protective Order. The Presiding Judge may alter or amend this Protective Order as circumstances warrant at any time during the course of this proceeding.

16. Each party governed by this Protective Order has the right to seek changes in it as appropriate from the Presiding Judge or the Commission.

17. All Protected Materials filed with the Commission, the Presiding Judge, or any other judicial or administrative body, in support of, or as a part of, a motion, other pleading, brief, or other document, shall be filed and served in sealed envelopes or other appropriate containers bearing prominent markings indicating that the contents include Protected Materials subject to this Protective Order. Such documents containing Critical Energy Infrastructure Information shall be additionally marked "Contains Critical Energy Infrastructure Information – Do Not Release."

18. If the Presiding Judge finds at any time in the course of this proceeding that all or part of the Protected Materials need not be protected, those materials shall, nevertheless, be subject to the protection afforded by this Protective Order for three (3) business days from the date of issuance of the Presiding Judge's determination, and if the Participant seeking protection files an interlocutory appeal or requests that the issue be certified to the Commission, for an additional seven (7) business days. None of the Participants waives its rights to seek additional administrative or judicial remedies after the Presiding Judge's decision respecting Protected Materials or Reviewing Representatives, or the Commission's denial of any appeal thereof. The provisions of 18 C.F.R. §§ 388.112 and 388.113 shall apply to any requests under the Freedom of Information Act. (5 U.S.C. ¶ 552) for Protected Materials in the files of the Commission.

19. Nothing in this Protective Order shall be deemed to preclude any Participant from independently seeking through discovery in any other administrative or judicial proceeding information or materials produced in this proceeding under this Protective Order.

20. None of the Participants waives the right to pursue any other legal or equitable remedies that may be available in the event of actual or anticipated disclosure of Protected Materials.

21. The contents of Protected Materials or any other form of information that copies or discloses Protected Materials shall not be disclosed to anyone other than in accordance with this Protective Order and shall be used only in connection with this (these) proceeding(s). Any violation of this Protective Order and of any Non-Disclosure Certificate executed hereunder shall constitute a violation of an order of the Commission.

NON-DISCLOSURE CERTIFICATE

I hereby certify my understanding that access to Protected Materials is provided to me pursuant to the terms and restrictions of the Protective Order in this proceeding, that I have been given a copy of and have read the Protective Order, and that I agree to be bound by it. I understand that the contents of the Protected Materials, any notes or other memoranda, or any other form of information that copies or discloses Protected Materials shall not be disclosed to anyone other than in accordance with that Protective Order. I acknowledge that a violation of this certificate constitutes a violation of an order of the Federal Energy Regulatory Commission.

Notice of Change in Status

Dear Secretary Bose:

Pursuant to the requirements of section 35.42(a)(2) of the regulations of the Federal Energy Regulatory Commission ("FERC" or "Commission"),[1] Exelon Generation Company, LLC ("Exelon Generation"), Constellation Energy Commodities Group Maine, LLC ("CECG Maine"), Constellation Energy Services, Inc. ("CES"), Constellation Energy Services of New York, Inc. ("CES of NY"), Constellation NewEnergy, Inc. ("CNE," and with CECG Maine, CES, and CES of NY, the "Retail Marketers"), Exelon Wind 4, LLC ("EW4"), Shooting Star Wind Project, LLC ("Shooting Star"), and Wildcat Wind, LLC ("Wildcat Wind," and with EW4 and Shooting Star, the "SPP Projects") (Exelon Generation, the Retail Marketers, and the SPP Projects, collectively, the "Sellers") submit this notice of change in status ("Notice") to inform the Commission of their new affiliation with Bluestem Wind Energy, LLC ("Bluestem"), which will own a new 198 MW generation facility located within the footprint of the Southwest Power Pool, Inc. ("SPP").[2]

[1] 18 C.F.R. § 35.42(a)(2) (2016).

[2] The Sellers have attached an updated asset appendix in the format set forth in Appendix B to 18 C.F.R. Part 35, Subpart H that reflects the new affiliation.

20161102-5188 FERC PDF (Unofficial) 11/2/2016 12:07:24 PM

Sellers are direct or indirect wholly owned subsidiaries of Exelon Corporation ("Exelon") with market-based rate authority. Bluestem is an indirect, wholly owned subsidiary of Exelon that is developing and will own and operate an approximately 198 MW (summer) wind-powered electric generation facility located in Beaver County, Oklahoma ("Facility"). The Facility will be interconnected to the transmission system owned by Oklahoma Gas and Electric Company ("OG&E") and operated by SPP. It is currently anticipated that the Facility will achieve commercial operation in December, 2016. Bluestem will not own any transmission facilities, except for the limited and discrete equipment necessary to interconnect the Facility to the grid. The Commission granted Bluestem authorization to sell energy, capacity, and ancillary services at market-based rates and accepted for filing Bluestem's market-based rate tariff effective October 3, 2016.[3] On October 17, 2016, Bluestem filed a notice of self-certification of exempt wholesale generator status in Docket No. EG17-15-000.

Sellers' affiliation with Bluestem will result in a cumulative net increase of more than 100 MW of generation capacity in SPP.[4] SPP is Sellers' relevant geographic market for purposes of this Notice. The SPP Projects own generation facilities located in SPP, Exelon Generation purchases via a long-term agreement the output of generation located in SPP and operates as a power marketer (in addition to directly owning generation in other markets), and the Retail Marketers operate as power marketers that do now own any generation facilities, except for limited behind-the-meter facilities.[5]

Bluestem's affiliation with Sellers does not raise any horizontal or vertical market power concerns. As demonstrated in Bluestem's application for market-based rate authority, Bluestem and Sellers pass the pivotal supplier and market share screens in SPP and neither Bluestem nor any of Sellers own or control any transmission facilities, except for limited and discrete interconnection facilities required to connect individual generating facilities to the transmission grid, or any inputs to electric power production, as defined in section 35.36 of the Commission's regulations.[6] To the extent necessary, Sellers confirm that they have not erected barriers to entry into the relevant market and will not erect barriers to entry into the relevant market.

---

[3] *Bluestem Wind Energy, LLC*, Letter Order, Docket No. ER16-2363-000 (Sept. 15, 2016) ("Bluestem MBR Order").

[4] *See Refinements to Policies and Procedures for Market-Based Rates for Wholesale Sales of Electric Energy, Capacity and Ancillary Services by Public Utilities*, Order No. 816, 153 FERC ¶ 61,065 at P 238 (2015), reh'g, Order No. 816-A, 155 FERC ¶ 61,188 (2016) ("if a seller's affiliate is granted market-based rate authority, and that results in 100 MW or more of new generation capacity in a market, then the seller will have to file a corresponding change in status.").

[5] The Commission clarified that, for purposes of compliance with the notice of change in status requirements, "for a power producer, the relevant geographic market is where the seller's generation is physically located" and for a power marketer "the relevant markets . . . include any market where the power marketer's affiliates own generation." Order No. 816-A at 36.

[6] *See* Bluestem MBR Order (finding that Bluestem satisfies the Commission's requirements for market-based rates regarding both horizontal and vertical market power).

20161102-5188 FERC PDF (Unofficial) 11/2/2016 12:07:24 PM

For the reasons set forth above, Sellers' affiliation with Bluestem does not materially change the facts and circumstances that the Commission relied upon in granting market-based rate authority to Sellers. Therefore, Sellers respectfully request that the Commission accept for filing this notice of change in status and find that no further inquiry is necessary.

Respectfully submitted,

Notice of Change in Status

Dear Secretary Bose:

Pursuant to the requirements of section 35.42 of the regulations of the Federal Energy Regulatory Commission ("FERC" or "Commission"),[1] Exelon Generation Company, LLC ("Exelon Generation"), Constellation Energy Commodities Group Maine, LLC ("CECG Maine"), Constellation Energy Services, Inc. ("CES"), Constellation Energy Services of New York, Inc. ("CES of NY"), Constellation NewEnergy, Inc. ("CNE," and with Exelon Generation, CECG Maine, CES, and CES of NY, the "Exelon Sellers"), Nine Mile Point Nuclear Station, LLC ("Nine Mile"), and R.E. Ginna Nuclear Power Plant, LLC ("Ginna," and with Nine Mile, the "CENG Sellers") submit this notice of change in status ("Notice").

On December 7, 2016, the Commission authorized Exelon Generation to acquire the James A. FitzPatrick Nuclear Power Plant and associated interconnection equipment (the "FitzPatrick Facility") from Entergy Nuclear FitzPatrick, LLC (the "Transaction").[2] The FitzPatrick Facility is located in the balancing authority area operated by the New York Independent System Operator, Inc. ("NYISO"). This Notice is filed as a result of the consummation of the Transaction on March 31, 2017.

[1] 18 C.F.R. § 35.42 (2016).

[2] *Entergy Nuclear FitzPatrick, LLC*, 157 FERC ¶ 61,183 (2016).

I. Documents Submitted

The Exelon Sellers and the CENG Sellers submit the following documents:

1. This transmittal letter;

2. Attachment A: Pivotal supplier and market share screens for the Exelon Sellers;

3. Attachment B: Pivotal supplier and market share screens for the CENG Sellers;

4. Attachment C: Asset appendix for Exelon Corporation ("Exelon") and its affiliates in the format set forth in Appendix B to 18 C.F.R. Part 35, Subpart H; and

5. Attachment D: Asset appendix for EDF Inc. ("EDF") and its affiliates in the format set forth in Appendix B to 18 C.F.R. Part 35, Subpart H.

II. Communications

Communications regarding this Application should be addressed to the following individuals:

III. Description of Exelon Sellers and CENG Sellers

The Exelon Sellers are direct or indirect wholly owned subsidiaries of Exelon. Exelon is a publicly traded holding company, headquartered in Chicago, Illinois, with operations and business activities in 48 states, the District of Columbia, Canada, and the United Kingdom.[3]

Exelon Generation is owned directly by Exelon. Exelon Generation is one of the largest competitive power generators in the United States. Exelon Generation and its subsidiaries operate one of the nation's cleanest and lowest-cost power generation fleets, with generation facilities located in a number of organized markets across the country. In addition, Constellation, an Exelon Generation business unit consisting of subsidiaries and divisions of Exelon Generation, is one of the nation's leading marketers of electricity, natural gas, and related products in wholesale and retail markets. Exelon Generation serves as a supplier of energy to, among others, utilities and municipalities to meet their native load obligations. Through various subsidiaries, Exelon Generation is also a retail competitive energy provider. The Commission granted Exelon Generation market-based rate authority.[4] Except for the FitzPatrick Facility, Exelon Generation does not directly own any generation facility in NYISO. Exelon Generation purchases under long term-contracts approximately 29 MW from generation facilities located in the NYISO BAA.

CECG Maine, CES, CES of NY, and CNE are indirect, wholly owned subsidiary of Exelon Generation that operate as power marketers and do not own or control any generation facilities, except for limited behind-the-meter facilities, or any transmission facilities in the United States. Each of CECG Maine, CES, CES of NY, and CNE has been granted market-based rate authority.[5]

The CENG Sellers are indirect, wholly owned subsidiaries of Constellation Energy Nuclear Group, LLC ("CENG"), which is a joint venture between Exelon Generation and EDF.[6]

---

[3] No individual shareholder of Exelon owns a 10% or greater interest in Exelon's outstanding voting securities.

[4] *Exelon Generating Co.*, 93 FERC ¶ 61,140 (2000), *reh'g denied*, 95 FERC ¶ 61,309 (2001).

[5] *See Constellation Power Source Maine, LLC*, Letter Order, Docket No. ER02-699-000 (Feb. 26, 2002); *NEV, L.L.C.*, 81 FERC ¶ 61,186 (1997) (granting Constellation NewEnergy, Inc. market-based rate authority); *Wisconsin Public Service Corp., et al.*, 75 FERC ¶ 61,057 (1996) (granting Constellation Energy Services, Inc. market-based rate authority); *Advantage Energy, Inc.*, Letter Order, Docket No. ER97-2758-000 (July 14, 1997) (granting Constellation Energy Services of New York, Inc. market-based rate authority). In a letter order issued on June 23, 2015 in Docket Nos. ER15-1537-000, et al., the Commission accepted for filing the notice of succession reflecting the names changes from Integrys Energy Services, Inc. to Constellation Energy Services, Inc. and from Integrys Energy Services of New York, Inc. to Constellation Energy Services of New York, Inc.

[6] Specifically, the CENG Sellers are wholly owned subsidiaries of Constellation Nuclear Power Plants, LLC, which is a wholly owned subsidiary of CENG. Constellation Nuclear, LLC ("Constellation Nuclear") and its subsidiary own 50.01% of the interests in CENG. The remaining 49.99% interest in CENG is owned by EDF, which is not affiliated with Exelon Generation.

Nine Mile owns 100% of an approximately 630 MW unit and an 82% share of an approximately 1,287 MW unit of a nuclear generation facility located in the NYISO BAA. Nine Mile sells all of the energy produced by its facility to Exelon Generation and EDF Trading NA under long-term firm agreements executed in 2009 that remain in effect, as amended, through the complete and permanent cessation of power generation by the facility. Each of Exelon Generation and EDF Trading NA receives approximately 50% of the energy output of Nine Mile's facility under its respective agreement. The Commission has granted Nine Mile Point market-based rate authority.[7]

Ginna owns an approximately 582 MW nuclear generation facility located in the NYISO BAA. The Commission has granted Ginna MBR authority.[8]

IV. Notice of Change in Status

As a result of the consummation of the Transaction, on March 31, 2017 Exelon Generation became the owner of the FitzPatrick Facility, an approximately 837 MW (summer) nuclear generation facility located in Oswego County, New York.

The Transaction does not raise any horizontal market power concerns. The Transaction resulted in a *de minimis* increase in the generation affiliated with the Exelon Sellers and the CENG Sellers, because the FitzPatrick Facility represents only 2 percent of the installed capacity in NYISO.[9] To demonstrate that they continue to pass the pivotal supplier and market share screens and lack horizontal market power, the Exelon Sellers and the CENG Sellers rely on the screens recently submitted with their respective updated market power analyses for the Northeast Region, which are currently pending before the Commission.[10]

In the Exelon Triennial, Exhibits NCI-17 and NCI-18 demonstrated that the Exelon Sellers pass the pivotal supplier and the market share screens in NYISO. The Exelon Sellers submit herewith updated versions of Exhibits NCI-17 and NCI-18 that have been modified by adding in Row A the generation capacity of the FitzPatrick Facility and by subtracting it from the rows reporting non-affiliated installed capacity. After the addition of the FitzPatrick Facility, the Exelon Sellers continue to pass the pivotal supplier screen and their share of uncommitted capacity under the market share screen does not exceed 8% in any season. In

---

Constellation Nuclear is owned by Exelon Generation (95%) and Constellation Holdings, LLC ("Constellation Holdings") (5%). Constellation Holdings is a wholly owned subsidiary of Exelon Generation.

[7] *Nine Mile Point Nuclear Station, LLC*, 95 FERC ¶ 61,202 (2001).

[8] *R.E. Ginna Nuclear Power Plant, LLC*, Letter Order, Docket No. ER04-485-000 (Mar. 24, 2004).

[9] NYISO's installed capacity is approximately 39,039 MW. *See* https://www.ferc.gov/market-oversight/mkt-electric/new-york/elec-ny-glance.pdf

[10] The Exelon Sellers filed their updated market power analysis on December 29, 2016 in Docket Nos. ER10-2997-005, *et al.* ("Exelon Triennial"). The CENG Sellers filed their updated market power analysis on December 29, 2016 in Docket Nos. ER10-2179-033, *et al.* ("CENG Triennial").

20170501-5500 FERC PDF (Unofficial) 5/1/2017 2:24:16 PM

the CENG Triennial, Exhibits NCI-11 and NCI-12 similarly demonstrated that the CENG Sellers pass the pivotal supplier and market share screens in NYISO. The CENG Sellers submit herewith updated versions of Exhibits NCI-11 and NCI-12 that have been modified by adding in Row A the generation capacity of the FitzPatrick Facility and by subtracting it from the rows reporting non-affiliated installed capacity. After the addition of the FitzPatrick Facility, the CENG Sellers continue to pass the pivotal supplier screen and their share of uncommitted capacity under the market share screen does not exceed 12.6% in any season. Therefore, the Transaction does not raise any horizontal market power concerns.

The Transaction also does not raise any vertical market power concerns. The Transaction did not involve any transmission facilities, other than the FitzPatrick Facility's limited and discrete interconnection facilities required to connect the FitzPatrick Facility to the transmission grid. The Transaction also did not involve any inputs to electric power production.[11]

V. Conclusion

For the reasons set forth above, the Transaction did not materially change the facts and circumstances that the Commission relied upon in granting market-based rate authority to the Exelon Sellers and the CENG Sellers and the new affiliation with the FitzPatrick Facility does not raise any horizontal or vertical market power concerns with respect to the Exelon Seller or the CENG Sellers. Therefore, the Exelon Sellers and the CENG Sellers respectfully request that the Commission accept for filing this Notice and find that no further inquiry is necessary.

Respectfully submitted,

/s/ Vincenzo Franco
Vincenzo Franco
Associate General Counsel
Exelon Corporation

[11] Section 35.36(a)(4) of the Commission's regulations, 18 C.F.R. § 35.36(a)(4), defines input to electric power production to include: intrastate natural gas transportation, intrastate natural gas storage or distribution facilities; physical coal supply sources and ownership of or control over who may access transportation of coal supplies.

NOTES:

Appendix A - defines the codes used.

Generator details, including Lead Market Participant, as of January 1, 2015.

Additional information and changes to generating asset Lead Participant since January 1, 2015 may be found in the Endnotes following Section 2.1.

The Expected Summer Peak SCC is based on the April 2015 SCC Report and capacity that is expected to be added by August 1st based on the interconnection queue and information provided to ISO-NE by the lead participants. In this table, new capacity consists of one new 73 MW generator and uprates to Manchester Station, Bridgeport Energy, Granite Ridge Energy, and EP Newington Energy totaling approximately 147 MW.

New PV resources that do not yet have an SCC value due to a lack of historical generation data have an assumed SCC of 40 percent of nameplate.

Based on the PV forecast, approximately 8 MW of additional capacity is expected to go commercial by July 1, 2015. See Sec. 3.1.2, "PV in Markets" category for more details on the forecast.

When an alternate fuel is listed, the unit may not necessarily be fully operable on both fuels.

Spring, Fall = average of Winter, Summer

Operating Reserves: The bulk power system needs reserve capacity to be able to respond to contingencies, such as those caused by unexpected outages. Operating reserves are provided by the unloaded capacity of generating resources, either online or offline, which can deliver energy within 10 or 30 minutes. The ISO procures both system-wide reserve, and local reserve for import-constrained areas. The system reserve requirement has been relatively constant over the past three years, with a total ten-minute reserve requirement of about 1,700MW and total thirty-minute reserve requirement of about 2,500MW in 2015.

Per ISO-NE ISO New England's Internal Market Monitor 2015 Annual Markets Report Note above, the 2014-2015 reserves are assumed to be the same as the 2013-2014 Reserves.

The TMNSR and TMOR requirements are based on first- and second-contingency losses (refer to Sections 2.1.4 and 2.2.1). The methodology to calculate these requirements is described in OP 8 (Section 2.2.1) and the ISO New England Manual for Forward Reserve (Manual M-36) (December 3, 2013), http://www.iso-ne.com/rules_proceds/isone_mnls/index.html.

The Forward Reserve requirements for the New England Control Area are based on expected system operating conditions. The TMNSR purchase amount represents the expected single contingency of the HQ Phase II Interconnection, including a TMNSR bias of 63%. The TMNSR purchase amount is increased to reflect a 20% average fleet-wide historical non-performance of resources called upon after a contingency.[1] The TMOR purchase amount represents the expected single contingency of Seabrook. The Replacement Reserve will be equal to 160 MW.

Forward Reserve Requirements

Reserve Zone	Reserve Category	Local 2nd Contingency MW	External Reserve Support MW	Reserve Requirement MW
New England Control Area	TMNSR	N/A	N/A	1310
New England Control Area	TMOR	N/A	N/A	785
SWCT	TMOR	503	365	138
CT	TMOR	1213	499	714
NEMA/Boston	TMOR	880	549	331

The New England Control Area Forward Reserve Requirements are based on a 1st contingency of 1,664 MW and a 2nd contingency of 1,249 MW.

NYISO
Locational Reserve Requirements

The NYISO shall define requirements for Spinning Reserve, which may be met only by Suppliers that are eligible to provide Spinning Reserve; 10-Minute Reserve, which may be met by Suppliers that are eligible to provide either Spinning Reserve or 10-Minute Non-Synchronized Reserve; and 30-Minute Reserve, which may be met by Suppliers that are eligible to provide any Operating Reserve product. The NYISO shall also define locational requirements for Spinning Reserve, 10-Minute Reserve, and 30-Minute Reserve located in East of Central–East (EAST), in Southeastern New York (SENY) and on Long Island (LI) as shown in the following table:

	NYCA	EAST	SENY	LI
A=most severe NYCA Operating Capability Loss (1310 MWs)	Zone A-K	Zone F-K	Zone G-K	Zone K
10 Minute Spinning Reserve	½ A = 655 MWs (I)	¼ A = 330 MWs (IV)	0 MWs	0 MWs
10 Minute Total Reserve	A = 1310 MWs (II)	1200 MWs (V)	0 MWs	$^{1}/_{10}$ V = 120 MWs (VIII)
30 Minute Reserve	2 A = 2620 MWs (III)	1200 MWs (VI)	1300 MWs (VII)	270-540 MWs (IX)

24,093	19,303	16,803	22,934	17,326

Methodology
PJM Operating Reserves are based on the August 2016 PJM SIL filing
Submarket Operating Reserves = PJM Op Res * Submarket Load/PJM Load

Attachment 11: PJM Operating Reserves

PJM's Day-Ahead Scheduling Reserve (DASR) requirement is calculated using a 3 year historical average of both a Load Forecast Error (LFE) component, as well as a Forced Outage Rate (FOR) component. The LFE component is a 3 year historical average of the under forecasted load. The FOR is the 3 year historical average of resource forced outages which impacted next-day operations, and which were reported after the day-ahead commitments had been completed. The sum of the LFE and LOF components determine PJM's DASR for the next calendar year, calculated as a percentage of the forecasted peak load. Shown below is the calculation of the 2015 DASR, as well as the applicable reserve amounts which may be used by PJM members when filing a Market Share Analysis.

DASR = LFE + LOF (calculated as a percentage of forecasted peak load)
2015 DASR = 2.15% + 3.78%
2015 DASR = 5.93%

2015 SIL Operating Reserves		
Season	Peak Load (MW)	DASR (MW)
Winter	136,044	8067
Spring	107,372	6367
Summer	153,402	9097
Fall	107,782	6391

Area	Ancillary Service Market Area	Day-ahead Scheduling (Operating)	Contingency (Primary)	Synchronized Reserve
RTO		Annual %	150% Largest Single Contingency	Largest Single Contingency
	Mid-Atlantic & Dominion	N/A	1700 MW	Largest Single Contingency
SERC	Dominion	VACAR ARS%	VACAR ARS%	VACAR ARS%

Effective January 1, ~~2014~~ 2015 the Day-ahead Scheduling Reserve for RFC and EKPC regions of PJM is ~~6.27~~5.93% times Peak Load Forecast for RFC plus EKPC.
