

PSEG Nuclear, LLC
ZEC Application – Salem 1
Docket No:

Response to Application Request: SI-SSA-0017
Date: 12/19/2018

Question:

A list of active and anticipated contracts for energy supply by the Unit. Include capacity contracted, type of market, length of obligation, and customer.

Attachments Provided Herewith: No

Response:

The only active contract affecting the Unit is a “Power Purchase Agreement,” effective as of January 1, 2005, by and between PSEG Nuclear LLC, as seller, and PSEG Energy Resource & Trade LLC, as buyer, that covers all of the capacity, energy and ancillary services attributable to PSEG Nuclear LLC’s ownership share of the Unit, net of quantities needed by PSEG Nuclear LLC for Unit operations. The Power Purchase Agreement provides that PSEG Energy Resources & Trade LLC will pay PSEG Nuclear LLC for all of its monthly operating costs which are deemed to be equal to its monthly revenues and that the contract will continue in effect until terminated by agreement of the parties in writing. PSEG Energy Resources & Trade LLC is the market-facing subsidiary of PSEG Power LLC and this intra-corporate contract is in place solely to allow PSEG Energy Resources & Trade LLC to market (sell) the output of the Unit.

PSEG Nuclear does not anticipate that the Unit will enter into any other contracts for energy supply in the future.
